Communication.—The Quebec Steamship Co. maintains a regular fortnightly passenger and freight service from New York to St. Thomas, St. Croix and lower islands. The Clyde Steamship Co. (Raporel Line) operates a semi-monthly freight service from New York to St. Thomas, St. Croix and Leeward Islands. The New York and Porto Rico Steamship Co., the Atlantic Fruit Line, and the Red "D" line operate regular service from New York to San Juan, Porto Rico, whence schooner service may be had to ports in the Virgin Islands. There is also a weekly passenger, freight and mail service by the Bull Insular Steamship Co. between San Juan, Porto Rico and St. Thomas and St. Croix. Each Municipality has a post office and a cable office and telephone systems. There are powerful radio stations at St. Thomas and St. Croix and a cable office at each place also.

PHILIPPINE ISLANDS.

These islands, ceded by Spain to the United States by the treaty of peace concluded between the United States and Spain on April 11, 1899, form the largest island group of the Malay Archipelago, and extend almost due north and south from Formosa to Borneo and the Moluccas, embracing an extent of 16° of latitude and 9° of longitude.

Governor-General.—Major-General Wood, appointed October 5, 1921.

Government.—The government of the Philippine Islands is administered through three separate and co-ordinate departments, namely, the executive, the legislative, and the judicial.

The Governor-General is the chief executive of the Islands, and represents the sovereign power of the United States. He is appointed by the President of the United States, by and with the advice and consent of the Senate. Under him are the secretaries of six executive departments, the Department of the Interior, the Department of Public Instruction, the Department of Finance, the Department of Justice, the Department of Agriculture and Natural Resources, and the Department of Commerce and Communications. With the exception of the Vice-Governor, who is appointed in the same way as the Governor-General, and who at the same time is Secretary of Public Instruction, all the secretaries are Filipinos.

The Philippine legislative body is made up of two houses, the Senate and the House of Representatives. There are in all ninety-three representatives and twenty-four senators, representing the forty-eight provinces of the archipelago, all of whom are elected by popular vote, with the exception of nine representatives and two senators, who are appointed by the Governor-General to represent Agusan, Bukidnon, Cotabato, Davao, Lanao, Zamboanga, Sulu, Nueva Viscaya, and the Mountain Provinces.

A Council of State, created by Executive Order subsequent to the enactment of the present Organic Act, commonly known as the Jones Law, forms the connecting link between the executive and the legislative branches of the insular government, and represents the people's counsel in the administration of the government. The Council of State is composed of the Governor-General, as President, the Presidents of both houses of the Legislature, and the Secretaries of the Departments.

The provincial and municipal governments are supervised by the Department of the Interior through the Executive Bureau and the Bureau of Non-Christian Tribes, the former exercising authority over the thirty-seven regular organised and two of the so-called special provinces, and the latter over nine special provinces. The chief executive of each province is a provincial governor. He and two other members form the provincial board, which constitutes the legislative branch of the provincial government. All these three offices are filled by popular vote, while in the special provinces, with the exception of Palawan, Batanes, Agusan, Davao, Nueva Viscaya and Zamboanga, the provincial governors are appointed officials. The municipal president is the chief executive of each town or municipality, and the local legislative branch consists of a municipal council of from eight to eighteen councillors, depending upon the size of the municipality. The president, the vice-president, and the councillors are all elected by popular vote.

Area and Population.—The group is composed of about 7,000 islands and islets, of which only 466 have areas of one square mile or over. The eleven most important islands are Luzon, with an area of 40,814 square miles; Mindanao, 36,906 square miles; Samar, 5,124 square miles; Negros, 4,902 square miles; Palawan, 4,500 square miles; Panay, 4,448 square miles; Mindoro, 3,794 square miles; Leyte, 2,799 square miles; Cebu, 1,695 square miles; Bohol, 1,534 square miles; and Masbate, 1,255 square miles.

The total population, according to the Philippine Census of 1918, is 10,314,310, chiefly of Malay race, 91 per cent. of whom are Christians, and only 932,953, or 9 per cent., are Moros and Pagans, though these are fast taking advantage of the all-pervading system of public schools. The population of Manila, the capital and the leading commercial and industrial centre, is 285,806, of whom 259,437 are Filipinos, 17,760 Chinese, 1,612 Japanese, 2,916 Americans, 2,050 Spaniards, 664 English, 201 Germans, 121 French, 71 Swiss, and the rest of other nationalities.

Other towns with their estimated present population, including suburbs, are : Iloilo on Panay, 49,114 ; Cebu on Cebu, 65,502 ; Albay, 52,766 ; Laoag, 38,469 ; Vigan, 17,765 ; Naga, 9,396 (all on Luzon) ; and Zamboanga on Mindanao, 30,798. Baguio, in the Mountain Province, is the summer capital, corresponding to Simla in India, and has a population of 5,464.

Movement of population in 1921 : Births, 343,287 : deaths, 195,477 ; marriages, 67,463.

Justice and Defence.—For the administration of justice there are A supreme court, with a chief justice (a Filipino) and eight associate justices (three Filipinos) ; 26 judicial districts, each with a judge of first instance, except the ninth district, which has four judges, the same covering the city of Manila. There are fourteen auxiliary judges of first instance who aid the judges of first instance of the districts to which they are assigned or take their place in case of temporary absence, sickness or incapacity. There is one justice of the peace and one auxiliary justice of the peace for the city of Manila, for the city of Baguio, and for each municipality. In the city of Manila, the justice of the peace takes cognizance of civil cases only, the criminal cases being placed under the jurisdiction of a municipal court.

Public order is maintained through the municipal police and the Philippine Constabulary. The strength of the Constabulary at present is 382 officers and 5,902 enlisted men, distributed throughout the Archipelago and occupying 133 stations. The United States maintains in the Philippine Islands at present a force of about 13,000 troops of the United States Army. This includes 5 regiments of Filipino soldiers.

Religion.—The dominant religion of the islands is the Roman Catholic (7,751,176 adherents). In 1901 an independent Filipino Church was founded. The religious dogmas promulgated and followed by this new sect are practically identical with those observed by the Church of Rome. The Independent Filipino Church has 1,413,506 followers. Several Protestant denominations have extensive organisations and have many communicants (128,362). The inhabitants of Mindanao and Sulu are to a large extent Mohammedans and there are pagan tribes (now numbering about 300,000) in some of the more remote regions.

Education.—Education in the Philippines is free, secular, and co-educational, its principal aim being the spread of literacy on the basis of a common language, the English. In December, 1921, there was an annual enrolment of 1,070,255 pupils in the 7 659 public schools, with 352 American and 13,829 Filipino teachers. The annual expenditure on education is about 10,000,000 dollars. There are a number of special schools, including the Philippine Normal School, the Philippine School of Arts and Trades, the Central Luzon Agricultural School, the Philippine Nautical School, the Philippine School of Commerce and the Scho I for the Deaf and the Blind, together with some 250 schools specializing in agriculture, a number of which are particularly intended to benefit the non-Christian population. For higher education there is the State-supported University of the Philippines ; the total number of students in 1921-22 was 2,698 in the collegiate departments and 2,020 in the other departments ; and two private universities, the University of Santo Tomas, founded in 1611, conducted by the Dominican order, and the National University. There are also 384 private schools of all grades, with a total of 30,050 pupils and 1,229 teachers.

On July 13, 1922, there were 34 newspapers and periodicals published in English, 18 in English-Spanish, 24 in Spanish, 10 in Spanish-native

dialects, 7 in English-Spanish-native dialects, 6 in Chinese, 27 in native dialects, 6 in English-native dialects, and 1 in English-Chinese.

Finance.—The revenues and expenditures of the central government for six fiscal years were:—

—	1916	1917	1918	1919	1920	1921
	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars
Revenues	22,852,428	27,390,621	31,345,053	39,843,412	49,702,456	65,099,857
Expenditure	20,453,407	22,704,359	28,748,022	43,371,295	42,005,189	59,097,105

The total debt service in 1921 amounted to 1,905,632 dollars.

Production and Industry.—The principal products are rice, Manila hemp, coconut, sugar cane, corn, tobacco and maguey. During the year ending June 30, 1921, the areas planted were: abaca, 548,094 hectares; coconuts, 417,959 hectares; sugar cane, 241,345 hectares; tobacco, 90,980 hectares; rice, 1,673,381 hectares; corn, 543,828 hectares, and sweet potatoes, 63,561 hectares. The principal fruit is the banana, with 83,206 hectares planted; there are also mangoes, 10,534 hectares; and papayas, anonas, pilinuts (*Canarium commune*), and mandarin and oranges. The cultivation of rubber is increasing yearly, especially in the southern provinces where the large plantations are located. The total area planted throughout the Islands is 4,600 hectares.

In the production of copra and coconut oil, the Islands are classed among the foremost countries in the world. During the year 1921, there were produced 374,622 metric tons of copra which represented the return of only 56 per cent. of the trees cultivated. The remaining trees were still young.

The areas of uncultivated land are very considerable. The Archipelago has a total area of 29,629,600 hectares, and of these only 3,643,600 hectares, or 12 per cent., are cultivated, the remainder being distributed as follows: commercial and non-commercial forest lands, 18,848,300 hectares, or 64 per cent.; grass or bare lands, 5,529,300 hectares, or 19 per cent.; mangrove swamps, 262,700 hectares, or 1 per cent.; unexplored lands, 1,345,700 hectares, or 4 per cent.

The Islands possess about 72,224 square miles of forests furnishing chiefly timber, but also gums and resins, great quantities of rattan and bamboo, tan and dye barks and dye woods.

The Philippines is rich in mineral wealth, as shown by the reports of new discoveries of mineral deposits. The most important mineral deposits found in the Islands are gold, iron, silver, copper, and coal. Other minerals of non-metallic nature capable of great development are clay, stone, limestone, lime, asbestos, gypsum, gas, petroleum, sulphur, asphalt, alum, manganese, gems and precious stones, salt, and mineral waters. Total value of mineral production in 1917, 3,015,225 dollars; 1918, 3,266,677 dollars; 1919, 3,694,236 dollars; 1920, 3,805,385 dollars.

On account of the abundance of suitable local materials for hat-making and the excellent prices offered for Philippine hats, the manufacture of hats is a profitable industry. In 1919, 540,832 hats, valued at 1,470,026 pesos, were exported, chiefly to the United States, United Kingdom, Italy, and France. Philippine hats are made from native materials, such as bamboo, buri, sabutan, and pandan.

Commerce.—The values of imports and exports for fiscal years ending June 30 are stated as follows in U.S. dollars :—

	1918	1919	1920	1921	1922
Imports .	83,763,290	107,774,000	123,132,111	160,814,664	166,030,738
Exports .	114,576,393	113,118,000	152,381,241	109,029,726	188,955,206

In the calendar year ending June 30, 1922, the commerce was distributed as follows (in Philippine pesos, 1 peso = 50 cents U.S. currency) :—

Country	Imports (Pesos)	Exports (Pesos)	Country	Imports (Pesos)	Exports (Pesos)
United States .	100,227,149	118,336,340	Switzerland .	1,277,874	62,027
Hawaii .	1,619,402	446,242	Italy .	91,334	599,307
Guam .	736	395,173	Germany .	899,449	8,847,892
United Kingdom .	6,056,203	10,358,794	Netherlands .	356,329	4,966,157
Spain .	933,547	7,224,000	Belgium .	60,754	830,906
Japan .	18,271,182	13,024,075	Canada .	299,505	1,354,209
China .	16,113,942	5,582,457	Denmark .	54,260	1,600
Hong Kong .	189,702	7,846,386	Japanese China .	507,579	60,904
British E. Indies .	2,290,637	2,468,251	Austria-Hungary .	25,449	325,117
Australasia .	5,070,052	1,321,306	Norway .	14,295	109
Dutch E. Indies .	5,620,314	537,601	Sweden .	9,170	—
France .	1,582,771	4,192,887	Other countries .	100,709	410,898
French E. Indies .	3,522,767	166,567			
Siam .	845,124	94,920	Total .	166,030,738	188,955,206

Shipping and Communications.—The greatest bulk of overseas shipments is made from the port of Manila, although other smaller ports also have direct connections with foreign ports. The most important of these are Iloilo, Cebu, and Zamboanga. More than 400 inter-island vessels are now operated in the coastwise trade of the Philippines. During 1921, 877 foreign vessels, with an aggregate net tonnage of 2,667,855, entered the Islands, while 983 vessels, with an aggregate net tonnage of 2,872,968, were cleared for foreign ports.

On August 1, 1922, there were in operation, 910 post-offices, 429 money-order offices, 6,415 miles of insular telegraph lines, and 908 miles of cable, with 372 telegraph offices, and 21 radio stations. At the same time there were 670 postal savings banks in operation, with 151,757 accounts. The amount of deposits in the banks on August 1, 1922, was 5,749,916 pesos (Philippine currency). Of the depositors 144,452 were Filipinos.

When the United States entered the islands in 1898 there was but a single line of narrow gauge track running between Manila and Dagupan, a distance of about 120 miles. Additions have been made to this until the total length of lines in operation at the close of the calendar year, 1916, was 881 miles (750 miles on Luzon, 72 on Panay and 59 on Cebu). The lines are owned by two companies, the Manila Railroad Company, now taken over by the Government, and by the Philippine Railway Company, which the Government is about to take over. Total length of roads (December 31, 1921), 6,159 miles. Besides the foregoing roads there were 1,941 miles of trails passable for horses only.

Banking and Coinage.—There are twelve banks doing business in the Islands: the International Banking Corporation, Hong-Kong and Shanghai Banking Corporation, Chartered Bank of India, Australia, and China, the Bank of the Philippine Islands, formerly the Banco Español Filipino, the Philippine National Bank, the Yokohama Specie Bank, the Asia Banking Corporation, the China Banking Corporation, the Chinese American Bank of Commerce, the Philippine Trust Company, the Postal Savings Bank and the Monte de Piedad. The Philippine National Bank was inaugurated, under a special charter granted by the Philippine Legislature, on May 2, 1916, with an authorised capital of 10,000,000 dollars, of which 5,050,000 dollars was subscribed by the Government. On July 1, 1916, the Bank was declared the sole Government depository.

The coins used in the Philippine Islands are of the following denominations: Peso, one-half peso, peseta (20 centavos), media peseta (10 centavos), five centavo, and one centavo. Treasury certificates and bank notes are issued in one, two, five, ten, twenty, fifty, one-hundred, two-hundred, and five-hundred peso denominations. The Philippine peso is equivalent to fifty cents of the United States money. The maintenance of the parity of the peso with the gold is provided for by the Currency Reserve Fund Act of May 6, 1918. The new peso now coined contains twenty grams of silver, .800 fine; the fifty-centavo piece contains ten grams of silver, .750 fine; the twenty-centavo piece, four grams of silver, .750 fine; and the ten-centavo piece, two grams of silver, .750 fine. The Philippine coins have been until lately coined in the United States, but recently the Mint of the Philippine Islands, located in Manila, was established for this purpose.

British Consul-General.—Thomas Harrington.

Vice-Consul at Iloilo.—Harold Walford.

Vice-Consul at Cebu.—Guy Walford.

GUAM.

The Island of Guam, situated at the southern extremity of the Mariana Archipelago, in latitude 13° 26' N, longitude 144° 43' E, is the largest island of that group. It was ceded by Spain to the United States by the Treaty of Paris (December 10, 1898). It is under the jurisdiction of the Navy Department of the United States, and has been designated as a Naval Station for the purposes of government and protection. A garrison of marines and a shore naval force are maintained here. Guam is a saluting port.

The length of the island is 32 miles, the breadth from 4 to 10 miles, and the area 210 square miles. Agaña, the seat of Government, is about eight miles from the anchorage in Apra Harbour. The port of entry is Piti. The number of inhabitants (exclusive of the military establishment) on June 30, 1922, was 14,996, of whom 14,491 were classed as 'natives.' The birth-rate was 46.3, and the death-rate 18.9 per 1,000. The native language is Chamorro, but Spanish and English are also spoken.

The Governor of the island, a naval officer appointed by the President, takes precedence over and is entitled to the honours due to an Admiral. The Governor is also the Military Commander of the island, Commandant of the naval station, and combines the functions of the executive, legislative and judicial power of the Government. The judiciary system comprises one police court, an Island Court, a Court of Equity, a Higher Court of Equity,

and one Court of Appeal. The Spanish Colonial laws, modified when necessary by executive general orders of the Governor, are still in force.

Elementary education is compulsory. There are 2,274 pupils registered, 1,669 of whom are of school age (7 to 12). English, handicrafts and agriculture are taught.

There is a Government radio station on the island, which is in cable telegraphic communication with all parts of the world. There is a monthly mail service per west bound U.S. army and navy transports, from San Francisco, via Honolulu, and to Manila.

The port is closed to foreign vessels of war and commerce except in special cases. Permission to visit the island must be obtained of the Navy Department in each case.

The products of the island are maize, copra, rice, sweet potatoes, coffee, cocoa, and sugar, besides valuable timber. There are about 4,000 head of cattle, including 900 water buffaloes. The imports into the island in the year ending June 30, 1922, amounted to 643,869 dollars, and the exports to 70,814 dollars.

The official currency is that of the United States.

Governor.—A. Althouse, Captain U.S. Navy (appointed November 29, 1921).

SAMOAN ISLANDS.

(AMERICAN SAMOA.)

The Dutch were the first to visit the Samoan Islands, in 1722; French explorers followed in 1768 and 1787. In 1791 a British war vessel visited the islands.

The history of American Samoa commenced in the year 1872 when the harbour of Pagopago, in Tutuila, was ceded to the United States for a naval and coaling station. In 1878 this cession was confirmed and rights of freedom of trade and extra-territorial jurisdiction in Samoa were granted. On June 14, 1889, the conference between the representatives of the United States, Germany, and Great Britain was held at Berlin, resulting in the treaty recognising the Samoan Islands as neutral territory, with an independent government, the natives being allowed to follow their own laws and customs, while for civil and criminal causes, in which foreigners were concerned, there was established a Supreme Court of Justice, in which an American citizen was the presiding judge. This arrangement continued till 1898, when disturbances regarding the right of succession to the office of king arose. In 1899 the kingship was abolished, and, by the Tripartite Treaty of November 14 of that year, accepted in February 13, 1900, by the United States, Great Britain and Germany renounced in favour of the United States all rights over the island of Tutuila and the other islands of the Samoan group east of 171 degrees of longitude west of Greenwich, the islands to the west of that meridian being assigned to Germany.

The Island of Tutuila, 70 miles from Apia, has an area of about 40 square miles, with a population of 6,185 (3,166 males and 3,019 females), according to the 1920 census. Tau has an area of 14 square miles, and the other islets (Ofu and Olosega) of the Manua group have an area of about 4 square miles with a population of 1,873 (926 males and 947 females). The

total area of American Samoa is thus 58 square miles. According to the 1920 census American Samoa thus contained 8,058 inhabitants (4,092 males and 3,966 females). The harbour at Pagopago, which penetrates the south coast like a fiord, is the only good harbour in Samoa. It is a United States naval station under a Commandant, the Government having acquired there a land area of about 40 acres.

The Commandant is also the Governor of American Samoa by commission from the President of the United States. He appoints officers and frames laws or ordinances, but native customs (not inconsistent with United States laws) are not changed without the consent of the people.

The islands are organised in three political divisions corresponding to the old Samoan political units:—1, the Eastern District of Tutuila, with the islet of Aunu'u; 2, the Western district of Tutuila; and 3, the District of Manua, composed of Tau and the neighbouring islets. In each District there is a native governor, under whom are native chiefs in the counties, these having the control of village chiefs. Judicial power is vested in village courts, in five judicial district courts, and in a high court.

There are no public lands in American Samoa. Nearly all the land is owned by natives. The soil is fertile; the fruits comprise orange, grape fruit, lime, banana, mangoes and alligator pears. Copra is abundant and is of excellent quality.

The Island Government has established a system of public schools at 19 school centres, giving every child over 6 years of age the opportunity of an elementary English education: 1,533 pupils enrolled. The four religious missions here also conduct schools for pupils of all ages, instruction being given chiefly in Samoan. Pupil enrollment is as follows: London Missionary Society (established 1830), 1,962; Roman Catholic (French), 356; Wesleyan (Australasian), 96; and Mormon, 155. Mission schools, total, 2,569 pupils.

The natives pay their taxes in cash, on the 15th of December of each year, after the budget for the ensuing year has been prepared and approved. The annual output of copra is approximately 1,500 tons. There is a native guard (Fitaftas) of about 85, including the 22 members of the native band, trained by a drill sergeant and a bandmaster of the U.S. navy. The chief island products, besides copra, are taro, breadfruit, yams, coconuts, pine-apples, oranges, and bananas. Copra is the only article exported. Imports: 1918, 179,769 dollars; 1919, 182,959 dollars; 1920, 225,295 dollars. Exports: 1918, 178,676 dollars; 1919, 90,421 dollars; 1920, 98,213 dollars.

About 50 miles of public roads have been constructed. There is a United States Naval high-powered radio station located on the island of Tutuila, which has daily communication with New Zealand, Australia, Honolulu, the United States, and the islands of the Pacific. This radio station is open to commercial traffic. The fast mail steamers of the Oceanic Steamship Company touch here on their regular trips between the United States, Hawaii and Australia.

PART THE THIRD

OTHER COUNTRIES

ABYSSINIA.

(ETHIOPIA.)

THE ancient Empire of Abyssinia, or 'Ethiopia,' includes the Kingdoms of Tigré, with Lasta, in the north-east; Amhara, with Gojam, in the west and centre; Shoa in the south; besides territories and dependencies as far as Kaffa in the south and Harar in the south-east, with considerable portions of the Galla and Somali Lands. The following are the provinces into which the country is divided:—(1) Harar and Dependencies; (2) Wollo; (3) Kassa and Magi; (4) Goré; (5) Tigré; (6) Damot and Gojam; (7) Equatorial Provinces; (8) Gondar; (9) Jimma. The whole area is 350,000 sq. miles. For treaties relating to the boundaries of Abyssinia see THE STATESMAN'S YEAR-BOOK for 1907, p. 667. An agreement was reached in December, 1907, for the delimitation of the frontier towards British East Africa. The frontier follows the Dawa up to Ursulli, whence it runs mainly westwards, passing the south end of Lake Stephanie, and, after crossing the north-eastern branch of Lake Rudolf, runs mainly northwards and terminates at 6° N. 35° E. This frontier, however, is not yet finally delimited and accepted by the Abyssinians.

Government.

By the convention of Addis Abbaba of October 26, 1896, between Italy and King Menelik, the independence of Abyssinia was recognised.

Under an Agreement signed December 13, 1906, on behalf of Great Britain, France, and Italy, the three Powers undertake to respect and endeavour to preserve the integrity of Abyssinia; to act so that industrial concessions granted in the interest of one of them may not injure the others; to abstain from intervention in Abyssinian internal affairs; to concert together for the safeguarding of their respective interests in territories bordering on Abyssinia; and they make agreements concerning railway construction in Abyssinia and equal treatment in trade and transit for their nationals.

After the overthrow of Theodore, King of Amhara, by the British in 1868, the suzerain power passed to Prince Kassai of Tigré, who assumed the old title of Nigusa Nagasth ('King of Kings'), and was crowned in 1872 as Johannes II., Emperor of Ethiopia. After the death of this potentate in 1889, Menelik II., King of Shoa (born 1842), G.C.B., G.C.M.G., became the supreme ruler of Abyssinia. Menelik died in December, 1913, and was succeeded by Lij Yasu, born in 1896, son of his second daughter, Waizeru Shoa Röggä and Ras Mikael, the chief of the Wollo Gallas.

On September 27, 1916, Lij Yasu was deposed by public proclamation, and **Waizeru Zauditu**, another daughter of Menelik, born 1876, was nominated Empress, and Ras **Taffari**, G.C.M.G., proclaimed heir to the throne. The Empress was crowned at Addis Abbaba on February 11, 1917. To a great extent the exercise of power is in the hands of Ras Taffari.

The political institutions are essentially of a feudal character, analogous to those of early mediæval Europe. There is a vague State Council consisting

of the most important *rases*, under whom, for administrative purposes, are governors of districts and provinces and chiefs of villages. In August, 1919, Cabinet Government was introduced after over a year's personal administration by the Regent, but has since again fallen into disuse. Domestic slavery is an acknowledged institution.

The Abyssinian Army in the field consists of two main parts. The standing army composes the nucleus, and the remainder of the forces are drawn from the chiefs and their retainers summoned in time of war, a sort of militia. Besides the above, a varying number of irregulars may join the army on the outbreak of war. The standing army, instituted by Menelik, forms in effect the paid standing garrison of each province, and might amount altogether to something under 100,000 men. Both they and the militia amounting to perhaps another 200,000 men, are very loosely organised, and have very little in the shape of transport or modern equipment. Practically every man is armed with a rifle, and often with shield and sword as well.

Population.

According to recent estimates the population, which is mainly of Semitic origin, numbers $11\frac{1}{2}$ millions, and consists of four groups—the Gallas and Somalis, in the south and south-west, the Shoans in the centre, the Tigrisians in the north, and the Danakil in the east. The Abyssinians, properly so called, number rather less than $3\frac{1}{2}$ millions, and inhabit the provinces of Tigré, Amhara, Gojam, and Shoa (in part), covering an area of over one-third of the whole country. They are mostly Christians. The Gallas, who are for the most part Mohammedans, comprise one-half of the entire population, and are a pastoral and agricultural people. The Shoans, who are Christians, number 1,500,000 and furnish the ruling class. Everyone is a soldier, and the present ruler depends upon them to maintain her sovereignty. The Tigrisians are a lighter coloured people and show their Semitic descent. They formerly furnished the rulers of Ethiopia. The Danakil are Mohammedans, and on account of the inaccessibility of their country preserve a sort of independence, merely paying an annual sum to the Emperor as a tribute. There are also some Negroes (in the South-West), and the Falashas (of Jewish religion), in the N.E. centre with a number of non-natives (Indians, Arabs, Greeks, Armenians, and a few Europeans) in the towns.

Except Harar, and perhaps in the north, there are no towns in Abyssinia in our sense of the word—not even Addis Abbaba, which consists of villages and suburbs scattered round the Palace, and is about three miles in diameter. The most important towns, politically and commercially, are: Gondar, capital of Amhara, 3,000; Adua, capital of Tigré, 5,000; Axum, ancient capital of Ethiopia, and still the seat of the Abuna, 5,000; Antalo, former capital of Tigré, 1,000; Ankober, former capital of Shoa, 2,000; Addis Abbaba, present capital of Abyssinia, and Shoa 40,000–50,000 (with a foreign population of about 1,500, of whom about 1,000 are British Indian and British Arab subjects, Greeks and Armenians); Debra-Tabor (Mount Tabor), Mágdala, and Makallé; Gore, Saiyu, Nekempti, Saméré, 3,000–4,000, and Sokoto, 1,500, important trading centres; Mahdera-Mariam (Mary's Rest), 4,000. The population of Harar is estimated at 50,000, of whom about 300 are Europeans; at Diré Dawa there are a considerable number of Europeans. Gambela, in Western Abyssinia, is a trading station leased to the Sudan Government. It is an important outlet for the trade in the West. A service of steamers is maintained from June to November with Khartum.

Religion and Instruction.

Since the conversion of the Abyssinians to Christianity in the fourth century they have remained members of the Alexandrian Church. The Abuna, or head bishop, is always a Copt, appointed and consecrated by the Coptic Patriarch of Alexandria, but his influence is controlled by the Echehgeh, a native ecclesiastical dignitary, who presides over the spirituality, numbering about 100,000 ecclesiastics. Both Copts and Abyssinians are monophysite, rejecting the decrees of the Council of Chalcedon (A.D. 451).

Education has hitherto been restricted to the teaching of the secular and regular clergy, but in October, 1907, an edict was issued enjoining compulsory education on all male children over the age of 12. This is, however, a dead letter. There are schools at Addis Abbaba and Harar. The attendances are most irregular, and the institution is unpopular as yet with the ignorant people.

Justice is administered by the provincial governors, and *shums*, or petty chiefs, with the right of appeal to the Emperor. The legal system is said to be based on the Justinian Code. The penal code is based on the Mosaic law. Foreigners are subject to the jurisdiction of a special mixed court or to their own consular Courts according to circumstances.

Agriculture.

The chief industries are pastoral and agricultural. Cattle, sheep, and goats are numerous. The horses of the country are small but hardy; mules are bred everywhere, being used as pack animals; donkeys are also small and serve for baggage animals. The soil belongs theoretically to the Negus; the idea of landed property scarcely exists among the populace, and agriculture is therefore backward. Cotton, the sugar-cane, date-palm, coffee, and vine might thrive well in many districts, but are nowhere extensively cultivated. The production of Harari coffee (long berry Mocha) is on the increase. Besides this, which is cultivated, there grows more especially in southern and western Abyssinia a wild coffee plant, yielding a berry known as Abyssinian coffee, which grows in extensive forests. The supply is said to be unlimited. The native produce includes hides and skins, barley, millet (*dhurra*), wheat, *gesho* (which serves as a substitute for hops), and tobacco, but not in sufficient quantities for export. Manufacturing industries are also in a backward state. The forests abound in valuable trees and rubber. Iron is abundant in some districts and is manufactured into spears, knives, hatchets, &c. Placer gold mining and washing are carried on in many districts; coal is mined in the Shoa province, but is not of commercial importance; silver, copper, and sulphur have been found.

Commerce.

The principal artery of trade is the French Ethiopian railroad, but caravans also do a large trade in the interior. The chief trade routes besides the railway are the following:—(1) Khartum-Gambella, Khartum-Gallabat, and Khartum-Roseires (Sudan); (2) Mombasa-Nairobi-Moyale (British East Africa); (3) Bulbar-Ogaden (British Somaliland); (4) Massawa-Asmara-Gondar, Assab-Dessie (Italian Eritrea); (5) Mogadishu-Lugh-Dolo-Arusi (Italian Somaliland).

The exports consisted mainly of hides and skins, coffee, wax, ivory, civet, and native butter. The imports comprised grey shirting (*abu jedid*), cotton goods, provisions, liquors, railway material, sugar, and petroleum. The imports are chiefly from England, France, India, Italy, and the United

States. The total trade between Abyssinia and Great Britain for 5 years (according to Board of Trade returns) was as follows:—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Abyssinia.	—	28,947	8,986	4,800	6,442
Exports to Abyssinia	12,730	10,869	81,336	54,387	4,188

Abyssinia has commercial treaties with Great Britain (1897) for 'most favoured nations treatment'; with Italy (1897), terminable on six months' notice; with the United States (1903) for 10 years, then subject to one year's notice; with Germany and Austria-Hungary (1905) for 10 years, then subject to one year's notice; with France (1908) for 10 years, and then subject to a year's notice.

Communications.

Roads in Abyssinia are mere tracks, and transport is effected by means of mules, pack-horses, donkeys, and, in some places, camels. In the capital and its vicinity a few miles of metalled road have been constructed. In 1896 the Franco-Ethiopian Railway Co. was formed for the construction of a line from Jibuti in French Somaliland, which reached the capital in 1917. The line is of metre gauge, with a total length of 495 miles. Trains run twice weekly in each direction, covering the distance in three days, but running by day only. The railway is under French management, and depends financially on a subvention from the French government.

There are telegraph lines (1,056 miles) connecting Addis Abbaba with Harar, with Sidamo, with Jibuti in French Somaliland, and with Massawa in Eritrea. Telephone lines connect Addis Abbaba with Harar, also with Gore and Gambela (in the west), Jimma and Sharada (south-west), Dessie (north), and Debra Tabor and Gojam, and with Ankober, and Asmara with Adua and Barromeida.

Money and Credit.

The Bank of Abyssinia, with authorised capital of 500,000*l.* and paid-up capital of 125,000*l.*, has its head office at Addis Abbaba and agencies at Harar, Diré Dawa, Goré, Gambela and Dessie. By its constitution the Governor of the National Bank of Egypt is its President, and its governing body sits at Cairo. The amount of the bank-note issue on December 31, 1920, was 214,765 dollars, of which 155,215 dollars were in circulation and 59,550 dollars at the bank.

The current coin of Abyssinia is the Maria Theresa dollar, but the Menelik dollar is the standard coin. This coin, the *talari*, or dollar, worth about 2*s.*, weighs 28·075 grammes, ·835 fine. It has nominally the same value as the Maria Theresa dollar, but in the capital is disliked, and in some places is not taken at all. Other silver coins are the half, quarter, and sixteenth (girsh or piastre) of a talari, and there is also a copper coin, the *besa* (= one-hundredth of a dollar). Various articles, however, are used as medium of exchange; bars of salt are regularly accepted as money all over the country, in two sizes, and at a fluctuating rate according to supply and cost of transport. Cartridges are also currency, although there is a dead-letter edict against them; and in most places barter prevails.

The metric system of weights and measures is used to a certain extent in the capital and district bordering the railway line. The principal native weights and measures, which are also used in trade with foreigners, are as follow.

Weights and Measures.**WEIGHTS.**

Oket = weight of Maria Theresa/Menelik dollar = 28,067 grammes, approximately 1 oz. avoirdupois.

Natr = 30 okets, approximately 1 lb. 14 ozs. avoirdupois.

Furasula = 20 natrs, approximately 37½ lbs.

Kantar = 100 lbs.

1 *Waggia* (for ivory) = 480 dollars weight.

1 „ (for rubber) = 640 dollars weight.

LINEAL MEASURES.

Kinnal = French Coudée (length of forearm and hand) = cubit = 50 centimetres = 19¾ inches.

Kkalad = 130 kinnals = 65 metres = 213½ feet, say 71 yards.

LAND MEASURE.

The measure is a *Gasha*, which varies according to the quality of the land, and ranges between 15 *kkalads* by 25 *kkalads*, and 7 *kkalads* by 11 *kkalads*, the latter equalling roughly 80 acres.

GRAIN MEASURES.

10 *kounna* = 1 *ladan*.

2 *ladan* = 1 *dawala* = 80 kilos.

MEASURE FOR HONEY AND CIVET.

10 *wanche* (horn cups) = 1 *goundo* = about 3 litres.

CUBIC MEASURE.

Does not exist, the cubic contents of an object being expressed by detailing its length, breadth and height as near as circumstances permit.

LIQUID MEASURES.

These apparently do not exist as Abyssinian measures, the litre being usually adopted.

Diplomatic Representatives.**1. OF ABYSSINIA IN GREAT BRITAIN.**

None.

2. OF GREAT BRITAIN IN ABYSSINIA.

Minister.—Claude Russell (appointed Sept. 20, 1920).

Consul.—Major J. H. Dodds, C.M.G.

There is a Consul also at Harar, Dangela, Goré, Mega, and Maji.

AFGHÂNISTÂN.

AFGHÂNISTÂN is a country of Asia lying between parallels 29° and 38° 20' of north latitude, and 61° and 72° of east longitude, with a long narrow strip extending to 75° east longitude (Wakhân). On the north-east, the boundary follows a line running generally westward from a fixed point near one of the peaks of the Sarikol Range to Lake Victoria, thence along the line of that branch of the Oxus which issues from the lake, and so, following the course of the Oxus, to Khamiab. From Khamiab, the line runs in a south-westerly direction to Zulfikâr, on the river Hari-Rûd, and thence by Kâl-i-Kalla to Hashîdan, thence to the south, between Hashtadan

and Siah Koh, north of Bandan, the boundary is undefined. The Sistan lake and the Helmund river form the boundary between Siah Koh and Band-i-Seistan, and thence the boundary runs south in a straight line to Koh-i-Malik Siah, where the frontiers of Persia, Afghánistán and Baluchistan meet. Here the boundary turns round and runs generally eastwardly to the Khwája Amran range. The eastern and southern boundaries of Afghánistán long remained uncertain, but the basis of a delimitation was settled, in 1893, at a conference between the Amír Abdur Rahmán and Sir Mortimer Durand, and the boundary agreed upon, with the exception of the Asmar section, has since been demarcated. The Amír agreed that Chitral, Bajaur and Swát should be included within the British sphere of political influence, while he himself was to retain Asmar and the Kunar valley above it, as far as Arnawai; also the tract of Birmal, west of Waziristan. In the subsequent demarcation, Káfristán was included within the countries, under Afghán control, and is garrisoned by the Amír's troops. Between March, 1903, and May, 1905, the boundary towards Persia was demarcated from Koh-i-Malik Siah to the Helmund, and thence to Siah Koh. In July, 1905, Sir Henry McMahon announced his award concerning disputed water rights over the Helmund river, but the award has not yet been ratified by the Persian Government. The Kháibar boundary was demarcated by Mr. J. L. Malley in 1919, and re-demarcated by Colonel Keene in 1921.

On November 22, 1921, a treaty between Great Britain and Afghánistán was signed at Kabul, in accordance with which Great Britain recognises the complete independence of Afghánistán, and agrees to an interchange of diplomatic representatives; while Afghánistán accepts the existing Anglo-Afghán frontier as demarcated in 1919. The Afghán government may import munitions of war through India. The treaty is for a period of three years.

For earlier British relations with Afghánistán, see THE STATESMAN'S YEAR-BOOK for 1916, pp. 662-3.

Amanullah Khán, the reigning Amír, the third son of Amír Habibullah Khán by his principal wife, Ulva Hazrat, was born on June 1, 1892, and succeeded on the assassination of his father, February 20, 1919. A son and heir was born to the Amír on June 5, 1921. The Amír has five brothers:—Inayatulla Khán (born Oct. 20, 1888), Hayatulla Khán (born Dec. 29, 1888), Kabirulla Khán (born Oct. 4, 1895), Asadulla Jan (born May 23, 1910), and Obedulla Khan (born Nov. 18, 1915). Uncles of the Amír are:—Aminulla Khán (born Oct. 12, 1885), Muhammad Umar Khán (born Sept. 16, 1889), and Ghulám Ali Khán (born Sept. 3, 1890).

The government of Afghánistán is monarchical under one hereditary prince, whose power varies with his own character, skill, and fortune. The dominions are politically divided into the four provinces of Kábul, Turkistán, Herat, and Kandahár, Badakhshán being now under Turkistán. Each province is under a *hákím* or governor (called Naib-ul-Hukuma), under whom subordinate officials dispense justice and collect taxes. Spoliation, exaction, and embezzlement are not infrequent.

Area and Population.—The extreme breadth of Afghánistán from north-east to south-west is about 700 miles; its length from the Herát frontier to the Kháibar Pass, about 600 miles; the area is about 245,000 square miles. The surrounding countries are, on the north, Russian territory and Bokhara on the west, Persia; on the south, the British Political Agency of Baluchistán and, on the east, the mountain tribes scattered along the north-western frontier of India, and included within the sphere of British influence in the North-Western Frontier Province. There are five

larger and two smaller provinces, in addition to the Province of Kábul, each under a Governor, and each possessing its own army.

Population about 6,380,500, the dominant race being the Afghans, of whom the leading tribes are the Durrani and the Ghilzáis, who amount to about 2,200,000 souls; then follow other Afghans, and the Tájiks, Hazáras, and Aimáks, and Uzbaks. The languages spoken are Persian and Pushtoo. The predominant religion is Islam.

The two largest towns are Kábul, the capital (population about 150,000), and Jalálábád. Other large towns are Kandahár (population 31,500) and Herát (population 20,000).

There are nine newspapers published in the country, 4 in Kábul, 2 in Kandahar, 1 in Jalálábád, 1 in Herát, and 1 in Chaharikar.

Justice.—Justice in criminal cases is administered by Government officials, in civil cases by a *Kazi*, or judge, who follows the law of the Koran.

The present Amír has instituted a Ministry of Justice to supervise the administration of justice. A Code of Criminal Procedure has also been instituted (June 18, 1921).

Finance.—The revenue of Afghánistán is subject to considerable fluctuations. The Government share of the produce recoverable is said to vary from one-third to one-tenth, according to the advantages of irrigation. The total revenue is estimated at between 12 and 13 million rupees, but this estimate is probably too low.

The late Amír received a subsidy from the Indian Government of Rs. 18,50,000 a year, in accordance with the treaty of 1893. But in accordance with paragraph 3 of the Peace Treaty of August 8, 1919, the arrears of the late Amír's subsidy have been confiscated and no subsidy is at present being granted to the Amír.

Defence.—In addition to his regular army the Amír's military forces are largely supplemented by local levies of horse and foot. The mounted levies are simply the retainers of great chiefs, or of the latter's wealthier vassals. The foot levies are now permanently embodied, and as irregulars form an auxiliary to the regular infantry. The mountain batteries are believed to be serviceable. As engineers, the Hazára 'sappers,' who are regularly enrolled, are excellent workmen. The Afghán army is said to number 98,000 men, including 18,000 cavalry and 386 guns. The real military strength of Afghánistán lies in the rugged and inhospitable nature of the country, the absence of good roads, and in the capacity and aptitude of its inhabitants for guerilla warfare, which have been greatly enhanced of recent years by the wholesale importation of rifles and ammunition from the Gulf.

Production.—Although the greater part of Afghánistán is more or less mountainous, and a good deal of the country is too dry and rocky for successful cultivation, yet there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables, and cereals. There are four classes of cultivators—1st, proprietors, who cultivate their own land; 2nd, tenants, who hire it for a rent in money or for a fixed proportion of the produce; 3rd, *bazgars*, who are the same as the *métayers* in France; and 4th, hired labourers. There are two harvests in the year in most parts of Afghánistán. One of these is sown in the end of autumn and reaped in summer, and consists of wheat, barley, *Erum Lens*, and *Cicer arietinum*, with some peas and beans. The other harvest is sown in the end of spring and reaped

in autumn. It consists of rice, millet, arzna (*Panicum italicum*), Indian corn, &c. The castor-oil plant, madder, and the assafoetida plant abound. Fruit, viz. the apple, pear, almond, peach, quince, apricot, plum, cherry, pomegranate, grape, fig, mulberry, is produced in profuse abundance. They form the principal food of a large class of the people throughout the year, both in the fresh and preserved state, and in the latter condition are exported in great quantities.

An extremely curious variety of fat-tailed sheep is native to Afghánistán. It is characterised by the immense weight* and size of its tail, caused by development of masses of fat, forming stores of nourishment which are drawn upon during the winter months, when fodder is scarce. These sheep furnish the principal meat diet of the inhabitants, and the grease of the tail is a substitute for butter. The wool and skins not only provide material for warm apparel, but also furnish the country's main article of export.

Northern Afghánistán is reputed to be tolerably rich in copper, and lead is found in many parts. Iron of excellent quality comes from Bajaur (outside Afghánistán), and the Farmúli district (or Birmal), and a gold mine is being worked under the supervision of a British mining expert at Kandahár; gold in small quantities is also brought from the Laghmán Hills and Kunar. Badakhshán was famous for its precious stones, especially lapis lazuli.

Silks, felts, carpets, articles from camels' and goats' hair, are some of the principal industries. At Kábul, soap, cloth, boots, and some other articles are manufactured for local consumption, but chiefly for the army. The sheepskin coat, or *postán*, manufacture is one of the important industries. The government factories and workshops at Kábul have as their partial object public education in mechanical methods and appliances, and as a feature of such work classes are organised in different industries.

Trade.—No accurate registration of the trade of Afghánistán has yet been obtained. The trans-frontier trade between India and Afghánistán (according to Indian statistics) was as follows in five years ending March 31:

—	1917-18	1918-19	1919-20	1920-21	1921-22
	£	£	£	£	£
Imports into India . . .	1,147,000	1,194,000	1,975,000	1,328,500	809,500
Exports into Afghanistan .	1,258,000	2,020,000	1,607,000	1,543,200	1,353,700

Of the exports from India to Afghánistán the chief items are cotton goods, indigo and other dyeing materials, sugar, hardware, leather and silver treasure. The imports into India include timber, fruits and vegetables, grain and pulse, ghi and other provisions, assafoetida and other drugs, spices, wool, silk, cattle, hides, and tobacco.

Communications.—Afghánistán is not a member of the International Postal Union, so that the sending of letters or parcels to the country is attended with some uncertainty and inconvenience. Letters, etc., from all parts of the world have to be sent, at present, to the Political Agent, Kháibar, Landi Kotal, who arranges to forward them to the Afghan border. Letters are despatched by runners twice a week; they require three days for delivery. Bulky packages and boxes are forwarded by the Afghan trade agent in Peshawar.

The trade routes of Afghánistán are as follows:—From Persia by Meshed to Herát; from Bokhára by Merv to Herát; from Bokhára by Karshi, Balkh, and Khulm to Kábul; from East Turkistán by Badakhshan and Kandahár

to Kábul; from India by the Kháibar road to Kábul; from India by the Gomál Pass to Ghazní and Kelat-i-Ghilzai; from Chaman, the terminus of the North-Western Railway beyond Quetta, to Kandahár and thence to Kábul or Herát.

There are no railways in the country. The Kháibar and Bolan roads are fit for light wheeled traffic as far as Kábul and Kandahár respectively. There is no wheeled carriage, except artillery, proper to the country, and merchandise is still transported on camel or pony back. There are practically no navigable rivers in Afghánistán, and timber is the only article of commerce conveyed by water, floated down stream in rafts. Telephonic communication exists between Dakka, Jalálábád and Kábul, a distance of 136 miles, and between Kábul and Kandahár. A telephone line will, it is understood, shortly be constructed between Kandahár and Herát.

Money and Currency.—The Kabuli rupee is the usual currency, though Government demands are often paid in kind. Currency notes of local manufacture in denominations of 1, 5, 25, 50, and 100 rupees, were introduced in July, 1920.

The Amir's mint at Kábul was for some years under the supervision of a European. The current coins in Kabul are Dínár, Paísa, Sháhí, Sannár or Misqálí, 'Abbási, Qarán, Rupee and Tumán. Dínár and Tumán are legendary coins intended for purposes of calculation only. Paísa and Sháhí are copper coins, and Misqálí, 'Abbási, Qarán and Rupee are silver coins.

10 Dínár	= 1 Paísa or Taka.	1½ 'Abbási	= 1 Qurán.
5 Paísa	= 1 Sháhí.	2 Qarán	= 1 Rupee.
2 Sháhí	= 1 Sannár, Saddínár or Misqálí	20 Rupees	= 1 Tumán.
2 Sannár	= 1 'Abbási.		

One Kabuli rupee is equal to about eightpence at the normal rate of exchange between Afghánistán and India.

Diplomatic Representatives.

1. OF AFGHÁNISTÁN IN GREAT BRITAIN.

Envoy and Minister.—Sirdar Abdul Hadi Khan (appointed January 21, 1922).

There are Afghan consular officers in India at Bombay, Calcutta and Karachi.

2. OF GREAT BRITAIN IN AFGHÁNISTÁN.

Envoy and Minister.—Lt.-Col. F. H. Humphrys, C.I.E. (appointed January 21, 1922).

Counsellor.—R. R. Maconachie.

Secretary.—Capt. E. T. R. Wickham.

Military Attaché.—Major Fraser.

There are consuls at Jalálábád and Kandahár.

ALBANIA.

(SHKYPENIA.)

THE geographical district known as Albania was made up of the Turkish Provinces of Scutari and of Yanina, and of the parts of the Ottoman vilayets of Kossovo and Monastir, which bordered upon those Provinces. The Albanians are divided into two principal groups—the Ghegs, who live in the north, and the Tosks, who live in the south.

Little is known of their early history. From 1431, when the Turks captured Yanina, the Albanians remained under Turkish rule, except for two brief periods of independence, first between 1443 and 1468, under Prince George Castriot II, surnamed Scanderbeg, and again in the eighteenth century, under the Tosk, Ali Tepelen of Yanina, in the south, and the Bushati Dynasty of Scutari, in the north. In 1880 the short-lived Albanian League was founded, and ruled Albania for two years, making an unsuccessful effort to obtain independence.

The Albanians have an hereditary aristocracy, and whilst in the north they are divided into clans or tribes, in the south the people look for guidance to a system of beys or chiefs, whose power is very considerable. The Albanian language is held by most authorities to be of Aryan origin.

The independence of Albania was proclaimed at Valona on November 28, 1912, and on December 20, 1912, the London Ambassadorial Conference agreed to the principle of Albanian autonomy. Subsequently that Conference approximately decided the frontiers of the new country, and agreed that a European Prince be nominated to rule it. Prince William of Wied, having accepted the crown of the new country from an Albanian deputation, which offered it to him at Neuwied, on February 21, 1914, arrived at Durazzo on March 7, 1914. The Government of the country was vested in the hands of the Prince, supported and advised by an International Commission of Control, the creation of which was agreed to by the Ambassadorial Conference in July, 1913.

After the outbreak of the European War in 1914, the Prince and nearly all the members of the International Commission left Albania, which fell again into a state of anarchy, and was invaded by Montenegro, Serbia,

Greece and Italy, the latter occupying the seaport of Valona. An attempt was made by Essad Pasha Topdani, who had been expelled from the country in May but who returned in September, after the departure of the Prince of Wied, to establish a military government with its seat at Durazzo. Eventually the Austrians overran Albania, capturing San Giovanni di Medua on January 25, 1916, and Durazzo on February 28, 1916. On June 3, 1917, the general in charge of the Italian forces proclaimed Albania an independent country, and a provisional Government was set up at Durazzo. Several cabinets have since ruled the country, the latest being that of Djaffer Ypi, which was formed on December 22, 1921. There is a Diet of 78 members, elected February, 1921. At the head of the State is the Council of Regents, composed of a representative of each of the religious bodies in the country. At the end of December, 1921, the Regents were as follows:

Bektashi Moslem.—Omer Pasha Vrioni.

Sunni Moslem.—Refik Toptani.

Catholic.—Antoine Pistuli.

Greek Church.—Sotir Peci.

Albania was admitted a member of the League of Nations on December 17, 1920.

Area and Population.—The frontiers of Albania, which were provisional, were shown in the map of the Balkan Peninsula which accompanied THE STATESMAN'S YEAR BOOK for 1914. An International Commission in 1922 partly determined the boundaries of Albania. The country measures 248 miles from north to south, and from 62 to 73 miles from east to west; the estimated probable area of the country is between 14,000 and 15,000 square miles, while the population is estimated at 831,877, and divided as follows:—

	North Albania	Central Albania	South Albania	Total	Per cent.
Mahomedan . . .	160,573	254,884	169,218	584,675	71
Roman Catholic . .	85,098	3,857	32	88,987	10
Greek Church . . .	2,705	36,316	119,194	158,215	19
Total	248,376	295,057	288,444	831,877	—

The country is divided into 8 provinces, named after the principal towns, which with estimated population, are as follows:—Durazzo, 5,000; Scutari, 32,000; Korytza, 24,000; Elbasan, 13,000; Tirana, the provisional capital, 12,000; Argyrocastro, 12,000; Berat, 8,500; Valona, 6,500.

Religion and Instruction.—About two-thirds of the Albanians are Moslems. Of the remaining one-third the Christians in the north are for the most part Roman Catholics, and the Christians in the south are members of the Orthodox (Greek) Church.

There are 548 primary schools in the country, of which 474 have only one class, while 28 have five classes. There are 854 teachers and about 24,000 pupils. There are, besides, 12 continuation schools, 2 secondary schools (at Scutari and Korytza), and a teachers' training college at Elbasan, opened in 1921. The Government is bearing the cost of educating 44 Albanian students in Italy, 55 in Austria, and 3 in France.

Justice.—The Albanians have a strict code of honour, but in the past no universal system of Justice has been in force. At present there is in every province a tribunal of first instance with three judges and a court of cassation, composed of six judges, at Scutari.

Finance.—For 1921 the budget provided for a revenue of 18,809,045 gold francs, and an expenditure of 21,471,457 gold francs. For 1922 the revenue was 19,747,210 gold francs, and the expenditure 22,195,552 gold francs.

The national debt is not large; it includes 300,000 dollars lent by the United States Government.

Production and Industry.—The Albanian economic system is very primitive; each family provides for its own needs. Great tracts of the country remain uncultivated, and the areas at present under cultivation are dealt with in a primitive way. The State owns some 125,000 acres of the best land in the plain between the rivers Shkumbi and Vojussa. The country for the greater part is rugged, wild, and mountainous, the exceptions being along the Adriatic littoral and the Korytza Basin. Tobacco, wool, olive oil, corn and cattle are the principal products of the country. Cattle-breeding receives special attention. The wool is made up into coarse and heavy native cloth. There are vast tracts of forest land composed of oak, walnut and chestnut trees, as well as beeches, pines and firs. The mineral wealth of Albania is a matter of conjecture. The only industries in the country are those connected with agriculture, such as flour-milling, olive-pressing and cheese-making.

Imports in 1920, 17,533,000 gold francs; exports, 1,522,000 gold francs. Imports in 1921, 17,659,000 gold francs; exports, 2,190,000 gold francs.

Central Albania has no roads, but in the South the Italian administration has constructed military roads extending South via Tepeleni and Argyrocastro, and the North and East via Liascoviki and Erzek to Korytza. Northern Albania has one road, connecting Durazzo and Tirana with Alessio and Scutari. Total length of roads, 310 miles. As yet there are no railways in the country. The ports are five in number, viz. San Giovanni di Medua, Durazzo, Valona, Porto Palermo, and Santi Quaranta; but all the ports need to be improved. Two Italian shipping lines maintain communications with the rest of Europe.

The country has no banks and no currency. The unit adopted for public accounts is the gold franc.

ARABIA.¹

LARGE areas in Arabia consist only of desert or steppe, occupied by Bedouin tribes, who are forced to adopt a nomadic existence. Considerable portions of the Nefud, or Northern Sand-belt, and the whole of the Ruba el-Khali, or great Southern Desert of soft sand, are quite uninhabitable, although they supply good grazing at certain seasons. There are many tribal communities, settled, half settled, and nomadic, who give effective allegiance only to their own chiefs while admitting the loose overlordship of one of the greater Emirs *e.g.* Ibn Saud, Ibn Rashid, or the King of Hejaz. They are to be found mainly in the Hinterland of Yemen, in the Asir Highlands, in the interior of Oman, and all round the northern fringe of the Nefud desert, which divides Arabia proper from the Syrian Desert or Hamad. But the oases of Central Arabia and most of the fertile coastal districts are occupied by settled communities, under eight independent systems of government. The total area is approximately 1,000,000 square miles, with a population roughly estimated at four or five millions.

1. **The Kingdom of Hejaz**, which attained its independence during the course of the late war, has an estimated area of 170,000 square miles, and an estimated population of about 900,000. Its frontiers are not delimited except on the west. On the south the more or less agreed line runs inland from Hali Point so as to include the territories of the Zahran, Ghamid and Bisha tribes. On the east, Khurma, Teima and Kheibar are in Hejaz, but the first is claimed also by Nejd, and the line between is very uncertain. On the north the recognised boundary runs inland from north of Akaba to about Muaddham, on the Hejaz Railway, and thence to Teima, which was taken from Ibn Rashid in the war. Hejaz is barren or semi-barren in the greater part of its area. It may be regarded as the most important principality in Arabia in virtue of its possession of Mecca (70,000 inhabitants) and Medina (before the war, 35,000, now reduced under 10,000 inhabitants), the Holy Places of Islam. Formerly included in the Turkish Vilayet of Hejaz, which extended from Akaba in the north to Asir in the south (but latterly, only from Medain Salih in the north), it was the chief centre of Ottoman influence in Arabia; and by means of the Hejaz railway,

¹ See Map in THE STATESMAN'S YEAR-BOOK, 1917

with its terminus at Medina, the Turks were enabled to maintain garrisons in the ports and the chief towns of the interior. But the Grand Sherif, or Emir of Mecca, wielded great influence throughout the Moslem world. Ottoman control was largely maintained in the past by the payment of an annual subsidy, but the presence of the Turks and their maladministration was always resented. Early in the war the British Government guaranteed the autonomy of the Hejaz, in the event of a successful revolt, and on June 5, 1916, HUSEIN IBN ALI, the present Emir, proclaimed his independence. In November, 1916, the Emir Husein issued a proclamation assuming the title King of Hejaz. The Treaty of Peace with Turkey recognised the Hejaz as a free and independent State. The capital is Mecca, and the chief port is Jidda, on the Red Sea, population about 20,000. The chief product is dates, of which the large crop gathered from the Medina oasis ranks highest: but all are consumed locally. Hides, wool, and gum are the principal exports, but the volume is never large, and less now than before the war. Imports are mainly foodstuffs and building materials. Taxation is light, but irregular requisitions and customs dues at the ports are often heavy and furnish the bulk of the King's revenue. Great Britain pays him a considerable subsidy to enable him to maintain independence and provide for the Pilgrimage.

2. **The Emirate of Nejd and Hasa**, the more powerful of the two Central Arabian principalities, has its capital at Riyadh, whence the Saud dynasty exercises jurisdiction over the neighbouring groups of oases and the surrounding steppes. Its sway extends south to the farthest limits of Wadi Dawasir, west to Khurma on, or within, the Hejaz border, north to Hail and the edge of the Nefud, and east to the Gulf. It is the modern representative of the Wahabite Empire founded about 1745 by Mohammed Ibn Saud, Sheikh of Dariyah. The present Emir of Riyadh, ABD EL-AZIZ ES-SAUD, who has maintained an intermittent conflict with the neighbouring Emirate of Jebel Shammar, expelled the Turks from Hasa in 1914, and has extended his influence to include Katif in the region of the Persian Gulf. Estimated population about 400,000. (South Nejd—south of Riyadh—has about 100,000 inhabitants, Central Nejd about 150,000, Kasim 75,000, and Hasa 75,000.) The largest towns are Riyadh (20,000), Boreida (15,000), Anciza (10,000), Hauta (10,000), Hillah (10,000), Hariq (7,000), Shakra (6,000). Nejd produces nothing for export; but Kasim collects and exports hides and *ghi* (butter); and Hasa produces and exports dates, textiles, hides and live-stock.

3. **The Emirate of Jebel Shammar**, which lies to the north of Nejd, has lately come partially within its jurisdiction; since the middle of last century it had maintained its independence under the Rashid dynasty. It has its capital at Hail, and is far more Bedouin in character than its southern rival. The present Emir of Hail is ABDULLAH IBN MITAB, born in 1907, who succeeded on the assassination of his cousin, SAUD IBN RASHID, in May, 1920. Estimated population, including the Shammar, 250,000. No products for export, and everything except bare necessities has to be imported.

4. **The Principate of Asir**, on the west coast of Arabia, between Hejaz and Yemen, has its capital at Sabiyah in Lowland Asir. The principate is in the hands of the Idrisi family, the present ruler being MOHAMMED IBN ALI EL-IDRISI. This principate, however, has no effective jurisdiction over *Highland* Asir, where the power is chiefly in the hands of the head of the Aidh family, chief of the Beni Mugheid tribe, but since the war it has been extended southwards to Holeida, and now includes all the northern

half of the Yemen Tihama. Estimated population of all Asir, whether under Idrisi or not (the great majority are independent of him), under 1,000,000. Considerable export of hides and live-stock chiefly to Eritrean ports.

5. **The Imamate of Yemen**, which is centred at Sanaa, is of considerable antiquity (11th cent. A.D.), the Imam tracing his descent through Zaid and Hasan to the Caliph Ali, and being credited by his followers with infallibility and esoteric knowledge. Considerable areas are devoted to agriculture, cereals and coffee; great tracts of mountain-land are extensively cultivated. The present Imam is YAHYA MOHAMMED HAMID ED-DIN. Area, 75,000 square miles; estimated population, 1,000,000. Capital, Sanaa; population about 25,000. The chief port, Hodeida, population 40,000, is not in the Imam's hands; but the latter claims Zebid and has some small ports in the southern Tihama. His jurisdiction ceases about a day's journey east of Sanaa, but extends over all the highland ridge from Saada to Kataba. The chief agricultural products are consumed locally, coffee being the only item exported in any bulk. This goes out now more by Aden than Hodeida, while Mocha no longer counts. No figures are available since the war, but beyond doubt coffee export has declined seriously. Hides are now the largest export.

6. **The British Protectorate of Aden** (*see page 105*).

7. **The Sultanate of Oman**. See below under Oman.

8. **The Sultanate of Koweit**, on the north-western coast of the Persian Gulf, acquired considerable importance during the discussion of the Baghdad Railway. The Sultan is subsidized by the British Government, which maintains a Political Agent at his Court. The present Sultan, AHMED IBN JABIR ES SOBAH, succeeded his uncle in March, 1921. Estimated population, 50,000, to which an indeterminate number of Bedouins must be added.

9. **Emirate of Kerak**.—Kerak is Transjordan (*see p. 198*).

ARGENTINE REPUBLIC.

(REPÚBLICA ARGENTINA.)

Constitution and Government.

ARGENTINA was discovered in 1508 by Juan Diaz de Solis and Vicente Yáñez Pinzón. In 1535 Don Pedro de Mendoza was sent out by the King of Spain, and in that same year founded the town of Buenos Aires. On May 25, 1810, the population rose against the Spanish rule, and on July 9, 1816, Argentine independence was proclaimed. Between 1816 and 1852 was a period of anarchy, and in 1853 stable government was once more established.

The Constitution of the Argentine Republic bears date May 15, 1853, with modifications in 1860, 1866 and 1898. The executive power is left to a President, elected for six years by electors appointed by the fourteen provinces, equal to double the number of senators and deputies combined; while the legislative authority is vested in a National Congress, consisting of a Senate and a House of Deputies, the former numbering 30, two from the capital and from each province, elected for nine years by a special body of electors in the capital, and by the legislatures in the provinces; and the latter 158 members elected by the people. By the Constitution there should be one deputy for every 33,000 inhabitants. According to the census of 1914 the rate is one deputy for every 49,000 inhabitants. A deputy must be 25 years of age, and have been a citizen for four years. The deputies are elected for four years, but one-half of the House must retire every two years. Senators must be 30 years of age, have been citizens for six years. One-third of the Senate is renewed every three years. The two chambers meet annually from May 1 to September 30. The members of both the Senate and the House of Deputies each receive 18,000 pesos per annum. A Vice-President, elected in the same manner and at the same time as the President, fills the office of Chairman of the Senate, but has otherwise no political power. The President is commander-in-chief of the army and navy, and appoints to all civil, military, naval, and judicial offices, and has the right of presentation to bishoprics; he is responsible with the Ministry for the acts of the executive; both President and Vice-President must be Roman Catholics, Argentine by birth, and cannot be re-elected, unless a period of six years intervenes.

President of the Republic.—Dr. Marcelo T. de Alvear. Assumed office, October 12, 1922.

Vice-President.—Dr. Elpidio Gonzalez.

The Ministry, appointed by and acting under the orders of the President, consists of eight Secretaries of State—namely, of the Interior, Foreign Affairs, Finance, War, Justice and Public Instruction, Agriculture, Marine, and Public Works.

The President has a salary of 96,000 dollars paper, and 28,800 dollars paper for official expenses; the Vice-President 36,000 dollars paper as his salary, and 24,000 dollars for official expenses, and each of the eight ministers 39,600 dollars per annum.

LOCAL GOVERNMENT.

The Constitution, with certain small exceptions, is identical with that of the United States. Such matters as affect the Republic as a whole are under the superintendence of the Central Government. The Republic is divided into 14 provinces, 10 territories and 1 federal district (Buenos Aires). The governors of the various provinces are invested with very extensive powers, and in their constitutional functions are independent of the central

executive. They are elected by the people of each province for a term varying between three and four years. The provinces elect their own legislatures, and have complete control over their own affairs. The territories are under the supervision of governors appointed by the President. In Buenos Aires municipal government is exercised by a Mayor appointed by the President with the approval of the Senate. He is assisted by a deliberative council elected by tax-paying inhabitants. The deliberative council votes on measures relating to city finance, works, and general administration, and its decisions are carried out by the Mayor. Other municipalities have constitutions of a similar character.

Area and Population.

The Argentine Republic consists of fourteen provinces, ten territories and one federal district, containing the land area and population shown below :—

Federal District, Provinces and Territories ¹	Area : English sq. miles	Population Jan. 1, 1921	Population Census 1914	Pop. per sq. mile 1921

¹ The Capitals are given in brackets. Where no name appears in brackets, the capital bears the same name as the province or territory.

Of the total in 1914, 4,227,023 were males and 3,658,214 females. Of the population on January 1, 1918, 4,440,367 were males and 3,838,792 females. Estimated population 1922, 8,750,000.

The movement of population for four years is given as follows:—

	Marriages	Births	Deaths	Immigrants	Emigrants
1917 . . .	44,306	276,355	130,622	51,665	83,999
1918 . . .	48,579	271,980	148,775	50,662	59,908
1919 . . .	—	276,217	150,910	69,879	67,710
1920 . . .	—	276,800	129,600	15,322	104,711

In the years 1857–1920 the number of immigrants by sea was 5,121,958. By the Constitution of the Republic, all children of foreigners born in the country are Argentine.

Population of the capital, Buenos Aires, on June 1, 1914 (census), was 1,575,814 (in June, 1922, it was estimated at 1,720,000); Rosario (Santa Fé), 222,592 (June, 1922, 265,000); Córdoba, 134,935 (on November 30, 1918, 156,000); La Plata, 90,436 (June, 1922, 151,000); Avellaneda, 46,277; Tucumán, 91,216; Bahía Blanca, 44,143; Santa Fé, 59,574; Mendoza, 58,790; Paraná, 36,089; Salta, 28,436; Lomas de Zamora, 22,231; Río Cuarto, 18,421; Corrientes, 28,681; Quilmes, 19,311; Concordia, 20,107; Mar del Plata, 27,611; Santiago del Estero, 23,479; Chivilcoy, 23,241; Resistencia, 21,322; Mercedes (San Luis), 18,256; Tandil, 15,784; Junín, 21,172; Bell-ville, 8,732; Gualeguaychú, 17,880; Pergamino, 20,549; San Juan, 16,631; Catamarca, 13,262; Posadas, 15,734; La Rioja, 12,536; Jujuy, 7,956.

Religion and Instruction.

There is no State religion, though the Roman Catholic religion is supported by the State; all other creeds are tolerated and freedom of conscience prevails. There are 1 archbishop (Buenos Aires) and 10 suffragan bishops. For the clergy there are 8 seminaries. In 1888 civil marriage was established in the Republic.

Primary education is free (subsidised by the General and Provincial Governments), secular and compulsory for children from 6 to 14 years of age. Population of school age (1920), 1,756,053. Of the total population over 7 years of age, 35.1 per cent. were illiterate. There were (1920) 9,009 primary public schools, 7,856 being public and 1,153 private, with 1,121,311 pupils and 35,639 teachers. The secondary or preparatory education is controlled by the general Government, which maintains 33 national colleges with 11,022 pupils and 1,244 teachers. Side by side with the Government colleges there are also 33 private institutions of the same grade, with 2,959 pupils and 398 teachers. There are 82 normal schools with 14,202 pupils and 1,843 teachers; 37 for special instruction (commercial, industrial, artistic, also for the blind, &c.) with 10,616 pupils and 994 teachers. There are national universities at Córdoba (founded 1613), with 1,603 students in 1920; Buenos Aires (founded 1821), with 10,404 students; La Plata (founded 1905), with 2,979 students; and the National University of the Litoral, in Rosario (founded in 1920); and provincial universities at Santa Fé and Tucumán (founded 1912), and the university of Cuyo (founded in 1921) for the province of Mendoza, San Juan and San Luis. There is a well-equipped national observatory at Córdoba, and another at La Plata, museums at Buenos Aires and La Plata, and a national meteorological bureau at Buenos Aires.

For 1920 the Government budgeted for education : 38,798,656 paper dollars on primary education ; 8,274,720 dollars on secondary ; 5,381,424 dollars on technical and commercial education ; 10,931,864 dollars on normal schools, and 7,464,158 dollars on university education ; miscellaneous, 1,034,512 paper dollars ; total, 71,885,335 dollars.

In Argentina there are 520 newspapers published, 493 in Spanish, 4 in Italian, 5 in German, 5 in English, and others in Scandinavian, French, Basque, Russian.

Justice.

Justice is administered by Federal and by Provincial Courts. The former deal only with cases of a national character, or in which different provinces or inhabitants of different provinces are parties. The Federal Courts are the Supreme Courts, with 5 judges at Buenos Aires ; 5 Appeal Courts, one with 5 judges at Buenos Aires, and with 3 each at La Plata, Paraná, Córdoba, and Rosario (Santa Fe), and courts of first instance in each of the provinces and territories. Each province has its own judicial system, with a Supreme Court (generally so-called) and several minor courts. Trial by jury is established by the Constitution for criminal cases, but never practised.

Finance.¹

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1918	26,000,459	36,789,515	1921	43,287,947	48,797,415

1920	48,056,250	42,813,750	1923 ²	37,540,000	52,520,000

¹ All accounts are kept in paper currency, the paper dollar = 1s. 9½d., under conversion law.

² Budget estimate.

The main items of revenue and expenditure in the budget for 1922 were as follows :—

Revenue	Dollars Paper	Expenditure	Dollars Paper
Import duties	150,000,000	Congress	5,274,260
Additional import duties 2 per cent. and 5 per cent.	30,000,000	Ministry of { Interior	70,767,119
Export duties	55,000,000	Public Debt	128,736,485
Port, mole, and dock dues	11,000,000	Justice and Education	86,660,942
Storage and portorage dues	18,000,000	Army	48,812,937
Tobacco tax	50,000,000	Navy	41,940,209
Land tax	28,000,000	Public Works	21,944,495
Portable securities, etc. . .	25,000,000		
Revenue stamps	30,000,000		
Licences	12,000,000		
Posts	18,000,000		
Total (including all revenue)	551,931,685	Grand total (including all items)	599,956,504

The external debt on July 31, 1922, was 561,537,346 paper pesos, and the internal debt was 698,235,344 paper pesos, making a total of 1,259,772,690 paper pesos. The floating debt on June 31, 1922, was 628,836,663 paper pesos.

Defence.

ARMY.

The army of the Argentine Republic is a National Militia, service in which is compulsory for all citizens from their 20th to their 45th year. Naturalized citizens are exempt for a period of 10 years. For the first 10 years the men belong to the 'active' army, or first line (Permanent Forces). After completing 10 years in the first line, the men pass to the National Guard and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard; the latter is only mobilized in case of war. The period of continuous service, or training in the ranks with the Permanent Forces, is for 1 year. The reservists can be called out for training periodically.

The territory of the Republic is divided into 5 military districts for administrative purposes. According to the Army Regulations which came into force in January 1916, the establishment of officers for 1922 was 1,747, and that of the standing army 18,000. Its composition is as follows:—Infantry, 20 battalions of 3 companies each; 1 railway battalion of 4 companies; 4 independent companies; cavalry, 9 regiments of 4 squadrons; 1gendarmerie regiment of 3 squadrons; 1 independent squadron and 2 machine-gun squadrons; artillery, 5 regiments field artillery of 2 groups of 2 batteries; 2 groups mountain of 2 batteries; 2 groups of 2 horse batteries; 1 siege battery; engineers, 5 battalions of 4 companies.

The total peace establishment of the army is about 1,750 officers and 18,000 men. There is a trained reserve numbering 300,000 men, of whom 150,000 men are of the first line, and 150,000 of the special reserve. The territorial reserve, the formation of which is not yet complete, numbers 82,000 men.

The weapon of the Argentine infantry is at present the Mauser magazine rifle. The cavalry have a carbine of the same pattern. The artillery are armed with a Krupp 7.5 cm. Q.F. gun.

The estimated military budget for the year 1922 was 48,812,937 paper pesos.

There is a Military Aviation Training School at El Palomar. On December 31, 1921, there were 51 military aeroplanes in the country.

NAVY.

LIGHT CRUISER								
1894	Buenos Aires	4,500	—	—	2 8 in., 4 6 in., 4.7 in. .	—	17,000	24

There are also the old cruiser *Nueve de Julio*, 3 river gunboats, 7 destroyers, 4 torpedo boats, and some training and miscellaneous craft. The two Dreadnoughts and a few destroyers and other small craft are the only modern units in the Argentine Fleet. A programme was laid before the Argentine Senate proposing considerable additions to the Fleet, but it has received no effect, and only certain transports have been built.

Naval budget, 1922, 41,940,209 paper pesos.

The personnel of the navy includes 337 officers, 130 engineers, and 27 electrical engineers. The total personnel is about 9,100 men (these numbers include about 5,000 conscripts), who have to serve two years. There is a corps of coast artillery of 450 men, a naval school, a school of mechanics, a school for artillery, and a school for torpedo practice.

Production and Industry.

Argentina has an area of about 699,278,300 acres, of which about 250,000,000 acres may be used for agriculture, 250,000,000 acres for cattle raising, 96,250,000 acres are woodland, and the remainder, 103,028,300 acres, are mountain, lake, river, or arid regions. Of the cultivable portion, about 10,000,000 acres require irrigation. In the territories the Federal Government has wide tracts of land amounting to 237,768,000 acres suitable in general for pastoral colonisation, and these lands are conditionally offered free, or for sale or on lease.

The area and produce of principal crops are shown as follows for three years :—

	Acreage			Produce (Metric Tons)		
	1919-20	1920-21	1921-22	1919-20	1920-21	1921-22
Wheat . . .	14,956,963	14,816,116	13,926,556	4,500,000	5,015,000	4,215,100
Oats . . .	2,300,511	2,060,814	2,102,821	710,000	864,000	478,600
Maize . . .	8,183,952	8,089,807	—	6,571,000	5,853,000	—
Flax . . .	3,521,669	3,483,739	3,891,825	1,067,380	1,082,000	805,800

The total grain exported for three years, in metric tons, is shown as follows :—

Year	Wheat	Maize	Linseed	Oats
1919	3,286,260	2,485,465	835,455 ¹	333,248
1920	5,029,978	4,387,736	1,014,840	410,537
1921	1,718,380	2,866,738	1,363,092	402,295

Cotton, sugar, vine, and tobacco are also cultivated. The area under sugar is about 237,500 acres, chiefly in Tucumán, Jujuy, and Salta ; quantity

of sugar manufactured was 292,972 metric tons in 1919, 209,653 metric tons in 1920, and 196,682 metric tons in 1921. The total vine area is about 280,000 acres, chiefly in Mendoza and San Juan; production of wine in 1919, 99,876,280 gallons; in 1920, 113,028,630 gallons, and in 1921, 101,562,296 gallons. The area under tobacco is about 35,300 acres, and under cotton 60,000 acres.

In 1920 the number of animals within the Republic was estimated at: cattle, 27,392,126 (25,866,763 in 1914); horses, 9,366,455 (8,323,815 in 1914); mules, 565,069; asses, 260,157; sheep, 45,303,419 (43,225,452 in 1914); goats, 4,670,130; pigs, 3,227,346. The Province of Buenos Aires contains over 43 per cent. of the sheep within the Republic.

In the provinces of Buenos Aires, Santa Fé, and Entre Rios, agricultural lands to the extent of 463,000 acres have been acquired by the Jewish Colonisation Association. Of this land 158,000 acres are under cultivation. Some 30,000 square miles of State lands are cultivated as follows: in Misiones, 1,060,199 acres; in Chaco, 3,592,216 acres; in Formosa 2,031,285 acres; in Chubut (Patagonia), 8,394,234 acres; in Santa Cruz, 3,805,340 acres; and in Tierra del Fuego, 12,355 acres.

In 1914 (the last industrial census) there were 48,779 factories in Argentina, employing a total of 410,201 persons. The total capital was 1,787,662,295 pesos, value of raw material, 1,086,779,606 pesos, and value of output 1,861,789,710 pesos. Chief among these industries were: food production, 18,983 establishments, with capital of 763,772,611 pesos; clothing and toilet articles, 7,081 establishments with a capital of 100,178,372 pesos; building companies, 8,582 establishments, with a capital of 216,182,262 pesos; furniture, wheels &c., 4,441 establishments, with a capital of 62,638,495 pesos; and metallurgy and related industries, 3,275 establishments, with capital amounting to 107,620,033 pesos. The principal industry is meat refrigeration. Flour milling ranks second. In 1920 the quantity of wheat milled was 1,344,439 tons, yielding 930,569 tons of flour; in 1921 the flour yield was 951,732 tons.

Mining is of no great importance. Gold, silver, and copper are worked in Catamarca, where there are also two valuable tin mines, and gold and copper in San Juan and La Rioja. Gold is also mined in the south-western territories. Coal is found in the Andine Provinces, in the Cordillera region of Patagonia and in Northern Patagonia. Tungsten is also an important mineral, others being borate, salt, and limestone. There are no Government statistics as to mineral output, excepting only the output of petroleum at the Comodoro Rivadavia wells, which is as follows: in 1919, 196,190 tons; in 1920, 243,745 tons; and in 1921, 277,807 tons.

Shipping and Navigation.

On January 1, 1918, the registered shipping consisted of 183 steamers over 100 tons, of 155,132 tons,

The aggregate movement of vessels at all Argentine ports was as follows :

Years	Entered		Cleared	
	Number of vessels	Tons	Number of vessels	Tons
1917	44,345	16,428,586	44,088	16,446,837
1918	46,163	18,366,895	45,928	18,222,338
1919	36,356	17,043,869	35,956	16,790,842

Internal Communications.

The first railway concession dates from 1854. In 1857 there were 6 miles of railway. Railways open, January 1, 1922, 21,935 miles, of which 3,821 miles (18 per cent.) belong to the State ; 8,442 miles are narrow gauge, viz. 3 ft. 3 ins., and the remainder (13,493 miles) broad gauge, viz. 5 ft. 5 ins. The capital invested amounted to 1,276,843,316 gold dollars. In 1921 Argentine railways transported 85,434,836 passengers, and carried 32,054,009 tons of cargo. Gross receipts were : 193,309,154 gold dollars ; working expenses, 163,493,020 gold dollars.

Aviation has developed rapidly in the Republic. Aerial routes have been organized from Buenos Aires to Salta, Catamarca, Posadas, Corrientes, Mendoza and San Juan. There is an aerial post service between Buenos Aires and Montevideo three times a week, inaugurated in April, 1922. Altogether there were at the beginning of 1922, 51 military and 122 civil machines in working condition.

Number of post offices in 1920, 3,619 (in 1919, 3,592) ; number of pieces of mail matter received in 1920, 552,298,654 (475,072,740 in 1919) ; despatched in 1920, 654,742,971 (538,449,413 in 1919) ; total, 1920, 1,207,041,625 (1,013,522,153 in 1919). National telegraph lines, 25,572 miles in 1921, provincial railway and private lines bringing the total up to 52,470 miles with 152,644 miles of wire. Number of telegrams despatched, 1920, 7,394,418 ; number received, 1920, 7,141,448 ; total, 1920, 14,535,866 (14,167,720 in 1919). Number of telephone offices in Argentina on January 1, 1920, 957 ; length of line, 25,459 miles. Aggregate revenue from Post Offices and Telegraphs (1921) was 24,037,573 paper dollars, an increase of 1,086,375 paper dollars over 1920.

There are 12 stations for wireless telegraphy. All ships with a crew of over 50 and touching at Argentine ports are compelled by law to be equipped with wireless telegraphy.

In 1912 a bill was passed for the canalization of the Upper Uruguay ;

the work was to be carried out by Argentina in conjunction with Brazil and Uruguay. A ferry-boat service has also been established between Paraguay and Argentine at Posadas and Encarnacion.

Banking and Credit.

In 1922, the banking business of the Republic was in the hands of 32 principal institutions in the city of Buenos Aires with over 300 branches and agencies throughout the country. There are three distinct categories: (i) State Banks; (ii) Foreign Private Banks; and (iii) National Private Banks. The State Banks are two in number. The Banco de la Nación, founded October 15, 1891, occupies the position of State Bank of the Republic. It is obliged to hold cash to the extent of 25 per cent. of its total deposits. Loans or advances may not be made to any public body or municipality other than the National Government, when they must not exceed 20 per cent. of the bank's capital (150,038,942 dollars paper at the end of 1921). The Banco de la Provincia de Buenos Aires (founded 1822) is also considered a State Bank, since half its capital (31,250,000 dollars paper) is supplied by the Government of the Province, and it receives deposits on account of judicial proceedings. The Bank may lend to the Government of the Province up to a maximum of 15 per cent. of its capital, but the same restrictions apply as to loans to other public bodies or municipalities as in the case of the Banco de la Nación. At the end of 1921, the Banco de la Nación had 1,310,000,000 dollars paper deposits, 462,000,000 dollars paper cash holdings, and its discounts and advances amounted to 904,000,000 dollars paper. At the same date the Banco de la Provincia de Buenos Aires had 336,000,000 dollars paper in deposits, 104,000,000 in cash holdings, and its discounts and advances amounted to 259,000,000 dollars paper. The deposits of the banks on May 31, 1922, totalled 9,353,829 gold pesos and 3,277,538,160 pesos currency; discounts and advances, 5,453,847 gold pesos and 2,460,656,567 pesos currency; cash reserve, 35,337,441 gold pesos and 1,015,526,607 pesos currency; capital 47,883,412 gold pesos and 394,508,176 pesos currency.

In 1899 a conversion law was approved by Congress fixing the value of the paper dollar at 44 cents gold. On September 30, 1922, the Conversion Office, the Bank of the Argentine Nation, and the Argentine Legations abroad had a stock of 480,600,132 gold pesos. At the same date there were in circulation notes to the value of 1,362,563,985 paper pesos. The gold cover was thus 80·16 per cent. of the paper circulation.

On January 31, 1921, the amount of coined gold in Argentina was 466,476,793 pesos.

On April 5, 1915, a national postal savings bank (Caja Nacional de Ahorro Postal) was incorporated. On December 31, 1921, it had 473,872 depositors with total deposits amounting to 30,086,133 paper dollars, being 63·49 paper dollars to each depositor.

Money, Weights, and Measures.

The monetary system of the Republic is theoretically on a gold standard the unit being the *peso oro* (gold dollar) which weighs 1·6129 grammes of gold $\frac{1}{10}$ fine. The *Peso* which is divided into 100 *centavos*, is of the value of 4 $\frac{1}{2}$ s. According to the monetary law of November 5, 1881, five and two-and-a-half gold peso pieces are coined. The 5-dollar gold piece (the *Argentino*) weighs 8·0645 grammes, ·900 fine, and therefore contains 7·25805 grammes of fine gold. One pound sterling = 5·04 gold dollars

Gold is not in circulation. The money in circulation is chiefly paper (*peso papel*). The paper dollar, being convertible at '44 gold dollar, is worth 1s. 8½*d.* (11·45 to the £).

Since January 1, 1887, the use of the metric system is compulsory.

Diplomatic Representatives.

1. OF THE ARGENTINE REPUBLIC IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. José Evaristo Uriburu, K.B.E. Appointed April 7, 1921.

Counsellors.—Luis H. Dominguez and Paulino Llambi Campbell.

Secretary.—Carlos Miguens.

Military Attaché.—Lt.-Col. Mones Ruiz.

Naval Attaché.—Captain Diego C. Garcia.

Financial Secretary.—Carlos M. Dominguez.

Consul-General in London.—Dr. Sergio Garcia Uriburu.

There are Consular representatives at Aberdeen, Belfast, Bristol, Cardiff, Dublin, Glasgow, Hull, Liverpool, Manchester, Newcastle, Newport, Southampton, Swansea.

2. OF GREAT BRITAIN IN THE ARGENTINE REPUBLIC.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Beilby F. Alston, K.C.M.G., C.B. (appointed September 4, 1922).

First Secretary.—E. J. Hope-Vere.

Third Secretary.—H. Dobinson.

Naval Attaché.—Captain F. I. Tollenham, R.N.

Commercial Secretary.—Harry O. Chalkley.

Consul-General (at Buenos Aires).—H. W. Wilson, O.B.E.

There is a Consul at Rosario, and Vice-Consuls at Bahia Blanca, La Plata, Tucuman, Santa Fé, and Villa Constitución.

AUSTRIA.

(DIE REPUBLIK ÖSTERREICH.)

Constitution and Government.

The Republic of Austria was proclaimed on November 12, 1918. The Government was taken in hand by a National Assembly which appointed a temporary cabinet and proceeded to pass laws. On February 16, 1919, the National Constitutional Assembly, consisting of only one Chamber, was duly elected on the basis of universal and proportional suffrage, where every Austrian subject, male and female, has a vote if 20 years of age, and is eligible if 29 years of age. On the same basis the elections for the first Parliament were held (October, 1920), and these resulted in the following parties being returned:—Christian Socialists, 82; Social Democrats, 66; German Nationalists, 20; Peasants' Party, 6; Workers' Party, 1.

The Constitution, which was adopted October 1, 1920, and came into force on November 10, 1920, provides for a President, chosen by the two Houses assembled for a joint session; his term is for 4 years, and he may be re-elected once only; for an Assembly (*Nationalrat*), elected by popular vote for 4 years; and for a First Chamber (*Bundesrat*), chosen by the Provincial Diets in proportion to their population (at present the members number 46). The powers of the Bundesrat are advisory. Austria is declared to be a Democratic Republic composed of the seven provinces and the city of Vienna. All special privileges are abolished, and equal rights granted to all citizens.

President of the Republic.—Dr. Michael Hainisch. Born 1858. Elected December 9, 1920.

The Ministry, constituted on May 31, 1922, is as follows:—

State Chancellor.—Dr. Ignaz Seipel (Christian Socialist).

Vice-Chancellor and Minister of the Interior.—Dr. Felix Frank (Pan-German).

Minister of Social Welfare.—Richard Schmitz (Christian Socialist).

Minister of Agriculture.—Rudolf Buchinger (Christian Socialist).

Minister of Foreign Affairs.—Dr. Alfred Grünberger (Administrative Officer).

Minister of Finance.—Dr. Victor Kienboeck (Christian Socialist).

Minister of Justice.—Dr. Leopold Waber (Pan-German).

Minister of Commerce and Industry, and Food Controller.—Emil Kraft (Pan-German).

Minister of Education.—Dr. Emil Schneider (Christian Socialist).

Minister of Railways.—Dr. Franz Odchnal (Christian Socialist).

Minister of Defence.—Karl Waugoin (Christian Socialist).

The national flag consists of three horizontal stripes, the top and bottom being red and the centre white.

LOCAL GOVERNMENT.

The Republic of Austria comprises 8 provinces, viz., Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Tyrol, Vorarlberg, and the City of Vienna, which holds a special position in regard to local Government. *Burgenland* (Western Hungary) is also to fall to Austria. There is in every province a Provincial Assembly (*Landesversammlung*), consisting likewise of one chamber which is elected on the basis of the same suffrage as the Constitutional National Assembly. The cultivation of the soil, the educational, ecclesiastical, and charitable institutions, as also public works, chiefly fall within the competence of the provinces. At the head of the Provincial Assembly is the Provincial Committee (*Landesausschuss*) elected by the Provincial Assembly.

Every commune has a council to deliberate and decide its affairs. The members are mostly elected for 5 years. The council elects from its midst the head of the commune (burgomaster) and a committee for the administration of the affairs and execution of its resolutions. All who are 20 years of age have a vote, while for the passive suffrage the attained age of 24-29 years is required.

Area and Population.

For the boundaries of Austria according to the Treaty of St. Germain, signed on September 10, 1919, see THE STATESMAN'S YEAR-BOOK for 1920, pp. 674-5.

The area and population (census taken on January 31, 1920) of Austria are shown as follows:—

Provinces	Area, English square miles	Population (Census 1920)			Percentage of Population 1920	Population per square mile 1920
		Males	Females	Total		
Vienna	107	851,802	990,024	1,841,326	28·65	17,209
Lower Austria (excl. Vienna)	7,462	709,110	748,225	1,457,335	22·67	195
Upper Austria	4,628	415,920	442,875	858,795	13·36	183
Salzburg	2,763	104,954	110,146	214,200	3·33	78
Styria	6,327	464,744	488,940	953,684	14·84	151
Carinthia ¹	3,684	176,846	189,743	366,589	5·70	100
Tyrol	4,790	149,207	157,097	306,304	4·76	64
Vorarlberg	1,005	64,547	68,665	133,212	2·07	133
Burgenland ²	1,586	147,120	149,771	296,891	4·62	187
Total	32,352	3,082,850	3,345,486	6,428,336	100·0	199

¹ Including the plebiscite district which on October 13, 1920, decided for adhesion to Austria.

² Exclusive of the plebiscite district of Oedenburg.

Compared with the total population in 1910, the total for 1920 shows a loss of 240,079, or 3·8 per cent. The male population has decreased by 205,068 or 6·53 per cent. as compared with 1910.

Movement of population in 1920:—Marriages, 82,479 (13·4 per cent.); births, 137,324 (22·4 per cent.); deaths, 116,284 (19 per cent.); divorces, 4,768 (0·8 per cent.).

PRINCIPAL TOWNS.

The population of the principal towns of Austria on January 31, 1920, was as follows:—Vienna, 1,841,326; Graz, 157,644; Linz, 94,072; Innsbruck, 55,650; Salzburg, 36,749; Wiener Neustadt, 35,362; St. Pölten, 28,387; Klagenfurt, 26,147; Villach, 16,466; Baden, 14,000; and Steyr, 20,227.

Religion.

Religious liberty is one of the fundamental laws of the Republic, and the principle is embodied in the Treaty of St. Germain (article 63). In 1910 there were (excluding Burgenland, 5,979,667 Catholics (94·11 per cent.), 165,007 Protestants (2·60 per cent.), 189,758 Jews (2·99 per cent.), and 19,021 'others' (0·30 per cent.). The Catholic Church has 2 archbishoprics and 4 bishoprics.

Instruction.

The educational organisation of Austria comprises: (1) Elementary schools (2) middle schools; (3) high schools; (4) schools for special subjects; and (5) universities and colleges.

Attendance is compulsory at the elementary schools from 6 to 14 in Austria generally, but there are far-reaching facilities for exemption for pupils of 12 years and upwards. The cost of elementary education is borne in the first instance by the communes and provinces. In 1920 there were in the Republic (excluding Burgenland) 4,772 public and private elementary schools, with 32,646 teachers and 888,640 pupils.

Secondary education is provided in the Gymnasias, Realschulen and Mäd-

chenlyzeen (Girls' High Schools). These institutions are maintained by the State, the provinces, the towns, or private individuals. Of all kinds of secondary schools there were (1919-20) 143 with 40,257 pupils, and 3,218 teachers. Of the total 24 schools were for girls with 4,438 pupils and 432 teachers.

Austria has three universities maintained by the State, viz., Vienna (in 1919-20, 832 teachers and 11,442 students), Graz (238 teachers and 1,937 students), and Innsbruck (166 teachers and 1968 students); and there are also two technical high schools at Vienna (237 teachers and 5,108 students) and Graz (80 teachers and 1,040 students).

There are two theological high schools (Fakultäten), of which one is Roman Catholic (at Salzburg) and one Protestant (at Vienna), and 16 other theological colleges, of which 14 are Roman Catholic, 1 Armenian Catholic, and 1 Jewish. In 1920 there were also 35 training colleges for teachers, with 1171 lecturers and 3,818 students.

Justice and Crime.

The Supreme Court of Justice (Oberster Gerichtshof) in Vienna is the highest court in the land. Besides there are 3 higher provincial courts (Oberlandesgerichte), 17 provincial and district courts (Landes- und Kreisgerichte), and, in connection with these, the jury courts (Geschworenengerichte) and the Schöffengerichte, which are courts composed of professional and non-professional judges. There are likewise 263 county courts (Bezirksgerichte), and 2 special courts for commercial affairs, 4 for industry, 1 constitutional court, 1 administrative court, and 1 electoral court.

Pauperism.

Funds for poor relief are derived from endowments, voluntary contributions, the third of the property left by intestate secular priests, and certain percentages on the proceeds of voluntary sales. In some provinces the poor funds are augmented from other sources, e.g. theatre money (Spectakelgelder), hunting licences, dog certificates, and in some large towns percentages on legacies over a fixed amount. Those who are wholly or partially unfit for work may be provided for in such manner as the commune judges propose. Besides poor-houses and money relief, there exists in many provinces the practice of assigning the poor—in respect of board and lodging—to each of the resident householders in fixed succession (Einlegesystem).

The law for unemployment insurance bears date March 24, 1920. Under the Act one-third of the cost of unemployment insurance is to be borne by the State, and two-thirds by employers and workers. Benefits under the scheme are not granted for more than 12 weeks.

Finance.

The budgets for 1921-22 and 1922 provided revenue and expenditure as follows, in kronen:—

	1921-22	1922
Revenue	93,325,000,000	209,763,014,000
Expenditure	258,229,000,000	347,533,413,000
Deficit	164,904,000,000	137,770,399,000

The following are some of the details of the budgets for 1920-21 and 1921-22 in thousands of kronen :—

Revenue	Thousands of kronen		Expenditure	Thousands of kronen	
	Budget 1920-21	Budget 1921-22		Budget 1920-21	Budget 1921-22
Tax revenue . . .	5,170,569	20,843,700	Interest on debt . .	8,524,540	9,901,500
Non-tax revenue . .	9,892,603	83,998,027	Army and Navy . . .	2,076,721	4,787,821
Customs . . .	3,043,650	32,854,000	Railway expenditure .	11,651,643	65,183,241
Railways . . .	5,521,589	46,757,339	Telegraphs, tele- phones, Post, and Post Office		
Telegraphs, tele- phones, Post, and Post Office			Savings Bank . . .	978,617	14,712,740
Savings Bank . . .	1,712,157	14,356,887			
Land . . .	232,789	1,500,754			
Deficit . . .	41,117,500	37,770,399			

The share of the Republic of the old debt of Austria-Hungary is not yet definitely fixed. On June 30, 1921, it was estimated at 53,200 million kronen, with an annual interest of 1,918 million kronen. The debt of the new Republic on that date amounted to 116,693 million kronen, with an annual charge of 6,680 million kronen.

Defence.

1. ARMY.

The break-up of the Austro-Hungarian Empire at the end of the war brought with it the collapse of the military system of that country. At the end of 1918 all was in confusion, but towards the end of January, 1919, the Austrian Government created a Defence Force (Volkswehr). By August, 1920, the approximate strength of the Volkswehr was 34,000 men.

By the terms of the Treaty of St. Germain, universal compulsory military service is abolished in Austria, and the total number of military forces in the Austrian Army is limited to 30,000 men, including officers and depot troops.

Austria is permitted at her own discretion to organise this number of troops either in divisions or in mixed brigades. If the divisional organisation is chosen, the maximum strength of an infantry division is to be 414 officers and 10,780 men, the minimum strength 300 officers and 8,000 men. The maximum strength of a cavalry division is to be 259 officers and 5,380 men, and the minimum 180 officers and 3,650 men.

If the mixed brigade organisation is chosen, the maximum strength of a brigade is to be 198 officers and 5,350 men, and the minimum 140 officers and 4,250 men. The future Austrian Army may therefore be organised into two infantry divisions and one cavalry division at the higher establishment or three infantry divisions and one cavalry at the lower establishment, or into six mixed brigades. The latter organisation has been chosen. The maximum authorised armaments and stocks of munitions are per 1,000 men :—

Rifles or carbines . .	1,150	500 rounds of ammunition per arm. .
Machine guns . . .	15	10,000 " " " "
Trench mortars, light }	2	1,000 " " " "
" " " " medium }		500 " " " "
Guns . . . }		" " " "
Howitzers } field or }	3	1,000 " " " "
		" " " "

All officers must be regulars. Officers now serving retained in the army must serve to the age of 40. Officers newly appointed must serve on the active list for 20 consecutive years.

The period of enlistment for non-commissioned officers and privates must be for a total period of not less than 12 consecutive years, including at least six years with the colours. The proportion of officers and men discharged for any reason before the expiration of their term of enlistment must not exceed one-twentieth of the total strength. All measures of mobilisation are forbidden.

The number of gendarmes, customs officers, foresters, and members of police forces must not exceed the number employed in a similar capacity in 1913. Educational establishments and all sporting and other clubs are forbidden to occupy themselves with any military matters. Within two months of the final ratification of the Treaty the air forces of Austria are to be demobilised. The armed forces of Austria therefore do not include any military or naval air forces. The manufacture, importation, and exportation of aircraft, and parts of aircraft, are forbidden.

In the new army the Government has organised six infantry regiments for Vienna and Lower Austria; six *Alpenjäger* regiments for Upper Austria, Styria, Carinthia, Salzburg, and Tyrol; two infantry battalions for *Burgenland*; one *jäger* battalion for Salzburg; and one *jäger* battalion for Vorarlberg. There are besides six cycle battalions, six squadrons of cavalry, seven artillery and six technical units.

2. NAVY.

As Austria now has no seaboard, the former Austro-Hungarian fleet has ceased to exist. The only war vessels remaining to Austria are four patrol-boats on the Danube.

Production and Industry.

Agriculture forms the main occupation of the country. In 1921 the total acreage sown amounted to 4,152,237 acres (4,088,216 acres in 1920). Of the total in 1921, 2,082,935 acres were in Lower Austria and 935,109 acres in Upper Austria. The chief products are shown as follows for two years:—

Crop	1920		1921	
	Acreage	Yield (metric tons)	Acreage	Yield (metric tons)
Wheat . . .	370,592	147,623	377,757	177,715
Rye . . .	710,618	255,179	758,331	334,311
Barley . . .	238,359	95,633	266,412	119,840
Oats . . .	626,772	231,871	664,215	275,783
Potatoes . .	290,004	669,478	327,233	832,985
Turnips . .	101,559	584,285	106,710	530,514

Production of raw sugar in 1921-22, 16,322 metric tons (about 30 per cent. of pre-war output).

The foodstuffs produced do not suffice for the population. Forests abound and timber forms an appreciable asset of Austria. The number of animals in 1919 were: horses, 243,000; cows, 911,000; oxen, 214,000; bulls, 55,000; and calves, 539,000.

The country has not been deprived of all her minerals; in 1921 the

production of lignite was 2,469,701 tons, and of anthracite, 137,666 tons. There were 18 anthracite mines worked in 1920, and 75 lignite mines. The output of iron ore was 435,062 tons in 1920, and of pig iron 100,035 tons. Some copper, zinc, lead, and salt are also produced.

Of important industries, piano-making, the manufacture of motor-cars, and textiles still remain in Austria to a certain extent.

Commerce.

Imports and exports for 2 years:—

	1921.		1920.
	Tons.	Tons.	Value (1,000 kronen).
Imports	8,195,558	6,061,071	1,701,160
Exports	1,486,855	1,317,560	931,819

Principal Imports (1921): Grain, flour and rice, 756,056 tons; coal and fuel, 5,918,406 tons; wines, 89,013 tons; stone and building material, 126,863 tons; raw cotton, 26,051 tons; rubber, 2,235 tons; textiles, 27,981 tons; glass, 17,201 tons; iron goods, 41,414 tons.

Principal Exports: Timber, 400,369 tons; ores, 78,815 tons; fruit, 2,040 tons; sugar-beet, 20,330 tons; paper-goods, 114,430 tons; furniture, 39,503 tons; chemicals, 51,054 tons.

The trade in 1921 was distributed among principal countries as follows:

Country	Imports	Exports	Country	Imports	Exports
	1000 Tons	1000 Tons		1000 Tons	1000 Tons
Czechoslovakia	3,363	249	Yugo-Slavia	288	138
Germany	2,907	270	Hungary	269	108
Poland	469	85	Great Britain	61	8
United States	165	60	Switzerland	20	78
Italy	130	350			

Recent British statistics of commerce (published by the Board of Trade) show that in the trade between Great Britain and Austria the imports for 1922 amounted to 1,582,4047, and the exports to 1,038,2887.

Internal Communications.

Austria had in 1921 4,274 miles of railway lines, of which 2,964 miles were operated by the State, and 1,310 miles by private companies. The principal State railways are the Western Railway, the Northern Railway, the North-Western Railway, the Franz Joseph Railway (connecting Vienna with Western Czechoslovakia), and the Eastern Railway. The Southern Railway is the principal private line.

Banking and Credit.

According to the Treaty of St. Germain the Austro-Hungarian Bank is to be liquidated. A new National Bank for Austria was opened on January 1, 1923, with a capital of 30,000,000 gold crowns.

Money Weights and Measures.

The Austrian standard coin (gold) is the krone, which has been coined in denominations of 100, 20, and 10. Of silver coins there were 5, 2, and 1 krone pieces. The krone = 100 heller. Hardly any coins are, however, at present in use; the currency is for the most part paper, including even 20-heller pieces.

Diplomatic Representatives.

1. OF AUSTRIA IN GREAT BRITAIN.

Minister Plenipotentiary.—Georg Franckenstein. Appointed October 6, 1920.

Counsellor of Legation.—Adolf Kunz.

Press Attaché.—Dr. Maximilian Bach.

Attaché.—Walter Brauml.

Delegate of Austrian Clearing House.—Dr. Felix Weiser.

2. OF GREAT BRITAIN IN AUSTRIA.

Minister Plenipotentiary.—The Hon. Aretas Akers-Douglas, C.M.G. Appointed November 25, 1921.

First Secretary.—E. A. Keeling.

Third Secretary.—P. B. B. Nichols, M.C.

Military Attaché.—Lieut.-Col. Sir T. A. A. M. Cunningham, Bart., D.S.O.

Commercial Secretary.—O. S. Phillpotts, O.B.E.

Consul at Vienna.—H. H. Cassells.

BELGIUM.

(ROYAUME DE BELGIQUE.)

Reigning King.

Albert, born April 8, 1875, son of the late Prince Philippe de Saxe-Coburg and Gotha and of Flanders (died November 17, 1905), and of the late Princess Marie de Hohenzollern-Sigmaringen (died Nov. 27, 1912); married Oct. 2, 1900, to Princess *Elizabeth of Bavaria*; succeeded his uncle Leopold II., Dec. 17, 1909.

Children of the King.—(1) Prince *Leopold*, Duke of Brabant, born Nov. 3, 1901. (2) Prince *Charles*, Count of Flanders, born Oct. 10, 1903. (3) Princess *Marie-José*, born Aug. 4, 1906.

Sisters of the King.—(1) Princess *Henriette*, born Nov. 30, 1870; married Feb. 12, 1896, to Prince Emmanuel of Orleans, Duke of Vendôme. (2) Princess *Josephine*, born Oct. 18, 1872; married May 28, 1904, to Prince Charles of Hohenzollern.

Aunt of the King.—Princess *Charlotte*, sister of Leopold II., born June 7, 1840; married July 27, 1857, to Archduke Maximilian of Austria, elected Emperor of Mexico July 10, 1863; widow June 19, 1867.

King Albert has a civil list of 3,300,000 francs.

The Kingdom of Belgium formed itself into an independent State in 1830, having from 1815 been a part of the Netherlands. The secession was decreed on October 4, 1830, by a Provisional Government, established in consequence of a revolution which broke out at Brussels, on August 25, 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on June 4, 1831; he ascended the throne July 21, 1831. On his death in 1865 he was succeeded by his son, Leopold II., who reigned until 1909.

By the Treaty of London, Nov. 15, 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, April 19, 1839, which established peace between King Leopold I. and the King of the Netherlands, that all the States of Europe recognised the Kingdom of Belgium. In the Treaty of Versailles (June 28, 1919), it is stated that as the treaties of 1839 'no longer conform to the requirements of the situation,' these are abrogated and will be replaced by other treaties.

Constitution and Government.

According to the Constitution of 1831 Belgium is 'a constitutional, representative, and hereditary monarchy.' The legislative power is vested in the King, the Senate, and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his Ministers, who thus becomes responsible for it. The King convokes, prorogues, and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under eighteen years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

Those sections of the Belgian Constitution which regulate the organisation of the legislative power were revised in October 1921. For both Senate and Chamber all elections are held on the principle of universal suffrage.

The Senate consists of members elected for four years, partly directly and partly indirectly. The number elected directly is equal to half the number of members of the Chamber of Representatives, and is proportioned to the population of each province. The constituent body is similar to that which elects deputies to the Chamber, except that the minimum age of electors is fixed at twenty-one years. In the election of members both of the Senate and Chamber of Representatives directly, the principle of proportional representation of parties was introduced by Law of December 29, 1899. Senators elected indirectly are chosen by the provincial councils, three for each province on the basis of one for 200,000 inhabitants; and an additional Senator for 125,000 inhabitants over and above the first 200,000. Senators are elected by the Senate itself in the proportion of half of the preceding category (actually twenty). No one, during two years preceding the election, must have been a member of the council appointing him. All senators must be at least forty years of age. They receive 4,000 francs per annum. Sons of the King, or failing these, Belgian princes of the reigning branch of the Royal Family are by right Senators at the age of eighteen, but have no voice in the deliberations till the age of twenty-five years.

The members of the Chamber of Representatives are all elected directly by the electoral body. Their number at present, 186 (law of May 2, 1912),

is proportioned to the population, and cannot exceed one for every 40,000 inhabitants. They sit for four years. Deputies must be not less than twenty-five years of age, and resident in Belgium. Each deputy has an annual indemnity of 12,000 francs, and a free pass all the year over Government and Companies' railways between his residence and the place of Session.

The Senate and Chamber meet annually in the month of November, and must sit for at least forty days; but the King has the power of convoking them on extraordinary occasions, and of dissolving them either simultaneously or separately. In the latter case a new election must take place within forty days, and a meeting of the Chambers within two months. An adjournment cannot be made for a period exceeding one month without the consent of the Chambers. Money bills and bills relating to the contingent for the army originate in the Chamber of Representatives.

Parties in the Chamber 1921 :—Catholics, 80; Socialists, 67; Liberals, 33; miscellaneous, 6.

Parties in the Senate 1921 :—Catholics, 73; Liberals, 28; Socialists, 52.

The Executive Government consists of 12 departments, under the following Ministers (appointed December 14, 1921) :—

Prime Minister and Minister of Finance.—Georges Theunis.

Minister of Economic Affairs.—Aloys Van de Vyvere (Catholic).

Minister of Foreign Affairs.—Henri Jaspar (Catholic).

Minister of Education.—Dr. Nolf.

Minister of Interior.—P. Berryer (Catholic).

Minister of Agriculture and of Public Works.—Baron A. Ruzette (Catholic).

Minister of National Defence.—Albert Derève (Liberal).

Minister of Justice.—F. Masson (Liberal).

Minister of the Colonies.—Louis Franck (Liberal).

Minister of Industry and Labour.—R. Moyersoon (Catholic).

Minister of Railways, Marine, Posts and Telegraphs.—Xavier Neujean (Liberal).

Besides the above responsible heads of departments, there are a number of 'Ministres d'État,' without portfolio, called on special occasions by the sovereign.

Local Government.

The provinces and communes (2,638 in 1920) of Belgium have a large amount of autonomous government.

In regard to the communal electorate, the law of April 15, 1920, definitely lays it down that all Belgians over 21 years of age without distinction of sex, who have been domiciled for at least six months, have the right to vote. Proportional representation is applied to the communal elections, and communal councils are to be renewed every six years. In each commune there is a college composed of the burgomaster, president, and a certain number of aldermen, corresponding almost to the permanent deputation of the Provincial Council, and both are the organs of the central administration.

Area and Population.

Belgium (including the districts of Eupen and Malmédy) has an area of 30,438 square kilometres, or 11,752 English square miles. The following table shows the population at various dates.

Census Years	Population	Total Increase	Increase per cent. per annum	Census Years	Population	Total Increase	Increase per cent. per annum
1876	5,336,185	508,352	1·05	1900	6,693,548	624,227	1·03
1880	5,520,009	183,824	0·85	1910	7,423,784	730,236	1·09
1890	6,069,321	549,312	0·99	1920	7,462,455	238,671	0·05

Area and population of provinces :—

Provinces	Area : Eng. sq. miles	Population		Population per sq. mile, 1921	
		Census Dec. 31, 1920	Estimated Dec. 31, 1921		
Antwerp (Anvers)	1,093	1,016,716	1,030,424	942·7	
Brabant	1,268	1,521,699	1,541,960	1216·0

Eupen and Malmédy ¹	382	60,179	—	—	
Total	11,752	7,462,455	7,478,840	636·3	

¹ Ceded to Belgium by the Treaty of Versailles.

In 1920 there were 3,670,862 males, 3,791,593 females.

Vital statistics for 4 years :—

—	Marriages	Births	Deaths	Increase or decrease of births over deaths
1918	43,558	85,056	157,340	- 72,284
1919	97,084	123,314	112,986	+ 10,328
1920	106,514	163,738	102,706	+ 61,032
1921	88,456	163,333	100,468	+ 62,865

Of the living births in 1921, 10,520 were illegitimate. There were also 6,923 still-births.

Divorces in 1919, 623 ; in 1920, 2,195 ; in 1921, 3,665.

Emigration in 1920, 53,307, of whom 47,857 departed for European countries ; emigration 1921, 27,443, of whom 24,961 departed for European countries and 1,002 for the United States. Immigration in 1921, 24,389, of whom 22,515 came from European countries.

The most important towns, with population on December 31, 1921 :—

Brussels and suburbs¹ . . . 775,039 | Antwerp (Anvers) . . . 304,124

¹ The suburbs comprise 12 distinct communes, viz., Anderlecht, Etterbeek, Forest, Ixelles, Jette, Kockelberg, Molenbeek St. Jean, St. Gilles, St. Josse-ten-Noode, Schaerbeek, Uccle, Woluwe St. Lambert.

Ghent (Gand)	165,287	Verviers	42,289	Alost	34,918
Liège	165,136	Louvain	39,255	St. Nicolas	34,174
Mechlin (Malines)	59,208	Seraing	38,720	Namur	31,328
Bruges	52,723	Courtrai	36,899	Jumet	28,276
Ostend	45,345	Tournai	35,805	Charleroi	27,394

Religion.

Of the inhabitants professing a religion the majority is Roman Catholic. But no inquisition on the profession or faith is now made at the censuses, and therefore, the last available figures, those of 1891, are the only clue to the numbers of the three dominant faiths. According to these there were:—Protestants and Anglicans 27,900; Jews, 13,200. There are, however, statistics concerning the clergy, and according to these there were in 1920:—Roman Catholic higher clergy 85; inferior clergy, 5,946; Protestant pastors, 21; Jews (rabbis and ministers) 15. The State does not interfere in any way with the internal affairs of either Catholic or Protestant Churches. There is full religious liberty, and part of the income of the ministers of all denominations is paid from the national treasury.

In 1920 there were six Roman Catholic dioceses, 204 deaneries, 3,679 Catholic churches and chapels, 6 large and 11 small seminaries.

The Protestant (Evangelical) Church is under a synod.

Instruction.

Of the four universities Ghent and Liège are State institutions, Brussels and Louvain free. In 1920–21 Brussels had 2,501 students; Ghent, 1,277; Liège, 2,303; and Louvain, 3,248. These figures include students at the various special technical and commercial schools attached to the universities.

There were also 6 commercial high schools; the Royal Academy of Fine Arts at Antwerp, a polytechnic at Mons, a state agricultural institute at Gembloux, a Colonial school at Antwerp, and a state veterinary school at Cureghem, schools of design, and four royal conservatoires at Brussels, Liège, Ghent, and Antwerp. Public schools (Dec. 31), 1921:—23 Royal Athenæums and colleges, with 8,526 pupils; 1 provincial college, with 422 pupils; 3 municipal colleges, with 1,286 pupils; 8 private colleges, with 1,298 pupils. The next grades of schools are the middle-class schools, of which there were 98 with 29,512 male pupils, and 51 with 14,784 female pupils. For elementary education there were, in 1920, 7,959 primary schools, with 960,819 pupils; 3,366 infant schools with 205,418 pupils; and 4,193 adult schools with 174,044 pupils. Of normal schools there are 24 for training secondary teachers and 75 for training elementary teachers.

There are many private or free schools—infant, primary, and adult schools mostly under ecclesiastical care. No statistics are available for these. They are all subject to inspection by the State.

Each commune must have at least one primary school. The cost of primary instruction devolves on the communes, with subsidies from the State and provinces.

The proportion of the population (deduction made of children of less than 8 years), who could not read or write at the census of 1910 was 13·1 per cent.; in 1900 was 19·1 per cent.; in 1890, 25·0 per cent.; in 1880, 30·26 per cent.

Justice and Crime.

Judges are appointed for life. There is one Court of Cassation, three Courts of Appeal, and Assize Courts for criminal cases. There are 26 judicial districts, each with a Court of first instance. In each of the 227 cantons is a justice and judge of the peace. There are, besides, various special tribunals. There is trial by jury.

Pauperism.

Apart from private charity, the poor are assisted by the communes through the agency of the *bureaux de bienfaisance* whose duty it is to provide outdoor relief, and by the governing bodies of the *hospices civils*. Provisions of a national character have been made for looking after war orphans and men disabled in the war. Certain other establishments, either State or provincial, provide for the needs of deaf-mutes and the blind, and of children who are placed under the control of the courts. Provision is also made for repressing begging and providing shelter for the homeless.

Finance.

Budget estimates for 4 years :—

	1920	1921	1922	1923
	Francs	Francs	Francs	Francs
Revenue	1,819,113,000	2,101,443,072	2,568,428,913	2,940,379,254
Expenditure	2,763,096,000	2,310,584,883	2,593,463,252	2,945,494,760

The principal items of the ordinary estimates for 1922 are shown as follows (in thousands of francs) :—

Revenue	1000 Francs	Expenditure	1000 Francs
Tax revenue	1,371,965	Public debt	1,140,436
Non-tax revenue	990,114	National Defence	484,019
Customs and excise	512,225	Education, Arts and Science	289,186
Railways	1,001,868	Industry and Labour	158,507
Telegraphs and telephones	62,000	Finance	129,122
		Justice	113,269
		Public Works	92,844
		Interior	47,340

Extraordinary receipts in 1921 amounted to 26,550,000 francs, (in 1922 to 2,600,000 francs), and extraordinary expenditure to 962,760,892 francs (in 1922 to 852,896,657 francs).

On December 31, 1921, the Belgian public debt amounted to 34,234,466,888 Belgian francs and foreign money calculated at the rate of exchange on December 31, 1921). This debt is made up as follows :—*A.* Consolidated Debt: (1) Internal, 9,171,427,238 francs; (2) External, 1,585,147,690 francs. *B.* Floating Debt: (1) Internal, 8,676,702,900 francs; (2) External, 1,491,590,090 francs, of which 495,900,000 francs are from British credits; *C.* Indirect Debt: 1,798,953,625 francs. *D.* Claims of 5 p.c. War Losses, 2,175,025,800 francs. *E.* Advances from the Allied Powers since the Armistice, 3,417,717,526 francs. *F.* Advances from the National Bank (withdrawal of German money), 5,500,000,000 francs. *G.* Private advances by postal cheques, 417,902,017 francs. The debt charge is 1,473,667,099 francs.

Defence.

ARMY.

According to the Military Law passed in 1913, the Belgian Army is recruited by means of annual calls to the Colours and by voluntary enlistments. Military service is compulsory for those called to the Colours.

The occupation of Belgium by the Germans having prevented the normal recruitment of the classes of 1914–1919, a special 1919 class has been formed composed of the young men of those classes, with liberal exemptions for the families of those who have suffered heavily during the war.

The young men of the contingent serve for 15 months in the infantry, fortress artillery and engineers; for 21 months in the field artillery; and for 24 months in the cavalry. With the calling up of the 1920 class a return was made to normal process of recruitment. Service in the reserve, which follows on service in the active army, is for 5 years.

The Law provides for the calling out of the reserve only in the event of war or if the country is threatened. The 11th, 12th and 13th Classes are not to be mobilised except in case of absolute necessity and are to be employed in the defence of fortified places and in the non-combatant services. Reservists of the active army are subject to recalls to the Colours of 4, 6, or 8 weeks, according to the branch of the service to which they belong. These recalls take place during the 2nd, 3rd, or 4th year of service.

The strength of the army with the Colours in November, 1922, was 190,000. Of these, 1 infantry brigade and 1 cavalry regiment formed part of the Allied Army of Occupation on the Rhine.

The field army consists of 6 divisions and of 1 cavalry division. The divisions are composed each of 3 regiments of infantry of 3 battalions, and 4 groups of 3 batteries of field artillery; of 1 regiment of cavalry, divisional cyclists, field telegraph and searchlight units, engineer companies, and a divisional transport corps.

The cavalry division normally consists of 3 brigades of 2 regiments, 2 battalions cyclists, machine gun sections, 1 group horse artillery, field telegraph units, pioneer pontoon cyclists, and a divisional transport corps.

The Grand General Staff, in addition, has at its disposal 1 brigade of 3 regiments of heavy artillery, trench mortars, aviation, aerostation, telegraph bridging equipment, railway and engineer units.

NAVY.

The nucleus of a small force exists in the ex-British sloop *Zinna*, and 14 ex-German torpedo boats, of which three were abandoned at Zeebrugge and eleven interned in Holland.

Production and Industry.

I. AGRICULTURE.

In each province there is an official Agricultural Commission, delegates from which, along with specialists, form a supreme council of agriculture.

Of the total area in 1920, 2,945,104 hectares, 1,340,415 are under cultivation, 519,781 under forest, 107,977 fallow or uncultivated, the rest roads, marshes, rivers, &c.

The following figures show the yield of the chief crops for three years :—

Crop	Acreage			Produce in cwts.		
	1919	1920	1921	1919	1920	1921
Wheat . . .	346,685	309,427	343,499	5,665,657	5,592,758	7,763,709
Barley . . .	79,315	91,427	95,741	1,479,643	1,894,390	2,192,655
Oats . . .	567,573	642,705	603,447	7,825,334	9,831,042	10,062,015
Rye . . .	529,513	529,515	559,229	7,259,856	9,730,056	10,634,234
Potatoes . .	392,633	370,127	418,592	2,828,544 ¹	2,256,518 ¹	1,918,703 ¹
Beet (sugar) .	107,235	132,645	143,444	1,094,937 ¹	1,438,353 ¹	1,439,451 ¹
Tobacco . .	17,278	7,152	6,899	313,293	152,917	90,967

¹ Tons.

On December 31, 1921, there were 222,055 horses, 1,514,953 horned cattle, and 975,748 pigs.

II. MINING AND METALS AND OTHER INDUSTRIES.

Of the more important industries the following may be mentioned; artificial silk, motor cars, glass, iron and steel, lace (particularly hand-made lace), linen, and gloves.

Coal production (in metric tons) :—

Year	Coal	Briquettes	Coke	Workpeople
1917	14,931,349	981,930	676,040	112,685
1918	13,825,730	1,140,600	522,210	112,767
1919	18,482,880	2,547,890	756,890	136,375
1920	22,888,770	2,922,000	1,800,000	167,924
1921	21,750,410	2,676,680	1,402,610	165,158
1922	21,232,170	2,477,160	2,707,490	--

Number of coal mines in 1921, 125. Number of workers below ground, 112,978; above ground, 49,862; total, 162,840.

The following table summarises the production of iron and steel and crude zinc for 1913, 1920, 1921, and 1922, quantities being given in metric tons (1 metric ton = 2,204·6 lbs.) :—

Products	1913	1920	1921	1922
	Tons	Tons	Tons	Tons
Pig-iron	2,484,690	1,128,518	872,010	1,603,620
Wrought iron	304,350	197,032	159,270	180,252
Steel	2,466,630	1,233,952	1,341,150	1,563,640
Wrought steel	1,409,460	1,071,856	527,470	1,409,990
Crude zinc	204,220	82,960	66,150	113,137

In 1920 the pig-iron was valued at 564,259,000 francs the wrought-steel at 810,000,000 francs, and the zinc at 149,000,000 francs. In 1920 there were produced 16,040 tons of lead; in 1918, 20,630 tons; in 1919, 4,225 tons.

In 1921 there were 58 sugar manufactories, output 258,919 tons of raw sugar; 19 refineries, output 135,012 tons; 33 distilleries, output 43,753 kilolitres of alcohol at 50° G.-L.; 1902 breweries, output 1,253,649 kilolitres of beer.

Commerce.

SPECIAL COMMERCE.

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1913	183,345,000	143,073,000	1920	511,544,600	348,099,160
1919	209,831,155	92,017,989	1921	402,057,400	285,893,080

The imports and exports for 1921 were made up as follows :—

	Imports		Exports	
	Metric tons	1000 Francs	Metric tons	1000 Francs
Live animals	36,463	137,673	9,013	50,500

Switzerland	133,713	87,700	353,337	305,253

In 1921 the principal articles imported from Belgium (according to Board of Trade returns) were :—worsted yarn, 920,911*l.* ; glass and glass ware, 1,960,322*l.* ; hops, 151,762*l.* The principal exports to Belgium were :—oil seed, 219,933*l.* ; soap, 23,537*l.* ; cottons, 2,006,004*l.* ; iron and steel manufactures, 1,455,506*l.*

The total trade between England and Belgium for 5 years was as follows :—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Belgium to U.K.	200,928	9,240,930	44,925,208	32,861,826	23,657,200
Exports to Belgium from U.K.	77,317	47,980,507	49,037,764	19,629,888	24,831,348

Shipping and Navigation

On January 1, 1922, the Belgian merchant fleet was composed of 275 ships of 579,477 tons, among which were 263 steamers of 564,054 tons.

There existed 33 Belgian shipping companies at the beginning of 1921, of which the most important were the Lloyd Royal Belge with 58 ships, the Adolf Deppe with 23 ships, and the Belgian Maritime Association with 23 ships, which it managed for the account of the Belgian Government.

The navigation at Belgian ports was as follows :—Number of vessels entered, 1920, 8,903 ; tonnage, 11,445,131 ; 1921, 10,781 ; tonnage, 14,584,705. Of the tonnage entering 15,047,634 tons (1922) and 12,737,286 tons (1921) were entered at Antwerp. Number of vessels cleared, 1920, 8,854 ; tonnage, 11,308,313 ; 1921, 10,615 ; tonnage, 14,320,664 (cleared Antwerp, 10,142,593 tons in 1920 and 12,544,809 tons in 1921).

The vessels entered and cleared in 1920 were as follows :—

Nationality	Entered Number		Cleared Number	
	1919	1920	1919	1920
Belgian	564	949	546	918
British	2,200	4,081	2,160	4,081
Norwegian	—	525	—	514
French	—	390	—	374

Dutch	—	364	—	356
German	27	239	18	249

Internal Communications.

The total length of the roads in Belgium (1919) was as follows:— State roads, 5,187 miles; provincial roads, 964 miles; conceded roads, 26 miles; total, 6,177 miles. The majority of the roads are paved with stone.

The total length of navigable waterways (rivers and canals) in 1919 was 1,231 miles.

The length of railways (1919):— State lines, 2,759 miles; private lines, 184 miles; light railways, 1,706 miles; total, 4,649 miles. It is proposed to electrify the railway system of the country.

In 1919 the Post Office in Belgium handled 257,087,253 private letters, 50,056,650 official letters, 117,079,755 post-cards, 130,836,628 printed matter, and 168,867,933 newspapers.

On December 31, 1919, there were 1,766 post offices in Belgium. The gross revenue of the Post Office in the year 1919 amounted to 35,259,264 francs, and the expenditure to 39,091,906 francs.

The telegraph system in Belgium carried 8,663,992 despatches, private and official, in the year 1921. In 1921 the total length of public telegraph wires was 28,300 miles. There were in 1921, 2,810 telegraph offices. Receipts in 1921, telegraphs, 23,321,000 francs; telephones, 35,650,220 francs.

On March 31, 1922, the telephone service comprised 310 central stations, connecting 431 public telephone stations and 65,011 subscriber stations. There were 376,457 miles of telephone line in service, and the total number of calls, including long-distance calls, was 1,332,408.

Money and Credit.

No gold has been minted since 1882 (save only 5,000,000 francs struck in 1914), and no silver 5-franc pieces since 1876. The Germans (1915-18) ordered the striking of zinc 5, 10, 25, and 50 centime-pieces, for a total amount of 18,280,099 francs.

The one bank of emission in Belgium is the National Bank, instituted 1850. By law of March 26, 1900, its constitution was modified, and its duration extended to January 1, 1929. Its capital and reserve amounted in 1921 to 100,175,360 francs. It is the cashier of the State, and is authorised to carry on the usual banking operations. Its position on February 8, 1923, was (in thousands of francs):—

Gold and silver	327,792	Notes in circulation	6,894,351
Foreign bills	17,127	Treasury bills	70,160
Belgian bills	627,481	Private bills	148,161
Loans to State	5,400,000		

There are joint-stock and private banks, also agricultural banks, credit unions, and popular banks.

The popular savings bank in Belgium is mainly concentrated in the Caisse Générale d'Epargne et de Retraite, at Brussels. The Caisse d'Epargne is a private company with legally regulated functions and operates under the supervision of the Minister of Finance. It co-operates with the Belgian postal service, thus obviating any need of a postal-savings system. On December 31, 1921, this institution had 3,742,289 accounts. Total deposits at the close of 1921 were 1,494,522,172 francs.

Money, Weights, and Measures.

The *Franc* Par value 25·2214 to £1 sterling
 Belgium belongs to the Latin Monetary Union.
 The weights and measures are those of the metric system.

Diplomatic Representatives.

1. OF BELGIUM IN GREAT BRITAIN.

Ambassador.—Baron Moncheur, G.C.V.O. ; appointed October, 1917.
Counsellor of Legation.—Pol Le Tellier.
Secretaries.—Prince Reginald de Croy, O.B.E., and Robert van de Kerchove d'Hallebast.
Military Attaché.—Col. R. Maton, C.B., C.V.O.
Air Attaché.—Lt.-Aviateur Chevalier Willy Coppens, D.S.O., M.C.
Chancellor.—F. G. Lockem.
Consul-General in London.—E. Pollet.

2. OF GREAT BRITAIN IN BELGIUM.

Ambassador.—The Right Hon. Sir George Grahame, G.C.V.O., K.C.M.G., appointed July 20, 1920.
Counsellor.—C. J. F. R. Wingfield.
Secretaries.—Hon. T. A. Spring-Rice and A. Holman, M.C.
Commercial Secretary.—R. F. H. Duke.
Military Attaché.—Lieut.-Col. H. Needham.
Naval Attaché.—Commander E. B. C. Dickens, D.S.O., R.N.
 There is a Consul-General at Antwerp, and Vice-Consuls at Brussels, Ghent, Liège, and Antwerp.

BELGIAN CONGO

(CONGO BELGE.)

Constitution and Government.—The Congo Independent State was founded in 1885 by Leopold II., King of the Belgians, and the State was placed under his sovereignty.

The annexation of the State to Belgium was provided for by treaty of November 28, 1907, which was approved by the chambers of the Belgian

Legislature in August and by the King on October 18, 1908. The Minister for the Colonies is appointed by the King, and is a member of the Council of Ministers. He is President of the Colonial Council, consisting of 15 members, 8 of whom are appointed by the King, and 3 chosen by the Senate and 3 by the Chamber of Representatives. One of those appointed by the King, and one chosen by the Legislative Chambers, retire annually, but may be re-appointed. The King is represented in the Colony by a Governor-General, assisted by several vice-Governors-General. The budget is presented annually to the Chambers, and voted by them; the financial accounts have to be verified by the Court of Accounts. An annual report on the Congo Administration has to be presented to the Chambers along with the budget.

The Annexation has been recognised by all the Powers.

Governor-General.—M. Rutten (appointed January 24, 1923).

The precise boundaries of the Congo Colony were defined by the neutrality declarations of August, 1885, and December, 1894, and by treaties with Germany, Great Britain, France, and Portugal.

The territory is divided into twenty-two administrative districts (March 28, 1912):—Lower Congo, Middle Congo, Kwango, Sankuru, Kasai, Lake Leopold II., Equator, Lulonga, Bangala, Ubangi, Lower Uele, Upper Uele, Ituri, Stanleyville, Aruwimi, Lova, Kivu, Maniema, Lomami, Tanganyika—Moero, Lulua, and Upper Luapula. The last four districts form the Province of Katanga, with its capital at Elisabethville; the first five districts form the Province of Congo-Kasai, with Léopoldville as its capital the five next districts form the Province of Equator, with its capital at Coquilhatville, and the remaining eight districts form the Eastern Province, with its capital at Stanleyville. The capital of the Colony is Boma; in December 1921 it was announced that Kinshasa was to be the capital in the future. At the head of each Province there is a vice-governor, and at the head of each district a commissioner. Each district is divided into territories of which there are 181 in the whole country. In 1921 there were altogether more than 225 posts and stations at which 1,704 European officials were employed.

The districts of Ruanda and Urundi as well as the territory round Lake Kivu (formerly in German East Africa) have been ceded to Belgium as mandatory of the League of Nations. Area about 19,000 square miles. Ruanda is populated by two races—the Wa-tusi and the Wa-hutu. Both districts are rich in cattle. In order to obtain a practicable route for a railway which shall join the Tanganyika Territory to Uganda, the eastern strip of Ruanda and a small part of Urundi are transferred to Great Britain. The projected line will form a link on the Cape to Cairo Railway.

Area and Population.—The area of Belgian Congo is estimated at 909,654 square miles. The population of Bantu origin according to the latest census was 8,500,000. The white population on January 1, 1921, numbered 8,175. Of these, 4,706 were Belgians, 938 English, 363 Americans, 1,047 Portuguese, 351 Italians, 47 Russians, 72 Swedish, 205 French, 225 Dutch, 86 Swiss, 319 Greeks, 33 Luxemburgers, 33 Danish, 14 Norwegians and 20 Spaniards.

The native languages comprise many dialects, every tribe having its own. Kiswahili is the language spoken by the natives who have been under Arab influence. Bangala is the commercial language on the Upper Congo; Fiote is used on the Lower Congo.

Religion and Instruction.—The religion of the natives consists of a gross fetichism, but mission work is actively carried on. There are 220 mission stations, with 1,250 missionaries, of whom 750 are Catholic and 500 Protestant. In education they co-operate with the Government. Several educational bodies direct under control of the Government establishments for general and professional training, especially at Boma, Leopoldville, Lusambo, Kabinda, Stanleyville, Buta and Elisabethville. In 1922 the Government grant for education to the missionaries amounted to 1,860,500 francs, while the total expenditure on education was 3,989,013 francs.

Justice.—There are 7 courts of first instance, 15 county courts, and 2 courts of appeal (one at Boma and the other at Elisabethville). In all these courts, the function of magistrate is exercised by doctors in the law. In the lower courts only, and moreover occasionally, the doctors in the law acting as judges, may be replaced by a district official. Every administrator of a territory is invested with judicial powers comparable to those of a justice of the peace.

Finance.—Estimates of revenue and expenditure for five years in pounds sterling (25 francs = £1) :—

—	1919	1920	1921	1922	1923
	£	£	£	£	£
Revenue	1,953,534	2,227,466	2,700,425	3,392,836	2,826,767
Expenditure	2,981,955	2,422,154	3,504,422	7,946,920	3,520,450

For 1922 the receipts and expenditure were estimated as follows :—

Receipts	Francs	Expenditure	Francs
Customs	23,706,473	Administration	31,651,155
Direct taxes	28,659,100	Subventions to the public services	4,143,740
Public Services	6,847,420	Religion and Education	4,476,180
Mines	11,190,000	Provincial services	32,941,552
Agricultural receipts	294,665	Hygiene	11,043,922
		Colonization, public debt, etc.	5,626,170
Total (including all items)	87,320,908 (3,392,836£.)	Total (including all items)	89,882,719 (3,595,308£.)

Debt 1919, 349,847,446 francs.

Defence.—The Colony possesses a force of native troops amounting to about 16,000 men. The force is recruited by voluntary enlistment. The officers and non-commissioned officers (368) are Europeans, for the most part Belgians. The term of service is seven years, and the recruits are trained in four camps of instruction before being drafted to their companies. The Territorial police number about 6,000 men.

Production.—The chief products in the order of their importance are Cubber, palm-nuts and palm-oil, white copra and cocoa. Ivory is also abundant. Coffee grows freely, and the cultivation of cocoa is successful. Rice, cotton, and tobacco are grown in a great number of the native villages. Plantations of rubber, cacao, and coffee have been established by the Government

and by private enterprise. Cattle thrive satisfactorily in all districts where there is no tsetse fly, notably in the highlands of Katanga and Kivu. Mining flourishes, the chief minerals being gold, diamonds, and copper. Other minerals are known to exist—coal, iron, tin and manganese—but as yet these have not been obtained in paying quantities. The gold mines in 1921 employed 7,460 natives; the output was 2,228 kilos. The most important mines in the Congo are the copper mines near Kambove, operated by the Union Minière. The total output in 1921 was 30,454 tons of copper. The output of diamonds in 1921 amounted to 244,878 carats.

Commerce and Shipping.—The value of the commerce for five years was as follows :—

Years	Imports		Exports	
	Special	General	Special	General
	£	£	£	£
1916	2,150,633	2,749,591	5,197,264	5,897,708
1917	1,412,054	1,793,555	6,573,103	7,397,926
1918	1,504,190	2,014,301	4,478,754	4,934,461
1919	3,427,240	3,679,885	8,165,850	9,135,652
1920	9,561,390	12,198,717	12,009,820	—

The chief imports for 1919 and 1920 and exports for 1920 and 1921 were :—

	Imports			Exports	
	1919	1920		1920	1921
	Francs	Francs		Kilogs.	Kilogs.
Arms, ammunition, &c.	835,227	4,187,200	Rubber . .	1,121,679	786,436
Steamers and ships	256,871	6,673,949	Ivory . .	336,088	260,977
Machinery . .	12,664,749	29,318,024	Palm-nuts .	39,457,261	45,876,469
Wines, spirits, beer	4,628,500	13,162,526	Palm-oil . .	7,624,111	8,970,173
Provisions . .	12,563,059	31,910,220	Copal . .	13,249,514	11,097,103
Cottons . .	16,868,789	36,361,868	Gold, crude .	5,045	2,526
			Copper, ore and crude . .	18,912,695	30,846,990

Of the special imports (1920) the value of 98,913,768 francs came from Belgium, 54,691,795 francs came from Great Britain, 7,141,308 francs from France, 4,428,272 francs from Angola, 19,046,397 francs from Rhodesia, 22,672,172 francs from the Union of South Africa, 10,844,247 francs from the United States. Of the special exports 51,569,552 kilos, valued at 207,715,318 francs, went to Belgium, 24,644,339 kilos, valued at 76,149,177 francs went to Great Britain; 462,154 kilos, valued at 2,952,228 francs, to the United States; 717,930 kilos, valued at 1,693,770 francs, to France; 848,669 kilos, valued at 2,705,694 francs, to Rhodesia, and 1,720,426 kilos, valued at 2,957,346 francs, to Angola.

According to the Board of Trade Returns the imports into the United Kingdom from the Belgian Congo in 1922 amounted to the value of 380,838*l.*; and the exports of British produce and manufactures to the Belgian Congo to 590,025*l.*

At the port of Boma in 1921 of sea-going vessels there entered 81 of 234,925 tons, and cleared 50 vessels of 148,898 tons. The other two ports

are Banana and Matadi. In the coasting trade there entered 90 vessels of 11,955 tons, and cleared 90 vessels of 10,957 tons.

There are 12 steamers on the Lower Congo, and about 113 private steamers on the Upper Congo.

Internal Communications.—The Congo is navigable for 95 miles from its mouth to Matadi, and on this section 15 steamers belonging to the State ply. Above this, for over 249 miles, are numerous rapids, which render the river unnavigable as far as Stanley Pool (Léopoldville). Above the Pool there are about 1,068 miles of navigable water, as far as Stanley Falls, while several of the great tributaries are navigable over a considerable extent of their course. Above the Stanley Falls the Congo is called Lualaba and is navigable for 585 miles, from Ponthierville to Kindu and from Kongolo to Bukama (Katanga).

There are 5,609 miles of road partly suitable for motors. The total length of railways on January 1, 1921, was 2,663 miles. Principal lines:—The Matadi-Léopoldville line, 248 miles; the Mayumbe railway (Boma to Tshela), 90 miles; the Stanleyville-Ponthierville line, 78 miles; the Kindu-Kongolo line, 220 miles; the Kabalo-Albertville line, 170 miles; the Bukama to the Rhodesian frontier *via* Elisabethville, 451 miles; the Katanga branch line to Lubumbashi, 1 mile; to Mikola, 9 miles. Two sections of the Cape-to-Cairo railway are included in the system. The distance from Elisabethville, Katanga, on the Cape-to-Cairo Railway, to Cape Town is about 2,300 miles.

An important development in 1911 was the construction of a pipe line from Matadi to Léopoldville, 246 miles long, for the purpose of transporting crude oil for the use of river steamers. It has a diameter of 4 inches, with 8 pumping stations capable of delivering 50,000 tons of oil at Léopoldville, the terminus. The concession is for 50 years, at the expiration of which period all the pipe lines, with the material, except the vessels and stores of petroleum, will pass into the hands of the Congo Government.

The length of the Congo-Tanganyika Lake Railway is 169 miles. It was completed in March, 1915, and links up the whole of the Upper Congo with the railway from Dar-es-Salaam to Ujiji.

From Léopoldville a public transport service on the Upper Congo and its tributaries has been organised by the Government and several companies, 59 steamers and barges being employed for this purpose.

Transport service of couriers by aviation is established between Kinshasa and Stanleyville, and serves the intermediate localities of Kwamouth, Lukolela, Bolobo, Gombe, Coquilhatville, Mobeka, Lisala, Bumba and Basoko. The service is carried out in three days, and there is a service twice a month—after the arrival at Kinshasa of the mail from Europe.

In 1919 there were 50 post, telegraph and telephone offices. There are in addition 23 special telegraph offices, and there are 24 centres where there is a telephone station. In 1921 in the internal service 947,947 letters, papers, &c., were transmitted; and in the external, 2,098,330 were handled. The Congo is included in the Postal Union. Telegraph lines connect Banana with Coquilhatville, 800 miles; Boma with Tshela, 85 miles; Stanleyville and Ponthierville, 79 miles; Kasongo and Uvira (Lake Tanganyika), 265 miles; Kindu and Kongolo, 219 miles; Kabalo and Lake Tanganyika, 169 miles; and Sakania and Bukama 448 miles. Total length, 2,085 miles. There are at present 15 stations of wireless telegraphy in the Belgian Congo—at Banana, Boma, Kinshasa, Coquilhatville, Basankusu, Umangi, Basoko, Stanleyville, Kindu, Kongolo, Albertville, Kikondja, Elisabethville, Lusambo, Bunia, and

Buta. All these posts communicate with each other. It is hoped to establish a direct communication between Brussels and Boma.

Two banks are in existence: the 'Banque du Congo Belge,' and the 'Banque Commerciale du Congo,' both with branches in all the commercial centres.

According to a Law of October 18, 1908, gold and silver money current in Belgium is also current in the Congo. These coins are gold pieces of 20 and 10 francs; of silver pieces (perforated) of 5, 2, 1 and 0.50 francs; of nickel pieces of 20, 10 and 5 centimes, and of copper pieces (perforated) of 2 and 1 centimes. By an arrangement of July 7, 1911, the Banque de Congo Belge is authorised to issue notes payable and bearer. The notes are of the nominal value of 1, 5, 20, 100 and 1,000 francs.

The Metric System was introduced by law on August 17, 1910.

British Consul.—A. J. Wallach (at Boma).

There is a British Vice-Consul at Elisabethville.

BHUTÁN.

A STATE in the Eastern Himálaya, between 26° 45' and 28° N. latitude, and between 89° and 92° E. longitude, bordered on the north and east by Tibet, on the west by the Tibetan district of Chumbí and by Sikkim, and on the south by British India. Extreme length from east to west 190 miles; extreme breadth 90 miles. Area about 20,000 square miles; population estimated at 250,000.

The original inhabitants of Bhután, the Tephús, were subjugated about two centuries ago by a band of military colonists from Tibet. In 1774 the East India Company concluded a treaty with the ruler of Bhután, but since then repeated outrages on British subjects committed by the Bhután hill men have led from time to time to punitive measures, usually ending in the temporary or permanent annexation of various *duars* or submontane tracts with passes leading to the hills. In November 1864 the eleven western or Bengal *duars* were thus annexed. Under a treaty signed in November, 1865, the Bhután Government was granted a subsidy of Rs. 50,000 a year on condition of good behaviour. By an amending treaty concluded in January, 1910, the British Government undertook to exercise no interference in the internal administration of Bhután. On its part the Bhutanese Government agreed to be guided by the advice of the British Government in regard to its external relations. The treaty also provided for the increase of the subsidy to Rs. 1,00,000.

The form of Government in Bhután, which existed from the middle of the sixteenth century until 1907, consisted of a dual control by the clergy and the laity as represented by Dharma and Deb Rájás. In 1907 the Deb Rájá, who was also Dharma Rájá, resigned his position, and the Tongsa Penlop, **Sir Ugyen Wangchuk**, G.C.I.E., K.C.S.I., was elected as the first hereditary Maharaja of Bhután.

Chief fortresses or castles : Punakhé, the winter capital, a place of great

natural strength; Tásichozong (Tashichödzung), the summer capital, Pàro, Angdumphorang (Wangdupotang), Tongsa, Taka, and Biagha.

The people are nominally Buddhists, but their religious exercises consist chiefly in the propitiation of evil spirits and the recitation of sentences from the Tibetan Scriptures. Tásichozong (Tashichödzung), the chief monastery in Bhután, contains 300 priests.

Beyond the guards for the defence of the various castles, there is nothing like a standing army.

The chief productions are rice, Indian corn, millet, lac, wax, different kinds of cloth, musk, ponies, chowries, and silk. The State is now beginning to realise the necessity of encouraging foreign capital for industrial enterprises such as mines, tea gardens, and the working of its extensive and valuable forests. Muzzle-loading guns and swords of highly-tempered steel are manufactured.

Trade with India was as follows :—

—	1916-17	1917-18	1918-19	1919-20	1920-21
	£	£	£	£	£
Exports to India . . .	89,000	129,000	60,000	22,400	34,900
Imports from India . . .	70,000	98,000	45,000	76,100	117,300

BOLIVIA.

(REPÚBLICA BOLIVIANA.)

Constitution and Government.

THE Constitution of the Republic of Bolivia (so named in 1825) bears date October 28, 1880. By its provisions the executive power is vested in a President, elected for a term of four years by direct popular vote, and not eligible for re-election; there is a Congress of two chambers, called the Senate and the Chamber of Deputies. The suffrage is possessed by all who can read and write. There are 16 Senators (2 for each Department) elected for six years, and 70 Deputies elected for four years. Both Senators and Deputies are elected by direct vote of the people. Of the Senators one-third retire every two years; of the Deputies one-half retire every two years. Senators receive a salary of 750 bolivianos (60*l.*) per month during the sittings, which, as a rule, last for 60 days, but may be extended to 90 days, and Deputies receive £3 for each day they attend. Extraordinary sessions

may be held for special purposes. There are a President, two Vice-Presidents and a ministry, divided into six departments—of Foreign Relations and Worship; Finance; Government and Justice; Public Works and Industry; War and Colonisation; and Education and Agriculture.

President of the Republic.—Dr. Bautista Saavedra, elected for the term 1921–25 (73,705 bolivianos).

The supreme political, administrative, and military authority in each department is vested in a prefect. The Republic is divided into 8 departments, 3 territories, 72 provinces, 681 cantons administered respectively by prefects, sub-prefects, and corregidores. Prefects and sub-prefects are appointed by the President of the Republic; corregidores and alcaldes are appointed annually by the prefects of the provinces. The capital of each department has its municipal council; the subdivisions have municipal boards, and the still smaller subdivisions have municipal agents. The territories in the north-west of the Republic and in the Chaco and Oriente are governed by three officials, called *delegados nacionales*.

The following table shows area and population of the different political divisions (the capitals of each are given in brackets):—

Departments and Territories	Area : square miles	Census 1900	Estimated 1915	Per square mile 1915
La Paz (La Paz)	40,686	445,616	726,357	9·60
Cochabamba (Cochabamba)	25,288	328,163	534,901	19·33
Potosí (Potosí)	45,031	325,615	530,748	7·70
Santa-Cruz (Santa-Cruz)	144,941	209,592	341,640	1·70
Chuquisaca (Sucre)	36,132	204,434	333,226	1·03
Tarija (Tarija)	31,567	102,887	164,704	1·68
Oruro (Oruro)	20,657	86,081	140,891	5·25
El Beni (Trinidad)	95,354	32,180	52,450	3·60
El Chaco (Villa Montes)	46,661	—	13,085	82·5
Colonial Territories (Riberalta)	27,938	10,000	51,968	3·09
Total	514,155	1,744,568	2,889,970	3·38

The Indian population in 1900 was 920,864, or 50·9 per cent. of the whole: the mixed was 486,018, or 26·7 per cent.; the white was 231,088, or 12·7 per cent.; the negro, 3,945, or 0·21 per cent.; and the unclassified, 170,936, or 9·4 per cent. Of the population not under 7 years of age, 564,000 were engaged in agriculture; 399,037 in the industries; 55,521 in commerce; 49,647 in the liberal professions; 36,285 in domestic service; 12,625 in mining, and 3,106 in artistic professions. The foreign population numbered 7,425, of whom 2,072 were Peruvian.

The boundary disputes of Bolivia with Brazil and with Chile were settled by treaties of November, 1903 and October, 1904. That with Peru was settled by direct negotiations between Bolivia and Peru (1911–12); that with Paraguay, which has been the subject of long negotiations, is as yet without result.

The estimated population (1918) of La Paz (the actual seat of Government) is 107,252; Cochabamba, 81,014; Potosí, 29,795; Sucre (the capital), 29,686; Tarija, 11,644; Oruro, 31,360; Santa Cruz, 25,807; Trinidad, 6,096; Riberalta, 3,200; Villa Montes, 1,000.

Religion, Instruction, and Justice.

The Roman Catholic is the recognised religion of the State; the exercise of other forms of worship is permitted. The religious orders have 17 convents (9 for males and 8 for females); the male members number about 230, the female 280; there are about 567 secular clergy. In 1900 the non-Catholic population numbered 24,245. The Church is under an archbishop (resident in Sucre) and 3 bishops (La Paz, Cochabamba, and Santa Cruz). The maintenance of the Church costs the State 121,108 bolivianos a year, 23,820 bolivianos being devoted to the propagation of the faith among the Indians. By a law of March 19, 1912, all marriages must be celebrated by the civil authorities.

Primary instruction, free and obligatory, is under the care of the municipalities and the State. In 1918 (the latest available information) there were 450 elementary schools with 3,960 teachers and 54,192 pupils. For secondary instruction there were 21 colleges (14 national), 5 clerical institutions, and 5 private lyceos with, in all, 180 teachers and 2,598 pupils. For superior instruction there are 19 establishments with 78 professors and 1,291 students. At Sucre and La Paz are the only two universities which possess more than one faculty. At some places are rural schools for natives, and a normal college for training teachers of Indians at La Paz, and the superior normal institute for teachers in secondary schools. There is a normal school for training teachers generally at Sucre. In all departmental capitals there are public libraries; at La Paz there is a museum, and at La Paz, Oruro and Potosí are mineralogical museums.

The judicial power resides in the Supreme Court, in superior district courts, and in the courts of local justices. The Supreme Court sitting in the Capital of the Republic has 7 judges; the district courts (one in each department except El Beni, which has a 'Inez superior') have each 5 judges; local tribunals have judges of party, of instruction and parish alcaldes. Public justice is directed by an Attorney-General and by district and local attorneys. The administration of justice is free.

Finance.

The revenue of Bolivia is derived mainly from customs duties, spirit duties, tin, silver, gold, wolfram, antimony and other minerals, rubber export, patents, and stamps. The chief branches of expenditure are finance, war, and public works. The ordinary revenue and expenditure for 6 years (budget estimates) were as follows (12½ bolivianos = 1L):—

—	Revenue	Expenditure	—	Revenue	Expenditure
	£	£		£	£
1915	1,358,864	1,714,815	1919	2,506,301	3,077,748
1916	1,282,760	1,805,867	1920	,957,638	4,280,887
1918	2,606,959	2,891,620	1921	—	3,751,006

The public debt of Bolivia on September 30, 1921, amounted to 68,615,502 bolivianos, of which 9,749,467 bolivianos were external debt, 33,721,221 bolivianos internal debt, and 25,144,812 bolivianos floating debt.

Defence.

The territory of the Republic is divided into 3 military districts, the Northern, the Central, and the Southern, and 3 'military commands' formed of the departments Santa Cruz, El Beni, Tarija, and the Territories.

The law of December 15, 1915, provides for a permanent force of 3,577 men. Military service is compulsory for all males from the 19th to the 50th year. The army is a militia, with a total service in the first line of 6 years, of which about 1 year is spent in the ranks.* For the next 6 years (from the age of 25 to 30) the Bolivian soldier belongs to the 'ordinary reserve.' After this the men pass to the 'extraordinary reserve' for 10 years, and finally complete their service by 10 years in the Territorial Guard.

The permanent army consists of 4 infantry regiments, two of 500 men each, and two of 800 men; a cavalry regiment 500 strong; a mountain artillery regiment of 300 men; a field artillery regiment of the same strength one with 4 batteries of the Schneider-Canet system; making a total of 4,187, including officers, officials and men.

In addition to the above troops there are small bodies of infantry of from 100 to 200 men (called *columnas*) at the chief towns of departments, which can be expanded to battalions, if necessary. There also exist other units, for garrisoning the North, the North West, the South West, and the East, consisting of 300 men each.

The infantry armament is the Mauser (Bolivian Model) rifle of 1893.

Production and Industry.

The extensive and undeveloped region of Bolivia lying east of the Andes comprises about three-quarters of the entire area. It is estimated that about 4,940,000 acres are under cultivation, but agriculture is in a backward condition. Irrigation by means of artesian wells is being attempted in some regions. Wheat, maize, barley, beans, potatoes, are produced mostly for local consumption, and coffee, coca, quina, &c., are exported to Chile and Argentina. Cocoa and coffee are grown on the slopes of La Paz and Cochabamba; coffee and other products are grown in El Beni and Santa Cruz. Rubber is produced on 40,642,000 acres in the National Territories, and in the Departments of El Beni and Santa Cruz, and parts of La Paz and Cochabamba. Bolivia ranks as the second rubber-exporting country of South America, coming next to Brazil. The public lands of the State have an area of about 245,000 square miles, of which 104,000 square miles are reserved for special colonisation.

The mineral wealth of Bolivia includes silver, copper, tin, lead, zinc, antimony, bismuth, wolfram, gold, and borate of lime. Bolivia produces one quarter of the total tin output of the world, standing next to the Malay Peninsula in the production of this metal. Large deposits of common salt are found near Lake Poopó and in the South of Bolivia. In 1911 large tracts of land were taken up for the production of petroleum, especially near Calacoto, on the Arica-La Paz railway. In the east of the Republic there is said to be a part of an immense oilfield, stretching from near the Orinoco to the Argentine Republic.

Commerce.

Bolivia having no seaport, imports and exports pass chiefly through Arica, Mollendo, Antofagasta, and the river-ports of Suarez on the Paraguay, Montes on the Iténez, Villa Bella on the Madeira, and Bahía or Cobija on

the Upper Acre. The Argentine route through Salta is now little used; the route now runs from La Quiraca, traversing the province Iujuy to Tucuman and Rosario. The chief imports are provisions, hardware, wines, and spirits, cotton, woollen, linen and silk goods, and ready-made clothes. The chief exports are silver, tin, and rubber. There is scarcely any food export. The value of imports and exports for five years are given as follows (12·5 bolivianos = £1):—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports	2,678,466	2,723,744	4,824,671	5,227,160	4,810,280
Exports	12,619,844	14,211,116	11,235,799	—	—

The weight of the imports in 1920 was 121,985,331 kilos; in 1921, 105,362,005 kilos.

Total trade between U. K. and Bolivia (Board of Trade figures) for 5 years:—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Bolivia to U. K.	3,596,887	3,442,491	1,930,979	871,144	1,716,958
Exports to Bolivia from U. K.	882,039	550,665	747,400	432,820	409,183

Communications.

In 1921 the total length of line open in Bolivia was 1,401 miles, including the new line, opened in July, 1917, from Oruro to Cochabamba. Under construction 256 miles. The principal line is the Antofagasta and Bolivian Railway, from Antofagasta, on the Pacific coast, to Ollague, thence to Oruro, thence to Viacha, thence to La Paz (735 miles). Under the Bolivian-Chilian treaty of October 24, 1904, the Arica-La Paz line (271 miles, of which 143 miles are in Bolivia) was built from La Paz via Lluta with Taregra and to Corocoro. The Bolivian section was handed over to the government of Bolivia on May 3, 1913. The Pan-American Railroad follows the shore line of Lake Titicaca from Guaqui to Viacha, and thence to the Argentine border by way of Uyuni, Tupiza, and La Quiaca, a total distance in Bolivia of 529 miles, of which 361 are already in operation.

Traffic on Lake Titicaca and on the Bolivian rivers is carried on by steamers, which belong to private owners.

There are about 2,304 miles of cart roads connecting the more important towns.

In Bolivia there were 427 post offices in 1919, number of pieces of mail handled, 6,649,967. The postal expenses amounted to 595,942 and the receipts to 280,593 bolivianos.

There are about 4,000 miles of telegraph lines. Wireless telegraphic stations are being erected at La Paz, Villa Bella, Cobija, Trinidad, Santa Cruz, Puerto Suarez, Guayaramerin, Cachuela Esperanza. Cost of administration, 803,678 bolivianos; receipts, 363,585.

Money, Weights, and Measures.

The net earnings of the Banco de la Nacion (State bank) in 1919 were 2,944,749 bolivianos. After its fusion with the Industrial Bank, the capital of the National Bank is 17,631,225 bolivianos.

On September 14, 1906, a monetary law was passed providing for the adoption of a gold standard. The unit of account is the gold peso of one-fifth of a pound sterling weighing 1.5976 grams, .916 fine, thus containing 1.464466 grams of fine gold. There are two gold coins struck, British and Peruvian pounds and half pounds; there is no Bolivian gold yet in circulation. Silver coins, .900 fine, are pieces of 50 and 20 centavos. Nickel coins, pieces of 10 and 5 centavos. Gold is legal tender to any amount and English and Peruvian gold coins of corresponding value have legal currency, the rate of exchange being fixed at 12.5 bolivianos = 1£. Silver is legal tender up to 10 pesos, and nickel up to 1 peso. Silver and nickel coins are being minted. In 1909 silver coin to the value of 1,000,000 bolivianos (50 and 20 centavo pieces) were coined for Bolivia at Birmingham. There are also paper notes of 5, 10, 20, 50 and 100 Bolivianos. By a new law the banknote issue is confided to the Banco de la Nacion Boliviana. The bank named is by the same law authorised to raise its capital to 4,000,000£, and may issue notes up to 150 per cent. of its capital. 30 per cent. of the note issue must be covered in gold, and, after 1918, the percentage is to rise 2 per cent. annually up to 50 per cent. On December 31, 1919, the notes in circulation of all the banks were to the value of 26,942,094 bolivianos, the gold reserve against this being 60.7 per cent. of the total.

The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed. The quintal is equal to 101½ lbs.

Diplomatic and Consular Representatives.

1. OF BOLIVIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Vacant (March 1923).

Charge d'Affaires.—Mamerto Urriolagoitia.

Attachés.—Antenor Patino and Juan Ramon Rivero.

2. OF GREAT BRITAIN IN BOLIVIA.

Envoy and Minister.—W. E. O'Reilly.

There are Consular representatives at La Paz, Oruro, Sucre, Santa Cruz, Uyuni, Cochabamba, Concepcion de Velasco, and Potosi.

BRAZIL.

(ESTADOS UNIDOS DO BRAZIL.)

Constitution and Government.

BRAZIL was discovered on April 22, 1500, by the Portuguese Admiral Pedro Alvares Cabral, and thus became a Portuguese settlement. On the French invasion of Portugal, in 1807, the Portuguese Royal family fled to Brazil; on December 16, 1815, the colony was declared 'a kingdom.' The Portuguese Court having returned to Europe in 1821, a national congress assembled at Rio de Janeiro, and on May 13, 1822, Dom Pedro, eldest surviving son of King João VI. of Portugal, was chosen 'Perpetual Defender' of Brazil. He proclaimed the independence of the country on September 7, 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on October 12 following. In 1831 he abdicated the crown in favour of his only son, Dom Pedro II. (born 1825, died 1891), who reigned as Emperor until November 15, 1889, when by a revolution he was dethroned, and he and his family exiled, and Brazil declared a Republic under the title of the United States of Brazil. The decree of banishment against the ex-Imperial family was repealed on August 6, 1920.

According to the constitution adopted by the National Congress on February 24, 1891, the Brazilian nation is constituted as the United States of Brazil. At present the Union consists of twenty States, one National Territory (purchased in 1902), and one Federal District. Each of the old Provinces forms a State, administered at its own expense without interference from the Federal Government save for defence, for the maintenance of order, and for the execution of the Federal laws. Fiscal arrangements in such matters as import duties, stamps, rates of postage, and bank-note circulation belong to the Union; but export duties are the property of the various States.

The legislative authority is exercised by the National Congress with the sanction of the President of the Republic. Congress consists of the Chamber of Deputies and the Senate. It meets annually on the 3rd of May, without being convoked, unless another day be fixed by law, and sits four months, but may be prorogued or convoked extraordinarily. No member of Congress, after his election, can contract with the executive power or accept any commission or paid office, except such as are diplomatic or military or imposed by law. If, in ordinary circumstances, the acceptance of diplomatic or military office would cause the loss of the legislative services of a member, the permission of the Chamber is required. Nor can any member of Congress take part in the administration of any company which receives a subsidy from the Federal Government. Deputies and Senators are paid, and neither can be Ministers of State, and retain at the same time their seats in Congress. Deputies must have been Brazilian citizens for four years. Senators must be over thirty-five years of age and must have been citizens for six years.

The Chamber of Deputies consists of 212 members elected for three years by direct vote (providing for the representation of the minority), in a proportion not greater than one to every 70,000 of population as shown by a decennial census, but so that no State will have less than four representatives. It has the initiative in legislation relating to taxation, and in proceedings against the President of the Republic and Secretaries of State.

Senators, 63 in number, are chosen by direct vote, three for each State, and for the Federal district, for nine years, and the Senate is renewed to the extent of one-third every three years. The Vice-President of the Republic is President of the Senate.

The executive authority is exercised by the President of the Republic. He must be a native of Brazil, over thirty-five years of age. His term of office is four years, and he is not eligible for the succeeding term. The President and the Vice-President are elected by the people directly, by an absolute majority of votes. The election is held on the 1st of March in the last year of each presidential period in accordance with forms prescribed by law. No candidate must be related by blood or marriage, in the first or second degree, to the actual president or vice-president, or to either who has ceased to be so within six months.

The President appoints and dismisses ministers, is in supreme command of the army and navy, and, within certain limits, has the power to declare war and make peace. He (with the consent of Congress) appoints the members of the Supreme Federal Tribunal and the diplomatic ministers. No minister can appear in Congress, but must communicate by letter, or in conference with commissions of the Chambers. Ministers are not responsible to Congress or the Courts for advice given to the President of the Republic.

The franchise extends to all citizens not under twenty-one years of age,

duly enrolled, except beggars, 'illiterates,' soldiers actually serving, and members of monastic orders, &c., under vows of obedience.

President of the Republic.—Dr. Arturo da Silva Bernardes, born in 1875, elected March 1, 1922. Term of office expires November 15, 1926.

There are 7 Secretaries of State at the head of the following Departments:—

1. Finance, 2. Justice, Interior and Public Instruction, 3. War, 4. Marine, 5. Foreign Affairs, 6. Communications and Public Works, 7. Agriculture, Industry, and Commerce.

I. LOCAL GOVERNMENT.

Each State must be organised under the republican form of government, and must have its administrative, legislative, and judicial authorities distinct and independent. The governors and members of the legislatures must be elective; the magistrates must not be elective nor removable from office save by judicial sentence. The Federal executive cannot intervene directly in the local government of the States. Each State is governed by its own Constitution and laws which must agree with the constitutional principles of the Union. In cases of the infringement of the principles of the Federal constitution by the constitutions, laws or authorities of any State, the Federal Government, after due process of Federal law, has the power to interfere even by force of arms, if necessary. The Federal District is administered by a council elected by the citizens of the District, the municipal executive authority being exercised by a Prefect appointed for four years by the President of the Republic.

Area and Population.

Following are the census returns of 1900 and September, 1920 (capitals of States in brackets):—

States	Area: sq. miles	Population		
		1900 (Census)	1920 (Census)	Per sq. mile 1920
Alagoas (Maceió) . . .	22,577	649,273	978,748	43·3
Amazonas (Manáos) . . .	731,363	249,756	363,166	2·0
Bahia (San Salvador) . . .	164,601	2,117,956	3,334,465	20·2
Ceará (Fortaleza) . . .	40,241	849,127	1,319,228	32·7
Espírito Santo (Victoria) . . .	17,308	209,783	457,328	26·4
Goyaz (Goyaz) . . .	288,462	255,284	511,919	1·7
Maranhão (St. Luiz). . .	177,515	499,308	874,337	4·9
Matto Grosso (Cuyabá) . . .	532,210	118,025	246,612	0·4
Minas Geraes (Bello Horizonte) . . .	221,894	3,594,471	5,888,174	26·5
Pará (Belém) . . .	443,789	445,356	983,507	2·2

States	Area : sq. miles	Population		
		1900 (Census)	1920 (Census)	Per sq. mile 1920
Rio Grande do Sul (Porto Alegre)	91,310	1,149,070	2,182,713	23·9
Santa Catharina (Florianopolis)	20,785	320,289	668,743	32·1
São Paulo (S. Paulo)	112,278	2,282,279	4,592,188	40·9
Sergipe (Aracajú)	15,089	356,264	477,064	31·6
Federal District	431	691,565	1,157,873	2,686·5
Acre Territory	58,672	—	92,379	1·5
Total	3,275,510	17,318,556	30,635,605	9·3

In 1900 the population consisted of 8,831,002 males and 8,487,554 females. Some 600,000 Indians are to be found in the Amazon area.

The Acre Territory has an area of 58,672 sq. miles. For this territory Brazil paid to Bolivia 2,000,000*l.* in 1902. In 1909 the Territory petitioned to be received into the Brazilian Union as a State.

In 1920 (census) the population of Rio de Janeiro was 1,157,873; São Paulo, 579,033; Bahia, 283,422; Recife, 238,843; Belem, 236,402; Porto Alegre, 179,263; Manaus, 75,704; Niteroy, 86,238; Fortaleza, 78,536; Maceió, 74,166; São Luiz, 52,929; Parahyba, 52,990.

The site for the Federal Capital has been selected in the State of Goyaz, on a table-land between Pyrenopolis, Santa Luzia, and Formosa.

The number of immigrants between 1820 and 1922 was 3,648,374.

A boundary treaty with Colombia was signed on April 24, 1907; with Peru on September 8, 1909; and with Uruguay on May 7, 1913.

Religion.

The connection between Church and State has been abolished, and absolute equality declared among all forms of religion. The Government left to the Church all religious buildings and their properties and income. All churches are perfectly free; religious orders are allowed and are prosperous. All but about 100,000 of the population are Catholics.

There is a Cardinal whose seat is at Rio de Janeiro and who acts as an Archbishop, an archbishop at Bahia, one at Rio de Janeiro, one at San Paulo, one at Pará, and one at Mariana (Minas). There are 25 suffragan bishops. For instruction of the clergy there are 13 seminaries.

Instruction.

Education is free but not compulsory, except in several municipalities in S. Paulo, which insist on compulsory education (*e.g.* Ribeirão Preto). The Union Government undertakes to provide, in part, for higher or university instruction within the Union, but there are institutions of this nature maintained, some by the States, and some by private associations; while primary and training schools are maintained and supervised, either by the States or by the municipalities. There is one university in Brazil, the University of Rio de Janeiro, founded on September 7, 1920; and there are 25 faculties which confer degrees. In Rio de Janeiro are also the military college, the preparatory school of tactics, and the naval school. In Porto Alegre and Barbaena there are also preparatory military colleges. At the Capital are maintained by the Federal Government a school for the blind and another for

the deaf and dumb. The Federal Government maintains also a School of Arts and a National Institute of Music in the Capital, there being similar academies of music in the States of Maranhão, Pará, São Paulo, and several in the State of Rio de Janeiro. In Manaus, Bahia, and Curitiba there are schools of Fine Arts. There are engineering polytechnics at Rio de Janeiro, São Paulo, and Porto Alegre, and one mining school at Ouro Preto. There are, besides, 28 industrial schools, 11 agricultural and 9 commercial institutions for tuition. There are faculties of law at Recife, São Paulo, Ceará, Goyaz, Pará, Bahia, Bello Horizonte, Porto Alegre, and Rio de Janeiro (2); faculties of medicine at Rio de Janeiro, São Paulo, Curitiba, Bahia, and Porto Alegre; colleges of pharmacy at Ouro Preto, Belem, Juiz de Fora, Porto Alegre, and São Paulo; schools of odontology at Rio de Janeiro, Bello Horizonte, Porto Alegre and also attached to the colleges of medicine and pharmacy; engineering colleges at Rio, Ouro Preto, Bahia, Recife, Porto Alegre, and São Paulo; and since 1916 a school of Economics and Politics (Escola de Altos Estudos) in Rio de Janeiro.

There were in 1914 in the various States, 12,744 primary schools with 700,120 pupils and 20,590 teachers. Of the total number 85 were Federal government schools, 6,935 State Government schools, and 2,647 municipal schools. There were also 327 secondary schools with 30,258 pupils, and 151 professional schools with 19,294 pupils. For teachers' diplomas there are 29 colleges. In recent years public instruction has made great progress.

Brazil has many public libraries. The National Library in Rio contains more than 400,000 books and manuscripts. There is also a National Museum, an Academy of Fine Art, and a Botanical Garden.

Justice and Crime.

There is a supreme Federal court of Justice at Rio de Janeiro; and Federal judges in each State. Justice is administered in the States in accordance with State law, by State courts, but in Rio de Janeiro Federal Justice is administered. Judges are appointed for life. There are also municipal magistrates and justices of the peace, who are elected for four years, and whose chief function is to settle cases up to a certain amount.

A new Civil Code came into force on January 1, 1917. Among the most important subjects covered by the code are those referring to legal capacity; the registration of births, marriages, and deaths; juristic persons and organisations; domicile; real and personal property; homestead (a new institution in Brazilian law); legal acts; domestic relations; copyright (which was formerly very deficient); mortgages; contracts; wills and the administration of estates. Extensive commentaries are being prepared by eminent jurists on this important piece of legislation.

Finance.

Revenue and expenditure (gold milreis = 2s. 3d.; paper milreis = 1s. 4d.). Import duties form the principal source of revenue.

	Revenue		Expenditure	
	(Gold) £	(Paper) £	(Gold) £	(Paper) £
1919	9,000,789	26,776,800	4,200,712	34,269,933
1920 ¹	13,272,549	34,283,880	8,041,369	39,971,905
1921 ¹	11,475,563	41,650,733	8,514,000	47,442,666
1922 ¹	9,796,612	46,114,866	9,667,237	55,412,866
1923 ¹	10,705,086	43,517,000	9,808,942	56,526,109

¹ Estimates.

The principal items of revenue and expenditure for 1922 were estimated as follows:—

Revenue	Gold milreis	Paper milreis	Expenditure	Gold milreis	Paper milreis
Import duties, etc.	79,405,000	71,280,000	Ministry of Justice and Internal Affairs	3,201,000	94,809,000
Consumption taxes	—	212,860,000	Ministry of Foreign Affairs	5,363,000	2,496,000
Circulation taxes	60,000	116,200,000	Ministry of Marine	4,100,000	84,074,000
Income Tax	—	68,300,000	Ministry of War	1,700,000	128,176,000
Industrial revenue	4,100,000	160,046,000	Ministry of Agriculture	382,000	49,173,000
Extraordinary revenue	3,416,000	52,651,000	Ministry of Transportation and Public Works	10,474,000	275,070,000
Other sources	100,000	10,386,000	Ministry of Finance	60,711,000	197,395,000
Total revenue	87,081,000	691,723,000	Total expenditure	85,931,000	831,193,000

The consolidated foreign debt of Brazil on June 30, 1922, amounted to 111,930,834*l.* (including the 1922 London and New York coffee loan of 9,000,000*l.*), 322,249,500 francs, and 75,000,000 dollars (United States: new debt contracted 1921 and 1922). The consolidated internal debt amounted (December 31, 1921) to 1,347,973 contos of reis, an increase of 234,487 contos of reis over 1920. The currency in circulation amounted to 1,729,061,000 milreis; the conversion fund to 20,922,410 milreis gold; the guarantee fund to 48,391,020 milreis gold; and unredeemed bills and notes to 14,632,500 milreis gold and paper. On December 31, 1919, the total currency was 1,823,571,859 milreis.

On July 24, 1912, a bill was introduced into the Senate, making it necessary for the States to obtain the Federal authorization before contracting any loans.

Defence.

Army.—Under the military law of January, 1908, reformed in 1915, military service is obligatory on every Brazilian from 21 years of age to 44. The terms of service are 9 years in the army 'first line' (1 or 2 in the ranks, the rest in the reserve), and 14 years in the 'army second line' (7 in the National Guard and 7 in the reserve of the same). The reservists are called up for training annually for 4 weeks, besides which there is rifle practice once a month. The men in the territorial army also have an annual training of 2 to 4 weeks. The army consists of 13 regiments of infantry each of 3 battalions, and 21 battalions of rifles, of 15 regiments of cavalry of 4 squadrons, 10 regiments of field artillery of 6 batteries each with 4 guns, 6 horse artillery batteries, 5 howitzer groups of 2 batteries, 6 mountain batteries, 5 battalions of engineers, 1 railway battery, 27 batteries coast artillery, 3 companies of independent infantry, and 10 companies of machine guns. The country is divided into 7 military regions; the active army into 5 divisions, each of 2 brigades infantry, 1 brigade artillery, 1 regiment cavalry, 1 battalion engineers, 1 battalion transport, etc. There are also 3 cavalry brigades, all stationed in the south near the frontiers of the three southern republics. A cavalry brigade consists of from 2 to 3 regiments. The total peace strength is at present 54,000 (3,627 officers). Mobilisation

would yield about 120,000. The gendarmerie is 26,000 strong, capable of expansion to 130,000. Infantry are armed with the Mauser rifle, the field and horse artillery have a Krupp 12 pr., which is being replaced by French guns.

Navy.—The navy is being reorganized under a United States mission, naval armaments, materials and stores being supplied from the States. The battleship *Minas Geraes* has been refitted at the Brooklyn navy yard, and has received anti-aircraft guns. The *São Paulo* has followed her for a like refit.

Ships of the Brazilian navy are as follows :—

Laid down	Name	Displacement	Armour		Principal Armament	Torpedo Tubes	H.-P.	Nominal speed
			Belt	Gun				
1907	DREADNOUGHTS, (<i>Minas Geraes</i> . . .)	19,281	9	12	12—12in., 22 4·7in.	—	23,500	21
	(<i>São Paulo</i> . . .)							
1898	COAST DEFENCE SHIPS. (<i>Deodoro</i> . . .)	3,200	14	8	2 9·2in., 4 4·7in.	—	3,400	14
	(<i>Florianópolis</i> . . .)							
1907	PROTECTED CRUISERS (<i>Bahia</i> . . .)	3,500	—	—	10 4·7in.	—	18,000	20
	(<i>Rio Grande do Sul</i> . . .)							
1895	<i>Barroso</i> . . .	3,450	—	—	6 6in., 4 4·7in.	2	7,500	20

There are 2 river monitors (*Maranhão* and *Pernambuco*), 4 river gun-boats, 10 Yarrow destroyers, 1 first-class torpedo boat, a mine layer, 3 submarines, and a submarine salvage vessel. Five destroyers and three large submarines are in the programme. Six ex-German destroyers were allotted to Brazil to be disarmed and used for police purposes.

There are three naval arsenals—at Rio de Janeiro, Pará, and Ladario de Matto Grosso (this latter a river arsenal). It is announced that the arsenal in the Isla das Cobras at Rio will be proceeded with. The navy numbered in 1918, 693 officers, 1,009 petty officers, and 8,445 seamen

Production and Industry.

Brazil is an agricultural country, though only a small fraction of its soil has been brought under culture. In 1921 the cultivated area covered 6,200,000 hectares (23,938 square miles), of which 2,143,981 hectares (8,277 square miles) were in São Paulo, 1,168,808 hectares (4,513 square miles) in Rio Grande do Sul, 1,100,482 hectares (4,248 square miles) in Minas, and 1,787,000 hectares (6,900 square miles) in other States. The census returns gave 650,000 proprietors of land, the value of which was estimated at 11,000,000,000 milreis. Agricultural industries are encouraged by the State governments. Coffee is the chief product cultivated, and after that maize, sugar, rice, tobacco, cotton, maté (Paraguay tea), india-rubber, timber, haricot beans, cocoa, and nuts. The four states of São Paulo, Rio de Janeiro, Espírito Santo, and Minas Geraes, the combined areas of which cover about one-eighth of the entire area of the Republic, are the principal districts for coffee growing. Four-fifths of the coffee of the world comes from these parts; more than half of the world's supply from São Paulo alone, where in 1921 there

were 3,162,880 acres under this product. The average annual crop of Brazil may be estimated at about 12 million sacks (1 sack=132 pounds). For 1921-22 the estimated produce was 8,030,000 bags, and for 1922-23 about 5,000,000 bags. India-rubber is the other great natural product of the country. About one-half of the world's supply comes from Brazil, the principal rubber-growing districts being Manaos, and Pará. In 1920-21 the production of cotton was 97,784 metric tons, and in 1921-22 it was 132,600 metric tons. Cocoa is produced in many States (65,100 metric tons in 1921), but chiefly in Espírito Santo, and Bahia, where also the tobacco industry flourishes. The 1921 production of tobacco was 13,900 metric tons. The average annual production of sugar may be taken as 314,000 tons (526,116 tons for 1921-22). In 1921 the production of maize was 4,716,095 metric tons.

The census of cattle for 1920 showed that there were in Brazil 34,271,324 oxen ; 16,168,549 swine ; 7,933,437 sheep ; 5,086,655 goats ; 5,253,699 horses ; 1,865,259 asses and mules.

Both the forests and mines of Brazil are important. There has been a lumber development in the last few years, and pine has become an important export. The mines, with certain reservations, belong to the proprietors of the soil. Coal deposits exist in Rio Grande do Sul, Santa Catharina, Paraná, and São Paulo, much of the coal being of inferior quality. Iron is found chiefly in Minas Geraes. Gold is also found ; diamond districts are Diamantina, Grão Mogol, Chapada Diamantina, Bagagem, Goyaz, Matto Grosso, and other States. Petroleum also exists in workable quantities. Manganese ores are worked in Rio de Janeiro and Minas Geraes. The greater part of the world's supply of monazite comes from Brazil.

The most important manufacturing industry in Brazil is cotton weaving, which in the past 25 years has developed to such an extent that all but the finer grades are made in this country, and the importation of cotton goods from Europe is decreasing. There were in 1921 242 cotton factories with 1,521,300 spindles and 108,960 workmen, having a capital invested in them of 337,700,000 milreis, and an output valued at 442,000,000 milreis. The manufacture of silk is also being encouraged ; the Federal Government grants premiums to silk cocoon producers. There are 13 silk mills, 35 woollen mills, and 16 jute mills in Brazil. There are over 2,000 tobacco factories in Brazil. In Pernambuco there are 47 sugar factories, in Campos (Rio de Janeiro) 40, in Bahia 12, and in other parts of Brazil 15. In Rio de Janeiro flour milling is important, wheat being imported chiefly from the Argentine and Uruguayan Republics, but the imports of wheat flour are very large, mostly from the Argentine Republic and the United States. Brewing, being protected, is prosperous. According to the latest industrial census there are 19,000 factories in Brazil, with a capital of 2,000,000,000 milreis, an annual output of 3,000,000,000 milreis, and 350,000 employees. Efforts are being made to establish a fishing industry.

In the southern States of Brazil there are prosperous German, Russian, and Italian colonies. The colonies maintained by the Union are the nineteen following: — Afonso Penna (founded in 1908), in the State of Espírito Santo ; Visconde de Maua (1908) and Itatiaya (1908) in the State of Rio de Janeiro ; João Pinheiro (1910) and Inconfidentes (1910) in that of Minas Geraes ; Bandeirantes (1908) and Monção (1910) in that of S. Paulo ; Ivahy (1907), Tayo (1908), Iraty (1908), Vera-Guarany (1909), Senador Correia (1907), Jesuino Marcondes (1907), Cruz Machado (1910), Apucarana (1912), and Yapo (1913), in Paraná ; Anitapolis (1908), Senador Esteves Junior (1910) and Rio Branco (1913), in Santa Catharina. On December 31, 1921, the popu-

lation of the Federal Colonies was 44,459 (23,566 men and 20,893 women), including 18,708 Brazilians, and 25,751 of other nationalities.

Commerce.

Imports and exports (excluding specie) conversions at current rates varying from 11½*d.* to 16*d.* per milreis (paper):—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports	44,509,646	52,816,853	78,177,235	125,004,856	60,408,156
Exports	63,031,161	61,167,975	130,085,438	107,521,052	58,586,898

Principal exports in 1920 and 1921 were (metric ton = 2,204·6 lbs.):—

	Quantities 1920	Quantities 1921	Value 1920	Value 1921
	Metric tons	Metric tons	£	£
Coffee (Sacks)	11,524,780	12,368,610	52,821,850	34,694,000
Rubber (Metric tons)	23,531	17,070	3,716,000	1,231,000
Tobacco "	31,469	32,160	2,406,000	1,933,000
Sugar	109,141	172,094	6,147,000	3,292,000
Yerba Maté (Tea) (Metric tons)	90,686	71,899	2,973,000	1,492,000
Cocoa (Metric tons)	54,419	42,883	3,821,000	1,682,000
Cotton	24,696	19,607	5,502,000	1,556,000
Leather "	37,265	44,443	4,021,000	1,767,000
Hides "	3,966	2,911	2,990,000	749,000
Frozen and chilled meat	63,600	61,934	4,299,000	2,376,000

The distribution of the imports and exports in 1920 and 1921 was as follows:—

From or to	Imports		Exports	
	1920	1921	1920	1921
	£	£	£	£
United Kingdom	27,274,778	12,337,337	8,759,393	4,073,912
Germany	5,875,913	4,864,004	6,184,210	5,569,531
United States	51,939,093	19,148,015	44,987,187	21,664,607
France	6,847,672	3,775,263	12,850,008	5,797,604
Portugal	2,644,180	1,102,221	2,049,369	1,258,169
Austria	64,920	51,120	53,286	17,075
Belgium	2,207,116	2,455,900	2,884,406	1,454,815
Argentina	10,544,889	6,902,798	7,093,995	3,847,852
Uruguay	1,681,969	828,255	4,778,021	3,341,572
Holland	639,853	523,044	3,011,097	4,017,647
Italy	3,079,707	1,760,198	7,826,860	3,810,106

The chief articles of commerce between the United Kingdom and Brazil (Board of Trade statistics) in two years were:—

Imports into U.K. from Brazil	1920	1921	Exports from U.K. to Brazil	1920	1921
	£	£		£	£
Rubber	1,795,904	298,385	Coal	726,671	367,904
Raw cotton	3,438,648	850,978	Cottons (piece goods)	4,096,977	1,511,812
Coffee	715,607	171,826	Machinery	1,661,309	1,677,487

Total trade between United Kingdom and Brazil (according to Board of Trade returns) for 5 years :—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Brazil into U.K.	8,849,431	10,821,100	12,025,378	5,883,046	7,726,337
Exports to Brazil from U.K.	8,845,911	10,741,686	24,289,414	10,384,657	10,983,059

Shipping and Navigation.

In 1921 there entered the ports of Brazil 22,728 steam and sailing vessels of 23,113,156 tons (18,286 of 9,152,917 tons Brazilian, and 1,541 of 5,852,595 tons British), and cleared 22,573 steam and sailing vessels of 23,168,653 tons (18,089 of 9,103,999 tons Brazilian, and 1,558 of 5,905,068 tons British).

The merchant navy in 1919 consisted of 588 steamers of 433,000 tons net, and 55 sailing vessels of 17,920 tons net. All coasting and river vessels must be Brazilian. The coast has a length of 4,060 miles. The Brazilian Lloyd, for coasting trade, maintains a monthly service between Rio de Janeiro and New York, and has also inaugurated a service between Liverpool, Portugal and Brazil.

Inland waterways, mostly rivers, are open to navigation over some 40,300 miles. By means of its waterways Brazil is connected with the neighbouring States.

Internal Communications.

Railway history in Brazil begins in 1854 with 89 miles. Brazil possessed on December 31, 1920, railways of a total length of 17,213 miles open for traffic. Of this total 9,455 miles of railway were the property of the Union (3,980 miles are administered directly and the rest are farmed out); 6,231 miles were privately owned; and 1,527 miles belonged to the States. The individual States which possess the greatest railway mileage are São Paulo, with 4,160 miles; Minas Geraes with 4,139 miles; Rio de Janeiro and Federal District with 2,057 miles; Rio Grande do Sul with 1,708 miles; and Pernambuco with 1,300 miles. The Central Brazil Railway (1,563 miles) is the principal railway in Brazil, and is owned by the State. The entire system joins up the railways of Brazil with those of Uruguay, Argentina and Paraguay.

The telegraph system of the country is under control of the Government. In 1919 there were 54,526 miles of line, including 26,100 miles of Government property, 17,159 miles of railway property and 11,267 miles of submarine cables. There were 850 telegraph offices. The number of messages was 5,350,606. Receipts in 1917, 864,917*l.*; expenditure, 963,363*l.*

The Post Office carried (1917) a total of 31,577,090 letters, and 77,344,613 pieces of printed matter. Altogether the post office in 1917 despatched 4,586,187 sacks of mail, received 3,825,710, and handled in transit 2,754,987. There were 3,696 post-offices in 1920. Receipts in 1917, 12,800 contos; expenditure, 21,132 contos.

There were 56,760 telephones in the country in 1917; total length of wires, 252,318 miles in 1918. A wireless system is now in process of completion. Fifteen new stations were erected along the Amazon and Paraguay rivers, and 5 on the coast.

A decree was issued in 1913 adopting the standard time and longitude of Greenwich (instead of that of Rio de Janeiro) as from January 1, 1914.

Money and Credit.

The Bank of Brazil with an authorised capital of 70,000 contos of reis (increased in June, 1921, to 100,000 contos of reis) had, in 1921, 46 branches throughout the Republic.

The *Caixa de Conversão* was founded in 1906, and up to May, 1910, it received gold in exchange for notes at the rate of 1s. 3d. per milreis. It then suspended operations, having in deposit at that date 20,000,000*l.*, the maximum fixed by law. On January 23, 1911, it recommenced operations, Congress having fixed the maximum deposit at 60,000,000*l.* at the exchange of 1s. 4d. per milreis. On March 1, 1921, it had gold to the value of 62,538,352 milreis. The convertible notes in circulation amounted to 95,156,320 milreis.

At the end of December, 1921, the activities of the banks of Brazil totalled 11,302,604 contos of reis (end of 1920, 9,791,536 contos of reis). They had 3,074,000 contos of reis in deposits, 136,042 contos of reis in reserves, and an aggregate paid up capital of 625,648 contos of reis.

Money, Weights, and Measures.

MONEY.

The unit is 1 real (*pl.* reis): bronze coins, 20 and 40 reis (100 reis = 1*l.*); nickel coins, 100, 200, and 400 reis (400 reis = 6½*l.*); silver, 500, 1,000, and 2,000 reis. The *Milreis* (1,000 *Reis*) is of the par value of 2s. 2·934*d.* (practically 27*d.*). 1,000,000 reis is called A conto of reis.

The paper currency is of the following denominations: 1,000 reis, 2,000 reis, 5,000 reis, 10,000 reis, 20,000 reis, 50,000 reis, 100,000 reis, 200,000 reis, 500,000 reis, and 1,000,000 reis.

WEIGHTS AND MEASURES.

The French metric system, which became compulsory in 1872, was adopted in 1862, and has been used since in all official departments. But the ancient measures are still partly employed in certain rural districts of the interior. They are:—

The <i>Libra</i>	.	.	.	=	1·012 lbs. avoirdupois.
„ <i>Arroba</i>	.	.	.	=	32·38 „ „
„ <i>Quintal</i>	.	.	.	=	129·54 „ „
„ <i>Alqueire</i> (of Rio)	.	.	.	=	1 imperial bushel.
„ <i>Oitava</i>	.	.	.	=	55·34 grains.

Diplomatic and Consular Representatives.

1. OF BRAZIL IN GREAT BRITAIN.

Ambassador.—Domicio da Gama (appointed September 21, 1919).

First Secretary.—Luiz Avelino Gurgel do Amaral.

Second Secretary.—Antonio Camillo de Oliveira.

Naval Attaché.—Captain Augusto Burlamaqui.

Commercial Attaché.—Julio Barboza Carneiro.

Consul-General in Liverpool.—Dario Freire

Consul-General in London.—A. S. Pereira Brandão.

There are Consular representatives at Belfast, Birmingham, Bristol, Cardiff, Cork, Cowes, Dover, Dublin, Dundee, Falmouth, Glasgow, Hull, Leeds, Leith, Manchester, Milford Haven, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton.

2. OF GREAT BRITAIN IN BRAZIL.

Ambassador.—The Rt. Hon. Sir John Tilley, K.C.M.G., C.B., appointed December 12, 1920.

Counsellor.—W. A. Stewart.

Secretary.—J. H. Leche, O.B.E.

Commercial Secretary.—Ernest Hambloch.

Naval Attaché.—Captain C. L. Tottenham, C.B.E., R.N.

There are Consular representatives at Rio de Janeiro (C.G.), Bahia, Pará, Pernambuco, Rio Grande do Sul, Santos, Ceará, Maceió, Maranhão, Porto Alegre, Manaus, São Paulo, Corumba, Morro Velho, Victoria, Aracaju, Ilheus, and other towns.

BULGARIA.

(BLGARIYA.)

Reigning King (Czar).

Boris III., eldest son of Ferdinand of Saxe-Coburg and Gotha, and the late Marie Louise (died January 31, 1899), eldest daughter of Duke Robert of Parma, born January 30, 1894, succeeded to the throne on the abdication of his father, October 3, 1918.

Brother and Sisters of the King.—(1) Prince *Cyril*, born November 17, 1895; (2) Princess *Eudoxia*, born January 17, 1898; and (3) Princess *Nadejda*, born January 30, 1899.

According to the Constitution the Sovereign must profess the Orthodox religion, and must reside permanently in the country. The royal title is hereditary.

According to the budget of 1921-22, the civil list is fixed at 1,800,000 leva (francs), besides 1,500,000 leva for the maintenance of palaces, &c.

Constitution and Government.

The Principality of Bulgaria was created by the Treaty of Berlin, signed July 13, 1878. It was ordered by the Treaty that Bulgaria should be constituted an autonomous and tributary Principality under the suzerainty of His Imperial Majesty the Sultan with a Christian Government and a national militia. The Prince of Bulgaria should be freely elected by the population and confirmed by the Sublime Porte, with the consent of the Powers. On October 5, 1908, Bulgaria declared her independence. The difficulty as to compensation to the Turkish Government in respect of railway claims was arranged by an understanding between the Turkish Government and the Oriental Railways Company, and the Powers recognised Bulgarian independence, and the title of 'King of the Bulgarians' assumed by Prince Ferdinand.

Eastern Rumelia (since its union with Bulgaria also known as Southern Bulgaria) was created by the Treaty of Berlin, signed July 13, 1878. It was to remain under the direct political and military authority of the Sultan, under conditions of administrative autonomy, with a Governor-General nominated by the Porte. On September 18, 1885, the Government was overthrown by a revolution, and the union of the province with Bulgaria proclaimed. On

April 6, 1886, the Sultan agreed that the government of Eastern Rumelia should be confided to the (then) Prince of Bulgaria as Governor-General.

On September 30, 1912, Bulgaria allied with Serbia, Greece and Montenegro commenced war on Turkey (First Balkan War), which was ended by the Treaty of London on May 30, 1913, by which Turkey ceded to the Allies all its European territory west of a line drawn from Midia on the Black Sea to Enos on the Aegean, and also Crete.

The Balkan League broke up almost immediately after the signing of the Treaty of London, owing to disagreements among the allies as to the division of the territory ceded to them, and on June 29, 1913, war broke out among the allies (Second Balkan War). On July 10, 1913, Rumania intervened to impose peace on the allies and to exact for herself from Bulgaria an extension of her frontier. Peace came finally on August 10 (July 26 old style), 1913, by the Treaty of Bukarest, between Bulgaria on the one hand, and Rumania, Serbia, Greece and Montenegro on the other.

For frontier arrangements agreed to by the Treaty of Bukarest and the Turko-Bulgarian Treaty, see THE STATESMAN'S YEAR-BOOK for 1915, p. 759, and the maps in THE STATESMAN'S YEAR-BOOK for 1914.

By the Constitution of 1879, amended May, 1893, and June, 1911, the legislative authority was vested in a single Chamber, called the Sobranye or National Assembly, composed of 227 members. The members of it are elected by universal manhood suffrage at the rate of one member to every 20,000 of the population. Every member receives 250 levas (about 16s. 8d.) a day (including Sundays and holidays) during the session. All over 30 years of age who can read and write (except the clergy, soldiers on active service, persons deprived of civil rights, &c.) are eligible as representatives. The duration of the Assembly is four years, but it may be dissolved at any time by the King, when new elections must take place within two months. Laws passed by the Sobranye require the assent of the King. Questions concerning the acquisition or cession of territory, changes in the constitution, a vacancy on the throne, or the appointment of a regent have to be decided by a Grand Sobranye, elected for the special purpose in a manner similar to that in which the ordinary Sobranye is elected, but with double the number of members. Proportional representation was adopted in 1909.

Parties in the Sobranye (elected March 28, 1920):—Agrarians, 110; Communists, 49; Socialists, 8; Democrats, 24; Liberals, 6; Radicals, 8; Progressives, 8; Nationalists, 14.

The executive power is vested in a Council of Ministers nominated by the King. The present cabinet, after the latest remodelling on February 10, 1923, is composed as follows:—

Premier and Minister for Foreign Affairs.—Alexander Stambolyisky.

Minister of the Interior.—The Premier (ad interim).

Minister of Justice.—Peter Yanoff.

Minister of Commerce.—Alexander Radoloff.

Minister of Finance.—P. Yaneff (ad interim).

Minister of Public Works.—Tzanko Bakaloff-Tzerkovsky.

Minister of Posts and Railways.—T. Bakaloff-Tzerkovsky (ad interim).

Minister of Education.—Stoyan Omartchevsky.

Minister of Agriculture.—Alexander Oboff.

Minister of War.—The Premier (ad interim).

For local administration the country is divided into a number of Departments, each under a Prefect assisted by a Departmental Council and aided by several sub-prefects. Each community has its Kmet or mayor and its Council.

Area and Population.

The area of Bulgaria (1921) is 103,189 square kilometres, or 39,841 English square miles, and the population, according to a census taken on December 31, 1921, was 4,909,700 (2,455,900 males and 2,453,800 females), as against 4,861,439 (2,434,940 males and 2,426,499 females) in 1920.

By the Peace Treaty of Neuilly, signed on November 27, 1919, Bulgaria ceded Thrace to the Allied and Associated Powers and the Strumnitza line and a strip of territory on the north-west frontier to Serbia. Bulgaria was deprived of its Aegean littoral, but an efficient economic outlet to the same sea was provided to her by the Treaty.

Population of districts, according to census of December 31, 1920 :—

District.	Population	District.	Population
1. Bourgas	429,856	10. Pléven	396,767
2. Varna	203,572	11. Roussé	304,654
3. Vidin	248,658	12. Sofia	533,290
4. Vratza	346,675	13. Stara Zagora	550,668
5. Kustendil	229,930	14. Tirnovo	471,334
6. Mastanly	113,991	15. Choumen	323,011
7. Pachmanly	64,372		
8. Petritch	155,598	Total	4,861,439
9. Plovdiv	489,063		

The capital is the city of Sofia, with a population (census, 1920) of 154,431. The other principal towns, with population in 1920, are Philippopolis (Plovdiv), 63,418; Varna, 50,819; Ruschuk, 41,574; Slivno (Sliven), 28,695; Plevna (Pleven), 27,779; Stara Zagora, 25,491; Choumen, 23,975; Burgas, 22,272; Jambol, 19,921; Hascovo, 19,458; Pazardjik, 19,452; Vidin, 17,722; Vratza, 16,014; Kustendil, 15,086.

The movement of population (the latest available) in four years has been :

Years	Marriages	Living Births	Still-births	Deaths	Surplus of Births
1915	27,920	174,232	1,251	86,259	87,973
1916	8,704	89,741	562	87,546	2,195
1917	18,478	69,905	382	88,387	- 18,482
1918	41,643	92,350	338	127,233	- 34,883

Religion and Instruction.

The national faith is that of the Orthodox Greek Church, though, in 1870, in consequence of its demand for and acceptance of religious autonomy, the Bulgarian Church was declared by the Patriarch of Constantinople to be outside the Orthodox Communion. The Church is governed by the Synod of Bishops. There are 11 Dioceses, viz., Sofia, Plovdiv, Stara Zagora, Sliven, Varna, Roussé, Tirnovo, Vratza, Lovetch, Vidin and Névrokoff, in addition to 4 in Macedonia and 1 in Thrace (suspended at present). The clergy, both Orthodox and of other religious bodies, are paid by the State and also receive fees for services at burials, marriages, &c.

There is a university at Sofia, with (1921) 140 professors (2 women) and 4,899 students (4,096 men and 803 women).

Elementary education is obligatory and free for children between the ages of 7 and 14.

The following are statistics of various classes of State schools in Bulgaria for 1920-21.

Schools	Number	Teachers		Attendance	
		Male	Female	Male	Female
Elementary { National	3,741	5,575	5,685	282,406	218,988
{ Private .	1,699	2,048	180	43,883	34,010
Progymnasia { National	528	1,269	1,597	50,082	21,483
{ Private .	34	99	23	1,368	425
Incomplete { National	32	236	285	7,849	4,867
gymnasia { Private .	10	52	31	414	748
Complete { National	55	857	546	18,423	11,776
gymnasia { Private .	3	28	2	326	—

There are besides 127 institutions for special instruction with 754 instructors (533 male and 218 female) and an attendance of 8,802 males and 6,019 females ; and 4 institutes for abnormal children. There are also 13 institutions for the training of teachers.

Justice.

The lowest Court is that of the Justices of the Peace, who possess jurisdiction in minor civil and criminal cases. The Departmental Court, or Court of First Instance, is competent to pronounce sentence of death and penal servitude, and also acts as a Court of Appeal. Above these are three Courts of Appeal, sitting at Sofia, Philippopolis and Ruschuk. The highest tribunal is the Court of Cassation, sitting at Sofia, and composed of 12 judges.

Finance.

The estimated revenue and expenditure of Bulgaria for 5 years were as follows (25 leva = £1 ; the average rate during 1922 was about 700-800 leva) :—

	1918	1919-20	1920-21 ¹	1921-22 ²	1922-23 ²
	£	£	£	£	£
Revenue . . .	19,244,000	33,605,900	104,541,200	3,701,200	5,432,176
Expenditure . . .	19,176,560	—	158,187,397	3,547,481	5,807,704

¹ At the nominal rate of exchange.

² At actual rate of exchange

Revenue and expenditure for 1922-23 :—

Revenue	Leva	Expenditure	Leva
Direct taxes . . .	620,500,000	Civil List . . .	26,865,910
Indirect taxes . . .	1,719,500,000	Audit Office . . .	6,236,960

		" " Public Wks. . .	386,964,000
		" " Railways, Post and Telegraphs . . .	576,081,460
		For execution of Peace Treaty . . .	420,500,000
Total . . .	4,345,740,000	Total . . .	4,646,168,413

On June 30, 1922, the total debt of Bulgaria was given as follows: Foreign debt: 3,220,683,491 francs and 24,967,047 gold francs (consolidated, 2,780,525,991 francs; non-consolidated, 440,157,500 francs and 24,967,047 gold franc). Internal debt: 4,297,970,237 leva (consolidated, 84,034,900 leva; non-consolidated, 4,213,935,337 leva).

Defence.

The pre-war peace strength of the Bulgarian army was about 3,900 officers and 56,000 other ranks. Its war strength was approximately 500,000 men.

Under the terms of the Treaty of Neuilly of November 27, 1919, the total military forces of Bulgaria must not in the future exceed 20,000 men, enrolled by voluntary system. The obligatory military service is abolished. All measures of mobilisation are prohibited and, in order to prevent the formation of a reserve, service in the ranks is to be for a minimum period of 12 years. Officers serving at the time when the treaty was signed must undertake to serve at least till the age of 40 and newly appointed officers serve for at least 20 years.

A frontier guard of 3,000 men voluntarily enlisted is permitted, and in addition the number of armed gendarmes, police, customs officials and forest guards must not exceed 10,000.

The maximum authorised armaments and munition supplies are :—

	Per 1000 men.	Munitions per arm.
Rifles or carbines . . .	1,150	500 rounds
Machine guns . . .	15	10,000 "
Trench mortars, light . .	2	1,000 "
" " heavy . . .	2	500 "
Guns or howitzers . . .	3	1,000 "

No military or naval aircraft are permitted.

The manufacture of arms, munitions and war material is only to be carried out at one factory under State control. The importation and exportation of arms, and munitions is prohibited.

The Bulgarian Government has failed to obtain the authorised forces by voluntary enlistment; the total number voluntarily enlisted up to September, 1922, was :—

—	Regular Army	Frontier Guards	Gendarméne
Officers . . .	930	149	432
Men . . .	6,475	280	3,402
Total . . .	7,405	429	3,834

Under the terms of the treaty Bulgaria has surrendered all warships and submarines, but is permitted to maintain on the Danube and along the

coast 4 torpedo boats and 6 motor boats, all without torpedoes and torpedo apparatus, for police and fishing duties.

Production and Industry.

Agriculture is the chief occupation of the people. Land is held in absolute freehold by the owners and there is a land tax. The communes hold pasture-land and wood-land in perpetuity and pay no rent, and over such lands the members of the communes have grazing and wood-cutting rights.

About two-thirds of the population are engaged in agriculture, most of them being small proprietors holding from one to six acres. The methods of cultivation are primitive, but machinery is being gradually introduced.

The cultivated area of Bulgaria is 3,716,070 hectares, or 9,182,409 acres.

The area and yield of cereals for 2 years is given as follows :—

Cereals	1920		1921	
	Area	Yield	Area	Yield
	Acres	Tons	Acres	Tons
Wheat	2,208,292	816,437	2,388,832	1,156,927
Rye	469,040	153,827	494,622	213,112
Meslin	240,017	86,933	281,572	145,746
Barley	560,935	205,765	557,022	288,283
Oats	349,245	101,657	411,965	163,607
Spelt	24,650	7,159	23,052	9,161
Millet	32,510	10,367	27,645	12,210
Maize	1,423,715	529,638	1,434,197	873,440
Rice	6,557	3,087	7,095	4,583
Total	5,314,961	1,914,870	5,426,002	2,867,069

Fruit grows in abundance, especially in the neighbourhood of Kustendil ; 87,855 acres are under vines, yielding 75,910 tons of grapes and 8,698,822 gallons of wine ; under tobacco were 96,475 acres, yielding 29,304 tons ; under cotton 3,137 acres, producing 1,714 quintals. There is also considerable silkworm culture.

In 1917 there were in Bulgaria 7,340,904 sheep, 924,554 goats, 1,885,620 head of cattle and buffaloes.

Industry is not much developed, though the State encourages industrial enterprise. In 1920 there were 486 industrial concerns aided by the State, 196 of which were connected with the preparation of foodstuffs.

Mining development has been slow. The country is rich in coal ; there are three State mines (at Pernik, Bobovodo and Maritza), and several privately owned mines. The coal mines at Pernik, worked by the Government, produced in 1920, 670,342 tons. Total coal production in 1921, 854,534 metric tons, of which 814,663 tons came from State mines and 39,871 tons from privately owned mines. Iron is found in large quantities ; gold, silver, lead, manganese, and copper also exist in the country.

Commerce.

Imports and exports for 5 years :—

	1916	1917	1919	1920	1921
	£	£	£	£	£
Imports . . .	3,577,121	6,739,661	33,557,649	58,553,209	116,843,690
Exports . . .	3,831,824	11,556,256	22,090,138	65,719,956	88,693,090

The following table shows the trade by principal countries for 2 years :—

Shipping and Communications.

The number of vessels entered at the Black Sea ports of Bulgaria in 1920 was 2,112 of 833,162 tons; number of vessels cleared, 2,097 of 823,099 tons. At the Danube ports there entered, in 1920, 2,724 vessels of 278,353 tons; and cleared, 2,706 vessels of 277,675 tons.

On March 31, 1921, there were in Bulgaria 2,088 miles of good roads, 2,637 miles of fair roads, and 1,851 miles of bad roads. Total: 6,576 miles of road.

In 1921, Bulgaria had 1,368 miles of railway of ordinary gauge and 214 miles of narrow gauge; total, 1,582 miles. All the lines belong to the State, which works them. Railways connect Sofia with the general European system.

There were, in 1920, 223 post and telegraph offices (99 urban and 124 rural), and 207 telegraph offices, making a total of 430 offices. Total correspondence handled in 1921, 26,727,766 letters, 24,899,662 postcards, 2,618,703 printed packets; postal revenue, 16,139,995 leva; expenditure, 26,873,819 leva. Length of telegraph line in 1920, 3,456 miles; of wire, 9,936 miles.

Money and Credit.

There is a National Bank of Bulgaria, with headquarters at Sofia and branches in the different towns of Bulgaria; its capital is 100,000,000 leva, provided by the State, and it has authority to issue both gold notes and silver notes. On June 30, 1922, it had in hand 38,163,000 leva in gold and 19,563,000 leva in silver, with a total note circulation of 3,800,625,000 leva and deposits of 1,432,754,000 leva. There is a State Agricultural Bank for making advances on personal security. A law passed by the Bulgarian National Assembly on December 28, 1921, authorises the establishment of a Bulgarian International Bank for facilitating and encouraging international trade. It is understood that the original capital of this bank is to be 75,000,000 leva, of which 30,000,000 leva are to be apportioned to the Bulgarian National Bank and the Bulgarian Agricultural Bank, and the remainder to foreign banks and organisations.

Deposits in the 350 Postal Savings Bank of Bulgaria (20,026 depositors) during 1921 amounted to 97,870,066 leva (146,211 transactions), and withdrawals to 113,609,644 leva (136,821 transactions). The balance in hand on January 1, 1922, was 205,337,573 leva.

There are a few Bulgarian gold coins, of the value of 100, 20, and 10 leva (francs), but the gold circulation is supplied by foreign 10 and 20 franc pieces. There are silver coins of $\frac{1}{2}$ lev, and 1 lev, 2, and 5 leva (francs); nickel coins of 2 $\frac{1}{2}$, 5, 10, and 20 stotinki (centimes); the notes of the National Bank circulate at par.

The metric system is in general use. On April 1, 1916, the Gregorian Calendar came into force in Bulgaria.

Diplomatic and Consular Representatives.

1. OF BULGARIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dimitri Stancioff. Appointed October 25, 1920.

Secretary.—Stoyan Petrow-Tchomakoff.

Attaché.—Boris Athanassoff.

2. OF GREAT BRITAIN IN BULGARIA.

Envoy Extraordinary and Minister Plenipotentiary.—Hon. William Augustus Forbes Erskine, M.V.O. Appointed October 1, 1921.

Secretaries.—D. Mackillop and C. B. P. Peake, M.C.
Military Attaché.—Colonel A. W. F. Baird, C.B., &c.
Naval Attaché.—Commander R. T. Down, D.S.O., R.N.
Vice-Consul.—L. H. Hurst, Sofia.

There are Consular representatives at Sofia, Varna, Bourgas, and Rustchuck.

CHILE.

(REPÚBLICA DE CHILE.)

Constitution and Government.

THE Republic of Chile threw off allegiance to the Crown of Spain by the declaration of independence of September 18, 1810, finally freeing itself from Spanish rule in 1818. The Constitution voted by the representatives of the nation on May 25, 1833, with a few subsequent amendments, establishes three powers in the State—the legislative, the executive, and the judicial. The legislative power is vested in the National Congress, consisting of the Senate and the Chamber of Deputies. The Senate is composed of 37 members popularly elected by provinces for the term of six years, in the proportion of one Senator for every three Deputies; while the Chamber of Deputies composed of 118 members chosen directly by departments for a period of three years, consists of one representative for every 30,000 of the population, or a fraction not less than 15,000; the present number of deputies was determined in 1910 on the basis of the census results of 1907. Both bodies are chosen by the same electors. Electors must be 21 years of age, and able to read and write. The executive is exercised by the President of the Republic elected for a term of five years, by indirect vote, the people nominating, by ballot, delegates who appoint the President. A retiring President is not re-eligible. In legislation the President has a modified veto; a bill returned to the chambers with the President's objections may, by a two-thirds vote of the members present (a majority of the members being present), be sustained and become law. The day of a Presidential election is June 25 of the last of the five years of a Presidency.

President of the Republic.—Señor Don Arturo Alessandri. Born December 21, 1869. Assumed office December 23, 1920.

The salary of the President is fixed at 1,384*l.*, with 923*l.* for expenses.

The President is assisted in his executive functions by a Council of State of five members nominated by the President, and six members chosen by the Congress, and a Cabinet or Ministry divided into departments, viz., Interior, Foreign Affairs, Justice and Public Instruction, Finance, Defence, Industry, Public Works and Railways.

LOCAL GOVERNMENT.

For the purposes of local government the Republic is divided into Provinces, presided over by *Intendentes*; and the Provinces into Departments, with *Gobernadores* as chief officers. The Departments constitute one or more municipal districts each with a council or municipality of 9 members, inhabitants popularly elected for three years. The police of Santiago and of the capitals of departments is organised and regulated by the President of the Republic at the charge of the national treasury.

Area and Population.

The Republic is divided into 23 provinces, subdivided into 82 departments, and 1 territory (Magallanes). Departments and territories are subdivided into 905 sub-delegations and 3,229 districts.

In 1884 the provinces of Tarapacá and Tacna were ceded to Chile by

Peru. The cession of Tacna was originally for ten years, at the end of which period a *plebiscite* of the province would decide to which country it should belong. As the *plebiscite* has not yet been taken, the provinces are still occupied by Chile.

Area and population of the provinces on January 1, 1920 (census figures):—

Provinces	Area : Sq. Miles	Popula- tion 1920	Pop. per sq. Mile	Provinces	Area : Sq. Miles	Popula- tion 1920	Pop. per sq. Mile
Tacna . .	8,999	38,912	4.33	Ñuble . .	3,498	170,425	48.72
Tarapacá .	16,689	100,553	6.02	Concepción .	3,313	247,611	74.43
Antofagasta	46,408	172,330	3.71	Arauco . .	2,189	60,233	27.51
Atacama .	20,711	44,413	1.57	BioBio . .	5,353	107,072	20.00
Coquimbo .	14,098	160,256	11.36	Malleco . .	3,303	121,429	36.76

Valparaiso	1,775	320,398	180.50	Valdivia . .	8,991	175,141	19.48
Santiago .	5,893	685,358	116.30	Llanquihué .	34,778	137,206	3.90
O'Higgins .	2,168	118,691	54.70	Chiloé . .	6,979	110,331	15.80
Colchagua .	3,851	166,342	43.19	Magallanes			
Curicó . .	3,045	103,148	35.00	territory .	65,355	28,960	0.44
Talca . . .	3,864	133,957	34.66				
Maule . .	2,812	113,231	40.26				
Linares . .	3,969	119,284	30.12	Total . .	289,828	3,754,723	12.92

Many islands to the north, west, and south belong to Chile. The coast-line is about 2,485 miles in length.

In 1885 the population numbered 2,527,320; in 1895, 2,712,145. In 1920 (last census), 3,754,723 (1,866,751 males and 1,887,972 females). Estimated population September, 1922, 3,819,096.

The population of the principal towns in 1920 (census figures) was:—Santiago, 507,296; Valparaiso, 182,242; Concepcion, 66,074; Iquique, 37,421; Talca, 36,079; Chillan, 30,881; Antofagasta, 51,531; Viña del Mar, 33,441; Curicó, 15,579; Temuco, 28,546; Serena, 15,240; Talcaguano, 22,084; Valdivia, 26,854. Of the total population 46.60 per cent. were urban. The great majority of the population is of European origin. The indigenous inhabitants are of three branches, the *Fuegians*, mostly nomadic, living in or near Tierra del Fuego; the *Araucans* (101,118) in the valleys or on the western slopes of the Andes; the *Changos*, who inhabit the northern coast region and work as labourers. The total number of foreigners included in the census of 1920 was 115,763, as against 134,524 in 1907.

Births, marriages, and deaths, exclusive of still-births:—

Year	Total Births	Illegitimate Births	Marriages	Deaths	Surplus of Births
1917	149,161	58,334	21,379	107,189	41,962
1918	145,871	55,832	21,614	108,667	37,204
1919	144,980	55,706	21,471	137,538	7,442
1920	146,725	55,326	24,932	115,426	31,299
1921	148,931	—	24,821	127,059	21,872

Illegitimate births in 1920 were 377, and legitimate births 623 per

thousand of the population. Immigration is small, but is encouraged by the Government.

Religion.

The Roman Catholic religion is maintained by the State, but according to the Constitution all religions are respected and protected. There is one archbishop (Santiago), three bishops, and four vicars apostolic. There were in 1920, 347 parishes in the Republic, 619 churches, and 774 chapels.

Instruction.

Education is gratuitous and at the cost of the State, and since August 26, 1920, compulsory. At the 1907 census, 40 per cent. of the population were illiterate. Professional and secondary instruction is provided in the Universities (one belonging to the State, The University of Chile, the other The Catholic University) and the National Institute of Santiago, and in the lyceums and colleges established in the capitals of provinces, and in some departments. In the State University the branches included are theology, law, and political science, medicine and pharmacy, physical and mathematical sciences, philosophy, literature, and the fine arts. In 1920, in the State University there were 4,502 matriculated students and 358 teachers. In 1920, the Catholic University had 614 students. An Industrial University was opened at Valparaiso (Universidad Industrial de Valparaiso), and another at Concepcion (University of Concepcion) in 1920. There were in 1921, 3,299 public primary schools with 377,050 pupils, and 8,847 teachers; and 429 private primary schools with 991 teachers and 54,875 pupils; 15 public normal schools with 1,926 pupils and 434 teachers; 153 public and 139 private secondary schools with 32,880 and 20,006 pupils respectively; 11 public commercial schools with 176 teachers and 2,990 pupils. There are besides agricultural schools, schools of mines, and professional schools. Other educational institutions are the Paedagogic Institute, the National Conservatory of Music, the National Observatory School of Arts and Trades, Institute for Deaf Mutes, School for the Blind, and public museums. The cost of maintaining the public primary schools in 1920 was 952,577L., that of the national normal schools, 193,582L., and that of the Government secondary schools, 437,500L. The National Library contains 286,330 volumes.

There were in 1920, 911 newspapers and journals published in Chile, including 101 dailies and 313 weeklies.

Justice, Crime, Pauperism.

There are, in addition to a High Court of Justice in the capital, seven Courts of Appeal distributed over the Republic, Tribunals of First Instance in the departmental capitals, and subordinate courts in the districts. On January 1, 1921, there were 2 central prisons with 1,202 inmates (all men), 20 penitentiaries with 1,056 (963 men and 93 women), 82 prisons, and 18 houses of correction for women with 6,641 inmates, and 3 reformatory schools, with 344 inmates (197 boys and 147 girls).

The police number 10,738 (836 officers).

Finance.

In recent years the revenue and expenditure (ordinary and extraordinary) were as follows :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£ .		£	£
1916	13,891,101	12,142,096	1919	9,380,829	13,750,581
1917	16,020,596	14,423,554	1920 ¹	20,545,054	33,264,484
1918	18,743,250	16,621,210	1921 ¹	24,096,225	27,153,937

¹ Estimates.

The following table gives the main items of the Budget for 1922 :—

Revenue			
	Gold pesos		Paper pesos
Nitrate export dues (30 million quintals) . .	46,650,000	Customs and bond . .	29,750,000
Other gold revenue . .	10,857,000	Surcharge on above . .	44,625,000
		Stamp tax	18,000,000
		Posts and telegraphs . .	12,000,000
		Tobacco tax	16,000,000
		Property tax	12,000,000
		Other revenue	50,156,115
Total	57,507,000	Total	182,531,115

Particulars as to main items of expenditure are as follows :—

Departments	Paper pesos	Gold pesos	Departments	Paper pesos	Gold pesos
Interior	72,617,099	153,299	Navy	39,647,014	5,838,753
Foreign Relations, etc.	678,563	2,352,016	Industry and Public Works	17,277,825	91,483
Justice	12,592,480	—	Railways	5,928,370	1,833
Public Instruction	78,463,114	188,386			
Treasury	29,615,859	56,684,452	Total (all items)	319,239,700	51,424,726
War	62,536,654	147,829			

On December 31, 1920, the foreign debt amounted to 378,009,760 gold pesos (28,350,732L.) and the internal debt to 95,149,690 paper pesos.

On June 30, 1921, the value of the 10,370 national properties was 377,477,427 pesos currency.

Defence.

The Chilian Army is a national militia in which all able-bodied citizens are obliged to serve. Liability extends from the 18th to the 45th year, inclusive. Recruits are called up in their 20th year, and are trained for one year. Afterwards they serve for 9 years in the reserve of the active army, after which they belong till the completion of their 45th year to the second reserve. The latter is organised as a second-line army.

Chile is divided into 4 zones or military districts, each of which furnishes a complete division on mobilisation. There are 49 battalions of infantry, 1 regiment of railway workers, 1 battalion of telegraphers, 8 regiments of cavalry, 2 batteries of horse artillery, 32 batteries of field artillery, 8 batteries of mountain artillery, 2 battalions of fortress artillery, 8 battalions of engineers and 1 company for aerial service. The total strength of the active army in 1922 was 24,100.

The infantry are armed with the Chilean Mauser rifle (1895), calibre 7 mm., and the cavalry with a carbine of similar pattern and lance. The field artillery are armed with Q. F. Krupp guns.

In December, 1918, an Air Force was formed under British instruction, with a nucleus of 14 seaplanes and 80 aeroplanes purchased in Great Britain.

Military budget for 1921 was 2,615,731*l*.

The principal vessels of the Chilean fleet are as follows :—

Name	Launched	Displacement, Tons	Extreme Armouring, Inches	Main Armament	Torpedo Tubes	Indicated Horse-Power	Nominal Speed
<i>Dreadnought</i>							
Almirante Latorre	1913	28,000	9	10 14-in. ; 14 6-in.	4	37,000	23
<i>Pre-Dreadnought.</i>

The *Almirante Latorre* served in the British Fleet during the war as the *Canada*. The *O'Higgins* has been converted into an aircraft-carrier. Four powerful destroyers built for Chile, which were taken over for the British service, have also been incorporated in the Chilean Navy. They were constructed at Cowes in 1914; 1,800 tons, 31·5 knots, 4 tubes, 2 4·7-in. and three smaller guns—two of them with 6 4-in. guns and 2 smaller. Six submarines, H1 to H6 (450–520 tons, 800 h.p., 15–18 knots, length 150 feet), were transferred from the British to the Chilean Navy in 1917. In addition, there are 7 older and smaller destroyers and 3 torpedo boats.

A British naval officer, Capt. G. N. Tomlin, is now chief of the Naval College at Valparaiso.

• Agriculture and Industry.

There are three zones in Chile—the arid zone in the north, the agricultural zone in the centre, and the forest zone in the south. Agriculture and mining are the principal occupations. Total area of agricultural land is 42,183,663 acres; of forest area, 9,495,483 acres; of fruit trees, 276,704 acres; of meadows, 18,393,252 acres. Number of farms in 1920, 95,071. Chile produces annually large quantities of cereals, besides excellent wine,

fruit, and vegetables. The principal crops of the harvest for 8 years are shown as follows :—

	Acreage			Produce in Cwts.		
	1917-18	1918-19	1919-20	1917-18	1918-19	1919-20
Wheat	1,312,327	1,235,400	1,192,722	12,584,606	11,459,500	10,840,782
Barley	98,808	110,500	127,325	1,438,624	1,596,775	1,607,448
Oats	80,054	51,000	65,190	922,176	586,600	751,802
Maize	65,905	58,635	62,662	784,472	652,500	784,546
Beans	131,846	109,000	113,875	1,386,288	982,601	919,136
Peas	25,667	36,800	28,202	291,656	234,800	228,814

¹ Tons.

² Gallons of wine.

For 1920-21 production (in quintals) was given as follows:—Wheat, 6,257,062; barley, 1,172,388; oats, 394,114.

On December 31, 1919, the live stock of Chile comprised 391,718 horses, 36,439 asses, 51,411 mules, 2,163,141 cattle, 4,500,196 sheep, 459,606 goats, 42,019 alpacas, and 292,431 pigs.

Dairy farms and the production of butter and cheese are on the increase. In Patagonia and Tierra del Fuego large tracts of country are devoted to sheep-farming. Extensive natural forests are found, the largest being found in the provinces of Valdivia (1,885,406 acres), Llanquihue (1,406,024 acres), and Chiloé (1,188,572 acres). The wealth of the country, however, consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapacá.

The metals obtained were gold, silver, copper (Chile is the world's second largest producer of copper), cobalt, and manganese; the non-metallic substances being coal, nitrate, borate, salt, sulphur, and guano. Iron-ore deposits are found in the provinces of Atacama and of Coquimbo, estimated at over 1,000,000,000 tons. All the coal mines of Chile are situated south of Valparaíso. Production in 1919, 1,485,491 tons.

Nitrate of soda, or 'salitre,' is not only Chile's most important article of export but the chief source of governmental revenue derived from export taxes. It is found in the section of the desert of Atacama, known locally as the 'pampa salitrera,' a territory comprising an area of some 500 miles in length, lying between latitude 15° and 26° south, and situated at an elevation above sea level of from 2,000 to 6,000 feet. This zone is divided into districts known as the pampas of Tarapacá, Tocopilla, Antofagasta, Aguas Blancas, and Taltal respectively. Production and exportation of nitrate in recent years are stated as follows :—

Years	Production	Exported	Years	Production	Exported
	Metric tons	Metric tons		Metric tons	Metric tons
1910	2,465,415	2,335,941	1919	1,703,240	803,961
1915	1,755,291	2,023,294	1920	2,604,571	2,870,809
1918	2,859,303	2,919,177	1921	1,311,036	1,113,566

In 1919 Chile had 2,871 manufacturing establishments, using raw materials to the value of 517,832,812 gold pesos, which were manufactured

into merchandise to the value of 905,151,651 gold pesos. The number of workmen employed was 71,464.

Commerce.

Imports and exports (including re-exports) (special trade, including bullion and specie) :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports . .	25,920,603	32,705,554	33,443,688	34,130,945	28,597,688
Exports . .	51,997,099	57,271,688	26,414,762	58,412,642	33,281,485

The following table shows in gold pesos the principal imports and exports for 1919 and 1920 (1 peso = 18*d.*) :—

—	Imports		Exports	
	1919	1920	1919	1920
	Pesos	Pesos	Pesos	Pesos
Products of mining . . .	19,791,282	29,381,030	184,100,124	656,254,458
„ „ forestry . . .	2,257,593	3,411,992	4,021,869	5,555,020

Total trade between Chile and United Kingdom for 5 years :—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Chile to U.K. . .	19,330,993	7,344,655	12,942,932	6,489,415	4,421,848
Exports to Chile from U.K. . .	6,381,624	4,779,259	9,661,998	5,120,710	5,437,117

Shipping and Navigation.

The commercial navy of Chile consisted, in 1920, of 114 steamers of 51,815 tons net and 25 sailing vessels of 9,925 tons net. The shipping entered and cleared at the ports of Chile in 1920 was as follows :—Entered, 14,666 vessels of 14,925,601 tons ; cleared, 14,792 vessels of 15,001,446 tons. Of the total entered, 1408 steamers of 4,213,564 tons, and of those that cleared, 1,380 of 4,167,538 tons, were British.

Communications.

In 1920 there were in Chile 22,046 miles of public road, and 850 miles of navigable river, and 497 miles of navigable lakes.

The Longitudinal Railway of Chile, traversing the Republic from north to south over a distance of 2,862 miles, is (1920) a government-owned line, embracing with its spurs and the Arica to La Paz Railway (271 miles) an extent of 3,133 miles. There are also 2,270 miles of privately owned lines, making a total of 5,403 miles. Electrification of the railways was commenced in 1921 on the line between Valparaiso and Santiago, a distance of 117 miles.

The 966 post-offices in 1920 dispatched 104,492,991 postal packets, of which 5,342,994 were sent abroad. These included 4,874,032 letters for abroad, 35,386,953 home letters.

The length of telegraph lines at the end of 1920 was 16,353 miles of line (9,866 miles of Government line) and 18,572 miles of wire (Government telegraphs alone). In 1920 there were 619 telegraph offices ; 12,057,380 messages were sent. The length of telephone line was 52,284 miles, and of wire 96,160 miles (1920). Number of subscribers, 24,493.

Work has progressed on the several wireless stations now under construction along this coast, which with those now completed will form a chain composed of Arica, Antofagasta, Coquimbo, Valparaiso, Talcahuano, Valdivia, Puerto Montt, and Punta Arenas. A wireless station is also being erected on the Juan Fernandez Islands, about 400 miles west and south of Valparaiso. Total number of stations in 1919, 32.

Money and Credit.

In 1912 a law was promulgated establishing a Bank of Issue (Caja de Emision). By means of this the banks can issue certain quantities of paper money in exchange for an equivalent gold deposit, at the rate of 12*d.* per peso at first and 18*d.* per peso subsequently.

There are a number of joint-stock banks of issue with agencies in Chile. Their joint capital amounted on December 31, 1920, to 296,388,784 paper pesos and 2,451,022 gold pesos, and their reserve funds to 116,294,381 paper pesos and 20,589,105 gold pesos. The largest of the banks is the Bank of Chile with a paid-up capital of 60,000,000 pesos. The banks are required to guarantee their note issue by depositing gold, Government notes, or securities in the Treasury. There are also land banks which issue scrip payable to bearer and bearing interest, and lend money secured as a first charge on landed property and repayable at fixed periods. Two institutions specialise in savings accounts, the National Savings Bank of Chile, and the Savings Bank of Santiago. At the National Savings Bank of Chile (Caja Nacional de Ahorros) the number of deposit accounts on December 31, 1920, was 678,534 and the deposits amounted to 146,622,862 pesos. At the Savings Bank of Santiago there were 307,158 deposit accounts, and the deposits amounted to 56,476,636 pesos.

The currency is mostly paper; the time fixed for the conversion of legal tender paper money was deferred till December 31, 1921. On December 31, 1920, the conversion funds in hand amounted to 114,110,600 gold pesos, made up as follows:—In England, 23,991,881 pesos, and Chilean gold in bars to the value of 90,118,719 pesos.

Money, Weights, and Measures.

According to the Act of 1895, the coinage of Chile is as follows:—Gold coins are 20, 10, 5 peso pieces, called respectively *Condor*, *Doblon*, and *Escudo*. The 10-peso gold piece weighs 5·99103 grammes ·916 fine and therefore contains 5·49178 grammes of fine gold. Silver coins are the *peso*, weighing 9 grammes, 0·720 fine, and the fifth, tenth, and twentieth of a peso. Bronze coins (95 of copper to 4 of tin and 1 of zinc) are the *centavo* and 2½-, 2-, and ½-centavo pieces. The monetary unit is the twentieth part of a condor or the (uncoined) gold peso, of the value of 1*s.* 6*d.* Its use is obligatory in transactions with the Customs Department of the Government; it serves, too, as the basis of perhaps the larger half of the trade in imported merchandise, though the actual gold coin is not in these cases usually tendered. Coins minted in 1913:—2,656,280 pesos gold. (No later mintage.) A forced paper currency is in general use, the paper peso varying considerably in relative value, and representing (1920) about 12·067*d.* Total paper money issued and in circulation on September 30, 1922, 265,700,594 pesos.

The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent.

On August 31, 1918, Greenwich time was adopted in Chile in place of Chilean time.

Diplomatic and Consular Representatives.

1. OF CHILE IN GREAT BRITAIN.

Envoy and Minister.—Agustin Edwards (February 21, 1911).

Counsellor.—Ricardo Schoenmeyr.

First Secretaries.—Manuel Salinas and S. de Ossa.

Second Secretary.—Luis Renard.

Financial Adviser.—Luis Waddington.

Juridical Adviser.—Alejandro Alvarez.

Naval Attaché.—Commander Edgardo von Schroeders.

Military Attaché.—Major Juan Negrete.

Attachés.—Julio Bittencourt, Augustin R. Edwards, and Santiago Monk.

Commercial Attaché.—Jorge Buchanan.

Consul-General in London.—Adolfo Ortuzar.

There are Consular representatives at Belfast, Cardiff, Dublin, Edinburgh, Glasgow, Hull, Liverpool (C.G.), Nottingham, Queenstown, Sheffield, Southampton and many other places.

2. OF GREAT BRITAIN IN CHILE.

Envoy and Minister.—Arthur Cunningham Grant-Duff (1923).

Secretary.—C. H. Bateman.

Naval Attaché.—Captain F. L. Tottenham, C.B.E., R.N.

British Consul-General at Valparaiso.—J. M. MacLeod, C.M.G.

There are Consular representatives at Coquimbo, Antofagasta (C.), Arica (V.C.), Caldera, Coronel, Iquique (C.), Lota, Junin (V.C.), Pisagua (V.C.), Punta Arenas (V.C.), Talcahuano (V.C.), Tocopilla, Tomé and other centres.

CHINA.

(CHUNG-HUA MIN-KUO, *i. e.* REPUBLIC OF CHINA.)

Government.

ON February 12, 1912, China, one of the oldest of Monarchies, became a Republic.

The Chinese Imperial family was of Manchu origin, dating from 1644, and was styled *Ta Ch'ing Ch'ao* ('Great Pure Dynasty'). The last Emperor, P'u-yi, was the tenth of the line; but the official genealogy is carried back six generations earlier than the real founder, and P'u-yi's will be the sixteenth name in the canonised series of *Ta Ch'ing* Emperors. He was born on February 11, 1906, succeeded his uncle the Emperor Kuang-Hsü on November 14, 1908, and abdicated on February 12, 1912. He retains the title of Emperor of the Manchu Imperial House, but with his death the title and the Government subsidy of the House will cease. For account of the Revolution of 1911, see *STATESMAN'S YEAR-BOOK* for 1912, pp. 699-701, and for later developments, see *STATESMAN'S YEAR-BOOK* for 1919, pp. 740-41.

The Government, according to the Provisional Constitution of Nanking, 1911, is composed of a President, a Vice-President, and a bi-cameral legislature consisting of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members.

During the period June 16, 1917 to August 1, 1922, there was no Parliament in the legal sense of the word. Under pressure from the northern militarists, the legal assembly was dissolved by President Li Yuan-hung on June 16, 1917, who one month later himself abdicated on the seizure of the government by Chang Hsun's monarchical forces. A new Parliament was brought into being, called the "Tuchuns'" Parliament, and this elected Hsu Shih-ch'ang President on August 10, 1918. Pseudo-Parliamentary government gradually lapsed, and, until the resuscitation of the original Parliament on August 1, 1922, the country was controlled by

provincial military governors (*Tuchuns*) sitting in Peking, with puppet cabinets which were subject to the influence of the leading *Super-Tuchun* of the moment.

President.—Li Yuan-hung, born in Hupeh, October 19, 1864, elected Vice-President October 6, 1913; became President on the death of Yuan Shih-kai June 7, 1916, remained in office till June 1917; resigned on account of restoration of Monarchy. Resumed Presidency on June 11, 1922, upon the request of the old Parliamentarians.

The office of Vice-President is still vacant (since August 1917).

Executive authority is provisionally vested in a Premier nominated by the President and a Cabinet of nine Ministers nominated by the Premier. All appointments require the sanction of both Houses of Parliament. But since the overthrow of the An-fu (Anwher-Fukien) party, which held the reins of power from August 1918 to August 1920, Parliamentary government has lapsed owing to the failure of the elections. A Presidential Mandate is now tacitly recognised as an act of ratification—witness the Sino-German Commercial Treaty, concluded on May 20, 1921.

The Cabinet, appointed on January 4, 1923, is composed as follows:—

Premier.—Chang Shao-Tseng.

Minister of the Interior.—Kao Ling-Yu.

Minister of Foreign Affairs.—Huang Fu.

Minister of Agriculture and Commerce.—Li Ken-Yuan.

Minister of Education.—Peng Yun-Yi.

Minister of Communications.—Wu Yu-Ling.

Minister of War.—Chang Shao-Tseng.

Minister of the Navy.—Li Ting-Hsin.

Minister of Justice.—Chiun Koh.

Minister of Finance.—Liu En-Yuan.

A number of Foreign Advisers have been appointed to the Government. There are also many foreigners in the Government employ in the various departments.

The so-called Southern Government which was established at Canton by the remnant of the original Republican Parliament dissolved in June, 1917, by President Li Yuan-hung, and which elected Dr. Sun Yat-Sen as President on April 7, 1921, was overthrown in June, 1922, by forces controlled by General Chen Chiung Ming, and Dr. Sun was compelled to flee from Canton on a British gunboat on June 16, 1922.

The Republic has adopted a new flag on which the old yellow dragon has been replaced by five stripes—crimson, yellow, blue, white and black—to denote the five races comprised in the Chinese people, Chinese, Manchu, Mongol, Turki (Mohammedan natives of Chinese Turkestan), and Tibetan.

LOCAL GOVERNMENT.

Under the monarchy each of the 22 provinces was ruled by a Viceroy placed over one, two, or three provinces, or by a Governor over a single province, either under a Viceroy or depending directly on the Central Government. There were thus 9 Viceroys and 3 Governors equal in rank to Viceroys. Each province was subdivided into prefectures ruled by prefects and each prefecture into districts, each with a district magistrate. Two or more prefectures were united into a tao, or circuit, the official at the head of which being called a Taotai. 'Each town and village had also its unofficial governing body of 'gentry.' An Edict of July 22, 1908, instituted Provincial Assemblies, and the first meetings were held on

October 14, 1909. The reforms of the late dynasty also instituted representative legislative assemblies in districts, towns and villages.

At present many of the provinces under the rule of their military governors or *tuchuns* are acting independently of the Central Government.

Area and Population.

The following table gives a statement of the area and population of the Chinese Republic according to figures published in the Government Gazette, February 27, 1911. In 1912, Mr. W. W. Rockhill, formerly American Minister at Peking—a recognised authority—after careful inquiry, came to the conclusion that “this document, though showing complete ignorance of the methods now nearly universally followed in vital statistical reports, throws considerable light on the question of China's population, and seems entitled to more confidence than the enumerations which have heretofore appeared.” He believed that the population of China, Manchuria and Chinese Turkestan, *i.e.*, the Chinese Republic exclusive of Tibet and Mongolia, appeared to be in round numbers 325,000,000, new information having confirmed the opinion reached by him in former studies of the same subject that the population of China “is much smaller than we have been led to believe, and that in the last century it has been increasing very slowly if at all.”

The 18 Provinces of China Proper	Area: English square miles	Population (Estimated)	Capital
Chihli	115,800	22,970,000	Tientsin
Shantung	55,970	25,810,000	Tsi-nan
Shansi	81,830	9,420,000	T'ai-yuan
Honan	67,940	22,375,000	K'ai-feng
Kiangsu	38,600	15,380,000	Nanking
Anhui	54,810	14,075,000	Anking
Kiangsi	69,480	16,255,000	Nanch'ang
Chek'iang	36,670	13,950,000	Hangchow
Fukien	46,320	8,560,000	Foochow
Hupeh	71,410	21,260,000	Wuchang
Hunan	83,380	20,580,000	Ch'angsha
Shensi	75,270	6,725,000	Sian
Kansu	125,450	3,810,000	Lanchow
Szechwan	218,480	54,500,000	Ch'engtu
Kwangtung	99,970	23,700,000	Canton
Kwangsi	77,200	5,425,000	Nan-ning
Kweichow	67,160	3,265,000	Kuei-yang
Yunnan	146,680	8,053,000	Yunnan
Total	1,532,420	302,113,000	
New Dominion:—			
Sinkiang	550,340	2,000,000	Ili
Dependencies:—			
Manchuria	363,610	—	—
Fengt'ien	—	5,830,000	Mukden
Kirin	—	5,350,000	Kirin
Heilungkiang	—	1,560,000	Tsitsihar
		12,740,000	Heilung(Hsien)
Mongolia	1,367,600	1,800,000	Urga ¹
Tibet	463,200	2,000,000	Lhasa ²
Grand Total	4,277,170	318,653,000	

¹ The seat of the Bogdo Khan.

² The seat of the Dalai Lama.

Estimates prepared by the Chinese Maritime Customs in 1921 give the much larger total of 443,382,000, with 19,290,000 for Manchuria. In 1919 the Chinese Post Office estimated the total population of China and the Outer Territories at 427,679,214, and in 1921 the figure was given at 436,094,953. The latter record, which is the work of provincial officials, is given hereunder for purposes of comparison :

Peking (Metropolitan area)	4,014,619	Kiangsi	24,466,800
Chihli	30,172,082	Kiangnan	28,235,864
Shansi	11,114,951	Shanghai	5,550,200
Honan	30,831,909	Anhui	19,832,665
Shensi	9,465,558	Chekiang	22,043,300
Kasul	5,927,997	Fukien	13,157,791
Sinkiang	2,519,579	Kwangtung	37,167,701
Manchuria	22,083,434	Kwangsi	12,258,335
Shantung	30,803,245	Yunnan	9,839,180
Szechwan	49,782,810	Kweichow	11,216,400
Hupeh	27,167,244		
Hunan	28,443,279	Total	436,094,953

Not included in the above (no data available):—(1) One Hsien and Mongolia in Peking district; (2) one Hsien in Manchuria district; and (3) Tibet.

The Island of Formosa was ceded to Japan in accordance with the terms of the Treaty of Shimonoseki ratified and exchanged at Chefoo on the 8th of May, 1895. The formal transfer of the Island was effected on the 2nd of June, 1895.

Tsingtao, in Kiaochow Bay in Shantung, first seized by Germany in 1898 and subsequently captured by the Japanese in 1914, was returned to China in November 1922, in accordance with the Washington Pact (for a history of the question, see THE STATESMAN'S YEAR-BOOK for 1922, pp. 761-2).

By agreement with the Chinese Government, dated March 27, 1898, Russia took possession of Port Arthur and Talienwan (called Dalny by Russia and Dairen by Japan) and their adjacent territories and waters, on lease for the term of 25 years, with option of extension by mutual agreement. In 1900, in consequence of the 'Boxer' uprising, Russia occupied Manchuria. Japan, after long and unsuccessful efforts to induce Russia to withdraw, broke off diplomatic relations, and on February 8, 1904, commenced hostilities. The war, in the course of which Japan proved victorious both on land and at sea, was brought to an end by the Treaty of Portsmouth signed September 5, 1905. Under this Treaty Russia and Japan agreed to evacuate Manchuria, except the territory affected by the lease of Kwantung (or the Liao-tung Peninsula), where Japan succeeds to the leasehold and other rights of Russia. The exclusive administration of Manchuria (with the exception mentioned) was to be restored to China. By treaty of December 22, 1905, China agreed to the transfer to Japan from Russia of the lease of the Liao-tung Peninsula and the control of the railway from Port Arthur to Ch'ang-chun (Kwan-ch'engtzu), and conceded to Japan the right to construct a railway from Antung to Mukden, and agreed to open 16 Manchurian ports and cities to foreign commerce. For the Japanese demands on China, made on January 18, 1915, see THE STATESMAN'S YEAR-BOOK for 1920, p. 738. At the Washington Conference China brought up in Committee, for review and revision, the Sino-Japanese Treaties of 1915, treaties resulting from the Twenty-one Demands. Japan refused to admit the validity of China's claim but made some concessions in a statement read before the committee and later read into the records of the Conference. Japan was ready to abandon her preferential rights in the supply of advisers and instructors to be employed by China in Manchuria, and to open, for the activity of the International Consortium, rights of

railroad construction in Manchuria and Eastern Inner Mongolia. While taking note of Japan's concessions, China was not satisfied and made the express reservation that she would seek a later opportunity to open the question thus shelved.

In July, 1910, a convention was signed between Russia and Japan agreeing to co-operate to maintain the 'status quo' in Manchuria in accordance with the treaties and conventions already made. For such period as Russia should hold Port Arthur, Great Britain was, by agreement with China, April 2, 1898, to hold Wei-Hai-Wei in the province of Shantung. For defensive purposes Great Britain on June 9, 1898, obtained a 99 years' lease of territory on the mainland opposite the island of Hong Kong.

The Chinese Government granted to the French in April, 1898, a 99 years' lease of the Bay of Kwang-Chou-Wan, on the coast of the peninsula, between Hong Kong and the Island of Hainan, and in November, 1899, the possession of the two islands commanding the entrance of the bay. This territory has been placed under the authority of the Governor-General of French Indo-China.

In one of the plenary sessions of the Washington Conference (November 1921 to February 1922) the offer to return Wei-Hai-Wei to China, on similar conditions as those accompanying the return of Shantung, was made by Great Britain and accepted by China. France gave a similar promise with regard to the restitution of Kwang-Chou-Wan. Negotiations necessary to the execution of the British offer were begun on October 2, 1922.

Peking, the capital of China, has a population of 924,331, including about four thousand foreigners. According to the Census of the Metropolitan Police Administration, taken in October, 1921, the population of Peking and its suburbs is close on 1,300,000. The population of the principal Chinese ports is given as follows for 1921 by the Chinese Maritime Customs:—Aigun, 27,200; Sansing, 40,000; Manchouli, 11,300; Harbin, 155,700; Suifenho, 7,400; Hunchun, 4,700; Lungchingtsun, 2,300; Antung, 84,000; Tatungkow, 4,900; Dairen, 116,200; Newchwang, 65,600; Chinwangtao, 5,000; Tientsin, 800,000; Lungkow, 5,400; Chefoo, 54,500; Tsingtao, 44,800; Chungking, 497,400; Wanhhsien, 80,000; Changsha, 535,800; Yochow, 4,500; Ichang, 55,000; Shasi, 161,300; Hankow, 1,468,000; Kiukiang, 53,400; Wuhu, 126,900; Naunking, 380,200; Chinkiang, 101,600; Shanghai, 1,500,000; Soochow, 500,000; Hangchow, 892,100; Ningpo, 270,800; Wenchow, 193,300; Santuao, 8,000; Foochow, 320,200; Amoy, 300,000; Swatow, 85,000; Canton, 900,000; Kongmoon, 70,000; Samshui, 7,000; Kiungchow, 59,000; Pakhoi, 25,000; Wuchow, 50,000; Nanning, 67,000; Lungchow, 10,000; Mengtsz, 10,000; Szemao, 10,200; Tengyueh, 13,000. Figures for Dairen (1920, 238,867) and Tsingtau (1921, 308,738) are obtained from the Japanese Census.

According to the estimate of the Customs authorities, in 1921 the total number of foreigners resident in China was 240,769, made up as follows:—

American	8,230	French	2,453	Portuguese	3,493
Austrian	40	German	1,255	Russian	68,250
Belgian	505	Hungarian	8	Spanish	286
Brazilian	42	Italian	587	Swedish	431
British	9,298	Japanese	144,431	Non-Treaty Powers	193
Danish	547	Mexican	1		
Dutch	486	Norwegian	227	Total	240,769

There are now 20 Treaty Powers in China, as follows: Russia (1689), Great Britain (1842), United States (1844), France (1844), Belgium (1845), Sweden (1847), Portugal (1862), Denmark (1863), Netherlands (1863), Spain (1864), Italy (1866), Japan (1871), Peru (1874), Brazil (1881), Mexico

(1899), Chile (1915), Switzerland (1918). Bolivia (1920), Persia (1920), and Germany (1921). Austria-Hungary (1869) was also included before the war. Of these powers, Germany, Bolivia, and Persia have renounced the privilege of consular jurisdiction in their treaties. The Russian Soviet government also waived the claim in a declaration dated March 26, 1920.

At the Washington Conference the nine participating powers (the United States of America, Belgium, the British Empire, China, France, Italy, Japan, the Netherlands and Portugal) adopted "a policy designed to stabilise conditions in the Far East, to safeguard the rights and interests of China, and to promote intercourse between China and the other powers upon the basis of equality of opportunity." The so-called nine-power treaty was signed to give effect to the above principles. This treaty, together with its annexes, supplementary notes and other auxiliary instruments, provided for the following main points:

(1) The powers undertake to subscribe to a mutually self-denying covenant regarding the acquisition of special rights in China which would tend towards creating spheres of influence, and China herself declared that she would not alienate any part of her territory to any foreign power; (2) No discrimination in the railroad service, either in passenger or freight traffic, was to be allowed in China, either by China herself or by foreign governments or individuals operating railroads in China. Any such discrimination and any other commercial practice inimical to the principles of the Open Door should be referred to the Board of Reference for investigation and report, the constitution of said Board to be decided upon by the "Special Conference" on Chinese Customs Tariff referred to below; and (3) All treaties and agreements between China and the other powers and all contracts and agreements between China and private individuals and corporations of foreign countries were to be registered and made public.

Religion.

Three religions are acknowledged by the Chinese as indigenous and adopted, viz. Confucianism, Buddhism, and Taoism.

With the exception of the practice of ancestral worship, which is everywhere observed throughout the Republic, and was fully commended by Confucius, Confucianism has little outward ceremonial. A proposal to make Confucianism the State religion of China was negatived in both 1912 and 1917 by the Constitutional Committee, who, however, agreed that Confucianism shall be the basis of the Ethical teaching in National Education.

Buddhism and Taoism present a very gorgeous and elaborate ritual in China, Taoism — originally a pure philosophy—having abjectly copied Buddhist ceremonial on the arrival of Buddhism 1,800 years ago. Most Chinese (not Mahometans or Christians) profess and practise all three religions. The bulk of the people, however, are Buddhist.

Mohammedans are found in every province of China, being most numerous in Kansu, Sinkiang, Shansi, Shensi, Chihli, and Yunnan. From evidence collected in 1909 Mr. M. Broomhall estimated that the Moslem population of China numbers between 5,000,000 and 10,000,000.

Roman Catholicism has had a footing in China for more than three centuries. At the end of 1920 it numbered 52 Bishops (China proper 44, Manchuria 3, Mongolia 4, Tibet 1), 1,365 European priests, 963 Chinese priests, and 1,994,483 native Christians.

Protestant Missions date from 1807. In 1920 they were served by officials numbering 6,636, including 464 missionaries (116 being women)

and 462 Chinese physicians (55 women), 1,270 ordained ministers, and 206 foreign nurses. Native Christians numbered 618,601 (345,854 communicants). Attached to Protestant Missions in 1920 were 27 colleges of university standing, 256 middle schools, and 581 higher elementary schools. Under Christian instruction were 189,794 pupils. Foreign Protestant Medical Missions were at 333 hospitals and 241 dispensaries attended during the year by 142,294 in-patients.

The Russian Orthodox Mission dates from 1685. In 1920 the Mission, which is under a Bishop resident in Peking, consisted of a monastery, a hermitage, a nunnery, 5 convents, and 32 churches, and numbered 5,700 baptised Chinese adherents and 20,000 Russians.

Most of the aboriginal hill-tribes are still nature-worshippers, and ethnically are distinct from the prevailing Mongoloid population. There is also a colony of Chinese Jews in K'ai-feng, capital of Honan.

Instruction.

For many centuries education of a purely Chinese type was general, and led through an intricate system of public examinations to all classes of employment under the State. It was completely swept away by a Decree of September 3, 1905, abolishing the historic system of examinations.

Since 1905 an enormous impetus has been given to the new educational movement, schools for the teaching of 'western learning' springing up in every town throughout large portions of the Republic.

According to the statistics of the first educational survey of the whole country, published in 1907, the total number of schools and colleges was estimated at slightly over 37,000, and of students, 1,013,000. As soon as the Republic was established, the educational movement received fresh impetus. The Ministry of Education was reorganised, and three new departments were created for the purpose of directing Universal Technical and Social Education. The first of these departments includes normal schools for the training of teachers, middle schools, primary schools, and industrial schools; the second includes universities, technical schools, and the enrolment of students to study in foreign countries; the third includes public libraries, museums and popular lecture halls, for the special benefit of those who are either illiterate or unable to attend ordinary schools.

Normal schools are divided into ordinary normal and higher normal schools. The latter are established and maintained by the Central Government. At present they number six, and are situated in Peking, Wuchang, Nanking, Canton, Ch'engtu, and Mukden. In Peking there is also a Girls' High Normal School. Ordinary schools are established by provincial authorities, and number over 180.

There are two kinds of primary schools: the higher and the lower. The former are established by district governments, and are intended as intermediaries between the lower primary schools and the middle schools. The total for the whole country is over 7,000 for boys and 600 for girls. The latter—also called Citizen Schools—are established by local government boards, although in recent years a good number have been founded with private funds. The total number is 110,000 for boys, and 3,000 for girls. The aggregate number of primary schools is over 120,000.

There are two grades of industrial schools; one receives pupils from the higher primary schools, and the other those who complete their course in the lower schools. There were altogether 413 schools of this kind in 1918.

At present there are three Government Universities, namely, the National

University at Peking, the Peiyang University at Tientsin, and the Shansi University at Taiyuanfu. In addition to the above there are also four Universities supported by private funds, namely, the Chung Kuo, Ming Kuo, and Ch'ao Yang Universities in Peking, and the Chung Hua University in Wuchang. The Amoy University and the South-Eastern and South-Western Universities are among those that are being established with private funds.

A number of technical colleges have been established. One law college has been established by each Provincial Government, and in addition there are 6 agricultural schools, 6 engineering schools, 4 schools of medicine, and 3 colleges of languages. The number of students at all technical schools and colleges in 1918 was 32,273 at 531 institutions.

At present there are in the whole country 185 libraries, 286 popular libraries, 1,890 popular lecture halls, and 733 travelling lecture groups.

At the 1920 Conference of the Provincial Education Associations, co-education was recommended, but the Ministry only approved of its adoption in primary schools, technical colleges, and Universities.

The Chiaotung (Communications) University, under the aegis of the Ministry of Communications, was opened on July 21, 1921.

The National University of Peking was established in 1898, and completely reorganised in 1917 under the Chancellorship of Tsai Yuan-pei, an eminent Chinese educationist and scholar. In February, 1920, five women students were admitted for the first time. There are now 250 professors and teachers, and about 3,000 students.

The Peking Union Medical College was founded early in 1906 for the training of Chinese medical students. On July 1, 1915, the China Medical Board of the Rockefeller Foundation assumed the full support of the Union Medical College. The period from 1915 to 1921 was one of reconstruction. The period witnessed the opening of the Pre-Medical School in 1917, of the Medical School in 1919, and of the Training School for Nurses in 1920. The entire new plant, including the new hospital, was occupied by September 1921.

There are numerous Protestant and Catholic mission schools, colleges and universities at Shanghai and other ports, where the English and French languages and lower branches of Western science are taught.

The engagement of America to return to China the surplus of her indemnity of 1900, amounting to 1,756,900/, produced an undertaking from China to spend this amount in preparing and sending students to the United States to receive their education. A special institution, Tsing Hua College, has been established near Peking to train students for this purpose. A modern university for Chinese with British professors has been successfully established in Hongkong, and attracts students from many parts of China. In Japan, on January 1, 1920, there were 1,241 Chinese students receiving support from the Chinese Government, 168 in Europe, and 175 in the United States. Of other Chinese students there are 190 in the United Kingdom and 1,600 in the United States.

The development of modern education in China is indicated by the following figures:—

	Schools	Scholars
1913-14 . . .	109,448	3,643,206
1914-15 . . .	122,286	4,075,338
1915-16 . . .	129,739	4,294,251
1918-19 ¹ . . .	134,000	4,500,000

¹ Latest available figures.

Chinese education received a remarkable fillip by the invention of a phonetic script system, which was adopted by the Conference for the Standardization of Pronunciation held in 1913, and which has since received official recognition. It is now being taught in the Primary and Higher Primary Schools.

Altogether there are over 1,000 daily, weekly, or monthly journals in China. Since 1917 intellectual China has been swept by a new "Literary Revolution," and periodicals and much literature are now being published in the simpler spoken language in preference to the erudite, classical medium.

Foreign residents in China are served by a number of papers in English, published in Peking, Tientsin, Shanghai and Hankow. There are three French and several Japanese daily papers and also a number of Chinese papers which are subsidised by, and express the opinions of, other nationalities. Peking has three English daily papers and one French. Two of the English papers are controlled by Chinese and the other is edited in the Japanese interest.

Justice.

Under the old system justice was badly administered. All Treaty Powers therefore claimed the right of extra-territorial jurisdiction over their own nationals in China. Most of the Treaty Powers still retain this right, and will only relinquish it "when they are satisfied that the state of the Chinese laws, their method of administration, and other considerations warrant them in so doing." At the Washington Conference China asked for the abandonment by the powers of their extra-territorial rights in China immediately or "as soon as circumstances will permit." A resolution was passed wherein the powers endorsed her demand "in principle" and agreed to send a Commission of Jurists to investigate into the status of legal reform, the general practice of extra-territoriality as found in China, and the necessary steps for its modification or gradual removal. The Commission of Jurists was to be organised three months after the coming into effect of the so-called nine-power treaty, to complete its work and report to the respective governments within a year of the Commission's organisation.

A provisional Criminal Code was drawn up in the closing year of the Tsing dynasty, and proclaimed on March 10, 1912, the first year of the Republic. The code was framed after the Continental system, and adopts the most modern legislation in regard to conditional release and postponement of punishments. There are special provisions for the treatment of youthful offenders and insane persons. As regards the power of inflicting penalties, the arbitrary use of power by the court is guarded against by fixing a maximum and minimum, and sentence for each case. A second draft of this code, which awaits the formal sanction of Parliament, was completed in 1919. Texts in both English and French have also been published. Altogether, three codes have been drawn up and revised—the Code of Civil Procedure, the Commercial Code, and the Code of Criminal Procedure. The Civil Code and the Commercial Code are in process of revision, and therefore in these respects the decisions of the Courts derive their sources from the Unwritten Law (custom and precedents), the Written Law (the rudimentary and fragmentary Civil law in the old Manchu code) and special laws enforced since the establishment of the Republic, such as the Mining Ordinance, the Copyright Ordinance, the Commercial Association Ordinance, the Traders' Ordinance, and various laws relating to

properties), and the legal principles of other countries. The work of drawing up and revising the new Codes is undertaken by the Law Codification and Compilation Commission.

There are at present 44 high courts and procuratorates, 46 branch high courts and procuratorates, and 102 district courts and procuratorates, with the Supreme Court and the Procuratorate-General at the head of all. The Supreme Court of China may be likened to the House of Lords or the Judicial Committee of the Privy Council of Great Britain. As its name implies, it is the highest tribunal in the land. It was reorganised in 1912 into two divisions—Criminal and Civil—since increased to six, four Civil divisions and two Criminal divisions. In each division there is a presiding Judge with four other judges. Between 2,000 and 3,000 cases are handled every year, and Case Law is being rapidly evolved.

Great Britain and the United States have special courts in China, the one, His Majesty's Supreme Court for China at Shanghai (established 1865), and the other, the United States Court for China (established 1906).

The first trial by jury in the annals of China took place on March 23, 1912.

Progress in the matter of prisons has likewise been rapid. There are 48 modern prisons, the administration of which follows the lines adopted in all foreign prisons. Fifteen of these are "model" prisons.

At the Washington Conference, the powers agreed to the appointment of a Commission to inquire into the problem of Extra-territoriality in China. This Commission was to meet three months after the termination of the Conference, but on the request of the Chinese Government, the meeting was postponed till some time in 1923.

Finance.

The following budget statements represent official estimates :

Year	Revenue	Expenditure	Deficit
	Kuping Taels	Kuping Taels	Kuping Taels
1912	297,000,000	576,520,000	279,520,000
	Dollars	Dollars	Dollars
1913	333,948,482	642,237,076	308,288,594
1916	472,838,584	472,838,584	—
1919	490,419,786	495,762,888	5,343,102

There was no budget in 1920 or 1921.

The collection of the revenue on the Chinese foreign trade and the administration of the lights on the coast of China are under the management of the Chinese Maritime Customs, an institution, founded by Sir Robert Hart, which has a large staff of Foreign and Chinese subordinates, the various nationalities of the Foreign employees bearing approximate relation in number to the amount of trade of their respective countries. By agreement, dated February 13, 1898, China undertook that the post of Inspector-General must be held by a British subject so long as British Foreign Trade predominates. By Decree of May 9, 1906, the customs service, hitherto supervised by the Board of Foreign Affairs, was placed under the control of two Chinese high officials, forming a new department known as the *Shui Wu Ch'u*, or Revenue Council. Since November, 1901, the Native Customs at the Treaty Ports, hypothecated for the service of the Boxer indemnity, have been under the Maritime Customs.

All Customs Revenue is paid into Foreign Banks designated for the

purpose by the Bankers' Commission, who allot therefrom the payments for the service of Foreign loans secured on the Customs Revenue and the Boxer Indemnity, which is also secured on the Customs.

Following China's declaration of war against the Central European Powers, the Treaty States agreed to a revision of the tariff in order to bring it up to an effective five per cent. *ad valorem*. A commission was appointed by the Chinese Government to meet with representatives of the Treaty States in Shanghai to agree to and fix Customs import duties. A decision was reached in the autumn of 1918, under which duties were fixed at specific rates calculated on a basis of five per cent. of prices ruling during the period from 1912 to 1916 inclusive. In addition, the Entente Powers, with the exception of Russia, which suspended payment only on one-third of her shares, agreed to postpone payment of "Boxer indemnities" for five years, dating from Dec. 1, 1917. A new tariff treaty was signed by China and the other participating powers in the Washington Conference, providing for the immediate revision of the Chinese import tariff schedule so as to make the 5 per cent. import duty effective (that is, to make the specific duty in the schedule correspond to 5 per cent. of the current prices of imports). Periodic revision of the schedule thus revised was also provided for. In the same treaty the powers authorised the calling of a "Special Conference" on the Chinese tariff, to meet at Shanghai three months after the coming into effect of the treaty. This Special Conference was authorised to levy a surtax of two and one-half per cent. on imports, and an additional surtax of another two and one-half per cent. on certain articles of luxury, thus making the total import duty of ordinary merchandise seven and one-half per cent. and of certain articles of luxury ten per cent. Prior to the abolition of Likin the old transit due of two and one-half per cent. was to be retained. The reduction of import duty in favour of goods coming into China overland was abolished, and a uniform customs rate applied to both land and maritime trade. The questions of the Likin and of ultimate tariff autonomy for China were also to be taken up by the Special Conference.

On November 22 1912, an Audit Bureau was established, charged with auditing the expenditures and revenues of the Central and Provincial Governments. The Maritime Customs and the Salt Gabelle are the only two sources of revenue for which exact figures are so far available. By the terms of the Re-organisation Loan Agreement of 1913, the Chinese Government agreed to take immediate steps for the re-organisation, with the assistance of foreigners, of the system of collection of the salt revenues. A Central Salt Administration was established in Peking under the control of the Minister of Finance, with a Chief Inspectorate under a Chinese Chief Inspector and a foreign Associate Chief Inspector, who exercise the chief authority for the superintendence of the issue of licence and the compilation of reports and returns of revenue.

The Salt Revenue for three years was:—1920, 79,064,103 dollars; 1921, 77,987,838 dollars; and 1922, 85,789,000 dollars.

The customs receipts for 4 years were (in Haikwan taels):—

Year	Foreign Trade	Home Trade	Total	Total	Exchange
	Taels	Taels	Taels	£	Pence
1918	29,599,509	6,745,536	36,345,045	9,606,828	63½
1919	38,262,983	7,746,177	46,009,160	14,569,567	76
1920	42,368,101	7,451,784	49,819,885	16,800,000	81½
1921	49,163,291	9,848,888	59,007,129 ¹	11,663,128	47½

¹ Includes famine relief surtax amounting to 4,544,485 Haikwan taels.

In the Budget for 1918-19 the whole public debt is estimated at 1,886,641,457 dollars, of which 1,644,931,600 dollars is foreign indebtedness. The foreign debt on January 1, 1920, amounted to 657,627,083 dollars and short term internal debts to 208,138,235 dollars. The domestic loans were consolidated in 1921.

Defence.

ARMY.

The task of creating an army on modern lines was undertaken during the Sino-Japanese War in 1894, when Judge Hu Yün-mei, a provincial treasurer, was instructed to raise a combatant force. This force was taken over and renamed the New Imperial Army in 1895 by Yuan Shih-kai, who came from Korea, where he was Chinese Resident, to act as Director-General of the force. There were 8,000 men—infantry, cavalry, artillery, and pioneers—in this army in the early days of its existence, and they were trained under German instructors at Hsiaoohan, which lies between Tientsin and Taku, and which was the old camping-place of the troops that Li Hung-chang brought up in the '60's after fighting the Taiping rebels. The new army was concentrated at Hsiaoohan till 1899, when Yuan Shih-kai was made Governor of Shantung. He took the troops with him to his new province and they remained there till their Director-General was made Viceroy of Chihli in 1902. By 1904 the force had grown to 6 divisions of 12,000 men each, with headquarters at Paotingfu.

Added to the regular divisions of the army list are numerous bodies of irregulars, and these are directly controlled by independent *Tuchuns* and commanders, who, however, look to the Government for the payment of their forces. At present there are between 1,400,000 and 1,800,000 men under arms. Larger estimates fail to take into account the number of "paper troops" in China. *Tuchuns* over-estimate their armies in order to extort money out of the Government ostensibly to pay them, but more often to augment the private wealth of the commanders.

There is no conscription in China, though the system was adopted, without, however, being carried into effect.

Various schemes of disbandment and disarmament have been brought up from time to time, but they have all fallen to the ground because of the dissension in the provinces and the lack of money to pay off the surplus troops. The nearest approach to a national army might be said to be the troops under the command of General Wu Pei-fu. General Wu is commander of the Chihli forces, and he is endeavouring to lay a new foundation of a national army. His troops are trained in the modern practice of war. In the course of 1922 General Wu's forces gained considerable military successes and now control a great part of Northern China.

The great obstacle in the centralisation of the military system is the continuance of civil war in many of the provinces, which retards the development of a modern national army.

Military aeronautics commenced in China with the opening of a school at Nanyuan (near Peking) in 1913, the employment of French instructors and the purchase of a fleet of machines of the Caudron type. Much development was promised, but recent civil wars—when powerful *Tuchuns* appropriated several machines—nipped progress on national lines in the bud.

NAVY.

The largest vessel is the protected cruiser *Hai Chi*, of 4,300 tons displacement and 24 knots, carrying a main armament of 2.8-in. guns, 10 4.7-in. guns

and 5 above-water torpedo tubes. There are also three 3,000-ton cruisers, *Hai Yung*, *Hai Shew*, and *Hai Chen*, each of 19·5 knots speed, carrying armaments of 3 6-in. and 8 4·1-in. guns, together with 3 torpedo tubes. All the above vessels were acquired during the years 1897 and 1898. In addition were 12 steel gunboats, 20 smaller river and other gunboats, 2 transports, 3 destroyers, 9 torpedo-boats, and 2 training cruisers and ships.

The following cruisers, especially adapted for the training of cadets, were added to the fleet:—The *Ying Swee* and the *Chao Ho*, both built in England (1911), each having a displacement of about 2,600 tons and a contract speed of 20 knots. The main armaments consist of 2 6-in. and 4 4-in. guns. There are, in addition, 10 first-class torpedo boats and several light-draught river gun-boats.

The *Chao Ho*, *Hai Chi* and 7 other boats were retained by the Southerners. There are no naval bases of any importance. Existing dockyards are: Foochow, Taku, Kiangnan (Shanghai), and Whampoo (Canton). The revolution checked an intended reorganisation of the navy, and its present situation is doubtful. It has very little fighting value, but experience proves that the Chinese bluejacket with training and discipline can rank with any bluejacket in the world.

Production and Industry.

Agriculture.—China is essentially an agricultural country, and the land is all freehold held by families on the payment of an annual tax. Total arable land in China is estimated at about 192,060 square miles. The holdings are in general small; the implements used are primitive; irrigation is common. Chinese agriculture is intensive rather than extensive. Rotation of crops is practised. Horticulture is a favourite pursuit, and fruit trees are grown in great variety. Indeed the Chinese are gardeners rather than farmers. Vegetable culture has reached a high state of perfection. Wheat, barley, maize, and millet and other cereals, with peas and beans, are chiefly cultivated in the north, rice, sugar, and indigo in the south. Treaties forbid the export of grain with the exception of wheat, soya beans, kiao-liang, indian corn, buckwheat, and barley from Manchuria. An embargo may be applied in case of a famine in China.

Cotton is grown widely even as far north as the southern part of Chihli, the chief area of production being the Yangtse valley. In 1921, 4,702,739 acres were cultivated, and the yield was 5,438,220 piculs. Principal provinces with their yield in piculs: Kiangsu, 3,020,201; Anhwei, 291,975; Che-kiang, 251,900; Shensi, 239,382; and Shantung, 126,070.

Tea is cultivated exclusively in the west and south, in Fukien, Hupeh, Hunan, Kiangsi, Chekiang, Anhwei, Kwangtung, and Szechuen. Tea area in 1917 was 520,470 acres. The exportation of tea (especially black leaf), owing to the competition of Ceylon and Indian teas, has steadily declined during recent years, falling from 1,576,136 piculs in 1908 to 430,328 piculs in 1921. The stoppage of the Russian portion of the trade, which formerly amounted to about 80 per cent. of the total volume, and the differential duty of 2*d.* per lb. imposed by Great Britain, have accelerated the decline in recent years. To encourage the industry the government remitted the entire export duty for a period ended October 20, 1922.

Silk culture is one of the most successful industries of China, about 27 per cent. of the world's supply of raw silk is from China. In 1919 there were produced 73,078,709 piculs, valued at 139,624,755 dollars.

Pigs are raised everywhere in China, and pig's bristles have become an

important article of export. China abounds in wild game. Chinese waters abound in fish, but the industry is neglected.

Manufacture.—An important feature in the development of the Chinese industries is the erection of cotton and wool mills, and of silk filatures in Shanghai, Canton and elsewhere, while native looms are found in most dwellings. In 1922 there were 17 silk filatures, 73 cotton mills, and 4 woollen mills. The active cotton spindles in China in 1922 numbered 2,066,582. There are over 100 hosiery, underwear and towel mills. At the large centres flour and rice mills are beginning to supersede native methods of treating wheat and rice. Flour milling is making rapid strides in China. In 1922 there were about 120 modern mills, 11 of which were situated in Shanghai. The daily output of the Shanghai mills is 6,000 barrels. Wusih is the next milling centre of importance. Manchuria possesses 41 flour mills. At Hanyang, near Hankow, are large Chinese iron-works, supplied with ore from mines at Ta-yeh, about 60 miles distant. These works are able to turn out about 300 steel rails a day. There are also 445 glass factories.

Mining.—Most of the 18 provinces and the 3 provinces of Manchuria contain coal, and China may be regarded as one of the first coal countries of the world. The coal-fields cover an area of 133,513 acres and the average annual coal output is estimated at 19,000,000 tons, nearly 8,000,000 of which are from modern mines. Iron ores are abundant in the anthracite field of Shansi, where the iron industry is the oldest in the world, in Chihli, in Shantung and other provinces, and iron (found in conjunction with coal) is worked in Manchuria. Three hundred million tons of ore are estimated to be in Shansi; the reserve of other deposits amounts to about 300 million tons. The annual production of iron ore is about 1,500,000 tons. The Tayeh iron deposits, near Hankow, are among the richest in the world. They have an ore reserve of 35,000,000 tons. On the Upper Yangtse and in Shensi province petroleum is being worked; there are 91 wells in the country. Copper ore is plentiful in Yunnan where the copper-mining industry has long existed; Yunnan Province is one of the richest copper districts in the world. Tin is the most important mineral export; about 10,000 tons are produced annually. It is mined in Yunnan, and through Mengtze it reaches Hong Kong, whence it is shipped to foreign countries. In antimony China occupies a unique position; since 1908 the country has produced more than 60 per cent. of the world's total production. More than 90 per cent. comes from Hunan; the annual output is about 28,316 tons. The annual output of gold is 71,582 ounces; of silver, 107,155 ounces; of lead, 13,527 tons; of copper, 10,963 tons. Mining for wolfram is being carried on at Swatow, and in the north-western part of Chihli Province; molybdenum ore has been found at Yungtail-sien, in Fukien; bismuth has also been worked. In 1921 there were 1,358 mines in operation.

Commerce.

Foreign trade of China (exclusive of bullion):—

	1917	1918	1919	1920	1921
	£	£	£	£	£

¹ By land frontier.

The imports into China from Hong Kong come originally from, and the exports from China to that colony are further carried on to, Great Britain, France, America, Australia, India, the Straits, and other countries.

The share of the British Empire in the foreign trade of China in 1921 was 38.82 per cent., of Japan 35.06 per cent., and of the United States 7.54 per cent.

The chief imports and exports for 2 years were as follows in HK. Taels:—

Imports	1920	1921	Exports	1920	1921
	HK. Taels	HK. Taels		HK. Taels	HK. Taels
Opium	200,162	322,590	Yellow beans	22,359,182	28,462,029
Cotton goods	246,813,429	208,662,426	Bean cake	41,959,107	49,524,852
Woolen goods	4,799,512	7,407,232	Raw Cotton	9,224,512	16,483,234
Metals	61,565,157	60,078,039	Bean Oil	14,794,624	9,735,791
Rice	5,362,455	41,220,998	Silk, raw & manuf'd .	102,458,374	152,718,632
Cigarettes	22,029,585	24,912,831	Cow and buffalo hides	8,215,379	6,582,957
Coal	14,374,579	13,789,828	Tin	11,098,167	6,001,458
Fish	13,305,690	14,288,350	Tea	8,873,135	12,605,788

Of the tea in 1921, 16,090,000 lbs. were exported to Hong Kong, 4,201,866 lbs. to Great Britain, 2,060,000 lbs. to France, and 17,006,267 lbs. to the United States. The total export of tea to foreign countries has been as follows:—1895, 248,757,333; 1905, 182,573,064; 1915, 237,647,066; 1920, 40,787,467 lbs.; 1921, 57,377,067 lbs.

The net importation of opium for last 5 years:—1917, 1,073 piculs; 1918, 337 piculs; 1919, 156 piculs; 1920, 136 piculs; 1921, 332 piculs; as compared with 22,021 piculs in 1912. Total export of silk for past five years:—1917, 107,584 piculs; 1918, 96,866 piculs; 1919, 131,506 piculs; 1920, 82,530 piculs; and 1921, 113,980 piculs.

In addition to her overseas trade China has an extensive coast and river trade, in which under "Inland Waters Steam Navigation Regulations," steamers under foreign flag are allowed to participate. In 1921 1,861 vessels were registered, of which 416 were foreign, and 1,445 Chinese.

Most treaties with China contain provision for most-favoured nation treatment. Dairen is the customs port for all the leased territory and has out-stations at Kinchow, Pulantien, Pitsuwo, and Port Arthur. It has also supplanted Newchwang as the premier port of Manchuria.

In recent years the quantities and value of the imports of tea into the

United Kingdom from China, including Hong Kong and Macao, were (according to the Board of Trade returns):—

Year	Quantities	Value	Year	Quantities	Value
	lbs.	£		lbs.	£
1916	19,877,195	930,180	1919	26,755,017	1,939,474
1917	8,397,403	450,805	1920	15,928,282	1,106,298
1918	1,587,053	262,820	1921	4,646,074	246,570

Other important articles of trade between Great Britain and China (according to the Board of Trade returns) in two years were:—

Imports	1920	1921	Exports	1920	1921
	£	£		£	£
Raw and waste silk	2,238,648	325,273	Cottons	34,130,389	13,451,532
Egg yolk	5,835,876	4,206,978	Iron, wrought, &c.	4,619,834	3,151,735
Bristles	1,389,363	469,025	Woollens	3,756,288	2,046,424
Camels' hair	652,729	146,886	Machinery	2,081,217	4,762,395

Total trade between United Kingdom and China for 5 years:—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from China into U.K.	9,672,380	23,052,985	26,898,466	11,269,717	9,723,070
Exports to China from U.K.	11,855,296	20,969,747	43,577,342	26,218,760	23,134,102

Shipping and Navigation.

During 1921, 214,566 vessels of 114,619,544 tons entered and cleared Chinese ports. Of these 5,516 of 4,510,901 tons, were American; 38,855 of 42,326,445 tons, British; 1,240 of 1,221,758 tons, French; 366 of 165,339 tons, Italian; 25,385 of 31,738,783 tons, Japanese; 1,915 of 587,886 tons, Russian; and 139,520 of 31,791,479 tons, Chinese. Of the total tonnage in 1921, 125,432 were steamers with a tonnage of 109,319,714, and 89,134 were sailing vessels with a tonnage of 5,299,830.

The nationality of the vessels (direct foreign trade) was mainly as follows:—

Nationality 1921	Entrances		Clearances	
	No.	Tons	No.	Tons
British	4,502	5,051,618	4,469	4,976,964
American	837	1,473,046	832	1,438,013
French	237	380,971	238	336,780
Italian	17	66,711	19	74,609
Japanese	3,735	5,547,894	3,741	5,589,598
Portuguese	234	106,183	233	105,910
Russian	122	36,219	113	35,571
Chinese	26,520	2,722,954	25,151	2,726,125
Total (all Nationalities)	36,461	15,862,405	35,099	15,909,114

Internal Communications.

China is traversed in all directions by numerous roads, and, though few are paved or metalled, and most are badly kept, a vast internal trade is carried on partly over them, but chiefly by means of numerous canals and navigable rivers. The China Famine Relief Organisation of the American Red Cross, which closed its operations on June 30, 1921, reported that it had laid out 935 miles of road and completed 648 miles.

Chinese railway history began in 1876 when the Woosung line, built by foreign enterprise, was opened. At the end of 1920 there were over 6,818 miles of railway open to traffic in China (excluding 1,857 miles in Manchuria), of which about 1,300 miles have been constructed by British enterprise and British capital. Practically all construction work has been suspended owing to lack of funds. The surplus for the year 1920 of the Chinese Government railways was 40,814,447 dollars.

The principal railways in China, beginning with the north, are :—(1) South Manchuria Railway, from Changchun to Dairen, 693 miles [see also under Manchuria]; (2) Peking-Mukden line, from Mukden to Peking, 604 miles; (3) Peking-Suiyuan Railway, from Peking to Kalgan, Tatung Fu, Fengchen and Suiyuan, 403 miles; (4) Peking-Hankow Railway, Peking to Hankow, 814 miles; (5) Lung Hai Railway, from Hsuehowtu to Kwan Yin Tang (in Honan Province), 359 miles; (6) Shanghai-Nanking Railway, from Shanghai to Nanking, 203 miles; (7) Tientsin-Pukow Railway, from Tientsin to Pukow, on the Yangtze river, opposite Nanking, 686 miles; (8) Shanghai-Hangchow-Ningpo Railway, from Shanghai to Hangchow, 164 miles; (9) Hupeh-Hunan Railway, from Wuchang to Yochow, 252 miles; and (10) the Chinese Eastern Railway running eastward from Manchuli through Northern Manchuria to Suifeñho (Russian name, Pogranichnaya), the last station in Chinese territory, where it joins the Ussuri Railway, and then runs due east to Vladivostok. This line was built by the Russians, and under an agreement dated October 2, 1920, is operated by Russians and Chinese, assisted by an Allied Technical Board pending the withdrawal of Allied Troops from Siberia. It runs for 1,100 miles in Chinese territory. The gauge is the Russian standard of 5 feet, whilst that of all the other railways is 4 feet 8½ inches.

The 1920 Report of the Government railways showed that 6,420 kilometres of line were operated by the Government, also that the provincial and private railways were 773 kilometres in length, giving the total length subject to the control of the Ministry of Communications at 7,193 kilometres. There are 3,780 kilometres of concessioned railways, making a grand total of 10,973 kilometres, or 6,818 miles.

Efforts are being made to inaugurate Commercial Aviation services throughout the country.

China has a fairly well developed telegraph service. Telegraphs connect all the principal cities of the Empire, and there are lines to all the neighbouring countries. The telegraph lines have a length of nearly 50,000 miles. The administration is now completely under Government control. Wireless Telegraph Stations have been installed at Kalgan, Peking, Hankow, Shanghai, Canton, Tsungming, Woosung, and Foochow. On August 27, 1918, the Chinese Government contracted with the Marconi Wireless Co for the purchase of 200 wireless telephones for the use of the Chinese army, each to have a radius of 40 miles. On October 9, the Government again contracted with the Marconi Co. for the erection of three powerful wireless stations at Kashgar, Urunchi, and Lanchowtu, a total span of over 3,000 miles, to connect with a smaller station at Sianfu which will act as auxiliary to the land lines.

Later it was decided to abandon Lanchowfu in favour of Urga, which is only about 800 miles from Peking. The station was completed in September, 1920. The plant has a range of 1,000 miles. Work on the other two stations will commence when the political situation clears. On May 24, 1919, the Ministry of War contracted with the Marconi Co. for the formation of the Chinese National Wireless Telegraph Company.

On February 21, 1918, the Ministry of Navy contracted with the Mitsui Co. (Japanese) for the erection of a high power wireless installation in China. On January 8, 1921, an agreement was signed between the Ministry of Communications and the American Federal Wireless Telephone and Telegraph Corporation for the erection of a high power wireless station at Shanghai and medium power stations at Peking, Canton, Hankow and Harbin. This plant, it is stated, is to be the largest in the world, and will be able to communicate across the Pacific without relay.

At the Washington Conference it was agreed that all radio stations in China should be limited in their use to sending and receiving government messages, except in special circumstances which should be approved by the Chinese Government. In case there are any radio stations in China maintained by foreigners without the authority of the Chinese Government, such stations may be taken over by the Chinese Government after compensation has been paid.

The question of the return of Japanese wireless stations at Hankow, Tsinan, and Tsingtao was taken up immediately after the Washington Conference, and the Japanese have agreed, subject to the payment of compensation, to hand them over to Chinese control.

Telephones are in use in the main cities of China, and the Chinese Government is planning a loop system of long-distance telephone communication. A wireless telephone service between Peking and Tientsin was opened on March 8, 1922.

The postal work of China, formerly carried on by the Government Courier service and the native posting agencies, was gradually taken in hand by the Chinese Imperial Post Office, begun in 1897 under the management of the Maritime Customs. By Edict of November 6, 1906, the control of the Postal Service was transferred to the Ministry of Communications, and the transfer was actually effected in July, 1911. The work of the Post Office extends over the 18 Provinces of China proper, the New Dominion and Manchuria, which have been divided into postal districts, or sub-districts. The Postal Service with Tibet has been suspended. In 1921 there were 11,032 post offices open, and the number of letters posted was 299,835,398; of postcards 39,992,910; of newspapers and printed matter, 91,130,950; of commercial papers, 1,315,590; of samples of merchandise, 598,300; and of official correspondence, 9,243,220; grand total of 442,116,358, an increase of 41,229,423 over the total for 1920. Included in this total were 30,133,460 registered articles, 22,598 insured letters, 5,353,110 express articles, and 28,537,660 articles posted for local delivery. The number of parcels posted in 1921 was 4,569,660, an increase of 353,440 over the total for 1920. The revenue of the post office in 1920 was 12,679,122 dollars, and the expenditure 10,467,053 dollars, leaving a surplus of 2,212,069 dollars. On December 31, 1921, the postal staff numbered about 115 foreigners and 31,843 Chinese. China in 1914 joined the postal union.

At the Washington Conference it was agreed that all foreign post offices in China, except those in leased territories, are to be closed and withdrawn on or before January 1, 1923.

Money and Credit.

Banking is a new institution in China. Its inception dates from the close of the Tai-ping rebellion in the 'sixties, when the rapid expansion of trade in Shanghai created a demand for credit facilities. But the modern system of banking was introduced as late as 1902, in which year the Board of Finance established the Ta Ching Bank, with a capital of 4,000,000 Kuping Taels, which was soon raised to 10,000,000 Kuping Taels. Prompted by the success of the Ta Ching Bank, the Board of Posts, Railways, and Telegraphs launched in 1905 a scheme to organise a bank for the control of the finances of the Railways, Telegraphs, Posts and Navigations, and the management of an issue of national loan bonds for the redemption of the Peking-Hankow Railways, and this scheme finally culminated in the establishment of the Bank of Communications in 1906. The year 1905 marked also the beginning of commercial banks in China. The Chekiang Railway Company, which was then a private company, founded the National Commercial Bank in Hangchow, with a capital of 1,000,000 dollars, half of which was subscribed by the Railway itself, and the other half by its stockholders. In the same year was formed the Commercial Bank of China, in the following year, the Ningpo Commercial Bank, and in 1910 the Commercial Guarantee Bank of Chihli. In 1911 the Manchu régime collapsed, and with it the Ta Ching Bank. However, it was speedily reorganised as the Bank of China. From 1914 onwards the establishment of new banks proceeded at a rapid pace, and there are now about 120 banks with over 300 branch offices. The first six months of 1921 saw the inauguration of no fewer than 34 banks. The total capitalisation of Chinese banks approaches 350,000,000 dollars.

Of these banks, the Bank of China is the largest, having about 100 branches and sub-branches, and an authorised capital of 60,000,000 dollars, and a paid-up capital of 12,279,800 dollars. Next in order comes the Bank of Communications, whose capital has reached 15,000,000 dollars, 6,500,000 dollars of which are paid-up. It has about 70 branches, 3 being in Singapore, Tokio, and Hongkong. The Chinese Government holds shares valuing 5,000,000 dollars in the Bank of China, and 2,500,000 dollars in the Bank of Communications. The Bank of China declared a net profit in 1920 of 4,206,000 dollars, an increase of 740,000 dollars over the figure for 1919.

Other prominent banks are: National Industrial Bank of China, capital 20,000,000 dollars (1919); Commercial Guarantee Bank of Chihli, capital 6,000,000 dollars (1910); Kincheng Commercial Bank, capital 5,000,000 dollars (1917); Sing Hwa Savings Bank, capital 5,000,000 dollars (1914); Bank of Canton, capital 6,329,984 dollars (1912).

Siño-foreign banking institutions are numerous, having grown rapidly during 1921. In 1918 the Exchange Bank of China was established with Siño-Japanese capital. It has a subscribed capital of 10,000,000 yen. The Siño-Italian Bank, the Siño-French Bank, the Siño-Scandinavian Bank, and numerous Siño-Japanese institutions were inaugurated in 1921. A bank which has obtained an influence in financial circles is the Chinese American Bank of Commerce. It was established by American and Chinese capitalists, with equal interests, under a special charter issued on April 12, 1920, by the Chinese Government. This bank has an authorised capital of 10,000,000 gold dollars, of which 5,000,000 gold dollars are paid-up. It obtained a note-issuing power on August 1, 1921.

Many banks are being established for the explicit purpose of financing industrial undertakings. One of these is the China and South Seas Bank (1921), which is financed by overseas Chinese. It has an authorised capital

of 20,000,000 dollars, and a paid-up capital of 5,000,000 dollars. Branches have been established throughout the Far East.

The Peking Bankers' Association was established in October, 1917, by 8 banks. It entered into possession of its headquarters in Peking on January 1, 1921. The object of the Association which now embraces all the principal native banks, is to encourage public enterprise in the banking community. The member banks have gradually formed themselves—albeit very loosely—into a Lending Group, or Consortium. Up to the end of 1921 they had negotiated two loans with the Government: the Six Million Dollar Car Loan (January 15, 1921), and the Shanghai Mint Loan (March 3, 1921), of 2,500,000 dollars.

On January 18, 1921, Great Britain, the United States, Japan, and France formally notified China of the formation of a new International Banking Consortium, but the Chinese Government has so far withheld recognition.

Post Office savings banks at 11 district head offices were opened on July 1, 1919. During the year 1920 649,497 dollars were deposited by 7,075 depositors. The total number of savings banks at the end of 1920 was 219, but remarkable progress was made in 1921, and there are now nearly 400. The total deposits up to December 31, 1920, amounted to 1,286,655 dollars, and 649,497 dollars were withdrawn.

Money, Weights, and Measures.

MONEY.

The currency of China is on a silver basis, and consists of taels, dollars, copper cash, and bank notes. The *tael* is really a weight of silver (about an ounce) of a certain degree of fineness. Theoretically it is divided into 10 *mace*; 1 *mace* = 10 *candareens*; and 1 *candareen* = 10 *cash*. The *tael* varies in different parts of the country, the principal taels being (1) the *haikwan* or customs *tael* (in 1920 it was equal in value to 81½ *cash*), (2) the *K'up'ing* or treasury *tael*, (3) the *Tsaoping* or Shanghai *tael*, and (4) the Canton *tael*. A *tael* may be worth from 800 to 1,800 *cash*. Different taels are in use in every province in the country.

There is unparalleled currency confusion. It is recognised by the Chinese Government that currency reform is the most pressing need of the country. In the treaty of September 5, 1902, China agreed with Great Britain to take the necessary steps to provide a uniform national coinage which should be legal tender for all purposes throughout the Empire, and an Imperial Decree was issued in October 1908, commanding the introduction of a uniform *tael* currency, of which the unit must be a silver *tael* coin of .98 touch weighing 1 *K'up'ing* or Treasury-scale *tael* or ounce. This decree was cancelled by a further decree of May 25, 1910, establishing the silver dollar (*yuan*) of .90 touch and weighing .72 Treasury-weight *tael* as the unit of currency. The touch and weight of the silver subsidiary coins (50c., 20c., 25c., and 10c.) were also definitely specified, while provision was made for further subsidiary coins (5c. nickel, 2c., 1c., ½c., and ¼c. copper) of touch and weight to be laid down later. The minting of these silver coins has begun, but as they are at a discount in every province other than the one in which they are minted, confusion has been rendered more confounded. There are ten different varieties of dollars in circulation. Although the law of May, 1910, was intended to bring the provincial mints under the control of the Central Government, the Governors have effected a serious depreciation of silver and copper money by their indiscriminate minting of subsidiary coins.

The *K'up'ing* *tael* weighs 575.642039 grains, somewhat less than the

Haikwan tael, which weighs 581·47 grains. A decree for uniform weights and measures was issued on Oct. 9, 1907, whereby the K'up'ing or Treasury scale was made the standard weight.

The standardisation of the dollar is now being taken in hand. The Peking Bankers' Association, which might be regarded as the unofficial fiduciary adviser to the Government, loaned the Government 2,500,000 dollars on March 3, 1921, with the object of erecting and equipping an independent mint to coin a standard dollar. The establishment of the mint is in the hands of the Chinese bankers until such time as the Government redeems the notes it issued as security for the loan. The Shanghai mint would seem to foreshadow the entire abolition of the tael as a unit of currency and the substitution of a uniform Chinese silver dollar which will be currency throughout China. It is also designed to force the provincial mints to raise the standard of coinage.

WEIGHT.

10 <i>Ssü</i>	. . = 1 <i>Hu</i> .
10 <i>Hu</i>	. . = 1 <i>Hao</i> .
10 <i>Hao</i>	. . = 1 <i>Li</i> (nominal cash).
10 <i>Li</i>	. . = 1 <i>Fên</i> (Candareen).
10 <i>Fên</i>	. . = 1 <i>Ch'ien</i> (Mace).
10 <i>Ch'ien</i>	. . = 1 <i>Liang</i> (Tael) = 1½ oz. avoirdupois by treaty.
16 <i>Liang</i>	. . = 1 <i>Chin</i> (Catty) = 1¼ lbs. " "
100 <i>Chin</i>	. . = 1 <i>Tan</i> (Picul) = 133½ lbs. " "

CAPACITY.

10 <i>Ko</i>	. . = 1 <i>Sheng</i> .
10 <i>Sheng</i>	. . = 1 <i>Ton</i> (holding from 6½ to 10 <i>Kin</i> of rice and measuring from 1·13 to 1·63 gallon). Commodities, even liquids, such as oil, spirits, &c., are commonly bought and sold by weight.

LENGTH.

10 <i>Fen</i>	. . = 1 <i>Ts'un</i> (inch).
10 <i>Ts'un</i>	. . = 1 <i>Ch'ih</i> (foot) = 14·1 English inches by treaty.
10 <i>Ch'ih</i>	. . = 1 <i>Chang</i> = 2 fathoms
1 <i>Li</i>	. . = approximately one-third of a mile.

In the tariff settled by treaty between Great Britain and China, the *Ch'ih* of 14½ English inches has been adopted as the legal standard. The standards of weight and length vary all over the Republic, the *Ch'ih*, for example, ranging from 9 to 16 English inches, and the *Chang* (= 10 *Ch'ih*) in proportion; but at the treaty ports the use of the foreign treaty standard of *Ch'ih* and *Chang* is becoming common.

Diplomatic Representatives.

1. OF CHINA IN GREAT BRITAIN.

Envoy and Minister.—Vi Kyuin Wellington Koo. Appointed Sept. 29, 1920.

Counsellors of Legation.—Chao-Hsin Chu and Sir John McLeavy Brown, C.M.G.

Second Secretary.—Wei-Cheng Chen.

Third Secretaries.—Tsu Lieh Sun and Ting Hsu.

Attachés.—Yung-Ching Yang and Kenyon Vanlee Dzung.
Naval Attaché.—Commander Chen Shao-Kwan, D.S.O. (absent).
Chancellor.—Yu-Chuan Tsao.
Consul-General in London.—Tsang Woohuan (1922).

2. OF GREAT BRITAIN IN CHINA.

Envoy and Minister.—Sir James William Ronald Macleay, K.C.M.G.
 Appointed September 4, 1922.

Counsellor of Legation.—R. H. Clive, C.M.G.

Secretaries.—G. E. Hubbard and J. B. Carson, M.C.

Naval Attaché.—Captain R. M. Colvin, R.N., C.B.E.

Military Attaché.—Lt.-Col. H. B. H. Orpen-Palmer, C.M.G., D.S.O.

Commercial Counsellor.—H. H. Fox, C.M.G. (at Shanghai).

Commercial Secretary.—H. J. Brett.

Judge.—His Honour Skinner Turner (at Shanghai).

There are British Consular representatives at Peking, Amoy, Canton (C.G.), Changsha, Chefoo, Cheng-tu (C.G.), Chinkiang, Chung-king, Foo-chow, Hang-chow, Hankow (C.G.), Harbin, Ichang, Kiukiang, Kiungchow, Mukden (C.G.), Newchwang, Nanking, Shanghai (C.G.), Swatow, Teng-Yueh, Tien-tsin (C.G.), Wuchow, Wuhu, Yunnan-fu (C.G.), Ningpo, Kashgar (C.G.), Tsinaifu, and Tsingtao.

Chinese Outer Territories.

Manchuria.

Manchuria, lying between the province of Chihli and the Amur river, and extending from the Hingan mountains eastwards to Korea and the Ussuri river, has an area of about 363,610 square miles and a population probably of about 20,000,000, but variously estimated at from 5,750,000 to 29,400,000. It consists of 3 provinces, Sheng-King or Feng-tien (area, 56,000 sq. miles; pop. 10,312,241), capital Mukden; Kirin (105,000 sq. miles; pop. 6,000,000), capital Kirin; and Heilung-chiang or the Amur province (203,000 sq. miles; pop. 1,500,000) with Tsitsihar (Heilung Hsien) (population 30,000) for its capital. The system of government of each of the three provinces is exactly the same as that of the provinces in China Proper. They are ruled by governors appointed by the Chinese Government. The population given above for Fengtien provinces is from an official Chinese statement of November, 1908, which also gives the agricultural population as 2,520,145, and the cultivated area as 4,333,333 acres, but these figures must be taken with reserve. The chief towns are Mukden, the capital, with about 158,132 inhabitants; Newchwang (82,100) standing about 30 miles up the Liao river, at the mouth of which is the port of Ying-k'ou (60,000) often called Newchwang. Besides Newchwang, Mukden, An-tung (57,699), Tatung-kou, Tiehling (28,492), Tungchiangtzu (7,299), and Fakumen, (19,432) are open to commerce. Other important towns are Hsin-min-fu (20,000), Liao-yang (40,000), Feng-hwang-cheng (25,000), and Taonanfu, a town rapidly risen to importance, on the border of Eastern Mongolia. In Kirin province is the town of Chang-chun (Kwangchengtze), with 80,000 inhabitants. It is proposed to establish a university in Manchuria.

There is no longer a Manchu population in Manchuria. A few scattered communities alone remain. Within quite recent years Manchuria has been

colonised by Chinese from the Northern Provinces of China and the immigration still continues by road and sea. Owing to the enormous development of the soya-bean industry (cultivated on some 5,000,000 acres) and the improved railway facilities, Manchuria has grown more rapidly in wealth than any other part of China. Manchuria is primarily an agricultural country, its soil is one of the richest in the world. In 1921 it was estimated by the Dairen Chamber of Commerce that 22,744 505 acres of land were cultivated by 19,461,100 people. Beans, millet, wheat and rice are the principal crops. The wheat yield of Manchuria is in the region of seven to eight million piculs annually, but as the cultivation of wheat is ideally suited to the agricultural conditions, the potentialities are enormous. Formerly the yield was all exported, but of late years the flour industry has been growing with the increase in the wheat production. The Russians first introduced flour milling into the country, and they were quickly followed by the Japanese and Chinese. There are now some 50 mills in Manchuria, which turn out about 15,000,000 sacks annually. Extensive forests also abound. The soil of certain districts - especially in the vicinity of Mukden and Harbin—is suitable for beet growing, and the industry is slowly developing. Manchuria is rich in minerals, such as coal, iron, gold, silver, lead and asbestos.

The Russian lease of Port Arthur and Talien-wan (called Dalny by the Russians and Dairen by the Japanese), and the southern extremity of the Liao-tung peninsula and the South Manchuria Railway were transferred to Japan by the Portsmouth Peace Conference, September 5, 1905. On December 22, 1905, China gave official recognition to this transfer and granted Japan the right to extend the railway from Mukden to Antung at the mouth of the Yalu river, where it connects with the Korean railway. In 1912 a branch line (78 miles) from Chang-hun, the northern terminus of the Japanese South Manchuria Railway to Kirin, constructed by joint Japanese and Chinese enterprise, was opened to traffic. The total length of the South Manchuria Railway is 693 miles (Dairen to Chang-hun, main line, 438 miles; branch to Port Arthur, 29 miles; branch to Newchwang, 14 miles; Fushun coal mines, 31 miles; branch to Yentai, 10 miles; and Mukden to Antung, 171 miles). On August 1, 1917, the whole of the railway system of Korea (some 1000 miles in length) passed under the management of the South Manchuria Railway, giving the latter a through line under its own management from Fusan, the Korean port nearest Japan, to Changchun, where connection with the railway system to Harbin and thence to Petrograd is effected. Besides the South Manchuria Railway, Manchuria is traversed by the Chinese Eastern Railway and the Chinese Government Railways. The Japanese have 215 post offices and the Chinese 335. Telegraph and telephone systems are as follows: Telegraphs, length of lines, 617 miles; length of wires, 6,372 miles. Telephones, length of lines, 1,116 miles; length of wires, 38,538 miles.

In 1921, the direct foreign imports of Manchuria amounted to 136,926,411 haikwan taels, and the direct foreign exports to 196,820,680 haikwan taels. Vessels entered and cleared at Dairen in 1921, 4,592 of 6,328,734 tons.

Tibet.

Tibet, extending from the Pamir region eastwards between the Himalaya and Kwen-lun mountains to the frontiers of China, has an area of 463,200 square miles with a population estimated at between 1,500,000 and 6,000,000. Probably 2,000,000 is near the mark. The only census ever taken was by

the Chinese in 1737 and showed a population of 316,300 lamas (monks) and 635,950 laity. Lhasa, the capital, has from 15,000 to 20,000 inhabitants. The country being bleak and mountainous and strangers having been jealously excluded, wide regions are still unexplored.

Chinese authority was in the past represented by two *Ambans* who had charge, respectively, of foreign and military affairs. There were three Chinese commandants of troops at Lhasa, Shigatse, and Dingri where the permanent military force of about 4,600, provided by China, were mostly quartered. There were a few other Chinese officials, but the civil and religious administration of the country was left almost entirely to Tibetans. The head of the government is the Dalai Lama, who resides at the Po-ta-la (or palace) near Lhasa. He acts through a minister or regent appointed from among the chief Tibetan Lamas and assisted by five ministers. Early in 1908 the territory of Western Szechuen and the adjoining territory of Eastern Tibet were united into a new "special administrative area," Hsi-Kan, with Batang, re-named Baanfu, as capital.

The prevailing religion is Lamaism, a corrupt form of Buddhism, but along with it there exists the Bon, or Shamanistic, faith. In some places agriculture is carried on, barley and other cereals as well as pulse and vegetables being grown. In some favoured regions fruits, including peaches and even grapes, are produced. In other places the pursuits are pastoral; the domestic animals being sheep and yak (often crossed with Indian cattle), while in some regions there are buffaloes, pigs, and camels. Wool-spinning, weaving, and knitting are common, and there are many hands skilful in making images and other decorations for religious edifices. The chief minerals worked are gold, borax, and salt. There is a large trade with China and considerable traffic across the Indian frontier.

The trade between India and Tibet has to be carried through lofty passes between 14,000 and 18,000 feet high, most of which are practically impassable during seasons of heavy rain and snow. Sheep and also crosses between yaks and ordinary cattle are used as beasts of burden. The most important route into Tibet from India is from Siliguri, near Darjeeling in northern Bengal, and across the small Frontier State of Sikkim to Gyantse and Yatung in Tibet, the two leading trade marts authorised by the existing Convention. The other chief means of access to Tibet are from Almora in the northern part of the United Provinces, and from Simla over the Simla-Tibet road to Gartok in western Tibet, which is at about 14,200 feet elevation above the sea. From Almora to Gartok the direction is almost due north, and from Simla to Gartok is almost due east. The trade between India and Tibet was as follows:—

—	1918-19	1919-20	1920-21	1921-22
	£	£	£	£
Imports into India ¹	480,000	438,000	313,400	231,100
Exports to Tibet ²	150,000	214,000	618,200	551,300

¹ Mainly raw wool.

² Largely cotton piece goods.

For the removal of hindrances to the Indian trade a treaty was made with China in 1890, supplemented by a second treaty in 1893, but the hindrances still remained. Consequently, in 1904, the Indian Government sent a mission with an escort to arrange matters directly with the Tibetan Government. The mission met with a good deal of armed opposition, but at length, on September 7, a convention was executed at Lhasa. The convention provides for the re-erection of boundary stones

(alluding to former pastoral disputes) on the Sikkim frontier; for marts at Yatung, Gyantze, and Gartok for Tibetan and British merchants; for the demolition of forts on the trade routes; for a Tibetan commissioner to confer with British officials for the alteration of the objectionable features of the treaty of 1893; for the settlement of an equitable customs tariff; for the repair of the passes and the appointment of Tibetan and British officials at the trade marts. China paid an indemnity of 2,500,000 rupees (166,666/.), and the evacuation of the Chumli valley by the British began in February, 1908. Further, 'no Tibetan territory may be sold, leased or mortgaged to any foreign Power, nor may Tibetan affairs, or Tibetan public works, be subject to foreign management or interference without the consent of the British. The adhesion of China to this convention was secured by an agreement signed at Peking on April 27, 1906. Under the Convention of August 31, 1907, Great Britain and Russia agree not to enter into negotiation with Tibet except through the Chinese Government, nor to send representatives to Lhasa. But this engagement does not affect the provisions of the British-Tibetan convention of September 7, 1904, ratified by China in 1906. Negotiations were begun at Simla in Sept. 1907, for the conclusion of Trade Regulations between India and Tibet, and were brought to a satisfactory conclusion in April, 1908.

The Revolution in China in 1911 was not without its effect on the Tibetans, who expelled the Chinese garrison. Subsequently an expedition was dispatched from Szechuan and Yunnan, but Great Britain protested and caused its withdrawal. In August, 1912, the British Minister in Peking presented a memorandum to the Chinese Government outlining the attitude of the British Government towards the Tibetan question. It held that the re-establishment of Chinese authority would constitute a violation of the Anglo-Chinese Treaty of 1906. Chinese suzerainty only was recognised, and Great Britain could not consent to the assertion of Chinese sovereignty over a state enjoying independent treaty relations with her. Ultimately a Tripartite Conference was opened at Simla in October, 1913. The Tibetan proposals included the independence of Tibet, the repudiation of the Anglo-Chinese Convention of 1906, and boundary rectifications; China insisted upon Tibet being an integral of Chinese territory, China engaging not to convert Tibet into a province, and asking Britain to give an undertaking not to annex Tibet, nor any portion of it. Britain suggested the creation of an Inner and Outer Tibet, the former being autonomous, and the latter under Chinese control. China declined to accept this arrangement, and the Conference was dissolved without accomplishing anything. Since then the British Government has more than once offered to renew negotiations with the Chinese Government, but the latter has up to the present declined to do so.

Sin-Kiang, or the New Dominion, consists of Chinese Turkestan, Kulja, and Kashgaria, and comprises all Chinese dependencies lying between Mongolia on the north and Tibet on the south. It is now regarded as a separate province, its Civil Governor residing at Ili, the capital. Its area is estimated at about 550,340 square miles and population at about 1,200,000. The inhabitants are of various races, known as Turki (Kashgari, Kalmuk, Khirghiz, Taranchi, etc.), mostly Mohammedan and Chinese, who have of recent years greatly increased in numbers. The chief towns are Ili, Kashgar, Yarkand, Khotan, and Aksu. The country is administered under Chinese officials, residing at Ili, the sub-ordinates being usually natives of the country. In regions about the Kashgar and Yarkand rivers the soil is fertile, irrigation is practised,

and cereals, fruits and vegetables are grown. Other productions of the country are wool, cotton, and silk. Jade is worked, and in some districts gold is found. The whole territory is yearly increasing in population and prosperity.

British Consul-General at Kashgar.—Clarmont Percival Skrine (appointed January 1922).

Mongolia.

The vast and indefinite tract of country called **Mongolia** stretches from the Kinghan mountains on the east to the Tarbagatai mountains on the west, being intersected towards its western end by the Altai mountains and the Irtysh river. On the north it is bounded by Siberia and on the south by the outer Kan-su and other regions which are united into Sin-Kiang. The area of Mongolia is about 1,367,600 square miles, and its population about 2,000,000. A wide tract in the heart of this region is occupied by the Desert of Gobi which extends south-westwards into Chinese Turkestan. The inhabitants are nomadic Mongols and Kalmucks who range the desert with camels, horses, and sheep. Even in fertile districts they are little given to agriculture. But of recent years there has been a great extension of Chinese immigration, and a large area of what was known as Mongolia, extending from China proper and Manchuria to the Gobi Desert, is now indistinguishable from Chinese territory. Chinese settlers are gradually invading the Gobi Desert. Irrigation alone is needed. The chief town or centre of population is Urga, 170 miles due south of Khiakta, a frontier emporium for the caravan trade carried on with China across the Gobi Desert, goods being easily transported to the Siberian frontier town of Kiakhta, which stands about 100 miles from the south end of Lake Baikal. Chief exports were wool, skins and hides, furs, horns, &c. During the summer months a motor-car service for freight purposes crosses the Gobi desert, the journey between Kalgan and Urga occupying four days. It was inaugurated in 1917.

Many gold mines are found in Outer Mongolia, but few are worked. There are also deposits of copper, silver, iron, and tin.

Shortly after the outbreak of the Chinese Revolution, Outer Mongolia declared its independence and proclaimed the Hutuktu (Living Buddha) as Emperor. Its autonomy was recognised by the Russian Government, and on November 3, 1912, a Convention and a Protocol were signed at Urga by the Russian Envoy and the Cabinet of the Hutuktu. By this Convention the Russian Government undertook to assist Mongolia to maintain the autonomous régime she had established, to support her right to have a national army, and to admit neither the presence of Chinese troops on her soil nor the colonization by the Chinese of her territory. The Mongolian Sovereign and Government will assure to Russian subjects and Russian commerce as in the past the full enjoyment of their rights and privileges as enumerated in the Protocol, and it is clearly understood that no other foreign subjects in Mongolia shall be granted fuller rights than those accorded to Russian subjects.

On November 5, 1913, after prolonged negotiations, an agreement was reached in Peking between Russia and China, whereby Russia recognised Outer Mongolia as part of Chinese Territory under Chinese suzerainty, and China recognised the autonomy of Outer Mongolia. Both countries agreed not to send troops to Outer Mongolia other than as consular or official guards, and not to colonise its territory. Autonomous Outer Mongolia is defined as

the territory formerly under the jurisdiction of the Chinese authorities at Kobdo, Uliasutai and Urga. Frontiers and other questions were settled at a tripartite conference between Mongolians, Chinese, and Russians, which was concluded in June, 1915.

In October, 1913, a war loan of 2,000,000 roubles was granted to the Mongolian Government by Russia. The advance was secured on certain revenues from districts near Kobdo, where Russian tax-collectors had already begun operations. In December, 1914, a Mongolian Bank was established. The capital has been fixed at 1,000,000 roubles, and the directorate of the bank is to be in Petrograd, with branches at Urga, Uliasutai, and Kobdo. The Mongolian Government is to receive 15 per cent. of the net annual profits, and will possess the right to purchase the bank upon the expiry of 50 years from the date of the commencement of operations.

In September, 1914, an agreement between Russia and the Urga Government was signed at Kiakhia with regard to railways in Mongolia. By the terms of the agreement Russia recognises the right of Mongolia to construct its own territorial railways, the plans for which are to be determined jointly by Russia and Mongolia. Russia is to lend its co-operation in finding capital for the railways. Mongolia engages to consult the Russian Government before granting any concession for domestic railways, so that the projected railways may not be "prejudicial to Russian economic and strategic interests." On the same date a concession was granted by Mongolia to the Russian Administration of Posts and Telegraphs for the construction of a telegraph line from the boundary of Mondii in the Irkutsk district to the Mongolian town of Uliasutai.

With the overthrow of the Romanoffs and the spread of Bolshevism the autonomy of Outer Mongolia availed little to protect the territory from the incursions of the Red forces. In November, 1919, the Urga Government petitioned Peking for the cancellation of its independence, and on 22nd of that month the Chinese Government formally declared null and void the Russo-Chinese and Russo-Mongolian agreements, as 'it was impossible to continue arrangements which had obviously lapsed owing to the dissolution of the Russian Empire, and which were a constant invitation to unrest.' On February 25, 1921, the Living Buddha, or Hutuktu, was forced to declare the independence of Outer Mongolia by Baron Ungern von Sternberg, who had invaded the territory at the head of an anti-Bolshevist army. Ungern used Urga as the base of operations against the Far Eastern Republic, whose forces eventually routed his army. Ungern was captured and handed over to the Soviet authorities, who executed him on September 15. Soviet Russian troops remained in Urga and adjacent territory after the overthrow of Ungern, and in the spring of 1921 a Mongolian National Government, which had been brought into existence on the Russo-Mongolian frontier whilst Ungern was in possession of the capital, assumed control of affairs. This government is under the benevolent overlordship of Moscow. A Soviet Russian Mission is now (January 1923) in Peking prepared to negotiate with China about this and kindred questions. Inner Mongolia consists of three special districts or administrative areas, Jehol, Chahar, and Suiyuan, each of which is governed by a Tartar-General appointed by the Chinese Government.

From March, 1915, Mongolia has a legal currency of its own. The Russian Government has granted to the Siberian Trading Bank the right to issue in Mongolia money coined in the Russian mint. On one side of the coins the value is impressed in the Russian language and a corresponding impression in Mongolian is on the reverse side. For exchange purposes the money will be equal to the Russian rouble (par value, 2s. 1½d.).

Buddhist Lamaism is the prevalent form of religion, the Lamas having their residence at Urga and other centres.

COLOMBIA.

(LA REPÚBLICA DE COLOMBIA.)

Constitution and Government.

THE Republic of Colombia, which in colonial days was called 'Vice-royalty of New Granada,' gained its independence of Spain in 1819, and was officially constituted December 27, 1819. Soon after it formed with Venezuela and Ecuador the State of 'Greater Colombia,' which continued for about ten years. It then split up into Venezuela, Ecuador, and the Republic of New Granada, on February 29, 1832. The Constitution of April 1, 1858, changed New Granada into a confederation of eight States, under the name of Confederation Granadina. On September 20, 1861, the convention of Bogotá brought out the confederation under the new name of United States of New Granada, with nine States. On May 8, 1863, an improved Constitution was formed, and the States took the name of the United States of Colombia. The revolution of 1885 brought about another change, and the National Council of Bogotá, composed of two delegates from each State, promulgated the Constitution of August 4, 1886. The sovereignty of the States was abolished, and they became simple departments, with governors appointed by the President of the Republic, though they have retained some of their old rights, such as the management of their own finances. At present there are 14 departments, 3 "Intendencias," and 6 commissaries.

The legislative power rests with a Congress of two Houses, called the Senate and the House of Representatives. The Senate contains 34 Senators elected indirectly by electors specially chosen for the purpose. The House of Representatives consists of 92 members elected by the people in 17 electoral circumscriptions (one for every 50,000 of population). Senators are elected for 4 years, Representatives for 2 years.

The President is elected by direct vote of the people for a term of 4 years, and is not eligible for re-election until 4 years afterwards; his salary is 18,000 gold dollars per annum. Congress elects, for a term of one year, two substitutes, one of whom, failing the President during a presidential term, fills the vacancy.

President of the Republic.—General Pedro Nel Ospina. Elected February 10, 1922. Holds office from August 7, 1922, to August 7, 1926. Born July 24, 1858.

The ministries are those of the Interior, Foreign Affairs, Finance, Treasury, War, Public Instruction, Commerce and Agriculture, and Public Works.

Area and Population.

The area of the Republic is estimated at about 440,846 square miles. It has a coastline of about 1,109 miles, of which 641 miles are on the Caribbean Sea and 468 miles on the Pacific Ocean. The area and population of the 14 departments, 3 intendencies and 6 commissaries were, according to the census of 1918 (October 14), as follows (the capitals in brackets):—

	Area sq. miles	Census Population, 1918			
		Males	Females	Indians	Total
<i>Departments.</i>					
Antioquia (Medellín)	22,752	396,780	426,446	—	823,226
Atlántico (Barranquilla)	1,008	64,064	71,728	—	135,792
Bolívar (Cartagena)	22,320	216,513	240,598	—	457,111
Boyacá (Tunja)	16,460	311,300	342,567	3,300	657,167
Caldas (Manizales)	7,380	216,041	212,096	—	428,137
Cauca (Popayán)	20,403	116,182	122,109	488	238,779
Cundinamarca (Bogotá)	8,046	386,276	425,760	—	812,036
Huila (Neiva)	8,100	74,186	109,151	—	183,337
Magdalena (Santa Marta)	19,080	108,280	103,106	—	211,385

On December 4, 1903, Panama asserted its independence and was formed into a separate Republic. On April 6, 1914, Colombia signed a treaty with the United States, at Bogotá, agreeing to recognise the independence of Panama and receiving in return 25 million dollars (5 millions sterling) and certain rights in the Panama Canal zone. This Treaty was ratified by the United States Senate on April 20, 1921, and by the Colombian Congress on December 24, 1921. (See Introduction of THE STATESMAN'S YEAR-BOOK, 1915.) Most of the boundary line with Brazil is still undefined, and there are frontier difficulties with Peru. With Ecuador a boundary treaty was signed in 1917. The old frontier difference with Venezuela was settled by the Swiss Federal Council in 1922.

The capital, Bogotá (census population on July 15, 1918, 143,994; estimated population in 1921, 160,000), lies 8,600 feet above the sea. The chief commercial towns are Barranquilla (64,543), connected with the coast at Puerto Colombia by 17 miles of railway; Manizales (43,203); Cartagena (51,382); Medellín (79,146), a mining centre; Cali (45,825); Bucaramanga (24,919); Cúcuta (29,490), the last two being coffee centres.

Religion and Instruction.

The religion of the nation is Roman Catholicism. There are 4 Catholic archbishops, viz. of Bogotá, Cartagena, Medellín, and Popayán, the first having 4 suffragans and the other three 2 a-piece. One of the suffragan sees is Panamá, belonging to ecclesiastical province of Cartagena, and now also to the Republic of Panamá. Other forms of religion being permitted, so long as their exercise is 'not contrary to Christian morals nor to the law.'

There is a Ministry of Public Instruction which has the supreme direction of education throughout the Republic. Education is divided into primary, secondary, professional, artistic and industrial. In 1920 there were 5,317 primary schools with 337,315 pupils. In 1920 there were 73 secondary schools with 7,305 pupils; 28 professional schools with 2,784 pupils, and 35 art and trade schools with 1,606 pupils. There were also 27 normal schools with 1,231 pupils. The oldest University is that of Bogotá (founded 1572). This and the School of Mines at Medellín are national institutions. The other Universities are departmental. They are the Universities of Antioquia at Medellín (founded 1822), with 738 students in 1922, of Cartagena, of Popayán, and of Pasto. In 1917 these together had 2,488 students. For the working class there are many schools of arts and trades directed by the Salesian Fathers. There are other schools or colleges open under religious orders, and the school of fine arts has been reopened. Primary education is gratuitous but not compulsory. In 1921 the State spent 1,812,115 pesos on education.

The Republic possesses a national library, museum, and observatory at Bogotá.

Finance.

Revenue and expenditure for 6 years in gold pesos :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1917	13,859,395	19,647,659	1920	29,526,313	29,095,461
1918	12,265,143	19,089,574	1921	27,495,500	33,256,109
1919	34,364,595	34,235,862	1922 ¹	23,903,580	28,211,822

¹ Estimates.

The budget estimates for the year ending December 31, 1921, were as follows :—

Revenue	Gold Pesos	Expenditure	Gold Pesos
Emerald Mines of Muzo	1,000,000	Ministry of Interior	9,219,745
Salt Tax	1,100,000	Ministry of Foreign Affairs	793,145
Railways	600,000	Ministry of Finance	1,959,931
Telegraphs	1,285,000	Ministry of War	4,290,915
Customs	14,000,000	Public Instruction	1,812,115
Consular Dues	1,200,000	National Debt Service	6,530,429
Stamps	1,150,000	Public Works	6,803,943
Consumers' Tax	1,020,000	Agriculture & Commerce	1,845,886
Total (including all revenues)	27,495,500	To tal	33,256,109

The external debt on April 1, 1921, amounted to 4,048,540*l.*, made up mainly as follows :—Consolidated external debt of 1896 (1,565,600*l.*); five

per cent. Government bonds of 1906, specially secured on the Bogota-Sabana Railway (258,560*l.*), six per cent. external gold loan of 1911 (257,740*l.*), six per cent. external debt of 1913 (1,300,940*l.*), Puerto Wilches Railway Bonds (428,580*l.*) and Perier loan of 1913 (169,000*l.*).

The consolidated internal debt on June 1, 1921, was 2,848,260 gold pesos, and the floating debt 11,104,428 pesos.

Defence

Military service is compulsory, from 1 to 1½ years. The permanent army consists of 3 divisions of 2 brigades of 2 regiments of infantry; total 12 infantry regiments; 1 cavalry regiment of 4 squadrons; 1 artillery section; 1 engineer battalion; 1 transport battalion of 3 companies. The peace effective is about 6,000. In war time every fit Colombian is compelled to serve, and the war effective is about 50,000. The infantry are armed with rifles of the improved Remington pattern, with the French Gras rifle, and with the 88 pattern Mauser.

Colombia has 3 gunboats, 2 coastal guards, 2 river gunboats, and 3 modern Jarrow-armed launches.

Production and Industry.

Only a small section of the country is under cultivation. Much of the soil is fertile, but of no present value, from want of means of communication and transport. Coffee is the staple product; exports 1921, 140,708 tons, valued at 41,945,000 pesos. Tobacco is also grown; cotton is produced in Magdalena, Bolivar, Antioquia and Santander, and is beginning to be cultivated in Boyaca, Tolima, and Cundinamarca. Cotton area in 1918, 24,000 acres; production 2,750,000 lbs. Cocoa, sugar, vegetable ivory, tagua (or vegetable ivory nut), and dyewoods are produced, besides wheat, maize, plantains, &c. Banana cultivation is extending, and near Santa Marta a large amount of capital is invested in this industry. The rubber tree grows wild, and its cultivation has begun. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant on the Magdalena river, but little or no wood of any sort is exported. The Panama hat industry is making great strides; some 86 per cent. of the hats manufactured are sent to the United States. The total number of factories in Colombia in 1915 was 121, in which 12,406,000 dollars were invested. The principal manufacturing centres are Bogotá, Medellin, Barranquilla, and Cartagena.

The country may be divided into five sections:—(1) The Caribbean coast country is tropical, little agriculture is engaged in (except the raising of bananas in Santa Marta) but some cotton, sugar, and tobacco is grown. The region is good cattle country. (2) The Department of Antioquia is mountainous, the climate tropical and temperate, according to altitude. This is an important coffee and cattle country, and the centre of the gold-mining industry. (3) The central plateau (Bogota) has a temperate climate, the altitude being 8,000 feet. Agriculture and cattle raising are well suited to this region, and the coffee production is very large. (4) The Pacific coast section is mountainous, tropical and temperate according to altitude. It includes the Cauca River valley, especially adapted to agriculture and cattle raising. Among the products of the region are cacao, cattle, coffee, gold, and platinum. (5) The eastern section embraces the territory between the Mag-

dalena River and the Venezuelan border and north of the Bogota Plateau, it is mountainous, tropical, and heavily wooded. Its principal product is coffee.

Colombia is rich in minerals, and gold is found in all the departments. The mines are in Antioquia, Cauca, Bolivar, Tolima, and Narino. The number of gold mines known in Colombia is as follows: Antioquia 12,181, Narino 2,452, Caldas 2,610, Tolima 502, Cauca 641. Other minerals, more or less worked, are copper, lead, mercury, cinnabar (14 mines), manganese (7 mines), emeralds (32 mines), and platinum (first discovered in Colombia in 1735), which is found in abundance in the alluvial deposits of the Choco River and in the basins of the San Juan and Condoto Rivers. The emerald mines of Muzo and Coscuez belong to the Government. No statistics of their output are published, but they are said to yield 1,000,000 pesos worth of stones per annum. Nearly all the emeralds mined to-day come from Colombia. The Pradera iron works north-east of Bogotá have a capacity of 30 tons of pig iron daily, and manufacture wrought iron, sugar mills, castings, &c. In the immediate neighbourhood of the works are coal, iron, limestone, sand, manganese, and fireclay deposits, which render the locality highly favourable for the development of metallurgical industries. The salt mines at Zipaquirá, north of Bogotá, are a government monopoly and a great source of revenue, supplying most of the interior departments. The maritime departments use sea salt evaporated at the numerous natural salt pans along the coast. In several of the departments there are extensive deposits of coal and petroleum. On the coasts there are valuable pearl fisheries which the Government desires to concede for a term of years.

Commerce.

Imports and exports for 6 years :—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1916	5,784,505	6,330,855	1919	7,729,170	15,805,851
1917	4,922,380	6,378,534	1920	18,845,054	14,074,849
1918	3,406,800	7,545,712	1921	6,611,386	8,389,010

Trade by principal countries for 2 years in pesos gold :—

Imports			Exports		
	1918	1917		1918	1917
United States	12,497,77	13,096,193	United States	31,134,004	31,094,134
United Kingdom	5,934,635	5,645,697	United Kingdom	284,727	560,646
Spain	1,121,490	1,187,684	Panama	1,649,769	1,053,581
France	697,472	759,909	France	778,363	614,480
Italy	482,181	398,033	Italy	21,443	17,469

The principal articles of export (1921) were, in gold pesos :—Coffee, 41,945,052; hides, 975,851; bananas, 2,215,369; gold, 123,681; silver, 57,983; platinum, 3,505,990.

About 67 per cent. of the coffee exported from Colombia goes to the United States; cotton to Liverpool or Havre. The chief imports are food-stuffs (3,593,351 pesos in 1919), drugs (2,099,410 pesos in 1919), metals (8,664,176 pesos in 1919), and cotton goods (16,377,404 pesos in 1919).

SHIPPING, COMMUNICATIONS—MONEY, WEIGHTS, ETC. 805

The customs revenues in 1920 amounted to 17,478,955 pesos, as compared with 5,832,816 pesos in 1918.

Total trade between United Kingdom and Colombia for 5 years :—

	1913	1919	1920	1921	1922
	£	£	£	£	£
Imports from Colombia into U.K.	41,709	581,093	2,688,661	2,788,886	1,980,483
Exports to Colombia from U.K.	1,167,300	1,834,159	6,189,011	1,403,904	2,268,492

Shipping and Communications.

At Cartagena in 1918 there entered 263 vessels of 428,625 tons. Of these, 110 of 320,971 tons were American, and 26 of 66,242 tons British.

In Colombia there are 15 lines of railway (10 national, and 5 British companies), with a total length (1920) of 891 miles. Of the total, 466 miles have a gauge of 3 ft. ; the rest a metre gauge. The roads of Colombia are generally simple mule tracks, but the Government continues to improve the main roads, which can be used now by automobiles. There are many cart roads besides. Much of the inland traffic is by river, and the work of clearing and canalising the lower and upper Magdalena is being carried on. That river is navigable for 900 miles ; steamers ascend to La Dorada, 592 miles from Barranquilla. Tributaries supply 215 miles more of navigable water, and on these rivers 41 steamers, with a total tonnage of 7,696, regularly ply.

Postal facilities between Barranquilla and foreign countries are stated to be excellent, but as to internal services there are no recent statistics. In 1915, in the internal service there were 3,417,564 letters and post-cards transmitted, and 2,389,786 packets of printed matter, samples, and business papers. Parcels (1921), 75,675. Number of offices, 843. A British river-transport company has contracted with the Government to convey mails and passengers to and from the interior every three days. Other companies, British, German, and native, ply on the rivers.

There were 13,640 miles of Government telegraph lines in July, 1920 ; number of offices, 712 ; 46,709,066 telegrams were despatched in 1919.

Money, Weights, and Measures.

Under the Law of June 12, 1907, the monetary unit is a gold dollar equal to one-fifth of a pound sterling and of proportionate weight, the fineness being the same. Gold coins are 2½, 5, and 10 dollars. Silver coins are (900 fine) the half-dollar, and 20 and 10 centavos. Nickel coins for 1, 2, and 5 pesos (centavos) are legal tender. There are also notes representing gold dollars of 1, 2, 5, and 10 dollars respectively. Colombia has a gold coinage, and minting has already begun at the Mints in Medellín and Bogotá. In December, 1916, a law was promulgated authorising the Government to coin gold pieces in the mints of Bogotá and Medellín free of charge. On June 30, 1921, the total currency of Colombia was given as follows :—gold coinage, 26,438,897 pesos ; paper money (gold certificates), 10,160,931 pesos ; silver coinage, 7,544,360 pesos ; nickel coinage, 1,857,305 pesos ; and bills of old issues not presented for exchange, 213,123 pesos, making a total of 46,214,616 pesos. Besides this sum in legal tender, there were also in circulation on June 30, 1921 :—Treasury

certificates, 3,250,838 pesos; bank certificates, 1,704,013 pesos; certificates of the mint of Medellín, 579,412 pesos; and bonds and national notes, 1,410,000 pesos; notes of the Banco de Pasto, 524 pesos; which, added to the legal specie, gives a general total of 53,159,403 pesos.

The metric system was introduced into the Republic in 1857. In custom-house business the kilogramme, equal to 2,204 avoirdupois pounds, is the standard. In ordinary commerce the arroba, of 25 Colombian pounds, or 12½ kilos; the quintal, of 100 Colombian pounds, or 50 kilos; and the carga, of 250 Colombian pounds, or 125 kilos, are generally used. The Colombian libra is equal to 1·102 pound avoirdupois. The Colombian vara, or 80 cm., is still in some cases the measure of length used for retailing purposes, but in liquid measure the French litre is the legal standard.

Diplomatic and Consular Representatives.

1. OF COLOMBIA IN GREAT BRITAIN.

Minister and Envoy.—Dr. Ignacio Gutiérrez-Ponce (January 13, 1915).

First Secretary.—Alfonso Delgado.

Second Secretary.—Carlos A. Dávila.

Attaché.—Benjamin Casabianca.

Commercial Attaché.—Dr. Pedro Miguel Samper.

Consul-General.—D. Joaquín Orrantía.

Director of Bureau of Information and Trade Propaganda.—J. Medina.

There are consuls or vice-consuls at Liverpool, Southampton, Birmingham, Cardiff, Dundee, Glasgow, Newcastle, and Manchester.

2. OF GREAT BRITAIN IN COLOMBIA.

Envoy Extraordinary, Minister Plenipotentiary and Consul-General.—Lord H. A. R. Hervey. Appointed 1919.

Naval Attaché.—Capt. F. L. Tottenham, C.B.E. R.N.

There are vice-consuls at Barranquilla, Bogotá, Carthagena, Pasto, Medellín, and Santa Marta, and consular agents at Tumaco, Honda, and Buenaventura.

COSTA RICA.

(REPÚBLICA DE COSTA RICA.)

Constitution and Government.

THE Republic of Costa Rica, an independent State since the year 1821, and forming part from 1824 to 1829 of the Confederation of Central America, is governed under a Constitution promulgated on December 7, 1871, and modified very frequently since that date. Practically there was no constitution, but only dictatorships, between 1870 and 1882. The legislative power

is vested in a Chamber of Representatives called the Constitutional Congress, and made up of 43 deputies, being one representative to every 8,000 inhabitants. By the Election Law of August 18, 1913, universal suffrage was adopted for all male citizens who are of age and able to support themselves, except those deprived of civil rights, criminals, bankrupts and the insane. Voting for President, Deputies and Municipal Councillors is public, direct and free. The members of the Chamber are elected for the term of four years, one-half retiring every two years. The executive authority is in the hands of a President, elected for the term of four years.

President of the Republic.—Don Julio Acosta, elected on December 7, 1919; assumed office May 8, 1920, for a period of 4 years, under the Constitution of 1871.

The administration normally is carried on by six Secretaries of State, who are appointed by, and responsible to, the President. They are the Secretaries respectively of the Interior and Police; of Foreign Affairs, Justice, and Public Worship; of Public Instruction; of War and Marine; of Finance and Commerce; and a Secretary of Public Works.

Area and Population.

The area of the Republic is estimated at 23,000 English square miles, divided into seven provinces, San José, Alajuela, Heredia, Cartago, Guanacaste, Puntarenas, and Limón. The last Census was taken in 1892. According to the estimate for December 31, 1921, the population was 576,581. In 1920 it was made up as follows:—

Province	Population	Province	Population
San José . . .	141,342	Guanacaste . . .	45,148
Alajuela . . .	113,039	Puntarenas . . .	23,784
Heredia . . .	47,715	Limón . . .	23,777
Cartago . . .	73,568	Total . . .	468,373

There are about 3,500 aborigines (Indians).

The vital statistics for three years were as follows:—

	Marriages	Births	Deaths	Increase	Immigration	Emigration
1919	1,748	16,796	12,069	4,727	2,810	3,233
1920	2,725	18,066	13,420	4,646	6,040	5,280
1921	—	18,252	10,044	8,208	—	—

Of the total births in 1919, 51 per cent. were males and 49 per cent. females, and 25 per cent. illegitimate.

The population of European descent, many of them pure Spanish blood, dwell mostly around the capital, the city of San José (population, 1920, 38,930, with suburbs, 51,395), and in the towns of Alajuela (11,908), Cartago (17,402), Heredia (13,885), Liberia (2,596), Puntarenas (5,100), and Limón (10,231). There are some 18,000 coloured British West Indians, mostly in Limón Province, on the banana farms.

For the purpose of public health the country has been divided into 26 districts, superintended by medical men paid by the national Treasury. The Rockefeller Institute has established a branch in Costa Rica to combat ankilostomiasis, and the Medical Officer in charge is giving most valuable advice and work to the Costa Rican authorities.

Religion and Instruction.

The Roman Catholic is the religion of the State, but there is entirely religious liberty under the Constitution. The Archbishop of Costa Rica was consecrated in August, 1921, and he has under him the Bishop of Alajuela.

Elementary instruction is compulsory and free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In 1921, there were open 411 elementary schools; the teachers numbered 1,315, and the enrolled pupils 35,576. For secondary instruction there are at San José a lyceum for boys with 450 pupils in 1920, and a college for girls with 428 pupils. A normal school established in 1915 at Heredia has 285 pupils. The towns of Cartago, Alajuela, and Heredia, have each a college. For professional instruction there is a Medical Faculty, and also schools of Law, Pharmacy, and Dentistry.

Estimated expenditure on education, 1922, 2,614,647 colones.

Spanish is the universal language of the country.

Justice.

Justice is administered by the Supreme Court of Justice, two Appeal Courts, and the Court of Cassation. There are also subordinate courts in the separate provinces, and local justices throughout the Republic. Capital punishment cannot be inflicted. In 1920 there were 8,379 convictions of misdemeanour, and 1,011 of crime.

Finance.

The revenue and expenditure for five years have been as follows :—

—	1918	1919	1920	1921	1922 ¹
	£	£	£	£	£
Revenue . . .	760,943	1,137,446	1,707,577	1,051,792	941,623
Expenditure . . .	1,227,971	2,031,366	1,787,479	1,015,041	941,623

¹ Estimates.

The revenue is chiefly derived from direct taxation (land taxes), customs, liquors, and railways, posts, and telegraphs. The largest items of expenditure are finance, public instruction, and internal development.

The foreign debt of the Republic outstanding on December 31, 1920, was 2,911,595*l.*, made up of gold refunding bonds, 1911, of 2,000,000*l.* (1,586,660*l.* issued) and the French Loan of 1912, of 35,000,000 francs (33,421,500 francs

outstanding). The internal debt on December 31, 1920, amounted to 3,215,481*l*.

Defence.

Costa Rica has an army, including reserve and national guard, of 52,208 officers and men. The active army numbers 38,946, and consists of 3 brigades, 1 battalion, 3 companies, and 135 unclassified soldiers. The peace strength is 500 men, 5,000 in case of internal trouble, and the war strength is estimated at 50,000 militia, as every male between 18 and 50 may be required to serve. The Republic has also 1 motor launch on the Atlantic side and 1 on the Pacific side for Revenue purposes.

Production and Industry.

A considerable area of the country is high table-land, with a temperate climate, but the land along the coast is low, with tropical vegetation and a tropical climate. Agriculture is the principal industry. There are thousands of square miles of public lands in Costa Rica that have never been cleared, on which can be found quantities of virgin rosewood, cedar, mahogany, and other cabinet woods. The principal agricultural products are coffee (29,260,838 pounds was the production in 1921; quantity exported 13,366 metric tons valued at 998,733*l*.); and bananas, 95,400 acres (8,652,473 bunches valued at 827,988*l*. in 1920; 8,318,581 bunches valued at 1,511,369*l*. in 1921). There is a banana trade with New Orleans, New York, Boston, and the United Kingdom. Bee-keeping has been commenced; it is estimated that there are 3,000 hives in the Republic. The second industry of importance is that of gold and silver mining on the Pacific slope. Several districts are auriferous, and mining is carried on in the Abangarez, Barranca, and Aguacate districts. Deposits of manganese ore have been discovered in the Pacific province of Guanacaste. Maize, sugar-cane, cacao, rice, and potatoes are commonly cultivated. Some 2,700 acres are under tobacco. The distillation of spirits is a government monopoly. The live stock, in 1915, consisted of 347,475 cattle, 64,717 horses, 76,198 pigs, besides mules, sheep, and goats.

There are officially enumerated 3,296 factories and industries in the Republic, including coffee-drying establishments, starch, broom and wood-work factories. Electricity, derived from water power in the highlands, is widely used as motive power.

Commerce.

The value of imports into and exports from Costa Rica in 5 years (including coin and bullion) was as follows (in sterling 1 colon = 22*·*9*d*.):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports . . .	1,293,277	768,641	1,696,776	3,645,873	2,390,600
Exports . . .	2,447,777	1,980,526	3,652,587	2,563,929	3,095,548

For 1920 and 1921 the value of the chief imports and exports was as follows:—

Imports	1920	1921	Exports	1920	1921
	£	£		£	£
General merchandise	3,386,221	2,248,867	Coffee . . .	917,420	998,733
Cattle . . .	259,652	121,733	Bananas . . .	827,938	1,511,369
			Gold, Silver, etc. . .	200,754	161,660
			Cacao . . .	96,352	136,834
			Manganese ore . . .	20,078	4,598
			Hardwoods . . .	75,163	25,776
			Sugar . . .	271,600	125,293
			Hides and skins . . .	19,141	7,925

Of the import value in 1921, 52·92 per cent. was from the United States, 16·94 per cent. from the United Kingdom, 8·14 per cent. from Spanish America, 2·04 per cent. from Germany. Of the value exported, 68·12 per cent. went to the United States, 25·06 per cent. to the United Kingdom, and 3·18 per cent. to Spanish America.

Total trade between the United Kingdom and Costa Rica (Board of Trade Returns) for 5 years:—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Costa Rica into U.K.	314,626	968,528	1,023,953	1,585,632	1,727,528
Exports to Costa Rica from U.K.	53,311	112,424	604,038	250,071	199,064

Shipping and Communications.

There are no official figures available as regards Costa Rican shipping. On the Atlantic coast there are several small sailing vessels and power launches, and on the Pacific coast some motor launches.

In 1921 there entered the ports of the Republic 622 vessels of 849,524 tons. Limon is visited regularly by steamers of 4 shipping companies (2 British, 1 American, 1 Dutch) connecting it with ports of Europe and America. The steamers of the United Fruit Company are under the British flag. Two lines (1 British, 1 U.S.A., and also several small coasting "tramp" steamers between San Francisco and Canal Zone), visit the Pacific port of Puntarenas.

The railway system connects San José with the Atlantic port, and has been extended to connect the capital with the Pacific port. The length of railway is 402 miles—the Costa Rica Railway, 182 miles (main line and branches; San José to Limon, 103 miles); the Pacific Railway (state owned), 88 miles (San José to Punta Arenas, 73 miles), the Northern Railway, 65 miles, and the United Fruit Co. Railway, 67 miles. When the Railway system is completed, through rail communication will be established between Port Limon and the new port of Almirante in Panama. At San José there is an electric tramway of 8½ miles. In 1916 a road for motor traffic was completed between San José and Heredia, a distance of 7 miles. There is also a motor road between San José and Cartago, a distance of 13 miles. About 35 miles of motoring roads are now open.

In 1920 there were 301 post offices. The number of postal packets despatched and received was 3,944,504.

There were (1920) 1,840 miles of telegraph lines, with 122 telegraph offices. The number of messages in 1920 was 1,034,162. On December 31, 1920, there were 1,584 telephones; the telephone lines had a length of about 1,387 miles. Wireless telegraphy is working from Limon to Bocas del Toro (Panama) 60 miles, and to Bluefields, in Nicaragua, and to Colon, in Republic of Panama. Limon has a radius of 300 miles. The Government has a small wireless station at Colorado (mouth of R. San Juan, near Nicaraguan border).

Money, Weights, and Measures.

In October, 1914, the Banco Internacional de Costa Rica was established as a Government Bank of Issue. It is authorised to issue up to 19,000,000 colones in notes to bearer (guaranteed by Government 6 per cent. Bonds, un-issued balance of Costa Rica Gold Refunding Bonds of 1911, and other Government securities). The actual note circulation on March 31, 1921, was 15,536,008 colones, for which there was a gold reserve of 2,530,411 colones. There were also, in addition, silver certificates to the extent of 3,272,250 colones.

On October 26, 1896, an Act was passed for the adoption of a gold standard, the monetary unit to be the gold *colon*, weighing 778 grammes, .900 fine (value about 22·9*d.*). The U.S. gold dollar is worth 2·15 colones and the English sovereign, 10·45 colones. The new silver coinage consists of fractions of the colon, viz., 50, 25, 10, and 5-cent pieces .500 fine silver, which are legal tender up to 10 colons, copper being legal tender up to 1 colon. The copper coins are 10 and 5 cent pieces. There are also 50 and 25 cent and 1 and 2 colon notes (silver certificates). Gold and silver coins have practically disappeared from circulation; copper coins in circulation amount to 246,223 colones.

The metric system is now in use; the following are the old weights and measures:—

The <i>Libra</i>	=1·014 lb. avoirdupois.
„ <i>Quintal</i>	=101·40 „
„ <i>Arroba</i>	=25·35 „
„ <i>Fanega</i>	=11 bushels (imperial bushel).

The old weights and measures of Spain are in use in the country districts but the introduction of the French metric system is legally established and in general use.

On January 15, 1921, the Republic adopted as its standard time that of the meridian 90 degrees west of Greenwich.

Diplomatic and Consular Representatives.

1. OF COSTA RICA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary for Europe.—Manuel M. de Peralta (Paris).

Consul-General.—W. J. Le Lacheur.

There are Consular Representatives at Birmingham, Cardiff, Falmouth, Glasgow, Leeds, Liverpool, Manchester, Nottingham Southampton, Swansea.

2. OF GREAT BRITAIN IN COSTA RICA.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General.
—A. Percy Bennett, C.M.G. (who is also Minister at Panama, where he resides).

Consul.—F. N. Cox.

Consul at Port Limon.—F. Gordon.

CUBA.

Constitution and Government.

CUBA, except for a brief period of British occupancy in 1762, remained a Spanish possession from the date of its discovery by Columbus until December 10, 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris which ended the armed intervention of the United States in the struggle of the Cubans against Spanish rule. Cuba thus became an independent State. A convention which assembled on November 5, 1900, drew up a constitution which was adopted February 21, 1901, under which the Island assumed a republican form of government, with a President, Vice-President, a Senate and a House of Representatives. A law was passed in Washington authorising the President of the United States to hand over the government to the Cuban people upon the undertaking that they should conclude no treaty with a foreign power that would endanger the independence of Cuba, that no debts should be contracted

for which the current revenue would not suffice, that the United States should have certain rights of intervention, and be granted the use of Naval Stations. On June 12, 1901, these conditions were accepted. On February 24, 1902, the election of the President and Vice-President took place, and the control of the Island was formally transferred to the national government on May 20. The coaling stations of Guantanamo Bay and Bahía Honda were leased to the United States for 2,000 dollars annually, on July 2, 1903. A reciprocal commercial treaty, December 27, 1903, further strengthened the ties between Cuba and the United States. After political disturbances, an American Commission formed a provisional government in August, 1906, which was continued until January 28, 1909, when the national government was resumed after the institution of electoral reforms.

President.—Dr. Alfredo Zayas. Born February 21, 1861. Inaugurated May 20, 1921; term expires May 20, 1925.

Vice-President.—General Francisco Carrillo.

There is a Cabinet consisting of the Secretaries of State, of Justice, of War and Marine, of the Interior, of Finance, of Agriculture, Commerce, and Labour, of Public Instruction, of Public Works, and of Sanitation and Charity.

The National Congress is made up of a Senate (24 members, 4 for each province) and a House of Representatives (120 members, 1 for every 25,000 of the inhabitants).

The country is divided in six provinces (*Provincias*) and 112 municipalities (*Municipios*). The province is ruled by a Governor elected indirectly by the people and a Council; and the Municipality by an Alcalde (Mayor), and by a municipal council elected by the people of the town.

Area and Population.

Cuba has an area of 44,164 square miles, with a population, according to the enumeration of November, 1919, of 2,889,004. The area, population, and density of population of each of the six provinces were as follows:—

Province	Area	Population in 1919	Pop. per sq. mile
	Square miles		
Havana	3,170	697,583	220·1
Pinar del Río	5,206	261,198	50·2
Matanzas	3,256	312,704	96·0
Santa Clara	8,257	637,097	79·8
Camagüey	10,064	228,913	22·7
Oriente	14,211	730,909	51·4
Total	44,164	2,889,004	65·4

The population in 1919 has increased 261,369 over that of 1916. The whites formed 74·3 per cent. and the coloured 25·7 per cent. of the total population. There were in 1919, 1,530,509 males (53 per cent. of total) and 1,358,495 females.

For the year ending June 30, 1922, there were 128,177 immigrants.

The chief towns are Havana, 363,506; Cienfuegos, 95,865; Camagüey 98,193; Santiago de Cuba, 70,232; Guantánamo, 68,883; Matanzas, 62,638; Santa Clara, 63,151; Manzanillo, 56,570; Pinar del Río, 47,858; Sancti Spiritus, 58,843; Trinidad, 40,602; Cárdenas, 32,753.

Instruction.

Education is compulsory and free. In the interior regular circuits for special teachers who conduct classes in the higher subjects, travelling from school to school in succession, maintain a high standard of instruction in the rural districts. In 1921-22, 344,331 children were enrolled in the Government schools, which had 6,075 teachers. There were also 77 travelling teachers who taught 3,639 children; 67 night schools for working people with 6,179 pupils; and 1,166 teachers for special instruction, with 27,890 pupils. In each province the Government maintains a special Institute for advanced education. Annexed to these Institutes are the normal schools for training teachers. Near Havana there is a special school with a staff drawn from English public schools, on which the school is modelled.

University instruction is given at the University of Havana (founded in 1721), which in November 1919 had 2,272 students.

Finance.

Revenue and expenditure (budget estimates) for 5 years:—

	1917-18	1918-19	1920-21	1921-22	1922-23
	£	£	£	¢	£
Revenue . . .	9,335,988	12,892,000	20,827,417	18,228,000	11,127,670
Expenditure . .	8,830,640	10,878,973	20,827,417	16,076,982	10,970,420

The principal items of estimated income in 1922-23 are:—Customs Revenue, 29,000,000 dollars; internal taxes, 14,038,000 dollars. The principal items of estimated expenditure are:—War and Marine, 9,516,624 dollars; Instruction, 8,424,851 dollars.

The debt of the Republic of Cuba on July 30, 1922, amounted to 91,542,400 dollars, made up as follows:—Foreign debt, 51,703,500 dollars, and internal debt, 39,838,900 dollars.

Defence.

The military age is between 21 and 28, and the army is composed of 10,748 men, 579 officers and 42 cadets in the land forces. The navy consists of 2 cruisers, 16 gunboats, 4 submarine chasers, and 3 small auxiliaries. The strength of the navy is 807 men, 144 officers, and 25 cadets.

Production and Industry.

The staple products of Cuba are tobacco and sugar, but coffee, cocoa, cereals, and potatoes are grown, and a considerable trade is done in fruits and minerals. In 1919-20 the tobacco manufactured in Cuba was valued at 2,373,966 dollars. In the year ending June 30, 1919, 135,290,443 cigars and 9,037,301 boxes of cigarettes were exported. The sugar crop was in 1919-20, 3,728,975 tons; in 1920-21, 3,935,433 tons; in 1921-22, 3,996,189 tons. The total area of the sugar plantations is 1,384,812 acres. In 1919-20 there were 192 sugar mills. Rice growing has recently been started. The principal fruits exported were pineapples, bananas, citrus fruit, and coconuts. The production of honey in 1919-20 amounted to 185,091,864 gallons, valued at 5,552,755 dollars.

Cuba's production of rum in 1919 was 11,489,718 gallons, valued at 4,944,632 dollars, and of alcohol, 5,778,147 gallons, valued at 2,815,458 dollars.

On December 31, 1921, the live stock in the island consisted of 4,771,394 head of cattle, 858,527 horses, and 72,210 mules.

Cuba has forest lands, many of which are in private ownership, but the forests belonging to the State have an area of about 1,250,000 acres. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins, and oils. Cedar is used locally for cigar-boxes, and mahogany is exported. Many other hard woods are used for railway sleepers, carts, ploughs and other local purposes.

On June 30, 1920 the mining area of Cuba extended to 915,725 acres, and included iron (407,460 acres), copper (248,115 acres), oil (102,367 acres), manganese (42,125 acres), and asphalt (36,457 acres).

In 1920 there were in Cuba 314 commercial companies with a capital of 229,662,500 dollars.

Commerce.

The value of the imports and exports (including bullion and specie) for 5 years (1917, ending June 30, and 1918-1921 calendar years) were as follows :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports	54,514,611	59,524,443	71,326,138	111,403,338	71,287,019
Exports	73,369,102	82,665,050	114,603,919	158,801,757	55,626,148

The imports and exports were distributed as follows :—

Countries	Imports from		Exports to	
	1920	1921	1920	1921
	Dollars	Dollars	Dollars	Dollars
United States	404,885,767	265,548,658	626,915,178	222,541,281
Other American Countries	36,435,851	28,391,239	25,134,137	5,732,895
Germany	2,879,504	5,374,980	—	458,392
Spain	27,974,309	13,654,172	7,041,517	2,480,268
France	16,879,245	9,856,096	13,005,079	4,905,475
United Kingdom	17,703,999	17,128,166	98,354,736	27,232,572
Other European countries	7,784,300	6,750,639	17,961,254	4,441,235
All other countries	42,973,717	15,231,740	5,596,887	10,338,602
Total	557,016,692	356,435,099	794,008,788	278,130,740

The principal exports are sugar and tobacco; the principal imports foodstuffs, tissues and manufactures, machinery, metals and metal manufactures, and chemicals.

Total trade between Cuba and the United Kingdom (Board of Trade returns) for five years .—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Cuba into U.K.	22,519,576	17,882,831	26,184,440	6,488,329	10,610,400
Exports to Cuba from U.K.	1,964,736	1,983,027	7,249,917	1,898,277	1,888,137

Shipping and Communications.

In 1919, 89,436 vessels of 203,975,959 tons net entered and 88,789 vessels of 203,436,406 tons net cleared the ports of the Republic in the foreign trade. In the coastwise trade 14,684 vessels of 2,582,829 tons net entered, and 14,712 vessels of 2,584,211 tons net cleared. In 1919-20, 2,899 vessels cleared the port of Havana.

In Cuba there were, in 1922, 3,020 miles of railway—the United Railways of Havana, 874 miles; Cuba Railway, 647 miles; Cuban Central Railway, 360 miles, and Western Railway of Havana, 147 miles, being the greatest systems. The lines now connect the principal towns and seaports from Pinar del Rio in the west, to Santiago de Cuba in the east. The larger sugar estates have private lines extending to 2,790 miles, connecting them with the main lines. Several important railway extensions are projected. There are 1,536 miles of cart roads open to traffic on November 1, 1922. There are (1920) 749 post and telegraph offices, and nine wireless stations operated by the Government.

Currency and Banking.

On November 7, 1914, a law was published authorising a new coinage issue in Cuba with a gold peso of 1·6718 grammes (1·5046 grammes fine) as the monetary unit. The gold coins are the 20, 10, 5, 4, 2 and 1 peso pieces; the 20, 10 and 5 pesos pieces are of the same weight and value as the corresponding United States gold coins. Silver is coined in pieces of 1 peso, 40 cents, 20 cents, and 10 cents, while nickel coins of 5, 2, and 1 cent pieces are also issued.

The coinage of gold is unlimited, but silver must not be minted to the value of more than 12,000,000 pesos. The extent of the nickel coinage is to be determined by the National Executive. The United States coinage will still remain legal tender.

The total amount of currency on December 31, 1920 was as follows:—gold, 23,786,750 dollars; silver, 8,413,140 dollars; and nickel, 1,449,560 dollars; making in all 33,649,450 dollars.

The banks in the Republic are being liquidated by the legislation of January 31, 1921.

The metric system of weights and measures is in use.

Diplomatic and Consular Representatives.

1. OF CUBA IN GREAT BRITAIN.

Envoy and Minister.—General Carlos Garcia Vélez, K. B. E. (June 11, 1912).

First Secretary.—Dr. Rafael Rodríguez Altunaga.

Second Secretary.—Pedro Rodríguez Capote.

Acting Consul in London.—Dr. R. Cervino.

There is a Consul-General in Liverpool, and Consuls in Birmingham, Glasgow, Hull, and other towns.

2. OF GREAT BRITAIN IN CUBA.

Charge d'Affaires.—G. D. N. Haggard, O. B. E.

Naval Attaché.—Captain F. L. Tottenham, C. B. E., R. N.

British Vice-Consuls at Havana.—G. F. Plant and D. S. C. Gainer

There is a British Consul at Santiago, and Vice-Consuls at Cienfuegos, Camagüey, Antilla, Puerto Padre, and Cardenas.

CZECHOSLOVAKIA.

(ČESKOSLOVENSKÁ REPUBLIKA.)

THE term Czechoslovaks comprises two branches of the same Slav nation: the seven million Czechs (pronounced Tchechs) of Bohemia, Moravia, and Silesia, and the (approximately) two million Slovaks of Slovakia, who speak a dialect of Czech.

As early as the fifth century the Czechoslovaks inhabited, as an independent nation, the territories of the ancient Kingdom of Bohemia. Christianity was introduced very early in Slovakia and Bohemia by the Slav apostles, Cyril and Methodius, and the Czechs were among the early protagonists of Protestantism in Europe.

In 1526 the Czechs elected the Habsburgs to the throne of Bohemia, and the country thus became united through a common dynasty with Austria and Hungary. Soon after their accession to the throne the Habsburgs began to violate Bohemia's religious and national liberties, and this action eventually led to the Czech revolution of 1618 and the beginning of the Thirty Years' War. The Czech revolution was crushed completely at the White Mountain, near Prague, in 1620.

The literary revival of the Czech language, which commenced after the French Revolution, developed into a political movement in the 'forties, and since 1848 the Czechoslovaks have claimed the restitution of their ancient rights as an independent nation. The Czechoslovak State came into existence on October 28, 1918. On that day the *Národní Výbor* (National Council) took over the government of the Czechoslovak countries, including Bohemia, Moravia, Silesia, and Slovakia, which had hitherto belonged to the former Austro-Hungarian Monarchy. On November 14, 1918, the Czechoslovak National Assembly met in Prague, and formally declared the Czechoslovak State to be a Republic, with Professor T. G. Masaryk as its first President.

The Colours of the Republic are white, blue and red. The National Standard consists of an upper band of white and a lower band of red, between which a blue triangle is interposed.

The little Coat of Arms of the Republic is that of the former Kingdom of Bohemia, a red shield on which is a double-tailed silver lion rampant facing to the right, but the lion carries on his breast a little shield, on which is the coat-armour of Slovakia (a red shield with three blue mountains, on which stands a two-armed silver cross). On the coat-armour of middle size and on the great coat of arms there is in the centre the coat of arms of the former Kingdom of Bohemia, thereupon in all directions the shields of the other lands of the Republic.

Constitution and Government.—The Constitution of the Czechoslovak Republic was passed by the National Assembly on February 29, 1920.

According to the terms of the Constitution, the Czechoslovak State is a democratic Republic having an elected President at its head. The territory of the Republic forms a single and indivisible unity. The region of Carpathian Ruthenia will receive autonomy. The National Parliament, which constitutes the only legislative body for the whole of the Republic, is composed of a Chamber of Deputies elected for a period of six years and containing 300 members, and of a Senate comprising 150 members to be renewed every eight years. The two Chambers in joint congress will elect the President of the Republic for seven years, and the President, as head of the State, is supreme commander of the armed forces, and can declare war with the consent of Parliament. He appoints the higher officers and officials, exercises the right of reprieve, and is himself amenable to the laws only on a charge of high treason. He also appoints and recalls Ministers. The Constitution guarantees freedom of the press and of speech, and safeguards racial minorities, to whom it assures the maintenance of their schools.

The franchise for the Chamber of Deputies is open to all citizens, without distinction of sex, who are over 21, while all citizens over 30 are eligible for election. The franchise for the Senate is open to all citizens who are over 26; and all citizens over 45 are eligible for election. The electoral system is based on proportional representation.

The Constitution regulates the parliamentary elections on a 'closed scrutiny' basis, the votes being in favour of parties, not of candidates. The allocation of electoral areas is as follows:—Bohemia, 9 (for Chamber of Deputies), 5 (for Senate); Moravia and Silesia, 6 and 3; Slovakia, 7 and 4; Carpathian Ruthenia, 1 and 1.

The number of administrative districts to be set up is as follows:—Bohemia, 9; Moravia and Silesia, 6; Slovakia, 6.

At the elections held in April 1920, the following parties were returned to Parliament:—

Senate:—Socialists, 67; National Parties, 75; Czechoslovaks, 102; Germans, 37; Magyars, 1; and the Christian-Social party, Magyar-German, 2.

Chamber of Deputies :—Socialists, 136 ; National Parties, 145 ; Czechoslovaks, 199 ; Germans, 72 ; Magyars, 1 ; Magyar-German parties, 9.

President.—Thomas G. *Masaryk* (born in 1850 in Hodonin, in Moravia). Elected May 28, 1920.

The Czechoslovak Government, appointed on October 8, 1922, consists of the following Ministers :—

Prime Minister.—M. *Svehla*.

Minister of Foreign Affairs.—Br. *Eduard Beneš*.

Minister of the Interior.—M. *Malypetr*.

Minister of Finance.—Theodore *Becka*.

Minister of Commerce.—Ladislav *Novák*.

Minister of Public Works.—M. *Srba*.

Minister of Food Supplies.—Dr. *Franke*.

Minister of Railways.—M. *Stribrný*.

Minister of Health.—Mgr. *Sramek*.

Minister of Social Welfare.—Gustav *Habrman*.

Minister of Justice.—Dr. Jan *Dolonsky*.

Minister of Agriculture.—Dr. *Hodža*.

Minister of Education.—M. *Bechyne*.

Minister of National Defence.—František *Udržal*.

Minister of Posts and Telegraphs.—M. *Tucný*.

Minister for the Unification of Laws.—Dr. *Markovic*.

Minister for Slovakia.—Dr. *Kallay*.

Area and Population.—The Czechoslovak Republic consists of Bohemia, Moravia, Slovakia, Silesia, and Ruthenia (Sub-Carpathian Russia). Its frontiers have been defined by the Peace Treaties with Germany, Austria and Hungary, with the exception of a few districts, notably the Teschen coal area, in which plebiscite was to decide its allegiance. The intention of holding plebiscite was, however, abandoned, and the Ambassadors' Conference, on July 28, 1920, divided the Teschen district between Czechoslovakia and Poland. The area and population of the various provinces, according to the census of 1921, are as follows :—

—	Area in square kilometres	Area in English sq. miles	Population Feb. 15, 1921	Population per square mile
Bohemia ¹	52,053	20,008	6,670,578	331·9
Moravia ¹	22,303	8,611	2,662,845	309·2
Silesia ¹	4,421	1,707	671,611	393·4
Slovakia	49,014	18,924	3,000,701	158·5
Ruthenia	12,694	4,901	604,670	123·4
	140,485	54,241	13,610,405	250·9

¹ Including the small Austrian and German territories, which have been added by the Peace Treaty to Czechoslovakia.

Of the Czechoslovak citizens 8,761,834 are Czechs and Slovaks, 3,122,892 Germans, 746,809 Magyars, 459,349 Ruthenians, 75,705 Poles, 180,337 of Jewish nationality, and 24,680 others. There were besides 238,799 aliens.

The population of the principal towns in 1921 was :—

Prague	676,476	Ostrava	41,929	Kladno	19,104
Brno	221,422	Liberec	34,942	Pardubice	25,171
Píseň	88,447	Rudějovice	43,961	Olomouc	56,941
Bratislava	93,329	Ústí	39,815	Štávnice	13,249
Košice	52,699	Vitkovice	27,836	Nitra	19,107

Religion.—The majority of the population is Catholic. In 1921 the division of the population according to religion was :—Roman Catholics, 10,382,655 ; Greek and Armenian Catholics, 532,503 ; Protestants, 991,908 ; Greek Orthodox, 72,729 ; Old Catholics, 20,250 ; Jews, 353,664 ; other faiths, 6,888 ; and without any religion, 724,495.

In January, 1920, the reformed clergy of Czechoslovakia decided to withdraw from the jurisdiction of the Pope and to found a Czechoslovak Church, which had, according to the Census of 1921, 525,313 confessionists.

Instruction.—Instruction is compulsory between the age of 6 and 14. The schools may be divided as follows : (1) National Schools (Elementary and Advanced Public Schools) ; (2) Secondary Latin and Technical Schools (Gymnasias and Real-Schools) ; (3) Universities and Higher Technical Schools ; and (4) Trade and Arts, Commercial, Mining and Agricultural, and other special schools. There are practically no illiterates except in Slovakia.

The following table contains the data for elementary and advanced schools (public and private) in Czechoslovakia at the beginning of the school-year 1920-21.

	Elementary Schools (public and private)			Advanced Schools (public and private)		
	No. of Schools	No. of Pupils (boys)	No. of Pupils (girls)	No. of Schools	No. of Pupils (boys)	No. of Pupils (girls)
Bohemia	6,184	488,566	491,576	843	86,204	76,534
Moravia	2,872	211,969	214,281	377	29,137	27,343
Silesia	567	52,931	52,676	77	6,612	5,762
Slovakia	3,319	185,838	184,013	102	8,466	12,383
Ruthenia	475	27,094	26,749	10	622	980
	13,417	962,392	969,298	1,411	130,131	124,002

Of the 13,417 elementary schools, 8,553 (63·75 per cent.) were Czechoslovak ; 3,410 (25·42 per cent.) German ; 419 (3·12 per cent.) Ruthenian ; 814 (6·07 per cent.) Magyar ; 87 (0·65 per cent.) Polish ; 4 (0·03 per cent.) Rumanian ; 1 French ; and 129 (0·96 per cent.) miscellaneous. Of the 1,411 advanced schools, 978 (69·3 per cent.) were Czechoslovak ; 8 (0·6 per cent.) Ruthenian ; 398 (28·2 per cent.) German ; 19 (1·4 per cent.) Magyar ; 3 (0·2 per cent.) Polish ; 5 (0·3 per cent.) miscellaneous schools.

During the school-year 1921-22, there were in Czechoslovakia 57 gymnasias, 99 real-gymnasias, 3 higher real-gymnasias, 29 reform real-gymnasias, 78 real-schools, 36 lyceums for females, 68 teachers' institutes, 8 institutes for the instruction of female teachers in domestic economy, 9 institutes for the instruction of nursery governesses, and 1 secondary evening school, making a total of 388. In these schools were 103,489 pupils, of whom 26,033 were females. The public or state-aided schools of commerce were 267, in which were 29,474 pupils (10,180 females).

There are 4 universities in Czechoslovakia, and 4 technical high schools, with students as follows (winter term 1921-22) :—

Universities	Number of Students		Technical High Schools	Number of Student	
	Total	Females		Total	Females
Prague, Czech (1348)	8,339	1,352	Prague, Czech .	5,280	151
Prague, German	3,523	397	Prague, German	2,158	58
Brno, Czech . .	1,227	144	Brno, Czech . .	1,343	47
Bratislava, Slovak	518	37	Brno, German .	2,161	30

There are, moreover, 2 faculties not comprised in the University Association (in Prague and Olomouc); an academy of law; a high veterinary academy; a mining academy; a high agricultural college; an academy of arts; and a high commercial school (in Prague).

Justice.—The courts of the Republic are :—The Supreme Court of Justice and Court of Cassation sitting in Brno; 4 High Courts of Justice (Prague, Brno, Bratislava, Košice); 36 County Courts (besides the Commercial Court and the Penal Tribunal in Prague); and 423 District Courts, besides 3 special district courts.

There are also special courts for commercial, industrial, revenue and other matters.

A special Administrative High Court decides matters in dispute affecting the administration, *e. g.*, appeals against illegal decisions and regulations made by State authorities; in cases of conflict between the central State authorities and the organs of the provincial local government; in cases of claims made against the State or the local administration which have been vetoed by the administrative authorities.

Finance.—Budget estimates for three years in thousands of crowns :—

Year	Ordinary Revenue	Extra-ordinary Revenue	Total	Ordinary Expenditure	Extra-ordinary Expenditure	Total
1921	12,657,436	2,050,543	14,107,979	9,172,266	4,932,109	14,104,375
1922	17,290,600	1,593,609	18,884,209	13,125,932	6,546,038	19,671,970
1923	17,961,000	851,000	18,812,000	13,605,000	5,722,000	19,327,000

The main items of the Budget for 1922 are shown as follows :—

Revenue	Czechoslovak Crowns		Expenditure	Czechoslovak Crowns	
	Total	Of which extra-ordinary		Total	Of which extraordinary
Ministry of :—			Public Debt .	2,050,669,448	419,660,178
Finance .	10,511,406,250	948,778,571	Ministry of :—		
Posts and			National De-		
Telegraphs	962,930,500	25,033,000	fence .	3,118,846,222	1,107,311,848

Works	804,966,732	57,332,106	Railways .	4,660,257,600	1,352,132,960
			Public		
			Works	1,028,309,869	426,682,774
			the Interior	557,483,530	247,821,300
			of Foreign		
			Affairs .	287,472,613	46,421,186
			for Recon-		
			struction.	601,135,462	601,135,462

The total national debt of the Czechoslovak Republic, according to the Budget for 1922, is given as follows :—(1) Debts contracted by the Czechoslovak Republic, 23,870,528,333 crowns (6,867,550,300 crowns, internal state loans ; 8,262,702,035 crowns resulting from the regulation of the currency ; and 8,740,275,998 crowns, foreign state loans) ; (2) Debts imposed on the Republic, 16,250,000,000 crowns (6,500,000,000 crowns, approximate pre-war debt ; and 9,750,000,000 crowns, reparations) ; making a total of 40,120,528,333 crowns.

A Board of Audit and Control was constituted by an enactment of March 20, 1919. It is charged with the superintendence of State economy, the State property and the national debt. This Board has an equal standing with the Ministries and is independent of them. Its president is nominated, at the request of the Government, by the President of the Republic.

Defence.—The organisation of the Czechoslovak Army is at present provisional. The system prevailing in the Austro-Hungarian army at the moment of the collapse of the Monarchy was temporarily adopted. On March 19, 1920, Parliament adopted a Bill enacting universal military service for men between the ages of 20 and 50. Active military service is for the present 24 months ; in 1923 it will be 18 months ; and from 1926 onwards it will be 14 months. During mobilisation and war all citizens between the age of 17 and 60 are obliged to do all that is necessary for the defence of the country. This system may be temporary, for the Republic may later arrange a system of militia. The army is organised in 10 divisions, and divided into 5 military districts, which on mobilisation will provide army corps. The peace strength in 1922 was 150,000, and the military budget amounted to 2,011,354,374 crowns.

There is a small defensive force consisting of 6 patrol vessels and tugs on river service.

Production and Industry.—The Czechoslovak territory is one of the richest in Europe, both as regards natural resources and industrial development. Agriculture is highly developed and intensive farming is carried on.

For the years 1920 and 1921, the area and the yield of the crops were as follows :—

Crops	Area (in acres)		Yield (in metric tons)	
	1920	1921	1920	1921
Wheat	1,573,212	1,557,306	717,465	1,152,756
Rye	2,238,155	2,103,642	836,756	1,361,939
Barley	1,716,458	1,615,441	810,768	1,033,574
Oats	1,981,263	1,965,769	865,879	1,075,387
Potatoes	1,499,331	1,575,791	5,002,549	4,329,166
Sugar-beet	518,735	546,200	4,780,537	4,071,655

In 1921, 546,200 acres were sown with beets, yielding 4,071,655 metric tons. The sugar-beet contains 17 to 20 per cent. of sugar and is the foundation of an enormous sugar industry. In 1920–21 there were 172 sugar factories in the country, which produced 722,995 metric tons of sugar. The export of sugar for 1921 amounted to 457,039 tons, valued at 3,748,751,409 crowns.

Hops of excellent quality are also grown, both for export and beer production (Pilsener). In 1921 Czechoslovakia produced 2,903 tons of hops. The agricultural industries include also flourishing beer, spirit, malt and Foodstuffs industries. In 1919-20 the country had 585 breweries producing 5,709,294 hectolitres of beer. In Bohemia, Moravia and Silesia there were, in 1920-21, 474 distilleries with an output of 417,667 hectolitres of spirits.

The number of live-stock, which has also been reduced by the war, was in 1920: Cattle, 4,351,794; horses, 587,630; pigs, 2,045,780; sheep, 982,258, and goats, 1,213,833.

Large quantities of fruit are exported. In 1921 the fruit crop yielded 172,365 tons of apples, 146,807 tons of pears, and 408,557 tons of stone fruit.

As regards forest wealth, Czechoslovakia ranks among the most richly wooded countries in Europe. The forests comprise 33 per cent. of the whole area (about 11,517,660 acres). In Bohemia there are 3,879,383 acres; in Moravia, 1,588,463 acres; in Silesia, 381,335 acres; in Slovakia, 4,098,487 acres; and in Ruthenia (Podkarpatska Rus) 1,569,992 acres. The annual yield is estimated at 565,024,000 cubic feet of timber.

The mineral production of the Czechoslovak Republic comprises both soft and hard coal (chief coalfields Brux-Komotau-Teplitz and Falkenau), iron, graphite, garnets. Gold, silver, copper and lead are found in the Carpathians, and rocksalt in Eastern Slovakia and Ruthenia. Coal production in 1921, 21,050,713 tons of lignite and 11,648,399 tons of hard coal. On January 1, 1922, there were 372 coal mines, employing 127,305 persons.

The number of factories in 1920 was 8,833. Of these, 1,999 were textile mills, 1,755 glass works and precious stone factories, 1,358 for food production, 674 for furniture and bent wood manufacture, 595 machine factories, 592 for metal manufacture, 297 paper mills, 458 chemical factories. Czechoslovakia holds eighth place in the world manufacture of cotton and sixth place among European countries. In 1921 steel production was 917,662 tons.

Commerce.—Imports and exports for 3 years are shown as follows (in thousands of crowns):—

	1919	1920	1921
Imports	6,555,418	23,384,412	22,435,536
Exports	5,323,621	27,569,415	27,312,189

Principal articles of import and export in 1921:—

Imports	Metric Quintals	1,000 Crowns	Exports	Metric Quintals	1,000 Crowns
Cereals	7,881,972	4,532,054	Sugar	4,570,388	3,748,751
Cottons	952,983	3,446,545	Fruit	703,156	657,789
Woollen Goods	295,693	2,066,207	Glass	1,357,900	2,072,702
Silk	9,018	475,805	Iron	2,034,806	1,288,561
Leather	50,180	380,758	Timber, Coal, and Peat	76,929,293	2,901,272
Chemicals	1,692,131	602,116	Woollens	120,964	4,184,128
Timber, Coal, and Peat	11,374,116	571,454			

Imports and exports in 1921 were distributed among the principal countries as follows:—

Country of Origin or Destination	Imports		Exports	
	Metric Quintals	1,000,000 Crowns	Metric Quintals	1,000,000 Crowns
Belgium	379,778	444	238,379	290
France	318,991	638	1,727,577	1,317
Italy	862,855	733	1,464,298	921
Yugoslavia	606,431	367	1,334,552	2,000
Hungary	2,519,072	926	13,287,425	3,066
Holland	917,132	1,106	787,893	567
Germany	18,939,796	5,862	36,252,023	3,061
Poland	1,444,062	334	3,596,853	1,424
Austria	3,180,697	1,983	33,381,463	7,835
Rumania	886,856	481	816,229	1,175
Switzerland	66,096	316	805,215	520
Great Britain	979,347	1,341	1,560,442	2,104
United States of America	3,777,414	4,547	266,495	771
Other Countries	5,033,216	3,365	1,908,510	2,253
Total	39,911,743	22,433	97,427,354	27,312

Total trade between the United Kingdom and Czechoslovakia for 2 years (according to Board of Trade returns):—

	1921	1922
Imports from Czechoslovakia into U.K.	£ 5,503,149	£ 5,226,264
Exports to Czechoslovakia from U.K.	1,317,696	744,457

Communications.—On January 1, 1922, there were 14,030 kilometres or 8,718 miles of railway line in the Republic, of which 5,305 miles are owned by the State and the remaining 3,413 miles privately owned, and 72 miles owned by foreign States. Of the State railways 801 miles are double-tracked, and of the privately owned lines 199 miles.

The Peace Treaty vested the Czechoslovak State with the right to use certain wharves in the ports of Hamburg and Stettin. Of the waterways of the country, the Danube is the most important; its chief port is Bratislava (Pressburg). On the Elbe the two main ports are Usti (Aussig) and Decin (Teschen).

In 1920 there were 3,805 post offices and 3,397 telegraph offices, and 73,622 miles of telegraph wire; 6,993,626 telegrams were despatched. Number of letters handled, 15,000,000; number of parcels, 280,000. In 1920 there were 77,524 telephone stations and 138,482 miles of telephone wire.

Banking and Currency.—The main credit establishments of the country are the Raiffeisen Banks, the district agricultural credit banks, the municipal saving banks, and the civil credit banks, which deal with the savings of all classes of the population and satisfy their credit requirements. The financial system is supplemented by the Postal Money Order Office, which acts as intermediary in the payment of accounts, and has at its disposal all the post offices and the Clearing House at Prague. The banking

department attached to the Ministry of Finance is at present also acting as a joint stock bank pending the carrying out of the legislative measures already agreed upon. There are also several district joint stock banks, such as the District Bank of Bohemia, the Agrarian Bank of Moravia, the Land Credit Establishment of Silesia, the Mortgage Bank of Bohemia, the Mortgage Bank of Moravia, and the Communal Credit Establishment of Silesia. These banks have the right to issue bonds representing advances which have been made to the Government, to municipalities, or private individuals, the security for which is guaranteed in the form of a mortgage or other lien upon landed property.

The note circulation on December 23, 1922, amounted to 9,400,000,000 crowns; the metallic reserve was 817,000,000 crowns.

Diplomatic Representatives.

1. OF CZECHOSLOVAKIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Vojtech Mastný (appointed May, 1920)

Counsellor.—Jan Broz.

First Secretary.—F. Borek-Dohalský.

Second Secretaries.—Dr. Max Lobkovicz and Jaroslav Císár.

Attaché.—Ivan Laichter.

Commercial Attaché.—L. K. Neumann.

Consul in London.—Dr. P. Pavlasek.

2. OF GREAT BRITAIN IN CZECHOSLOVAKIA.

Envoy Extraordinary and Minister Plenipotentiary.—Sir George Clerk, K.C.M.G., C.B. (appointed September 3, 1919).

Secretaries.—Hon. J. F. A. Cecil and B. H. Barber, M.C.

Commercial Secretary.—W. F. V. Scott.

Military Attaché.—Lt.-Col. Sir T. Cuninghame, Bart., D.S.O.

There are Consular Representatives at Prague and Bratislava.

Books of Reference.

DANZIG.

(DIE FREIE STADT DANZIG.)

By Article 102 of the Treaty of Versailles, the Principal Allied and Associated Powers undertook to establish the Town of Danzig with the surrounding territory as a Free City, to be placed under the protection of the League of Nations. The League of Nations also appoints a High Commissioner.

High Commissioner.—M. S. MacDonnell. Appointed February 2, 1923.

The Treaty further provides that a Constitution shall be drawn up, and this shall be placed under the guarantee of the League of Nations. Pending the elections to the Constituent Assembly, a State Council of three was appointed by the High Commissioner (March 5, 1920). This Council was increased to nine (March 25, 1920), to include representatives of the various political parties in the future Free City.

The elections for the Constituent Assembly took place on May 16, 1920, and resulted in the following strength of the political parties:—German National People's Party, 34; Social Democrats, 19; Independents, 21; Centre Party, 17; German Democratic Party, 10; Free Economic Association Party, 12; and Polish Party, 7. The elections were universal, direct, equal, and secret on the basis of proportional representation, suffrage being granted to all men and women belonging to the State of Danzig, who had attained 20 years of age, and who had been domiciled within Danzig territory on or before January 10, 1920.

The proclamation of the Freedom of the City and adjacent territory, as well as the coming into force of the Danzig-Polish Treaty, took place on November 15, 1920. According to this Treaty Danzig and Poland form a single customs territory. A further Treaty between Danzig and Poland was signed on October 24, 1921, providing for joint economic administration. Since January 1, 1922, the Polish-German customs frontier extends to the sea, *i. e.*, Danzig is a unit in the Polish customs administration.

The Constitution (approved by the League of Nations on November 17, 1920) provides for a *Volkstag* or Diet of 120 members elected for 4 years, and a Senate. This consists of a President, as Chairman, a Vice-President, and 20 Senators, the President and 7 Senators in main office being elected by the *Volkstag* for 4 years, the Vice-President and the other 13 Senators for the duration of the *Volkstag*. Election is by majority of votes. Any citizen over 25 years of age is eligible. Senators in main office may not accept any other public or professional appointment. They are also not allowed to become directors of any trading concern. The President of the Senate directs and supervises the whole routine of the Administration. The Senate is the highest State authority, and its meetings are not public. Plebiscites take place if demanded by a tenth of the voters. Any alteration of the Constitution by the *Volkstag* can only be effected by a two-thirds majority, with at least two-thirds of the Deputies present.

After the approval of the Constitution, the Constituent Assembly proclaimed itself the Parliament of the Free City of Danzig, with powers to enact legislation until 1923.

Area and Population.—The area of the Free City of Danzig is about 754 square miles, and population 365,000 on January 1, 1923, of which about 6 per cent. are Poles.

The territory contains a total of 325 localities, of which 252 are rural communes, 69 estate districts, and 4 cities. In addition to Danzig, whose administrative district has a population of 194,953, the following localities are cities :—Zoppot, 18,397 inhabitants ; Neuteich, 2,395 ; and Tiegenhof, 2,834. Several centres classed as rural communes or otherwise are considerably larger than most of the 'cities,' as appears from the following list :—Ohra, 12,347 ; Oliva, 11,706 ; Praust, 3,070 ; Emaus, 2,321 ; Bürgerwiesen, 2,324 ; Stutthof, 2,337 ; Brentau, Langenau, Steegen, Lichtenau, Liessau, and Schöneberg, between 1,000 and 2,000. The number of households in the territory is 82,798.

The Free City will have the following bathing resorts :—Zoppot, Oliva-Glettkau, Brösen, Neufahrwasser, Westerplatte, Weichselmünde, Heubude, Bohnsack, and Steegen.

The Free City has a total boundary line of 147 miles, of which 35 miles are on the sea. To the west the nearest Polish territory is but 5 miles from Danzig, as the crow flies.

Instruction.—In 1922 Danzig had the following schools :—9 high schools for boys, 10 for girls and 2 for boys and girls together ; 10 middle schools and 321 elementary schools. In the high schools there were 6,797 pupils (3,755 girls) ; in the middle schools, 4031 pupils (2,087 girls) ; in the elementary schools, 45,740 pupils (21,968 girls). Teachers in high and middle schools, 175 ; in elementary schools, 1,185.

The Technical High School had in the summer term of 1920 65 teachers and 864 students.

Finance.—For 1921 the Budget of the Free City of Danzig balanced at 497,832,000 marks.

Commerce and Shipping.—The total registered gross tonnage on January 1, 1921, was 82,886, comprising 26 steamships, 2 motor ships, and 2 sailing ships of over 50 tons burden each.

Shipping in 1921 : entered, 3,836 vessels of 1,967,000 tons.

For centuries Danzig has been a well-known grain market and shipping point. Its advantageous geographical situation at the mouth of the Vistula, its vicinity to the great German, Polish, and Russian grain districts, and its foreign shipping connections have placed it at times in the first rank. Sugar is next in importance to grain, and lumber ranks third as the commodities dealt in at Danzig. For lumber Great Britain is Danzig's best customer.

Communications.—Danzig is connected with Poland by three main lines:—Danzig to Warsaw, 204 miles; Danzig to Lodz, 263 miles; and Danzig to Posen, 192 miles.

The metric system is the sole legal system of weights and measures in Danzig.

DENMARK.

(KONGERIGET DANMARK.)

Reigning King.

Christian X., born September 26, 1870; son of King Frederik VIII. and Queen Louisa; married April 26, 1898, to Princess *Alexandrine* of Mecklenburg; succeeded to the throne on the death of his father, May 14, 1912.

Children of the King.

- I. Prince Christian *Frederik*, born March 11, 1899.
- II. Prince Knud, born July 27, 1900.

Brothers and sisters of the King.

- I. Prince *Carl*, born August 3, 1872; elected King of Norway, under the title of Haakon VII., November 1905; married July 22, 1896, to Princess Maud Alexandra of Great Britain; offspring Prince Alexander (now Crown Prince Olav of Norway), born July 2, 1903.
- II. Prince *Harald*, born October 8, 1876; married April 28, 1909, to Princess Helena of Sonderborg-Glücksborg; offspring Princess Feodora, born July 3, 1910; Princess Caroline Mathilde, born April 27, 1912; Princess Alexandrine Louise, born December 12, 1914; Prince Gorm, born February 24, 1919.
- III. Princess *Ingeborg*, born August 2, 1878; married August 27, 1897, to Prince Charles of Sweden.
- IV. Princess *Thyra*, born March 14, 1880.
- V. Prince *Gustav*, born March 4, 1887.
- VI. Princess *Dagmar*, born May 23, 1890; married November 23, 1922, to Lieutenant Jørgen Castenskiöld.

The crown of Denmark was elective from the earliest times. In 1448, after the death of the last male scion of the Princely House of Svend Estridsen—the Danish Diet elected to the throne Christian I., Count of Oldenburg, in whose family the royal dignity remained for more than four centuries, although the crown was not rendered hereditary by right till the year 1660. The direct male line of the House of Oldenburg became extinct with the sixteenth king,

Frederik VII., on November 15, 1863. In view of the death of the king without direct heirs, the Great Powers of Europe, 'taking into consideration that the maintenance of the integrity of the Danish Monarchy, as connected with the general interests of the balance of power in Europe, is of high importance to the preservation of peace,' signed a treaty at London on May 8, 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg, and to the direct male descendants of his union with the Princess Louise of Hesse Cassel, niece of King Christian VIII. of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction July 31, 1853.

King Christian X. has a civil list of 1,000,000 kroner. Annuities to other members of the royal house amount to 222,000 kroner.

Subjoined is a list of the Kings of Denmark, with the dates of their accession, from the time of election of Christian I. of Oldenburg:—

House of Oldenburg.

Constitution and Government.

The present Constitution of Denmark is founded upon the 'Grundlov' (charter) of June 5, 1915, as amended on September 10, 1920. This may in many respects be said to be a further development along the lines laid down in the 'Grundlov' of June 5, 1849, the charter which introduced the Constitution in Denmark. The amendments of September 10, 1920, are mostly of a formal character, necessitated by the incorporation of parts of Slesvig in 1920.

According to the present 'Grundlov,' the legislative power lies with the King and the 'Rigsdag' (Diet) jointly. The executive power is vested in the King, who exercises his authority through the ministers. The judicial power is with the courts. The King must be a member of the Evangelical-Lutheran Church, the official Church of the State. The King has not the right of declaring war or signing peace without the consent of the 'Rigsdag.' The 'Rigsdag' is composed of two bodies: the 'Folketing' (House of Commons) and the 'Landsting' (Senate). All men and women 25 years of age and with a fixed place of abode possess the franchise and are eligible for election. The 'Folketing' is at present composed of 149 members; 117 members are elected by the method of proportional representation in 23 districts. In order to attain an equal representation of the different parties, 31 'Tillægsmandater' (additional seats) are divided among such parties not having obtained sufficient returns at the district elections. One member is elected for the Faroe Islands by simple majority. The term of

the Legislature is four years, but the King has power to dissolve the 'Folketing' before the end of the four years. The members of the 'Landsting' are elected indirectly by the 'Folketing's' voters of 35 years of age in the following way. In every 'Folketing's' district electors in a number corresponding to the population are elected by the method of Proportional Representation. The whole country is divided into six 'Landsting's' districts. In each of these the electors elect a number of members of the 'Landsting,' between 10-12. In this way 56 members are elected; one is elected in the Faroe Islands. Moreover, there are 19 members elected by the former 'Landsting,' according to the system of Proportional Representation. The members of the 'Landsting' sit for a term of eight years. There are elections every fourth year for the half of those elected by the electors, while those elected by the 'Landsting' go out all at once after an eight years' term.

The members of the 'Rigsdag' receive 6,000 kr. or 8,000 kr. a year, according to whether their homes are in or outside the capital.

The Rigsdag must meet every year on the first Tuesday in October. To the Folketing all money bills must in the first instance be submitted by the Government. The Landsting, besides its legislative functions, has the duty of appointing from its midst every four years judges who, together with the ordinary members of the Høiesteret, form the Rigsret, a tribunal who can alone try parliamentary impeachments. The ministers have free access to both of the legislative assemblies, but can only vote in the chamber of which they are members.

The executive (appointed October 9, 1922), acting under the king as president, and called the State Council—Statsraadet—consists of the following departments:—

- The Presidency of the Council and Ministry of Finance.*—N. Neergaard.
- Ministry of Foreign Affairs.*—C. M. T. Cold.
- Ministry of the Interior.*—Oluf Kragh.
- Ministry of Justice.*—Svenning Rytter.
- Ministry of Defence.*—S. Branson.
- Ministry of Public Instruction and Ministry of Ecclesiastical Affairs.*—Jacob Appel.
- Ministry of Agriculture.*—Th. Madsen Mygdal.
- Ministry of Transport.*—M. N. Slebsager.
- Ministry of Commerce and Navigation.*—Jörgen Christensen.
- Minister without Portfolio.*—Klaus Bernlsen.

The ministers are individually and collectively responsible for their acts, and if impeached, and found guilty, cannot be pardoned without the consent of the Folketing.

Landsting, elected September, 1920:—32 Liberals, 22 Socialists, 13 Conservatives, and 8 Radicals.

Folketing, elected September, 1920:—52 Liberals, 18 Radicals, 48 Socialists, 27 Conservatives, 3 Trade Party, and 1 Slesvig (German Party).

In the year 1920 there were incorporated into Denmark parts of Slesvig which voted for Denmark at the plebiscite held in accordance with the Versailles Treaty of June 28, 1919 (made effective Jan. 10, 1920). The Northern Zone voted on Feb. 10, 1920, and 75,431 votes were cast for Denmark, and 25,329 votes for Germany. The Southern Zone voted on March 14, 1920, and 12,800 votes were given for Denmark, and 51,724 votes for Germany. The new Slesvig territories were incorporated on July 9, 1920, being officially named 'Sønderjydske Landsdele' (South Jutland Provinces).

For administrative purposes Denmark is divided into 22 counties (Amter), each of which is administered by a Governor (Amtmand). Moreover, the county is a municipal division with a county council superintending the rural municipalities (about 1,300). There are 88 urban municipalities with a mayor and a town council. Rural as well as urban municipal councils are elected direct by universal suffrage and Proportional Representation. Copenhagen forms a district by itself, and has its own form of administration.

Area and Population.

According to the census held on Feb. 1, 1921, the area of Denmark is 16,604 square miles (43,017 square kilometres), and the population 3,267,831, including North Slesvig with 1,538 square miles (3,984 square kilometres) and 163,622 inhabitants.

The following table gives the area and population of Denmark in 1921:—

Divisions	Area 1921 English sq. m.	Population 1921	Population 1921 per sq. m.
City of Copenhagen (Kjöbenhavn) }	28	561,344	20,048
without suburbs . . . }			
Islands in the Baltic	5,133	1,208,008	235
Peninsula of Jutland	11,443	1,498,479	131
Faeroe Islands	540	21,364	40
Total	17,144	3,289,195	192

The population (excluding the Faeroes) consisted of 1,591,628 males and 1,676,203 females in 1921. The total population at the census of 1921 was 3,267,831, showing an increase during 1916-21 of 1·22 per cent. per annum (excluding North Slesvig). In Denmark proper the town population has increased from 1,209,975 in 1916 to 1,336,525 in 1921; while the rural population has increased from 1,711,287 in 1916 to 1,767,687 in 1921. The population is almost entirely Scandinavian; in 1911, of the inhabitants of Denmark proper, 96·66 per cent. were born in Denmark, 0·07 per cent. were born in the Colonies, 0·15 per cent. in Norway, 1·45 per cent. in Sweden, 0·97 per cent. in Sleswig, 0·47 per cent. in other parts of Germany, and 0·23 per cent. in other foreign countries. The foreign-born population was thus 3·27 per cent. of the whole.

The population of the capital, Copenhagen (Kjöbenhavn), in 1921 was 561,344, or with suburbs, 666,159; Aarhus, 74,256; Odense, 49,469; Aalborg, 71,613; Horsens, 27,588; Randers, 26,495.

The following table gives the total number of births, deaths, and marriages with the surplus of births over deaths, for three years:—

Years	Total Births (living)	Still Births	Marriages	Deaths	Surplus of Births over Deaths
1919	68,722	1,715	25,073	39,590	29,132
1920	78,230	1,997	26,991	39,841	38,389
1921	78,808	2,003	26,774	36,195	42,613

Of the births in 1919, 10·43 per cent. were illegitimate; in 1920, 11·70; in 1921, 11·02. In 1918 there were 1,098 divorces; in 1919, 1,294; in 1920, 1,197.

Emigrants, chiefly to the United States, in 1919, 3,341; in 1920, 6,300; and in 1921, 5,309.

Religion.

The established religion of Denmark is the Lutheran, which was introduced as early as 1536. The affairs of the National Church are under the superintendence of seven bishops, who have no political character. Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

According to the census of 1921 there were 3,221,843 Protestants, 22,137 Roman Catholics (under a Vicar Apostolic resident in Copenhagen), 535 Greek Catholics, 5,947 Jews, 17,349 other or of no confession.

Instruction.

Elementary education has been widely diffused in Denmark since the beginning of the last century, and in 1814 it was made compulsory. The school age is from 7 to 14. In 1921 Denmark had 4,203 lower schools; of these 34 were maintained by the Government, 3,514 by the local communities and 655 were private institutions. The instruction in the public schools is mostly gratuitous. The number of pupils in the 4,203 schools was on January 1, 1921: 476,400. In 1922, 1,046 pupils were admitted to the university; of these 299 were girls. For higher instruction there are furthermore (1922): a veterinary and agricultural college at Copenhagen with 67 professors and teachers and 520 pupils; 250 technical schools with about 25,000 pupils; 21 training colleges for teachers with 1,600 pupils; 90 commercial schools with 14,400 pupils; 21 agricultural or horticultural schools and 59 *folkehøjskoler* or popular high schools (adult schools with about 8,900 pupils); a college of pharmacy (founded 1892) with 10 teachers and about 80 students; a school for dentists with 22 teachers and 140 pupils; a Royal academy of arts (founded 1754) with 22 teachers and about 300 pupils; a Polytechnic Institution (founded 1829) with 98 professors and teachers and about 1,400 students. The *folkehøjskoler* are all private, but to them and the agricultural schools the State annually makes a grant of about 1,160,000 kroner. The University of Copenhagen, founded in 1479, has 5 faculties, to all of which women are admitted on equal terms with men. It has about 100 professors and teachers, and about 3,200 students.

Pauperism and Old Age Pensions.

Ordinary *poor relief* is regulated by the law of April 9, 1891 (and its amendments) under which in 1918-19, 81,097 (2·7 per cent. of the population) were relieved at a cost of 34 million kroner.

Another law of 1891 concerning *Old Age Pensions* has been extended by enactments of 1902 and 1908 so as to provide for, and to regulate assistance granted to the aged poor. Recipients must be over 60 years of age, of good character, and must have, for the preceding 5 years, had their domicile in the country without receiving public charity. The assistance granted may be in money, or in kind, or by abode in a hospital.

It must be sufficient for maintenance and for medical attendance in case of illness. The estimate of the poverty of the recipient does not include private assistance unless amounting to over 100 kroner (about 5*l.* 13*s.*) a year. The subvention is paid by the commune of domicile and half of it is refunded by the State. For the year ending March 31, 1921, 102,570 persons were relieved, of whom 80,495 were principals and 22,075 dependants. The total expenditure was 59,555,000 kroner, of which one half was expended by the State.

According to a law of 1913 assistance without the loss of civil rights is granted to children living with their widowed mothers. The expenditure (divided between the municipalities and the State) amounted in 1920-21 to 2,796,000 kroner.

Justice and Crime.

The lowest courts of justice in Denmark are those of the hundred or district magistrates (*herredsfogder* and *birkedommere*) and town judges (*byfogder*). From these courts an appeal lies to the superior court (*Overret*), or court of second instance (*Vestre Landsret*), in Viborg with 12 judges, *Ostre Landsret* in Copenhagen with 17 judges and *Søndre Landsret* in Sønderborg with 4 judges. The supreme court (*Højesteret*) or court of final appeal, with a chief justice, and 12 puisne judges, sits in Copenhagen. Judges under 65 years of age can be removed only by judicial sentence.

In 1919, 3,958 men and 726 women were convicted of crimes and delicts. On March 31, 1920, 1,114 men and 60 women were in the penitentiaries of Denmark.

Finance.

By the terms of the Constitution of Denmark the annual financial budget called the '*Finanslovsforslag*,' must be laid on the table of the Folketing at the beginning of each session. As to the annual financial accounts called '*Statsregnskab*,' the Constitutional Charter prescribes them to be examined by four paid revisers, two of whom are elected by the Folketing and two by the Landsting. Their report is submitted to both Chambers which, after due consideration, pass their resolution generally to the effect that they have no remarks to make on the balance-sheet.

The following shows the actual revenue and expenditure for the four years ending March 31 and the estimates for 1922-23 (18.16 kroner = 1*l.*):—

Year	Revenue		Expenditure	
	Current	From State Capital	Current	For increase of State Capital
	£	£	£	£
1919-20 . . .	32,994,094	8,729,278	29,586,564	3,890,988
1920-21 . . .	27,702,715	8,643,897	30,842,010	11,402,440
1921-22 . . .	21,862,081	8,799,482	25,068,771	8,799,500
1922-23 ¹ . . .	20,871,643	378,368	18,901,202	2,238,422

¹ Budget estimates.

The following is an abstract of the Budget for 1923-24 :—

Current revenue	Kroner	Current expenditure	Kroner
Balance of domain revenues .	1,772,733	Civil list and appanages .	1,222,000
Balance of State under-taking .	8,934,679	Rigsdag .	2,750,000
Interest on outstanding debt .	8,418,661	Interest and expenses on State debt .	53,397,554
Balance of funds, etc. .	642,955	Council of State .	628,800
Direct and indirect taxes .	372,143,442	Ministry of Foreign Affairs .	5,978,645
Balance of lotteries .	2,488,132	Ministry of Ecclesiastical Affairs .	8,734,435
Separate revenues .	5,500,078	Ministry of Public Instruction .	67,151,511
		Ministry of Justice .	31,206,524
		Ministry of Interior .	71,503,511
		Ministry of Agriculture .	11,587,333
		Ministry of War .	32,058,640
		Ministry of Marine .	22,115,000
		Ministry of Finance .	31,460,083
		Ministry of Public Works .	6,861,298
		Ministry of Commerce and Navigation .	5,145,597
		Pensions .	15,346,100
Total revenue .	399,900,680 (22,216,704 $\frac{1}{2}$)	Total expenditure .	362,147,031 (20,119,279 $\frac{1}{2}$)

The actual expenditure of the Ministries of War and Marine respectively are shown for four years as follows :—

—	1918-19	1919-20	1920-21	1921-22
	Kroner	Kroner	Kroner	Kroner
Ministry of War .	87,151,377	38,544,748	42,791,648	41,268,727
Ministry of Marine .	38,874,971	25,373,081	32,443,592	31,478,946

An important feature in the administration of the finances of the kingdom is the maintenance of a reserve fund of a comparatively large amount. On March 31, 1919, it was 623,189 $\frac{1}{2}$; 1920, 533,335 $\frac{1}{2}$; 1921, 539,957 $\frac{1}{2}$; 1922, 560,093 $\frac{1}{2}$. The object of the reserve fund is to provide means at the disposal of the Government in the event of sudden occurrences.

The public debt of Denmark has been incurred in part by large annual deficits in former years, before the establishment of parliamentary government, and in part by railway undertakings and the construction of harbours, lighthouses, and other works of public importance. The following table gives the national liabilities for six years :—

Year ending March 31	Capital of Debt	Year ending March 31	Capital of Debt
	£		£
1917	32,726,974	1920	51,458,894
1918	33,519,930	1921	59,703,200
1919	43,361,483	1922	66,213,000

The debt is divided into an internal and a foreign. The total foreign debt amounted in 1922 to 29,436,300 $\frac{1}{2}$. The debt is at 3, 3 $\frac{1}{2}$, 4, 5, 6 and 8 per cent.

The investments of the State on March 31, 1922, including the reserve fund, the State railways, and the domains, amounted to 93,705,500 $\frac{1}{2}$.

The revenue and expenditure and the property and debt of Copenhagen and of the provincial towns and places, rural communes and county communes were as follows (year ending March 31) :—

1920	Current Revenue	Current Expenditure	Property	Debt
	£1,000	£1,000	£1,000	£1,000
Copenhagen with Frederiksberg . .	7,321	7,188	27,829	26,610
Provincial Towns and Places	3,926	3,639	16,338	12,674
Rural Communes . .	3,948	3,683	8,267	5,819
County Communes . .	1,492	1,580	2,620	2,317

Defence.

The Danish army is a *national militia*, resembling in some respects the Swiss army. Every able-bodied Danish subject is liable to serve in the army or navy, except the inhabitants of the Faroe Islands. Exemptions in Denmark are few, even clergymen having to serve.

Service commences at the age of 20 and lasts for 16 years. For the first 8 the men belong to the active army, and for the second 8 years to the reserve. At the time of joining, the recruits are continuously trained for 150 days in the infantry, 215 days in the field artillery, 245 days in the coast artillery, and 425 days in the cavalry. The engineers have 200 days, and the train 60 days' continuous training. In the case of about one-fourth of the men, their initial training is prolonged by periods ranging from 2½ to 3½ months, according to the arm of the service to which they belong. Subsequent training for all arms only takes place twice in the remaining eight years of army service, and then only for 28 days on each occasion.

The country is divided into one territorial command. There are 11 regiments of infantry, each of 3 battalions, 2 battalions of Life Guards, and 2 Landstorm battalions, making 37 battalions altogether: 3 regiments of cavalry, 3 regiments of field artillery, totalling 45 four-gun batteries: 1 battalion of coast artillery (7 companies), 4 battalions of engineers and a small flying corps. The field army consists of 3 divisions with a peace establishment of 33,000, a reduction having taken place in 1922. The effective strength of the active army is 60,000 men.

The abolition of the Copenhagen defences on the land side was resolved in March, 1920.

Infantry and mounted troops are armed with the Krag-Jorgensen 8 mm. rifle or carbine, field artillery with a Krupp gun, firing a 14·88-pound shell.

About 9,000 recruits are trained annually. The military budget for 1922-23 was 39,391,941 kroner.

A plan has been prepared by a committee for the reconstitution of the naval forces, which is likely to receive effect. The Navy is under the direction of the Minister of Defence. The coast defences are likely to be transferred to the Navy.

The fleet is maintained for purposes of coast-defence. It consists of three monitors, *Peder Skram*, *Olfert Fischer*, *Herluf Trolle*, each carrying a pair of 9·4-inch and four 6-inch guns; and one cruiser, *Niels Juel*, with ten 6-inch guns; a smaller monitor, *Skjold* (launched 1896), with one 9·4 and three 4·7-inch guns; 2 old cruisers, *Hejmdal* and *Gejser*, used for training purposes, 19 mine-layers, one sloop *Fylla* (ex-British *Asphodel*), 20 first-class

torpedo boats and 3 older ; 14 submarines. The Navy is now paying chief attention to submarines and flying-boats.

Production and Industry.

The soil of Denmark is greatly subdivided, owing partly to the state of the law, which interdicts the union of small farms into larger estates, but encourages, in various ways, the parcelling out of landed property, and leaves the tenant entire control of his land so long as the rent is paid.

Of the total area of Denmark 80 per cent. is productive ; about one sixth of the unproductive area is peat bogs. Of the productive area 6 per cent. is forest, and of the remainder less than one half is arable, and the remainder pasture and meadows. The acreage and production of the chief crops for two years were as follows :—

Crops	Area		Production	
	1921	1922	1920	1921
	Acres	Acres	Tons	Tons
Wheat	219,652	237,180	201,100	278,000
Rye	558,795	546,660	336,400	288,000
Barley	628,148	666,217	538,000	562,000
Oats	1,111,579	1,117,902	737,300	693,000
Mixed grain . .	479,193	464,796	365,700	346,000
Potatoes	207,925	204,206	1,233,300	1,360,000

On July 15, 1922, there were in Denmark 575,773 horses, 2,525,348 head of cattle, 441,875 sheep, 1,899,019 swine, and 19,100,000 hens.

According to statistics collected on May 26, 1914, there were 82,442 industrial factories and shops in Denmark, employing altogether 346,000 persons, of whom 229,000 were skilled labourers. Of the total establishments 15,400 factories used mechanical power. In 1921 there were in Denmark 7 distilleries whose output of brandy reduced to 100° amounted to 4,440,000 litres. In 1921 there were produced 1,562,000 litres of excisable beer, and 909,000 litres small beer, not excisable. In the same year 141,300 tons of beet-sugar were produced at 9 sugar factories, and 55,740 tons of margarine were manufactured at 67 factories.

In the Danish fisheries the total value of the fish caught was, in 1918, 2,318,866*l.* ; 1919, 3,006,222*l.* ; 1920, 2,350,167*l.* ; 1921, 1,980,000*l.* The fleet in 1921 consisted of 14,150 boats.

Commerce.

The following table shows the value, according to official returns, of the imports and general exports (excluding precious metal) for six years (18.16 kroner = 1*l.*) :—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1916	75,411,000	72,716,000	1919	139,980,000	51,042,000
1917	60,136,000	59,136,000	1920	168,833,000	87,500,000
1918	52,500,000	41,277,000	1921	90,843,611	81,368,944

The exports of home produce in six years were, in sterling :—1916, 65,407,111*l.*; 1917, 65,463,000*l.*; 1918, 38,666,000*l.*; 1919, 41,299,000*l.*; 1920, 88,391,000*l.*; 1921, 76,854,000*l.*

In 1921 the general imports and exports, and the special imports and exports (imports for consumption and exports of Danish produce or manufacture) were as follows (18.16 kroner=*l.*):—

1921	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 kroner	1,000 kroner	1,000 kroner	1,000 kroner
Food substances	355,107	321,086	1,223,288	1,187,094
Personal and domestic	195,768	165,182	45,159	10,445
Fuel	146,507	145,705	787	3
Fodder, manure, seeds	213,784	204,252	28,426	19,747
Raw products	315,067	272,059	104,233	68,585
Industrial products	427,923	402,508	135,748	105,695
Other goods	43,179	37,907	24,713	18,651
Total	1,697,431	1,548,699	1,564,404	1,410,220

The principal articles of import and export, with their respective values, were as follows :—

	1920				1921			
	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner
Colonial goods	153,102	132,371	63,456	39,722	84,915	74,552	17,789	7,757
Beverages	29,745	28,658	5,888	4,607	11,315	9,247	4,289	2,275
Textile manu- factures	380,566	299,831	120,069	14,709	143,431	116,411	35,934	5,096
Metals and hardware	351,832	326,466	66,385	35,527	154,552	145,347	28,301	17,840
Wood & manu- facture	121,687	118,415	14,089	9,849	59,659	57,511	5,789	3,339
Coal	418,837	418,638	221	—	120,009	119,285	755	—
Animals	11,072	11,021	114,853	114,800	15,698	15,157	112,631	112,229
Provisions, eggs, &c.	52,481	28,246	1,027,356	1,002,725	44,938	30,585	1,047,204	1,030,658
Cereals, &c.	126,666	114,452	33,766	20,319	159,556	154,990	30,900	25,118

The following table shows the distribution of Danish foreign trade :—

Countries	Imports (General).		Exports (General)	
	1920	1921	1920	1921
	Kroner	Kroner	Kroner	Kroner
Germany	532,219,000	461,748,000	326,471,000	211,187,000
United Kingdom	387,549,000	305,360,000	671,951,000	825,552,000
Sweden	189,904,000	97,989,000	358,270,000	139,351,000
Norway	73,460,000	40,589,000	184,400,000	82,266,000
United States	753,666,000	342,597,000	90,719,000	42,761,000
Rest of America	193,575,000	109,285,000	22,848,000	13,479,000
Holland	111,743,000	44,469,000	19,570,000	19,151,000
France	64,663,000	42,576,000	30,199,000	30,080,000
Danish Colonies	6,995,000	5,821,000	10,740,000	8,018,000

The treaties of Commerce and Navigation between Great Britain and Denmark, made in 1661 and 1670 and confirmed in 1814, provide for the 'most favoured nation' treatment.

The quantities and the values of imports, whether subject to duty or duty-free, and of exports, always duty-free, are verified by the Customs authorities. The countries where the goods have been bought and to which they are sold are recorded. The general trade comprehends all imports and exports; the special trade only imports for consumption, and exports of home produce. Usually the Customs authorities easily ascertain whether imports and exports belong to the general or the special trade, but sometimes the amount of imports for home consumption is determined merely by the excess of imports over exports.

The chief imports into and domestic exports from the United Kingdom from and to Denmark in two years (Board of Trade Returns) were:—

Imports into U.K.	1920	1921	Exports to Denmark	1920	1921
	£	£		£	£
Butter	11,762,845	15,084,605	Coal	4,747,590	2,987,243
Eggs	7,032,357	5,455,378	Cottons (piece goods)	3,891,779	693,813
Bacon	7,316,370	16,930,004	Woollen Goods	4,546,025	606,528

Total trade (Board of Trade returns) between Denmark and the United Kingdom for 5 years:—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Denmark to U.K.	4,469,504	9,256,508	31,165,965	41,365,144	40,309,506
Exports to Denmark from U.K.	3,383,859	34,448,171	30,583,167	10,033,658	12,451,767

Shipping and Navigation.

On December 31, 1921, Denmark (without colonies) possessed 797 vessels of 975,295 registered tons in her mercantile marine, of which 503 of 761,272 tons were steamers, and 101 motor ships of 150,854 tons. In 1920, 23,038 vessels of 3,269,268 tons cargo entered the Danish ports from foreign countries, and 23,944 vessels of 1,030,954 tons cleared.

Internal Communications.

Denmark proper (exclusive of Copenhagen) has (end of 1920) 4,713 miles of road, besides 23,654 miles of by-ways. There are (1920) railways of a total length of 2,662 English miles open for traffic in the kingdom. Of this total, 1,283 English miles belong to the State. The total value of the State railways (road, buildings, cars, etc.) up to March 31, 1921, was 548,822,488 kroner. The railways have a gauge of 4 ft. 8½ inches, except 128 miles of which the gauge is 3 ft. 3½ inches.

The Post Office in the year 1921-22 carried 230,242,450 letters and post-cards, and 191,447,804 samples and printed matter. There are 1,358 post-offices. The State telegraphs in 1921-22 carried 4,555,240 messages, of which 1,349,687 were internal. The length of State telegraph lines (March 31, 1922) was 9,531 English miles; number of offices 271. At the same date the railway telegraphs had 440 offices. On March 31, 1922, the length of telephonic wires of the State and the private companies was 562,473 English miles. In the year 1921-22 there were 396,925,600 telephonic conversations.

Money and Credit.

On July 31, 1922, the accounts of the National Bank balanced at 691,909,000 kroner. The assets included 228,304,000 kroner in bullion and specie. The liabilities included 432,306,000 kroner note issue, 27,000,000 kroner of capital, and 11,340,000 kroner reserve fund. In Denmark there are 193 other banks for commercial, agricultural, industrial, and other purposes. On March 31, 1921, there were 496 savings banks, with 1,533,286 depositors, and deposits amounting to 1,517,000,000 kroner, or about 990 kroner to each account.

The nominal value of the coin minted (including recoinage of worn pieces) in Denmark since 1873 is given as follows:—

Years ending March 31	Gold	Silver	Bronze	Total
	Kroner	Kroner	Kroner	Kroner
1873-1921	149,246,050	42,254,546	3,460,806	194,961,402
1922	—	3,167,279	79,475	3,246,754
Total (1873-1922) . . .	149,246,050	45,421,825	3,540,281	198,208,156

Money, Weights, and Measures.

The monetary unit, the *Krone* of 100 öre, is of the value of 1s. 1½d., or about 18 kroner to the pound sterling.

Gold coins are 20 and 10-kroner pieces. The 20-kroner piece weighs 8·870 grammes ·900 fine, and thus contains 8·0645 grammes of fine gold.

The 2-kroner silver piece weighs 15 grammes ·800 fine, and thus contains 12 grammes of fine silver. There are also 1 and 2 öre pieces of iron.

The standard of value is gold. Silver is legal tender up to 20 kroner.

The use of the metric system of weights and measures, under the law of May 4, 1907, became obligatory in Denmark in public offices on April 1, 1910, and generally on April 1, 1912.

Diplomatic and Consular Representatives.

1. OF DENMARK IN GREAT BRITAIN.

Envoy and Minister.—Count Preben Ferdinand Ahlefeldt-Laurvig (October 9, 1921).

First Secretary.—Urban Malthé-Bruun.

Secretaries of Legation.—Oscar O'Neill de Oxholm and Torben de Bille.

Naval Attaché.—Commander C. V. Evers.

Honorary Attaché.—Baron Paul J. Bertouch-Lehn.

Press Attaché.—C. E. Aagaard.

Consul-General, Counsellor of Legation and Commercial Adviser.—C. M. Rottböll.

There are Consuls at Belfast, Falmouth, Hull, Leith, Liverpool, London (C.G.), Manchester, Newcastle, and Vice-Consuls in several other towns.

2. OF GREAT BRITAIN IN DENMARK.

Envoy and Minister.—Earl Granville, G.C.V.O. Appointed November 11, 1921.

Secretary.—R. C. Parr.

Commercial Secretary.—R. M. A. E. Turner, O.B.E.

Naval Attaché.—Captain J. Wolfe Murray, D.S.O.

Military Attaché.—Colonel W. Robertson, D.S.O.

There are Consuls at Copenhagen, Thorshavn (Faroe Islands), and 17 other towns.

Colonies.

Greenland is the only colonial possession of Denmark. Its area is 46,740 English sq. miles, and its population in 1921 numbered 14,355. The largest settlement in Greenland is Sydproven, which had (1921 census) a population of 901, and the smallest is Skansen, in North Greenland, with 49 inhabitants. The imports from Greenland into Denmark in 1920 amounted to 2,517,000 kroner, and the exports from Denmark to 2,508,000 kroner. The trade of Greenland is a State monopoly.

ICELAND.

(ISLAND.)

Reigning King.

Iceland is united with Denmark by a personal bond of union under the government of King **Christian X.** (*see* Denmark).

Between 930 and 1264 Iceland was an independent republic, but by the 'Old Treaty' of 1263 the country recognised the rule of the King of Norway. In 1381, Iceland, together with Norway, came under the rule of the Danish Kings, but when Norway was separated from Denmark in 1814, Iceland remained under the rule of Denmark. Since December 1, 1918, it has been acknowledged as a sovereign State, and is united with Denmark only through the identity of the Sovereign.

King Christian X. has as King of Iceland a civil list of 60,000 kroner.

Constitution and Government.—By the Act of Union of November 30, 1918, Iceland is temporarily united with Denmark in certain affairs beyond the King's person.

According to the Act of Union, Denmark and Iceland are free, sovereign States, united by one King and by the agreement comprised in the Union Act. The order of succession is not to be altered without the assent of both States. In Iceland, Danish citizens enjoy the same rights as Icelandic citizens,

and in Denmark the latter enjoy the same rights as Danish citizens. But citizens of either of the States are exempt from military service in the other. Danish goods and products in Iceland and Icelandic goods and products in Denmark are treated no less favourably than those of any other country. Denmark takes charge of the foreign affairs of Iceland, and if Iceland so desires it, special Icelandic attachés or experts on Icelandic conditions may be appointed to Danish embassies and consulates, the expenses arising out of such appointments to be borne by Iceland.

An advisory Danish-Icelandic committee of six members is to be appointed to review Bills of importance to both States, and also to prepare Bills aiming at co-operation between the two States. After December 31, 1940, the Danish Parliament and the Icelandic Legislature may demand negotiations to be opened concerning the revision of the Union Act.

Denmark has informed the Powers that, in conformity with the Union Act, she recognises Iceland as a sovereign State.

The present constitution of Iceland is embodied in the Charter of May 18, 1920. By the terms of this Charter the executive power belongs to the King, and is exercised by him through responsible ministers, while the legislative power rests conjointly with the King and the Parliament, which is called *Althing*. The *Althing* is composed of 42 members, of whom 36 are elected for the term of 4 years by universal suffrage in constituencies, each electing one or two representatives by simple majority, except the capital, where 4 members are elected by Proportional Representation. The remaining 6 members are elected for the term of 8 years by Proportional Representation for the whole country. The franchise is enjoyed by all Icelandic citizens (men and women) of good reputation (unless they are indebted for poor-relief) who are over 25 years of age and have resided in the country during the previous 5 years. All voters are eligible as candidates, save only the superior judges.

The *Althing* is divided into two Houses, the Upper House and the Lower House. The former is composed of 14 members, viz. the 6 members elected by Proportional Representation for the whole country, together with 8 members elected by the whole *Althing* in common sitting out of the members elected by universal suffrage. The remaining 28 members form the Lower House. The members of the *Althing* receive payment for their services besides travelling expenses; members residing in the capital are allowed 8 krónur (8s. 11d.) per day, and members residing outside the capital 10 krónur (11s. 1d.) per day. This payment has temporarily been raised by 60 per cent.

The *Althing* must meet on February 15 in every year, unless it is convoked by the King at an earlier date. The Budget Bills must first be laid by the Government before the Lower House, but all other Bills can be introduced in either of the Houses. If the Houses do not agree they assemble in a common sitting, and the final decision is given by a majority of two-thirds of the voters, with the exception of Budget Bills, where a simple majority is sufficient. The ministers have free access to both Houses, but can only vote in the House of which they are members.

The executive power is exercised under the King by a ministry divided into 3 departments. The ministry, appointed March 15, 1922, is as follows:—

President of the Council and Minister of Justice and of Ecclesiastical Affairs—Siggurdur Eggerz.

Minister of Trade and Communications—Klemens Jonsson.

Minister of Finance—Magnús Jonsson.

The ministers are responsible for their acts. They can be impeached by the Althingi, and in that case their cause will be decided by the *Landsdómur*, a special tribunal, which can only try parliamentary impeachments.

For administrative purposes Iceland is divided into 16 provinces (*sýslur*), each governed by a chief executive functionary (*sýslumaður*). Each province forms one or two municipal districts with a council superintending the rural municipalities (about 200). There are also 7 urban municipalities with a town council, independent of the provinces, and forming by themselves administrative districts co-ordinate with the provinces. The municipal councils are elected direct by universal suffrage (men and women over 25 years of age), in urban municipalities by Proportional Representation, but in rural municipalities by simple majority.

Area and Population.—The following table gives the area and population of Iceland in 1920 :—

Divisions.	Area, English sq. m.	Population, 1920.	Population, 1920, Per sq. m.
The South-West	4,125	34,425	8·3
The Western peninsula	3,658	13,385	3·7
The North	13,695	22,900	1·7
The East	5,954	10,215	1·7
The South	12,277	13,754	1·1
Total	39,709	94,679	2·4

The growth of the population has been as follows :—

Year.	Population.	Increase per cent. annually.	Year.	Population.	Increase per cent. annually.
1880	72,445	—	1910	85,183	0·91
1890	70,927	0·21	1920	94,679	1·07

In 1920 there were (on preliminary estimate of population) 46,172 males and 48,518 females. The conjugal condition (likewise on preliminary estimate) was as follows :—

	Unmarried.	Married.	Widowed.	Divorced.
Males	30,498	13,776	1,681	217
Females	30,658	13,699	3,899	262

In 1920, 54,246 were domiciled in rural districts, and 40,444 in towns and villages (of over 300 inhabitants). The population is almost entirely Icelandic. In 1910 the foreign-born population numbered only 706, or 0·6 per cent. of the whole ; 360 were born in Denmark, 194 in Norway, and 152 in other countries.

The capital of Iceland, Reykjavik, had, in 1920 a population of 17,678 ; other towns are Akureyri, 2,575, Vestmannaeyjar, 2,426, Hafnarfjörður, 2,366, Ísafjörður, 1,980, Siglufjörður, 1,159, Seydisfjörður, 871

The following table gives the total number of births, deaths, and marriages, with the surplus of births over deaths, for three years :—

Years.	Marriages.	Total living Births.	Stillborn.	Deaths.	Surplus of Births over Deaths.
1919	620	2,335	64	1,169	1,166
1920	622	2,626	72	1,359	1,267
1921	562	2,581	81	1,465	1,116

Of the births in 1921, 12·9 per cent. were illegitimate (13·3 per cent. in 1920).

Emigrants, chiefly to Canada, 215 in 1912, 294 in 1913, 141 in 1914, and 7 in 1915.

Religion.—The national Church, and the only one endowed by the State, is Evangelical Lutheran. But there is complete religious liberty, and no civil disabilities are attached to those not of the national religion. The affairs of the national Church are under the superintendence of one bishop. At the census of 1920 only 463 were returned as Dissenters.

Instruction.—There is a University in Reykjavík, comprising 4 faculties (Theology, Medicine, Jurisprudence, and Philosophy). There is one grammar school, 3 public high schools, besides 2 ladies' schools, a school for elementary-school teachers, 2 schools of agriculture, a school of navigation, a commercial high school, and several other special schools. The elementary instruction is compulsory for a period of 5 years, the school age being from 10 to 14 years. Before the age of 10 the children are usually privately educated, at any rate in the country. In 1919-20 there were 209 elementary schools, with 318 teachers and 6,485 pupils. There are also several continuation schools for young people.

Pauperism and Old-Age Pensions.—Ordinary poor-relief is regulated by the law of November 10, 1905. Each community constitutes a poor district. In 1910 the number of paupers relieved was 2,149. The expenditure amounted to 7,500*l*.

There is in every community one Old-Age Pension Fund, to which all men and women from 18 to 60 years of age, to whom pensions are not otherwise secured, are bound to contribute, unless they are considered too poor to do so. In addition the funds receive a subvention from the State. Grants are made to infirm poor persons over 60 years of age who for the preceding 5 years have not received poor-relief. In 1915 there were granted subvention from the funds to an amount of 2,500*l*., and at the end of that year the total property of the funds amounted to 18,000*l*.

Justice and Crime.—The lower courts of justice in Iceland are those of the provincial magistrates (*sýslumenn*) and town judges (*bæjarfógetar*). From these there is an appeal to the Supreme Court (*hæstiréttur*) in Reykjavík, which has 5 judges.

Finance.—Revenue and expenditure for 6 years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1917	813,500	769,888	1920	916,300	887,212
1918	133,388	160,010	1921	707,698	669,702
1919	904,510	919,236	1922 ¹	406,357	515,959

¹. Estimates.**Budget estimates for the year 1923 :—**

Revenue	Krónur	Expenditure	Krónur
Taxes	2,140,000	Interest on State debt	729,400
Customs	3,210,000	Reduction of debt	379,914
Post and telegraphs	1,475,000	The civil list of the King	60,000
Monopoly of tobacco	200,000	Althingi and the central administration	453,080
Balance of domain revenue and shipping trade	190,050	Foreign Affairs	67,500
Interest on State assets	86,000	Justice, police, etc.	603,420
Other revenues	512,400	Sanitary affairs	695,556
		Communications	1,940,540
		Ecclesiastical affairs and instruction	1,305,188
		Science, literature, and art	219,150
		Trade, etc.	561,920
		Pensions	202,661
		Other expenditure	204,000
Total revenue	7,813,450 (480,256L.)	Total expenditure	7,922,329 (486,261L.)

The State possesses a comparatively large reserve fund invested in different loans. On December 31, 1921, it amounted to 1,871,000 krónur (about 103,000L.)

The public debt of Iceland has been incurred partly by the establishment of telegraph lines and other important public works, partly by increasing the means of the National Bank, but mainly owing to the extraordinary expenses caused by the European War (buying of ships and providing of commodities). The public debt was on December 31, 1921, 16,385,525 krónur (902,287L.). It is in a great measure a foreign debt, due to Danish creditors. The foreign debt amounted to 11,171,425 krónur, and the internal debt 5,214,100 krónur.

Defence.—Iceland possesses neither an army nor a navy, nor any fortifications, and according to the Act of Union of 1918 its permanent neutrality is established.

Production.—Of the total area of Iceland, about six-sevenths is unproductive, but only about one-quarter per cent. is under cultivation, which is confined to hay, potatoes, and turnips. In 1921 the total hay crop from cultivated and uncultivated land was about 2,800,000 cwt., the crop of potatoes 33,000 cwt., and of turnips 13,000 cwt. In the spring of 1921 the live stock was as follows :—Horses 49,300, head of cattle 23,700, sheep 554,000, goats 2,200.

The total value of the fisheries in 1918 was estimated at 30,570,000 krónur (about 1,683,000*l.*), whereof the cod fishery was valued at 27,720,000 krónur, the herring fishery at 2,570,000 krónur, and the shark fishery at 280,000 krónur.

Commerce.—Total value of imports and exports for 5 years:—

	1915	1916	1917	1918	1919
	£	£	£	£	£
Imports	1,446,089	2,157,689	2,398,475	2,259,235	3,445,239
Exports	2,182,442	2,208,552	1,636,300	2,083,050	4,130,703

The value of the leading imports and exports for 1919 was as follows (kr. 18'16 = 1*l.*):—

	Imports	Exports.
	Krónur.	Krónur.
Animals living and animal food	1,691,647	59,013,438
Cereals	7,154,967	7,894
Colonial produce	9,087,825	1,504
Textile materials	31,110	7,035,785
Yarn, rope, etc.	2,087,331	2,982
Textile manufactures	9,119,002	186,806
Skins, hair, etc.	305,391	4,277,414
Oils, tallow, etc.	3,604,448	4,037,918
Timber and wooden goods	3,514,673	15,631
Coal	4,811,815	—
Salt	5,974,744	—
Metals and hardware	2,229,905	3,700
Vessels, carriages, machinery, etc.	4,456,952	355,000
Other articles	8,995,722	75,512
Total	62,565,532 (3,445,239 <i>l.</i>)	75,013,584 (4,130,703 <i>l.</i>)

The following table shows the value of the trade with the different countries in 1919:—

	Imports from: 1919.	Exports to: 1919.
	Krónur.	Krónur.
Denmark	18,157,372	14,929,640
Great Britain	18,307,348	13,290,179
Norway	1,410,579	10,527,280
Sweden	1,780,819	8,251,806
Germany	1,253,566	95,946
Netherlands	736,938	—
Belgium	163,260	80
France	103,663	2,875,925
Spain	3,943,605	15,889,457
Italy	57,460	6,462,528
Switzerland	127,502	140
United States	16,503,518	2,675,679
Other countries	19,842	15,030
Total	62,565,532	75,013,584

The chief articles of import from Iceland to the United Kingdom (Board of Trade Returns) for 1921 were: fish, 225,991*l.*; oil, 18,359*l.*; horses, 25,463*l.* Chief articles of the United Kingdom exports to Iceland, 1921: coal, 45,963*l.*; cottons, 21,132*l.*; grain and flour, 17,038*l.*

Total trade (Board of Trade Returns) between Iceland and the United Kingdom for 5 years :—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Iceland to U.K.	869,372	534,215	514,181	273,192	207,291
Exports to Iceland from U.K.	813,700	493,206	1,021,557	319,190	385,752

Shipping and Navigation.—The mercantile marine of Iceland (above 50 net tons) was, in 1922, 42 steam vessels of 7,456 net tons, 8 motor vessels of 598 net tons, and 8 sailing vessels of 714 net tons: total, 58 vessels of 8,768 net tons.

In 1917, 178 vessels of 61,432 tons cargo entered the Icelandic ports from foreign countries.

Internal Communications.—There are no railways in Iceland. At the end of 1917 there were completed about 320 miles of carriage roads outside the towns.

There are 242 post offices.

The length of the telegraph and telephone lines at the end of 1921 was 1,545 miles. The wires had a length of 4,712 miles. There were 167 telegraph and telephone offices. Number of dispatches sent in the year 1921 was 167,694, of which 88,248 were internal. Number of telephone conversations was 305,335. The total receipts amounted to 1,151,185 krónur, and the total expenditure to 937,582 krónur, leaving a surplus of 213,603 krónur.

Money and Credit.—There are two banks in Iceland, *Landsbankinn* (The National Bank), which belongs entirely to the State, and *Íslands banki* (Bank of Iceland), a private joint-stock bank, which has the privilege of issuing notes beyond a fixed amount of State notes which the National Bank has in circulation. On December 31, 1921, the accounts of the National Bank balanced at 39,230,315 krónur. The liabilities included 750,000 krónur note issue and 3,345,019 krónur reserve fund. A special department for loans on mortgage is connected with the National Bank. The accounts of the Bank of Iceland balanced 51,294,684 krónur at the end of 1921. The assets included 4,090,468 krónur in bullion and specie. The liabilities included 7,053,085 krónur note issue, 4,500,000 krónur of capital, and 4,000,015 krónur reserve fund.

At the end of 1920 there were 49 savings banks with 20,886 depositors, and deposits amounting to 7,914,638 krónur, or about 379 krónur to each account.

Money, Weights and Measures.—According to the Act of Union of 1918, Iceland uses the coinage of Denmark. The Icelandic name of the monetary unit is *króna*, pl. *krónur*.

The metric system of weights and measures is obligatory.

Diplomatic and Consular Representatives.

1. OF ICELAND IN GREAT BRITAIN.

According to the Act of Union of 1918, Iceland is represented by the Diplomatic Representatives of Denmark.

2. OF GREAT BRITAIN IN ICELAND.

Consul at Reykjavík.—Asgeir Sigurdsson.

There are also consular representatives at Akureyri, Seydisfjörður, and Vestmannaeyjar.

ECUADOR.

(REPÚBLICA DEL ECUADOR.)

Constitution and Government.

THE Republic of Ecuador, which is situated in the north-west of South America, approximately between latitude $1^{\circ}40'$ north and 6° south, and between $69^{\circ}20'$ east longitude and 90° west, was constituted May 11, 1830, in consequence of a civil war which separated the members of the original Republic of Colombia, founded by Simon Bolivar, by uniting the Presidency of Quito to the Vice-Royalty of New Grenada, and the Captaincy-General of Venezuela, when they throw off the Spanish yoke. Under the present Constitution, promulgated December 28, 1906, the executive is vested in a President, elected for the term of four years, while the legislative power is given to a Congress of two Houses; the first consisting of thirty-two senators, two for each province (chosen for four years), and the second of 48 deputies, on the basis of one deputy for every 30,000 inhabitants, chosen for two years; both elected by adults who can read and write. The Congress meets on the 10th of August of every year at Quito, the capital, without being summoned by the Government. The election of the President takes place in a direct manner by the people. Under the present constitution there is no election for Vice-President. In case of death, or other cause of vacancy in the office of President, he is replaced (1) by the President of the Senate of the Last Congress, and (2) if he should also fail, by the President of the Chamber of Deputies.

President of the Republic.—Dr. José Luis Tamayo (September 1, 1920, to August 31, 1924).

The President, who receives a salary of 24,000 sucres a year, theoretically exercises his functions through a Cabinet of five ministers (Interior, Foreign Affairs, Public Instruction, Finance, and War) who, together with himself, may be impeached by Congress. Each minister receives a salary of 9,600 sucres a year. The President has the power of veto, but if Congress insist on a vetoed bill becoming law, he has no alternative but to give his assent to it. He may summon an Extraordinary Congress for a specified purpose, but he cannot dissolve the Chambers or shorten their sittings.

The Council of State is formed by the President of the Supreme Court of Justice, who presides over it; the President of the Court of Accounts; the five Secretaries of State who can report but not vote; two Senators; two Deputies; and three citizens elected annually by Congress and who, in order to be eligible, must have the qualifications necessary for being a Senator.

By the terms of the Constitution privileges of rank and race are not allowed to exist within the Republic. Until October 20, 1918, most of the Indians were virtually in bondage and peonage and debt servitude existed in its worst forms on the landed estates. But by a Legislative decree of that date peonage was abolished. By an edict of 1896 the Indians are exempted from paying tribute, and are admitted to citizenship.

The Provinces are administered by Governors, appointed by the Government; their subdivisions, or cantons, by political chiefs; and the parishes by political lieutenants. The Galapagos Archipelago is under the administration of a Territorial Chief, whose functions are the same as those of a Provincial Governor.

Area and Population.

Since the frontiers of Ecuador have not been settled, no definite figure of the area of the country can be given. Ecuador is said to have more boundaries than any other country, and there are maps of the Republic showing six different frontiers according to six different opinions. Taking the boundaries arranged with Brazil in 1904, with Colombia per Treaty of July 15, 1916, and those for Peru according to the Royal Decree of 1740, the area of Ecuador is 571,250 square kilometres (220,502 square miles). Taking its Peruvian boundary in accordance with the Protocol Pedemonte-Mosquera of 1830, its area is 443,750 square kilometres (171,287 square miles). The area of the Archipelago of Colon (Galapagos Islands) adds 7,430 square kilometres (2,868 square miles). The country is divided into 17 provinces and one territory—the Archipelago of Galapagos—officially called "Colon," situated in the Pacific Ocean about 600 miles to the west of Ecuador.

So far no exact census has been taken, but the population may be estimated at about 2,000,000. The bulk of the population is Indian; inhabitants of pure European blood are few; those of mixed blood are estimated at about 400,000.

The population of the Republic (1903) was distributed as follows among the provinces (capitals in brackets):—

Provinces	Population	Provinces	Population
Azuay (Cuenca) . . .	132,400	Loja (Loja) . . .	66,000
Bolívar (Guaranda) . . .	43,000	Manabí (Puertoviejo) . . .	64,100
Cañar (Azogues) . . .	64,000	Napo-Pastaza ¹ } . . .	80,000
Carchi (Tulcán) . . .	36,000	Santiago-Zamora ² } . . .	32,600
Chimborazo (Riobamba) . . .	122,000	Oro (Machala) . . .	210,321 ³
Esmeraldas (Esmeraldas) . . .	14,600	Pichincha (Quito) . . .	32,800
Colon ¹ (San Cristobal) . . .	400	Los Rios (Babahoyo) . . .	103,000
Guayas (Guayaquil) . . .	150,000	Tungurahua (Ambato) . . .	
Imbabura (Ibarra) . . .	68,000		
Leon (Latacunga) . . .	109,600	Total . . .	1,328,821

¹ Galapagos Islands, not a province, but a territory.

² Formed out of the former territory of Oriente, by legislative decree of November 25, 1920.

³ In 1922.

The chief towns are the capital, Quito (80,702), Guayaquil (100,000), Cuenca (30,000), Riobamba (12,000), Ambato, Loja, and Latacunga (each about 10,000), Bahía (5,000), Esmeraldas (4,000).

In 1921 there were 78,569 births, 11,328 marriages and 49,111 deaths. Increase of births over deaths, 29,458.

• Religion and Instruction.

According to the Constitution the State recognises no religion, but grants freedom of worship to all. The Catholic Church has one archbishop (Quito) and six suffragan bishops. Its income, in substitution for tithes, is annually provided for in the estimates. All members of the Episcopate are required to be Ecuadorian citizens. Civil marriages are obligatory in accordance with regulations prescribed by law of December, 1902.

Public instruction was organised in 1897 and improved in 1912. Primary education is gratuitous and obligatory. Higher education is carried on in the Central University at Quito (founded in the eighteenth century by the Dominicans), which has the faculties of medicine, pharmacy, science, and law; at the Guayas University, in Guayaquil, and at the Azuay University, in Cuenca. The two latter have faculties of medicine, pharmacy, and jurisprudence. Total number of students (1921-22), 680. There is also a law college at Loja. During the school-year 1921-22 there were 1,718 schools in operation in the Republic, 1,374 of which were Government schools, 159 municipal, and 185 private schools. The total attendance at these schools in 1921-22 was 108,920, and they had 2,548 teachers. There are 3 training colleges—2 at Quito and 1 at Guayaquil. Total expenditure on elementary education, 1921, 167,520*l.*; on secondary education, 123,708*l.*; and for the universities, 69,109*l.*; making a total of 360,337*l.* A German Scholastic Mission was invited on January 1, 1922, by the Ecuadorean Government to teach at the normal schools. The mission is composed of 9 male and 5 female teachers.

Justice and Crime.

The appellate courts are the Supreme Court in Quito, which is the highest tribunal and consists of 5 justices elected by Congress for a term of 6 years. The eight superior courts are located at Quito, Guayaquil, Cuenca, Riobamba, Ibarra, Ambato, Loja and Portoviejo. The first two are composed of 6 judges, the remainder of 3 judges each, all elected by Congress for 6 years. The Court of Accounts is empowered to audit and investigate all public accounts. In the Republics there are 359 parochial justices.

Finance.

Of the total revenue about 70 per cent. is derived from customs duties; 15 per cent. from taxes on cocoa, real estate, white rum, and tobacco; 6 per cent. from salt and the remainder mostly from excise, rents of State property, and the postal department. The revenue and expenditure for recent years are given as follows in sterling (1 sucre = 24*d.*), but the figures are not to be taken as representing the exact state of affairs:—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Revenue . . .	1,882,866	1,401,544	1,549,727	1,765,389	1,629,202
Expenditure . . .	1,796,496	1,588,771	1,850,526	2,035,685	2,145,031

On December 31, 1921, the foreign debt amounted to 3,671,328*l.* and the internal debt to 2,852,157*l.*, making a total of 6,523,485*l.*

Defence.

The Ecuadorian regular army has an establishment of 557 officers and 4,408 men. This force is composed of 3 regiments of artillery, 10 battalions of infantry, 3 squadrons of cavalry, and 2 battalions of sappers, which form the active army. Military service was made compulsory on May 24, 1921. The

regular infantry have the Mauser rifle; the artillery have Vickers Maxim, old-fashioned Krupps and new Ehrhards. The country is divided into 6 military districts. A military school is established at Quito. An Italian Military Mission contracted by the Government of Ecuador is at present instructing the Ecuadorean army. The mission is composed of 20 members and is headed by General Pirzio Biroli.

The Government has established at Duran an aviation school with Italian personnel. Several machines have been purchased by the Government, and some, including a hydroplane, presented by the foreign colonies resident in Ecuador.

The Navy consists of three vessels: The *Libertador Bolivar*, the *Cotopaxi*, a special vessel; and the *Tarqui*, a mine-laying torpedo boat.

Production and Industry.

Ecuador is divided into two agricultural zones: the coast regions and the lower river valleys, where tropical farming is carried on; and the hill country, the foothills, and the high mountain valleys, adapted to grazing, dairying, and the production of hay, grain, and the fruits and vegetables suitable to temperate climes. The staple produce of Ecuador is cocoa. It is estimated that the cocoa plantations in Ecuador embrace 150,000 hectares (about 375,000 acres), divided into 8,000 properties, with approximately 80 million cocoa plants. The production of cocoa was, in 1917, 812,466 cwts.; in 1918, 685,618 cwts.; in 1919, 676,776 cwts.; in 1920, 680,380 cwts.; and in 1921, 746,099 cwts. The largest cocoa estate in the country has been taken over by an English company. Coffee is also grown; the exports in 1920 were 3,494,521 lbs., valued at 91,691L. Rubber plantations have been formed in the Balzar and Tenguel districts and in Manabi and Esmeraldas, with more than a million trees. The rubber exports in 1920 amounted to 306,697 lbs., valued at 15,457L. But rubber is rapidly declining on account of the destructive methods employed in its collection. Other products are tagua (ivory nuts), tobacco, the annual yield of which is about 3,000 lbs.; and sugar. Mangrove bark (for tanning), alligator skins, and kapok (silk cotton tree fibre, *Bombax ceiba*) are exported in small quantities.

Ecuador is auriferous. At Pillzhum in Cañar rich silver ore is found, but is not now worked. Petroleum is found; the oil-fields of Santa Elena are being worked by two British Companies. The estimated annual production in the Republic is about 40,000 barrels. The country is known to be also rich in copper, iron, lead and coal; and sulphur exists in great quantities in the Chimborazo district and in the Galapagos Islands.

Excepting the inter-Andean plateau and a few arid spots on the Pacific coast, Ecuador is a vast forest. Roughly estimated, 10,000 square miles on the Pacific slope extending from the sea to an altitude of 5,000 feet on the Andes, and the Amazon Basin below the same level containing 80,000 square miles, nearly all virgin forest, are rich in dyewoods, cinchona trees, and other valuable timber.

Panama hats are made almost exclusively in Ecuador, the principal centres being Monticristi, Jipijapa and Cuenca. The monthly estimated production is about 700 dozen. The Government of Ecuador attempted to monopolise the hat business for its own people by placing a heavy export duty on "paja toquilla," but large quantities of the material still go to Peru, and Payta, Peru, where little "toquilla" is grown, is a strong competitor of Ecuador in the manufacture of Panama hats. There are flour mills, 13 sugar works, breweries, and chocolate factories.

Commerce.

The value of imports and exports for five years is given as follows in sterling (10 sucres = £1):—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports	2,094,001	1,669,063	2,400,769	4,017,451	2,348,518
Exports	3,355,791	2,749,946	4,322,055	4,989,193	3,396,889

In 1920 the chief exports were cocoa, 3,557,340*l.*; tagua, or ivory nuts, 587,864*l.*; hats, 77,465*l.*; coffee, 91,691*l.*; hides, 56,186*l.*; rubber, 15,457*l.* The chief imports in 1921 were woven goods, 570,660*l.*; foodstuffs, 248,793*l.*; machinery, 206,644*l.*; clothing, 105,269*l.* Of the imports in 1921, the value of 802,276*l.* was from the United States; 630,383*l.* from Great Britain; 81,298*l.* from Peru; 163,871*l.* from France.

The chief articles of import from Ecuador into Great Britain (according to Board of Trade returns) in 1921 consisted of cocoa of the value of 54,262*l.*; hides, 9,410*l.*; straw hats, 58,012*l.* The chief exports of British produce to Ecuador in 1921 were, cotton goods to the value of 292,770*l.*; woollens, 56,598*l.*; iron, wrought and unwrought, 42,486*l.*

Total trade between Ecuador and the United Kingdom for five years (according to Board of Trade returns):—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Ecuador into U.K.	142,240	1,230,780	1,666,882	170,090	241,876
Exports to Ecuador from U.K.	372,671	376,608	1,319,442	628,557	615,849

Shipping and Internal Communications.

In 1921 there entered at Guayaquil 340 steam vessels of 655,165 tons (97 vessels of 158,287 tons British), and cleared 338 vessels of 654,086 tons (97 vessels of 158,287 tons British). Guayaquil is visited by the steamers of nine European lines passing through Magellan's Straits, as well as by steamers plying only on the Pacific coast.

The roads of the country are mostly bridle-roads only, and often impassable for half the year. The one highway is from Quito towards Guayaquil, for a distance of 115 miles, but the work of thus connecting the capital and the port has long been discontinued. In 1917 it was decided to construct a road of 20 miles from Guayaquil to Pasquales on the Daule river. There is river communication throughout the principal agricultural districts on the low grounds to the west of the Cordillera by the rivers Guayas, Daule, and Vinces (navigable for 200 miles by river steamers in the rainy season), and other small affluents thereof.

A railway is open from Duran (opposite Guayaquil) to Quito (280 miles). The total length of Ecuadorean railways actually in operation (1921) is 413 miles. The journey from Guayaquil to Quito takes two days, with a stop at Riobamba, where the passengers spend the night; 12 hours trip first day and 9 hours second day. Railways for the development of local trade have been undertaken by several local authorities.

The total length of telegraph line (1915) is about 4,360 miles, Quito being connected with Guayaquil and the coast, with the Republics of Colombia and Peru, and by cable with the rest of the world. There are 152 telegraph stations through which 14,498,643 words were sent in 1921. In 1915 there were 2,926 telephone instruments in Ecuador (2,250 in Guayaquil) and 2,815 miles of wire. Wireless telegraphy has been installed. At present there are only in operation three stations: one in Quito, one in Guayaquil, and one in Esmeraldas. Further stations are projected at Manabí, Tulcán, Cuenca, Loja, San Cristobal (Galapagos Islands), and Oriental Region.

On January 1st, 1922, there were 217 post offices in the country.

Banking and Credit.

Ecuador having no mint, the coin of the country is minted in England, the United States, and Peru.

There is no national money in Ecuador, the circulating medium being issued wholly by the banks. Six banks are authorised to issue notes for circulation, viz. the Banco del Ecuador, capital 600,000*l.*, the Banco Comercial y Agrícola, capital 500,000*l.*, Banco de Descuento, capital 600,000*l.*, Banco del Azuay, capital 100,000*l.*, the Banco del Pichincha, capital 400,000*l.*, and the Compañía de Crédito Agrícola e Industrial, capital 120,000*l.* On June 30, 1922, there were in circulation in Ecuador bank-notes of the value of 1,635,079*l.* The following are the reserve funds of gold and silver specie held by the banks at that date: gold and silver coin, 1,042,305*l.*, funds abroad, 228,262*l.*, making a total of 1,270,567*l.* Excess of note circulation over specie is 364,512*l.*

Money, Weights, and Measures.

A law passed in 1898 provided for a gold standard, which was established on June 4, 1900. The new coinage consists of: the gold *condor* of 10 *sucrés* weighing 8.136 grams, and containing 7.3224 grams of fine gold (equivalent to the English sovereign), the silver *sucre* and its sub-divisions, and nickel and copper pieces. The *sucre*, so called from the likeness of Marshal Sucre (a former President) imprinted on the coin, is legal tender only up to 10 *sucrés*. In 1917 subsidiary nickel coins of 5 and 10 centavos were issued.

By a law of December 6, 1856, the metric system of weights and measures was made the legal standard of the Republic; but it is not adopted by commerce, the Spanish measures being more general. The quintal is equivalent to about 101 pounds.

The meridian of Quito has been adopted as the official time.

Diplomatic and Consular Representatives.

1. OF ECUADOR IN GREAT BRITAIN.

Minister.—Don Enrique Dorne y de Alsúa. (Resides in Paris.) Appointed 1916.

Attaché in Paris.—José de Icaza.

Attaché in London.—Lisimaco Guzmán Aspiazu.

Consul-General.—Pedro Miller Gutierrez (London).

2. OF GREAT BRITAIN IN ECUADOR.

Envoy Extraordinary and Minister Plenipotentiary.—A. C. Grant Duff, appointed August 1, 1920 (who is also Minister at Lima, Peru, where he resides, and for Chile).

Chargé d'Affaires and Consul-General in Quito.—R. C. Michell.

Vice-Consul in Quito.—H. L. Williams.

Consul at Guayaquil.—W. C. Graham.

EGYPT.

(MISR.)

EGYPT was originally part of the Turkish Empire. On December 18, 1914, a British Protectorate over Egypt was declared, and the next day a Proclamation was issued deposing 'Abbās Hilmi, lately Khedive of Egypt, and conferring the title of Sultan of Egypt upon Hussein Kamil, eldest living prince of the family of Muhammad Ali. The British Protectorate was recognized by France, Russia, Belgium, Serbia, Greece, Portugal, and the United States of America. Sultan Hussein Kamil died in 1917, and was succeeded by his brother. The Protectorate terminated on February 28, 1922, and the Sultan was proclaimed King on March 16, 1922.

King.

Fuad I. Ahmed Fuad Pasha, G.C.B., was born on March 26, 1868, son of the Khedive Ismail Pasha; became Sultan on October 9, 1917; married the Princess Nazli on May 24, 1919.

The present sovereign of Egypt is the eighth ruler of the dynasty of Muhammad Ali, appointed Governor of Egypt in 1805, who made himself, in 1811, absolute master of the country by force of arms. On April 15, 1922, the King issued a Rescript fixing the order of succession to the Kingdom of Egypt and declaring the Throne hereditary in the dynasty of Muhammad Ali. The Rescript confirms the Sultan's son, Prince Faruk, as Heir Apparent, and establishes the succession of Kings in the direct male line by primogeniture. Failing such direct line, it provides that the Throne shall pass first to the King's brothers and their direct descendants by right of age, whom failing to the King's uncles and their direct descendants by right of age, it being laid down that each new King establishes a new house and that the succession is vested in his direct line. The ex-Khedive 'Abbās Hilmi is expressly excluded, but without prejudice to whatever rights to the succession under the new law his direct and lawful male descendants may acquire.

Female members of the house and their descendants are excluded, also anyone who is not in possession of full mental powers, who is not a Moslem, or who is not the son of Moslem parents. The law empowers the King to deprive of the rights of succession any Prince marrying without his consent, or who is declared unfit to belong to the family. The King's majority is fixed at 18 years, and in the event of his being a minor when he succeeds a Regency Council will be appointed either by his predecessor under a secret seal to be opened after his death and ratified by Parliament, or in default by Parliament. This Council will consist of three members chosen from Princes, ex-Premiers, Ministers and ex-Ministers, and Presidents and ex-Presidents of whatever Houses of Parliament may exist.

The new Egyptian flag consists of three white crescents with their backs to the staff, each with a five-pointed white star between the horns on a red field. This flag was the personal standard of the Khedive, and now takes the place of the former national flag, which was distinguished from the Turkish by having a star of five instead of six points.

The predecessors of the present ruler of Egypt were—

	Born	Died	Reigned
Muhammad Ali, founder of the dynasty	1769	1849	1811-48
Ibrahim, son of Muhammad . . .	1789	1848	June—Nov. 1848
Abbas, grandson of Muhammad . . .	1813	1854	1848-54
Said, son of Muhammad . . .	1822	1863	1854-63
Ismail, son of Ibrahim . . .	1830	1895	1863-79
Muhammad Taufiq, son of Ismail . .	1852	1892	1879-92

Hussein Kâmil, son of Ismail . . .	1854	1917	1914-1917

Government and Constitution.

The administration of Egypt is carried on by native Ministers, subject to the ruling of the Sultan. From 1879 to 1883 two Controllers-General, appointed by France and England, had considerable powers in the direction of the

affairs of the country (Khedivial Decree, November 10, 1879). In the summer of 1882, in consequence of a military rebellion, England intervened, subdued the rising, and restored the authority of the Khedive. In this intervention England was not joined by France, and as a result, on January 18, 1883, the Khedive signed a decree abolishing the joint control of England and France. In the place of the Control, the Khedive, on the recommendation of England, appointed an English financial adviser, without whose concurrence no financial decision could be taken. The Khedivial Decree appended to and approved by the Anglo-French Convention of April 4, 1904, removed most of the restrictions which encumbered the management of Egyptian Finance. No modification may be introduced into the terms of the Decree without the assent of the signatory powers to the Convention of London of 1885.

In November, 1919, it was officially announced that the policy of Great Britain in Egypt was to preserve the autonomy of that country under British protection and to develop the system of self-government under an Egyptian ruler; and that the object of Great Britain was to defend Egypt from all external danger and interference by any foreign Power, and at the same time to establish a constitutional system in which, under British guidance, the Sultan, his Ministers, and the elected representatives of the people might in their several spheres and in an increasing degree co-operate in the management of Egyptian affairs. A mission under Lord Milner was sent to Egypt with the purpose of working out this policy. The Egyptian Government discussed with the British Government, at the end of 1921, the question of substituting for the protectorate a relationship which, while securing the special interests of Great Britain and enabling the latter to offer adequate guarantees to foreign powers, would meet the legitimate aspirations of Egypt, but no agreement was reached. Discussions were renewed early in 1922, and it was officially announced on February 28 that the Protectorate had been terminated and Egypt recognised as an independent sovereign state, the British Government reserving for future discussion the questions of security of communications in Egypt, defence, protection of foreign interests and of minorities, and the Sudan.

The Egyptian Ministry, constituted on November 30, 1922, is made up as follows:—

Prime Minister and Interior.—Tewfik Nessim Pasha.

Foreign Affairs.—Mahmud Fakhry Pasha.

Finance.—Yusuf Suleiman Pasha.

War.—Mahmud Azmy Pasha.

Education.—Yehia Ibrahim Pasha.

Communications.—Mohammed Rifaat Pasha.

Justice.—Ahmed Zulfikar Pasha.

Public Works.—Ismail Sîrry Pasha.

Agriculture.—Ahmed Ali Pasha.

This Ministry resigned in February 1923, and a successor had not yet been appointed in March.

The Legislative Assembly, instituted in July, 1913, consists of (i) the Ministers, (ii) 66 elected members, and (iii) 17 members nominated by the Government to represent certain minorities. The elections are indirect: every 50 electors choose an elector-delegate, and the electors-delegate elect the members of the Assembly, but are liable to be recalled before any fresh exercise of their functions. The members of this Assembly sit for six years,

their numbers being renewed one-third at a time every two years : they also receive payment. The Assembly can initiate legislation and must be consulted on all measures relating to loans, land-tax assessment, or modifications of the railway or irrigation systems. The Government, however, is not bound by the resolutions of the Assembly, and, in the event of a disagreement between the two about any proposed law, the Government can eventually enact the law in such form as it may think fit. The Assembly has the right of veto on new direct, personal or land taxes, which cannot be imposed without its sanction. The ordinary session of the Assembly is from November 1 to May 31. A new constitution is being drafted (February 1923), with a new electoral law, and providing for the establishment of Ministerial responsibility to Parliament.

The Provincial Councils were endowed in 1909 with the powers of applying bye-laws, authorising public-markets, fixing the number and pay of *ghaffrs* (village watchmen), and authorising the creation of *ezbas* (hamlets). They are the local authorities in connection with elementary vernacular education and trade schools. They consist of two elected representatives from each Markaz. The Mudîr is the *ex-officio* President of the Council.

Egypt Proper is administratively divided into 5 governorships (*muhâfzas*) of principal towns, and 14 *mudîrias* or provinces, subdivided into districts or Markazes.

In thirteen towns (Mansûra, Medinet el-Fayûm, Tanta, Zagazig, Damanhûr, Beni-Suêf, Mahalla el-Kubra, Minya, Mît Ghamr, Zifta, Kafr el-Zayât, Benha, and Port Said), Mixed Commissions have been formed with power to impose taxes on residents who have given an express consent to be taxed for municipal purposes.

In 41 other towns a third class of town council (Local Commissions) exists, but, in general, there is no power to impose local taxes, the revenue being derived from grants from the central Government, and receipts from water supply, slaughter houses, &c. During recent years, however, 22 of the Local Commissions have, with the express consent of foreigners and Egyptians, imposed local taxation for municipal purposes.

Governorships.

Area and Population.

The total area of Egypt proper, including the Libyan Desert, the region between the Nile and the Red Sea, and the Sinai Peninsula is about 350,000 square miles ; but the cultivated and settled area, that is, the Nile Valley and Delta, covers only 12,226 square miles. Canals, roads, date plantations, &c., cover 1,900 square miles ; 2,850 square miles are comprised in the surface of the Nile, marshes, and lakes. Egypt is divided into two

great districts—'Masr-el-Bahri,' or Lower Egypt, and 'El-Said,' or Upper Egypt.

The following table gives the area of the settled land surface, and the results of the census taken in March, 1917 :—

Administrative Division		Area in sq. miles	Total Population	Population per sq. mile
Governorates	Cairo	42	790,939	18,832
	Alexandria	19	444,617	23,401
	Damietta	11	30,984	2,817

The growth of the general population of the country is exhibited by the following figures :—

1800 (French estimate)	2,460,200	1897 (Census)	9,734,405
1821 (Muhammad Ali)	2,536,400	1907 (Census)	11,287,359
1846 (Census)	4,476,440	1917 (Census)	12,750,918
1882 (Census)	6,831,131		

The average annual increase from 1846 to 1882 was 1·25 per cent. ; from 1882 to 1897, 2·76 per cent. ; 1897–1907, 1·49 per cent. ; 1907–1917, 1·26 per cent.

Estimated population, March, 1922 : 13,551,000. Births registered, 1920, 558,609 ; deaths, 369,912 ; 1921, births, 558,898 ; deaths, 334,439.

The principal towns, with their populations, according to the results of the census of 1917, are :—Cairo, 790,939 ; Alexandria, 444,617 ; Port Said (including Ismailia), 91,090 ; Suez, 30,996 ; Damietta, 30,984 ; Tanta, 74,195 ; Mansura, 49,238 ; Zagazig, 41,741 ; Damanhûr, 47,867 ; Benha, 18,607 ; Shibîn el-Kôm, 24,604 ; Asyût, 51,431 ; Aswân, 11,293 ; Beni Suêf, 31,986 ; Faiyûm, 44,400 ; Sohâg, 20,760 ; Giza, 18,714 ; Qena, 23,357 ; Minya, 34,945.

Religion and Instruction.

In 1917 the population consisted of 11,658,148 Moslems; 854,778 Orthodox; 47,481 Protestants; 107,687 Roman Catholics; 14,416 other Christians; 59,581 Jews; 8,827 others. Thus Moslems formed 91·43 per cent. of the population; Christians, 8·03 per cent.; Jews, 0·47 per cent.; others, 0·07 per cent. The principal seat of Koranic learning is the Mosque and University of El-Azhar at Cairo, founded year 361 of the Hegira, 972 of the Christian era. In 1914 it had 405 professors and 9,749 students of Islam and subjects connected therewith. The Mosque of El-Ahmadi at Tanta had 113 professors and 2,860 students at the end of 1914. The Mosque of Damietta had in the same year 16 professors and 411 students, that of Dessûqi (Tanta), 16 professors and 280 students, and the Meshiakhat Olama of Alexandria 75 professors and 1,854 students. All these institutions are under the supervision of the Council of the University of El-Azhar.

There are in Egypt large numbers of native Christians connected with the various Oriental churches; of these, the largest and most influential are the Copts, the descendants of the ancient Egyptians; their creed is Orthodox (Jacobite), and was adopted in the first century of the Christian era. Its head is the Patriarch of Alexandria as the successor of St. Mark. There are three metropolitans and twelve bishops in Egypt, one metropolitan and two bishops in Abyssinia, and one bishop for Khartum; there are also arch-priests, priests, deacons, and monks. Priests must be married before ordination, but celibacy is imposed on monks and high dignitaries. The Copts use the Diocletian (or Martyrs') calendar, which differs by 284 years from the Gregorian calendar.

The following table shows the proportion of illiterates in the various religious communities (1917 census):—

Religion	Population	Number illiterate per 1000		
		Males	Females	Total
Moslems	11,658,148	901	994	947
Orthodox	854,778	739	920	829
Catholics and Protestants .	155,168	505	556	531
Jews	59,581	481	642	562
Others	23,243	912	955	934
Total	12,750,918	864	979	921

Until 1897, Government initiative in the matter of education was limited to supplying a Europeanised course of education designed to fit Egyptians for various branches of the public service and for professional careers. This system of schools, which owes its origin to the Europeanising zeal of Muhammad Ali Pasha, the first viceroy, consists of Primary Schools, Secondary Schools, and Professional Colleges (Law, Medicine, Engineering, Veterinary, Military, Teaching, Accountancy and Commerce, and Agriculture), in addition to a number of special schools.

Scattered throughout the country there have existed from time immemorial a number of indigenous schools called 'Maktabs.' In 1897, the Ministry of Education endeavoured to bring these independent 'Maktabs' voluntarily under Departmental supervision by means of a system of inspection and reward. Government aid was made dependent upon daily instruction being given in reading, writing, and arithmetic, apart from any religious teaching, and upon the school reaching a satisfactory level of

efficiency. The extent to which the scheme has developed is shown in the following table :

Year	Maktabs awarded grants-in-aid and under inspection					
	Number of Maktabs	Teachers	Attendance			Grant-in-aid £E
			Boys	Girls	Total	
1916-17	3,612	7,233	200,754	28,028	228,782	22,247
1917-18	3,534	6,582	184,404	24,782	209,186	22,043
1918-19	3,271	6,160	176,902	24,484	201,386	—
1919-20	3,182	5,819	175,549	26,708	202,257	22,632
1920-21	3,001	5,882	182,623	28,372	210,995	22,923

The following table gives statistics concerning the schools under the immediate direction of the Egyptian Government in 1897 and 1922 respectively. The schools marked with an asterisk are under Departments other than the Ministry of Education.

	1897			1922		
	Schools	Pupils		Schools	Pupils

Maktabs (Elementary Vernacular Schools)	55	2,547	377	222	13,754	10,058
Infant Schools	—	—	—	2	272	—

The number of schools under the control of the Provincial Councils in

January, 1922, either through direct management or through grants-in-aid, was as follows :—

	No. of Schools	No. of Pupils		
		Boys	Girls	Total
Maktabas (Elementary Vernacular Schools)	3,234	200,113	29,171	229,284
Elementary Training Colleges for Teachers	15	719	250	969
Industrial, Agricultural and Commercial Schools	24	2,306	—	2,306
Higher Primary Schools	65	7,642	1,479	9,121
Total	3,338	210,780	30,900	241,680

By agreement with the Provincial Councils it was decided in 1912 that the Ministry of Education should hand over to the Councils the duty of making provision for Elementary Schools in their areas, including the giving of grants-in-aid to the private Maktabas.

The Ministry of Education had under its direct management (January, 1922) :—

	Attendance		
	Boys	Girls	Total
142 Maktabas	10,829	10,441	21,270
11 Training Colleges for Elementary Teachers	582	547	1,129
1 Domestic School	—	70	70
1 School for Nurses and Midwives	—	49	49
4 Trades Schools	702	—	702
39 Higher Primary Schools	11,382	901	12,283
10 Secondary Schools	3,786	44	3,830
6 Technical and Commercial Schools (and night classes)	1,605	—	1,605
1 School of Medicine (and Pharmacy)	377	—	377
1 School of Engineering	524	—	524
3 Higher Training Colleges	367	106	473
1 Higher School of Commerce and Accountancy	48	—	48

6 Higher Elementary Schools	250	682	932
2 Infant Schools	272	—	272
	30,774	12,848	43,622

Under other Government Departments are the School of Law (546 students), the Military School (82 cadets), the Veterinary School (31 students), the Higher School of Agriculture (68 students), the Intermediate School of Agriculture (97 students), the School for Cadis (higher section, 98, lower, 141 students), the Police School (105 cadets), and 2 reformatories (626 boys, 108 girls). It is proposed to establish a State University at Cairo.

Justice.

The indigenous tribunals of the country are the *Mehkmas*, presided over by the *Qadis*. At the present time, they retain jurisdiction only in matters of personal law (marriage, succession, &c.), and *wakfs*—the latter being either charitable foundations, or family settlements with an ultimate remainder in favour of a charitable foundation—and also in certain non-religious cases (e.g. succession) between non-Moslem natives. In matters of personal law other than intestate succession non-Mussulmans are, however, in general subject to their own Patriarchate, or other religious authority. In other matters, natives are justiciable before the so-called Native Tribunals established in 1883. These now consist of 90 Summary Tribunals, each presided over by a single judge, with civil jurisdiction in matters up to £E150 in value, and criminal jurisdiction in offences punishable by fine or by imprisonment up to three years, that is, police offences and misdemeanours; eight Central Tribunals, each of the Chambers of which consists of three judges; and a Court of Appeal at Cairo, about one-third of its members being European. Under a law of 1904, there are also weekly sittings in the Governorate Qisims (to the number of 28) for the disposal of petty offences, the judge having powers up to three months' imprisonment or fine of £E10, and the prosecution being conducted by the police. Civil cases not within the competence of the Summary Tribunals are heard in first instance by the Central Tribunals, with an appeal to the Court of Appeal. The Central Tribunals also hear civil and criminal appeals from the Summary Tribunals. Since 1905 serious crimes (and, under a law of 1910, all press offences) are tried at the Central Tribunals by three judges of the Court of Appeal sitting as an Assize Court, assizes being held monthly. There is a recourse on points of law, in criminal matters, to five judges of the Court of Appeal sitting in Cairo as a Court of Cassation. The prosecution before Summary Tribunals and Assize Courts is entrusted to the *Parquet*, which is directed by a *Procureur Général*; the investigation of crime is ordinarily conducted by the *Parquet*, or by the police under the direction of the *Parquet*: cases going before an Assize Court are further submitted to a special committing judge. Offences against irrigation laws, &c., are tried by special administrative tribunals.

The so-called "Cantonal Courts," created by a law of July, 1912, are composed of village notables, and have general civil jurisdiction in suits up to £E5 in value, besides an extended jurisdiction in special matters, and a petty criminal jurisdiction with penalties up to 24 hours' imprisonment or PT25 fine. The jurisdiction of each court extends to a group of villages. The courts are now 236 in number.

Owing to the Capitulations, which still apply to Egypt, foreigners are exempted from the jurisdiction of the local tribunals. Mixed tribunals were instituted in 1876, consisting partly of native and partly of foreign judges, with jurisdiction, in civil matters, between natives and foreigners and between foreigners of different nationalities, or even between foreigners of the same nationality if the dispute relates to land in Egypt. These Tribunals have, also, a limited penal jurisdiction, notably in cases of police offences, offences against the bankruptcy laws, and misappropriation of property seized by order of the tribunal. There are three Mixed Tribunals of First Instance, with a Court of Appeal sitting at Alexandria.

Finance.

Revenue and expenditure for six years :—

Years	Revenue	Expenditure	Years	Revenue	Expenditure

The foreign debt of Egypt began in 1862, when loans amounting to 3,292,800*l.* were issued for the purpose of extinguishing the floating debt. Other issues followed in rapid succession. The dual control by England and France began in 1879. In January, 1880, the two Controllers-General reported that Egypt could not possibly meet her engagements in full, and in July the Liquidation Law, in accordance with the recommendation of an Inter-

national Commission of the Great Powers, was promulgated. By this law the Unified Debt was reduced to 4 per cent. interest; further conversions were made, and the Unified Debt thus increased to 60,958,240l; certain unconsolidated liabilities were added to the Preference debt, which thus rose to 22,743,800l.; and the Daira Sania debt was increased to 9,512,900l., the interest being reduced to 4 per cent. In 1885 and subsequent years further loans and conversions were entered into.

The Daira Sania and the Domains loans were paid off on October 15, 1905, and June 1, 1913, respectively. The amount and the charge of the various debts in April, 1922, were as follows:—

	Debt	Charge
	£	£E
Guaranteed Loan, 3 per cent.	5,661,800	307,125
Privileged Debt, 3½ per cent.	31,127,780	1,062,235
Unified Debt, 4 per cent.	55,971,960	2,182,906
Total	92,761,540	3,552,266

The charges on account of debts of all kinds (including tribute), as shown in the estimates for 1921-22, amount to £E4,611,378.

In 1888 and 1890, reserve funds were established, the balances of which, in virtue of the Anglo-French Convention of April 4, 1904, were placed at the disposal of the Egyptian Government in 1905, less certain sums remaining in the hands of the Caisse de la Dette Publique for the service of the debt. The amount received by the Egyptian Government was carried to a General Reserve Fund. In this Fund on April 1, 1921, there was a balance of £E5,569,659.

Defence

EGYPTIAN ARMY.

Under the constitution granted to Egypt defence is for the present reserved and remains under British control. Service in the army is compulsory, but, owing to the small contingent required, only a fraction (4 per cent.) of the men who are liable actually serve. Service is for three years. In the Sudanese battalions service is voluntary and extended. The army consists of 5 squadrons of cavalry, a camel corps, 5 batteries, 18 battalions of infantry (of which 6 are Sudanese and 1 is a special "Equatorial" battalion), a railway battalion, and various departments. Most of the higher posts are held by British officers. The strength of the army is about 17,000.

ARMY OF OCCUPATION.

Before the outbreak of war in August, 1914, the British garrison, or army of occupation, consisted of a cavalry regiment, a horse artillery battery, a mountain battery, a company of engineers, and 4 battalions (one company in Cyprus) stationed in the Nile Delta, and of a battalion of infantry and detachment of garrison artillery stationed in the Anglo-Egyptian Sudan. The establishment, including departmental services, was 6,067 of all ranks.

In 1922 the British garrison consisted of 3 regiments of cavalry, 3 batteries R.H.A., 3 field and 3 pack batteries, 2 companies of engineers and 5 battalions of infantry, and one armoured car company. Egypt is also the Headquarters of the Middle East Air Command, and contains four squadrons of aeroplanes and a number of air depôts. In addition there were Indian troops to the number of 20,000.

The Government has a sloop of 1,310 tons, armed with 4 in. guns, bought out of the British Navy, and twelve stern-wheel gunboats on the Nile.

Production and Industry.

The cultivable area of Egypt Proper was reckoned in 1921 at 8,040,672 feddâns (1 feddân = 1·038 acre), and of this 2,706,442 were uncultivated for want of reclamation. The land-tax has been readjusted, the old distinction between Kharâgi and Ushûri* tax has disappeared, and the taxes on land range from 2 piastres (1 piastre = 2½d.) to 164 piastres per feddân according to the rental value. The *corvée*, or forced labour, has been abolished, but the inhabitants are still called out to guard or repair the Nile banks in flood time, and are also liable in any sudden emergency; in 1913 none were called out; in 1914, 21,600; in 1916, 113,000. The agricultural population (Fellahin) forms about 62 per cent. of the whole. A large proportion of them are small landholders with under 51 feddâns, while others, almost or altogether landless, are labourers, the relation between the employers and the employed being mostly hereditary. The following table shows, in March 1922, the number of landholders and the distribution of the land among foreigners and natives:—

Extent of holding in feddâns	Foreigners		Natives		Total of area		Total of Landowners	
	Area in feddâns	Land-owners	Area in feddâns	Land-owners	Feddâns	Per-centage	Land-owners	Per-centage
Up to 1	1,171	2,185	499,154	1,226,364	500,325	9·0	1,228,549	64·9
From 1-5	4,667	1,788	1,075,364	509,494	1,080,031	19·4	511,282	27·0
„ 5-10	5,133	698	550,728	80,219	555,861	10·0	20,917	4·3
„ 10-20	7,721	543	525,083	38,557	532,804	9·5	39,100	2·0
„ 20-30	7,703	310	281,993	11,645	289,696	5·2	11,955	0·6
„ 30-50	12,345	311	346,917	9,077	359,262	6·4	9,888	0·5
Over 50	512,747	1,330	1,743,774	11,846	2,256,521	40·5	13,176	0·7
Total	551,487	7,165	5,023,013	1,887,202	5,574,500	100·0	1,894,367	100·0

Extensive reservoir works, consisting of a dam at Aswân, a barrage at Esna, a barrage at Asyût, and a barrage at Zifta, have been completed. The original storage capacity of the reservoir was 1,065,000,000 cubic metres. The level of the dam has been raised by 6 metres and the capacity of the reservoir increased to 2,423,000,000 cubic metres. The barrage at Esna ensures adequate irrigation to a large area of basin land even in a year of low Nile. North of Deirût an area of approximately half a million acres has been converted from basin to perennial irrigation in the last ten years. The area and production of cotton in six years were:—

Season	Area. Feddâns	Crop. Qantârs	Season	Area. Feddâns	Crop. Qantârs
1916-17	1,656,000	5,060,000	1919-20	1,574,000	5,572,000
1917-18	1,677,000	6,298,000	1920-21	1,291,889	6,036,000
1918-19	1,861,000	4,821,000	1921-22	1,465,136	4,000,000 ¹

¹ Estimate.

In 1921 the area and yield of wheat were 1,458,180 acres and 1,007,268 tons; barley, 393,963 acres and 259,991 tons; maize, 2,085,562 acres; millet, 269,351 acres; rice, 324,014 acres; sugar-cane, 66,424 acres.

In 1921 the sugar exported amounted to 7,471 tons, valued at £E313,041 and the cotton exported amounted to 4,791,717 qantârs, valued at £E28,375,249 (1 qantâr=99·05 lbs.).

The principal mineral products in 1921 were (in metric tons): Phosphate rock, 122,024; petroleum, 178,284; manganese iron ore, 55,065. The production of gold in 1920 was 141 oz. Other products are: nitrate shale, carbonates and sulphate of soda, ochres, sulphate of magnesia, talc, building stones, clay, gypsum, natron, nitrate of soda, salt, and turquoise. The following minerals are also known to exist, namely, alum, copper ore, beryl, granite, ornamental stones, and sulphur.

Commerce.

Shipping and Navigation.

In 1921, excluding warships and vessels requisitioned by the military authorities, 6,537 steamers of a net registered tonnage of 18,915,693 entered at, and 6,532 steamers of a net registered tonnage of 18,932,554 departed from, all the Egyptian ports (Alexandria, Port Said, Suez Basin, Suez Road, Tor, and El Kosseir). These figures include Suez Canal transits. The total number of sailing vessels (both foreign and coasting trade, but excluding sponge and fishing boats) that entered the ports was 2,198 of 110,942 net tons, and of those that departed, 2,193 of 109,157 net tons.

Arrivals and departures of commercial steamers at Alexandria in six years:—

Year	Arrivals		Departures	
	Steamers	Net registered tonnage	Steamers	Net registered tonnage
1916 ¹	554	966,673	705	1,343,867
1917 ¹	346	641,060	366	687,684

Suez Canal.

The following table shows the number and net tonnage of commercial vessels (excluding vessels requisitioned by the military authorities) of all nationalities that passed through the Canal in 1921.

Nationality	No. of transits	Suez Canal net tonnage	Nationality	No. of transits	Suez Canal net tonnage
British	2,384	11,300,683	Norwegian	68	258,905
American	143	708,558	Russian	4	11,554
Danish	53	233,256	Spanish	11	30,639
Dutch	458	2,033,000	Swedish	49	204,200
French	207	959,367	Other nationalities	27	72,939
German	35	171,447			
Greek	18	58,036	Total (1921)	3,914	17,971,494
Italian	239	909,976			
Japanese	223	1,020,984	Total (1922)	4,315	20,743,245

The number of Government vessels that passed through the Canal in 1921 was 62 of 175,264 Suez Canal net tonnage (including 34 British of 107,263 net tonnage).

The number and net tonnage of vessels that have passed through the Suez Canal (including warships), and the gross receipts of the company, have been as follows in six years:—

Year	No. of Transits	Net Tonnage	Receipts ¹	Year	No. of Transits	Net Tonnage	Receipts ¹
			£				£
1916	3,110	12,325,347	3,581,771	1919	3,986	16,013,802	7,388,836
1917	2,353	8,368,918	2,880,761	1920	4,009	17,574,057	10,698,427
1918	2,522	9,251,601	3,718,796	1921	3,975	18,118,999	10,405,440

Taken at 25 francs = £1.

The number of passengers (civil and military) who went through the canal was, in 1916, 283,030; 1917, 142,313; 1918, 105,914; 1919, 527,502; 1920, 500,147; 1921, 295,199.

The Suez Canal is 103 miles long (including 4 miles of approach channels for the harbours), connecting the Mediterranean with the Red Sea. It was opened for navigation November 17, 1869. The concession to the Suez Canal Company expires on November 17, 1968.

Internal Communications.

On March 31, 1922, there were (exclusive of sidings) 2,319 miles of rails (double and single) belonging to and worked by the State, and 721 miles of rails of agricultural light railways owned by private companies: 1,154 miles of State and 623 miles of companies' rails are in the Delta, and 1,165 miles of State and 98 miles of light railways are in Upper Egypt. The railways have a gauge of 4 ft. 8½ in. inside rails, except the line from Luxor to Assuan, which is 3 ft. 6 in. gauge, and that to the Western Oases, which is 2 ft. 5½ in.

The length of line of the State Railways (excluding the auxiliary railways of Upper Egypt, 266 miles, and the Western Oasis railway, 141 miles) in 1921 was 1,912 miles; the number of passengers carried in 1921–22, 27,342,000; weight of goods carried, including service transports, 5,484,165 tons; and the net receipts, £E1,859,346.

The working expenses, £E6,540,423 in 1921–22, represent an average of 82·79 per cent. of the gross receipts, which were £E7,899,769.

The telegraphs and telephones have belonged to the Egyptian Government since April, 1918. On March 31, 1921, they were of a total length of

8,896 miles, the length of the wire being 24,844 miles. The Eastern Telegraph Company, by concessions, have telegraph lines across Egypt from Alexandria *via* Cairo to Suez, and from Port Said to Suez, connecting their cables to England and India. The number of telegrams in 1921 was 2,534,700, as against 2,783,395 in 1920, not including railway service telegrams (2,043,411), and those sent (544,970) and received (492,282) by the Eastern Telegraph. The Abu Zabal wireless station commenced working in April, 1922.

There were, in 1921, 2,909 post offices and stations. In the internal service (1921) there passed through the post-office 52,249,000 letters and post-cards, and 20,091,000 newspapers, &c., and samples; in the external service, 24,530,000 letters and post-cards, and 9,221,000 newspapers, &c., and samples. Official correspondence, not here included, amounted in 1921 to 8,132,000 articles. Receipts £E600,184; expenses £E481,568.

There is a regular fortnightly air mail service via Cairo between Palestine and Mesopotamia, and a similar service in the reverse direction.

Banks and Credit.

The National Bank has a capital of 3,000,000*l.* with reserve funds amounting to 2,000,000*l.* The Agricultural Bank has a capital of 3,740,000*l.* It has Government guarantee of interest at 3 per cent., and it lends money to the Fellahin at 8 per cent. interest.

There are in addition eight mortgage banks and five ordinary banks working chiefly in Egypt with a total paid up capital of £E41,011,369, *i.e.*, £E39,381,066 for the former and £E1,630,303 for the latter. The reserve funds of these two groups of banks and of the National and the Agricultural Banks of Egypt amount to £E5,220,330 and £E3,091,368 respectively.

In 1901, a Post-Office Savings Bank was opened, and on December 31 of that year, it had 6,740 depositors with balances amounting to £E47,492. On December 31, 1921, the depositors numbered 93,360, and their balances amounted to £E1,268,130.

In April, 1912, a rural savings bank service was inaugurated. At the end of that year the balance of deposits in the new branch amounted to £E25,413, and the number of accounts to 127,927. On December 31, 1921, the balance amounted to £E11,200, and the number of accounts to 723. The balance of deposits in the savings banks of the foreign banks on the same date amounted to £E900,371 and the number of depositors to 11,710.

Money, Weights, and Measures.

MONEY.

By decree of October 18, 1916 (20 Zi-l-Higga 1334), the monetary unit of Egypt is the gold Egyptian pound of 100 piastres. It weighs 8·5 grammes ·875 fine, and therefore contains 7·4375 grammes of fine gold. Its value in sterling is £1 Os. 6½*d.* A new coinage was introduced at the same time. It replaces the monogram of the Sultan of Turkey by that of the Sultan of Egypt.

The 10-piastre silver piece weighs 14 grammes ·833 fine, and therefore contains 11·67 grammes of fine silver. The piastre is worth 2·46*d.* in English money. It is subdivided into tenths (*ushr el girsh* or *millièmes*).

Coins in circulation are the Egyptian pound (100 piastres) and half pound in gold; 20, 10, 5, and 2 piastre pieces in silver; 1, $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$ piastre pieces in nickel, and $\frac{1}{16}$ piece in bronze. Silver coin is legal tender only up to £E2, and nickel or bronze coins up to 10 piastres. For some years gold coins have not been issued, and the gold circulating in Egypt and the Sudan is almost exclusively English sovereigns, which are legal tender at the rate of 97½ piastres. The gold pieces of the Latin Monetary Union equivalent to the French 20 franc piece are permitted to circulate at a uniform rate of £E0·7715.

Bank notes are issued by the National Bank in various denominations from £E0·25 to £E100. They are in principle not legal tender, but since the war they have been made legal tender and inconvertible. The amount in circulation at the end of August, 1922, was £E25,360,000. In 1918 the Government issued currency notes of 10 piastres and 5 piastres, but these have now been withdrawn, and the amount of currency notes in circulation has shrunk from £E163,500 in August, 1920, to £E129,000 at the end of August, 1922.

Egyptian money is now minted at the Birmingham and other foreign Mints. The nominal value of the coinage (including recoinage) from 1887 to 1921 was :—

Years	Gold	Silver	Nickel	Bronze	Total
	£E.	£E.	£E.	£E.	£E.
1887-1918	62,024	7,652,504	708,773	23,724	8,442,025
1919	—	33,400	101,800	—	135,200
1920	—	48,800	111,840	—	160,640
1921	—	117,800	71,040	—	188,840
1887-1921	62,024	7,852,504	988,453	23,724	8,926,705

The principal units of Egyptian weights and measures are defined in terms of the metre of the "Commission Internationale du mètre" by the Law No. 10 of September 26, 1914. The equivalents remain the same as were defined by the Decree of April 28, 1891.

Measures of length : *Diraa baladi* = 0 metre 58 centimetres.

„ weight : *Dirhem* = 3 grams 12 centigrams.

„ capacity : *Ardeb* = 198 litres.

MEASURE OF CAPACITY.

The *Ardeb* is equal to 43·555 gallons, or 5·44436 bushels.

The approximate weight of the ardeb is as follows :—Wheat, 334 rotls; beans, 345 rotls; barley, 267 rotls; maize, 312 rotls; cotton seed, 270 rotls.

WEIGHTS.

Okieh = 1·3207 ounce.

Rotl = 99049 lb.

Oke = 2·7513 lbs.

Qantdr { or 100 Rotls or } = 99·0493 lbs.
 { 36 Okes }

LENGTH MEASURES.

	Inches
<i>Diraa Baladi</i> (town)	= 22·8347
<i>Diraa Mimari</i> for building, &	= 29·5276
<i>Qassabah</i> = 3·8823 yards	= 139·7639

MEASURES OF SURFACE.

Feddan, the unit of measure for land, = 7,463·148 sq. pics = 1·03808 acres.
 1 sq. pic = 6·06 sq. ft. = 0·5628 sq. metre.

British Representatives.

His Majesty's High Commissioner for Egypt and the Sudan.—His Excellency Field-Marshal Viscount *Allenby*, G.C.B., G.C.M.G., D.S.O., etc. Appointed October, 1919.

Plenipotentiary Minister.—Hon. Ernest *Scott*, C.M.G., M.V.O.

Secretaries.—A. J. Clark *Kerr*, G. C. M. *Vereker*, M.C., A. F. H. *Wiggin*, and C. M. *Patrick*.

Acting Oriental Secretary.—R. G. *Gayer Anderson*.

Consul-General at Alexandria.—Arthur D. *Alban*, O.B.E.

Consul at Cairo.—H. L. *Rabino*, O.B.E.

Consul at Port Said.—W. *Hough*.

Commercial Agent for Egypt and Sudan.—E. H. *Mulock*.

There are also Consular representatives at Suez, Mansura, Tanta, Zagazig, and Birket-es-Sab.

ESTONIA.

(EESTI WABARIK.)

Estonia comprises the former Russian Government of Estland, the northern part of Livland, the Islands Saaremaa (Oesel), Hiiumaa (Dagö), and Muhumaa in the Baltic Sea, part of the Petseri district of the Pskov Government, and part of the Gdowski district of the Petrograd Government.

After the Bolshevik *coup d'état*, Estonia, on February 24, 1918, declared her independence, and was recognised in the same year as a *de facto* independent body by Great Britain (May 3), France (May 13), and Italy (May 29). On January 26, 1921, the Supreme Council accorded *de jure* recognition to Estonia.

Constitution and Government.—The Constitution of the Estonian Republic was passed by the Constituent Assembly on June 15, 1920, and has been in force since December 20, 1920.

The power of the State is in the hands of the people. The sovereign power is assured to the people by means of the elections to the Legislative Assembly (*Riigikogu*, State Assembly), the referendum, and the right of initiating legislation.

The State Assembly is composed of 100 members, elected for three years on the basis of proportional representation, and by universal, direct, equal, and secret suffrage. The Assembly forms the Government, and accepts its resignation, promulgates the laws, passes the budget, decides the financial policy generally, ratifies treaties, the mobilisation decree, and state of siege, &c.

The signatures of 25,000 citizens are necessary in demanding a referendum, proposing a new law, or amending the existing laws. The budget and measures affecting war, peace and foreign treaties cannot be submitted to a referendum.

The executive power consists of the State Head (*Riigivanem*, State Elder), and ministers, who form the Government. The Government directs the foreign and home policy of the Republic, appoints officials (except where special laws exist), and introduces legislation. It is chosen by the State Assembly, and is responsible to that body. The Government collectively and individually must possess the confidence of the Assembly, and must resign if a vote of no confidence is passed. The Government is the Commander-in-Chief of the Republican defence forces in peace time.

The members of local organs of self-government are elected on a basis similar to that on which rests the elections to the State Assembly. If the law has not created special offices, the executive power of the Government is exercised through the local government institutions.

All Estonian citizens are equal in the eyes of the law. There is no death penalty.

The national flag of Estonia is blue, black and white in horizontal stripes.

The elections for the Estonian Diet were held on November 28, 1920, and resulted in the return of the following parties:—Reformist Labour, 22; Agrarians, 21; Populists, 10; Christian Party, 7; Social Democrats, 18; Independent Socialists, 11; Communists, 5; Balts, 4; Russian, 1; Economist Group, 1; making a total of 100.

AREA AND POPULATION—RELIGION AND INSTRUCTION 877

The cabinet was formed on November 25, 1922. The Prime Minister is called the State Head.

State Head (Riigivanem).—I. Kukk.

Area and Population.—The boundary line between Estonia and Russia is defined by the Peace Treaty of February 2, 1920. The boundaries between Estonia and Latvia were settled on July 3, 1920. The extreme length is about 217 miles, and the breadth about 124 miles, the total area being about 16,955 square miles.

The population of 1,109,479 (preliminary 1921 census result) is composed as to 92 per cent. of Estonians, 1·5 per cent. of Germans (Balts), and 6·5 per cent. of Russians and other nationalities.

The Republic is divided into eleven districts, as follows (the capitals are given in brackets, and when two are given the second mentioned is the German name):—Harju (Tallinn-Reval), Wiru (Rakvere-Wesenberg), Jarva (Paide-Weissenstein), Laane (Hapsal), Tartu (Tartu-Dorpat), Woru (Woru), Wiljandi (Wiljandi-Fellin), Parnu (Parnu), Saaremaa-Oesel (Kuresaare-Arensburg), Petseri (Petseri), and Walga (Walk). The capital, Tallinn (Reval), was founded in 1219 at the mouth of the Gulf of Finland, and in 1922 had 123,496 inhabitants. The university town of Tartu (Dorpat) had 50,000 inhabitants. The population of the port of Parnu, on the Gulf of Riga, was 23,000, and that of the manufacturing town of Narva 35,000.

Religion and Instruction.—There is no State religion in Estonia. Five-sixths of the population are Lutherans, the rest Greek Orthodox, Catholics, &c.

Elementary education is obligatory and gratuitous. In 1921-22 there were 1,221 elementary schools with a four years' course in the Estonian Republic. Of this number 1,199 were supported by local authorities and 22 were private schools. The number of higher schools with a seven years' course amounted to 221, six of which were private. The number of middle schools for general education, gymnasiums, and so on, was 70, of which number 38 were private schools (mostly supported by the Government).

For special or professional education there are teachers' seminaries in Tallinn, Tartu, Hapsal, and Rakvere, navigation schools in Tallinn, Kasmu, Kuresaare, and Parnu, commercial schools with an eight years' course, agricultural schools with a four years' course, mercantile schools with a four years' course, and industrial and art schools with a six years' course.

The minority nationals (Germans, Russians, Swedes, and Letts) are guaranteed education in their mother tongue.

For higher education there are the Dorpat University (founded in 1632), which on December 1, 1919, was re-opened as an Estonian seat of learning maintained by the Government; number of students (1921), 2,775 (2,001 men and 774 women); the Technicum at Tallinn is a higher professional school with 500 students in 1920.

Justice.—The supreme judicial power is invested in the State Court of Justice, which is elected by the State Assembly and sits in Tartu (Dorpat).

The laws are being gradually revised by the State Assembly.

Finance.—Estimated revenue and expenditure for four years were as follows (in Estonian marks):—

	1920	1921	1922	1923
Revenue ...	2,750,971,900	6,386,914,772	5,803,168,900	6,180,524,000
Expenditure ...	2,750,971,900	6,386,914,772	5,803,168,900	6,180,524,000

The foreign debt of Estonia (January 1, 1922), amounted to about 4,000,000*l.* (14,008,464 dollars to the United States, 10,000,000 francs to France, and 251,000*l.* to Great Britain), and the internal debt to 2,800,000,000 Estonian marks.

Defence.—Military service is compulsory. The period of service in the active army is $1\frac{1}{2}$ years. The army is organised in 3 divisions. The peace strength in 1922 was 15,000, and the mobilisable strength 90,000. The military budget for 1922–23 was 168,000,000 Estonian marks.

The naval forces consist of two ex-Russian destroyers (1,600 and 1,800 tons, 4-in. guns), a former Russian gunboat, carrying two 4·7-in. guns, about twelve mine-layers and sweepers, and two Peipus Lake gunboats.

Production.—Agriculture is the chief occupation. Half the area of Estonia was taken up by large landed properties of more than 2,000 hectares each. By the passing of the Agrarian Reform Bill these estates were parcelled out to the peasants. The total area is about 10,851,648 acres, divided as follows: forest land, 2,220,002 acres (20·1 per cent.); fields, 2,532,799 acres (22·9 per cent.); meadows, 2,602,274 acres (24·46 per cent.); pastures, 1,836,302 acres (17·48 per cent.); untillable land, 1,632,206 acres (15·04 per cent.), including a peat bog of 496,112 acres.

The principal crops, with acreage and yield, are shown as follows:—

	Acreage		Yield in tons.	
	1920	1921	1920	1921
Rye	350,670	366,366	95,581	157,145
Wheat	30,727	49,315	7,360	21,228
Barley	273,049	289,559	53,883	117,529
Potatoes	157,286	166,925	568,730	672,543

In 1922 Estonia had 529,368 head of cattle, 754,937 sheep, 272,348 pigs, and 198,787 horses.

Commerce.—The chief exports are flax, timber, cellulose, and meat. The trade in 1921 amounted to 9,380,341 pounds (62 pounds=1 ton) of imports, valued at 4,395,577,966 marks (1,395,185,291 marks in 1920), and 7,291,332 pounds of exports, valued at 2,286,638,414 marks (1,228,379,956 marks in 1920). Of the total imports, 2,605,530 pounds came from the United Kingdom and 3,771,539 pounds from Germany; of the total exports, 2,847,658 pounds went to the United Kingdom and 291,824 to Germany.

Principal imports (in pounds):—Salt, 828,334; coal, 1,521,302; fertilisers, 214,923; sugar, 683,759. Principal exports:—Timber, 3,288,167; potatoes, 1,194,769; paper, 739,942; flax, 318,112; cement, 394,851; spirits, 42,614.

Total trade between the United Kingdom and Estonia for 2 years (according to Board of Trade returns):—

	1921	1922
Imports from Estonia into United Kingdom	£ 729,681	£ 1,149,425
Exports to Estonia from United Kingdom	3,859,633	1,046,162

Shipping and Communications.—During 1921, 6,290 vessels of 963,911 tons entered the ports of Estonia. In 1921 the merchant marine consisted of 66 steamers and 402 sailing vessels, with a total tonnage of 52,153.

Estonia has a total railway mileage of 1,238 kilometres, or 767 miles.

Currency.—The currency of Estonia is the Estonian mark, equal in value to the French franc. (2,742,000,000 marks in circulation at end of 1921.)

Diplomatic and Consular Representatives.

1. OF ESTONIA IN GREAT BRITAIN.

Envoy and Minister.—Dr. Oskar Philipp Kallas (appointed January, 1922).

First Secretary and Naval and Military Attaché.—Commander Sergius M. Riis.

Secretary.—Rudolph A. Möllerson.

Attaché.—Waldemar Puckk.

There are Consular Representatives in London, Aberdeen, Hull, Dover, Belfast, Leith, Bo'ness, Liverpool, Methill, Alloa, Glasgow, Manchester, Dundee, Cardiff, Southampton, West Hartlepool, Swansea.

2. OF GREAT BRITAIN IN ESTONIA.

Envoy and Minister.—J. C. T. Vaughan, C.M.G., M.V.O. (appointed November 20, 1922).

Consul at Reval.—Peter Leslie.

FINLAND.

(SUOMEN TASAVALTA.)

Constitution and Government.

CENTRAL GOVERNMENT.

Finland is a Republic according to the Constitutional Law of June 14, 1919.

From 1809 Finland was united to the Russian Empire as an autonomous Grand-Duchy. On December 6, 1917, the House of Representatives unanimously proclaimed Finland an independent and sovereign State, and she has been recognised as such by the Powers. According to the Constitutional Law

of 1906, the House of Representatives consists of one Chamber of 200 members chosen by direct and proportional election, in which all who are entitled to vote have an equal vote. The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached his or her 24th year. There are 16 electoral districts with a representation proportioned to the population, a rearrangement being required every 10 years. Each district is divided into voting circuits. The voting system, devised with a view to proportional representation, provides for the formation of voters' associations which prepare three-name lists of candidates, the votes for whom are in a falling scale according to the order in which the voter has placed them. There may, within limits, be compacts between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any candidate he pleases. Every citizen entitled to vote is eligible to the House of Representatives, which is elected for 3 years.

The President is elected for 6 years by the votes of the citizens. He receives a salary of 150,000 marks and 250,000 marks for allowances. The Council of State (Ministry), appointed by the President, must enjoy the confidence of the House of representatives.

At the elections held in July, 1922, the following parties were returned: Social-Democrats, 53; Agrarians, 45; Finnish Coalition Party, 35; Socialist Labour Party, 27; Swedish Party, 25; Finnish Progressive Party, 15.

President of Finland.—Dr. Kaarlo Juho Ståhlberg (born 1865; elected July, 1919).

The Council of State, appointed November 14, 1922, is composed as follows:—

Prime Minister.—Kyösti Kallio.

Minister for Foreign Affairs.—Dr. J. H. Vennola.

Minister of Finance.—Risto Ryti.

Minister of the Interior.—Vilkku Joukahainen.

Minister of Justice.—Otto Åkesson.

Minister of Education.—Dr. Niilo Liakka.

Minister of Defence.—Major-General Bruno Ylander.

Minister of Communications.—Erkki Pullinen.

Minister of Commerce and Industries.—M. Aho.

Minister of Social Affairs.—Dr. Oskari Mantere.

Minister of Agriculture.—Dr. J. E. Sunila.

Minister without Portfolio.—Juho Niukkanen.

LOCAL GOVERNMENT.

For administrative purposes Finland is divided into nine departments. The provincial administration is entrusted in each of the departments to a prefect, who is appointed by the President. The unit of local government is the commune. Each rural parish and each town forms a commune in which all men and all women of 21 years of age who have paid the local taxes for the preceding two years are voters. In all communes a communal council is elected to decide questions of administration and local economy. The executive power is vested in rural communes in a college formed by the head of the commune and four or more aldermen elected by the council. In towns the executive authority is the magistrates with the burgomaster as president and other members elected by the council. There were, in 1920, 38 towns and 492 rural communes in Finland. As executive officers of the Prefect there are 53 bailiffs and 294 sub-bailiffs.

The department of Åland has a county council (*landsting*) consisting of

one chamber which is elected on the basis of the same suffrage as the Parliament. The county council settles the internal affairs of the government. The executive authority is with an executive council, of which the *landträd* is president.

Area and Population.

The area and population of Finland, according to the census taken on December 31, 1910, and that on December 31, 1920, are as follows :—

Departments.	Area English sq. miles	Population Dec. 31, 1910	Population Dec. 31, 1920	Population per sq. mile 1920
Uusimaa (Nyland)	4,425	376,218	446,329	100.8
Turku-Pori (Åbo-Björneborg)	8,393	499,332	495,561	59.0
Åland (Åhvenanmaa)	550	—	26,911	48.9
Häme (Tavastehus)	6,739	342,321	360,528	53.5
Viipuri (Viborg)	12,091	521,469	558,202	46.2
Mikkeli (St. Michel)	6,422	108,829	204,425	31.8
Kuopio	13,969	338,777	355,701	25.5
Vaasa (Vasa)	14,794	514,940	548,055	37.0
Oulu (Uleåborg) and Petsamo	65,127	328,311	370,795	5.6
Total	132,510	3,115,197	3,366,567	25.4

Of the total on December 31, 1920, 1,661,140 were males and 1,705,367 females. In 1920, 2,754,228 spoke Finnish, 340,963 Swedish, 4,806 Russian, 2,378 German, 1,603 Lapponic.

The estimated population on December 31, 1921, was 3,367,542.

The growth of the population is shown as follows :—

Years	In Towns	In Country	Total	Percentage in towns
1800	46,604	786,055	832,659	5.60
1850	105,496	1,531,419	1,636,915	6.37
1900	339,613	2,372,949	2,712,562	12.52
1910	456,873	2,658,824	3,115,197	14.67
1915	512,226	2,788,424	3,300,650	15.52
1920	543,046	2,831,128	3,366,567	16.31

According to the census of 1920 the population was divided according to occupations as follows: agriculture, 2,020,021 (61 per cent.); industry, 459,751 (14 per cent.); communications, 104,182 (3 per cent.); commerce 106,276 (3 per cent.); public administration, 52,250 (1 per cent.); professions, 49,587 (1 per cent.); others, 574,440 (17 per cent.).

The movement of the population for four years was as follows :—

Year	Living Births	Of which illegitimate	Stillborn	Marriages	Deaths (exclusive of stillborn)	Excess of Births
1917	81,046	6,490	2,174	20,004	58,863	22,183
1918	79,494	6,981	2,001	15,008	95,102	— 15,608
1919	63,898	4,312	1,656	18,881	62,932	964
1920	84,714	—	2,214	28,604	52,804	32,410

Emigration (the first figures give the total for the year, the figures in brackets give the number emigrating to America): 1916, 5,325 (5,318);

1917, 2,773 (2,758); 1918, 1,900 (1,867); 1919, 1,085 (1,077); 1920, 5,595 (5,577); 1921, 3,557.

The principal towns, with the number of their inhabitants in 1920, are : Helsinki (Helsingfors), 197,848; Turku (Åbo), 58,367; Tampere (Tammerfors), 47,830; Viipuri (Viborg), 30,071; Vaasa (Vasa), 23,957; Oulu (Uleåborg), 21,332; Kuopio, 18,725; Pori (Björneborg), 17,074; and Kotka, 11,960.

Religion and Instruction.

The National Church is Evangelical Lutheran religion, but entire liberty of conscience is guaranteed to the members of all religions and confessions. Ecclesiastically Finland is divided into 4 bishoprics (Turku being the archiepiscopal see), 47 provostships, and 552 parishes.

Of the total population there were at end of 1920 : Lutherans, 3,300,520; Greek-Catholics and Raskolnics, 54,791; Roman Catholics, 404; Baptists, etc., 6,614; Jews, 1,618. The Greek-Catholics are under an archbishop, resident at Viipuri.

In 1922 Finland had 3 universities: at Helsinki (founded in 1640 at Turku, and removed to Helsinki after having been burned down in 1827), with 2,602 students (677 women); at Turku (Swedish, opened 1919), with 117 students (40 women), and at Turku (Finnish, opened 1922), with 100 students. In 1922 there were also 1 technical high school, with 689 students (16 women), and 2 commercial high schools, with 173 students.

For secondary education there were, in 1922, 85 lyceums, with a curriculum of 8 or 9 years and 20,269 pupils; 31 middle schools (the first 5 years of curriculum), with 3,170 pupils; 26 colleges for girls (middle schools); and 16 extension classes (the last 3 years of curriculum), with 5,400 pupils. There were 8 training colleges for elementary school teachers, with 915 students (561 women); and 5 for infant school teachers, with 275 students. There were also 46 high schools for the people, with 2,250 pupils (1,550 females).

For elementary education (1921) there were in the country 3,773 higher elementary schools, with 191,148 pupils (95,053 girls); 683 lower elementary schools, with 21,636 pupils (11,812 girls); 1,407 infant schools under the superintendence of the Church, with 170,557 pupils. In the towns, there were 1,335 classes of higher elementary schools, with 43,246 pupils (21,287 girls); and 16 preparatory schools for secondary education, with 1,806 pupils. There were besides 7 navigation schools, with 123 pupils; 37 commercial schools, with 3,160 pupils; 12 trade schools, with 503 pupils; 43 technical schools, with 3,438 pupils; 108 schools for arts and crafts ("slöjd"), with 3,502 pupils; 36 agricultural schools; 3 dairy schools; 34 cattle-management schools; and 5 horticultural schools, with 800 pupils; 5 forestry schools, with 167 pupils. The school age in the primary schools is from 7 to 15 years.

In 1921 there were published 254 newspapers and reviews in Finnish, 87 in Swedish, 10 in Finnish and Swedish, and 5 in other languages.

Justice and Crime.

The administration of justice is independent of the Government. The lowest courts of justice in Finland are those of the District. In towns these district courts are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—peasant proprietors, the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. From these courts an appeal lies to the Superior Court (*Hovioikeus*) in Turku,

Vaasa and Viipuri. The Supreme Court of Judicature (*Korkein oikeus*) sits in Helsinki. Judges can be removed only by judicial sentence.

Two functionaries, the *Oikeuskansleri* or the Chancellor of Justice, and the *Oikeusasiamies*, or the Attorney-General, exercise control over the administration of justice. The former acts also as counsel and public prosecutor for the Government; while the latter, who is appointed by the Parliament, has to extend a general supervision over all the courts of law.

At the end of 1919 the prison population numbered 5,584 men and 731 women, while the number of sentences pronounced at the end of 1920 was 44,335 for crimes and 17,939 in civil cases.

Pauperism.

The number of paupers in 1920 supported by the towns and the village communities was 116,357 (3·5 per cent. of the population); and the total cost was 86,006,007 marks.

Finance.

Revenue and expenditure for 6 years in thousands of marks :—

„ 1919 (for the purchase of Gultzeit & Co.)	6	114,594,000	Loan of 1919	5½	52,824,000
Loan of 1920	6½	13,840,800	Loan of 1920 in Government Bonds	5½	58,051,300
„ 1921	6½	250,000,000	Loan of 1920 for the purchase of a factory	5½	4,500,000
Total		535,470,482	Total		955,895,300
			Total of Funded Loans		1,491,365,782
SHORT-DATED LOANS :					
			Foreign		156,084,495
			National		286,303,745
			Total of Short-dated Loans		442,388,240
			Grand Total of all Loans		1,933,754,022

On October 1, 1922, the foreign loans totalled 534,356,419 marks, and the national loans 954,880,700 marks, making the total of funded loans 1,489,237,119 marks; the foreign short-dated loans amounted, on the same date, to 156,084,495 marks, and the national loans 172,071,280 marks, making a total of 328,155,775 marks; and a grand total of all loans on October 1, 1922, of 1,817,392,894 marks.

The income of the towns in 1919 was 310,237,838 marks, and the expenditure 277,349,296 marks. Their assets amounted to 1,095,425,613, and their debts to 405,055,545 marks.

Defence.

ARMY.

The military forces of Finland consist of: (1) The Army and coast defence, recruited on the principle of universal service; and (2) the voluntary Civic Protective Guards Organisation, recruited from absolutely reliable citizens.

The President of the Republic has the supreme command of the Finnish military forces, but during war he may invest someone else with that authority.

Service in the army is universal and compulsory. Liability to serve commences at the age of 17 and extends to the age of 45. All young men who have completed their 20th year are summoned to active service. In peace time the period of service is one year for infantry, and 15 months for the other ranks. After active service, the conscript belongs to the Reserve for five years; after that he is removed to the Landwehr first class, to which he belongs until his 45th year. All young men of 17–20 years belong to

the second class of the *Landwehr*, and all older men exempted from active service belong to the third class. At present only one class is called up annually. In 1922 the numbers called up and found fit for service was 18,000.

The army consists of: The Army Staff, 3 divisions, each containing 3 regiments of infantry (3 battalions), 1 regiment of field artillery (4 groups of 3 batteries each), and sundry companies of machine-guns; the *Jäger Brigade*, containing 3 separate battalions of *jägers*, 1 regiment of *jäger* artillery, and 1 separate company of machine guns; the Brigade of Cavalry, containing 2 regiments (12 squadrons); the Brigade of Technical Troops; the Heavy Artillery Regiment (3 groups of batteries); the Tank Regiment; the Flying Corps and Intendancy.

The voluntary Civic Protective Guards Organisation is an essential part of the plan of defence. The administration of the Guards is in the hands of the Commander-in-Chief of the Protective Guards, appointed by the President and under the Minister of War. He is assisted by the General Staff of the Guards. The number of Protective Guards in 1922 was 98,319. The military budget for 1922-23 amounted to 283,154,200 Finish marks.

NAVY.

The coast defence is being organised. At present Finland has no battle-ships: only a few light cruisers and three torpedo-boats are used for training purposes.

According to the establishment of 1921, the personnel of the coast defence is as follows: *Navy*—Admiral or Major-General (Commander-in-Chief of the Coast Defences), 71 officers, 79 civil officers, and 1,028 petty officers and men. The *Coast Artillery* contains 3 regiments and 1 independent group of batteries; and to the personnel belong 95 officers, 47 ensigns, 63 civil officers, and 2,240 petty officers and men.

Production and Industry.

Agriculture is the chief occupation of the people in Finland, although the cultivated area only covers 9.9 per cent. of the land. The land was divided in 1920 into 250,748 farms, and the landed property was distributed as follows:—Less than 3 hectares cultivated, number of farms, 96,468; 3-10 hectares, farms 97,667; 10-25 hectares, farms 41,116; 25-100 hectares, farms 13,954; over 100 hectares, farms 937.

The principal crops of 1921 were as follows:—rye, 606,032 acres, yielding 264,000 tons; barley, 296,832 acres, yielding 108,000 tons; oats, 1,038,912 acres, yielding 406,840 tons; potatoes, 197,888 acres, yielding 496,540 tons; hay, 2,688,803 acres. Total land under cultivation, 1922, 4,959,568 acres. Butter production in 1921 was 6,921 tons.

Domestic animals in 1920:—Horses, 3 years of age, 312,837; horned cattle, 2 years of age, 1,197,177; sheep and goats, 827,791; pigs, 110,993.

More than half the country is covered with forests of pine, and the main industry is the lumber industry. The Crown forests covered (January, 1921) 12,688,232 hectares (about 33 per cent. of the area of the country). Their maintenance cost was (1920) 64,117,327 marks, and the income derived from them 130,625,765 marks. The timber stock of the Crown forests numbered 211,162,000 tree trunks. In 1920 there were 660 saw mills with 90 water motors, 477 steam, 1,517 electric, and 34 other motors.

Finland had, in 1920, 2,921 large factories, employing an aggregate of

117,230 workers, and yielding an aggregate product of 6,168,031,100 marks. The chief were :—

	No. of Establishments	No. of Workers	Production
			Marks
Iron and mechanical works	453	21,203	772,753,900

Metals	310,075,410	403,623,354	Matches	21,519,837	29,173,990
Spinning materials	249,580,481	331,086,303			

Total trade between the United Kingdom and Finland for 2 years (according to Board of Trade returns):—

	1921	1922
	£	£
Imports from Finland into U. K.	7,720,528	10,435,080
Exports to Finland from U. K.	1,932,003	2,770,247

Shipping and Navigation.

The mercantile marine of Finland engaged both in the home and foreign trade on January 1, 1921, was as follows: 716 sailing vessels of 95,576 tons; 873 steam and motor vessels of 98,836 tons.

Vessels entered and cleared at Finnish ports with cargoes and in ballast, in 1919, were as follows:—

	No.	With Cargoes.	In Ballast.	Total.
		Tonnage.	Tonnage.	Tonnage.
Entered	4,544	740,494	931,523	1,672,017
Cleared	4,710	1,493,119	190,734	1,683,853
Total	9,254	2,239,613	1,122,257	3,361,870

Internal Communications.

For internal communications Finland has a remarkable system of lakes connected with each other and with the Gulf of Finland by canals. The number of vessels which passed along the canals in 1920 was 50,964; the receipts from vessels, 8,829,268 marks; and expenditure, 3,661,802 marks.

On December 31, 1920, there were 2,685 miles of high roads and 2,500 miles of secondary roads.

Railway history in Finland begins in 1860, when the State built a line 66 miles long between Helsinki and Hämeenlinna. On December 31, 1920, there were 2,685 miles of railways, all but 186 miles belonging to the State. The gauge is 1·524 metres (4·9 feet). The traffic upon the State railways in 1920 was 17,549,015 passengers and 5,405,000 tons of goods. The total cost of the State railways to the end of 1920 was 607 million marks. The total revenue in 1920 was 378,408,457 marks, and the total expenditure 305,220,163 marks.

Finland had 2,525 post-offices in 1921, and revenue and expenditure were respectively 72,404,267, and 69,951,905 marks. The number of letters and postcards, 54,362,865; samples and printed packets, 8,710,286; newspapers, 124,238,090; money-orders, 1,259,626; total, 188,570,867.

There are 10,517 miles of telegraph and 3,230 miles of telephone wires belonging to the State in Finland. The telegraph system and part of the telephone system is State property.

Banking, Money, Weights, &c.

The Bank of Finland (founded in 1811) is the State Bank and the only bank of issue. Finland had in 1922, besides the State bank, 20 joint stock banks, and 462 savings banks. The paper currency of the Bank of

Finland on August 31, 1922 was 1,337·6 million marks, against which the bank held a stock of gold of 42·6 million marks. The deposits of all private banks on August 31, 1922, were 4,008·4 million marks.

In ordinary savings banks about 500,000 depositors had to their credit 1,194,920,000 marks; and in the Post Office savings banks 125,923 depositors had 98,630,194 marks.

The *markka* of 100 *penni* is of the value of a franc, 9½d. The standard is gold, and the *markka*, though not coined in gold, is the unit.

Gold coins are 20 and 10 *markka* pieces. They contain 2903225 grammes of fine gold to the *markka*. Silver coins are 2, 1, ½, and ¼ *markka* pieces. Nickel coins (introduced in 1921) are 1, ½, and ¼ *markka* pieces. Copper coins are 10, 5, and 1 *penni* pieces.

The paper currency is exchangeable at par against gold.

The metric system of weights and measures is universally employed in Finland.

Diplomatic Representatives.

1. OF FINLAND IN GREAT BRITAIN.

Envoy and Minister.—Ossian Donner.

Secretary.—Hugo Valvanne.

Attaché.—Harald Lehman.

Consul-General in London.—L. Norrgren.

2. OF GREAT BRITAIN IN FINLAND.

Envoy and Minister.—E. A. Rennie, M.V.O., Appointed April 30, 1921.

Secretaries.—G. A. D. Ogilvie Forbes and W. R. C. Green.

Naval Attaché.—Capt. J. Wolfe Murray, D.S.O.

Consul at Helsingfors.—C. H. Mackie.

FIUME.

Fiume is an independent State created by the Treaty of Rapallo, signed on November 12, 1920, between Italy and the Kingdom of the Serbs, Croats and Slovenes. By Article 4 of the Treaty the contracting Powers recognise the independence of Fiume in perpetuity. The Treaty has been duly ratified, and the ratifications were exchanged in February, 1921.

The Treaty of London of April 26, 1915, granted Italy a large area of continental Dalmatia. Difficulties arose between the Italians and the Yugo-Slavs as to Italy's share, and the difficulties were complicated by the action of the poet D'Annunzio in seizing Fiume on September 12, 1919, and annexing it to Italy. The difficulties were, however, solved by the Treaty of Rapallo.

On June 5, 1921, a further agreement was arrived at between the Free City, Italy and Yugo-Slavia in reference to the Port of Fiume, which includes the Port of Barros, according to which equal rights are granted to the three parties concerned.

Head of the Provisional Government (January, 1923).—Attilio Depoli.

The area of the new State is given as 8 sq. miles, and the population as 49,806.

By Article 5 of the Treaty of Rapallo, it is provided that the area of Fiume shall be delimited by a special commission composed half of Italian and half of Yugo-Slav delegates.

British Consul at Fiume.—A. Napier.

FRANCE.

Constitution and Government.

CENTRAL.

SINCE the overthrow of Napoleon III. on September 4, 1870, France has been under a Republican form of government, confirmed on February 25, and July 16, 1875, by a constitutional law, which has been partially modified in June, 1879, August, 1884, June, 1885, and July, 1889. It vests the legislative power in the Chamber of Deputies and the Senate, and the executive in the President of the Republic and the Ministry.

The President is elected for seven years, by an absolute majority of votes, by the Senate and Chamber of Deputies united in a National Assembly, or Congress. He promulgates the laws voted by both Chambers, and ensures their execution. He selects a Ministry from the two Chambers, but may, and sometimes does, choose ministers who are not members of either Chamber (e.g. a general as Minister for War, an admiral as Minister of Marine, a civilian as Minister for Foreign Affairs); he appoints to all civil and military posts, has the right of individual pardon, and is responsible only in case of high treason. The President concludes treaties with foreign Powers, but treaties which affect the area of France or of French colonies must be approved by the Legislature, and he cannot declare war without the previous assent of both Chambers. Every act of the President has to be countersigned by a Minister. With the consent of the Senate he can dissolve the Chamber of Deputies. In case of vacancy, the two Chambers united immediately elect a new President.

President of the Republic.—Alexandre Millerand; born February 10, 1859; elected September 23, 1920.

The Ministers or Secretaries of State, the number of whom varies, are usually, but not necessarily, members of the Senate or Chamber of Deputies. The President of the Council (Premier) chooses his colleagues in concert with the President of the Republic. Each Minister has the direction of one of the great administrative departments and each is responsible to the Chambers for his acts, while the Ministry as a whole is responsible for the general policy of the Government.

The Ministry consists of the following members, appointed January 15, 1922:—

Prime Minister and Minister of Foreign Affairs.—M. Raymond Poincaré (Senator).
Deputy Prime Minister and Minister of Justice.—M. Colrat (Deputy).
Minister of the Interior.—M. Maurice Maunoury (Deputy).
Minister of War.—M. Maginot (Deputy).
Minister of Marine.—M. Kaiberti (Senator).
Minister of Finance.—M. de Lasteyrie (Deputy).
Minister of Colonies.—M. Albert Sarraut (Deputy).
Minister of Public Instruction and of Fine Arts.—M. Léon Bérard (Deputy).
Minister of Public Works.—M. Y. Le Trocquer (Deputy).
Minister of Commerce.—M. L. Dior (Deputy).
Minister of Agriculture.—M. Chéron (Senator).
Minister of Labour.—M. Peyronnet (Senator).
Minister of the Liberated Territories.—M. Reibel (Deputy).
Minister of Hygiene, of Assistance, and of Social Provision.—M. Paul Strauss (Senator).

The following is a list of the Sovereigns and Governments of France, from the accession of the House of Bourbon :—

<i>House of Bourbon.</i>		<i>Second Republic.</i>	
Henri IV.	1589-1610	Provisional Government, Feb—Dec.	1848
Louis XIII., 'le Juste'	1610-1643	Louis Napoléon	1848-1952
Louis XIV., 'le Grand'	1643-1715		
Louis XV.	1715-1774	<i>Second Empire.</i>	
Louis XVI. (died 1793)	1774-1792	Napoléon III. (died 1873) . . .	1852-1870
<i>First Republic.</i>		<i>Third Republic.</i>	
Convention	1792-1795	Government of National Defence	1870-1871
Directory	1795-1799	Adolphe Thiers, President. . . .	1871-1873
Consulate	1799-1804	Marshal MacMahon	1873-1879
<i>First Empire.</i>		F. J. P. Jules Grévy	1879-1887
Napoléon I. (died 1821)	1804-1814	F. Sadi Carnot	1887-1894
<i>House of Bourbon restored.</i>		Casimir Perier (June—Jan.)	1894-1895
Louis XVIII.	1814-1824	Félix Faure	1895-1899
Charles X. (died 1836)	1824-1830	Émile Loubet	1899-1906
<i>House of Bourbon-Orléans.</i>		Armand Fallières	1906-1913
Louis-Philippe (died 1850) . . .	1830-1848	Raymond Poincaré	1913-1920
		Paul Deschanel	1920
		Alexandre Millerand	1920

The Chamber of Deputies is elected for four years, by manhood suffrage, and each citizen 21 years old, not actually in military service, who can prove a six months' residence in any one town or commune, and not otherwise disqualified, has the right of vote. Deputies must be citizens and not under 25 years of age. The manner of election of Deputies has been modified several times since 1871. The *scrutin de liste*, under which each elector votes for as many Deputies as the entire department has to elect, was introduced in 1871. In 1876 it was replaced by the *scrutin d'arrondissement*, under which each department is divided into a number of *arrondissements*, each elector voting for one Deputy only; in 1885 there was a return to the *scrutin de liste*, in 1889 the uninominal vote was reintroduced; and in 1919 the *scrutin de liste*, with proportional representation, was again adopted. In 1889 it was enacted that each candidate is bound to make, within the fortnight which precedes the elections, a declaration as to his being a candidate for a given constituency, and for one constituency only—all votes which eventually may be given for him in other constituencies being reckoned as void. The Chamber verifies the powers of its members. In each constituency the votes are cast up and the Deputy proclaimed elected by a commission of Councillors General appointed by the prefect of the department. The Chamber is now composed of 610 Deputies.

Chamber of Deputies, elected November 16, 1919 :—Republicans of the Left, 133; Progressives, 130; Socialist Radicals, 83; Action Libérale, 72; Unified Socialists, 68; Radicals, 60; Conservatives, 31; Republican Socialists, 27; Dissident Socialists, 6.

The Senate is composed of 314 members, elected for nine years from citizens 40 years old, one-third retiring every three years. The election of the Senators is indirect, and is made by an electoral body composed (1) of delegates chosen by the Municipal Council of each commune in proportion to the population; and (2) of the Deputies, Councillors-General, and District Councillors of the department. Besides the 225 Departmental Senators elected in this way, there were, according to the law of 1875, 75 Senators elected for life by the united two Chambers; but by the Senate Bill of 1884 it was enacted that vacancies arising

among the Life Senatorships would be filled by the election of ordinary nine-years Senators, the department which should have the right to the vacant seat to be determined by lot. The Princes of deposed dynasties are precluded from sitting in either House.

Senate, elected on January 11, 1920: Radicals, 120; Republicans of the Left, 58; Progressives, 23; Conservatives, 20; Liberal Republicans, 14; Socialist Republicans, 2; Unified Socialists, 2.

The Senate and Chamber of Deputies assemble every year on the second Tuesday in January, unless a previous summons is made by the President of the Republic, and they must remain in session at least five months out of the twelve. The President is bound to convoke them if the demand is made by one-half of the number of members composing each Chamber. The President can adjourn the Chambers, but the adjournment cannot exceed the term of a month, nor occur more than twice in the same session.

Bills may be presented either in the Chamber or Senate by the Government, or on the initiative of private members. In the first case they are remitted to the bureaux for examination; in the second, they are first submitted to a commission of parliamentary initiative. Financial laws must be first presented to and voted by the Chamber of Deputies.

The Senate, constituted as a High Court of Justice, tries cases of attempt against the safety of the State or of plotting to change the form of government.

Senators and Deputies are paid 27,000 francs (1,080*l.*) a year and the Presidents of the two Chambers receive allowances for the expense of entertainment. Members of both Chambers travel free on all railways by means of a small annual payment. The dotation of the President of the Republic is 1,200,000 francs (48,000*l.*), with a further allowance of 1,200,000 francs for his expenses. On January 1, 1905, a fund was instituted for pensions to ex-Deputies, or their widows and orphans. It is supported by contributions from Deputies (deducted from their pay) as well as by gifts and legacies.

France has, besides, a special institution under the name of *Conseil d'État*, which was introduced by Napoleon I., and has been maintained since. It is presided over by the Minister of Justice or (in his absence) by a vice-president, and is composed of Councillors, Masters of Requests (*Maîtres des Requêtes*), and Auditors, all appointed by the President of the Republic. Its duty is to give opinion upon such questions, chiefly those connected with administration, as may be submitted to it by the Government. It is judge in the last resort in administrative suits, and it prepares the rules for the public administration.

II. LOCAL GOVERNMENT.

For administrative purposes France is divided into 90 departments including the 'territory of Belfort' (remnant of the department of Haut-Rhin). Since 1881 the three departments of Algeria are also treated for most purposes, as part of France proper. The department has representatives of all the Ministries, and is placed under a Prefect, nominated by Government, and having wide and undefined functions. He is assisted by a Prefecture Council, an administrative body, whose advice he may take without being bound to follow it. The Prefect is a representative of the Executive, and, as such, supervises the execution of the laws, issues police regulations, supplies information on matters which concern the depart-

ment, nominates subordinate officials, and has under his control all officials of the State. There is a Sub-Prefect in every *arrondissement*, except in those containing the capitals of departments and the department of the Seine.

The unit of local government is the *commune*, the size and population of which vary very much. There were, in 1921, in the 90 departments into which France was divided, 37,963 communes. Most of them (33,986) have less than 1,500 inhabitants, and 22,024 have even less than 500; while 140 communes only have more than 20,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 10 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 4 years by Frenchmen after 21 years and 6 months' residence; but each act of the Council must receive the approval of the Prefect, while many must be submitted to the Council General or even to the President of the Republic, before becoming lawful. Even the commune's quota of direct taxation is settled by persons (*répartiteurs*) chosen by the Prefect from among the lists of candidates drawn up by the Municipal Council.

Each Municipal Council elects a Mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the Prefect.

In Paris the Municipal Council is composed of 80 members; each of the 20 *arrondissements* into which the city is subdivided has its own Mayor. The place of the Mayor of Paris is taken by the Prefect of the Seine, and, in part, by the Prefect of Police. Lyons has an elected Mayor, but the control of the police is vested in the Prefect of the department of the Rhone.

The next unit is the *canton* (3,019), which is composed of an average of 12 communes, although some of the largest communes are, on the contrary, divided into several cantons. It is a seat of a justice of the peace (*juge de paix*), but is not an administrative unit.

The district, or *arrondissement* (385), has an elected *conseil d'arrondissement*, with as many members as there are cantons, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General. That body stands under the control of the Sub-Prefect. A varying number of *arrondissements* form a department, which has its *conseil général* renewed by universal suffrage to the extent of one-half every three years (one Councillor for each canton). These *conseils* deliberate upon all economical affairs of the department, the repartition of the direct taxes among the *arrondissements*, the roads, normal schools, and undertakings for the relief of the poor. Their decisions are controlled by the Prefect, and may be annulled by the President of the Republic.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

The legal population at the date of the last two enumerations was:—

Departments	Area : Engl. sq. miles	Population		Population per square mile. 1921
		March, 1911	March, 1921	
Ain	2,248	342,482	315,757	140·5
Aisne	2,866	530,226	421,515	147·1

Total	212,659	39,604,992 ¹	39,209,518 ¹	184.4

¹ Not including military and naval forces and crews of the commercial navy abroad, which in 1911 numbered 192,973, and in 1921, 93,471.

According to the Peace Treaty with Germany (June 28, 1919) Alsace-Lorraine has been transferred to France, to date from the Armistice of November 11, 1918. The districts of Lower Alsace, Upper Alsace and Lorraine have become the departments of Bas-Rhin (1,848 square miles and population 651,686); Haut-Rhin (1,354 square miles, population 468,943), and Moselle (2,403 square miles, population 589,120).

Total area added to France is 5,605 square miles, population (1921) 1,709,749. Thus the total area of France is 212,659 square miles and population 39,209,518.

According to the Treaty of Versailles (article 45), France obtained from Germany as a compensation for the destruction of the coal mines in the North of France, the exclusive rights of exploitation of the coal mines situated in the Saar Basin. The area of this district is about 751 square miles, and the population 657,870. For the next 15 years the Saar Basin will be governed by a Commission of Five, chosen by the League of Nations. At the end of 15 years the population will decide by vote one of three alternatives, viz., the maintenance of the rule set up by the Treaty, union with France, or union with Germany.

Between the years 1811 and 1820 the average annual surplus of births over deaths was 5·7 per thousand of population; between 1851 and 1860 it was 2·4; and between 1881 and 1885 it was 1·6. The average number of births per marriage was (1881-85) about 3; in 1891 it was 2·1.

In the following table, the third, fourth, and fifth columns give [in brackets] for the first five censuses the population, its density, and its average annual increase of France, excluding Alsace-Lorraine, and are thus comparable with the data for the censuses posterior to the loss of Alsace and Lorraine (1872-1911).

Dates	Area: sq. miles	Domiciled Population	Inhabitants per sq. mile	Annual Increase per 10,000 inhabits.
1801	207,765	27,349,003 [26,930,756]	131 [130]	— —

On March 6, 1921, the urban population was 18,205,492, and rural 21,004,026.

For fiscal and electoral purposes the population of each commune is divided into *agglomerated*, *scattered*, and *separated* (*comptée à part*); the first two constitute the municipal population, and the third consists of garrison, college, prison, and hospital population. Different from this is the distinction between urban and rural population, a commune being urban where the agglomerated population is over 2,000, and rural where under 2,000.

Religion.

No religion is recognised by the State.

Under the law promulgated on December 9, 1905, the Churches were separated from the State, the adherents of all creeds were authorised to form associations for public worship (*associations cultuelles*). As transitory measures, ecclesiastics over 45 years of age and of over 25 years of

service remunerated by the State were entitled to a pension, and all other ecclesiastics were to receive a grant during a period of from four to eight years. All buildings actually used for public worship and as dwellings in that connection were to be made over, after an inventory was taken, to the associations for public worship: the places of worship for the total period of the existence of these associations, the ecclesiastical dwellings for a time.

The law of January 2, 1907, provides (among other things) that, failing *associations cultuelles*, the buildings for public worship, together with their furniture, will continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion; but, in each case, there is required an administrative act drawn up by the *préfet* as regards buildings belonging to the State or the Departments, and by the *maire* as regards buildings belonging to the Communes. Forms of the documents necessary under the new law have been supplied by the Government.

There are 17 archbishops and 68 bishops of the Roman Catholic Church in France, not including Alsace and Lorraine, Algeria or the colonies, in addition to 51,000 clergy of various grades. The Protestants of the Augsburg Confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is at Paris. There are about a million Protestants in France.

The Associations law, passed July 1, 1901, requires religious communities to be authorised by the State, and no monastic association can be authorised without a special law in each particular case. Before the passing of that law there were 910 recognised associations, and 753 not recognised; the establishments, mostly not recognised, numbered 19,514, and their members 159,628 (30,136 men and 129,492 women). After the passing of the law, of the 753 associations not recognised, 305 dissolved themselves and 448 asked for authorisation, which was refused by the Chambers to the majority of them.

Instruction.

The Minister of Instruction, seconded by the Government educational bureaux and inspectors-general, directs public and controls private schools. The public schools constitute the University of France and are divided into three classes, primary, secondary, and superior. The Superior Council of 52 members has deliberative, administrative, and judiciary functions, and a Consultative Committee advises respecting the working of the school system, but the inspectors-general are in direct communication with the Minister. For local educational administration France is divided into 17 circumscriptions, called Academies, each of which has an Academic Council whose members comprise a certain number elected by the professors or teachers. The Academic Councils deal with all grades of instruction. Each is under a Rector, and each is provided with academy inspectors, one for each department except Nord which has two (one being for primary instruction), and Seine which has eight (one being director of primary instruction), besides primary inspectors of schools, usually one for each *arrondissement*. 20 inspectors (male or female) for the department of the Seine. Each department has a council for primary educational matters, the prefect being president, and this body has large powers with respect to the inspection, management and maintenance of schools and the opening of free schools.

The law of August 9, 1879, rendered obligatory for each department the maintenance of two primary normal schools, one for school-masters,

the other for school-mistresses; there are two higher normal schools of primary instruction: one at Fontenay-aux-Roses for professors for normal schools for school-mistresses, the other at St. Cloud for professors for normal schools for school masters. The law of June 16, 1881, made instruction absolutely free in all primary public schools; that of March 28, 1882, rendered it obligatory for all children from 6 completed to 13 years of age. The law of October 30, 1886, is the organic law of primary instruction now in force; it established that teachers should be lay; for infant schools it substituted *écoles maternelles* instead of *salles d'asile*; it fixed the programmes of instruction, and established freedom of private schools under the supervision of the school authorities.

The following table shows the condition of primary instruction in 1918-19 and 1919-20:—

Description of Schools	France and Algeria (excluding Alsace-Lorraine)					
	1918-19			1919-20		
	Schools	Teachers	Enrolled Pupils	Schools	Teachers	Enrolled Pupils
<i>Infant Schools:</i>						
Public	2,078	4,942	195,071	2,063	5,242	189,762
Private	855	1,069	46,079	786	999	37,394
Total	2,933	6,011	241,150	2,849	6,241	227,156
<i>Primary and Higher schools:</i>						
Public	56,278	99,468	3,066,956	56,503	102,433	3,002,666
Private	11,740		825,825	11,512		833,150
Total	68,018	99,468	3,892,781	68,015	102,433	3,835,816

Courses of instruction for adults are conducted in the evening by teachers in their schools.

In 1920, 2·12 per cent. of the conscripts could neither read nor write, as compared with 2·3 per cent. in 1914.

The number of primary normal schools (exclusive of Fontenay and St. Cloud) is 84 for school-masters, and 82 for school-mistresses (France and Algeria). The number of pupil-teachers in primary normal schools in 1919-20 was 4,617 men and 5,135 women.

Secondary Instruction: Boys.—Secondary instruction is supplied in two types of schools—by the State in the lycées, and by the communes in the colleges, by associations and by private individuals in free establishments (*écoles libres*). The course of study extends over 7 years.

The number of public secondary schools for boys and the number of pupils for 3 years were as follows:—

Public Institutions: France and Algeria	1918 ¹		1919 ²		1920 ²	
	No.	Pupils	No.	Pupils	No.	Pupils
<i>Lycées</i>	—	58,258	125	73,174	125	74,630
<i>Communal colleges</i>	—	29,844	238	36,000	241	37,618

¹ Not including the invaded territories.

² Figures for the whole of France, 90 departments.

Girls.—The following table shows the condition of the institutions for girls :—

Institutions	1918 ¹		1919 ²		1920 ²	
	No.	Pupils.	No.	Pupils	No.	Pupils
<i>Lycées</i> (France and Algeria)	125	21,611	59	27,409	67	30,099
<i>Colleges</i> (France and Algeria)		11,291	87	14,187	84	13,643
Secondary courses (France and Algeria)	49	5,414	50	5,955	47	5,40
Total	174	38,316	196	47,551	198	49,342

¹ Not including invaded territories.

² Including Alsace and Lorraine.

Higher Instruction is supplied by the State in the universities and in special schools, and by private individuals in the private faculties and schools. The freedom of higher instruction was established by the law of July 12, 1875, modified by that of March 18, 1880, which reserved to the State faculties the exclusive right to confer degrees. A decree of December 28, 1885, created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of July 10, 1896.

There are 17 Universities in France. The following table shows the year of foundation and the total number of students on July 31, 1921 :—

Universities	Students	Universities	Students
Aix-en-Provence (1409)	1,596	Lyon (1808)	3,400
Algiers	1,414	Montpellier (1125)	2,615
Besançon (1485)	266	Nancy (1572)	2,002
Bordeaux (1441)	2,640	Paris (1150)	21,232
Caen (1432)	1,055	Poitiers (1431)	1,238
Clermont-Ferrand (1808)	167	Rennes (1735)	1,946
Dijon (1722)	744	Strasbourg (1567)	2,415 ¹
Grenoble (1339)	2,737	Toulouse (1230)	2,680
Lille (1530)	1,475	Total	49,931

¹ Does not include students in the two faculties of Theology.

The faculties are of four kinds : 15 faculties of Law (Paris, Aix, Bordeaux, Caen, Dijon, Grenoble, Lille, Lyon, Montpellier, Nancy, Poitiers, Rennes, Strasbourg, Toulouse, and Algiers); 9 faculties of Medicine (Paris, Montpellier, Bordeaux, Lille, Lyon, Toulouse, Nancy, Strasbourg, and Algiers); 17 faculties of Science (Paris, Besançon, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseille, Montpellier, Nancy, Poitiers, Rennes, Toulouse, Strasbourg, and Algiers); 17 faculties of letters (at the towns last named); 8 higher pharmacy schools and mixed faculties of medicine and pharmacy; 15 schools with full functions and preparatory schools of medicine and pharmacy.

The following statement shows the number of students by faculties or

schools in January, for 3 years (excluding the students of the University of Strasbourg in 1919 :—

Students of	1919	1920	1921
	State Institutions	State Institutions	State Institutions
Law	7,735	13,948	17,376
Medicine	6,542	10,194	9,952
Sciences	5,979	10,517	10,918
Letters	6,339	6,355	7,892
Pharmacy	1,215	1,693	1,627
Schools of Medicine and Pharmacy	2,080	1,827	1,962
Theology	—	404	204
Total	29,890	44,938	49,931

There are free faculties: at Paris (the Catholic Institute of Paris comprising the law and advanced scientific and literary studies); Angers (theology, law, sciences, letters, agriculture); Lille (theology, law, medicine and pharmacy, sciences, letters, social sciences and politics); Lyon (theology, law, sciences, letters); Marseille (law); Toulouse (the Catholic Institute with theological, literary, and scientific instruction). There is, besides, in Paris a large institution for free higher instruction, the *École libre des Sciences Politiques*.

The State faculties confer the degrees of bachelor, of licentiate, and of doctor. Admission to degrees (*agrégations*) is by special competition, which lead to the title of *professeur* in secondary and in higher instruction.

The other higher institutions dependent on the Ministry of Public Instruction are the *Collège de France* (founded by Francis I. in 1530), which has courses of study bearing on various subjects, literature and language, archæology, mathematical, natural, mental and social science (political economy, &c.); the Museum of Natural History giving instruction in the sciences and nature; the *École Pratique des Hautes Études* (history and philology, mathematical and physico-chemical sciences, and the sciences of nature and of religion), having its seat at the Sorbonne; the *École Normale Supérieure*, which prepares teachers for secondary instruction and, since 1904, follows the curricula of the Sorbonne without special teachers of its own; the *École des Chartes*, which trains the archivist paleographers; the *École des Langues Orientales vivantes*; the *École du Louvre*, devoted to art and archæology; the *École des Beaux-Arts*, and the Bureau des Longitudes, the Central Meteorological Bureau; the Observatoire of Paris; and the French Schools at Athens, Rome, Cairo and Indo-China, besides a school for Morocco.

Outside Paris there are eight observatories (Meudon, Besançon, Bordeaux, &c.). The observatory at Nice is dependent on the Academy of Sciences.

Professional and Technical Instruction.—The principal institutions of higher or technical instruction dependent on other ministries are: the Conservatoire des Arts et Métiers at Paris (with 20 evening courses on the applied sciences and social economy), the *École Centrale des Arts et Manufactures*, the *École des Hautes Études Commerciales*, 12 higher schools of commerce with about 1,300 pupils, dependent on the Ministry of Commerce; the National Agronomic Institute at Paris, the Veterinary school at Alfort,

a school of forestry at Nancy, national agricultural schools at Grignon, Rennes, Montpellier, 46 practical schools of Agriculture, &c., dependent on the Ministry of Agriculture; the École Polytechnique, the École Supérieure de Guerre, the military school at St. Cyr, the École de Cavalerie at Saumur, and other schools dependent on the Ministry of War; the Naval School at Brest dependent on the Ministry of Marine; the School of Mines at Paris, the School of Bridges and Roads at Paris, with other schools dependent on the Ministry of Public Works; the School of Mines at St. Etienne, and the Schools of Miners at Alais and Douai; the École Coloniale at Paris, dependent on the Ministry of the Colonies. The École des Beaux Arts, the École Nationale des Arts Décoratifs, and the Conservatoire de Musique et de Déclamation depend on the department of the Under Secretary for the Fine Arts, which is attached to the Ministry of Public Instruction. In the provinces there are National schools of fine arts, and schools of music, and also several municipal schools as well as free subventioned schools, etc.

Technical schools of a somewhat lower grade (dependent on the Ministry of Public Instruction) are very numerous, comprising (in 1920—the latest available figures) six national schools of arts and trades (Aix, Angers, Chalons, Cluny, Lille, Paris), two schools of horology, five national professional schools, 54 practical schools of commerce and industry (of which 16 are for girls), 18 practical schools of industry; there are also 35 schools of industries, with 5,550 pupils; 13 municipal professional schools in Paris, with 1,385 pupils, and about 370 private schools, with 92,000 pupils.

Justice and Crime.

The Courts of lowest jurisdiction in France are those of the Justices of Peace (*juges de paix*, one in each *canton*) who try small civil cases and act also as judges of Police Courts, where all petty offences (*contraventions*) are disposed of. The Correctional Courts pronounce upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They have no jury, and consist of 3 judges belonging to the civil tribunals of first instance. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who may either dismiss the case or send it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge. The Court of Assizes is assisted by 12 jurors, who decide by simple majority on the fact with respect to offences amounting to crimes. The highest courts are the 26 Courts of Appeal, composed each of one President and a variable number of members, for all criminal cases which have been tried without a jury and one Court of Cassation which sits at Paris, for all criminal cases tried by jury, so far as regards matters of law.

For civil cases, wherein the amount in dispute is between 200 and 1,500 francs, there is, in each *arrondissement*, a tribunal of first instance; above these are the Appeal Courts and the Court of Cassation. For commercial cases there are, in 226 towns, Tribunals of Commerce and Councils of experts (*prud'hommes*). In the towns are police courts.

All Judges are nominated by the President of the Republic. They can be removed only by a decision of the Court of Cassation constituted as the *Conseil Supérieur* of the magistracy.

The French penal institutions consist, first, of Houses of Arrest (3,258 *chambres de sûreté* and *dépôts de sûreté* at the end of 1917). Next come Departmental Prisons (68 in 1917), also styled *maisons d'arrêt, de justice* and *de correction*, where both persons awaiting trial and those condemned to less than one year's imprisonment are kept, as also a number of boys and girls transferred from, or going to be transferred to, reformatories. The reforma-

tories are 14 for boys and 7 for girls, 10 for boys and 3 for girls being public, and 4 for boys and 4 for girls being private. The Central Prisons (*maisons de force et de correction*), where all prisoners condemned to more than one year's imprisonment are kept, provided with large industrial establishments for the work of prisoners, are 9 for men and 2 for women.

All persons condemned to hard labour and many condemned to 'reclusion' are sent to New Caledonia or Guiana (military and *récidivistes*); the *dépôt de forçats* of St. Martin-de-Ré is a *dépôt* for transferred hard-labour convicts.

Pauperism and Relief of Old Age.

In France the poor are assisted partly through public 'bureaux de bienfaisance' and partly by private and ecclesiastical charity. They are partly under the care of the communes and partly of the departments, both of which contribute, and ultimately under the supervision of Government. The funds of the 'bureaux de bienfaisance' are partly derived from endowments, partly from communal contributions, and partly from public and private charity. In 1912, the bureaux expended 42,497,000 francs and assisted 1,259,884 persons. Public assistance is rendered to poor or destitute children. At the end of 1912 the institutions for this purpose contained 231,337 children; the expenditure during the year amounted to 42,521,000 francs. In 1912 the hospitals for the sick, infirm, aged, or infants, numbered 1,892; and at the end of the year had 68,700 patients, besides 75,540 aged and infirm inmates; their expenditure for 1912 amounted to 204,405,580 francs. In the same year 986,719 persons received gratuitous medical assistance at home and 184,582 in hospitals, the expenditure for such purposes amounting to 28,997,952 francs. At the end of 1912 the asylums for imbeciles, national, departmental, and private, had 77,237 patients.

An Act was passed in 1905 for the relief of the aged poor, the infirm, and the permanently incurable, age limit, 70; but by the amendment of the Act, April 5, 1910, this was reduced to 65. The same amendment provided for limited help being given to those between the ages of 65 and 70. On December 31, 1912, there were 133,396 such persons in receipt of the limited assistance, the total expenditure for 1912 having been 9,189,414 francs. The Act of 1910 provided that the cost of the scheme should be borne by the communes, the departments, and the State. The number of persons registered for relief has risen from 511,446 on December 31, 1908, to 599,061 on December 31, 1911, and to 644,461 on December 31, 1912. The cost to the State alone for 1910 was 45,000,000 francs; for 1911, 46,300,000 francs; and for 1912, 51,598,000 francs. In addition, contributions of the departments and communes totalled 48,500,000 francs in 1911, and 53,100,000 francs in 1912; but it has to be remembered that the increased expenditure under this law is in part balanced by the diminished activities of the 'bureaux de bienfaisance' in assisting invalids under 60 years of age. The Old-Age Pensions Law of April 5, 1910, as amended on February 27, 1912, provides for all wage-earners old-age pensions towards which both employers and workers contribute. Contributions are to be paid up to the 60th year of the worker's life, and the State will contribute 100 francs. This sum will be increased by one-tenth for every insured worker who has brought up 3 children of the age of 16. On July 1, 1920, 8,349,744 persons were registered under the scheme.

A law of March 24, 1873, provides protection for new-born infants. In 1913 in 82 departments there were 77,829 such infants who came within the scope of the law. In 1913 two further laws were introduced: that of June 17 to give relief, varying from 0.50 to 1.50 francs per day, to women

in confinement, and that of July 14 to give relief to families with numerous children. The rate is between 60 and 90 francs for every child beyond the third.

Finance.

I. STATE FINANCE.

The following figures do not include the *budget sur ressources spéciales*, and represent the actual verified revenue (inclusive of loans) and expenditure for 3 years and budget estimates for 3 years:—

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	Francs	Francs		Francs	Francs
1918 ¹	10,064,657,897	9,956,644,778	1921 ²	23,302,584,085	23,262,969,977

England	2,350,000L.	147.5	5.4
Uruguay	15,000,000 piastres	135.0	6.7
Total of Bank Credits		1,382.7	79.0
Total Floating Debt		33,438.0	1,572.5
Total Foreign Debt		74,876.4	3,865.9

The total annual debt charge on March 31, 1922, was 14,929 million francs, including the floating debt.

France has advanced to the Allied Governments (up to March 1, 1922) a total of 11,074 million francs, of which the principal items are as follows (in millions of francs): Belgium, 3,590; Serbia, 740; Poland, 185; Czechoslovakia, 79; Russia, 4,938; Greece, 647; Rumania, 886.

The public fortune of France was estimated in 1912 (latest available date) to amount to 304,517 million francs.

II. LOCAL FINANCE.

For 1916 the revenue of the departments of France amounted to 576,954,000 francs (23,078,160L.). The departmental debt stood at 1,164,113,000 francs (46,564,520L.).

For the year 1921, the revenue of the City of Paris was estimated at 1,003,494,949 francs, and the expenditure at 986,394,949 francs. On January 1, 1922, the debt of the City of Paris was 6,119,511,146 francs.

Defence.

I. LAND DEFENCES.

France has a coastline of 1,760 miles, 1,304 on the Atlantic and 456 on the Mediterranean. Its land frontier extends over 1,665 miles, of which 1,246 miles are along the Belgian, German, Swiss, and Italian frontiers, and 419 along the Spanish frontier.

The permanent land defences of France now include the former German fortresses of Strassburg, Metz and Thionville, the former being in Alsace and the two latter in Lorraine. West of these lies the former first line of French permanent defences, namely the first class fortresses of Verdun, Toul, Epinal and Belfort. The experiences of the Great War, which brought to light the power of mobile heavy artillery, the fire of which could be observed and directed from aeroplanes against permanent defences, will affect profoundly the principles of permanent fortification, and it is doubtful if many even of the first-class fortresses will in future be maintained, while those of the second and third classes will almost certainly disappear in so far as they have been designed to meet land attack. On the other hand coast defences will probably be maintained. On the coast Toulon, Rochefort, Lorient, Brest, and Cherbourg are naval harbours surrounded by forts.

II. ARMY.

The French Army is divided into the Metropolitan and the Colonial Armies, both are under the War Minister, but the estimates for Colonial troops other than those maintained in Algeria, Tunis, and Morocco are included in the budget of the Minister for the Colonies. The Metropolitan Army is divided into the *Active Army*, the *Reserve Troops* and the *Territorial Army*. The Army, with the exception of the Armies of Occupation is localised and territorialised in the military government of Paris, 20 Army Corps districts and the territories of Alsace and Lorraine. The normal composition of a French Army Corps is 2 infantry divisions, 1 regiment of cavalry, 1 artillery brigade of three regiments, 1 battalion of engineers, 1 group and 1 company of observation balloons, and administrative services.

The infantry division consists of 3 regiments of infantry each of 3 battalions, and 1 regiment of artillery of 3 groups each of 3 batteries. The cavalry division consists of 3 cavalry brigades each of 2 regiments, 1 group of horse artillery, and 1 group of cyclist chasseurs.

The peace establishment of the French Army provides for 20 Army Corps of the Active Metropolitan Army, 1 Colonial Army Corps of 3 divisions quartered in France, 1 Algerian Army Corps of 3 divisions, 1 Tunisian division, 4 Aviation brigades, 3 brigades of Tanks, and 39 regiments of Heavy Artillery not allotted to Army Corps. The establishment of the Active Metropolitan Army, exclusive of the North African troops, by units was at the end of 1922 as follows:—

Infantry		Cavalry		Artillery		Engineers		Aviation		Tanks	
Regiments of 3 bns.	143	Cuirassier Regts.	6	Field Regts.	42	Regiments	11	Pursuit Regts.	4	Light Regts.	9
Chasseurs (bns.)	31	Dragoon Regts.	37	Medium Regts.	20	Battalions	15	Bombing Regts.	5	Heavy groups	3
Cyclists (groups)	6	Chasseur Regts.	16	Heavy (tractor) Regts.	11			Observation Regts.	7		
		Hussar Regts.	11	Heavy (horse) Regts.	20			Balloon Regts.	2		
		Motor Machine Gun (groups)	10	Fortress Regts.	9						
				Mountain Regts.	2						
				Horse (groups)	6						

The peace establishment of the Active Metropolitan Army in 1922 was 335,000, included in this is the Air Force establishment of 22,600. The Armies of Occupation, which in November, 1922, numbered 160,000 men, are not included in these figures. Enlistment for the Metropolitan Army is on a compulsory basis, but liberal exemptions are allowed. At present the average term of service with the colours is 2 years and the average annual contingent is 250,000, the surplus being accounted for by the French soldiers serving outside France on various terms of service. In January, 1923, the Army of Occupation in the Rhine provinces numbered 122,000, in the Saar 8,000, in Constantinople 8,000, in Syria and other mandated territories 28,000; total 160,000. The garrison of Morocco numbered 85,000,

of Algeria and Tunis 75,000, and of other colonies 70,000; tota 230,000. The period of service in the active army is 1½ years.

The *Reserve Troops* form divisions corresponding to those in the *Active Army* on mobilisation, in the same districts as those to which the *Active* divisions belong. The *Territorial Army* forms a second line and is similarly organised in divisions on mobilisation. The *Customs Corps* is organised in battalions as are the *Chasseurs Forestiers*, these are both recruited from men who have passed into the *Territorial Army*.

The *Gendarmerie* is a police force recruited from the Army but performing civil duties in time of peace. There is a legion in each military district. The strength of the *Gendarmerie* is 21,700, of whom about half are mounted.

The *Garde Républicaine* is also a police force and performs duties in Paris similar to those performed by the *Gendarmerie* in the districts.

The *Colonial Army* is distinct from the *Metropolitan*, and consists partly of white troops and partly of native troops. The Colonial white troops are recruited either by voluntary enlistment, or by voluntary transfer from the *Metropolitan Army*.

One Colonial Army Corps of 3 divisions and 1 Artillery brigade of white troops is quartered in France. The 19th Army Corps, partly of white and partly of native troops is composed of 3 divisions, each with a cavalry brigade, and is quartered in Algiers, and the Tunis division is quartered in Tunis. A Moroccan Army Corps is in process of formation, but at present a number of Moroccan troops form part of the Army of Occupation in Germany. The establishment of the Colonial Army and North African troops by units is as follows:—

Infantry (white)	Infantry (white, colonial and native)	Cavalry	Artillery
Regiments (3 battalions) . . . 16	Zouaves Regts. . . 6	Chasseurs Regts. (d'Afrique) . . 6	Field Regts. 10
Battalions . . . 3	Tirailleur Regts. (Moroccan and Algerian) . . . 46	Spahis Regts . . 12	Heavy Regt. 1
Companies . . . 3	Mixed Regts. (part white, part Moroccan) . . 6	Mixed " . . 3	Field groups 8
Foreign Legion (Regts.) . . . 2	Senegalese Regts. . . 15		
	Tonkinese " . . 4		
	Annamites " . . 1		
	Malagase " . . 4		

The peace establishment of the Colonial Army and North African troops, which has been very much increased as compared with the pre-war establishment, was, in January 1923, 221,450, of which 176,971 were native troops. The peace establishment of the Active Metropolitan and Colonial armies for 1923 was 698,000, but this does not include certain native troops in the colonies.

The administration of the French Army consists of a General Staff and of a number of departments, all under the War Minister. In questions of strategy and of higher military policy the War Minister is assisted by a Council called the *Conseil Supérieur de la Guerre*, consisting of himself as President and twelve selected generals.

In September, 1919, it was decided that the uniform of the Army should

be the horizon-blue dress with kepi. The *Chasseurs* or Light Infantry battalions were, however, permitted to keep their distinctive dark blue uniform. Khaki was adopted for Colonial and North African troops.

The French infantry is armed with the Lebel magazine rifle : calibre 315. The French field gun is the 7.5 cm. (2.95 in.) Q.F., shielded gun. The French howitzer is the 10.5 cm. (3.35 in.) howitzer, and as the result of the war the French Army possesses a large variety of heavy guns of all calibres.

NAVY.

The situation of the French Navy is at the present time very remarkable. France has not yet ratified the Washington Treaty, though its provisions affect her very slightly. She was allowed to retain ten capital ships, but the *France* was lost at Quiberon Bay on August 25, 1922, and the nine remaining displace 197,670 metric tons, while her replacement tonnage is 177,800 metric tons (175,000 tons). She is not called upon to scrap any ship until 1930, though she may begin to build in 1927, or earlier if she wishes to replace the *France*. In replacement tonnage she is established as the equal of Italy. The programme voted in 1922 comprises three 9,000-ton 34-knot cruisers six flotilla leaders (2,500 tons, 32.5 knots), twelve destroyers (1,400 tons, 32.5 knots), and twelve submarines (1,100 tons submerged). The whole tendency is to devote attention to cruisers and the flotillas, and for these there is a further programme. The air service, which is an integral part of the Navy, is to be developed, and one of the battleships discontinued in 1920 is to be completed as an aircraft-carrier. The inclusion of ex-enemy light cruisers, destroyers, and submarines in the Fleet has strengthened it where it was weakest. A great number of old destroyers, torpedo boats, and submarines have been struck off the list. Economies are being made in other directions.

The Navy is under the supreme direction of the Minister of Marine, assisted by a Chief of the Staff. The latter has charge of all that concerns preparation for war, and is commander-in-chief designate. There are two sub-chiefs of the staff, of whom one is in charge of various sections, and the other of the work of the Military Cabinet. The Navy is now charged with control of the coast defences. The central administration embraces the directorates of *personnel*, *matériel*, and artillery, the inspectorate of works, the finance department, the services of submarine defences, hydrography, and other special branches. In addition to these are the Superior Council of the Navy, which advises the Minister on high policy, and several special committees. For purposes of administration the French coasts are divided into five maritime arrondissements, having their headquarters at the naval ports of Cherbourg, Brest, Lorient, Rochefort, and Toulon, each under a vice-admiral, with the title of Maritime Prefect. Two flag-officers are inspectors-general and commanders-in-chief designate in the Channel and Mediterranean. The chief torpedo-stations are Dunkirk, Cherbourg, Brest, Rochefort, Toulon, Corsica, Bizerta, Oran, Algiers, and Bona.

The French navy is manned partly by conscription and partly by voluntary enlistment. By the channel of the 'Inscription Maritime,' which was introduced by Colbert, and on the lists of which are the names of all male individuals of the 'maritime population,' France was formerly provided with a reserve of 114,000 men, of whom about 25,500 were usually serving with the fleet; now large numbers are taken from the shore for engine-room and other duties.

The ex-enemy vessels allotted to France are included in the following

summary—5 light cruisers, one flotilla leader, 12 destroyers, and 10 submarines.

	Complete at end of		
	1921	1922	1923
Dreadnoughts	7	7	6
Pre-Dreadnought battleships	9	3	3
Armoured cruisers	15	10	10
Light cruisers	13	5	5
Despatch Vessels, etc.	40	55	55
Destroyers	63	71 ¹	54 ¹
Torpedo boats	63	58	21
Submarines	49	53	51

¹ Including the ex-enemy flotilla leader, 'Amiral Sènès.'

In the ship tables which follow, all the older vessels have been removed as being no longer in service. The battleships are retained under the Washington agreement. The armoured cruisers are of a class that will not be maintained. The dates of intended scrapping, where indicated, are shown within brackets.

BATTLE FLEET.

Built under programme for	Name	Displacement	Armour		Armament	Torpedo Tubes	Indicated horse-power	Max. speed
			Belt	Guns				
<i>Pre-Dreadnoughts.</i>								
1906	{ Diderot . . . Voltaire . . . Condorcet . . . }	18,560	11	12	4 12in. 12 9'4in. .	5	22,500	19

1905	{ Edgar Quinet . . . W. Rousseau . . . }	14,300	6½	8	16 7'6in.	5	40,000	24
<i>Light Cruisers.</i>								
1907	Colmar	4,280	—	2	6 5'9in. ; 4 3'4in. .	2	30,000	26
1914	Metz	4,200	—	1	7 5'9in. ; 3 3'4in. .	4	45,000	28
1912	Mulhouse	4,480	—	2	5 5'9in. ; 2 3'4in. .	2	35,515	28
1913	Strasbourg	4,842	—	2	7 5'9in. ; 2 3'4in. .	2	26,000	27
1912	Thionville	3,500	—	—	9 3'9in.	1	25,000	27

The cruisers are all ex-German except the Thionville, which was Austrian. Other old French cruisers in the list are the Montcalm and Gueydon, which are temporarily retained. During the war 55 despatch vessels were put in hand, of which all but a few have been completed. Ten ex-German submarines have been added to the French flotilla; also the flotilla leader mentioned above, and 12 ex-German and Austrian destroyers.

Production and Industry.

I. AGRICULTURE.

Of the total area of France, including Alsace and Lorraine (136,101,760 acres) 25,521,108 acres were under forests in 1920, and 11,485,603 acres were returned as moor and uncultivated land, and 99,095,049 acres, of which 55,821,029 acres were arable, were returned as under crops, fallow and grass. The following tables show the area under the leading crops and the production (1 metric ton = 2205 lbs.) for three years, the results being still confined to the frontiers of 1914, except for 1921 and 1922:—

Crop	Area (1,000 acres)			Produce (1,000 metric tons)		
	1920	1921	1922	1920	1921	1922 ¹
Wheat	12,135	13,245	12,701	6,271	8,803	6,405
Mixed Corn	235	271	262	728	146	117
Rye	2,022	2,185	2,088	843	1,128	955
Barley	1,512	1,662	1,623	771	831	860
Oats	8,160	8,346	8,196	4,223	3,548	4,184
Potatoes	3,310	—	3,600	10,315	8,309	13,134
Beetroot, sugar	220	—	287	2,055	2,060	2,873

¹ Provisional.

The annual production of wine and cider appears as follows:—

Year	Under Vines, acres	Wine produced thousands of gallons	Wine Import, thousands of gallons	Wine Export, thousands of gallons	Cider produced 1,000's of gallons
1900	3,974,970	1,441,830	114,760	41,010	647,000
1919	3,737,745	1,195,778	130,790	24,684	491,326
1920	3,313,749	1,232,748	118,932	40,854	225,368
1921	3,228,376	990,374	111,892	37,180	576,356
1922	3,412,127	1,523,522	—	—	—

The production of fruits (other than for cider making) and nuts for 1921 is given in metric tons, as follows:—Apples 144,188, pears 52,067, olives 72,613, cherries 27,476, plums 20,904, peaches 19,511, apricots 8,344, oranges 988, tangerines 516, lemons 580, strawberries 7,374, currants 1,999, gooseberries 1,581, raspberries 647, figs 2,241, chestnuts 165,557, walnuts 22,201, almonds 7,429, truffles 73, and filberts 94.

On December 31, 1921, the numbers of farm animals were: Horses, 2,706,110; mules, 186,420; asses, 295,780; cattle, 13,343,440; sheep and lambs, 9,599,560; pigs, 5,166,080, goats, 1,361,180.

Silk culture, with Government encouragement (*primes*), is carried on in

24 departments of France—most extensively in Gard, Drôme, Ardèche, Var and Vaucluse. Silk production for 3 years :—

Year	Number of producers	Quantities of eggs put into incubation	Total production	Total value of produce
		Kilogs	1000 Kilogs.	1000 Francs.
1919 . .	52,401	1,427	2,322	17,439
1920 . .	65,946	1,831	3,230	45,707
1921 . .	48,924	1,354	2,524	20,510

In 1922 the total production of the cocoon crop was 2,571,915 kilos.

II. MINING AND METALS.

The following are statistics of the leading mineral and metal products for 3 years in thousands of metric tons :—

Mineral	1919	1920	1921	Metal Products	1919	1920	1921
Coal . .	21,546	21,293	23,241	Pig iron .	2,447	3,134	3,417
Lignite .	895	968	736	Finished iron and steel .	1,395	1,958	2,189
Iron ore .	9,413	13,922	14,118	Worked steel .	2,156	3,050	3,906

The production of ores for three years, in metric tons, is as follows :—

Ores	1919	1920	1921	Ores	1919	1920	1921
Lead, zinc, silver . .	21,300	43,000	8,400	Manganese .	7,000	10,300	1,900
Copper . .	40	100	100	Salt . . .	1,246,000	1,260,000	—
Antimony .	4,100	5,600	4,400	Alsace potash products .	965,000	192,500	148,900
Gold . . .	12,200	7,000	18,000				

III. MANUFACTURES.

For the numbers of persons employed in the more important industries in 1906, see THE STATESMAN'S YEAR-BOOK for 1916, page 877.

Sugar.—In 1921-22 there were 80 sugar works, employing 15,747 men, 873 women, and 318 children. The yield of sugar during 12 years (expressed in metric tons of refined sugar) was :—

Years	Tons	Years	Tons	Years	Tons	Years	Tons
1909-10	738,902	1912-13	877,656	1916-17	185,435	1919-20	155,101
1910-11	650,488	1914-15	302,961	1917-18	200,265	1920-21	305,041
1911-12	465,377	1915-16	135,899	1918-19	107,841	1921-22	278,273

Alcohol.—In 1906, 59,616 thousands of gallons of alcohol were produced; in 1913, 60,145; in 1917, 32,813; in 1918, 18,311; in 1919, 18,066; in 1920, 23,489; and in 1921, 34,184 thousands of gallons.

IV. FISHERIES.

For the French fisheries, including those of Algeria, the following are statistics for 1919 (the latest available):—Persons employed, 106,000; sailing boats, 18,005; tonnage, 120,922; steamers, 904; tonnage, 79,305; value of products, 447,647,000 francs.

Commerce.

In French statistics General Trade includes all goods entering or leaving France, while Special Trade includes only imports for home use and exports of French origin.

The chief subdivisions of the special trade in millions of francs were for three years:—

—	Imports			Exports		
	1920	1921	1922	1920	1921	1922
Food products	11,874.9	5,748.3	5,800.0	2,612.7	2,070.9	1,920.8
Raw materials	25,156.5	11,400.0	14,044.1	6,113.8	4,091.6	5,443.9
Manufactured goods	12,873.4	4,910.6	4,052.5	16,962.5	12,356.4	11,860.2
Postal packets	—	—	—	1,205.7	1,253.6	1,417.1
Total.	49,904.8	22,067.9	23,900.6	26,894.7	19,772.5	20,642.0

The chief articles of import and export (special trade) were in millions of francs:—

Imports		1921	1922 ¹	Exports		1921	1922 ¹
Wine	486.0		798.9	Arms and munitions		261.6	148.4
Wool	646.3		1,060.0	Textiles, silk . . .		1,262.4	1,377.8
Cereals	1,461.5		912.3	„ cotton . . .		1,275.4	—
Raw cotton	1,385.8		1,710.8	Wine		385.1	265.8
Coal and coke	2,813.1		2,391.5	Raw silk and yarn		184.2	225.9
Coffee	498.4		636.2	Paris goods, &c., &c.		270.7	261.9
Oil seeds and fruits .	678.1		837.3	Leather		462.8	434.9
Chemical products . .	387.8		384.5	Metal goods and tools		489.1	500.5
Petroleum	9.8.1		748.5	Automobiles . . .		665.8	580.6
Machinery	1,606.6		890.8	Chemical products		538.7	638.1
Copper	253.7		35.9	Pottery and glass .		209.1	208.3
Cast iron and steel . .	462.6		531.5	Clothing		1,218.5	1,372.4
Woollen textures . . .	97.8		112.2	Rubber goods . . .		100.5	535.9
Arms and munitions . .	10.3		130.9	Table fruits . . .		147.2	135.7
Metal goods	461.1		285.3	Milk, butter, cheese		96.8	128.6

¹ Provisional figures.

The chief imports for home use and exports of home goods are to and from the following countries, in thousands of francs :—

Countries	Imports		Exports	
	1921	1922	1921	1922
United Kingdom	3,038,915	3,403,146	3,179,375	3,853,533
Germany . . .	2,163,619	1,299,086	1,876,942	1,761,788
Belgium . . .	1,788,886	1,725,842	3,249,907	3,796,098
Switzerland . .	464,733	537,582	1,092,498	1,009,121
Spain . . .	477,064	350,231	562,660	520,634
Italy . . .	568,719	803,900	685,650	749,423
United States . .	4,065,466	3,853,618	2,197,815	1,972,689
Brazil . . .	451,518	470,025	165,422	153,533
Argentina . . .	595,912	792,739	270,666	300,433

The following table gives the declared value, in pounds sterling, of the staple articles consigned to the United Kingdom from France in four years according to Board of Trade returns :—

Staple Imports into U.K.	1918	1919	1920	1921
	£	£	£	£
Apparel &c. . . .	352,564	680,393	1,572,624	1,929,337
Silk manufactures . .	3,874,269	5,230,539	6,135,788	4,060,434
Woolen	27,088	310,654	2,677,011	2,444,319
Ribbons (silk) . . .	—	2,958,377	2,397,466	1,449,435
Hewn timber (pitprops) .	1,576,448	1,747,080	2,822,594	1,284,957
Wine	2,844,184	6,670,259	5,480,033	1,741,010
Ornamental feathers . .	216,975	255,669	247,695	282,560
Gloves. . . .	524,104	598,934	548,490	602,244
Motor-cars	297,688	245,414	2,025,546	1,331,782

The total quantity of wine imported into the United Kingdom from France in 1920 was 4,676,627 gallons; in 1921, 1,836,232 gallons.

The following table exhibits the value, according to Board of Trade returns, of the principal articles of British produce consigned from the United Kingdom to France in four years :—

Staple Exports from U.K.	1918	1919	1920	1921
	£	£	£	£
Woollen and Worsted . .	10,974,614	20,019,372	11,182,103	1,808,540
Iron and steel	16,660,110	9,683,436	9,520,041	1,571,336
Coal	26,898,297	34,286,287	42,300,623	11,148,459
Cotton yarn	25,963,788	12,523,662	7,001,294	1,033,564
Machinery	4,718,622	6,578,687	10,151,795	7,640,027

Total trade between France and United Kingdom for 5 years (in thousands of pounds) :—

—	1918	1919	1920	1921	1922
Imports from France into U.K.	34,972	48,498	75,336	53,014	48,670
Exports to France from U.K. .	180,767	147,364	135,936	44,260	48,310

Shipping and Navigation.

On January 18, 1921, the French mercantile navy had a tonnage of 2,694,199, or 3,101,199 tons if enemy ships be included. Under construction in England, 580,200 tons; in France, 373,135 tons; in other countries, 10,000 tons.

Shipping in foreign trade in 1922, and its distribution among French ports, is shown as follows with cargoes only:—

	Entered (1922)		Cleared (1922)	
	Vessels	Tonnage	Vessels	Tonnage
French	8,108	9,822,685	6,132	7,290,285
Foreign	19,689	25,634,894	11,764	19,449,463
Total	27,797	35,457,579	17,896	26,748,698
Marseille	3,574	7,483,940	3,251	6,681,238
Le Havre	2,308	4,150,005	1,549	3,401,852
Cherbourg	965	7,397,950	894	7,337,395
Bordeaux	1,355	1,752,939	1,137	1,161,510
Boulogne	2,203	2,263,474	1,799	1,987,070
Dunkirk	1,579	1,927,291	888	1,532,069
Rouen	4,270	3,167,510	650	378,235

Caen	658	381,448	256	132,756
All others	5,729	2,997,900	3,895	1,683,599
Total	27,797	35,457,579	17,896	26,748,698

Internal Communications.

I. RIVERS, RAILWAYS, ETC.

On January 1, 1914, there were in France 23,918 miles of national roads, in addition to the vicinal roads.

Navigable rivers (1922), 4,512 miles; canals, 3,031 miles; actually navigated, canals and rivers (1919) 6,606 miles; total traffic 17,809,000 tons.

By a law of July 11, 1842, the construction of railways was left mainly to companies, superintended, and if necessary assisted, by the State; which now constructs lines which the companies work, and works on its own account one important State system. There are lines of local interest subventioned by the State or by the departments. The concessions granted to the six great companies expire at various dates from 1950 to 1960; the periods of State guarantee of four of them terminated at the end of 1914, and will do so in the case of the others in 1934 and 1935.

The length of principal lines open for traffic in 1922 was 25,766 miles, made up as follows: State, 5,599.4 miles; Nord, 2,379.9 miles; Est, 3,123.7 miles; Paris-Orléans, 4,641.2 miles; Paris-Lyons-Mediterranean, 6,077.9 miles; Midi, 2,559.5 miles; Alsace-Lorraine, 1,384.4 miles.

It has been decided to electrify the whole French railway system.

II. POSTS AND TELEGRAPHS.

In 1922, the receipts on account of posts, telegraphs, and telephones, amounted to 1,108 million francs; the expenditure to 1,347 million francs. The number of ordinary letters carried in 1916 (internal and international services) was 969 millions, and of registered letters 60 millions.

The total length of the telegraphic lines in 1913 was 120,471 miles, with 451,195 miles of wire. In 1921 there were despatched 40,550,000 telegrams, of which 35,100,000 were internal and 5,450,000 international. In 1922 gross telegraph receipts were 177,000,000 francs.

In 1913 there were in France 11,451 urban telephone systems with 36,100 miles of line and 790,173 miles of wire; number of conversations in 1913, 388,966,900. There were 20,331 inter-urban circuits with 72,181 miles of line, and 387,641 miles of wire; conversations in 1913, 45,327,000. In 1921 the number of subscribers was 488,000, and gross receipts (1920) were 155,100,000 francs.

III. AVIATION.

The following table shows the operations of French aerial companies :—

Items.	1919	1920	1921
Number of voyages made	988	2,348	6,221
Number of miles covered	165,258	530,650	1,460,728
Number of passengers transported	588	1,721	10,336
Merchandise and baggage transported tons	7	47	164
Mail transported " "	0.39	4	9

Money and Credit.

The nominal value of the French money coined in France during 8 years was :—

Year	Gold	Silver	Nickel and Bronze	Total
	Francs	Francs	Francs	Francs
1914-1919	160,769,990	555,976,932	26,935,796	743,682,718
1920	—	29,603,429	11,827,853	41,431,282
1921	4,239,560	—	98,395,132	102,634,692

The ordinary savings-banks numbered 554 (with about 1,800 branch offices) on December 31, 1920; the number of depositors was 8,755,194, to the value of 5,795,082,757 francs. The National savings-banks, on December 31, 1921, held deposits and interest amounting to 2,697,436,750 francs due to 7,062,519 depositors.

The Bank of France, founded in 1800, and placed under State control in 1806, has the monopoly (since 1848) of issuing bank notes. The present privileges of the Bank were last renewed on December 20, 1918, for a further 25 years, *i.e.* until December 31, 1945. The capital of the Bank is fixed at 182,500,000 francs (7,800,000*l.*)

The situation of the bank on February 15, 1923, and on March 9, 1922, was:—

	February 15, 1923	March 9, 1922
	1000 francs	1000 francs
Gold	5,535,784	3,577,180
Silver	290,392	281,841
Advances to the Public	2,092,597	2,376,366
Advances to the State	23,500,000	21,900,000
Notes in circulation	37,076,064	36,225,852
Capital and Reserve	261,885	—

At the outbreak of war the maximum note issue of the Bank of France was 6,800 million francs; on August 5, 1914, it was raised to 12,000 million francs; the amount was increased on successive occasions, the last having been Sept. 28, 1920, when the maximum was fixed at 41,000 million francs.

Of the other well known banks, the following may be mentioned:—The *Crédit Foncier de France*, founded in 1852, which lends money on mortgage; the *Crédit Lyonnais*, founded in 1863; the *Société Générale*, founded in 1864; and the *Comptoir-Nationale d'Escompte de Paris*.

Money, Weights, and Measures.

The *Franc* of 100 *centimes* was in normal conditions of the value of 9½*d.* or 25·225 francs to the pound sterling.

Gold coins in common use are 20 and 10 franc pieces. The 20 franc gold piece weighs 6·4516 grammes 900 fine, and thus contains 5·80645 grammes of fine gold. Silver coins are 5, 2, 1, and half franc pieces and 20-centime pieces. The 5-franc silver piece weighs 25 grammes 900 fine, and thus contains 22·5 grammes of fine silver. The franc piece weighs 5 grammes 835 fine, and contains 4·175 grammes of fine silver. Bronze coins are 10 and 5 centime pieces. There are also 25, 10, and 5 centime nickel pieces.

There is a double standard of value, gold and silver, the ratio being theoretically 15½ to 1. Of silver coins, however, only 5-franc pieces are legal tender, and of these the free coinage has been suspended since 1876.

The present monetary convention between France, Belgium, Italy, Switzerland, and Greece is tacitly continued from year to year, but may be denounced by any of the contracting States, and, if denounced, will expire at the end of the year, which commences on January 1, following the denunciation. According to its terms, the five contracting States have their gold and silver coins respectively of the same fineness, weight, diameter, and current value, and the allowance for wear and tear in each case is the same. The coinage of 5-franc pieces, both gold and silver, is temporarily suspended, and the issue of subsidiary silver is, with certain exceptions for special reasons, limited to 7 francs per head of the population of each State (but 6 francs for Greece). Each Government, in its public offices, accepts payments in the silver 5-franc pieces of each of the others, and in subsidiary silver to the amount of 100 francs for each payment. Each State engages to exchange the excess of its issues over its receipts of subsidiary silver for gold or 5-franc silver pieces and at the termination of the convention each is bound to resume also its 5-franc silver pieces, and to pay in gold a sum equal to the nominal value of the coin resumed. The following are the total issues of the five States, authorised by the convention of 1897:—

France, 394 millions of francs ; Italy, 232·4 ; Belgium, 46·8 ; Switzerland, 28 ; Greece, 15.

The monetary system of the Union has been adopted, either wholly or partially, in Spain, Rumania, Bulgaria, Servia, Russia, Finland, and many of the South American States.

<i>Gramme</i> . . . =	15·43 gr. tr.	<i>Mètre</i> . . . =	39·37 inches.

<i>Hectolitre</i> { Liquid . . . =	22 gallons.	<i>Kilomètre Carré</i> . . . =	·386 sq. mile.
{ Dry . . . =	2·75 bushels		

Diplomatic Representatives.

1. OF FRANCE IN GREAT BRITAIN.

Ambassador.—Comte de Beaufort de St. Aulaire (appointed November 20, 1920).

Counsellor.—M. de Montille.

First Secretaries.—M. Roger Cambon and Adrien Thierry.

Second Secretary.—M. Japy.

Third Secretaries.—Jean de Bourguignon de St. Martin and Jean Vergé.

Attaché.—Frédéric Knobel.

Military Attaché.—General Vicomte de La Panouse, K.C.M.G., C.B., C.V.O.

Naval Attaché.—Capitaine de Frégate de Ruffi de Pontevéz-Gévaudan, D.S.O.

Air Attaché.—Capitaine Sablé.

Commercial Attaché.—M. J. Périer, C.B.

Financial Attaché.—M. Avenol.

Secretary-Archivist.—Comte La Combe.

Consul-General in London.—J. Kuecht.

There are also French Consuls at—Cardiff, Dublin, Glasgow, Liverpool, Manchester (V.C.), Newcastle, Southampton (V.C.), and other places.

2. OF GREAT BRITAIN IN FRANCE.

Ambassador.—Rt. Hon. Marquess of Crewe, K.G. Appointed November 20, 1922.

Counsellor.—Eric Phipps, C.M.G., C.V.O.

First Secretaries.—R. I. Campbell and R. S. Hudson.

Third Secretary.—A. F. Gascoigne.

Military Attaché.—Major-General the Hon Sir C. Sackville West, K.B.E., C.B., C.M.G.

Naval Attaché.—Commander E. B. C. Dicken, D.S.O., R.N.

Air Attaché.—Squadron Leader J. P. Sewell, O.B.E.

Commercial Counsellor.—J. R. Cahill.

Consul-General.—H. G. A. Mackie, C.B.E.

There are British Consular Representatives at Ajaccio, Bordeaux, Brest, Calais, Cherbourg, Dunkirk, Havre (C.G.), Lille, Lyon, Marseille (C.G.), Nantes, Nice, Rouen, Strasbourg (C.G.), and other towns.

ANDORRA.

The republic of Andorra, which is under the joint suzerainty of the head of the French state and of the Spanish Bishop of Urgel, consists chiefly of a valley, surrounded by high mountain peaks. Its maximum length is 17 miles, and its width 18 miles; it has an area of 191 square miles and a population of 5,231, scattered in some 30 villages. The surface of the country is rough and irregular, with an altitude varying between 6,562 and 10,171

feet. It is governed by a council of twenty-four members elected for four years by the heads of families in each of the six parishes. The council nominates a First Syndic to preside over its deliberations; in the First Syndic is vested the executive power. A Second Syndic is also nominated as deputy of the First Syndic. The judicial power is exercised in civil matters in the first instance by 2 civil judges appointed by the Bishop and by France respectively; and there is also a Supreme Court of Andorra at Perpignan. This, or the Ecclesiastical Court of the Bishop, forms the highest appeal court. For criminal suits two magistrates (*le Viguiet de France* and *le Viguiet Episcopal*) preside over a criminal court at Andorra-la-Vieille. The republic pays an annual due of 960 francs to France and 460 pesetas to the Bishop. A permanent delegate, the Prefect of the Pyrénées Orientales, moreover, has charge of the interests of France in the republic. A good road runs from the Spanish frontier to Andorra. Catalan is spoken in Andorra. French and Spanish currency are both in use.

Colonies and Dependencies.

The colonies and dependencies of France (including Algeria and Tunis) have an area roughly estimated at about 5,382,137 square miles with a population of about 53,722,300. Algeria, however, is not regarded as a colony but as a part of France, and Tunis and Morocco are attached to the Ministry of Foreign Affairs. For Syria France holds a mandate under the League of Nations. The administration of the colonies is directed or controlled by the Ministry of the Colonies, which was organised as a separate department in 1894. Most of them enjoy some measure of self-government and have elective councils to assist the governor. The older colonies have also direct representation in the French legislature, Réunion, Martinique and Guadeloupe sending each a senator and two deputies; French India a senator and a deputy; Senegal, Guiana, and Cochinchina each a deputy, while most of the others are represented on the "Conseil Supérieur des Colonies." This council consists of the senators and deputies of colonies, delegates from other colonies, and officials and other persons appointed on account of their special knowledge or qualifications. Some only of the colonies have a revenue sufficient for the cost of administration. In 1921, France spent on the colonial service 252,146,603 francs, of which 23,663,613 francs were for civil administration, 212,742,276 francs for military services, and 10,740,714 francs for penitentiary services.

The area and population of the colonial domain of France are as follows:

	Year of Acquisition	Area in Square Miles	Population

ASIA.

FRENCH INDIA.

The chief French possession in India is Pondicherry. It was founded by the French in 1674, taken by the Dutch in 1693, and restored in 1699. The English took it in 1761, restored it in 1765, re-took it in 1778, restored it a second time in 1785; re-took it a third time in 1793, and restored it in 1814.

As established by the treaties of 1814 and 1815, the French possessions in India consist of five separate colonies, which cover an aggregate of 50,803 hectares (about 196 square miles), and had in 1921 the following estimated populations:—

*Pondichéry . . . 46,605	Modéliarpeth . . . 14,041	Nodoukadou . . . 7,241
Oulgaret . . . 22,307	Arianeoupom . . . 13,251	Cotchéry . . . 6,854
Villennour . . . 21,033	*Karikal . . . 16,424	*Chandernagar . . . 25,119
Tiroubouvané . . . 20,901	Tirnoular . . . 10,040	*Mahé . . . 11,218
Bahour . . . 19,005	Grande Aldée . . . 6,916	*Yanaon . . . 4,683
Nettapacom . . . 13,642	Neravy . . . 6,108	Total . . . 265,388

*In 1921 the population of the Provinces was as follows:—Pondichéry, 170,785; Karikal, 53,583; Chandernagar, 25,119; Mahé, 11,218; Yanaon, 4,683; Total, 265,388.

The colonies are divided into five *dépendances* (the chief towns of which are marked with an asterisk in the above table) and seventeen communes, having municipal institutions. There is also an elective general council. The Governor of the colonies resides at Pondichéry. The colonies are represented in the Parliament at Paris by one senator and one deputy. At Pondichéry the birth-rate in 1921 was 3·55 per cent., and the death-rate 3·86 per cent. There were in 1921, 61 primary schools and 3 colleges, all maintained by the Government, with 312 teachers and 9,478 pupils. Local revenue and expenditure (budget of 1922) 2,630,170 rupees. The principal crops are paddy, rice, sugar, cotton, manioc, cacao, coffee, ground-nuts. There are at Pondichéry 4 cotton mills, and at Chandernagar 1 jute mill; the cotton mills have, in all, 1,632 looms and 71,213 spindles, employing 7,685 persons. There are also at work 2 oil factories and a few oil presses for ground-nuts, and 1 ice factory. The chief exports from Pondichéry are oil seeds. At the ports of Pondichéry, Karikal, and Mahé in 1921 the imports amounted to 23,583,192 francs, and the exports to 24,554,280 francs. At these three ports in 1921, 228 vessels entered and cleared. Railway open, 43 miles, Pondichéry to Villapûram, and Peralam to Karikal.

FRENCH INDO-CHINA.

CENTRAL GOVERNMENT.

Governor-General.—Martial Merlin (1923).

French Indo-China, with an area of about 256,878 square miles and a population in 1921 of 19,747,431, of whom 23,700 were European (excluding military forces), consists of 5 States: the Colony of Cochin-China, the Protectorates of Annam, Cambodia, Tonking and Laos; and Kwang-Chau-Wan leased from China as well as the territory around Battambang, which was ceded by Siam in 1907. The whole country is under a Governor-General, assisted by a Secretary-General, and each of the States has at its head a functionary bearing the title of Resident-Superior, except in the case of Cochin-China, which, being a direct French Colony while the others are only Protectorates, has a Governor at its head. There is a Superior Council for the whole of Indo-China and a Permanent Commission of the Council.

The white population are subject to French law. Throughout the country there are native tribunals from which there is an appeal to courts at Saigon and Hanoi. In these appeal courts European judges, in matters affecting natives, are assisted by Annamite mandarins.

There is a common budget for the whole of Indo-China, and also a separate budget for each of the States. The Provinces, about 120 in number, have also their budget, as have the municipalities. The general budget is supported by receipts from customs, Government monopolies, indirect contributions, posts, telegraphs, and railways in all the countries of the union, and besides maintaining these, provides for military and judicial services, public works, and other matters relating to the whole of the union. For 1921 the revenue* and expenditure of the general budget balanced at 54,878,400 piastres. The outstanding debt of Indo-China on January 1, 1920, amounted to 403,000,000 francs.

The military force, totalling about 25,514, are commanded by the Commandant-Superior, a general of division with the same rank as army corps generals in France. The naval force comprises 2 gun-boats, 4 torpedo-boats, and 21 despatch vessels.

Indo-China is divided into three main economic areas :—(1) The territory tributary to Saigon (Cochin China, Cambodia, Southern Laos, and Annam South of Cape Varella), which, apart from the fisheries on the Coast and the interior lakes, is almost entirely agricultural, being one of the great rice regions of the world. (2) The region tributary to Haifong (Tonking and the two northern districts of Annam), which is devoted to agriculture, mining and manufacture. (3) Central Annam (the region between Porte d'Annam and Cape Varella), with Tourane as the principal port, which is mainly agricultural, but is not a great rice-growing district ; its main exports are cinnamon, sugar and tea. The minerals of Indo-China are coal, lignite, antimony, tin, wolfram and zinc.

In 1887 the French possessions in Indo-China, including Annam, Tonking and Cambodia, were united into a Customs Union. In 1921 the total imports amounted to 1,075,930,517 francs, and exports to 1,473,124,517 francs. The chief export is rice, forming about 70 per cent of the total, and other exports are fish, pepper, hides, coal, cotton, rubber and sugar. The principal imports are cotton-tissues, cotton-thread, tin.

Into Great Britain in 1922 the imports from Indo-China amounted to 163,995*l.*, and the exports from Great Britain, 242,020*l.* (chiefly cotton).

In 1919, 2,408 vessels of 2,166,464 metric tons entered, and 2,290 vessels of 2,066,653 tons cleared. Of those entered 374 of 644,263 tons were French, 280 of 484,605 tons were English, and 250 of 446,662 tons were Japanese.

There are about 3,300 miles of principal roads and 2,000 miles of local roads.

The oldest railway in Indo-China is that from Saigon to Mytho. Total length of line, two thirds Government, at end of 1921, 1,265 miles. There are 348 post offices (1918). Number of letters, postcards, etc., handled in in 1918, 10,621,464.

The Bank of Indo-China, with an authorised capital of 48 million francs and reserve and redemption funds amounting to 33,500,000 francs, had till 1923 the privilege not only of making advances on security, but also of engaging in financial, industrial, or commercial enterprise in Indo-China and New Caledonia. For French Indo-China there is a coinage of silver pieces, piastres, $\frac{1}{2}$ -piastres, $\frac{1}{3}$ -piastres, and $\frac{1}{6}$ -piastres ; the piastre (since 1895) weighs 27 grams, and the fractional coins in proportion ; the piastre and $\frac{1}{2}$ -piastre are '900 fine, but the $\frac{1}{3}$ - and $\frac{1}{6}$ -piastre (since 1898) only '835 fine. The piastre is usually worth rather less than 24*d.* There are two bronze coins, one equal to the 100th and the other the 375th part of a piastre.

British Consul-General at Saigon.—J. D. Hogg.

British Vice-Consul at Haiphong.—J. Giquieux.

STATES AND PROTECTORATES.

Cochin-China.

The area of French Cochin-China is estimated at 22,000 square miles. The whole is divided into 17 provinces and 3 *circonscriptions*. The towns of Saigon and Cholon have been formed into municipalities. The Colonial Council contains 24 members. The colony is represented in France by one deputy. The population consists mainly of Annamites, Cambodians, Moïs, Chams, Chinese, and a few Indians, Malays, Tagals, and foreigners. In 1921 the total population was put at 3,795,304, of whom 6,847 were French

and 622 European foreigners (excluding the military forces). Saigon had, in 1921, a population of 81,779, of whom 4,812 were Europeans, exclusive of 994 troops; the town of Cholon has 93,947 inhabitants, of whom about 48,887 are Chinese. There are about 867 schools, with 1,325 teachers, and 51,452 pupils.

The total area is put at about 5,500,000 hectares (1 hectare = 2.47 acres) of which 1,975,725 hectares are cultivated, and 3,488,611 hectares uncultivated (1,748,694 hectares being forest). The chief culture is rice, to which 1,665,159 hectares are devoted. Other crops are maize, beans, sweet potatoes, earth-nuts, cotton, rubber, sugar-cane, tobacco, coffee, coco-nuts, betel-nuts, pepper, oranges, bananas, &c. The farm animals in 1920 comprise 13,683 horses, 420,506 buffaloes, 247,623 pigs, 2,860 sheep and goats.

River and coast fishing is actively carried on; there are about 73,520 boats on the rivers, and 3,000 on the coast; the fishery products are valued at 2,800,000 francs yearly. There are 10 rice mills in Saigon and Cholon, turning out each from 450 to 900 tons a day. In these towns are also 2 saw-mills, 2 soap factories, and a varnish factory. Commerce is mostly in the hands of Europeans and Chinese, but about 22,000 Annamites are small traders. The chief exports are rice, fish and fish oil, pepper, cotton, copra, silk, shrimps, isinglass, hides, cardamoms. During 1920, 4,698 steamers of 2,166,464 tons entered at the port of Saigon, of which 565 of 961,281 tons were British. The vessels of the Messageries-Maritimes and of the Chargeurs Réunis Companies visit Saigon regularly. There is also constant communication with Hong Kong and Singapore by British vessels. (For railways see Indo-China.) At Saigon there are 5 banks or bank-agencies. The total exports in 1921 amounted to 247,857,520 francs, and imports to 44,450,235 francs.

In 1921 the local budget balanced at 10,806,813 piastres.

Annam.

French intervention in the affairs of Annam, which began as early as 1787, was terminated by a treaty, signed on June 6, 1884, and ratified at Hué on February 23, 1886, by which a French protectorate has been established over Annam. The King **Khai-Dinh**, who succeeded to the throne in 1916, governs the country, assisted by a Council of Ministers, in accordance with the wishes of the French Government, represented by a Resident Superieur. The ports of Tourane, Qui-Nhon, and Xuan Day are opened to European commerce, and the customs revenue conceded to France; French troops occupy part of the citadel (called Mang-Ca) of Hué, the capital (population 60,611). Binh-Dinh, the largest town, has 74,400 inhabitants. Annamite functionaries, under the control of the French Government, administer all the internal affairs of Annam. The area of the protectorate is about 39,758 square miles, with a population in 1920 of 5,731,189, including 1,642 Europeans (exclusive of the military forces). In 1921 there were 1,837 Europeans. The population is Annamite in the towns and along the coast, and consists of various tribes of Moïs in the hilly tracts. At the end of 1920 the official schools of Annam were reorganised and placed under the direct control of the French Protectorate. There were 660 village schools with 16,902 pupils; 113 elementary schools (97 for boys, 16 for girls) with 7,809 pupils (7,102 boys, 707 girls); 22 secondary schools (1 for girls) with 6,643 pupils (6,306 boys, 337 girls); one higher secondary school for boys at Hué, with 488 pupils, one at Vinh with 80 pupils and one at Quinhon with 15 pupils; one higher secondary school for native girls with 353 pupils; one professional school with 85 pupils; one normal school for boys (60 pupils), and one for girls (10 pupils), both at Hué; and one school of law and administration with 55 pupils. Local

budget, 1921, balanced at 7,065,442 piastres. The Phanrang river has been utilised to irrigate about 10,000 acres, and similar works, on a smaller scale, have been carried out in Central Annam. Rice is one of the most important products. Others are cotton, maize, and other cereals, the areca nut, mulberry, cinnamon, tobacco, sugar, betel, manioc, bamboo; excellent timber abounds, also caoutchouc, cardamoms, coffee, dye, and medicinal plants. Raw silk is produced; the amount exported in 1921 was 8,818 pounds. There are about (1920) 461,333 head of cattle in Annam, and cattle rearing is of some importance. There are copper, zinc, and gold in the province of Quang-nam; the mines are worked by natives. An important seam of haematite iron is worked about 9 kilometres from Thanhhoa. At Nongson, near Tourane, coal mines are worked. In North, Central, and Southern Annam there are salt works. Imports in 1921, 12,600,161 francs; exports, 10,642,976 francs. The chief imports are cotton-yarn, cottons, tea, petroleum, paper goods, and tobacco: chief exports, sugar, rice, cotton and silk tissues, cinnamon, tea, and paper. In 1921, 139 ships (9 Japanese of 8,771 tons, 6 English of 892 tons, 28 Chinese of 8,098 tons, and 96 French of 59,405 tons) of a total tonnage of 77,166 tons, cleared the port of Tourane.

Cambodia.

Cambodia is bounded on the south by Cochin China, on the east by Annam, on the north by Laos and Siam, on the north-west by Siam, and on the west by the Gulf of Siam. Area, 57,900 square miles; population according to the census of November 30, 1921, 2,402,585, of whom 1,368 were Europeans (excluding the military forces), 140,225 Annamites, and 159,633 Chinese. The present King, **Sisowath**, in 1904 succeeded his late brother, Norodom, who had recognised the French protectorate in 1863. The country is divided into 13 provinces. The three chief towns are Pnôm-Penh (population 74,643), the capital of the territory, Battambang and Kampot, a seaport but not accessible for sea-going vessels. The budget for 1922 balanced at 7,567,200 piastres, including a sum of 476,400 piastres allowed for the civil list of the king and princes. There are 60 schools with 4,000 pupils.

The soil is fertile, but only a part of it is under cultivation. The overflow of the Mekong river fills up the Great Lake which occupies the middle of Western Cambodia. With the low-water season the lake slowly empties and leaves innumerable ponds on the ground it covered during the high-water season. These ponds are filled with an enormous quantity of fish suitable for salting and smoking. This is the principal native industry, and the export to China of Mekong fish attains in some years 30,000 tons. The chief product of Cambodia is rice, of which that country exports over 300,000 tons yearly, but as the export is made by way of Cholon (where the rice is milled) and Saigon (where it is shipped), these figures appear in the customs statistics of Cochin China. Amongst the other products are kapok, cotton, pepper, salt fish, hides, cattle, palm-sugar, and tobacco, and amongst the produce to become more important in the near future, coffee, rubber, and iron. Pepper is grown by 61 villages with 4,800 planters, the production being over 800,000 kilogrammes annually. Cotton growing is extending; the production is estimated at 9,000 tons, the whole of which is exported. Cattle breeding is a flourishing native industry, especially between Pnôm-Penh and Manila. Salt is worked. There is a cotton-ginning mill at Khsach-Kandal, near Pnôm-Penh, and another at Kompong-Cham. The external trade is carried on mostly through Saigon

in Cochinchina. The imports comprise salt, wine, and textiles; the exports comprise salt fish, cotton, tobacco, rice, also boats. In 1920, 4,230 vessels of 179,874 tons entered, and 10,806 vessels of 312,166 tons cleared the ports of Cambodia.

Cambodia possessed in 1916, 500 miles of good metalled roads and nearly 1,000 miles of unmetalled roads and roads in course of construction. The chief roads are from Saigon to the Siamese frontier, via the left side of the river from Banan; on the right side of the Mékong, from Pnôm-Penh, through the district south-west of the lakes; the road from Pnôm-Penh to the Gulf of Siam; and the road from Saigon to Kratié. The Mékong and the Great Lake with their affluents give a total of 875 miles of waterways, of which about 370 are not navigable to launches during the low-water season. Sea-going steamers can easily reach Pnôm-Penh, which has good quays and embankments.

Of all the countries of the Far East, Cambodia is among the richest in ancient monuments. The ruins of Angkor are specially famous.

Tonking.

This territory, brought under France's protectorate in 1884, has an area of 40,530 square miles, and is divided into 21 provinces, and 4 military territories, with 8,698 villages and a population in 1921 of 6,850,454, of whom 6,332 were Europeans (exclusive of military forces). The King of Annam was formerly represented in Tonking by a viceroy, but, in July, 1897, he consented to the suppression of the viceroyalty and the creation of a French residency in its place. Chief town Hanoi, a fine and large modern town, with a population of 73,948 in 1921. This town on January 1, 1902, became the capital of Indo-China, instead of Saigon. There are 14 grammar schools with (1920) 4,967 pupils. In 1902 a school of medicine for natives was opened at Hanoi. This with the other higher education schools for natives was formed in 1917 into the University of Indo-China. Hanoi has also since 1918 a large European college. The local budget for 1921 balanced at 13,131,390 piastres. The chief crop is rice (total exports 1921, 171,997 tons valued at 94,000,000 francs) exported mostly to Hong Kong (in 1921, 166,118 tons). Other products are maize, arrow-root, sugar-cane, coffee, tea, various fruit trees, and tobacco. A large quantity of raw silk is produced annually, most of which is used in native weaving and the remainder exported (16,500 kilogrammes for 1921). There are rich limestone quarries, calamine and tin mines, and also rich hard coal beds. The enormous lime-tone quarries allowed the rapid increase of Portland cement manufacture which produced for export in 1921 104,435 tons of cement. During the same year 640,000 tons of hard coal were exported.

Chief imports are metal tools and machinery, yarn and tissues, beverages; chief exports, rice, maize, and animal products. The principal port is Haiphong, which is visited regularly by the steamers of three French lines. In 1921, 513 vessels of 598,076 tons gross entered and cleared this port, 141 vessels (149,587 tons) being British.

The Laos territory, under French protectorate since 1893, is estimated to contain 96,500 square miles, and in 1921 there were 800,000 inhabitants. The capital is Vientiane. In the country there are three protected states, Luang Prabang, which has a capital of the same name, the residence of the King, who is assisted in his government by a French Administrator; the other protected states are Bassac and Muong Sing. The soil is fertile,

producing rice, cotton, indigo, tobacco and fruits, and bearing teak forests, from which the logs are now floated down the Mekong to Saigon. Gold, tin, lead and precious stones are found, and concessions have been granted to several French mining companies. It can be entered only by the Mekong, which is barred at Khone by rapids. A railway, four miles in length, has been constructed across that island, and by means of it several steam launches have been transported to the upper waters, where they now ply. A telegraph line connects Hué in Annam with the towns on the Mekong, and these with Saigon and Hanoi. The cost of the Laos administration is borne by Cochinchina (to the extent of six-thirteenths), Tonking and Annam (five-thirteenths), and Cambodia (two-thirteenths). The local budget for 1921 balanced at 2,506,300 piastres.

In 1900 the territory of **Kwang Chau Wan** on the coast of China, leased from China in 1898, and increased in 1899 by the addition of 2 islands in the bay, was placed under the authority of the Governor-General of Indo-China. The territory has been divided into 3 administrative circumscriptions, but the Chinese communal organisation is maintained. Its area is about 190 square miles and its population about 168,000. The imports are chiefly cotton yarns, opium, petroleum; the exports are straw sacks, swine, mats. The port is a free port. The territory is regularly visited by the vessels of two French companies; in 1919 there were 290 vessels of 94,905 tons. Official buildings, a post office, roads, &c., have been or are being constructed. The local budget for 1921 balanced at 440,000 piastres.

MANDATED TERRITORY IN ASIA: SYRIA AND LEBANON.

Syria, a province of Turkey-in-Asia, has been recognised as an independent State to be placed under a Mandatory Power. By decision of the Supreme Council of the Allied Powers at San Remo (April 25, 1920), France has been assigned the Mandate for Syria, which was confirmed by the League of Nations on July 23, 1922.

High Commissioner.—Vacant.

Area and Population.—Syria under the Mandate is bounded by the Mediterranean on the west, by Palestine on the south, by Mesopotamia on the east, and by Turkey on the north.

The Anglo-French agreement of Dec. 23, 1920, defines the frontier between Syria and Mesopotamia and Palestine, and also the southern boundary of Syria, which begins at Ras Nakura; then follows the watershed between the Farah, Kurn, and Kerbeia Wadis on the south and the Duhleh-el-Ayon and Zerka Wadis on the north; then follows the watershed between the Litany and the Jordan as far north as Metullah, the most northern Jewish Colony, then turns eastward, leaving Banias and its "source of the Jordan" in Palestine; then passes down the Wadi Jeraba to the Sea of Galilee, then crosses the Sea of Galilee, leaving the country of the Gadarenes to France. From Semakh to the east of the outflow of the Lower Jordan from the Lake it runs to the south of the Yarmuk so as to include Deraa and Bosrah in Syria. From Deraa the frontier runs to Nasib, thence to Intar and north-east to the nearest point of the Euphrates at Abu Kemal, 50 miles west of Anah; then it runs to Rumeilan, Keui so as to leave all the western Khabor to Syria and Sinjar to Mesopotamia, and thence to the nearest point of the Tigris, about 70 miles north-west of Mosul. The eastern frontier of Syria runs up the Tigris as far as Jeziret-ibn-Omar, when it joins the Turkish frontier laid down in the Treaty of Sèvres.

The frontier between Syria and Turkey has been fixed by the Franco-Turkish Treaty of October 20, 1921, as beginning at the Gulf of Alex-

andretta, thence to Meidan Ekbes: thence to the south so as to leave to Syria the town of Movisova, and to Turkey Karnaba and Killis; thence to the Baghdad railway at Chobanbeg, following the line to Nisibin; thence to the Tigris at Jeziret-ibn-Omar, the last-named as well as Nisibin being in Turkish territory.

The country has been organised into 5 territories, viz. :—

- (1) Territory of Damascus (Hama, Homs, Damascus, and the Hauran);
- (2) Territory of Aleppo (Vilayet of Aleppo, Sanjak of Alexandretta);
- (3) Territory of the Alaouite (region of Mount Ansarieli);
- (4) Territory of the Great Lebanon from Tripoli (included) to Palestine with Bekaa;
- (5) Territory of Jebel Druze (south of Hauran). The first three Territories make up the Syrian Federation; the two last are autonomous.

The GREAT LEBANON was proclaimed a State on September 1, 1920. It has the following frontiers:—North, the Nahr-el-Chebir; south, the frontier of Palestine; west, the coast; and east, the heights of Anti-Lebanon. Beirut is the seat of the Government. The national flag is the French Tricolour with a cedar superimposed on the white ground.

The total area of Syria subject to the French Mandate may be estimated at 60,000 square miles. The total population of this area is probably under 3,000,000. The population of the Lebanon is about 628,863. The bulk of the population of Syria is of Arabic origin, and Arabic is the prevailing language, with many dialectical varieties. But there is a large influx of foreign elements, including Turks, Turkomans, Kurds, Circassians, Armenians, Persians, Jews, and a certain number of Europeans. The principal towns are Damascus, population 170,000; Aleppo, 140,000; Beirut, 80,000; Homs, 60,000; Hama, 35,000; Tripoli, 30,000; Antioch, 30,000; Latakia, 20,000; Alexandretta, 15,000; and Zahlah in Lebanon, 13,000. There are no statistics of births and deaths.

Religion and Education.—The population of Syria is composed mainly of Sunni Moslems (about 1,541,853), with a certain number of the Shia sect (about 113,804). The Druses number about 150,000. There have been Christians in Syria since the earliest times. There are now three Uniat Patriarchs and one Orthodox Patriarch of Antioch.

There are about 500 French schools with 50,000 pupils. The Greek Catholics have a seminary at Ain Traz, near Beirut, and a Patriarchal College in Beirut. The Maronites also maintain their own schools. British Missionary Societies supported 19 educational institutions with close on 1,000 pupils, and about 120 elementary schools with about 9,000 pupils, over two-thirds being girls. There is a girls' training college at Beirut and high grade schools at Aleppo, Damascus, and Brumana, in the Lebanon. American Missions have a number of educational institutions throughout Syria, including a college at Beirut, which includes schools of medicine, pharmacy, dentistry, commerce, and arts and sciences. Roman Catholic agencies have numerous schools, with over 20,000 pupils. The Jesuit University in Beirut is empowered to grant degrees to various faculties.

Finance.—The revenue and expenditure for two years :—

	1921.	1922. ¹
	Francs.	Francs.
Revenue	162,030,000	160,000,000
Expenditure	173,032,000	160,000,000

¹ Estimates.

Defence.—A French army is in occupation of the whole country.

Production and Industry.—Syria is essentially an agricultural country, the bulk of the population being engaged in the cultivation of the soil and in cattle breeding; the total area normally under crops is roughly 6,000 square miles, or about 10 per cent. of the whole area. Cereals, vegetables, and fruit trees are produced in profusion; tobacco, cotton, and hemp are successfully cultivated, and there are some wild plants of value. Wheat is the chief cereal, the average crop being upwards of a million tons. The normal crop of barley is about 500,000 tons; durra (Indian millet), 200,000 tons; maize, oats and rye are of minor importance. Sesame, from which oil is produced, is one of the most valued crops, but is very uncertain, the annual crop being about 30,000 tons, a third being exported. Chickpeas, lentils, beans, vetches, and lupins are largely cultivated, the annual crop of chickpeas being estimated at 500,000 tons. About 4,700 acres in Latakia, Aleppo, Beirut, and Damascus produce about 3,000,000 lb. of tobacco, valued at 200,000*l*. There is a limited amount of cultivation of cotton, hemp, and sugar-cane. The most important fruit trees are the olive, vine, mulberry, and orange. Olives are widely cultivated and the annual output before the war was estimated at 158,000 tons, value 2,200,000*l*. Vines are also widely distributed, yielding before the war about 345,000 tons. Only a small proportion of this is converted into wine. The white mulberry is largely cultivated in Northern Syria for feeding silkworms. The cultivation of oranges and lemons has greatly increased in recent years, and the fruit of these and other trees is largely exported.

It is estimated that in 1914 the country contained about 270,000 horses, mules, and donkeys; cattle 500,000, sheep and goats 4,800,000, camels 200,000, valued at about 10,000,000*l*.

Syria is poorer in minerals than in other resources, but this may be due to insufficient exploration. Northern Lebanon has been worked for iron in ancient and modern times. At Majerba the ore is rich, and the iron good. There is a comparatively rich mine of lignite in South Lebanon. There are indications of petroleum in various places, but the attempts to work it so far have not been successful. There are indications of phosphates, lead, copper, antimony, nickel, chrome; gypsum is widely distributed. There is abundance of marble and good building stone.

The industries of Syria are on a very small scale. Flour, oil, soap, and silk thread are the most important. Wine and tobacco are also produced.

Commerce.—In 1921 the imports and exports according to ports were as follows:—

	Imports, 1921.	Exports, 1921.
	Francs.	Francs.
Beirut	479,590,000	26,374,400
Damascus	9,483,900	8,727,700
Alexandretta	32,586,154	8,838,300
Latakia	7,356,575	5,406,400
Aleppo	2,969,275	420,900
Saida	3,341,862	709,000
Tripoli	64,909,377	19,371,000
Total	600,146,618	69,848,500

Communications.—Most of the ports of Syria are visited regularly by the steamers of various shipping companies.

Length of roads, 1922, 1,569 miles. Syria is comparatively well provided with railways, and new lines and branches are proposed. A line traverses the interior from north to south, with branches to the chief ports. About 190 miles of the Bagdad railway run through Syria, and about 850 miles of other companies. Of the Hejaz railway about 620 miles traverse Syria.

The official currency as from May 1, 1920, is the Syrian Bank Note, issued by the Bank of Syria, under French Treasury control. The monetary unit is the Syrian pound, divided into 100 piastres (1 piastre=20 centimes), which are exchangeable in Paris at the fixed rate of 20 francs to the pound. On December 31, 1921, the notes in circulation amounted to 201,626,334 francs.

AFRICA.*

ALGERIA.

(L'ALGÉRIE.)

Government.

The government and administration of Algeria are centralised at Algiers under the authority of the Governor-General, who represents the Government of the Republic throughout Algerian territory. With the exception of the non-Mussulman services of Justice, Public Instruction, Worship, and the Treasury, which are under competent ministers, all the services are under his direction. He has to prepare a special budget for Algeria, he grants concessions for works, and he contracts loans in the name of the Colony.

The budget of Algeria which, since 1901, has been entirely distinct from that of France, comprises under revenue the imposts of every sort which are collected within the Colony and under expenditure the whole of the civil disbursements. The expenditure on War and Marine is still at the cost of the mother country, as is also the burden of guarantees of interest on railways up to 1926. The budget, prepared by the Governor under the control of the Minister of the Interior, is discussed and voted by the Financial Delegations and the Superior Council. These Delegations were instituted in 1898 to enable the body of tax-payers to state their views on questions of imposts by means of elected delegates. There are three Delegations representing

* See also Morocco.

respectively the French colonists, the French tax-payers other than colonists, and the Mussulman natives. The Superior Council is composed of elected members and of high officials. Lastly, the Governor is assisted in the exercise of his functions by a purely consultative council of government.

The territories of the South, forming a separate colony, are each under a military command which directs all the administrative and civil services under the authority of the Governor. They have a budget distinct from that of Algeria. The natives are represented on the communal administration. By the law of February 4, 1919, the position of French citizens is accorded to natives, above the age of 25 and monogamous, who served in the war, who are proprietors or farmers, who can read or write or hold a French decoration. It is proposed to create in Paris a Consultative Committee on the same lines as the British Council of India.

The French Chambers have alone the right of legislating for Algeria while such matters as do not come within the legislative power are regulated by decree of the President of the Republic. Each department sends one senator and two deputies to the National Assembly.

Governor-General.—M. Théodore Steeg, appointed July 29, 1921.

Area and Population.

The census of March 6, 1921 (completed in February, 1922), which is the last taken, showed a population (including the military forces) amounting to 5,802,464 (of whom 831,040 were Europeans and 4,971,424 natives) on an area of 222,180 sq. miles. The colony has been organised in 2 great divisions called respectively Northern and Southern Algeria. Northern Algeria consists as formerly of Civil Territory and Territoire de Commandement, but the Civil Territory has been extended, while the Territoire de Commandement has been diminished and will before long be completely merged in the Civil Territory. Northern Algeria contains 17 arrondissements, 276 communes, and 76 mixed communes, in the Civil Territory, and 3 mixed communes in the Territoire de Commandement. Southern Algeria consists of the 4 Territories of Aïn-Sefra, Ghardaïa, Touggourt, and the Saharan Oases, organized under decree of August 14, 1905. These territories contain 14 communes of which 7 are mixed and 7 native.

Population, including military forces, in February, 1922 :—

	Municipal Population			Population numbered separately			Grand Total
	European	Native	Total	European	Native	Total	
Northern Territory	787,570	4,384,870	5,172,440	36,859	47,121	83,980	5,256,420
Southern Territory	4,828	535,477	540,305	1,783	3,956	5,739	546,044
Grand Total .	792,398	4,920,347	5,712,745	38,642	51,077	89,719	5,802,464

Population according to Departments and Territories in 1922 :—

Northern Algeria (Departments)	Population	Southern Algeria (Territories)	Population
Algiers	1,788,857	Ain Sefra	163,529
Oran	1,305,051	Ghardaia	145,029
Constantine . . .	2,162,512	Touggourt	202,748
		Saharan Oases . .	34,728
Total	5,256,420	Total	546,044

The total population in 1891 was 4,124,732, in 1896, 4,429,421. In 1911, the native municipal population numbered 4,711,276; French, 492,660; naturalised Jews and their offspring, 70,271; Tunisians, 2,375; Moroccans, 23,115; Spaniards, 135,150; Italians, 36,745; other foreigners 20,927. Municipal population of Northern Algeria in 1911:—

	Males	Females	Total
Europeans.	373,220	373,290	746,510
Natives	2,251,233	2,008,241	4,259,474
"	2,624,453	2,381,531	5,005,984

The chief towns with the total communal population in 1921 were: Algiers, 206,595; Oran, 141,156; Constantine, 78,220; Bône, 45,171; Sidi-bel-Abbes, 37,752; Tlemçen, 43,090; Mostaganem, 27,375; Mascara, 28,693; Blida, 36,384; Philippeville, 33,808; Sétif, 30,867; Tizi Ouzou, 35,171; Bougie, 19,440.

Religion and Instruction.

The native population is entirely Musulman, the Jews being now regarded as French citizens. The Roman Catholic Church has an archbishop and 2 bishops, with 386 officiating clergymen. There are 13 Protestant pastors and 6 Jewish rabbis sharing in Government grants.

At Algiers (city) there is a University, attended in 1920-21 by 1,607 students (868 for Law, 320 Medicine and Pharmacy, 166 Science, 253 Arts); Professors (1919-20), 101. There are also special schools for commerce, the fine arts, hydrography, and agriculture. There were also in 1919-20 496 Musulman schools with 35,578 pupils. There are higher Musulman schools (*médersas*) at Algiers, Tlemçen, and Constantine, with 148 students (1921). In Algeria there are 16 establishments for secondary education with, in 1921, 9,127 pupils (6,564 boys and 2,563 girls). In 1919-20 there were 1,298 primary and infant schools, public and private, and 132,617 pupils. There were (1920) two normal schools for men teachers with 28 professors and 217 students (51 Musulman), and three normal schools for women teachers with 14 professors and 175 students.

Justice and Crime.

There is an Appeal Court at Algiers, and in the arrondissements are 16 courts of first instance. There are also commercial courts and justices of the peace with extensive powers. Criminal justice is organised as in France for Europeans. Since 1902 there have been criminal courts and special repressive tribunals for trying natives accused of crime.

Musulman justice is administered to natives by the Cadis in the first instance with an appeal to French courts.

Finance.

Europeans and natives pay the same direct and indirect taxes. The departments of War and Marine are excluded from the estimates, but the proceeds of the Military tax, the Government monopolies, and some other revenues are paid to France. The total expenditure (including military and extraordinary disbursements) exceeds the Algerian revenue by about 75,000,000 francs.

The budget estimates for five years were as follows in francs :—

—	1919	1920	1921	1922	1923
Revenue	222,948,810	416,956,119	501,659,318	604,695,674	478,830,31
Expenditure	222,732,317	349,470,621	501,523,219	604,337,549	478,622,44

The details of the 1923 budget are as follows :—

Revenue		Expenditure	
	Francs		Francs
Direct Taxation	75,980,410	Debt	111,346,345
Registration & Stamp Duties	88,051,581	Government and Central Administration	12,754,667
Customs	49,861,000	Depts of the Interior, Assistance, Security, & Public Instruction	97,054,345
Various Taxes, Duties, and Dues	88,583,896	Native Affairs	26,359,122
Post, Telegraph and Telephones	32,404,000	Finance	30,854,725
State Lands	11,461,289	Posts, Telegraphs and Telephones	43,503,133
Various	6,329,448	Public Works and Maritime Services	37,327,770
Exceptional resources	1,218,900	Railways	1,816,794
Various receipts	34,176,547	Mines	865,300
Extraordinary receipts	90,773,117	Agriculture, &c.	14,100,979
		Forests	11,196,147
		Miscellaneous	580,000
		Extraordinary	90,773,117
Total (including all items)	478,830,318	Total (including all items)	478,622,444

For the Southern Territories in 1922 the revenue was put at 13,442,108 francs, and the expenditure at 13,379,514 francs.

Defence.

The military force in Algeria constitutes the XIXth Army Corps, consisting of 3 divisions. French residents are under the same obligation to serve as in France; natives are under the obligation to serve 3 years with the colours and can be called up as reservists in case of mobilisation. The troops might be stationed in North Africa or employed on Colonial expeditions, but they belonged to the 'Metropolitan,' not to the Colonial Army. There are 6 regiments of zouaves, each of 3 battalions, of 5 companies; 6 regiments of cavalry (Chasseurs d'Afrique), of several squadrons; 3 groups of field and 1 of heavy artillery; 1 battalion of engineers; and 1 regiment of the Flying Corps. These were all European troops, and in the case of the artillery and engineers their recruiting depôts are in France. The Foreign Legion of 2 regiments of a varying number of battalions is recruited from foreigners of any nationality, but officered chiefly by Frenchmen; the headquarters of the regiments is in Algiers, but battalions are sent to any colony where they may be required. The Natives were 12 regiments of Algerian Tirailleurs each of 3 battalions, and 6 regiments of Spahis (Arab cavalry) each of several squadrons. The officers and a proportion of the non-commissioned officers of the native regiments are French. In November, 1922, the strength of the garrison of Algeria and Tunis was 75,000.

Agriculture and Industry.

There exists in Algeria a small area of highly fertile plains and valleys in the neighbourhood of the coast, mainly owned by Europeans, which is cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, &c., but the greater part of Algeria is of limited value for agricultural purposes. The northern portion is mountainous and generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is very inaccessible.

The soil is, under various systems, held by proprietors, by farmers, and by Métayers or Khammés. Most of the State lands have been appropriated to colonists. The chief cereal crops are wheat (2,783,037 acres with a yield of 918,900 tons in 1921), barley (2,513,943 acres with a yield of 1,099,300 tons in 1921), oats (573,885 acres with a yield of 170,650 tons in 1921), maize, potatoes, artichokes, beans, peas and tomatoes. Flax, silk, and tobacco (the cultivation of which is most remunerative) are also cultivated. In 1921 there were 19,309 tobacco planters, the area under cultivation was 53,810 acres, and the yield 443,205 cwt.

In 1921 the yield of wine was 110,268,620 gallons from an area of 527,829 acres, of which 428,829 acres were productive. The orange, date, mandarine, citron, banana, pomegranate, almond, fig, and many other fruits grow abundantly. The production of olive oil is an important industry. Cotton in 1920 was sown on 445 acres. Forests cover 6,560,232 acres, and, for the most part, belong to the State and communes. The greater part is mere brushwood, but on 645,000 acres are cork-oak trees, from which, in 1920, 6,043 tons of cork were obtained. The dwarf-palm and alfa are worked on the plains. Timber is cut for firewood, also for industrial purposes, for railway sleepers, telegraph poles, &c., and for bark for tanning. Considerable portions of the forest area are also leased for tillage, or for pasturage for cattle, sheep, or pigs. The forest revenue annually amounts to over 240,000*l*.

In 1919 there were in Algeria 202,839 horses, 184,895 mules, 247,808 asses, 1,092,996 cattle, 9,139,722 sheep, 3,793,998 goats, and 108,213 pigs.

There are extensive fisheries for sardines, allaches, anchovies, sprats, tunny-fish, &c., and also shell-fish. In 1921, 5,124 persons, and 1,327 boats of 4,611 metric tons were employed in fishing, and the fish taken were valued at 20,869,483 francs. The yield of coral was 59,620 lbs.

Algeria possesses iron, zinc, lead, mercury, copper, antimony, and petrol. The mineral output in 1921 was as follows: iron ore, 708,043 tons; lead, 9,754 tons; zinc, 14,550 tons; iron pyrites, 18,891 tons; coal, 9,290 tons; lignite, 251 tons; phosphates, 398,800 tons; copper, 1,720 tons; petrol, 418 tons.

Commerce.

The foreign trade of Algiers in recent years has been as follows (in 1,000*l*. sterling):—

—	Imports	Exports	—	Imports	Exports
1917	27,186	39,250	1920	122,920	54,214
1918	29,399	31,762	1921	71,625	54,624
1919	54,301	67,592	1922	80,283	55,179

The imports and exports for 1922 were divided as follows (in thousands of francs) :—

	Imports			Exports		
	From France	From Elsewhere	Total	To France	To Elsewhere	Total
Animal products . . .	73,799	41,436	115,235	173,383	57,571	230,954
Vegetable products . . .	232,022	262,143	494,165	759,467	174,376	933,843
Mineral products . . .	57,318	86,394	143,712	21,219	89,414	110,633
Manufactured articles . . .	1,179,802	74,175	1,253,977	21,383	82,678	104,061
Total . . .	1,542,941	464,148	2,007,089	975,452	404,039	1,379,491

The principal imports in 1922 were (in thousands of francs), sugar, 74,737 ; petroleum, 56,144 ; paper, 96,048 ; clothing, 75,367 ; automobiles, 50,842. The principal exports were sheep, 104,258 ; raw silk, 15,726 ; eggs, 10,698 ; wheat, 35,505 ; figs, 14,554 ; tobacco, 45,654 ; cigarettes, 38,696 ; wines, 426,509.

In 1922 the receipts of the customs authorities amounted to 38,771,348 francs ; and in 1921 to 29,515,974 francs.

Total trade between the United Kingdom and Algeria (Board of Trade returns) for 5 years :—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Algeria into U.K. . .	2,360,039	1,940,089	3,936,104	1,727,568	1,659,199
Exports to Algeria from U.K. . .	3,879,536	3,653,242	3,723,874	1,217,926	1,851,461

Shipping and Communications.

In 1922, 2,517 vessels of 4,661,448 tons net entered, and 4,210 vessels of 5,201,773 tons cleared Algerian ports.

On January 1, 1921, the mercantile marine of Algeria consisted of 400 vessels of 61,974 tons net.

National roads have a length of 3,317 miles.

On December 31, 1920, there were 2,221 English miles of railway open for traffic (exclusive of lines on Tunisian territory). Of the total 807 miles are privately owned.

The postal receipts in 1921 were 13,416,561 francs, and there were 725 post offices. The telegraphic receipts were 6,938,937 francs, and those from telephones 7,481,749 francs. The total for the three services was 27,887,247 francs.

The telegraph of Algeria consisted on December 31, 1919, of 8,121 miles of line and 25,283 miles of wire, serving 786 offices. There were on January 1, 1922, 11,579 telephone subscribers, 521 public telephone offices, and 11,293 miles of inter-urban line.

On February 1, 1921, postal cheque accounts were opened at Algiers, and on December 31, 1921, there were 2,188 accounts with a total balance of 3,687,612 francs.

The Bank of Algeria is a bank of issue, with a capital of 20,000,000 francs, but its note circulation must not in any case exceed 1,300,000,000 francs (law of January 29, 1920). Several co-operative agricultural banks, assisted by Government funds, are in operation. There are in Algeria 7 savings banks with, on December 31, 1918, 20,511 depositors, the amount due to depositors being 4,828,400 francs. Barclay's Bank (Overseas), Ltd., have branches at Algiers and Oran.

British Consul-General for Algeria.—B. S. Cave, C.B.

Vice-Consuls at Algiers.—W. H. Gallienne and B. G. Chamberlain.

Vice-Consuls at Arzeu, Montaganem, Bône, Oran, Philippeville, and Bougie.

Money, Weights, and Measures.

The money, weights, and measures of France only are used.

FRENCH EQUATORIAL AFRICA (FRENCH CONGO).

The French Congo extends along the Atlantic coast between Cameroon and the territories of the Belgian Congo, with the exception of the Spanish territory on the coast from the Muni river on 1° N. lat. to Cameroon, and inland to the meridian of 11° 20' E. of Greenwich, and the Kabiinda region, which is Portuguese. Inland it is bounded by the Congo and Ubanghi rivers and stretches northwards to the Bahr-el-Ghazal and Lake Chad. French acquisition began on the Gabun river in 1841; Libreville was founded in 1849; Cape Lopez was gained in 1862, and the French possessions extended along the coast for about 200 miles. Since then the territories have been increased by exploration and military occupation and their limits have been defined in a series of international conventions. By a convention, dated November 14, 1911, France agreed to cede certain parts of the colony to Germany in return for German recognition of the French protectorate in Morocco. These territories were restored to France by the Treaty of Versailles of June 28, 1919. The territory which in November, 1911, Germany ceded to France was incorporated in French Equatorial Africa.

By decree of January 15, 1910, the French Congo was divided into three circumscriptions which form three colonies, viz.:—the Gabun Colony (capital Libreville), the Middle Congo Colony (capital Brazzaville), and the Ubangi-Shari Colony (capital Bangui). The Chad Territory, which was formerly a dependency of the Ubangi-Shari Colony, was, by decree issued on March 17, 1920, made a separate colony.

By decrees issued on January 15, 1910, the name of the French Congo was changed into French Equatorial Africa, which extends over the Gabun, the Middle Congo, the Ubangi-Shari and Chad Colonies; to these have since been added the Cameroonian territories.

The area is about 982,049 square miles, containing a population which at the 1921 census numbered 2,845,936 (2,932 Europeans). The area and population of the separate colonies is shown as follows:—

Colony.	Area in square miles.	Population.
Gabun	121,862	388,778
Middle Congo	150,292	581,143
Ubangi-Shari	208,219	604,644
Chad	501,676	1,271,871
Total	982,049	2,845,936

The Colonies have each a Lieutenant-Governor; they all have financial and administrative autonomy, and each has an administrative council; the Lieutenant-Governors are under the Governor-General of French Equatorial Africa, having his headquarters at Brazzaville, who is assisted by a Secretary-General and a Council of Government. There is a general budget for the whole of French Equatorial Africa, and also separate budgets for the colonies. Local revenues accrue chiefly from customs duties; there are native poll taxes. The sale of alcohol to natives is restricted. For 1922 the budgets showed the following figures: General budget, 9,358,542 francs; the colonial budgets were as follows: Gabun, 3,939,342 francs; Middle-Congo, 4,216,000 francs; Ubangi-Shari, 3,920,317 francs; Chad Colony, 3,597,400 francs. In the colony there are (1916) 45 mission schools for boys and 10 for girls, with about 3,600 pupils (724 being girls), and 94 public schools with about 3,900 pupils.

The resources of French Equatorial Africa are quite undeveloped. There are about 30,000 square miles of tropical forest extending to the Gabun coast, containing many species of industrial value. Wild cat-skin is the most important export, 1,434 tons in 1921. Palm oil is also produced to some extent, 5,345 tons were exported in 1921. Coffee is also cultivated. In the Chad Colony large numbers of cattle, sheep, asses, camels, horses, and ostriches are raised, but there are no facilities for export. Copper, zinc, and lead are found. In 1921 the total exports amounted to 21,984,831 francs; and imports, 41,662,259 francs.

There is considerable shipping at Port Gentil and Libreville, the chief ports; but at Loango steamers must anchor about three miles off the coast. Whale fishing commenced in 1912.

On February 6, 1921, a new railway was commenced to connect Brazzaville with the Atlantic at Pointe-Noûve.

The Central African telegraph line connects Brazzaville with Loango, and is in communication with the English Atlantic cable. Wireless telegraphy connects Brazzaville and the head of the Southern Railway in the Loango Region, a distance of 300 miles, and also Brazzaville and Leopoldville. In the Chad region there are several stations connecting Fort Lamy, Ati, Faya, and Maô. A line has been laid to connect Brazzaville with Bangui, and another to connect Bangui with Fort Lamy. The total length of line in operation is about 2,366 miles.

On the north-east of Lake Chad is the state of Kanem, which was completely subjected to France in 1903, and is now only a district of the Shari territory with Maô for its capital. Wadai, to the east of Kanem, with an area of about 170,000 square miles, and a semi-civilised population of about 1,000,000, accepted the French Protectorate in the summer of 1903. In 1911 a French force occupied Arada, some miles to the north of the capital, Abeshr, which is in communication with Benghazi, on the coast of Tripoli, by caravans, and in 1913 Ain-Galakka.

Governor-General of Equatorial Africa.—M. Augagneur (1920).

MADAGASCAR.

Government.

The last native sovereign of Madagascar, Rànavàlona III. (born 1861, died 1916), succeeded in 1883. The French having claimed a portion of the north-west coast as having been transferred to them by local chiefs, hostilities were carried on in 1882-84 against the Hovas, who refused to recognise the cession. In 1885 peace was made, Diégo Suarez having been surrendered to France. A French Resident-General was received at the capital, and the foreign relations of the country were claimed to be regulated by France. By the Anglo-French agreement of August 5, 1890, the protectorate of France over Madagascar was recognised by Great Britain; but the Native Government steadily refused to recognise any protectorate. In May, 1895, a French expedition was despatched to enforce the claims of France, and on October 1, the capital having been occupied, a treaty was signed whereby the Queen recognised and accepted the protectorate. By a unilateral convention made in January, 1896, Madagascar became a French possession, and by law promulgated August 6, 1896, the island and its dependencies were declared a French colony.

Governor-General.—Hubert Garbit (appointed March 14, 1920).

A Consultative Council of Administration has been established at Antananarivo. The Colony is not represented in the French Parliament, nor has it any elective assembly. By decree of June 1918, Madagascar is divided into 24 provinces, and 75 districts administered by officials of the council of administration. Natives are employed to a large extent in subordinate positions both in the civil and military administration. In some parts of the island the natives, under the direction of the administrateurs, are allowed to choose one of their number as intermediary between themselves and the native governors appointed by the French Government. These representatives receive a remuneration and give their whole time to this work.

Area and Population.

Madagascar is situated to the south-east coast of Africa, from which it is separated by the Mozambique Channel, the least distance between island and continent being 240 miles; its length is 980 miles; greatest breadth, 360 miles, and it has a coast line of over 3,000 miles. The area is estimated at 228,000 square miles, and the population at 3,613,341 (14·5 per sq. mile), of whom 18,130 are Europeans and 5,810 Asiatics. According to the census of 1921 there were 3,354,662 Malagasy.

The Malagasy races or tribes are very numerous, the more important being the Hova (906,938), the Betsiléo (479,686), the Betsimisaraka (403,475), the Tanala (151,071), the Sakalava (141,726), and the Bara (157,096). Hindus, Chinese, Arabs, and other Asiatics carry on small retail trade. The most intelligent and enterprising tribe is the Hova or Merina, whose language, allied to the Malayan and Oceanic tongues, is understood over a large part of the island. The people are divided into a great many clans, who seldom inter-marry.

The slave trade was nominally abolished in 1877; slavery in Imerina and in all parts under French authority was abolished by proclamation on September 27, 1896. The system of forced labour in the public service was abolished on January 1, 1901, but the personal tax due from 16 to 60 years of age, formerly 5 francs, has been increased to 10, 15, in some provinces 20, and in Antananarivo to 30 francs. The populations of the chief towns were, in 1921: the capital, Antananarivo, in the centre of the island, 63,115; Tamatave, 15,000; Fianarantsoa, 8,231; Andevoranto, 1,322; Majunga, 7,205; Diégo Suarez, 10,377; Ambositra, 3,580; Tulear, 2,467; Mananjary, 8,927; Maroantsetra, 3,294; Fort Dauphin, 2,000. The principal ports are Tamatave, on the east coast, Majunga on the north-west coast, Diégo Suarez in the north, and Tulear in the south-west.

In 1896 Diégo-Suarez (a French colony from 1885), the island of Nossi Bé (area 130 sq. miles, population 34,266) on the west coast, and the island of Ste. Marie on the east coast (area 64 sq. miles, population, 9,220), and in 1914 the Comoro Islands, were placed under the authority of the Governor-General of Madagascar.

Religion, Education, Justice.

Up to 1895 a large portion of the Hova and of the other tribes in the central districts had been Christianised. The Christian population was estimated at 450,000 Protestants, and 50,000 Roman Catholics. There are many missionary societies at work, French (Catholic and Protestant), British the London Missionary Society, the Friends' Mission, and the Anglican Mission; there is also a Norwegian Lutheran Mission and an American Mission. French Catholic missions had 258 European workers (67 female); Protestant and Anglican missions had 173 (54 female). The outlying tribes are still mostly heathen.

Education is compulsory from 8 to 14 years of age. On January 1, 1918, there were 745 official schools with 76,243 pupils (48,444 boys and 24,206 girls), and 432 private schools, with 43,994 pupils. Children are required to learn the French language. At Antananarivo there is a school of native medicine, an administrative and commercial school, a normal school, and a school of agriculture.

For the administration of French justice there are a *Parquet* consisting of a *Procureur-Général* and other officials, a court of appeal, 4 courts of first instance in the principal towns, and justice of peace courts at 17 centres. For native justice there are tribunals in the districts and provinces, and the natives have the right of appeal from lower to higher tribunals.

Finance.

The local revenue of Madagascar is derived chiefly from direct taxation (including a poll tax and taxes on land, cattle, and houses), from customs and other indirect taxes, from colonial lands, from posts and telegraphs, markets

and miscellaneous sources. The chief branches of expenditure are general administration, public works, the post office, and the public debt. For 1921 the local budget balanced at 66,232,500 francs; estimate, 1922, 69,129,000 francs.

The colony has since 1897 contracted debt to the amount of 4,200,000*l.* at the average yearly rate of interest of 3·02 per cent. The loans were made for the purpose of public works or for the conversion of loans for that purpose.

Defence.

In peace time the troops in Madagascar (including the forces at Diégo-Suarez) consist of 2,411 Europeans, and 6,376 natives. The police and militia are maintained on the local budget.

Production and Industry.

In 1896, on the completion of the French occupation of the Island, the Malagasy system of land tenure was modified; foreigners were permitted to acquire land, and registration of land was begun. Government lands, urban or non-urban, are let or sold to private persons, or to companies for agriculture, pasturage, or mining. On December 31, 1916, there were 2,634,410 acres of land under cultivation by natives and 257,343 acres by Europeans. Estimated yield of the chief vegetable products for 1918 was rice (701,005 tons), sugar (516 tons), coffee (1,116 tons), manioc (800,700 tons), cotton, cacao, vanilla, (422 tons), tobacco (986 tons) butter beans (12,375 tons), cloves, mulberry trees, and rubber trees. Sericulture is encouraged. The forests abound with many valuable woods, while caoutchouc, gum, resins, and plants for textile, tanning, dyeing, and medicinal purposes abound. The quantity of graphite and caoutchouc exported is at present considerable; the production of graphite for 1917 was 35,000 metric tons.

Cattle breeding and agriculture are the chief occupations of the natives; there were on December 31, 1919, 7,277,609 cattle in the island; 3,086 horses; 270,690 sheep; 140,426 goats; 662 ostriches, and 421,349 pigs.

Silk and cotton weaving are carried on, and the working of metal and the making of panama and other straw hats. The preparation of sugar, rice, soap, tapioca, &c., is being undertaken by Europeans, as well as the canning of meat. There are large meat-preserving factories at Bo-anamary (Majunga), Diégo-Suarez, Tamatave, Antananarivo and Antsirabe.

Of minerals, gold (14,668 ozs. in 1921), iron, copper, lead, silver, zinc, precious stones, mica, antimony, manganese, nickel, sulphur, graphite (6,000 tons in 1921), lignite (first found in March, 1912), and also coal have been found in various parts of the island.

Commerce.

The trade of Madagascar has been as follows in five years :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports . . .	5,470,823	4,090,792	3,958,909	11,187,786	9,081,841
Exports . . .	3,448,318	3,671,808	7,086,703	9,437,707	4,332,323

The chief articles of import and export in 1920 and 1921 were the following:—

Imports	1920	1921	Exports	1920	1921
	Francs	Francs		Francs	Francs
Cottons	86 127,235	53,501,259	Gold dust & ingots	3,603,418	3,886,992
Beverages	20 580,678	10,398,657	Cattle	2,713,429	3,396,131
Machinery	7,397,256	7,402,157	Tanning bark	329,914	85,193
Metals	10,402,033	20,561,610	Rice	25,460,561	5,092,881
Cement	1,955,006	2,721,094	Hides	43,739,479	3 951,596
Lime	71,348	65,584	Rafia fibre	8,164,487	1,557,956
Clothing	14,943,872	12,487,181	Wax	3,026,658	1,716,524

The trade in 1920 and 1921 was distributed between the principal countries as follows —

From or to	Imports		Exports	
	1920	1921	1920	1921
	Francs	Francs	Francs	Francs
France	170,559,445	175 998,509	165,897,019	70,674,148
French Colonies	43,434,430	14,062,116	25,701,893	10,340,854
United Kingdom	10,159,888	7,080,898	20,001,220	13,814,531
British Possessions	46,049,414	19,875,969	18,929,443	9,178,295

According to Board of Trade returns, the imports from Madagascar into Great Britain in 1922 amounted to 413,585½ (mainly beans and plumbago), and the exports from Great Britain amounted to 125,424½ (mainly cotton goods).

Shipping and Communications.

Tamatave, the principal seaport of the island, is visited by the steamers of two French shipping companies, and the principal ports are connected with each other by coasting steamers plying regularly. In 1921, 5,604 vessels of 1,566,786 tons entered and 5,665 vessels of 1,555,217 tons cleared at the ports of Madagascar. Of the total tonnage entering 1,315,436 tons were French (4,503 vessels), and 145,783 tons were British (732 vessels); and of those clearing, 1,308,893 tons were French (4,570 vessels), and 141,033 tons British.

There are as yet but few roads in Madagascar in the European sense of the word. At the end of 1920 there were 1,611 miles of metalled roads. Antananarivo is connected by metalled road with Ambalavao, 290 miles to the south; Miarinarivo, 60 miles to the west; Marololo, 240 miles to the north-west; Mahatsara, 160 miles to the east, and Mananjary, one of the lesser east coast ports, 385 miles. Waggon roads have been made from Tamatave to Antananarivo, from Antananarivo to Maevatanana and between most of the chief military posts. Three railways are at present worked in Madagascar. The first is the through railway line between Antananarivo and Tamatave (240 miles) which was opened for traffic in March, 1913. The second is the railway which is being constructed between Antananarivo and Antsirabe (noted for its thermal springs), 107 miles south of Antananarivo, 27 miles of which were opened for traffic in January, 1919. The third is the branch line of the Tamatave railway, from Moramanga to

the Antsihanaka provinces, towards the north of the island, which was opened for traffic in October, 1917, as far as Anosiroa, a distance of 61 miles. Total railway mileage (including narrow-gauge local lines) on June 30, 1919, 776 miles.

There is postal communication throughout the island. The telegraph line has (December 31, 1918) a length of 4,444 miles, and 6,520 miles of wire. There is cable communication to Mozambique, Mauritius, Réunion, and Aden. In 1918 there were 462 miles of urban telephone line, 1,703 miles of inter-urban circuits, and three Government wireless telegraph stations.

Money and Banks.

The Comptoir National d'Escompte de Paris has agencies at Antananarivo, Tamatave, Diégo-Suarez, Mananjary, Majunga and Tuléar; in 1911 the Bank of Madagascar, with headquarters in Paris, was opened at Tamatave with a capital of 600,000 francs.

The only legal coin is the silver 5-franc piece, with its silver sub-divisions, as well as copper coins of 5 and 10 centimes, but the Italian 5-lire piece and Belgian, Greek, and other coins of equal value are also in circulation. French Bank notes of 5, 10, 20, 50 and 100 francs are also legal tender, as well as, since the war, postage stamps affixed to cardboard, for smaller values, viz., 10, 25 and 50 centimes, and 1 and 2 francs.

MAYOTTE AND THE COMORO ISLANDS.

The archipelago of the Comoro Islands, is formed by the islands of Mayotte, Anjouan, Grande Comore and Moheli. Before 1912, Anjouan, Moheli and Grande Comore were only under French protection; Mayotte alone being a colony. But by a law of July 25, 1912, and a decree of February 23, 1914, the whole archipelago has become a colony, attached to the general government of Madagascar, of which it forms a twenty-third province the 'Province des Comores'.

In 1921 the combined population was 110,000.

The island of Mayotte (140 square miles) had a population (1915) of 13,500. There is an increasing emigration to Zanzibar and Madagascar. The chief product was formerly sugar, but the cultivation of vanilla has now superseded that of the sugar-cane. There are now only two sugar works and two distilleries for rum. Besides vanilla and sugar, cacao, aloes and perfume plants (citronella, ylang-ylang, patchouli, &c.) are cultivated.

Grande Comore, Moheli, Anjouan, and a number of smaller islands, have an area of about 650 square miles and population in 1914 of 84,117. Grande Comore itself is about 40 miles long and 18 miles at its broadest points. Vanilla, cacao and perfume plants are successfully cultivated. Grande Comore has a fine forest and exports timber for building and for railway sleepers.

The principal imports are cotton fabrics, metals, and rice; the principal exports, hides, sugar, and vanilla.

Consular and other Representatives.

OF GREAT BRITAIN IN MADAGASCAR.

Consul at Antananarivo.—P. Helyar.

There is also a Vice-Consul at Majunga.

RÉUNION.

Réunion (or Bourbon), about 420 miles east of Madagascar, has belonged to France since 1643. It is administered by a Governor assisted by a Privy Council, and an elective Council-General, and is represented in the French Parliament by a Senator and two Deputies. It has an area of 970 square miles and population (1921) of 173,190, of whom 167,947 were Europeans, 167,789 of French origin; there were also 2,903 British Indians, 403 natives of Madagascar, 885 Africans, 1,052 Chinese, 709 Arabians. The chief towns are: St. Denis, with 21,538 inhabitants in 1921; St. Pierre, 27,895; St. Paul, 19,456; St. Louis, 14,803. The towns are under the French municipal law. Réunion has a lycée with 24 teachers and 327 pupils. Primary education is given in a training school with 56 pupils and 7 teachers, and 174 elementary schools with 398 teachers and 16,731 pupils (1921). The chief port, Pointe-des-Galets, is connected by a coast railway of 80 miles with St. Benoît on the one hand, and St. Pierre on the other.

In 1888 this railway was taken over by the State. The chief productions are sugar (62,000 acres), rum, coffee (6,000 acres), manioc, (12,000 acres), tapioca, vanilla, spices. The forests occupy about 150,000 acres. There are 20 sugar factories in the island. The annual production of rum amounts to 1,076,020 gallons, of which 875,820 gallons are exported. The chief imports are rice, grain, &c.; the chief exports are sugar (55,564 metric tons in 1921) and rum. Total value of imports in 1921, 71,269,555 francs of exports, 78,654,501 francs. In 1921, 76 vessels of 162,682 tons entered, and 82 vessels of 180,383 tons cleared at the ports of the island. There are about 80 miles of railway. The Tamatave-Réunion-Mauritius Telegraph Cable is open for traffic. During the year 1921, there were 65,000 telephone conversations and 109,000 telegraph communications. There are 34 post offices and 850 telephone stations. The budget for 1920 balanced at 12,170,760 francs. The debt was 1,122,500 francs. The currency of Réunion consists of local bank notes and token nickel coinage. It has nominally the same value as that of France.

St. Paul and Amsterdam, small islands in the Indian Ocean, belong to France.

Kerguelen, a desolate island, about 50 S. lat. and 70 E. long., was annexed by France in 1893.

British Consul at Réunion.—M. J. T. Piat.

FRENCH SOMALILAND.

The colony of the Somali Coast lies between the Italian Colony of Eritrea and British Somaliland. On the north it is bounded by Cape Doumeirah, which separates it from the Italian possessions; on the south by a line drawn from the wells of Hadou to Gu-dessa, which separates it from the British possessions; the inland boundary towards Abyssinia being, by convention of March 20, 1897, at a distance of 90 kilometres (about 56 miles) from the coast. The territory has an area of about 5,790 square miles, and the population was estimated in 1921 at about 208,000. It is administered by a Governor, assisted by an Administrative Council. The port of Obock was acquired for France in 1862, but it was not till 1884 that its active occupation began. In 1881 Sagallo and Tajurah were ceded to France; in 1885, Ambado; in 1888 the territory was delimited by agreement with Great Britain; in 1888 a port was created at Djibouti, now the seat of government.

Djibouti has (1921) 8,366 inhabitants, of whom 354 are European (190 French). The natives are made up as follows (1921): Somali, 3,428, Arabs, 3,336; Danakils, 208; Indians, 356; Jews, 109; Sudanese, 238; Abyssinians, 89; Senegalese, 248; total 8,012. In 1902 a French mission school for boys and one for girls were opened at Djibouti; in 1921 it had 150 pupils. The local budget for 1922 balanced at 4,595,000 francs. The country has scarcely any industries, but with the coast fisheries and inland trade there is considerable traffic. The salt mines, opened in 1912, exported in 1921 6,961 metric tons of salt. The chief imports are cotton goods, butter, coal, sugar; the chief exports were coffee, ivory, hides and skins. The total imports in 1921 amounted to 129,840,325 francs, and the total exports to 109,361,080 francs. The export of the products of Abyssinia in 1919 amounted to 14,990,097 francs. Much of the traffic with Abyssinia

which formerly passed by Zailah now goes by railway from Djibouti to Addis Abeba (485 miles). The vessels of 3 French, 2 English, and 2 Italian shipping companies visit Djibouti, which is also in communication with Aden by means of French and English steamboats for local traffic. In 1921 there entered at Djibouti 484 steam merchant vessels of 1,529,989 tons. Of these vessels, 307 were French, 123 English, 31 Italian, 1 Greek, 2 Japanese, 2 Dutch, 6 Norwegian, 8 Brazilian, and 4 Russian.

FRENCH WEST AFRICA AND THE SAHARA

Since January 1, 1921, French West Africa comprises the following colonies:—(1) Senegal, (2) French Guinea, (3) the Ivory Coast, (4) Dahomey, (5) French Sudan, (6) Upper Volta, (7) Mauritania, and (8) Territory of the Niger.

In 1912 the Military Territory of the Niger was placed under a Commissioner, whose headquarters were at Zinder, the capital. In 1916 the region of Tibesti was attached, administratively, to French West Africa; it forms a part of the Territory of the Niger. In 1920 the Military Territory of the Niger was transferred to the civil administration.

The approximate area and population of French West Africa according to the Census of 1921 are shown as follows:—

Colony	Area (in Square Miles)	Population.			Total
		Non-African Races		African Races	
		French	Foreign	French	
Senegal	74,112	3,507	814	1,221,202	1,225,523
Guinea	95,218	751	606	1,874,639	1,875,996
Ivory Coast	121,970	728	107	1,441,845	1,545,680
Dahomey	42,400	470	68	841,705	842,243
French Sudan	617,600	843	140	2,473,606	2,474,589
Upper Volta	154,400	180	11	2,973,951	2,974,142
Mauritania	347,400	135	79	261,532	261,746
Territory of Niger	347,400	215	1	1,083,827	1,084,043
Total	1,800,566	6,829	1,826	12,275,307	12,283,962

A treaty of October 19, 1906, determines the course of the Anglo-French boundary from the Gulf of Guinea to the Niger. The delineation of the boundary was completed in 1912, and approved by the two governments in 1914. The British government has leased to France for purposes of commerce two pieces of land, one on the right bank of the Niger between Lealaba and the confluence of the rivers Moussa and Niger, and the other on one of the mouths of the Niger, each to form one block of from 25 to 120 acres with a river frontage not exceeding 436 yards: the lease, at first, to be for 30 years. It is further stipulated that, within the boundaries indicated in the convention, British and French as regards persons and merchandise shall enjoy for 30 years the same treatment in all matters of river navigation, of commerce, and of tariff and fiscal treatment and taxes of all kinds.

Under the Anglo-French Convention of April 8, 1904, the river port of Yarbata on the Gambia (belonging to the British colony of Gambia), with all its landing places, was ceded to France, and, if this port should prove

inaccessible to sea-going merchantmen, access to the river will be granted to France at an accessible point lower down. At the same time the Los Islands were ceded to France.

By an agreement, dated July 6, 1911, between England and France, the boundary line between French Guinea and Sierra Leone was readjusted.

By a Convention between Great Britain and France the former recognised the right of France to all territory west of the Nile basin, which practically includes the whole of the **Sahara** (exclusive of the Libyan Desert), and the State of **Wadai**. The French Sahara may be roughly estimated at about 1½ million square miles.

Over the whole of French West Africa there is a Governor-General, who is assisted by a Council, the seat of the general government being at Dakar. The Colonies are each under a Lieutenant-Governor, subject to the direction of the Governor-General, who has been relieved of the direct administration of any portion of his Government, and is free to devote the whole of his attention to directing and controlling the common interests of all the Colonies. To facilitate this object a General Budget has been created, drawn up by the Governor-General, which provides for all the services which are common to all the Colonies, and the funds for which are provided by the customs and shipping dues of each of the Colonies, which have now only their internal revenues to depend upon for their local budgets, which have, however, been relieved of the cost of all the general services.

The general budget of French West Africa for 1922 amounted to 71,260,000 francs. The military forces in peace times consist of 16,000 men, of whom 2,000 are Europeans. The police force numbers 4,000.

For primary education there are altogether 554 schools (278 village schools, 61 regional schools, 10 urban schools, 18 girls' schools, 180 schools for adults and 6 central groups). For higher technical education there are 4 institutions; of special schools there are 4 for half-caste orphans, 2 'metersas,' 1 school for chiefs' sons, and 2 schools for secondary education. The teaching staff numbers 609, and 23,291 children are receiving elementary instruction, about 2,000 of the pupils being girls.

The imports into French West Africa are mostly food substances, tissues, mechanical implements, and beverages; the exports from these colonies are chiefly fruits, oils and oil seeds, as well as rubber, cotton, cacao and timber. The following is a comparative table of values of the imports and exports during 1920 and 1921 for each of the colonies:—

Colonies	Imports		Exports	
	1920	1921	1920	1921
	francs	francs	francs	francs
Senegal	443,895,496	237,789,763	428,600,328	237,000,849
French Guinea	47,401,144	38,933,593	84,192,917	16,922,911
Ivory Coast	55,180,170	43,979,526	60,230,04	43,839,182
Dahomey	93,655,790	39,255,747	63,650,651	36,677,787
French Sudan	14,505,699	12,538,914	2,304,314	1,053,206
Total	654,638,301	372,497,545	589,051,244	335,473,935

In 1920, 4,813 vessels of 10,222,956 tons entered and cleared the ports of French West Africa.

There are 1,658 miles of railway and 11,798 miles of telegraph. In 1921 there were 247 post offices, divided as follows:—Senegal 42; French Sudan, 57; Guinea, 35; Ivory Coast, 45; Dahomey, 30; Mauritania, 9; Upper Volta, 13; and Territory of the Niger, 16.

952 FRANCE:—FRENCH WEST AFRICA AND THE SAHARA

The use of French weights and measures, and money, is compulsory throughout French West Africa.

Governor-General of French West Africa.—M. Carde. Appointed February 20, 1923.

The colony of **Senegal** was reorganised by the law of December 4, 1920. The capital is St. Louis, an old town founded in 1658 (population, 1917, 23,326, French 307). Two other important towns are Dakar, a fortified naval station and the seat of the Government General of French West Africa (population, 1918, 25,468, French 2,791), and Rufisque (population, 11,414, French 205). These three towns, with Goree, a small island situated in front of Dakar (population, 1,444, French 67), are municipal communes governed by a mayor and corporation.

The total area is 74,112 square miles, and the total population in 1921 was put at 1,225,523 (including 4,321 Europeans). The natives of the four towns and their descendants are French citizens, and other natives are French subjects.

The Colony is represented in the French Parliament by a deputy.

The Colony is administered by a Lieutenant-Governor, assisted by a Colonial Council of 40 members, 20 elected by French citizens and 20 by representatives of native chiefs of cantons and provinces. The Colony is divided into 11 'circles,' each under the rule of an administrator. The local budget for 1921 was 28,323,200 francs.

All towns having a sufficiently numerous European or assimilated native population have urban schools giving the same instruction as the French primary schools, modified to suit local requirements. At Dakar there are grouped superior technical schools common to all the colonies, a normal school for teachers, a professional school, a commercial and administrative school, a school of medicine. At St. Louis are a secondary school, a superior primary school, a professional school for interpreters, *kadis* (native judges), and chiefs' sons. There is a large hospital for natives at Dakar.

The soil is generally sandy. The natives cultivate ground-nuts, millet, maize, and some rice: other products are castor beans, some coco-nuts, gum from Mauritania, and rubber from the Casamance river. Ground-nuts form the bulk of the exports. A salt industry is being developed.

Native industries comprise weaving, pottery, brick-making and jewellery.

Imports in 1921, 237,789,763 francs: exports, 237,000,849 francs. The chief imports are cottons, foodstuffs, metal-work, coal. The chief exports are ground-nuts (236,719,556 francs in 1920), hides and skins, rubber and gums.

There are 1,494 miles of telegraph and about 100 miles of telephone lines. A submarine cable from Brest to Dakar was completed in April, 1905, so that the French West African Colonies are now independent of foreign cables. There are three other cables, one Spanish, one French West African, and the third belonging to a South American company.

One railway connects Dakar, Rufisque and St. Louis (165 miles); another one Thiés and Kayes (Upper-Senegal-Niger) 435 miles (350 miles open).

There is a river service on the Senegal from St. Louis to Kayes, the former a principal town of Upper Senegal-Niger (490 sea miles) on the Senegal river, during the rainy season, and extensive works for the improvement of the river have been carried out. The Senegal river is closed to foreign flags. Dakar, the principal port, is in regular communication with French ports by the steamers of 4 French lines, and with Liverpool by a British line. In 1921 2,115 vessels of 2,153,842 tons entered, and 2,103 vessels of 2,046,725 tons

cleared the ports of the colony. The dry dock at Dakar which was completed in 1908, can take boats 680 feet long. The Bank of West Africa (established June 23, 1901), with a capital of 6,000,000 francs, and reserve funds 3,920,000 francs, was founded for the purpose of carrying on financial, industrial, or commercial operations: it has a branch at Dakar, and agencies at St. Louis, and at Rufuquer. La Banque Française de l'Afrique Equatoriale has a branch at Dakar.

H. B. M.'s Consul-General at Dakar (for French Western Africa, including the Sudan).—R. C. F. Mugham.

Vice-Consul at Senegal—J. Cuthbertson Smith.

French Guinea lies on the coast between Portuguese Guinea, and the British colony of Sierra Leone, and extends inland so as to include the territories of Koubia, Dinguirav, Signiri, Kouroussa, Kankan, Kissidogo, Beyla, Macenta, Boffa, Boké, Konakry, Faranak, Forécariah, Kindia, Labé Mamou, Pita, Gueckélou, and N'Zérékoré. The area is about 95,218 square miles, and the population was, in 1921, 1,875,996, including 1,357 Europeans (751 French). A regular system of Government lay schools has recently been introduced all over French West Africa. The principal products are palm oil and nuts, rubber, millet, earthnuts, rice, gum, and coffee, which is grown in the Rio Nunez region. There is an experimental garden near Konakry (the capital) where the culture of bananas, pineapples, rubber trees, and other plants is being tried. Futa Jallon contains cattle in abundance. In 1921 there were 428,420 cattle, 75,418 sheep, 102,017 goats, 2,547 horses, and 433 asses. Gold is found in the river Tinkisso and in the Bouré and Siecke districts. Imports in 1921, 38,933,595 francs; exports, 16,942,911 francs. The principal exports were rubber, cattle, ground-nuts, hides, wax, wool, and palm-kernels. Number of vessels entered in 1921 was 270; number cleared 281. A network of roads is being made to connect with the railway station from Konakry to the Niger. The French Guinea railway which runs from Konakry on the coast to the Niger at Kouroussa (366 miles long) was opened in January, 1911, and in August, 1914, was continued to Kankan (412 miles from Konakry). The jetty 1,066 feet long, at Konakry has been completed. In the colony there are 2,201 miles of telegraph and 232 miles of telephone line, of which 74 miles are urban and 158 miles inter-urban. The Colony is connected by cable with France and Pernambuco; also with Freetown, Monrovia, and Grand Bassam. There is a wireless station at Konakry affording communication with Senegal (Rufisque) and the Ivory Coast (Monrovia). Konakry is visited regularly by the steamers of two French and one English company. The budget of the colony provided for 1922 the sum of 14,772,194 francs.

The **Ivory Coast** lies between Liberia and the British Gold Coast Colony. It has common frontiers with French Guinea, French Sudan, and the Upper Volta Colony. France asserted and obtained rights on the coast about 1842, but did not actively and continuously occupy the territory till 1882. Area about 121,976 square miles; population, 1,545,680; Europeans, 835. The seat of administration is Bingerville, the capital, formerly called Adjamé (European population, 90). There is a central school group at Bingerville and a number of Government schools in the districts. The chief ports, from a populous and commercial point of view, are Grand Bassam, with a lagoon (124 miles long, and 12 to 15 feet deep), forming an excellent inland waterway (there are 2 jetties, one 795 feet long, the other 892 feet long, built to avoid the bar at the entrance to the harbour); Assinie, also with a lagoon; Grand Lahou, the lagoon of which is connected by

means of a canal with the lagoon of Grand Bassam; Sassandra, with a pier, and Tabou, which has a wireless station. The chief centres in the interior are Abidjan, Dimbokro, Bouaké, Aboisso. Bondoukou, and Korhogo. The natives cultivate maize, rice, plantains, pine-apples, and many other fruits. The Europeans culture with success coffee trees and cocoa trees, especially in Elima near Assinie and in M'Bato near Bingerville. Coco-nuts and rubber are collected. The mahogany forests inland are worked. Gold is found near Grand Bassam in Baouli, on the Comoe and Bia Rivers, in Indenie. The imports in 1921 amounted to 43,979,526 francs, and the exports to 43,839,182 francs. Chief imports in 1921 were, tissues, 13,513,681 francs; tobacco, 1,419,660 francs; wines, 1,230,746 francs; metal work, 4,890,494 francs; machinery, 2,112,986 francs. Chief exports were, palm kernels, 4,984,780 francs; palm oil, 5,650,601 francs; dried and smoked fish, 1,107,916 francs; cocoa, 3,708,692 francs; rubber, 156,050 francs; mahogany, 25,621,024 francs; cotton, 225,556 francs. The ports of the Colony are visited by liners of several French, English and Belgian shipping companies. Number of vessels entered in 1921, 353 of 929,332 tons, and cleared 339 vessels, of 891,039 tons. From Abidjan, on the north side of the lagoon, a railway has been constructed, running between Abidjan and Bouaké (197 miles). Works are now contracted to lengthen this to the north, to the Niger and Upper Volta. There is a large network of roads suitable for motor traffic, total length about 1,553 miles. At the end of 1918, there were 2,300 miles of telegraphic and 117 miles of telephonic lines. The telegraph connects the principal towns and extends to adjoining colonies. Telephonic communication exists between Bassam and Bingerville and other places. The budget of the colony for 1922 has been fixed at 14,976,980 francs.

Dahomey stretches from the coast between Togoland on the west and the British possessions of Lagos and Nigeria on the east, and extends northwards to the French Military Territories. France obtained a footing on the coast in 1851, and gradually extended her power until in 1894 the whole kingdom of Dahomey was annexed. The colony has only about 70 miles of coast, but opens out northwards into a wide hinterland. The area in 1921 was 42,460 square miles, and the population 842,243, including 538 Europeans. The seat of government is Porto Novo (the chief business centre), which has about 20,000 inhabitants. Village, regional, and urban schools are instituted under the new West African educational system. The natives are of pure Negro stock, and belong to the Fon branch of the Ewe family. They are industrious agriculturists in the coast region, and grow maize, manioc, yams, and potatoes. The forests contain oil palms, which have been profitably utilized. These furnish the chief exports—kernels and oil. Cotton cultivation has recently been successfully introduced in the central provinces. At Porto Novo there is an experimental station. Imports in 1921, 39,55,747 francs; exports, 36,637,787 francs. The principal exports were palm kernels, 25,229 tons in 1921; palm oil, 5,842 tons in 1921.

There are few roads in the colony, but in the last four years they have been greatly improved. A new metalled road (310 miles in length) for motor traffic runs from Savé to the Niger. At Kotoun an iron pier has been erected, and from that port a railway runs into the interior to Savé (156 miles) with a branch line to Whydah and Segboroué in Lake Aheme (20 miles). The line is intended to run to Chaoru (400 miles). The gauge is a metre. A metre gauge railway has also been constructed from Porto Novo to Robé (50 miles) along the Lagos frontier.

A telegraph line connects Kotonu with Abomey, Togoland, the Niger, and Senegal. In the colony there are 1,389 miles of telegraph line, and 70 miles of telephone line. In 1921, 248 vessels of 680,740 tons entered, and 249 vessels of 682,590 tons cleared the ports of Dahomey. French and English coins are in circulation. The budget of the colony for 1921 provided for the sum of 9,005,460 francs. The local budget for 1922 was 8,960,000 francs.

The Colony of French Sudan was formed in 1904 from the Territories of Senegambia and the Niger, less the Senegal Protectorate, which was restored to Senegal. Its old name of Upper Senegal-Niger was changed to French Sudan by decree of December 4, 1920.

The Colony is bounded on the north by the Algerian sphere; on the west by Mauritania, the Falmé river, and the frontier of French Guinea; on the south by the frontiers of the Ivory Coast, and the Upper Volta, and on the east by the Territory of the Niger. It therefore includes the valley of the Upper Senegal, about two-thirds of the course of the Niger, much of the country enclosed in the great Bend, and a large part of the Sahara to the Algerian sphere of influence. The area is about 617,600 square miles, with a population in 1921 of about 2,474,589, including 983 Europeans.

At the same time that this Colony was formed the Military Territories, which now form an integral part of it, were broken up. The Second Military Territory, which included nearly all the country within the Bend, was handed over to the Military administration, and the First (Timbuktu) has been incorporated in Upper Senegal-Niger, and is administered by a colonel under the authority of the Lieutenant-Governor. The Third (Zinder-Chad) Territory has been constituted an autonomous unit. In 1919 the greater part of the southern portion in the bend of the Niger was created a separate Colony in the name of the Upper Volta (Haute Volta, *see below*).

The whole of the French Sudan is under civil administration, with the same judicial and educational systems as the other Colonies comprised in the Government General. The budget of the Colony for 1922 provided for 18,258,509 francs.

The most important and populous towns in the French Sudan are: Bamako, the capital, (16,000 inhabitants), Segou (8,405 inhabitants), Kayes (12,000 inhabitants), Djenné (5,450 inhabitants), Timbuktu (7,000 inhabitants), Goundam (3,200 inhabitants), Niolo (3,400 inhabitants), Sikasso (7,000 inhabitants). All the principal towns have regional or urban schools; Bamako has a professional school; there is a Mussulman superior school at Timbuktu with 67 pupils and one *médresa* (official).

The natives cultivate ground-nuts, millet, maize, rice, cotton, sesame; other products are rubber and kariti. Large stocks of cattle abound in the colony.

Native industries comprise pottery, brick-making, jewellery, weaving, leather-making. Chief imports are cottons, foodstuffs, metal work; total in 1921, 12,538,914 francs. Chief exports are ground-nuts, cattle, rubber, gum, kopak, skins and wool; total in 1921, 1,053,206 francs.

There is a very complete system of telegraphs throughout the Colony from Kayes to Niamey, Zinder, and Lake Tchad.

The Kayes-Niger Railway goes from Ambidedi to Koulikoro, a distance of 389 miles. For about three months in the year small steamboats perform the service from Koulikoro to Timbuktu.

Wireless telegraph connects Timbuktu, Kidal and Bamako with the Eiffel Tower in Paris, and with Dakar, Rufisque, Konakry.

956 FRANCE:—FRENCH WEST AFRICA AND THE SAHARA

The Colony of the Upper Volta was formed by a decree of March 1, 1919, from the southern section of the Upper Senegal Niger. It lies within the bend of the Niger which, with the Military Territory forms its eastern boundary; its southern boundary is formed by the river Mekrou and the northern boundary of Dahomey, Togoland, the Gold Coast, and the Ivory Coast; thence the boundary runs in a north-easterly direction from the river Bagoué to the Niger, about 16° N., below Ansongo. It embraces the circles of Gaoua, Bobo Dioulasso, Dédougou, Ouaga-dougou, Dori, Say, Ouahigouya, Tenkodogo, and Fada-N'Gourma. Area about 154,400 square miles, and population 2,974,142 (census 1921), including 191 Europeans. The administrative centre is Ouaga-dougou (population 19,332); other towns are Bobo Dioulasso (8,736), Dédougou (4,000), and Ouahigouya (5,600). Administratively, it is on the same footing as the other Colonies of French West Africa. Economically, industrially and commercially it possesses the same characteristics as the Upper Senegal-Niger Colony. The budget for 1923 balanced at 8,300,000 francs. An automobile service between Bouaké and Ouagadougou connects this colony with the Ivory Coast Railway.

Mauritania, formed into a Protectorate in May, 1903, converted into a special "Civilian Territory" in October, 1904, became a Colony on January 1, 1921, with a Lieutenant-Governor at its head. It consists of the districts of Trarza, Brakna, Gorgol, Assaba, Chemama, Guidimaka, Adrar, Levrier Bay, and Tagant, with a total area of 347,400 square miles. The native population numbers 261,532, mostly Moorish Muslims. The northern limit of the Colony is approximate, and the foregoing area is obtained by taking the latitude 23° 3' N. as the northern boundary.

The budget of the Colony for 1922 was 4,936,716 francs.

TUNIS.

(AFRIKIYA.)

Government.—**Sidi Mohamed el Habib Bey**, born 1858, succeeded his cousin, **Sidi Mohamed En Naccur Bacha Bey**, July 10, 1922.

The reigning family of Tunis, occupants of the throne since 1705, descend from **Hussein ben Ali**, commonly believed to be a native of the Isle of Crete, who made himself master of the country, acknowledging, however, the suzerainty of the Sultan of Turkey.

After the French invasion of the country in the spring of 1881, the treaty of Kasr-es-Said (May 12, 1881), confirmed by convention signed June 8, 1883, placed Tunis under the protectorate of France. The government is carried on under the direction of the French Foreign Office, which has a special department for Tunisian affairs, under the control of a French Minister Resident-General, who is also Minister of Foreign Affairs, and a ministry of 11 heads of departments, 8 of the ministers being French and 3 Tunisian. The country is divided into 19 districts (contrôles civils), and 6 military circles; the district governors (contrôleurs) are French; the subordinate officials (Caida,

Kahias and Sheiks) are Native. French tribunals administer justice between subjects of European powers, and also between them and natives (tribunals at Ouzara and Charaâ); there are Native courts for cases between natives. In 1914 the Tunisian penal law was codified. French administration in Tunis has been confirmed by conventions with all the European Powers regulating the status and the conditions of trade of their respective citizens within the Regency.

French Resident-General.—Lucien Saint (appointed November 24, 1920).

Area and Population.—The present boundaries are: on the north and east the Mediterranean Sea, on the west the Algerian province of Constantine, and on the south the great desert of the Sahara and Libya. Area about 50,000 English square miles, including that portion of the Sahara which is to the east of the Djerid, extending towards Gadames.

According to the census held on March 6, 1921, the total European population was 156,170, composed of 54,477 French (exclusive of the army of occupation and of the navy), 84,819 Italians, 13,504 Maltese, 664 Spaniards, 920 Greeks, and 1,786 other foreigners. The total native population was 1,938,920, of whom 1,891,280 were Arabs and Bedouins, and 47,640 Jews.

The capital, the city of Tunis, had, in 1921, a population of 171,672, of whom 79,175 were Moslems, and 19,030 Jews, besides 22,206 French, 42,592 Italians, 7,379 Maltese, and 1,295 other Europeans. By means of the canal, which was opened in 1893, Tunis is directly accessible to ocean-going vessels. Other towns are Bizerta with 20,763 inhabitants (7,063 Europeans), Ferryville with 4,675 (4,054 Europeans), and Tindja, 1,500 inhabitants.

The bulk of the population is Mohammedan under the Sheik-ul-Islam, and the revenue from the "Habus" lands, like that from the "Wakf" lands in Egypt, is applied to religious, educational, and charitable purposes. There are about 35,000 Roman Catholics, under the ministrations of the Archbishop of Carthage, and about 25 other clergymen. The Greek Church (400), the French Protestants, and the English Church are also represented, and there are 30 English Protestant missionaries at work.

Education.—Within the Regency there are about 319 public schools, 8 lycées and colleges, and 28 private schools (of which 6 Jewish schools are provided for by the Government). In the schools there are 44,500 pupils, of whom 27,168 are boys. Of the total number of pupils, 10,387 are French; 13,000 Mussulman; 9,542 Jews; 9,330 Italian; 1,910 Maltese and 329 others. In the Great Mosque at Tunis there is a Mohammedan university. In the city are 88 and in the interior 1,219 Mussulman primary schools, some of them assisted by Government funds. 24 Moslem apprenticeship-schools have been created during the last few years numbering 490 native pupils. Many private schools have recently sprung up at Tunis and Sfax. The abolition of congregational teaching decreed in France has been extended to the Regency as regards French children. The Italian Government and certain Italian societies still maintain Italian schools at Tunis and other large towns.

Finance.—Receipts and expenditure for 5 years—

Expenditure . . .	2,754,391	4,803,409	5,688,110	9,840,178	8,286,562

The estimates of ordinary receipts and expenditure for the year 1922 were as follows :—

Receipts		Expenditure	
	Francs		Francs
Taxation :—		Reylcal Civil List	2,495,000
Direct	33,372,900	Residency and direct services	16,897,005
Indirect	63,431,400	Charges on Public Debt	50,518,079
Monopolies :—		Departments :—	
Tobacco	39,650,000	Finance	40,392,397
Others	7,753,700	Post Office	14,594,787
Post Office, Telegraph, &c.	8,710,000	Local Administration	23,897,518
Royalties and Miscellaneous	54,263,300	Agriculture and Commerce	7,030,390
		Education	17,684,930
		Public Works	31,973,398
		Army	1,530,299
		Miscellaneous	650,340
Total	207,181,300	Total	207,164,053

At the end of the year 1921 the Tunisian Public Debt amounted to about 580,000,000 francs. The yearly charge for interest together with sinking fund is 891,019*l*. In normal conditions, the 1903 loan (640,000*l*.) will be extinguished in 1968, and the rest in 1988.

Defence.—The army of occupation consists of 25,000 men, including 1,145 officers, supported by native regiments (*tirailleurs* and *spahis*).

Production and Industry.—Tunis may be divided into five districts—the north, characterised by its mountainous formation, having large and fertile valleys (*e.g.*, the valley of the Merjerdah, and the plains of Mornag, Mateur, and Beja); the north-east, with the peninsula of Cap Bon, the soil being specially suited for the cultivation of oranges, lemons, and citrus fruits; the Sahel, where olive trees abound; the centre, the region of high table lands and pastures; and the south, famous for its oases and gardens, where dates grow in profusion. The chief industry is agriculture, and large estates predominate. The area of the country is divided as follows :—7,925,000 acres of tillage land; 2,740,000 acres of forest, containing 12,008,043 olive trees and 2,137,975 palm trees; 58,835 acres of vineyards; and 11,585,000 acres of stockland. The area of wheat in 1921 was 1,491,518 acres; the production was 289,000 tons; of barley 1,228,200 acres, and the production 250,000 tons; of oats 158,144 acres, and the production 60,000 tons. The total area of vineyards in 1921 was 58,367 acres, and 5,733,266 gallons of wine were produced. In the south of Tunis the date palms produced in 1920, 87,520,000 pounds of dates. Other products are almonds, oranges, lemons, shaddocks, pistachios, alfa grass, henna, and cork. The cork forests in the north-west have an area of 617,440 acres. Considerable areas of agricultural land have been acquired either on lease or by purchase by immigrants. In 1921 the total area occupied by French colonists was 2,530,000 acres, by Italians 427,000 acres, and by other Europeans 116,200 acres.

In 1921 the farm animals were :—horses, 74,245; asses, 144,535; mules, 29,816; cattle, 488,348; sheep, 2,037,551; goats, 1,113,845; camels, 132,196; pigs, 17,636.

In 1920 40 mines were worked; value of ore exported in 1920, 1,605,155*l*. These are being developed, and the output steadily increases. Lead-ore, zinc-ore, and iron are all found. By far the greatest development has been

in phosphates, the output of which is increasing yearly. Mineral output in 1920 :—lead, 23,600 tons ; zinc, 9,600 tons ; iron, 434,400 tons ; manganese, 1,275 tons ; phosphate of lime, 1,075,000 tons ; total value of the minerals, 1920, 5,378,740*l*.

Native industries are the spinning and weaving of wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery (in ancient style), and matting ; tanning and silk weaving are declining.

The fisheries are principally in the hands of Italians and Tunisians. In 1920, 2,835 boats (7,201 tons) were engaged in this industry, with a total of 10,386 men. Sardines, anchovies, allaches, tunny (5,695 tons of fish, valued at 552,764*l*. in 1920) were caught.

Commerce.

Commerce.—The imports and exports in recent years have been to the following amounts, including precious metals (1*l.* = 25 francs) :—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports	5,681,667	8,297,703	11,430,440	25,422,502	28,868,008
Exports	5,026,883	5,181,928	8,081,155	13,482,299	26,913,756

Imports and exports in 1920 were :—

Imports	Value	Exports	Value
	£		£
Textiles ¹	5,589,407	Grain, mealy food	1,456,506
Colonial produce	1,360,955	Marble, stone, minerals	5,106,043
Marble, stone, and minerals	1,781,637	Crude metals	1,907,410
Manufactured metals	3,255,108	Beverages and wines	815,949
Hides	651,513	Textiles	541,868
Yarns	651,125	Fruits and seeds	489,109
Timber	774,018	Live Animals	347,681
Mealy foods	2,381,739	Hides	569,252

¹ These goods coming chiefly from England.

The distribution of the trade in 1921 was as follows :—

Country	Imports	Exports	Country	Imports	Exports
	Francs	Francs		Francs	Francs
France	367,586,359	280,757,631	India	6,887,383	—
United Kingdom	68,536,263	64,947,732	Switzerland	11,290,346	2,555,174
Italy	43,734,117	137,414,861	Germany	9,643,683	26,738,894
U.S. of America	84,185,877	3,721,025	Spain	3,054,886	50,440,218
Algeria	14,399,736	12,661,690	Egypt	309,684	5,354,784
Belgium	16,844,018	29,639,773	Malta	1,445,619	18,458,651
Lybia (Tripoli)	12,252,421	8,779,252	Netherlands	2,428,628	13,714,194
Rumania	10,457,522	—	Brazil	7,281,014	2,941

Total trade between Tunis and the United Kingdom (according to Board of Trade returns) for 4 years :—

	1919	1920	1921	1922
	£	£	£	£
Imports from Tunis into U.K. .	2,207,631	2,383,620	1,130,778	654,764
Exports to Tunis from U.K. .	2,299,221	1,769,328	662,887	663,179

In the year 1920 there entered the ports of the Regency 8,428 vessels of 2,355,319 tons ; and cleared 8,333 of 2,339,621 tons.

Good roads to the length of 2,886 miles have been constructed between 1882 and 1920.

Length of railways, 1,260 miles in 1921 (331 miles broad gauge and 929 miles narrow).

There were in 1920, 3,218 miles of telegraphs ; 253 telegraph offices ; messages (1920), 1,694,273. In 1920 urban telephone systems had 2,727 miles of line ; inter-urban systems had 6,767 miles of wire. There were in 1920, 467 post offices ; letters sent and received, internal service, 45,553,328 ; external service, 53,831,376.

Money, Weights, and Measures.—The Banque d'Algérie has begun operations in the Regency and issues Tunisian bank notes.

The legal coinage since 1892 consists of pieces similar to the French, the pieces being coined in France.

The *ounce* = 31·487 grammes ; the multiples of the ounce are the various denominations of the *Rottolo*, which contains from 16 to 42 ounces.

The *Kaffis* (of 16 *whibas*, each of 12 *sahs*) = 16 bushels.

The principal measure of length is the *pik* : the *pik Arabi* for linen = ·5392 yd. ; the *pik Turki* for silk = ·7058 yd. ; the *pik Andoulssi* for cloth = ·7094 yd.

French weights and measures have almost entirely taken the place of those of Tunis, but corn is still sold in *kaffis* and *whibas*.

British Consul-General at Tunis.—P. C. Sarell.

There is a Consul at Bizerta, and Vice-Consuls at Sfax and Susa ; and Consular Agents at Mehdiia, Monastir, Gabes, and Djerba.

MANDATED TERRITORIES IN AFRICA: TOGO AND CAMEROON.

Togo.—Togo, the former German Colony, lies between the Gold Coast Colony on the west and French Dahomey on the east. It was surrendered unconditionally by the Germans to British and French forces in August, 1914, and is now divided between the French and British. Of the total area of 33,700 square miles, the French have obtained about two-thirds, 21,200 square miles, the boundary running from the north-east in a generally south-east and south direction to Lomé, in such a manner that no part of the coast is included in the British sphere. Lomé is the seat of the administration. The total population of the whole of Togo is estimated, in 1921, at 672,837 natives, with a European population of 210.

The southern half of Togoland is peopled by natives using 30 different languages, of which the principal is Ewe—these may be regarded as an offshoot of the Bantu peoples. The northern half contains, ethnologically, a totally different population descended largely from Hamitic tribes and speaking in all 16 languages, of which Dagomba and Tim are the most important. The majority of the natives are pagans, but many profess Mohamedanism, while Christianity has, latterly, been making some progress in the coast districts.

Inland the country is hilly, rising to 3,600 feet, with streams and waterfalls. There are long stretches of forest and brushwood, while dry plains alternate with cultivable land. Maize, yams, cassada, plantains, ground-nuts, etc., are cultivated by the natives; oil palms, caoutchouc, and dye-woods grow in the forests; but the main commerce is the barter trade for palm oil, palm kernels, coco, rubber and copra carried on with the European factories. There are considerable plantations of oil and coco palms, coffee, coco, kola, and cassada; kapok and cotton are also being tried as well as fibrous and other plants. In the Sokode and Sansane-Mangu districts in the French sphere there are about 65,000 head of cattle; sheep, goats, poultry and pigs are found, but nowhere in large numbers; in some districts horses of small size are bred. Native industries are: weaving, pottery, smith-work, straw-plaiting, wood-cutting, etc. There is no mining by Europeans, but the natives in the Sokode and Misahöhe districts smelt iron, in which this Colony is very rich. Imports for 1921 amounted to 10,918,270 francs; exports to 6,129,677 francs.

There are good roads, connecting the more important centres of the Colony. There are three railways connecting Lomé with Aneho (Little Popo) (27 miles), with Palime (74 miles), and with Atakpame (103 miles): Total, 204 miles, with 5 stations and sub-stations. There are 13 post and

telegraph stations and 4 sub-stations, connected by telegraph and telephone with the Gold Coast Colony, French Dahomey, and with Europe.

The ports of Lome and Anecho are of modern construction, capable of sheltering and unloading vessels of any size.

Cameroon.—The former German Colony of Kamerun, including the area of French Equatorial Africa ceded by France to Germany, was occupied by French and British troops in 1916. The greater portion of the territory has been placed under French administration, and a strip on the southern border of Nigeria under British. The total area allotted to France amounts to 166,489 square miles, excluding the 107,270 square miles ceded to Germany in 1911, which is now included in French Equatorial Africa. The portion of Cameroon placed under the Mandate of France by the Treaty of Versailles has, by a decree of March 23, 1921, been constituted an autonomous territory both administratively and financially. The seat of government is Yaoundé. General budget for 1922 balances at 17,292,000 francs; special railway budget, 3,380,000 francs. Chief products are coffee, tobacco, palm oil, and ivory. Imports in 1921 amounted to 32,581,277 francs, and exports to 22,498,333 francs. In 1921, 188 vessels (106 French, 35 English) entered at the port of Douala. The country has 213 miles of good roads, and 359 miles of railway.

AMERICA.

GUADELOUPE AND DEPENDENCIES.

Guadeloupe, situated in the Lesser Antilles, consists of two islands separated by a narrow channel, called 'Rivière Salée.' That on the west is called Guadeloupe proper or Basse-Terre, and that to the east, Grande-Terre, with a united area of 138,000 hectares (532 square miles), and a circumference of 275 miles; it has five dependencies consisting of the smaller islands, Marie Galante, Les Saintes, Désirade, St. Barthélemy, and St. Martin, the total area being 688 square miles. It is under a governor and an elected council, and is represented by a senator and two deputies. Population (1922) 229,839. Instruction (1921-22) is given in 1 *lycée* with 438 pupils, a secondary course for girls at Pointe-à-Pitre, with 250 pupils, and 101 public and private elementary schools. The public elementary schools have 361 teachers and 12,386 pupils, and the private have 703 under 28 mistresses. The seat of government is Basse-Terre (8,318 inhabitants). Pointe-à-Pitre (27,679 inhabitants) has a fine harbour. Revenue and expenditure balanced at 16,030,780 francs for 1922. Outstanding debt, December 31, 1921, 608,057 francs.

Chief products are sugar, coffee, cacao, and rum. For local consumption there are grown bananas, sweet potatoes, manioc, tobacco, indian corn, and vegetables.

In 1921, the imports were 78,989,677 francs, and the exports 74,601,693 francs (sugar, 25,024 tons; coffee, 657 tons; rum, 9,054,063 litres; cacao, 704 tons; vanilla 77,741 tons). Guadeloupe is in direct communication with France by means of two steam navigation companies. A new wireless station at Destrellan was opened in 1918. Within the islands traffic is carried on by means of roads. The Bank of Guadeloupe, with a capital of 3,000,000 francs, and reserve funds amounting to 343,746 francs, advances loans chiefly for

agricultural purposes, even on the security of jewellery. The Royal Bank of Canada has also established a branch. There is likewise another bank, the Banque de Commerce, but while this is a private institution, the Banque de la Guadeloupe and the Royal Bank of Canada have a semi-official character. Silver coin has disappeared from circulation; nickel treasury tokens (bons) of 1 franc and of 50 centimes are authorised up to a total emission of 1,000,000 francs.

British Vice-Consul at Guadeloupe.—J. E. Devaux.

GUIANA.

The colony of French Guiana, on the north-east coast of South America, is administered by a Governor, assisted by a Privy Council of 5 members. The colony has a Council-General of 16 members elected by French citizens resident in Guiana, and is represented in the French Parliament by one deputy. Area about 32,000 square miles, and population, census of 1921, 44,202. Cayenne, the chief town, has a population of 10,146, and the other 14 communes have 16,235. These figures are exclusive of the population of the penal settlement of Maroni, of the floating population of miners without any fixed abode, as also officials, troops, and native tribes. At Cayenne there are a court of first instance, a court of appeal, and justices of the peace, with jurisdiction in other localities. The military force consists of 200 officers and men of the Colonial Infantry. Primary education is given gratuitously since 1889 in lay schools for the two sexes in the communes and many villages. There is also a college for secondary and higher primary education, with a department for professional education and a normal course for teachers. There are also several Congregational schools. The school population in 1920–21 was 2,720. The penal settlement also has 3 schools with 208 pupils. The budget for 1920 amounted to 7,102,587 francs, receipts and expenses. The country has immense forests rich in many kinds of timber. There is little agriculture in the colony; only about 7,500 acres are under cultivation. The crops consist of rice, maize, manioc, cocoa, coffee, sugarcane, indigo, tobacco, and gutta percha. The most important industry is gold-mining (placer). Silver, iron, and phosphates are also worked. The exports consist of cocoa, phosphates, various woods, gold, rosewood essence, balata, and hides. The total imports in 1921 were valued at 48,155,347 francs, and the exports at 23,154,604 francs. There are three ports—Cayenne, Saint-Laurent-du-Maroni, and Oyapoc. Cayenne and Saint-Laurent are visited once a month by a cargo boat of the Compagnie Général Transatlantique. There is also steamboat communication between the capital and the other towns and with the neighbouring colonies. A waterplane service connects St. Laurent with the capital and inland centres. There are three chief and many secondary roads connecting the capital with various centres of population in the interior.

Since 1885 Cayenne has had a penal settlement for habitual criminals and convicts sentenced to hard labour. On December 31, 1920, the penal population consisted of 3,633.

The Bank of Guiana, under Government control, with a capital of 600,000 francs, with statutory reserve fund amounting to 650,000 francs, advances loans for agricultural and other purposes.

MARTINIQUE.

The colony is under a Governor, a General Council, and elective municipal councils. It is represented by a senator and two deputies. Area 385 square miles, divided into 31 communes; population (census 1921) 244,439. The

military force (1920) consists of one company of infantry and a battery of artillery. There is (1920) a law school (at Fort-de-France) with 70 students; a lycée for boys, with 652 pupils; a high school for girls with 815 pupils; primary schools, with 21,037 pupils (including 7 private schools); a commercial school, and a school of arts and crafts (93 pupils). Chief commercial town, Fort-de-France (population, 26,399). The budget for 1920 balanced at 16,198,602 francs. Sugar, rum, and cocoa are the chief productions, then come coffee, tobacco, and cotton. There are 15,000 hectares under the food-producing crops. Tobacco culture is under special regulations. There are 15 sugar works, 126 rum distilleries, and other industrial establishments. In 1920 sugar to the value of 17,546,768 francs, rum to the value of 89,464,153 francs, and cocoa to the value of 2,181,370 francs were exported. The total imports in 1920 were valued at 132,186,479 francs, and the exports at 128,953,479 francs. Vessels entered in 1920, 643 of 455,561 tons; vessels cleared, 649 of 542,138 tons. The island is visited regularly by the steamers of French and American companies. For local traffic there are subsidised mail coaches and motor-cars; and subsidised steamers ply on the coast. The colony is in telegraphic communication with the rest of the world by telegraph cables. The Bank of Martinique at Fort-de-France with a capital of 3,000,000 francs, and a branch of the Royal Bank of Canada advances loans for agricultural and other purposes.

ST. PIERRE AND MIQUELON.

The largest islands of two small groups close to the south coast of Newfoundland. Area of St. Pierre group, 10 sq. miles; population in 1921, 3,419; area of Miquelon group, 83 sq. miles; population, 499; total area, 93 sq. miles; total population, 3,918. Since July, 1921, a Governor organises and regulates the various branches of the public service. He is assisted by a consultative council of administration and municipal councils. Chief town, St. Pierre. Primary instruction is free. There are 2 public schools for boys, and 3 for girls, with (in all) 27 teachers and 618 pupils. There are, besides, infant schools, 'salles d'asile,' frequented by 116 children. There are a private boarding school and four private schools with 434 pupils.

The islands, being mostly barren rock, are unsuited for agriculture. The chief industry is cod-fishing. Imports in 1921, 22,988,803 francs; exports, 19,690,756 francs. The imports comprise textiles, salt, wines, foodstuffs, meat; and the exports, cod, dried and fresh, and fish products. St. Pierre is in regular steam communication with North Sydney and Halifax; and is connected by telegraph cable with Europe and the American continent. Local budget for 1922, 2,073,703 francs. Expenditure of France (budget 1921), 208,748 francs.

AUSTRALASIA AND OCEANIA.

NEW CALEDONIA AND DEPENDENCIES.

New Caledonia is administered by a Governor assisted by a Privy Council consisting of the Secretary-General, the Procureur-Général (the head of the Judicial administration), the Superior Commandant of the Troops, the head of the Department of Domains and Colonisation, and two notables of the colony appointed by the President of the Republic. The colony has also an elective Council-General. Nouméa, the capital, has a municipality; other centres of population are locally administered by municipal commissions. The colony contains a penal settlement at Nou Island. Since 1896, however, no convicts have been sent thither, and the convict element in the population is quickly decreasing.

The island is situated between the 20° 1' and 22° 26' parallels south latitude, and 161° 30' and 144° 40' east longitude. It has a total length exceeding 248 miles and an average breadth of 31 miles. Area, 7,650 square miles. According to the census of March 5, 1911, the population was 50,608, of whom 13,138 were free, 5,671 of convict origin, and 28,075 Melanesians and Polynesians. On January 1, 1921, the population of convict origin totalled 2,310. Nouméa had (1921) 10,053 inhabitants, of whom 6,502 were free. The immigrants from France are not numerous. Other immigrants (July 1, 1921) were 2,098 Javanese, 1,032 Tonkinese, 67 Indians, and 378 islanders from the New Hebrides. Primary instruction is provided in public and also in private elementary schools, the latter being assisted by the municipalities. In 1919 there were 50 public and private primary schools with 2,591 pupils (1,252 being girls), and 70 native schools with 2,408 pupils. In Nouméa the 'Collège La Pérouse' gives classical tuition to 120 pupils and professional instruction (iron and wood) to 80 pupils. Local budget for 1921, receipts and expenses, 18,359,125 francs. In 1921 the military force consisted of 400 Europeans. Of the total area more than half is mountainous or not cultivable; about 1,600 square miles is pasture land; about the same area is cultivated or cultivable; and about 500 square miles contain forest which is being worked. The land is divided into 3 domains: that of the state (in which gratuitous concessions may be made); that of the penal establishment (about 400 square miles); and that of the native reserve. The chief agricultural products are coffee, copra, cotton, manioc (cassava), maize, tobacco, bananas, pine-apples. There are 200,000 cattle and about 25,000 sheep. Local industries are developing; there are a grain storage and cleaning dépôt, meat preserving works, barking mills for coffee and cotton, and two blast

furnaces melting nickel ore. A hydro-electric factory is in course of construction. About 179,563 hectares of mining land are owned, and 90,722 hectares have been granted for prospecting. In 1921 the mineral export comprised chrome ore, 29,458 tons, and manganese, 3,574 tons. The value of the mineral export was 5,527,160 francs. The blast furnaces produced 4,486 tons of nickel valued at 5,819,300 francs. The imports in 1921 were valued at 48,565,525 francs, and the exports at 26,676,379 francs. The imports comprise wine, coal, flour, rice; the exports, minerals, coffee, copra, rubber, guano (4,998 tons in 1921), and preserved meats. In 1921, 89 vessels of 97,386 tons entered and 98 of 97,524 tons cleared at the ports of New Caledonia. Of those which entered, 50 (41,749 tons) were French and 17 (17,085 tons) were British. Nouméa is connected three times monthly with Sydney in New South Wales by regular steamers sailing monthly, and by other vessels sailing irregularly. There is a mail service by steamer along the coast. There is a narrow-gauge railway (single line) from Nouméa to Païta, about 25 miles long. The proposed extension to Bourail, 105 miles from Nouméa has, however, been postponed. There is a daily motor road service for passengers from Nouméa to Bourail, but most of the roads are only suitable for horseback transport. There are 987 miles of telegraph line and 530 of telephone line.

Dependencies of New Caledonia are:

1. The Isle of Pines, 30 miles to the south-east, with an area of 58 square miles and a population of about 600.
2. The Wallis Archipelago, north-east of Fiji, with an area of 40 square miles and about 4,500 inhabitants. The islands were placed under the French protectorate in 1887. There is a French Resident, and the archipelago is in regular communication with Nouméa.
3. The Loyalty Islands, 60 miles east of New Caledonia, consisting of 3 large islands, Maré, Lifou, and Uvea, and many small islands with a total area of about 800 square miles. The chief culture in the islands is that of coconuts; the chief export, copra and rubber.
4. The Huon Islands, 170 miles north-west of New Caledonia, a most barren group.
5. Futuna and Alofi, south of the Wallis Islands, with about 1,500 inhabitants, were annexed by France in 1888.

The **New Hebrides**, in accordance with the Anglo-French convention of February (ratified in October), 1906, are jointly administered by the High Commissioners of His Britannic Majesty and the French Republic. In 1914 an Anglo-French conference was appointed to devise means of remedying the defects of the condominium. There are French and English courts, and a mixed court with a judge foreign to both nations. Maize, coffee, vanilla, coconut trees are grown. In some places sulphur is abundant.

British Consul at Nouméa.—Mr. Dunlop.

FRENCH ESTABLISHMENTS IN OCEANIA.

These, scattered over a wide area in the Eastern Pacific, are administered by a governor with an Administrative Council consisting of certain officials, the *maire* of Papeete, and the Presidents of the Chambers of Commerce and Agriculture. The establishments consist of the **Society Islands**, the most important of which are Tahiti and Moorea, the former with an area of about 600 square miles and 11,746 inhabitants, the latter with an area of 50 square miles and 1,826 inhabitants; the principal product is phosphate (annual production, 80,000 metric tons). Other groups are

the **Marquezas Islands**, with a total area of 480 square miles and 2,300 inhabitants, the two largest islands being Nukahiva and Hivaoa; the **Tuamotu group**, consisting of two parallel ranges of islands from King George's Island on the north to Gloucester Island on the south, their total population being 3,715; the **Leeward Islands** (Iles sous le Vent), of which the more important are Huahiné (pop. 1,283), Raiatée and Tahaa (pop. 4,307), and Bora-Bora-Maupiti (pop. 1,330); the **Gambier, Tubuai, and Rapa Islands**; the **Gambier group** (of which Mangareva is the principal) having six square miles of area and 1,512 inhabitants; the **Tubuai (or southern) Islands**, of which Rurutu is the largest, Raiavavae (or Vavitu), Rimatara, and, far to the south, Rapa, having together an area of 115 square miles and about 2,955 inhabitants; Makatea, 628 inhabitants; Island of Maiao, 53 inhabitants. The total area of the Establishments is estimated at 1,520 square miles, and their population on July 1, 1921, at 31,655, of whom 25,569 were natives. There were 28,225 French, 2,687 other Europeans, and 743 Chinese. In 1903 it was decreed that separate islands or groups should no longer be regarded as distinct Establishments, but that all should be united to form a homogeneous colony. Local budget 1921, 5,980,000 francs.

The most important of the islands is **Tahiti**, whose chief town is Papeete with 4,601 inhabitants, of whom 2,126 are French. A higher primary school, with a normal school, has been established at Papeete, and there are 6 primary schools, each with about 100 pupils, in various islands, besides 4 Catholic and 2 Protestant mission schools. Pearls and mother-o'-pearl are important products. The island is mountainous and picturesque with a fertile coast-land bearing coconut, banana, and orange trees, sugar-cane, vanilla, and other tropical fruits, besides vegetables grown in temperate climates. Cotton, coffee, and tobacco are now little cultivated. The chief industries are the preparation of copra, sugar, and rum. Value of imports (1921) 563,290*l.*, exports, 600,000*l.* The chief imports are tissues, wheat, flour, metal work. The chief exports are copra (368,830*l.* in 1921), mother-o'-pearl, vanilla, coconuts and oranges. In 1921, vessels of 165,148 tons entered, and 161,936 tons cleared. The New Zealand company (with a French subvention) has a monthly service connecting San Francisco, New Zealand and Australia with Papeete, the Tuamotu Islands, the Marquezas, and the Leeward Islands. The shipping between the islands is carried on by sailing boats.

GERMANY.

(DEUTSCHES REICH.)

ON November 9, 1918, the abdication of the German Emperor was announced, and from that date Germany became a Republic.

(For the constitution of the Empire and its rulers, see THE STATESMAN'S YEAR-BOOK for 1918, pp. 881-884.)

Constitution and Government.

The Council of People's Commissioners in Berlin took over the Government of the country ; the reigning princes of the Federal States were either deposed or abdicated, the existing Imperial Parliament was declared dissolved, and arrangements were made for summoning a National Assembly. The elections for the body (for which all Germans, men and women, over 20 years of age voted) were held in January, 1919, and resulted, on the basis of proportional representation, in the return of the following parties :—Majority Socialists, 165 ; Centre (Catholic) Party, 90 ; Democrats, 75 ; Conservatives, 42 ; Independent Socialists, 22 ; German People's Party, 22 ; and minor parties, 7 ; total, 423. The National Assembly was summoned to meet at Weimar on February 6, and on February 11, 1919, it elected the first President of the Republic.

President of the German Republic.—Friedrich *Ebert*, born February 4, 1871. Holds office until June 30, 1925.

The President receives a salary of 1,200,000 marks per annum, and an allowance of 1,200,000 marks. Future Presidents will be elected by the direct vote of all citizens, male and female, over 20 years of age. The election must be held either on Sunday or on a day of public rest.

On November 22, 1922, the following Cabinet was appointed :—

Chancellor.—Dr. *Cuno*.

Vice-Chancellor and Minister of Justice.—Dr. *Heinze* (German People's Party).

Minister for Foreign Affairs.—Herr von *Rosenberg*.

Minister for Home Affairs.—Dr. *Oeser* (Democrat).

Minister of Finance.—Dr. *Andreas Hermes* (Centre).

Minister of Defence.—Dr. *Otto Gessler* (Democrat).

Minister of Economics.—Dr. *Becker* (German People's Party).

Minister of Labour.—Dr. *Heinrich Brauns* (Centre).

Minister of Food and of Agriculture.—Dr. *Müller*.

Minister of Posts.—Herr *Seingl*.

Minister of Transport.—*Wilhelm Groener*.

The Constitution of the Republic was adopted on July 31, 1919, by the National Assembly at Weimar, and promulgated on August 11, 1919. It declares that the new Commonwealth is a Republic and that the power of the State is derived from the people. The colours of the Republic are black, red and gold. The Constitution provides for Central and State Legislative organs; makes foreign relations, defence, customs duties, taxation and railway services matters for the central authority; lays it down that every component State in the Federation must have a Republican Constitution, with a universal, equal, direct, and secret franchise of male and female voters on the proportional system. An Imperial Council (*Reichsrat*) is to be formed for the representation of the component States (*Länder*). All Bills (*Gesetzesvorlagen*) before they are introduced into the Reichstag require the assent of the Reichsrat. The principle of the Referendum is provided for in the Constitution. The Constitution further declares all Germans equal before the law, and abolishes all privileges or disadvantages of birth, class, or creed. Freedom of speech and of the Press is guaranteed; so is the right of meeting. Members of the Legislature of the Republic (*Reichstag*) are to be elected by universal, equal, direct and secret votes of male and female voters, on the proportional system. The Reichstag is to be elected for 4 years. The President of the Republic is elected by the whole German people for a period of 7 years. Declarations of war and conclusions of peace are made by a law of the Republic. The Cabinet appointed by the President must enjoy the confidence of the Reichstag.

The Reichsrat consists of 66 members (Prussia 26, Bavaria 10, Saxony 7, Württemberg 4, Baden 3, and the other States 16).

The Reichstag, in accordance with the elections on June 6, 1920, February 20, 1921, and November 19, 1922, is composed as follows: Socialists, 173; Centre Party, 68; German National People's Party, 67; German People's Party, 66; German Democratic Party, 39; Bavarian People's Party, 20; Communists, 15; and minor parties, 11; total, 459.

The actual votes cast for the larger parties were:—Socialists, 11,151,600 (39·5 per cent. of total); Centre Party, 3,844,648 (13·6 per cent.); German National People's Party, 4,248,986 (15·1 per cent.); German People's Party, 3,919,523 (13·9 per cent.); German Democratic Party, 2,333,736 (8·3 per cent.); Bavarian People's Party, 1,173,344 (4·2 per cent.); and minor parties, 1,524,365 (5·4 per cent.); total, 28,196,202.

Area and Population.

I. PROGRESS AND PRESENT CONDITIONS.

The following table gives the area and population of the present States (*Länder*) of Germany as on June 30, 1922, in the order of their magnitude, embodying the returns of the census of October 8, 1919:—

States of the Empire	Area English sq. miles	Population Oct. 8, 1919			Pop. per sq. mile 1919
		Male	Female	Total	
Prussia ¹	113,746	17,538,419	19,157,732	36,696,151	323
Bavaria (with Coburg)	29,506	3,394,270	3,746,063	7,140,333	242
Württemberg	7,532	1,195,144	1,323,629	2,518,773	334
Baden	5,819	1,051,405	1,157,098	2,208,503	397

¹ Including the Saar.

States of the Empire	Area English sq. miles	Population Oct. 8, 1919			Pop. per sq. mile 1919
		Male	Female	Total	
Saxony	5,789	2,168,065	2,495,233	4,663,298	805

¹ See page 1012.

According to the Treaty of Versailles (June 28, 1919) Germany has agreed to the following territorial rearrangements :—(1) Alsace-Lorraine has been ceded to France, (2) the greater part of the Province of West Prussia has been ceded to Poland, (3) a part of Eastern Silesia and of East Prussia likewise to Poland, (4) a portion of Upper Silesia to Czechoslovakia, (5) Memel to the Allies, (6) Danzig to the Allies, (7) Eupen and Malmedy to Belgium.

Provision is made in the Treaty to settle the ultimate fate of the following areas by *plébiscite* :—(1) The Saar Basin (after 15 years), (2) Schleswig (in two zones), (3) districts in Southern East Prussia, in West Prussia and in Upper Silesia. Results of the *plébiscites*.—Schleswig (March, 1920), northern zone for Denmark, southern zone for Germany; East and West Prussia (July, 1920) for Germany; Upper Silesia (March, 1921) for Germany. Despite the decision in Upper Silesia, 1,240 square miles, with a population of 891,669, were transferred to Poland.

An estimate of the actual areas and populations lost to pre-war Germany has been made as follows :—Alsace-Lorraine, 5,605 square miles, population 1,874,014; ceded to Belgium, 399 square miles, population 60,003; ceded to Poland, 17,806 square miles, population 3,853,423; Memel, 1,025 square miles, population 141,238; Danzig, 738 square miles, population 330,630; ceded to Denmark, 1,541 square miles, population 166,348; ceded to Czechoslovakia, 110 square miles, population 45,396; total 27,224 square miles, population 6,471,052.

The Saar Basin, which will be placed under the government of the League of Nations, has an area of 742 square miles and a population of 652,818. The area of the occupied territory is about 12,338 square miles, containing about 7 million inhabitants.

The population of the German Empire (without Heligoland) was 24,831,896 in 1816, and 31,589,547 in 1837, showing an average annual increase of nearly 1·3 per cent. The following table shows

the actual increase in population at various periods, with the annual rate of increase per cent. The small increase in 1867-71 is explained by the intervention of the war with France.

Year	Increase	Annual Rate per cent.	Year	Increase	Annual Rate per cent.
1867 ¹	3,220,083	0·93	1890	2,572,766	1·07
1871	970,171	0·60	1895	2,851,431	1·12
1875	1,668,568	1·0	1900	4,087,277	1·51
1880	2,506,701	1·14	1905	4,274,311	1·46
1885	1,621,643	0·70	1910	4,284,504	1·36

¹ Since 1858.

II. MOVEMENT OF THE POPULATION.

The following table shows the movement of the population of the old Empire during three years :—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1919 ¹	844,339	1,299,404	38,904	145,303	1,017,284	+232,120
1920	894,978	1,651,593	52,306	188,050	985,235	+666,358
1921 ²	729,809	1,606,072	—	—	911,419	+694,653

¹ Exclusive of Alsace-Lorraine and most of that portion of Posen ceded to Poland.

² Exclusive of the Saar, Mecklenburg-Strelitz, and the eastern portion of Upper Silesia.

Of the children born in 1920, 856,515 were boys, and 795,078 girls; in 1919, 676,091 were boys and 623,313 girls.

The number of divorces in Germany was in 1920, 36,542, being 59·1 per 100,000 inhabitants; in 1919, 22,022 or 35·0.

The following table shows the annual number of German emigrants for six years :—

Year	Total	Destination			
		European Countries	United States	Brazil	Other American Countries
1916	326	—	291	—	35
1917	9	—	6	—	3
1918	—	—	—	—	—
1919	3,144	—	213	—	2,931
1920	8,458	1 ¹	1,429	181	6,897
1921	23,060	770 ²	9,080	6,872	6,838

¹ To Great Britain.

² 68 to Great Britain.

III. PRINCIPAL TOWNS.

German towns are officially distinguished as large towns (with 100,000 inhabitants and upwards); medium towns (20,000-100,000 inhabitants); small towns (5,000-20,000 inhabitants), and country towns 2,000-5,000 inhabitants). In 1905, only 1 town had over 1,000,000 inhabitants; 10 others

over 250,000 ; 30 others over 100,000 ; 43 between 50,000 and 100,000 ; and 137 between 20,000 and 50,000. According to the results of the census of October 8, 1919, the population of the principal towns at that date was :—

Town	State	Pop. (8 Oct., 1919)	Town	State	Pop. (8 Oct., 1919)

Religion.

The Constitution provides for entire liberty of conscience and for complete social equality among all religious denominations. There is no State Church.

There are 5 Roman Catholic archbishoprics, 14 suffragan bishoprics, and 6 bishoprics immediately subject to Rome; there are 3 apostolic vicariates. The 'Old Catholics' have a bishop at Bonn.

The following are the results of three religious censuses :—

Creed	1900	Per Ct. of Pop.	1905	Per Ct. of Pop.	1910	Per Ct. of Pop.
Protestants . . .	35,231,104	62·5	37,646,852	62·1	39,991,421	61·6
Catholics . . .	20,327,913	36·1	22,109,644	36·5	23,821,453	36·7

Others and un- classified . . .	17,535	0·03	17,203	0·03	214,152	0·3

Roman Catholics in 1905 were in the majority in Alsace-Lorraine, Bavaria, and Baden; and formed more than 20 per cent. of the population in Oldenburg, Württemberg, Hesse, and Prussia.

Instruction.

Education is general and compulsory throughout Germany. The laws of Prussia, which provide for the establishment of elementary schools (*Volks-schulen*), supported from the local rates, in every town and village, and compel all parents to send their children to these or other schools, have been adopted, with slight modifications, in all the States of the Republic. The school age is from six to fourteen.

According to a school census taken in 1911 there were in that year 61,557 public elementary schools in Germany with 148,217 male and 39,268 female teachers, and 10,309,949 pupils (5,157,446 boys and 5,152,503 girls).

There were also, in 1911, 480 private schools with 11,894 boys and 14,257 girls who received instruction similar to that given in the Public Elementary Schools.

The system of secondary education is practically homogeneous. Above the elementary schools rank the middle schools of the towns, the *Bürger-schulen* and *Höhere Bürgerschulen*, which fit their pupils for business life. Children of the working classes may continue their education at the *Fortbildungs-Schulen* or continuation schools, which are open in the evening or other convenient time. The *Gymnasien* are the most fully developed classical schools, preparing pupils in a nine years' course for the universities and the learned professions. The *Progymnasien* differ from these only in not having the highest classes. In the *Realgymnasien*, Latin, but not Greek, is taught, and what are usually termed 'modern subjects' have more time devoted to them. *Realprogymnasien* have a similar course, but have no class corresponding to the highest class in the preceding. In the *Oberrealschulen* and *Realschulen* Latin is wholly displaced in favour of modern languages. The teachers in German schools are required to hold a Government certificate, and to have undergone a year's training and probation. For girls there are *Höhere Töchterschulen* Lyceen, Oberlyceen and special *Studienanstalten* which prepare for the universities. Besides these there are numerous *Gewerbeschulen* or technical schools, *Polytechnica*, normal schools, seminaries, and the universities.

In 1911 (the latest available figures) the number of secondary schools was as follows:—For boys, Gymnasias, 524, with 9,769 teachers and 160,237 pupils; Realgymnasias, 223, with 3,708 teachers and 70,357 pupils; Oberrealschulen, 167, with 3,473 teachers and 75,832 pupils; Progymnasias, 81, with 570 teachers and 9,509 pupils; Pro-Realgymnasias, 63, with 384 teachers and 7,252 pupils; Realschulen, 411, with 4,265 teachers and 89,968 pupils. For girls, Gymnasias, 39, with 1,039 teachers and 22,137 pupils; High schools, 789, with 11,359 teachers and 212,324 pupils.

There are 10 fully equipped Technical High Schools, with the power of granting degrees. They are all aided by the States to which they respectively belong. The statistics for 1921 and 1921-22 were as follows:—

Schools	Teaching Staff (1921)	Students (1921-22)	Schools	Teaching Staff (1921)	Students (1921-22)
Berlin . . .	377	4,388	Stuttgart . . .	132	2,092
Munich . . .	183	4,419	Aachen . . .	152	1,442
Darmstadt . . .	156	2,955	Brunswick . . .	104	1,187
Karlsruhe . . .	145	1,766	Breslau . . .	88	1,088
Hanover . . .	131	3,003			
Dresden . . .	175	2,768	Total . . .	1,643	25,108

There are, besides, 3 Veterinary Colleges (942 students in 1921), 3 Agricultural Colleges (2,907 students in 1921), 3 Afforestation Academies (335 students in 1921), 2 Mining Academies (898 students), 5 Commercial High Schools (3,320 students), 1 High School for Economic Science (100 students), 1 Academy for Municipal Administration (133 students), 1 Academy for Practical Medicine (161 students), 16 Schools of Art (2,839 students), and 11 Colleges of Music (4,544 students).

There are 23 universities in the German Empire, besides the Lyceums, at Braunsberg (55 students in 1921), Bamberg (85 students in 1921), Dillingen (144 students in 1921), Eichstätt (98 students in 1921), Freising (164 students in 1921), Passau (105 students in 1921), and Regensburg (231 students in 1921), which have only faculties of theology (Roman Catholic) and philosophy.

The following table gives the date of foundation, the number of teachers and students for 1921 and 1921-22:—

Universities	Professors and Teachers (1921)	Professors and Teachers (1922)	Students (1921-22)					Total
			Theology	Jurisprudence, &c.	Medicine and Dentistry	Philosophy	Mathematic and Natural Science, &c.

¹ Including the students of forestry.

In three universities, namely, Freiburg, München, and Würzburg, the faculties of theology are Roman Catholic; four are mixed, both Protestant and Roman Catholic—Bonn, Breslau, Münster, and Tübingen; and the rest are Protestant. Cologne, Frankfurt, and Hamburg have no theological faculties.

Justice and Crime.

A uniform system of law courts exists throughout Germany, though, with the exception of the Reichsgericht, all courts are directly subject to the Government of the special State in which they exercise jurisdiction, and not to the Central Government. The appointment of the judges is also a State function, and not that of the Central Government. Germany possesses uniform codes of commercial and criminal law.

The lowest courts of first instance are the *Amtsgerichte* (1,778 on January 1, 1922), each with one or more judges, competent to try petty civil and criminal cases. The *Landgerichte* (159 on January 1, 1922), exercise a revising jurisdiction over the *Amtsgerichte*, and also a more extensive original jurisdiction in both civil and criminal cases, divorce cases, &c. In the criminal chamber five judges sit, and a majority of four votes is required for a conviction. But in the courts with appellate jurisdiction only three judges sit. Jury courts (*Schwurgerichte*) are also held periodically, in which three judges preside; the jury are twelve in number. The first court of second instance is the *Oberlandesgericht*. In its criminal senate, which also has an original jurisdiction in serious cases, the number of the judges is seven. There are twenty-seven such courts in Germany. The total number of judges on the bench in all the courts above mentioned was 9,906 (Jan. 1, 1921). The supreme court is the *Reichsgericht*, which sits at Leipzig, and has 103 judges. The court exercises an appellate jurisdiction over all inferior courts,

and also an original jurisdiction in cases of treason. It has 6 criminal and 7 civil senates.

In 1916, 341,283 persons were condemned by the courts; of these, 161,567 were fined, 155,109 were sent to prison, and 5,847 to penal servitude.

Pauperism.

Since January 1, 1916, the general principles as to poor-relief in all the German States are laid down by the Imperial law of May 30, 1908. According to this law, there may be formed local unions (*Ortsarmenverbände*) and provincial unions (*Landarmenverbände*). Usually a local union is a commune (*Gemeinde*), while a provincial union consists of a large administrative division such as a circle (*Kreis*), a province, or a whole State. For the purposes of poor-relief a settlement is acquired by one year's continuous residence (after the age of 16), by marriage, or by descent. A German in distress must be relieved by the local union in which he becomes destitute, and the cost must be refunded by the local union in which he has a settlement, or by the appropriate provincial union. In rural communes poor-relief forms part of the ordinary local business of the district councils; in urban municipalities the actual administration is carried out by a special committee under the presidency of the burgomaster. Poor rates are usually not levied. In most large towns the Elberfeld system of unpaid district visitors is in force. Statistics of pauperism are not published regularly; the last issue related to the year 1885.

Compulsory Insurance.

Social insurance has existed in Germany since 1880. It comprises compulsory insurance of workmen against sickness, insurance against accidents by employers, and the insurance of workmen against old age and infirmity.

Under an Imperial law of 1883 and amending Acts (codified in the *Reichsversicherungsgesetz* (R.V.G.), of July 19, 1911), workmen must be insured against sickness, and must themselves pay two-thirds of the contributions, their employers paying one-third. For accident insurance, under an Act of 1884 and amending Acts, the contributions are paid entirely by the employers, and they, for mutual protection, have united into associations according to the nature of the industries in which they are engaged. The working of these insurance associations is controlled by Government. For invalidity and old age insurances, under an Act of 1889, amended in 1899, the contributions are paid half by the workmen and half by their employers, while towards each pension the Government grants an annual subsidy of 50 shillings. The employers are responsible both for their own and the workmen's contributions, but the latter may be deducted from wages paid subsequently.

Contributions are paid by the purchase of stamps from the Post Office; these are affixed by the contributing person to cards on which there are spaces for stamps for 52 weeks. When the contributions are complete, the card is handed in to a specified office and a certificate given in return.

For the year 1919 the average of those insured against sickness was 16,949,944. Of this total, 15,840,850 (9,296,031 men and 6,544,819 women) were insured in ordinary societies, and 1,109,094 (1,057,405 men and 51,639 women) in *Knappschaften* or societies for miners. In 1919, 22,700,000 persons were insured against accident in 67 industrial societies and 49 agricultural societies, and 571 State or municipal organisations; and 16,859,600 against invalidity (11,688,300 men and 5,171,300 women) in 38 organisations.

Finance.

The following tables exhibit the budget estimates of the revenue and expenditure for five years, ending March 31 (20 marks nominal = 1l.):—

Years ending March 31	REVENUE			EXPENDITURE		
	Ordinary	Extraord. (loans, &c)	Total	Ordinary (recurring and non-recurring)	Extraord.	Total
	Marks	Marks	Marks	Marks	Marks	Marks
1918-19	8,478,609,249	23,111,100,038	31,589,709,287	8,628,940,230	36,884,731,755	45,513,671,985

1921-22	167,847,451,100	182,552,427,500	350,399,878,600	167,847,458,100	182,552,427,500	350,399,878,600
1922-23 ¹	115,521,633,300	236,770,261,100	352,291,894,400	115,521,633,300	236,770,261,100	352,291,894,400

¹ Preliminary figures.

The budget estimates for 1922-23 give the principal items of ordinary revenue and expenditure as follows:—

Revenue	1,000 marks	Expenditure	1,000 marks
Income Tax	25,000,000	President	2,943
Tax on Capital Increase	1,530,000	Parliament	61,122
Forced Levy on Capital	8,000,000	Foreign Office	725,346
Tax on Turnover	19,000,000	Home Office	2,039,893
Tax on Coal	22,000,000	Ministry of Labour	7,046,235
Tax on Tobacco	3,500,000	„ „ Defence	4,430,076
Tax on Beer	1,000,000	„ „ Pensions	10,401,362
Tax on Wines	1,000,000	National Debt	29,127,961
Corporation Tax	3,000,000	Financial Administration	48,610,442
Customs	8,000,000	• •	
Administrative Receipts	5,714,974		
Total (including all items)	115,521,633	Total (including all items)	115,521,633

The extraordinary budget provides for a revenue of 236,770,261,100 marks, including 236,770,261,100 marks from loans; and an expenditure of 236,770,261,100 marks, including 209,969,739,400 marks under the heading "Execution of the Peace Treaty," and 19,920,878,800 marks for the Postal and Railway Administrations.

On March 31, 1922, the total funded debt amounted to 65,667,652,500 marks, of which 55,131,454,200 marks are State loans of the Reich, 8,507,692,000 marks lottery bonds, and 7,028,506,300 marks interest-bearing Treasury bonds. There is also a floating debt of 271,935,165,300 marks of Treasury bills free of interest.

Between August 4, 1914, and March 31, 1922, the funded debt increased from 4,697,897,600 marks to 58,639,146,200 marks.

The growth of the German debt is shown as follows :—

Year.	Marks.	Year.	Marks.
1870	396,600,000	1910	5,013,506,000
1875	120,300,000	1915	16,954,868,000
1885	551,200,000	1920	183,183,195,300
1895	2,201,200,000	1921	248,849,188,600
1905	3,323,506,000	1922	337,962,817,800

Defence.

I. ARMY.

Towards the end of January, 1919, the President of the Republic was authorized by the Reichstag to disband the existing army and to raise a provisional National Defence Army pending the creation of a permanent Defence Force (*Reichswehr*). On May 1 the demobilization of the German army was officially declared to be completed, and the Defence Force came into being. On August 1 the strength of the Defence Force was 500,000 men. It was voluntarily recruited and was formed by raising brigades with the necessary auxiliary services in each of the old army corps districts. Meanwhile the Treaty of Versailles was signed on June 28 and was ratified by Great Britain on July 10. It was not ratified by Germany until January 10, 1920, when its provisions became effective.

Under the terms of the Treaty, enlistment is voluntary and for 12 years. Officers have to engage to serve for 25 consecutive years on appointment. The Reichswehr is organized in 7 divisions of infantry and 3 divisions of cavalry, with two army corps headquarter staffs. The strength of an army corps staff is 30 officers and 150 N.C.O.'s and men; of an infantry division, 410 officers and 10,830 men; of a cavalry division, 275 officers and 6,250 men. The total strength of the Reichswehr is 100,000 men. By June, 1921, the fortresses specified in the Treaty, and also the coast defences of Kiel and Heligoland had been razed. The equipment of the fortresses of Kustrin, Glatz, Neisse, Glogau, Loetzen, and Marienburg had been surrendered. The maximum armaments authorized are 84,000 rifles, 18,000 carbines, 792 heavy machine guns, 63 trench mortars, 304 7.7 c.m. field guns, and 84 10.5 c.m. howitzers. No military aircraft is permitted. During 1922, the Inter-Allied Disarmament Commission continued to find small stocks of arms concealed by private individuals, but all heavy artillery and military aircraft had been surrendered and destroyed, and, generally speaking, the disarmament of Germany may be said to have been completed.

During 1919 a number of organisations came into existence under the auspices of the Ministry of the Interior. At the end of 1919 these organisations consisted of the Public Safety Police (*Sicherheitspolizei*), 150,000 strong, the Emergency Volunteers (*Zeitfreiwilligen*), 150,000 strong, and the Civic Guards (*Einwohnerwehr*), 350,000 strong. Of these only the Public Safety Police were armed and equipped, and they were distributed amongst the chief towns of Germany. They were provided with rifles, bayonets and hand grenades, and had in addition 8 field howitzers, 16 field guns, 12 trench mortars, and 2,780 machine guns.

The raising of these forces is contrary to the terms of the Treaty of Versailles, and during 1921 pressure was brought upon Germany by the

Supreme War Council of the Allies, and after protracted negotiations the German Government agreed to the abolishing of the *Zeitfreiwilligen* and of the *Einwohnerwehr* and to modify the organisation of the *Sicherheitspolizei*. The Bavarian Government refused to disband the *Einwohnerwehr*, but again under pressure from the Supreme War Council, the *Einwohnerwehr* decided, on June 6, 1921, to disband voluntarily. In September, 1921, the disbandment of the *Zeitfreiwilligen* and the *Einwohnerwehr* was completed. The 150,000 *Sicherheitspolizei* remain in existence, but are no longer equipped with artillery.

II. NAVY.

The German Navy has become a purely coast-defence force and is directed and administered by the Chief of Naval Direction, under the Ministry of National Defence. In addition to the central administrative division are the Office of Naval Command (staff), the General Naval Office (supply, research and investigation), also the Naval Administrative Office, and some departments dealing with the relations of the Navy to the Defence Ministry, which also controls the Army.

The Treaty allows to the German Government the right of maintaining a navy, recruited and maintained on a volunteer basis. The fleet consists of six pre-Dreadnoughts completed between 1904 and 1908, each displacing approximately 13,000 tons and mounting four 11-inch and fourteen 6·7-inch guns. They are the *Braunschweig*, *Elsass*, *Hannover*, *Hessen*, *Schlesien*, and *Schleswig-Holstein*. They possess little fighting value. The six light cruisers authorized by the Treaty are the *Medusa*, *Thetis*, *Amazona*, *Arkona*, *Hamburg*, and *Berlin*, completed between 1901 and 1905, and each of them mounting ten 4·1 inch guns. There are also twelve destroyers, dating from 1911-13, and twelve torpedo-boats. No submarines are permitted. In addition to the ships and vessels indicated, Germany is authorised to retain certain others, which are to be kept in reserve and to have no ammunition on board. These are the battleships *Lothringen* and *Pruessen*, the cruisers *Nymph*e and *Niobe*, four destroyers, and four torpedo-boats.

The battleships, light cruisers, destroyers and torpedo-boats named above are divided equally to constitute squadrons severally in the North Sea and the Baltic. The cruiser *Berlin* is a training ship, and has recently made extensive cruises with young officers and men. This is the principal practical work of the German navy. The naval expenditure includes instalments for a replacement cruiser, which will be of the Dresden class, with displacement of 5,600 tons, carrying eight 6-inch guns. She is not expected to be completed until 1924.

The total personnel may not exceed 15,000, including a maximum of 1,500 officers and warrant officers. The officers and warrant officers engage for a minimum of twenty-five consecutive years, and the petty officers and men for twelve years. The vessels of war are to have a fixed allowance of arms, munitions, and material.

Production and Industry.

I. AGRICULTURE.

Generally speaking, small estates and peasant proprietorship prevail in the West and South German States, while large estates prevail in the north-east.

The subdivision of the soil, according to the latest official returns for Germany at the beginning of 1922 was as follows (in acres):—Arable land, 55,169,073 ; grass, meadows, pasture, 19,119,297 ; orchards, 122,212 ; vineyards, 225,468 ; woods and forests 31,749,686 ; all other, 11,335,639.

On June 12, 1907, the total number of agricultural enclosures (including arable land, meadows, cultivated pastures, orchards, and vineyards) each cultivated by one household, was for the old territory, 5,736,082, with an area of 78,665,370 acres, being an average of about 13·7 acres to each, as compared for the Germany of to-day with 5,068,597 with an area of 67,513,917 acres, being an average of about 13·3 acres to each. The total was distributed as follows :—

June 12, 1907	Under 4·94 acres	4·94 to 12·35 acres	12·35 to 247 acres	4·94 to 247 acres	247 acres and over	Total
Former German territory	3,378,509	1,006,277	1,065,539	262,191	23,566	5,736,082
Present German territory (as at 1922)	3,001,163	887,039	930,963	330,408	19,024	5,068,597

On June 12, 1907, these farms employed 15,169,549 persons, as compared with 8,283,510 in the present extent of Germany.

The areas under the principal crops, in acres, and the yields, in metric tons (1 metric ton = 2,204 lb. or ·984 an English ton), were for three years as follows :—

—	Acreage.			Produce (Metric tons).		
	1920	1921	1922	1920	1921	1922 ¹
Wheat . . .	3,428,503	3,602,600	3,423,550	2,247,551	2,933,820	1,895,723
Rye . . .	10,712,798	10,662,593	10,370,210	4,934,360	6,798,638	5,319,091

¹ Preliminary estimates.

In 1921 the area devoted to vines was 184,603 acres, the wine yield 38,608,152 gallons, valued at 2,462,737,634 marks. Area devoted to tobacco, 1920, 32,765 acres (yield 65,846,000 lb.); 1921, 25,172 acres (yield 43,426,208 lb.). Sugar production, 1920-21, 1,083,851 metric tons; 1921-22, 1,296,620 metric tons.

The number of domestic animals in Germany according to the census of December 1, 1921, was :—

States	Horses ¹	Cattle	Sheep	Swine	Goats
Prussia . . .	2,557,918	9,269,407	3,867,860	10,498,279	2,576,091
Bavaria . . .	380,128	3,562,926	686,213	1,884,597	443,769
Saxony . . .	165,303	721,536	91,064	562,760	319,437
Württemberg .	104,590	982,851	268,080	469,208	146,337
Baden . . .	64,551	617,065	72,811	467,888	184,916
Other States . .	412,206	1,696,767	906,389	1,996,658	662,235
Total . . .	3,684,696	16,850,852	5,892,417	15,879,390	4,332,785

¹ Exclusive of Army horses.

II. FORESTRY.

Forestry in Germany is an industry of great importance, conducted under the care of the State on scientific methods. The forest area of Germany in its present extent was put in 1913 (latest statistics) at 31,587,209 acres, of which crown forests occupy 704,338 acres; State and partly State forests, 9,319,471 acres; communal forests, 5,071,010 acres; private forests, 14,727,054 acres, and forests belonging to various associations or foundations, 1,265,336 acres. Of the whole forest area 9,465,708 acres are under foliage trees, oak, birch, ash, beech, etc., and 22,120,446 acres bear pine, arch, red and white fir, etc.

III. MINING.

The great bulk of the minerals raised in Germany is produced in Prussia, where the chief mining districts are Westphalia, Rhenish Prussia, and Silesia, for coal and iron, the Harz for silver and copper, and Silesia for zinc. Saxony has coal, iron, and silver mines.

In 1913 there were 4,275 mines and foundries in Germany employing 1,196,786 persons (1,133,701 men, 15,969 women, 46,947 juveniles, and 169 children under 14 years of age).

The quantities of the principal minerals raised were as follows in metric tons:—

	1918	1919	1920
Coal	158,254,116 ¹	116,707,234 ¹	131,355,964 ²
Lignite	100,599,318	93,648,281	111,887,694
Iron ore	7,914,897 ¹	6,153,834 ¹	6,361,614
Zinc ore	447,061	285,506	294,718 ²
Lead ore	125,090	85,187	97,132 ²
Copper ore	872,592	616,809	576,211
Rock salt	2,344,481	1,487,849	2,596,825
Potash	9,233,184	7,888,152	11,390,166

¹ Exclusive of Alsace-Lorraine. ² Exclusive of Alsace-Lorraine and the Saar.

² Exclusive of Eupen and Malmedy.

In 1921 the output of coal was 136,227,231 tons; of lignite, 123,010,036 tons.

In 1918 the total output of pig iron was 16,763,809 tons; in 1916, 11,342,077 tons; in 1917, 11,622,168 tons; in 1918, 9,208,252 tons; in 1919, 5,654,215 tons; in 1920, 6,387,625 tons. Ingot steel production in 1914 totalled 13,520,664 metric tons; in 1917, 13,778,852 tons; in 1918, 11,392,135 tons; in 1919, 6,731,699 tons; in 1920, 8,204,255 tons.

IV. FISHERIES.

The yield of the North Sea fisheries was valued at 553,289,962 marks in 1921, and 573,426,800 marks in 1920; and the Baltic fisheries, 110,430,375 marks in 1921, and 118,794,200 marks in 1920.

V. MANUFACTURES.

The chief seats of the German iron manufacture are in Prussia, Bavaria, and Saxony. Steel is made in Rhenish Prussia. Saxony is the leading State in the production of textiles, but Westphalia and Silesia also produce linen; Württemberg, Baden, and Bavaria produce cotton goods. Woollens are manufactured in several Prussian provinces, also in Saxony and Bavaria; silk in Rhenish Prussia, and Baden. Cotton spindles decreased from 12·4 million in 1914 to 9·4 million in 1921; wool spindles decreased from 5 million in 1907 to 4·5 million in 1920; cotton looms in 1920, 240,000. Beetroot sugar is an important manufacture in Prussia, Brunswick, Anhalt, and Bavaria, &c. Production of potash, mainly in the Harz Mountains, 11,390,166 metric tons in 1920. Glass, porcelain, and earthenware in Silesia, Thuringia, Bavaria, and Saxony; clocks and wooden ware in Württemberg and Bavaria; and beer in Bavaria, Prussia, Saxony, Baden, Hamburg, Bremen, &c. In 1919 there were produced in Germany monthly, 140,000 tons of cement, 250,000 tons of chalk, and 0·3 million bricks. In 1920 the average monthly production of paper was 85,000 tons, and of cardboard 18,000 tons.

The following are the statistics of the beetroot sugar manufacture in Germany.

Years beginning 1 September	Number of Factories	Beetroot used in Metric Tons	Production in Metric Tons		No. of Kgs. Beetroot to produce 1 Kg. of Sugar
			Raw Sugar	Molasses	
1918-19	307	8,769,011	1,348,101	194,031	6·47
1919-20	260	4,796,244	710,444	108,246	6·75
1920-21	263	6,553,495	1,079,084	154,895	6·07
1921-22 ¹	263	7,511,887	1,278,606	236,832	5·90

¹ Preliminary figures.

The quantity of beer (in thousands of hectolitres, 1 hectolitre = 22 gallons) brewed in Germany in 1914 was 59,373; in 1915, 45,862; in 1916, 36,835; in 1917, 23,837; in 1918, 24,825; in 1919, 29,310; in 1920, 23,447.

The total number of active breweries in Germany in 1914 was 3,602; in 1915, 2,900; in 1916, 2,418; in 1917, 2,192; in 1918, 1,833; in 1919, 11,602; in 1920, 10,790.

Production of alcohol for four years:—

Year	No. of Distilleries	Gallons	Year	No. of Distilleries	Gallons
1916-17	46,822	44,425,986	1918-19	80,577	29,135,656
1917-18	35,623	51,877,034	1919-20	39,088	13,672,494*

In 1918 (latest figures), 556,840 juvenile workers were employed in

Germany, 376,481 being males and 180,359 females. In addition 8,008 boys and 6,158 girls (total 14,166) under 14 years of age were employed.

Commerce.

The following table shows the volume and value of the special trade (exclusive of gold and silver) for five years:—

Year	Imports		Exports	
	Double cwt.	Million marks	Double cwt.	Million marks
1911.	683,994,288	9705·7	591,495,394	8106·1
1912.	711,025,306	10691·8	656,0·0,553	89 6·8
1913.	728,307,811	10769·7	737,135,321	10097·2
1919.	99 236,984	32645·8 2	120,902,681	9980·5 2
1920.	188,419,463	99077·0 2	198,376,346	69406·2 2
1921-22 ¹ , ²	267,247,962	154919 0 2	218,262,663	140058·3 2

¹ Preliminary figures.

² Paper marks.

³ May 1921 to April 1922.

Principal articles imported into the United Kingdom from, and exported from the United Kingdom to Germany (Board of Trade Returns):—

Staple Imports		1920.	1921	Staple Exports		1920	1921
		£	£			£	£
Hops		920,858	75,279	Cottons		1,265,523	952,364
Glass & manufactures		1,276,289	851,596	Woolens		2,032,219	353,943
Dyes		3,551,428	776,982	Alpaca, &c., yarn		719,673	653,157
Cottons		159,758	117,490	Linseed oil		228,084	126,309
Woolens		429,819	52,412	Iron and steel		67,625	128,695
Clover and grass		194,707	109,910	Fish		1,979,888	1,965,499
Machinery		1,099, 65	1,048,781	Machineery		168,751	317,766
Toys		1,418,873	1,372,275	Coal, coke, &c.		43,655	965,460

Total trade between Germany and the United Kingdom for five years, according to the Board of Trade Returns:—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Germany into U.K.	8,240	998,154	30,251,806	20,513,801	26,524,477
Exports of British produce to Germany	—	14,693,113	21,706,669	17,861,350	32,075,692

The ports of Hamburg and Bremen were the chief gates of commercial intercourse of Germany with the United Kingdom and the United States.

Shipping and Navigation.

On June 30, 1921, the German mercantile marine amounted to 717,450 registered tons (5,135,000 tons in 1914).

The following table shows for 1920 the number and tonnage of vessels entering and clearing German ports.

Flag	Entered				Cleared			
	With Freight		In Ballast		With Freight		In Ballast	
	No.	Tonnage	No.	Tonnage	No.	Tonnage	No.	Tonnage

Internal Communications.

I. RAILWAYS.

In 1915 there were 3,296 miles of tramway, and 7,171 miles 'Kleinbahnen.

On April 1, 1920, all the various German state railways were transferred to the Central Government. The total length of railway line was 57,545 kilometres, or 35,677 miles on December 31, 1920. Of this total 53,013 kilometres, or 32,868 miles are state lines.

II. CANALS AND NAVIGATIONS.

The length of inland waterways in 1922 was 12,220 kilometres, or 7,576 miles. Of this total 5,798 miles are rivers or canalised rivers, and 1,372 miles are canals.

III. POSTS AND TELEGRAPHS.

The postal and telegraphic services are retained in the hands of the Central Government.

Statistics for 1920:—Employees, 287,567; number of post offices, 36,497; number of telegraph offices, 47,485.

The following are the telegraph statistics for the year 1920:—Length of telegraph lines, 138,446 miles; of wire, 1,469,072 miles; number of foreign telegrams, 12,856,000; of inland telegrams, 64,947,000; official service telegrams, 3,425,000. Length of telephone lines, 91,450 miles; of wire, 4,351,332 miles; number of telephone boxes, 1,780,100; of telephone connections, 3,180,300,000.

Banking, Money, and Credit.

Money (in thousands of marks) coined and nominally in circulation on the dates given :—

March 31	Gold	Silver	Nickel	Copper	Total ²
1919	5,155,840·3	1,159,699·2	100,352·9	25,104·3	6,528,740·3
1920	5,155,840·3	1,076,132·5	100,311·1	25,102·7	6,490,134·2
1921	5,155,840·1	—	100,310·6	25,102·6	5,575,981·5
1922 ¹	5,155,840·1	—	100,309·9	25,102·5	5,968,643·5

¹ September 30.

² Including the amounts of iron, zinc, and aluminium coins noted in next table.

The actual currency (in thousands of marks) is composed as follows :—

March 31	Iron	Zinc	Aluminium	Total
1920	68,711·0	48,209·5	15,827·0	132,747·5
1921	76,177·5	72,741·1	145,809·3	294,727·9
1922 ¹	99,912·1	124,171·3	463,307·6	687,391·0

¹ September 30.

The bank notes current in Germany are those of (1) the Imperial Bank (in denominations of 10, 20, 50, 100, 500, 1000, and 10,000 marks); (2) the Badische Bank (100 mark notes only); (3) the Bayerische Notenbank (100 mark notes only); (4) the Sächsische Bank (100 and 500 mark notes); and (5) Württembergische Notenbank (100 mark notes). The notes of the last four banks are termed 'private bank notes.' The notes of all five banks must be accepted at their full face value by each of the banks named. Since January 1, 1910, the notes of the Imperial Bank are legal tender. On May 9, 1921, a law was passed, suspending until December 31, 1923, the provision of the Banking Law, under which one-third of the note circulation of the Imperial Bank had to be covered by specie, Treasury Notes, or Loan-Bank Certificates.

Imperial Treasury Notes in denominations of 50, 20, 10 and 5 marks, which were first issued in 1874, were as a war measure by the law of August 4, 1914, declared legal tender. Their total issue amounts to 360 million marks. By the same law the necessity to change all notes into gold was set aside. Moreover, Loan Banks (*Darlehenskassen*) were established in August, 1914, with the right of issuing notes up to 3,000 million marks. These notes, which are in denominations of 50, 20, 5, 2 and 1 marks, are accepted at all public offices (*erg.*, post, railways, customs, etc.).

• On October 1, 1922, the circulation of paper money has increased to :— Imperial Bank Notes, 316·9 billion marks; private bank notes, 0·8 billion marks; Loan-Bank Notes, 14·0 billion marks; treasury notes, 0·2 billion marks; total, 331·9 billion marks.

Many local paper notes issued by municipalities are also in circulation.

The condition of the Imperial Bank of Germany on February 15, 1923, is shown as follows (in thousands of marks):—

—	Amount Feb. 15, 1923	—	Amount Feb. 15, 1923
Total coin and bullion . . .	1,074,235	Advances	41,433,359
Of which gold	1,004,831	Investments	434,953
Treasury notes and loan bank notes	593,631,738	Other securities	229,896,755
Notes of other banks	33,094	Notes in circulation	2,703,794,637
Bills discounted	1,345,142,785	Deposits	894,741,406
Treasury bills	2,801,048,325	Other liabilities	642,473,559

The original charter of the Imperial Bank expired on December 31, 1920, but the privileges of the bank have been renewed for a further term.

Money, Weights, and Measures.

The *Mark*, of 100 *Pfennig*, is of the normal value of 11 $\frac{3}{4}$ *l.*, or 20.43 marks to the pound sterling. (February, 1923, 100,000 marks to the *l.*). Gold coins are 20- and 10-mark pieces, called respectively *doppel-krone* and *krone*. The 20-mark piece weighs 7.96495 grammes .900 fine, and consequently contains 7.16846 grammes of fine gold. Gold coins have been entirely withdrawn from circulation. Silver coins are 5-, 3-, 2-, and 1-mark pieces and half-mark pieces. Silver coins were, however, put out of currency on April 13, 1920. The mark weighs 5.5 grammes .900 fine, and thus contains 5 grammes of fine silver. Nickel coins are 10 and 5 pfennig pieces. Copper coins are in 2 and 1 pfennig pieces. There are bronze coins of smaller denominations. Iron coins were introduced in 1915—5 pfennig pieces in August, and 10 pfennig pieces in December. Aluminium coins—1 pfennig pieces in 1916, 50 pfennig pieces in 1919, and 3 mark pieces in 1922. Zinc coins—10 pfennig pieces in March, 1917.

The standard of value is gold, but in actuality it is paper (bank notes and treasury notes).

The metric system of weights and measures is in force.

Diplomatic Representatives.

1. OF GERMANY IN GREAT BRITAIN.

Ambassador.—Dr. Friedrich Sthamer. Appointed August 27, 1920.

Counsellor.—Albert Doufour-Féronce.

Secretaries.—Kurt von Kamphoeven, Count Bernstorff, and Carl von Below.

Commercial Attaché.—Dr. Richard Hemmen.

Special Attaché.—Dr. von Friedberg.

Chancellor.—F. W. Achilles.

2. OF GREAT BRITAIN IN GERMANY.

Ambassador.—Lord d'Abernon, G. C. M. G. Appointed June 30, 1920.

Counsellor.—Joseph Addison.

Secretaries.—Sir R. P. S. Head, Bart., R. C. S. Stevenson, and P. M. Broadmead.

Commercial Secretaries.—Lt.-Col. J. W. F. Thelwall, M. C., C. J. Kavanagh, and Harold Norman Sturrock.

British High Commissioner on the Inter-Allied Rhineland High Commission at Coblenz.—Lord Kilmarnock, C.M.G.

There are consular officers at Berlin (C.G.), Cologne (C.G.), Frankfort (C.G.), Hamburg (C.G.), Stettin, Bremen, Bremerhaven, Stuttgart, Aachen, Chemnitz, Hannover, Düsseldorf, Essen, Leipzig and Munich.

STATES OF GERMANY.

Statistics of area, population, births, deaths, marriages, emigration, primary schools, universities, and railways are given collectively for all the German States under the head of *Germany*.

ANHALT.

(FREISTAAT ANHALT.)

The Constitution of the Free State of Anhalt bears date July 18, 1919. The Diet is elected by the people for 3 years, and the Government is in the hands of a State Council composed of 5 members, whose chairman bears the title of President.

Area, 888 square miles. Population, 1919, 331,258. The capital, Dessau, 57,674 inhabitants in 1919; Bernburg, 33,724; Cöthen, 22,898; Zorbst, 19,585; Rossau, 11,540. Population mostly Protestant (1910), 12,755 Catholics, 1,383 Jews.

Estimated income and expenditure, 1921-22, 106,990,000 marks. Public debt, April 1, 1920, 60,823,539 marks; State property, April 1, 1920, 65,026,730 marks.

BADEN.

(REPUBLIK BADEN.)

Until 1771, Baden was a Margraviate divided into two or more lines; it was then united, and subsequently received various additions, and its ruler took the title of Elector in 1803, and of Grand-duke in 1806. On November 22, 1818, the Grand-duke abdicated, and the Provisional Government proclaimed Baden a Republic.

Constitution.—The Constitution of the Republic of Baden was determined by the National Assembly which met on January 5, 1919, and which was elected on the basis of equal, secret, direct, universal suffrage (with proportional representation) of all males and females over 20 years of age. According to this Constitution of March 21, 1919, the Free State of Baden is a Republic and a component state of Germany. All privileges of birth, religion, and caste are abolished. Women enjoy the same rights as men and are eligible for all public offices. There is no State or established church, but religion is taught in all schools. The right of combining is granted to all citizens, including civil servants. The Initiative and Referendum have been adopted, as also proportional representation. The suffrage is granted to all adults, male and female, who are over 20 years of age. There is only one Chamber (Landtag), the members of which are elected for 4 years. Qualified electors over 25 years of age are eligible as members of the Chamber. No fixed number of seats has been provided for, but generally one member is allocated for each 10,000 voters. The present Landtag, elected on October 30, 1921, will continue until October 30, 1925. Its membership numbers 86, distributed as follows—Centre, 34; Majority Socialists, 20; German Democratic Party, 7; Conservatives, 7; other parties, 18.

The Cabinet consists of 5 Ministers and 3 State Councillors (Ministers without portfolio), elected by the legislature. The Landtag also nominates the President of the Cabinet, who is styled officially 'State President.'

The new Government (1922) is made up as follows :—

Minister of Education.—Dr. *Hellpach* (Democrat).

State President and Minister of the Interior.—A. *Remmele* (Socialist).

Minister of Justice.—G. *Trunk* (Centre).

Minister of Social Affairs and Public Works.—W. *Engler* (Socialist).

Minister of Finance.—H. *Köhler* (Centre).

For general administrative purposes there are 53 'Amtsbezirke,' superintended by four general commissioners (Landes-Kommissäre). For local government there are 11 circles (Kreise), and 1,585 communes (Gemeinden), 120 communal cities, and 1,465 parishes.

Area and Population :—

District	Area: Square miles	Population		Pop. per square mile 1919
		1910	1910	
Konstanz . . .	1,610	337,962	325,924	209.9
Freiburg . . .	1,830	557,871	564,580	304.9
Karlsruhe . . .	993	631,681	610,784	636.1
Mannheim . . .	1,386	680,989	641,545	498.5
Total . . .	5,819	2,208,503	2,142,833	379.5

Population in 1919, 1,051,405 males and 1,157,098 females.

Including a part of the Lake of Constance, area is 5,889 square miles.

Principal towns, 1919 :—

Mannheim . . .	229,576	Pforzheim . . .	73,839	Baden . . .	25,444
Karlsruhe . . .	135,952	Heidelberg . . .	69,806	Offenburg . . .	16,246
Freiburg . . .	87,946	Konstanz . . .	30,119	Bruchsal . . .	15,323

Rastatt .	12,222	Lörrach .	14,623	Durlach .	17,529
Lahr .	13,650	Weinheim .	14,537	Villingen .	12,438

For movement of population, see under *Germany*.

Religion and Instruction.—In 1910 there were 1,271,015 Catholics, 826,364 Protestants, 13,229 other Christian sects, 25,896 Jews, and 6,329 others.

All religious denominations enjoy equality and self-government, appointing their own clergy. The Protestant Church is governed by a synod, and its affairs are administered by a board (Oberkirchenrat). The Roman Catholic Church has an Archbishop (at Freiburg), whose 4 suffragans are outside Baden. The Catholic Foundations Council (Oberstiftungsrat) manages the property of the Catholic Church. The Jews, whose ecclesiastical affairs are managed by the 'Oberrat der Israeliten,' have 15 rabbimates.

Instruction is general, free, and compulsory. Schools are under the authority of the State. Religious instruction, however, is provided by each denomination, but there is no compulsion to give or to receive religious instruction. Baden has 2 universities (Heidelberg and Freiburg), 1 technical high school (Karlsruhe), 1 Academy of Arts (Karlsruhe), 1 commercial high school (Mannheim), 17 gymnasia, 52 Real schools, 12 high schools for girls, 13 training colleges for teachers, and a number of technical and special schools.

Finance.—The following table shows revenue and expenditure for six years. The first two entries are actual returns, the last four are estimates (20 marks = £1) :—

	1915	1916	1917	1918	1919	1920
	£	£	£	£	£	£
Revenue . .	4,910,451	6,983,893	5,229,518	6,036,331	13,937,308	88,597,311
Expenditure .	7,174,667	8,193,804	5,472,995	6,746,224	13,839,898	109,311,675

Direct taxes are on property and income; indirect taxes chiefly on wine, beer, and meat, registry, duties on succession, on change of possession.

Production and Industry.—Of the total area, 3,547,257 acres (94 per cent.) is cultivable land. Of this total 1,461,385 acres (41·2 per cent.) are forests, 2,070,490 acres (58·4 per cent.) under cultivation, and 220,440 acres uncultivated land. Wheat, barley, rye and potatoes are grown. Vines in 1921, 33,107 acres, yield 6,354,260 gallons of wine, valued at 300,094,000 marks; beetroot, turnips, hemp, and chicory are also grown. Tobacco area in 1921, 13,655 acres. Mineral produce almost solely salt and building-stone.

Principal manufactures: Tiles, cigars, jewellery, machinery, clocks, musical instruments, chemicals, silk ribbons, cotton tissues, felt and straw hats, paper and cardboard, leather, wood-work, and brushes.

BAVARIA.

(FREISTAAT BAYERN.)

Bavaria was for over a century a kingdom, ruled by descendants of the ancient Counts of Wittelsbach, who flourished in the twelfth century. Duke Maximilian I. of Bavaria was elevated to the rank of Elector of the Holy Roman Empire in the Thirty Years' War; and Elector Maximilian Joseph was raised to the rank of king by Napoleon I. in 1805. On November 22, 1918, the dynasty was deposed, and Bavaria was declared a Republic.

Constitution and Government.—On the outbreak of the Revolution the Government was taken over by a cabinet under the leadership of Kurt Eisner, an Independent Socialist. Eisner was assassinated in February, 1919, and a struggle ensued between the extremists of the Left, who proclaimed themselves Bolsheviks, and their more moderate opponents, with varying success on either side. By May, 1919, the moderate party had returned to power.

The constitution of August 14, 1919, establishes the Free State of Bavaria. The supreme power lies with the people. The Diet consists of one Chamber, elected for 4 years on the basis of 1 member for every 40,000 inhabitants; at present there are 158 members. The present Chamber will continue until June, 1925. The suffrage is universal, equal, direct, secret and proportional. All citizens over 20 years of age have the vote. The supreme executive power is exercised by the Ministry as a whole. All privileges of birth and caste are abolished. The Church is separated from the State. All religious associations have equal rights, and are free in their activities.

State of parties in the Bavarian National Constituent Assembly (elected June, 1920):—Bavarian People's Party, 65; Majority Socialists, 25; German Democrats, 12; Peasants' Union, 12; German People's Party, 19; and Independent Socialists, 20; Communists, 2; members for Coburg, 3.

The Cabinet, constituted on November 5, 1922, is as follows:—

Premier and Minister of Foreign Affairs.—Dr. von Knilling.

Minister of Education.—Dr. Matt.

Minister of Commerce and Industry.—Herr Hamm.

Minister of Social Welfare.—Herr Oswald.

Minister of Agriculture.—Herr Wutzelhofer.

Minister of the Interior.—Dr. Schweyer.

Minister of Finance.—Dr. Krausneck.

Minister of Justice.—Herr Gürtner.

Area and Population :—

Regierungsbezirke	Area, Eng. sq. miles	Population		Pop. per sq. mile 1919
		1910	1919	
Upper Bavaria (Oberbayern) .	6,686	1,511,952	1,582,669	237·0
Lower Bavaria (Niederbayern) .	4,298	724,331	739,967	172·3
Palatinate (Rheinpfalz) .	2,372	937,085	957,321	403·1
Upper Palatinate (Oberpfalz) .	3,862	599,461	611,723	158·5
Upper Franconia (Oberfranken) .	2,798	661,862	656,489	234·9
Middle Franconia (Mittelfranken) .	3,036	931,691	948,175	312·7
Lower Franconia (Unterfranken) .	3,360	710,943	733,971	219·3
Suabia (Schwaben)	3,934	809,966	835,709	212·8
Coburg	216	74,818	74,316	344·1
Total	30,562	6,962,109	7,140,340	233·8

On November 30, 1919, the inhabitants of the Free State of Coburg decided by an overwhelming majority to join the Free State of Bavaria, and on March 11, 1920, the Bavarian Diet unanimously adopted a bill for the Union of the two Republics.

To the area has to be added 257 square miles for water.

Of the total population at the end of 1919, 3,394,274 were males and 3,746,066 females.

The increase of the population since 1900 has been as follows :—

Year	Population	Population per sq. mile	Annual Increase per cent.
1900	6,176,057	210·9	1·22
1905	6,524,372	222·3	1·12
1910	6,887,291	226·9	1·12
1919	7,140,340	242·1	—

Urban and rural population at the censuses^o of 1910 and 1919 :

Census	No. of Towns	No. of Rural Communes	Towns, &c., with 2,000 inhabitants and over			Communes, &c., with less than 2,000 inhabitants		
			No.	Population	Per cent. of pop.	No.	Population	Per cent. of pop.
1910	255	7,729	334	3,079,022	44·7	7,650	3,808,269	55·3
1919	262	7,702	354	3,253,878	46·0	7,614	3,812,146	54·0

In 1919 the urban population was thus distributed :—

—	No.	Population 1919	—	No.	Population 1919
Large towns ¹ .	3	1,137,941	Small towns .	69	549,963
Medium „ .	21	810,340	Country „ .	261	755,634

¹ See under *Germany* for official signification of these terms.

Principal towns, 1919 :—

Towns	1919	Towns	1919
Munich (München) .	630,711	Pirmasens . . .	39,611

Bamberg . . .	49,179	Coburg . . .	23,413
Hof . . .	39,690	Speyer . . .	23,326

Religion.—Religious division of the population, December 1, 1910 :—
Roman Catholics, 4,862,233 ; Protestants, 1,912,262 ; Jews, 55,065.

Besides the above there are included in other Christian sects 5,816 Old Catholics, 3,017 Mennonites, 164 Anglican, 1,611 Greek Catholics and Russian Orthodox, 1,139 Irvingites, 25 Anabaptists, 1,833 Methodists, 5,841 Freethinkers, 1,649 other Christians, 1,368 of religion not Christian, 4,240 of religion not stated, or without religion, 905 of religion not ascertainable.

There are 2 Roman Catholic archbishoprics, those of Munich and Bamberg each with 3 suffragan bishoprics ; 229 deaneries ; and 3,859 parishes. The Protestant Church is under a Superior Church Council (*Oberkirchenrat*)—and for Bavaria to the right of the Rhine three General Deaneries (*General-Deanate*) ; for the Palatinate one General Church Council, having together 84 deaneries, and 1,157 parishes. Of the three universities of the Republic, two, at Munich and Würzburg, are Roman Catholic, and one, at Erlangen, Protestant.

Instruction.—(For Universities, *see* under *Germany*.) Education compulsory from six to sixteen. In 1919-20 there were 6,483 public elementary schools, with 22,104 teachers (14,947 male, 7,157 female), and 1,091,345 pupils. There were 2 agricultural schools, with 323 pupils.

Justice, Crime, and Pauperism.—Bavaria is the only German State which before the revolution had an *Oberstes Landesgericht*, or appeal-court intervening between the *Oberlandesgerichte* and the *Reichsgericht* ; it has a bench of 22 judges. Under it are 5 *Oberlandesgerichte*, 28 *Landgerichte* and 266 *Amtsgerichte*. The number of judges was (1919) 1,390. In 1919, 92,372 criminals were convicted.

Finance.—The ordinary budget for the year 1922 provides for a revenue of 2,396,345,030 marks, and an expenditure of 2,745,473,029 marks, leaving a deficit of 349,127,999 marks. The extraordinary budget balanced at 243,550,000 marks.

Debt, March 31, 1922, 2,736,207,473 marks, of which 2,403,517,088 marks is the share of the Reich, and 332,690,385 marks the share of Bavaria.

Production and Industry.—Of the total area, nearly one-half is under cultivation, one-sixth under grass, and one-third under forests.

The areas under the chief crops, and the yield in 1921, were as follows :—

Wheat, 724,322 acres (yield 500,181 metric tons) ; rye, 1,192,960 acres (710,484 tons) ; oats, 1,119,075 acres (625,623 tons) ; potatoes, 862,350 acres

(2,583,085 tons). Vines, 49,795 acres, yielding 10,750,760 gallons; 24,152 acres under hops yielded 2,565 metric tons.

The census of live-stock on December 1, 1921, showed 380,128 horses, 3,562,926 cattle, 686,213 sheep, 1,884,597 pigs, and 443,769 goats.

In 1920 the output of coal was 2,529,811 metric tons; of iron ore, 451,826 tons; pig iron, 161,797 tons; cast iron wares, 126,000 tons; sulphuric acid, 99,271 tons.

In 1919 there were 388 savings banks, with 2,003,342 depositors having to their credit 1,824,217,750 marks.

BREMEN.

(FREIE HANSESTADT BREMEN.)

Bremen is a Free State, with a Constitution adopted on May 15, 1920. The highest power in the State is exercised by the House of Burgesses (Bürgerschaft), consisting of 120 members, elected on a democratic basis by all citizens of the State. The Bürgerschaft elects the Senate of 14 members as the Executive body. Two Bürgermeister chosen from the members of the Senate preside over the deliberations of that body.

The results of the elections for the House of Burgesses held on February 20, 1921, were:—Majority Socialists, 28; Independent Socialists, 23; Communists, 6; Democrats, 24; German People's Party, 31; German National People's Party, 8.

Area, 99 square miles; population census (1919), 311,266; (July 1, 1922) Bremen, 283,959; Bremerhaven, 22,956.

On Dec. 1, 1910, Bremen contained 257,930 Protestants (87·2 per cent.), 21,074 Roman Catholics (7·1 per cent.), 1,217 other Christians, 1,251 Jews, others 14,243. In Bremen (town) marriages in 1921, 3,538; births, 6,056; deaths, 3,273; excess of births, 2,783.

Bremen contains two Amtsgerichte and a Landgericht, whence appeals lie to the 'Hanseatische Oberlandesgericht' at Hamburg.

In 1920 the revenue was 254,021,736 marks and expenditure 326,185,033 marks. Public debt on April 1, 1919, 365,406,500 marks.

Next to Hamburg, Bremen was the largest port for the international trade of Germany. Seventy per cent. of the commerce was, in 1921, under the German, and about 14 per cent. under the British flag.

Railways, 81 miles, owned and worked by the State.

HAMBURG.

(FREIE UND HANSESTADT HAMBURG.)

Constitution.—The State and Free City of Hamburg is a republic. The Constitution bears date January 7, 1921. According to this, supreme power rests with the Bürgerschaft, or House of Burgesses of 160 members, elected on a democratic basis. The Executive is in the hands of the Senate, composed of 16 members elected by the House of Burgesses.

Area and Population.—Area, 160 English square miles ; population on December 1, 1920, 1,091,074 ; December 1, 1910, 1,014,664. The State consists of two divisions, the population of each of which was as follows on December 1, 1920 :—City of Hamburg, 1,025,502 ; Landgebiet (4 Landherrenschaften), 65,572.

Marriages, 1921, 13,709 ; births, 20,280 (791 or 3·90 per cent. still-births, 2,239 or 11·04 per cent. illegitimate) ; deaths, 13,182.

Religion, Instruction, and Justice.—On December 1, 1910, 930,071 Protestants (91·66 per cent.), 51,036 Roman Catholics (5·03 per cent.), 3,942 other Christians (0·39 per cent.), 19,472 Jews (1·92 per cent.), and 10,143 'all other' (1·00 per cent.).

In the year ending March, 1922, Hamburg (State) had 249 public elementary schools with 4,088 teachers (2,179 male, 1,909 female), and 117,361 pupils ; cost for the year, 240,000,000 marks ; 29 higher State schools with 14,636 pupils and 59 private schools with 18,407 pupils. The University at Hamburg had 3,765 matriculated students (433 women).

The State contains three Amtsgerichte, a Landgericht, and the 'Hanseatische Oberlandesgericht,' or court of appeal for the Hanse Towns and the Republic of Lübeck (Oldenburg). In 1921, 27,846 persons, in the State of Hamburg, were convicted of crime.

Finance.—For 1922 the budget estimated revenue at 1,369,992,800 marks, and expenditure at 1,768,479,974 marks. Expenditure for the debt, 191,881,441 marks in 1922.

Public debt, December 31, 1920, 2,880,238,686 marks, incurred chiefly for public works.

Commerce and Shipping.—Hamburg is the principal seaport in Germany. Leading Steamship Companies :—Hamburg - America line ; Hamburg-South America line ; German Kosmos line ; German-Australia line ; German East Africa line ; Woermann line ; German Levant line. Movement of shipping for 5 years :—

Year	Entered		Cleared	
	No. of Ships	Tonnage	No. of Ships	Tonnage
1913	15,073	14,185,496	16,627	14,440,026
1918	1,471	696,076	1,602	820,757
1919	2,234	1,543,714	2,706	1,450,414
1920	4,808	4,485,833	5,096	4,363,257
1921	8,401	9,421,487	9,872	9,442,798

Railways, 44·8 miles.

HESSE.

(VOLKSSTAAT HESSEN.)

Hesse was proclaimed a Republic early in November, 1918.

Constitution.—The Constitution of the new Republic was adopted on December 20, 1919. The Landtag of 70 members is elected for 3 years. The new Diet, elected November 27, 1921, is composed as follows — Majority Socialists, 24; Independents, 2; Democrats, 5; German People's Party, 10; Centre Catholics, 13; Hessian People's Party, 3; Hessian Peasants' Union, 11; Communists, 2.

The Cabinet, nominated on December 20, 1921, is as follows:—

Premier and Minister of Foreign Affairs.—Herr *Ulrich* (Socialist).

Minister of Finance.—Herr *Henrich* (Democrat).

Minister of the Interior and Minister of Justice.—Herr von *Brentano* (Centre).

For administrative purposes, the Republic is divided into three provinces, eighteen circles (Kreise), and 983 communes (Gemeinden).

Area and Population.

Provinces	Sq. Miles	Population			Pop. per sq. mile, 1919
		1905	1910	1919	
Starkenbourg	1,169	542,996	590,380	598,358	511·8
Upper Hesse (Oberhessen)	1,209	296,755	309,233	322,270	253·9
Rhenish Hesse (Rhein Hessen) . . .	530	369,424	382,438	370,621	699·2
Total	2,908	1,209,175	1,282,051	1,291,249	435·0

There were 616,882 males and 674,367 females in 1919. Increase from 1910 to 1919 was at the rate of 0·08 per cent. per annum.

The largest towns are Mayence or Mainz (including suburbs), with 107,930; Darmstadt, the capital, 82,368; Offenbach, 75,380; Worms, 44,290; Giessen, 33,409 inhabitants, 1919.

Religion and Instruction.—At the census of 1910 there were 843,004 Protestants, 397,549 Catholics, 6,707 of other Christian sects, 24,063 Jews,

and 5,728 unclassified, or of no religion. The Protestant Church is governed by a synod and its affairs are administered by a consistory (Oberkonsistorium). The Roman Catholic Church has a Bishop (at Mainz).

Instruction is compulsory. The elementary schools are maintained by the communes, but with contributions by the State. There are (1922) 972 public elementary schools with 4,391 teachers, and 183,411 pupils. Continuation schools (Fortbildungsschulen); winter, 1921-22, 26,693 pupils. Hesse has 10 gymnasia, 2 progymnasias, 3 realgymnasias, 11 Oberrealschulen, 15 realschulen, 1 Agricultural College (Landwirtschaftsschule), and 20 incomplete realschulen (höhere Bürgerschulen), with 77 teachers, and 15,367 pupils; 7 higher girls' schools with 4,086 pupils; and 43 private schools with 4,624 pupils. The University at Giessen had 1,853 matriculated students (113 women), and the Technical High School at Darmstadt 2,988 students. There are many industrial, technical, agricultural and other special institutes.

Finance.—The ordinary revenue and expenditure were estimated for the year 1921 to balance at 1,408,505,749 marks.

Public debt 498,812,808 marks, 1919, nearly all railway debt.

Production and Industry.—Of the area, 48 per cent. is under cultivation; 31.5 per cent. forests; 5.4 per cent. uncultivated (houses, roads, water, etc.). Arable land occupies 234,229 acres; meadows and pastures, 240,148; vineyards, 36,087; and forests, 604,904 acres; of the latter, 155,208 belong to the State, 223,547 to the communes and other bodies, and 226,149 to private persons.

Areas and yield of chief crops, 1921 :—Rye, 147,527 acres (yield 87,882 tons); summer barley, 88,095 acres (47,999 tons); potatoes, 142,840 acres (346,863 tons); 44,630 acres under vines, yielding 6,321,656 gallons of wine to the value of 336,155,635 marks in 1921.

Domestic animals, December 1, 1921 :—Horses, 57,313; cattle, 273,075; sheep, 77,943; swine, 285,957; goats, 159,302.

The quantity of coal raised in 1920 was 523,101 tons, to the value of 21,419,393 marks; and iron, 822,393 tons, valued at 26,290,367 marks. The principal manufactures are leather, cloth, paper, chemicals, furniture, wagons, railway cars and carriages, machinery, musical instruments, tobacco and cigars, sparkling-wine.

Lippischer Staatsanzeiger.

LÜBECK.

(FREIE UND HANSE-STADT LÜBECK.)

The free city and State of Lübeck is a Republic, the Constitution of which bears date May 23, 1920. Supreme power lies with the people, who elect a House of Burgesses (Bürgerschaft) of 80 members. The latter elects the Senate of 12 members, which is the supreme executive authority.

Area 115 square miles. The city of Lübeck had (1919) 120,568 inhabitants (57,539 males and 63,029 females).

On December 1, 1910, Protestants numbered 111,543, Roman Catholics 3,802, other Christians 276, Jews 623, and 'unclassified' 355. Education is compulsory between the ages of 6 and 14. There are in Lübeck (1921) 20 elementary schools (6 for boys, 6 for girls, 8 for either sex); with 8,574 pupils; for boys 1 gymnasium (716 pupils), 1 real gymnasium (636 boys and 17 girls), 1 higher real school (884 pupils), 1 private real school (603 pupils), and 3 public middle schools (2,244 pupils); for girls there are 2 public high schools (1,200 pupils), 3 public middle schools (2,658 pupils), 1 church school (251 pupils) and 4 foundation schools (463 pupils). There are also 1 teachers' seminary, 1 public technical school for apprentices, 1 architectural school, 1 naval school, 1 school for engineers of steamers, 1 public commercial school, 1 private technical school for women, 1 agricultural school, 1 continuation school for working people and 1 people's high school.

Lübeck contains an Amtsgericht and a Landgericht, whence the appeal lies to the 'Hanseatisches Oberlandesgericht' at Hamburg.

For 1921 the revenue and expenditure balanced at 8,314,058 $\frac{1}{2}$. About one-third of the revenue is derived from public domains, chiefly forests and industrial establishments; and over one-third from direct taxation. The public debt amounted to 9,529,181 $\frac{1}{2}$ in 1921.

MECKLENBURG-SCHWERIN.

(FREISTAAT MECKLENBURG-SCHWERIN.)

In November, 1918, Mecklenburg was proclaimed a Republic. The Constitution, which bears date May 17, 1920, provides for a Landtag consisting of 67 members. The Landtag elected on March 13, 1921, is made up as follows:—Majority Socialists, 28; German National Party, 15; German People's Party, 12; Communists, 3; Village Union, 4; Economic Party, 2; Democrats, 3.

Area, 5,068 sq. miles; population (1919), 657,330 (317,400 males and 339,930 females). For administrative purposes the country is divided into 17 districts in addition to the towns. The chief towns (1919) were Rostock (67,953 inhabitants), Schwerin (45,455 inhabitants), the capital, Wismar (25,201 inhabitants), Güstrow (18,843 inhabitants), and Parchim 11,435 (inhabitants).

In 1910 there were: Protestants, 615,512; Catholics, 21,043; other Christians, 1,288; Jews, 1,413; not stated, 702. The parishes are generally well endowed with landed property.

There were 1,161 elementary schools with 83,447 pupils (1922); Gymnasias, 7 with 1,372 pupils; Realgymnasien, 6 with 1,784 pupils; Oberrealschule, 1 with 440 pupils; Realschulen, 6 with 1,551 pupils; 3 preparatory schools with 123 pupils; higher girls' schools, 16 with 2,367 pupils; as well as a number of special schools. There is a university at Rostock (see *Germany*).

There are 43 Amtsgerichte, 3 Landgerichte, and 1 Oberlandesgericht at Rostock, which is also the supreme court for Mecklenburg-Strelitz.

MECKLENBURG-STRELITZ.

(FREISTAAT MECKLENBURG-STRELITZ.)

In November, 1918, Mecklenburg-Strelitz was proclaimed a Republic. Its Constitution bears date June 11, 1919. The Landtag consists of 35 members elected for 3 years.

The country is divided into two provinces: Stargard (area 983 square miles, population 93,867), and Ratzeburg, (area 148 square miles, population 14,692). Total area, 1,131 square miles; population (1919), 108,559 (53,251 males and 55,308 females). The capital, Neu-Strelitz, had 11,461 inhabitants in 1919. With the exception of 4,255 Catholics, 254 Jews, and 352 persons of other confessions (1910), the people are Protestants.

Revenue for 1922, 203,631,425 marks, expenditure 203,631,425 marks. Debt, July 1, 1919, 2,651,200 marks.

PRUSSIA.

(FREISTAAT PREUSSEN.)

On November 13, 1918, Prussia was proclaimed a Republic.

Until that date the country was ruled by sovereigns of the Hohenzollern family, the last of the line being William II (1888–1918). For an account of the rise of Prussia, see *THE STATESMAN'S YEAR BOOK* for 1922, p. 973.

Constitution and Government.

The Constitution, adopted on November 30, 1920, gives a vote to every citizen, male and female, over 20 years of age in general, equal, secret, and direct suffrage. Prussia is declared to be a Republic. Besides the Diet (*Landtag*) there is a State Council (*Staatsrat*) elected by the Provincial Assemblies on the basis of one representative for every 50,000 inhabitants. The function of the State Council is to advise and control the Diet, and is intended to be a kind of parallel institution to the Reichsrath in the Empire. The State Council has the right of rejecting legislation adopted by the Diet. The Diet elects the Premier, and he appoints the other members of the Cabinet. The Diet is elected for 4 years on the principle of proportional representation by secret and direct ballot, and the ministry is invested with the powers of the former King.

The Prussian Constituent National Assembly, elected by universal, equal, and secret suffrage of men and women, met on March 14, 1919.

On February 20, 1921, the elections were held for a Parliament, and resulted in the return of the following parties :—114 Majority Socialists ; 81 Centre (Catholics) ; 26 Democrats ; 75 German National Party ; 28 Independent Socialists ; 58 German People's Party ; 11 Guelphs ; 31 Communists, and 4 Economic Party ; total, 428.

The State Council, composed of 79 members, is made up as follows (January, 1923):—German People's Party and German National Party, 26; Centre, 20; Democrats, 4; Social Democrats, 21; Communists, 3; Independent Socialists, 5.

The Cabinet appointed on November 6, 1921, is composed as follows:—

Prime Minister.—Otto Braun (Socialist).

Minister of National Welfare.—Herr *Hirtsiefer* (Centre).

Minister of Justice.—Herr *Zehnhoff* (Centre).

Minister of Commerce.—Herr *Siering* (Socialist).

Minister of the Interior.—Herr *Severing* (Socialist).

Minister of Agriculture.—Dr. *Wendorff* (Democrat).

Minister of Finance.—Herr *Richter* (German People's Party).

Minister of Education and Public Worship.—Dr. *Boelitz* (German People's Party).

For local government Prussia is divided into Provinces, Government districts (*Regierungsbezirke*), urban circles (*Stadtkreise*), and rural circles (*Landkreise*). According to the Constitution, there are 14 Provinces. Urban circles consist of towns of over 25,000 inhabitants; rural circles consist of the smaller towns, rural communes (*Landgemeinden*), and manors (*Gutsbezirke*). For provinces and rural circles the local authorities of the constituent areas elect deliberative assemblies which appoint executive committees. Each province has a governor (*Oberpräsident*); each government district has a president, and deals chiefly with local affairs of State concern. In towns the deliberative authority is the town council (*Stadtverordnetenversammlung*), elected on the system of proportional suffrage. The executive is a magistracy with the burgomaster as president. Each rural circle has a *Landrat*. Local administrative business varies according to the nature of the administrative division. The matters dealt with are such as poor-relief, roads, light railways, &c., but in rural districts they include agricultural interests, and in towns, education, sick-insurance, valuation, collection of certain taxes, management of gas, water, and electric works, etc.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Provinces	Area : Square Miles (Oct. 1, 1920)	Population		Pop. per Square Mile, 1919

¹ Exclusive of territory ceded to Poland.

² Exclusive of the Saar district, and Eupen and Malmedy.

As a result of the Treaty of Versailles, Prussia has lost territory to the extent of 21,626 square miles and a population of 4,597,567.

Development of Prussia since 1875 :—

Year	Area in Sq. Miles	Population	Average per Sq. Mile	Percentage of Annual Increase
1875	134,179	25,742,404	191·8	—
1890	134,537	29,957,367	222·7	1·09
1900	134,622	34,472,509	256·1	1·51
1905	135,134	37,293,264	275·9	1·64
1910	135,134	40,165,219 ¹	297·0	1·54
1919	113,149	36,094,944	319·0	—1·15

¹ Including the whole of Prussia as it then was.

II. MOVEMENT OF THE POPULATION.

Year	Marriages	Total Births	Still-born	Illegitimate	Total Deaths incl. Still-born	Surplus of Births
1916	176,872	697,658	28,107	71,028	822,678	—125,020
1917	198,573	623,201	21,635	66,046	879,148	—255,947
1918	229,851	630,524	18,667	76,617	1,056,446	—425,922
1919	527,172	827,335	19,619	85,336	649,319	+177,986
1920	546,307	1,005,525	33,060	108,873	614,259	+391,266

In 1923, 3·09 per cent. of the total births in rural districts and 3·52 per cent. in urban areas were still-born, and 9·33 per cent. in rural districts and 12·56 per cent. in urban areas were illegitimate.

Principal towns with population in 1919 :—

Berlin	3,803,770	Hannover	392,805	Kiel	205,330
Cologne	633,904	Dortmund	295,026	Halle	182,326
Breslau	528,260	Magdeburg	285,856	Altona	168,729
Essen	439,257	Königsberg	260,895	Gelsenkirchen	168,557
Frankfort (Main)	433,002	Duisburg	244,302	Cassel	162,391
Düsseldorf	407,338	Stettin	232,726	Elberfeld	157,218

• Religion.

Absolute religious liberty is guaranteed in the Republic. Nearly two-thirds of the population are Protestants, and rather over one-third Roman Catholics. Catholics are in a majority only in Upper Silesia, Westphalia, Rhine Province, and Hohenzollern.

The Evangelical or Protestant Church has since October 31, 1817, consisted of a fusion of the Lutheran and Calvinistic bodies, from which, however, there are still a few dissenters. It is governed by 'consistories,' or boards elected by the people. There are also synods in most circles and provinces, and general synods representing the *old* provinces only. The constitution of the Catholic Church differs in the various provinces. Altogether in Prussia there are two archbishops and ten bishops.

Instruction.

Education in Prussia is compulsory. Every town, or community in town or country, must maintain a school supported by local rates, supplemented by the State, and administered by the local authorities, who are elected by the citizens, and called aldermen or town councillors.

The Universities, the high schools (exclusive of commercial high schools), some of the Gymnasias, Realgymnasias, and similar schools, as also the normal schools, are maintained and administered by the Government, while all the other scholastic institutions are supported by the community, &c., under control of the Government.

Finance.

Revenue and expenditure for years ending March 31 :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Marks	Marks		Marks	Marks
1917-18	13,562,656,534	13,148,547,888	1920-21 ¹	8,534,245,264	8,534,245,264
1918-19	20,611,306,902	22,265,393,152	1921-22 ¹	16,776,716,736	16,776,716,736
1919-20 ¹	8,939,024,266	8,939,024,266	1922-23 ¹	29,131,289,882	29,131,289,882

¹ Estimates.

Public debt on April 1, 1922, 14,021,214,424 marks.

Production and Industry.**I. AGRICULTURE.**

The areas under the chief crops for 2 years, and the yield in metric tons, for 3 years, were as follows (1 hectare = 2.47 acres; 1 metric ton = 2,204 lb.) :—

—	1919 ¹		1920		1921	
	Acres	Tons	Acres	Tons	Acres	Tons
Wheat	1,760,386	1,231,668	1,806,015	1,303,034	1,938,489	1,691,810
Rye	7,965,296	4,472,035	7,801,601	3,526,659	7,654,864	4,948,564
Summer barley	1,587,565	1,043,008	1,468,624	955,349	1,343,848	978,891
Oats	4,746,443	2,983,196	5,233,145	3,298,030	5,065,456	3,310,792
Potatoes	3,637,406	14,886,800	4,047,901	19,404,304	4,388,318	18,513,666
Hay (meadow)	6,312,070	8,768,271	7,032,144	11,132,927	6,964,385	7,803,100

¹ Excluding the ceded territories.

In 1921 there were vineyards on 40,811 acres, yielding 10,920,558 gallons of wine, valued at 853,900,000 marks; hops (1921) on 193 acres, yielding 6,260 tons. On December 1, 1921, Prussia (excluding the ceded territories) contained live-stock comprising 2,557,918 horses (excluding army horses), 9,269,407 cattle, 3,867,860 sheep, 10,498,279 swine, and 2,576,091 goats.

II. MINERALS.

Quantities (in metric tons) and values (in marks) of the coal and iron ore raised in 2 years :—

—	1919		1920	
	Tons	Marks	Tons	Marks
Coal	112,028,796	5,718,045,359	127,036,799	19,904,111,851
Lignite	75,953,982	740,602,723	91,969,783	2,665,898,969
Iron ore	4,625,906	201,168,927	4,530,978	732,844,434
Salt	780,923	25,033,260	1,476,228	148,214,487

In 1921 the production of coal was 131,363,776 tons; and of lignite, 101,258,601 tons.

In 1920 the numbers employed in and about mines in Prussia were: Underground workers, 533,092; surface workers, 361,134; total (all workers), 894,226.

Internal Communications.—On April 1, 1920, the total length of the State railway system open for traffic was 21,408 miles. Plans for the electrification of main railway lines were being steadily pushed on before the war. Total receipts on the railways in 1919, 5,692·4 million marks; total expenditure, 8,780·1 million marks; deficit, 3087·7 million marks; capital sunk, 15,126,724 million marks. There were also on the same date light railways and tramways to the extent of 828 miles.

Savings Banks.—In 1920 there were 1,572 savings banks in Prussia. The deposits amounted to 29,552 million marks.

SAXONY.

(FREISTAAT SACHSEN.)

The former Kingdom of Saxony was proclaimed a Republic on November 9, 1918.

The former royal house of Saxony counted amongst the oldest reigning families in Europe. Heinrich of Eilenburg, of the family of Wettin, was Margrave of Meissen 1089-1108; he was succeeded by his son, Heinrich (1108-1123), and Konrad the Great (1123-1156), well known in Saxon history. The house subsequently spread into numerous branches, the elder of which, called the Ernestine line, is represented by the former ducal families of Saxe-Altenburg, Saxe-Coburg-Gotha, and Saxe-Meiningen, and the grand-ducal family of Saxe-Weimar; while the younger, the Albertine line, lived in the rulers of the Kingdom of Saxony. In 1806 the Elector Friedrich August III. (1763-1827), on entering the Confederation of the Rhine, took from Napoleon the title of King of Saxony, which was confirmed by the Congress of Vienna in 1815.

CONSTITUTION, ETC.—AREA AND POPULATION 1009

Constitution and Government.—The Constitution of the Republic bears date October 26, 1920. The Diet was elected in November, 1922, and is composed of 41 Socialists, 8 Democrats, 19 German National Party, 18 members of the German People's Party and 10 Communists.

The Ministry elected on December 11, 1920, is composed as follows :—

Premier.—Herr Johann Wilhelm Buck (Majority Socialist). Born November 12, 1869.

Minister of National Economy.—Herr Fellisch (Majority Socialist).

Minister of the Interior.—Herr Lipinski (Independent Socialist).

Minister of Education.—Herr Flußner (Independent Socialist).

Minister of Labour.—Herr Jäckel (Independent Socialist).

Minister of Finance.—Herr Heldt (Majority Socialist).

Minister of Justice.—Dr. Zeigner (Majority Socialist).

Area and Population :—

Governmental Divisions	Area, Eng- lish Sq. Miles	Population.		Population per Sq. Mile 1919
		Dec. 1910	Oct. 1919	
Dresden . . .	1,674	1,350,287	1,326,262	794·6
Leipzig . . .	1,377	1,234,623	1,223,748	888·7
Bautzen. . . .	953	443,549	433,011	454·3
Chemnitz . . .	800	920,543	890,731	1113·3
Zwickau . . .	983	857,659	796,559	810·3
Total . . .	5,787	4,806,661	4,670,311	807·0

Of the population, according to the census of October 8, 1919, 2,175,078 were males and 2,495,233 females.

The growth of the population is shown in the following table :—

Year	Population	Density per Sq. Mile	Annual Increase per Cent.	Year	Population	Density per Sq. Mile	Annual Increase per Cent.
1885	3,182,003	543	1·41	1905	4,508,601	779·1	1·46
1895	3,777,688	654·5	1·63	1910	4,806,661	830·6	1·32
1900	4,202,216	726·8	2·19	1919	4,663,298	805·2	—

Saxony contains (1910) 43,358 Lusatian Wends, most of them in the district of Bautzen.

The movement of the population is shown in the following table :—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus (+) or Decrease (—) of Births
1919	59,020	86,472	2,855	10,619	68,570	+15,047
1920	71,545	123,038	4,313	17,325	64,017	+54,708
1921 ¹	57,759	115,908	4,003	10,520	60,813	+51,592

¹ Preliminary results.

The population of the principal towns was, 1919 (including the municipalities incorporated up to September 1, 1922):—

Leipzig	636,503	Meissen	37,493	Reichenbach	26,881
Dresden	587,758	Zittau	35,954	Crimmitschau	25,496
Chemnitz	305,172	Bautzen	34,993	Glauchau	22,971
Plauen	104,926	Freiburg	32,981	Meerane	21,927
Zwickau	70,785	Freital	27,570		

Religion.—The vast majority of the inhabitants of Saxony are Protestants. In 1910, there were Lutherans, 4,501,510; Roman Catholics, 233,872; Reformists, 16,531; other Christians, 36,750; Jews, 17,587; unclassified, 411. Of the Lutheran Church, the chief governing body is the 'Landes-Consistorium' or National Consistory at Dresden; and it also has a representative Synod (*Synode*) with 35 clerical and 42 lay members (1901).

Instruction.—On December 31, 1919, there were 2,233 common schools, and 1,950 continuation schools (*Fortbildungsschulen*), or altogether 4,183, with a total attendance of 857,610, besides 50 private and chapter schools. In addition there were 1 technical high school at Dresden (winter term, 1922, 2,451 students), 1 mining academy at Freiberg (1920–21, 447 students), 1 forestry academy at Tharandt (91 students, summer term, 1919), further, 19 Gymnasias, 21 Realgymnasias, 9 'Oberrealschulen,' 36 other high schools, 25 seminaries, 11 higher girls' schools and 'Studienanstalten' (1919), altogether 124 educational establishments, exclusive of the University and a large number of industrial, commercial, agricultural, musical, and art institutes. The University of Leipzig is one of the largest in Germany. *See under Germany.*

Justice and Crime.—Saxony has one 'Oberlandesgericht,' at Dresden, 7 'Landgerichte,' and 112 'Amtsgerichte.' The 'Reichsgericht' has its seat at Leipzig.

Finance.—The following table shows the estimates for five financial budget periods (£1 = 20·43 marks).

—	1918-19 ¹	1920 ²	1920-21 ³	1921-22 ³	1922-23 ³
	£	£	£	£	£
Revenue	44,337,540	17,502,820	58,951,937	127,141,283	156,137,850
Expenditure	44,337,540	17,502,820	58,951,937	127,141,283	156,137,850
Extraordinary budget	18,322,067	43,198	13,591,532	36,602,056	31,426,117

¹ Biennial periods.

² January to March only.

³ Year ending March 31.

Public debt, 1919, 859,881,200 marks, incurred almost entirely on railways and telegraphs, and other works of public utility.

Production and Industry.—Saxony is, in proportion to its size, the busiest industrial State in the Empire, rivalled only by the leading industrial provinces of Prussia. Textile manufactures form the leading branch of industry, but mining and metal working are also important.

In 1921, of the total area, 2,331,012 acres were under cultivation, viz. :—1,846,540 acres (79·04 per cent.) arable; 457,631 acres (19·63 per cent.) meadow; 30,473 acres (1·31 per cent.) pasture and the rest vineyards.

Areas under the chief crops in acres and the yield in metric tons (of 2,204 lb.) in 1921 :—wheat, 170,652 acres (185,591 tons); rye, 431,021 acres (358,440 tons); barley, 72,023 acres (64,399 tons); oats, 375,169 acres (333,940 tons); potatoes, 262,487 acres (1,314,917 tons). The census of live-stock taken in December, 1921, showed 165,303 horses, 721,836 cattle, and 562,760 pigs.

The following shows the mining statistics for five years :—

Year	Coal Mines					Other Mines			Total		
	No. of Mines	Hands	Production in metric tons		Value in 1,000 marks	No. of Mines	Hands	Produce in 1,000 marks	No. of Mines	Hands	Produce in 1,000 marks
			Coal	Lignite							
1916	88	23,648	4,180,538	6,534,079	87,860	25	819	4,234	113	21,467	92,094
1917	86	29,477	4,794,519	6,330,057	125,676	34	1,169	6,222	120	80,646	131,898
1918	82	32,148	4,625,218	6,741,233	163,689	39	1,680	8,899	121	33,828	172,518
1919	81	42,627	3,932,304	6,712,010	321,169	36	1,577	9,151	117	44,204	330,320
1920	84	49,662	4,050,722	7,654,851	1,083,870	31	1,132	18,905	115	50,794	1,102,775

¹ Exclusive of mines not worked.

In 1920–21, 225 breweries produced 28,987,960 gallons of beer.

In 1919 there were 369 savings banks having to the credit of their depositors at the end of the year, 154,684,590*l*.

SCHAUMBURG-LIPPE.

(FREISTAAT SCHAUMBURG-LIPPE.)

Schaumburg-Lippe was proclaimed a Republic in November, 1918. The Constitution bears date February 24, 1922. The Landtag consists of 15 members.

Area, 131 sq. miles; population (1919), 46,357 (22,148 males and 24,209 females).

For the financial year 1922 the revenue and expenditure were 35,610,687 marks. Public debt, 8,000,000 marks.

Except 715 Catholics and 230 Jews, the inhabitants are Protestant. Bückeburg, the capital, had, in 1910, 5,747 inhabitants.

OFFICIAL PUBLICATION.

Schaumburg-Lippische Landesanzeigen bezw. Landesverordnungen.

THURINGIA.

(EINHEITSSTAAT THÜRINGEN.)

The seven Thuringian States after much negotiation, which commenced in May, 1919, and ended on December 24, 1919, decided to combine into one State. The two Republics of Reuss had by a law of April 4, 1919, already been merged into the one People's State of Reuss, and Coburg had elected to merge with Bavaria.

The elections to the first Diet of Thuringia were held in June, 1920, and the Diet adopted the Constitution on March 11, 1921.

President of the State Council.—Dr. A. Paulsen (Democrat).

Area and Population.—The following table shows the area and population of the separate political entities which have been united into the greater whole :—

District	Area in sq. miles	Population Census October 8, 1919			Population per sq. mile 1919
		Males	Females	Total	
Weimar	1,897	205,356	228,608	433,959	198
Meiningen	953	126,944	143,071	270,015	200
Gera-Greiz	441	98,431	114,512	212,943	480
Altenburg	511	101,360	110,278	211,638	414
Gotha	548	92,190	99,301	191,491	791
Schwarzburg-Rudolstadt	363	46,993	52,340	99,333	273
Schwarzburg-Sonderhausen	333	44,465	48,962	93,427	280
Total	4,546	715,739	797,067	1,512,806	332

Principal towns with population in 1919 :—Weimar, the capital, 41,403 ; Gera, 74,993 ; Gotha, 48,543 ; Jena, 53,906 ; Eisenach, 41,375 ; Greiz, 34,120 ; Arnstadt, 20,573 ; Rudolstadt, 12,172 ; and Sonderhausen 13,322.

In 1920 there were 43,184 births (22,499 boys), 22,511 deaths (11,107 males), and 24,932 marriages.

Religion and Instruction.—In 1910 there were 1,456,074 (96 per cent.) Protestants ; 42,831 (2 per cent.) Catholics ; and 3,822 (0·3 per cent.) Jews.

On March 1, 1922, there were in Thuringia 1561 elementary schools with 5,180 teachers (561 females) and 242,002 pupils ; 48 high schools for boys with 927 teachers and 12,343 pupils, and 13 high schools for girls with 317 teachers and 4,769 pupils ; 1231 continuation schools with 224 teachers and 56,368 (14,608 girls) pupils. For the University of Jena, see under GERMAN UNIVERSITIES.

Finance.—The budget for the year 1921 provided for a revenue of 680,176,407 marks, and an expenditure of 889,474,225 marks.

Production and Industry.—Of the total area 1,447,947 acres (49 per cent.) are arable land, 982,007 acres (33 per cent.) forest, and 279,090 acres (9 per cent.) pasture land. In 1921 there were 145,540 acres under wheat, producing 108,635 tons, 184,475 acres under rye, producing 110,168 tons,

195,517 acres under oats, producing 118,703 tons, and 157,262 acres under potatoes, producing 523,209 tons.

On December 31, 1921, Thuringia had 75,885 horses, 402,807 head of cattle, 446,741 pigs, and 181,065 goats.

In 1921 there were 22 salt mines producing 1,688,173 tons of salt, and 18 works producing 1,620,721 tons of potash.

On December 31, 1919, the savings banks had 1,182,040 depositors who had to their credit 1,047,495,700 marks.

WALDECK.

(FREISTAAT WALDECK.)

Waldeck was proclaimed a Republic in November, 1918. The provisional Constitution bears date April 15, 1919. The Diet consists of 17 members. The Republic is governed by Prussia, in accordance with the arrangement of July 18, 1867.

The revenue and expenditure for 1922 was 2,142,166 marks.

The debt on July 1, 1921, was 1,016,100 marks.

Area, 433 sq. miles; population (census of October 8, 1919), 66,432 (31,065 males and 35,367 females). Protestants (1910), 57,817; Catholics, 2,858; other Christians, 393; Jews, 590; unclassified, 49. Arolsen, the capital, had 2,442 inhabitants in 1919.

WÜRTTEMBERG.

(VOLKSSTAAT WÜRTTEMBERG.)

Württemberg was proclaimed a People's Republic in November, 1918.

State President and Minister of Education.—Dr. Johannes Hieber. (Born June 25, 1862. Elected June 23, 1920.)

Constitution and Government.—The constitution of the Republic of Württemberg bears date September 25, 1919. The supreme power in the State is vested in the Landtag composed of 101 members elected by universal suffrage for 4 years, on the basis of 1 member for every 20,000 inhabitants. The Landtag appoints the State Ministry, the President of which is styled 'State President.'

The Diet which was elected on June 6, 1920, is composed as follows:—Württemberg National Party, 28; Centre, 23; Social Democrats, 17; German Democratic Party, 15; Independent Socialists, 8; Communists, 6; German Popular Party, 4.

For administrative purposes the country is divided into 4 circles (*Kreise*), 64 districts (*Oberämter*), and 1,890 communes (*Gemeinden*).

Area and Population:—

Circles	Area in Sq. Miles	Population		Population per Sq. Mile 1919
		1910	1919	
Neckar	1,286	882,569	930,114	723·2
Black Forest (Schwarz- wald)	1,844	570,820	583,524	316·2
Jagst	1,985	414,969	421,391	212·3
Danube (Donau)	2,419	569,216	591,142	244·3
Total	7,534	2,437,574	2,526,171	335·3

In 1919, there were 1,202,542 males and 1,323,629 females.

In 1919, 936,583, or 37·1 per cent., lived in communes of 5,000 inhabitants and upwards, and 1,589,583, or 62·9 per cent., in other communes. Foreigners, 25,818 in 1910.

The movement of the population for four years was:—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1918	11,150	38,128	1,119	4,670	46,223	—8,095
1919	31,984	51,145	1,306	5,613	36,807	14,338
1920	32,027	65,006	1,737	6,429	37,202	27,804
1921	24,785	60,914	1,717	—	36,585	24,329

The population in 1919 of the largest towns was as follows:—

Stuttgart ¹	323,572	Göppingen	21,629	Feuerbach	16,729
Ulm	59,040	Tübingen	20,481	Tuttlingen	15,719
Heilbronn	44,015	Gmünd	20,294	Zuffenhausen	14,480
Esslingen	37,814	Heidenheim	18,412	Geislingen	13,521
Reutlingen ¹	28,897	Schwenningen	17,175	Aalen	11,982
Ludwigsburg ¹	23,306	Ravensburg	16,779	Ebingen	11,168

¹ Including extensions.

Religion.—The various creeds were distributed as follows at the census of 1910:—

Kreise	Protestant	Roman Catholic	Other Christians	Jews	Others
Neckar	762,178	105,617	7,404	6,276	1,094
Black Forest	418,409	147,507	3,381	1,359	164
Jagst	275,976	135,475	1,048	2,412	58
Danube	214,620	351,396	1,030	1,935	235
Total	1,671,183	739,995	12,863	11,982	1,551

The administration of the Evangelical Church is in the hands of a consistorium of a president, and councillors, and four general superintendents, at Ludwigsburg, Heilbronn, Reutlingen, and Ulm. The representative body of the Evangelical ecclesiastical communes is the Evangelical Landeskirchenversammlung consisting of 26 clerical and 55 lay representatives of the dioceses and 1 of the evangelical theological faculty of the university. It meets at least every six years, oftener if necessary. The Roman Catholics are under a bishop, who has his see at Rottenburg, and is suffragan to the archbishop of Freiburg in Baden. The Jews likewise are under a special council (Oberkirchenbehörde).

Instruction.—Education is compulsory, and there must be one public school or more in every commune. According to official returns, there is not an individual above the age of ten unable to read and write. In 1918 there were 2,232 places with elementary schools with 6,776 teachers, attended by 382,284 pupils; in 1921 there were 110 Realschulen with 19,885 pupils; 21 grammar schools (Elementarschulen) with 4,234 pupils; 17 gymnasia, of which 4 are training colleges for the Protestant clergy, 13 Realgymnasias, 5 Progymnasias and 6 Real Progymnasias, 41 Latin schools, having together 10,424 scholars; 6 city schools with 5,018 scholars. For girls there are 24 high schools with 9,892 pupils and 1 gymnasium with 196 pupils. There are, besides, the Technical High School at Stuttgart, the Agricultural High School at Hohenheim, and several agricultural and other special institutes. The State funds appropriated to education amounted in 1920 to 188,249,645 marks. For Tübingen University, *see* under *Germany*.

Justice.—In addition to other tribunals there is one Oberlandesgericht at Stuttgart.

Finance.—The estimated revenue for the year ending March 31, 1923, was 1,598,000,000 marks, and the expenditure 2,369,875,000 marks. Public debt (March 31, 1922), 821,175,000 marks, divided into the general debt and the railway debt.

Production.—Württemberg is primarily an agricultural State, and 3,007,510 acres, or 64 per cent. of the entire area, are under cultivation, and 1,510,727 acres, or 31 per cent., under forest.

Areas under the principal crops and yield in metric tons in 1921 :—

—	Acres	Yield, tons	—	Acres	Yield, tons
Wheat . . .	200,875	139,202	Oats . . .	259,857	139,858
Rye . . .	73,495	42,690	Potatoes . . .	187,695	724,516
Barley . . .	220,715	186,32	Hay . . .	1,312,940	2,247,120
Spelt. . .	482,550	93,056	Hops. . .	3,007	500

Vines in 1921, 27,037 acres, yielded 4,256,560 gallons of wine. In 1920 there were produced 18,981,622 gallons of beer. The total value of the minerals raised in 1920 was about 1,200,000 $\frac{1}{2}$. There are active iron foundries and salt works.

Books of Reference concerning Württemberg.

GREECE

(KINGDOM OF HELLAS.)

Reigning King.

Georgios II born July 19, 1890, married February 27, 1921, to *Elizabeth*, elder daughter of King Ferdinand and Queen Marie of Rumania, succeeded on September 27, 1922, on the abdication of his father, Konstantinos (died January 11, 1923).

Brothers and Sisters of the King.

I. *Alexandros*, born August 1, 1893, King of Greece from his father's abandonment of the throne, June 11, 1917, till his death on October 25, 1920. II. Princess *Helene*, born May 2, 1896; married on March 10, 1921, to Prince Carol, Crown Prince of Rumania. III. Prince *Paulos*, born December 14, 1901. IV. Princess *Irene*, born February 14, 1904. V. Princess *Catherine*, born May 4, 1913.

Greece, a province of the Turkish Empire since the latter part of the 15th century, gained its independence in the insurrection of 1821-29, and by the Protocol of London, of February 3, 1830, was declared a kingdom, under the guarantee of Great Britain, France, and Russia. The crown was accepted by Prince Otto of Bavaria, who ascended the throne January 25, 1833, being under the age of eighteen. He was expelled the Kingdom, after a reign of 29 years, in October, 1862, which event was followed by the election, in 1863, under the directing guidance of the three guaranteeing Powers, of King George I., the grandfather of the present sovereign. George I., who was assassinated on March 18, 1913, was succeeded by his son Constantine, who reigned until June 11, 1917. Alexandros, second son of King Constantine, then reigned till his death on October 25, 1920. Constantine then returned to Greece on December 19, 1920, reigned until September 27, 1922, and died in exile on January 11, 1923.

The King, according to Art. 49 of the Constitution of 1864, attains his majority upon completing his eighteenth year. Within two months at the most the King must convoke the Legislature. If the successor to the throne is either a minor or absent at the time of the King's decease, and no Regent has been appointed, the Legislative Chamber has to assemble of its own accord within ten days after the occurrence of that event. The constitutional royal authority in this case has to be exercised by the ministerial council, until the choice of a Regent, or the arrival of the successor to the throne. The sovereign and his heirs and successors must be members of the Greek Orthodox Church.

Constitution and Government.

The Constitution of Greece, adopted October 29, 1864, vested the whole legislative power in a single chamber, called the *Bulé*, consisting of 184 representatives, elected by manhood suffrage (in the proportion of 1 for every 16,000 inhabitants) for the term of four years. In 1911 the Constitution was modified and a substitute for a second chamber was adopted in the re-establishment of the Council of State. The functions of the Council will be the examination of *Projets de Loi* and the annulling of official decisions and acts which may be contrary to law. The new Constitution came in force on June 1, 1911. The deputies must be at least 25 years of age. The elections take place by ballot. The *Bulé* must meet annually for not less than three months. No sitting is valid unless at least one-third of the members of the Assembly are present, and no bill can pass into law without an absolute majority of members attending. Every measure before being adopted, must be discussed and voted, once in principle and twice article by article, on three separate days. A revision of any non-fundamental provisions of the new Constitution may be demanded, after the lapse of ten years, by an ordinary Parliament by means of two votes passed by a two-thirds majority, provided that the second vote shall not be taken until at least one month after the first, and provided also that such revision shall be carried out by a newly-elected Chamber. The Chamber of Deputies, unless specially convoked at an earlier date, must meet on October 1 (old style) of every year. The deputies are paid 4,000 drachmai a year, except those living in Athens or in Piræus, who receive only 3,200 drachmai. In case of absence extending over more than five sittings every month, the deputy has 20 drachmai per sitting taken from the total amount due to him. The number of Deputies, including those for the new territories, is 369.

The Chamber, elected November 1, 1920, is composed of the following parties:—Gounaris Party, 182; Stratos' Party, 31; Liberals (Venizelists), 89; Independents, 52; Independent Mussulmans 15.

The Ministry, appointed on November 26, 1922, is composed as follows:—*Premier*.—Colonel *Gonatas*.

Minister for Foreign Affairs.—M. *Apostolos Alexandris*.

Minister of War.—General *Pierrakos Mavromichalis*.

Minister of Justice.—M. *Misios*.

Minister of the Interior.—M. *Papandreou*.

Minister of Communications.—Colonel *Sakellaropoulos*.

Minister of Education.—M. *Stotis*.

Minister (ad interim) of Finance and of Supplies.—M. *Kofinas*.

Minister of Marine.—Rear-Admiral *Voulgaris*.

Minister of Public Assistance.—M. *Doxiades*.

Minister of Agriculture.—M. *Sidcris*.

Minister of National Economy.—M. *Hadjikyriakos*.

Minister of Food.—M. *J. Embiricos*.

Area and Population.

Old Greece (before 1912) comprises continental Greece, the Peloponnesus to the south of the Gulf of Corinth, the Aegean Island of Eubœa, the Cyclades (about 220 islands, including Syra, Naxos, Andros, Tenos, Mikonos, Thermia, Seriphos, Paros, and Amorgos), the Sporades Islands (about 20), and the islands in the Ionian Sea, including Corfu, Zante, Santa Maura, and Cephalonia.

New Greece consists of Macedonia, Epirus, Crete, and the other Aegean Islands,

At the census of 1879 Greece had a population (including that of Thessaly in 1881) of 1,679,470 ; in 1889, 2,187,208 ; in 1896, 2,433,806 ; on October 27, 1907, 2,631,952. In 1896 the population consisted of 1,266,816 males and 1,166,990 females ; in 1907, 1,324,942 males and 1,307,010 females.

The acquisition of new territories by Greece, obtained as the result of the war with Turkey from October 17, 1912, to May 30, 1913, and with Bulgaria from June 30, to August 10, 1913, gave the country a total area of 41,933 square miles. The new territory is 16,919 square miles in extent. The population of the nomes or departments into which Greece is divided is, according to the Census of 1920, as follows :—

Divisions of Old Territory		Divisions of New Territory	
Departments	Population (Census 1920)	Departments	Population (Census 1920)
Attica and Boeotia . . .	623,399	<i>Macedonia :—</i>

		Euros	94,012
		Rodopi	116,879
			704,208
		Total new territories . .	2,628,103

The Powers, in accordance with the Treaties of London and of Athens, have decided that Greece shall retain all those Aegean islands which she occupied during the war, except Imbros, Tenedos, and Castellorizzo, which were to be restored to Turkey. In the meantime Greece is in occupation of all the islands. These include Crete, Samos, Chios, and Mytilene.

Mount Athos is inhabited by the monks of Greek (17), Russian (1), Bulgarian (1), Rumanian (1), and Serbian (1) monasteries and hermitages (*Sketai*). The monks and their servitors till the fields, tend the vineyard, take in the harvest, fish, weave, sell in shops, and, indeed, take upon themselves all the secular duties of the community as well as the sacred. Originally inhabited by one mediæval ascetic, Peter the Athonite, it has at last grown to a religious colony of thousands, contained in 20 monasteries with their

respective dependencies; and after having passed in the fifteenth century from the sovereignty of the Greek Emperors of Byzantium to that of the Sultans it fell again into the hands of the Greeks, who occupied it in November, 1912. Each of the 20 monasteries is a sort of little republic in itself, those of the 'coenobitic' category being ruled by abbots chosen for life, while the 'idiorrhhythmic' monasteries are administered by a board of overseers (*epitropoi*) elected for a certain term of years. Hitherto the peninsula has been administered by a Council of 4 members, and an Assembly of 20 members, the latter consisting of 1 deputy from each monastery.

In recent years there has been considerable emigration. According to United States statistics, the number of Greek immigrants into the States was in 1915-16, 26,792; in 1916-17, 25,919; in 1917-18, 2,602; in 1918-19, 813.

The principal towns are the following, with populations, 1920 (census):—

Athens	292,991	Calamata	20,905	Chalcis	13,466
Salonica	170,321	Raidestos	20,793	Pyrgos	13,246
Piræus	131,170	Trikkala	20,194	Verria	13,349
Patras	52,174	Yanina	20,765	Florina	12,513
Adrianopolis	50,201	Syra (Hermou-		Zante	11,109
Volo	30,046	polis)	18,663	Tripolitsa	11,062
Corfu	27,175	Xanthi	16,584	Kozani	10,334
Candia	24,848	Serres	14,486	Vodena	9,441
Canea	21,976	Gumultchina	21,294	Kallipoli	7,842
Cavalla	22,939	Kirkkilisse	16,416	Rethymno	7,297
Larissa	21,084	Drama	15,263	Laurium	4,851

Religion.

The great majority of the inhabitants of the Kingdom are adherents of the Greek Orthodox Church. By the terms of the Constitution of 1864, the Greek Orthodox Church is declared the religion of the State, but complete toleration and liberty of worship is guaranteed to all other sects. A National Synod, held at Nauplia in 1833, vested the government of the Orthodox Church, within the limits of the Kingdom, in a permanent council, called the Holy Synod, consisting of the Metropolitan of Athens and 4 archbishops and bishops, who must during their year of office reside at the seat of the executive. The Orthodox Church has 3 archbishops and 29 bishops in the old territory and 59 archbishops and bishops in the new territories, including 1 metropolitan and 6 bishops in Crete. The Roman Catholic Church has an archbishop at Athens, another at Corfu, and a third at Naxos; and 1 bishop at Syra, Tinos, and Santorin respectively.

Instruction.

All children between the ages of seven and twelve years must attend school, but the law is not well enforced in country districts.

There were (1917-18) 6,799 primary schools with 8,641 teachers (of whom 3,990 were of the female sex) and 476,695 pupils (174,805 females). For secondary education there were 76 high schools, 425 middle schools, having 55,408 pupils (50,097 boys and 5,311 girls). In 1921 there were 10,131 teachers in elementary schools, and 2,018 in secondary. There are 2 agricultural schools in Greece with, together, 150 pupils. There are two Universities of Athens, the National University (founded 1836) and the Capodistria University. The Polytechnic, with 22 professors and 170 students, provides instruction in painting, sculpture, mechanics, architecture, surveying, etc. In 1921 there were 17 commercial schools with 2,800 pupils (2,028 boys and 772 girls).

In 1921 the expenditure on education amounted to 72,717,821 drachmai, of which 45,188,085 drachmai was for elementary education and 27,529,736 for secondary.

The Ministry of Education is also charged with the Service of Antiquities, managed by an Archaeological Council, which is responsible for the conservation and reparation of ancient monuments of all periods (Prehistoric, Classical, Byzantine and Mediæval), the upkeep of museums and the conduct of excavations. The service is well organised and efficient: it has carried out the difficult and expensive work of repairing the Parthenon and other buildings on the Acropolis at Athens. There is an archaeological department of the Ministry to which the provincial inspectors (*ephors*) of antiquities report.

British Science is represented in Athens by the British School of Archaeology, which, by the aid of grants from the Government, universities, and private subscribers, is able to encourage and carry out scientific research of all kinds, but especially art, archaeology and history. Members of the school have in recent years been responsible for the excavations at Knossos, in Crete, in Melos, at Sparta, in Thessaly, at Mycenæ, and elsewhere. There are also similar French, American, Italian, Austrian and German institutions.

Finance.

The estimates of ordinary revenue and expenditure for 6 years are as follows (25 drachmai = 1*l.*) :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1916-17	12,530,043	14,528,288	1919-20 ¹	45,906,773	61,692,029
1917-18	17,867,963	17,611,555	1920-21	46,780,447	98,124,743
1918-19 ¹	40,960,942	32,951,548	1921-22 ¹	68,754,196	135,885,756

¹ Estimates.

The main items of the budget for 1921-22 are given as follows :—

Revenue	Drachmai	Expenditure	Drachmai
Ordinary	715,233,460	Public Debt	321,813,781
Extraordinary	85,696,443	Sinking Fund	85,342,923
Loans	917,925,000	Defence	377,814,472
	1,718,854,903	War Expenditure	1,712,402,407
Deficit	1,678,289,011		
	3,397,143,914	Total (all items)	3,397,143,914

The outstanding external debt of Greece amounted on December 31, 1921, to 40,885,200*l.*, the principal items in which were the five per cent loan of 1881, 3,212,700*l.*; the five per cent. loan of 1884, 2,797,040*l.*; the 2½ per cent. loan of 1898, 3,899,100*l.*; the five per cent. loan of 1914, 12,811,000*l.*

In accordance with the peace preliminaries between Greece and Turkey and the Greek Law of Control of March, 1898, the financial commission of delegates representing Germany, Austria-Hungary, France, Great Britain, Italy and Russia (the mediating Powers) is established at Athens in direct relation

with the Greek Minister of Finance (Germany and Austria-Hungary are not now represented). The public debt of Greece is in large measure under the control of this commission. To this commission were assigned, for the payment of the interest on the external debt, the revenues from the salt, petroleum, matches and playing-cards monopolies, the duties on tobacco, cigarette paper, Naxos emery, the stamp duty, and the import duties at the port of Piræus. In their report for 1921 the Commissioners announce an income of 149,185,640 drachmai, of which the receipts from monopolies were 73,493,141 drachmai, and the Piræus customs 75,692,499 drachmai.

The collection of the assigned revenues and the administration of the monopolies is entrusted to a Greek Company, called the "Société de Régie des Revenues affectés au Service de la Dette Publique," which is under the control of the international commission.

Defence.

I. ARMY.

Military service in Greece is compulsory and universal (codified law of 1915, No. 425). It commences in the 20th year, and lasts up to the 51st. The normal term of service in the active army is 3 years for the cavalry and mounted artillery and 2 years for the infantry, &c., followed by 21 years in the first serie of the reserve (20 for the cavalry and mounted artillery) and 8 years in the second serie. The normal annual contingent of recruits is about 35,000.

On August 26, 1922, the Greek army in Asia Minor was attacked by the Kemalists and suffered a disastrous defeat, being driven out of Asia with very heavy losses in men and material. The Kemalists entered Smyrna on September 10. Consequent on this defeat, and on the subsequent revolution, the Greek army is being reorganised and somewhat reduced. In August, 1922, it consisted of 12 divisions, and its strength was 150,000 men.

The Greek cavalry is not organised in divisions, but is distributed by squadrons to the divisions of the army corps. The infantry is organised in regiments of three battalions, three regiments forming the infantry of each division. The field artillery is organised in brigades, each of two regiments. The regiment of artillery is composed of three groups, and each group of three batteries of four guns. The Greek infantry is armed with both the Mannlicher and the Mauser rifle, but some battalions are armed with the Martini. The artillery is armed with the French 75 field gun and the French light and medium howitzer.

II. NAVY.

The Greek Navy is not a force of any considerable importance. The principal vessels are as follows:—

—	Launched	Displacement Tons	Armour		Principal Armament	Torpedo Tubes	Horse Power	Max. Speed Knots
			Belt In.	Gun In.				
Averoff. . .	1910	10,118	8	6½	4 9·2; 8 7·5in. . .	3	19,000	24
Kilkis ¹ . .	1905	13,000	9	12	4 12in.; 8 8in.; 8 7in.	2	14,000	17
Lemnos . .		2,600	—	—	2 6in.; 4 4in. . .	2	6,500	20
Helle ² . .	1912							

¹ Purchased 1914 from the U.S. Navy.

² Cruiser purchased 1914 from China.

The old battleships, *Spetsai*, *Hydra*, and *Psara*, 5,000 tons, have latterly been used in the training service. There are 10 destroyers, 6 modern torpedo boats, 2 submarines, and a variety of miscellaneous craft. To these were added the ex-Austrian destroyer *Ulan*, and (for police duties only) 6 surrendered torpedo boats.

Preliminary work was done on the new arsenal intended to take the place of the establishment at Salamis. The cost of the new work was estimated at 2,800,000*l*. A British Naval Mission, under Rear-Admiral Aubrey Smith, was charged with the reorganisation of the Greek Navy.

Production and Industry.

Greece is mainly an agricultural country, and the economic life is directly dependent on the products of the soil. Of the total area only one-fifth is cultivable. The total area (old Greece) is 6,429,610 hectares (15,881,136 acres), made up as follows: 1,286,583 hectares (3,177,860 acres) is cultivated land; 5,055,122 hectares (12,486,151 acres) is covered by mountains; and 87,905 hectares (217,125 acres) occupied by lakes and marshes.

The deforestation of Greece progresses steadily and in every part of the country. The pine woods in Attica steadily decrease by cutting and by fires, but great efforts for re-afforestation and proper forest administration are being made.

By the draining of Lake Copais, an area of about 53,000 acres has been acquired for agricultural purposes. Irrigation and drainage canals, farm roads and buildings are being constructed, tree planting is undertaken, and the breed of cattle is being improved.

While there are a few large proprietors in Greece, the land is to a large extent in the hands of peasant proprietors and *métayer* farmers, among whom the large estates, on which they live and work, are being divided. On the whole, agriculture is in a backward state, chiefly because of the dryness of the climate, the scarcity of rivers which may be utilised for irrigation, the system of payment of rent in kind, and by the lack of co-operative societies and agricultural banks. The most favoured and best cultivated crop is the currant, which covers vast districts. Patras is the great currant centre. The yield for 1920 was 95,000 tons. Thirty-three thousand *stremmata* (*streumma*=0.2471 acre) of currant plantations have been uprooted in accordance with a law to limit the production of currants.

The acreage and production of the chief crops for two years were as follows:—

	Area in Acres		Production in Metric Tons	
	1919	1920	1919	1920
Wheat . . .	1,080,908	1,089,087	266,936	504,478
Barley . . .	414,442	390,792	118,374	135,108
Maize . . .	468,598	472,556	191,818	199,803
Oats . . .	214,784	161,769	55,548	60,781
Tobacco . . .	92,435	97,596	29,694	31,684
Cotton . . .	25,756	17,569	7,388	4,440
New wine . . .	445,602	350,881	266,650	239,234
Currants . . .	194,700	188,749	130,092	125,194

Olives are abundant, about 717,500 acres are under cultivation; olive oil production in 1922, 11,646,000 gallons. The nut crop in 1921 amounted to 6,376,590 lbs. The fig industry is centred in the port of Calamata. In 1919 the number of oranges grown was 206,412,000, of mandarins, 273,311,000, and of lemons, 163,874,000. Rice is cultivated in Greek Macedonia—Vodena, near Salonika, being the principal centre. Two kinds of cheese are produced in Greece—sliced cheese in brine (commercially known as Fetta cheese) and head cheese. Production in 1921, 14,812,875 lbs. (Fetta cheese, 4,937,625 lbs.)

There were in Greece (1920) 200,802 horses, 129,083 mules, 235,154 asses, 668,114 cattle, 5,811,418 sheep, and 416,221 pigs.

Greece has a great variety of mineral deposits, and there are now in force about 35 mining concessions embracing a total area of nearly 20,000 acres. The ore and other minerals worked include iron, copper, zinc, lead, silver, manganese, aluminium, antimony, tin, nickel, magnesite ore, cobalt, lignite, sulphur ochre, and various other earths. The Laurium district, Thessaly, Eubœa, the Ægean islands and other parts of Greece yield a large output of ores and earths.

The principal mineral output of all Greece for two years is given as follows (in metric tons):—

—	1920	1921	—	1920	1921
	Tons	Tons		Tons	Tons
Chromite	4,400	3,775	Lead	23,582	—
Emery	11,009	13,000	Magnesite	75,500	64,200
Iron	3,860	31,880	Nickel	—	—
Manganese iron	—	—	Zinc	2,591	2,100
Iron pyrites	3,240	44,853	Salt	57,285	63,500

Lignite production in 1915 was 39,745 tons; in 1916, 116,946 tons; in 1917, 157,956 tons; in 1918, 208,797 tons; in 1919, 182,006 tons; and 1920, 187,196 tons.

Industry is making considerable progress in Greece. The leading industrial products are olive oil, wine, textiles, leather, and soap. The industrial census of 1917 showed that the country had 2,213 factories, employing 36,124 hands, and valued at 260,363,647 drachmai. In the cotton mills of Greece there are 169,000 spindles and 2,245 looms, in 82 factories, employing 10,875 hands.

Commerce.

Value of the commerce of Greece (25 drachmai = 1l.):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports	8,923,019	29,356,283	62,332,957	85,241,532	69,024,194

Total	2,131,038,321	1,725,604,877	664,112,647	947,728,503

The staple article of import from Greece into the United Kingdom (Board of Trade Returns) is currants, the value of which amounted in 1921 to

3,059,120*l*. Other articles of import in 1921 were:—iron ore (including chrome), 56,031*l*.; raisins, 236,282*l*.; tobacco, 249,803*l*. Of the exports from the United Kingdom to Greece in 1921, cotton piece goods were valued at 1,368,376*l*.; woollens, 571,151*l*.; coal, 492,094*l*.; iron and steel, 216,553*l*.; machinery, 220,271*l*.

The total trade between Greece and the United Kingdom for 5 years was as follows:—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Greece to U.K.	2,329,688	10,440,500	6,815,805	4,034,230	4,012,911
Exports to Greece from U.K.	1,048,804	6,914,713	12,783,304	5,876,761	3,795,658

Navigation and Shipping.

The merchant navy of Greece on January 1, 1922, had 1,093 sailing vessels of 119,000 tons and 440 steamers of 417,000 tons. In 1921, 3,289 steamers of 4,208,063 tons, and 674 sailing vessels of 66,852 tons entered the ports of Greece, while 3,265 steamers of 3,751,104 tons, and 633 sailing vessels of 54,008 tons cleared all the ports.

Internal Communications.

There are about 49,838 miles of roads in Old and New Greece. There is a canal (opened November 9, 1893) across the Isthmus of Corinth (about 4 miles). In 1920, 2,968 steamers of 1,571,571 tons and 2,502 sailing vessels of 60,953 tons passed through the canal.

Railways open for traffic in 1920 for a length of about 1,470 miles. Principal lines:—Hellenic Railway, 275 miles; Piræus-Athens-Peloponnesus railway, 456 miles; the Thessalian Railway, 142 miles; Athens-Piræus railway, 6 miles; Attica Railway, 51 miles; North-Western Railway, 46 miles; Salonica-Gevgheli, 49 miles; Salonica-Monastir, 136 miles; Salonica-Dedeagats, 215 miles. Before the war with Turkey (1912-13) Greece was completely isolated by land from the rest of Europe, but on May 8, 1916, the railway was completed between Gida, on the Salonica-Monastir line, and Papapul, on the Thessalian frontier, a distance of 56 miles, whereby Greece was linked up with the European railroads. The railway system has been extended by the inclusion of the lines in Western and Eastern Thrace. The Government has also purchased from England for two million francs the Salonika-Angista-Stavros line, 75 miles long, which was built by the British during the war. The lines are State-owned and State-controlled, except the Piræus-Athens, Attica, North-Western, and Thessalian Railways.

The telegraph lines in 1920 had a length of 10,565 miles, with 20,186 miles of wire and 3,973 miles of cable. The number of offices was 349. They despatched 3,906,000 inland telegrams, 1,216,000 international, and 845,000 official. Total, 5,967,000.

In 1920 there were 4,914 miles of telephone lines belonging to 6 urban systems, the number of subscribers 2,874.

Of post offices there existed at the end of 1920, 938, and there passed through the post in that year :—Service of the interior :—letters, 28,894,000 ; post-cards, 2,985,000 ; printed matter, journals and samples, 15,987,000 ; postal orders, 455,000 ; parcels, 367,000. Service of the exterior :—letters and post-cards, 22,576,000 ; printed matter and journals, 2,451,000 ; postal orders, 28,000 ; parcels, 168,000.

Banking and Credit.

The nominal value of the Greek coinage (minted in Paris) put in circulation since 1866 has been : gold, in 1876, 1,000,000 drachmai ; in 1884, 11,000,000 drachmai ; total gold, 12,000,000 drachmai ; silver, up to 1910, 26,262,865 drachmai, nearly all of which had disappeared from circulation during the period when the agio on gold made it profitable to export to other countries of the Latin Union ; bronze, up to 1883, 6,816,065 drachmai ; nickel, 1893-95, 3,000,000 drachmai. Since 1910 the silver currency has been restored by the repatriation from other countries of the Latin Union of 4,548,024 drachmai, in good condition, and by coin (at Paris) of 9,451,976 drachmai. Owing to the war 1 and 2 drachmai notes as well as 50 and 10 lepta notes have been issued to meet the scarcity of currency. There are also 20, 10, and 5 lepta coins made of a mixture of nickel and tin, and bronze coins of 10 and 5 lepta.

The National Bank (founded in 1841) was authorised to issue forced currency notes to the amount of 73,000,000 drachmai. This privilege was extended to December 31, 1930, and by an agreement with the Government made on December 6, 1914, these privileges were extended to the new territories as from January 1, 1915. On December 31, 1921, the notes of the National Bank amounted to 2,507,638,010 drachmai.

The Bank of Piræus, with a capital of a million sterling, was founded in October, 1916, by a number of shipowners for the purpose of financing maritime ventures. Other banks are the Commercial Bank (capital 15,000,000 drachmai), the Central Bank (capital 3,500,000 drachmai), the Bank of Athens (capital 48,000,000 drachmai), the Bank of the Orient (capital 25,000,000 drachmai), the Popular Bank (capital 1,600,000 drachmai), the Bank of National Economy (capital 10,000,000 drachmai), the Industrial Bank (capital 15,000,000 drachmai), the Maritime Bank (capital 10,000,000 drachmai), and the General Bank (capital 3,000,000 drachmai). Total deposits in all the banks in 1920, 2,298,881,814 drachmai.

Money, Weights and Measures.

Greece entered the Latin Monetary Union in 1868.

The *Drachma*, of 100 *leptá*, is equivalent to the French franc (25·225 francs = 1*l.* sterling). 100 new drachmai = 112 old drachmai.

By Royal decree of January 30, 1893, the gold coins of Great Britain, Austria, Germany, Denmark, Russia, Spain, Turkey, Egypt, and the United States are accepted by the Treasury and by private persons as legal tender, one-fourth per cent. being deducted from their nominal value.

In September, 1898, it was announced that it had been decided to introduce the metric system as regards measures of length, weight, and capacity. In 1922 the metric system was made compulsory. The use of the Gregorian Calendar has been authorised as from February 1, 1923.

For old system of weights and measures, see THE STATESMAN'S YEAR-BOOK for 1922, p. 998.

Diplomatic Representatives.

1. OF GREECE IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Demetrius Caclamanos (appointed October 10, 1922).

Minister Resident and Counsellor.—Constantin Collas.

First Secretary.—Georges V. Mélas, C.V.O.

Acting Secretary.—D. Sofianos.

Naval Attaché.—Captain Panas, C.M.G.

Acting Consul-General.—D. Inglessis.

There are consular officers of Greece at London, Liverpool, Birmingham, Cardiff, Dublin, Edinburgh, Glasgow, Liverpool, Manchester, and various other towns.

2. OF GREAT BRITAIN IN GREECE.

H.M. Representative at Athens.—Hon. F. O. Lindley, C.B., C.B.E. (appointed November 25, 1921).

Counsellor and Chargé d'Affaires.—C. H. Bentinck.

Secretaries.—C. W. E. Cradock Hartopp and Capt. J. H. F. McEwen.

Commercial Secretary.—E. C. D. Rawlins.

Naval Attaché.—Commander R. T. Down, D.S.O., R.N.

Military Attaché.—Colonel E. S. Hoare-Nairne, C.B., C.M.G.

Consul-General at Salonica.—R. A. Fontana.

There are also British Consular representatives at Athens, Candia, Canea, Cephalonia, Corfu, Mitylene, Patras, Samos, Santorin, Volo, and Zante.

Statistical and other Books of Reference concerning Greece.

GUATEMALA.

(REPÚBLICA DE GUATEMALA.)

Constitution and Government.

THE Republic of Guatemala, established on March 21, 1847, after having formed part for twenty-six years of the Confederation of Central America, is governed under a Constitution proclaimed December, 1879, and modified October, 1885, November, 1887, October, 1889, and July, 1903. By its terms the legislative power is vested in a National Assembly, consisting of representatives (one for every 20,000 inhabitants) chosen by universal suffrage for four years, and a Council of State of 13 members, partly elected by the National Assembly, partly appointed by the President of the Republic. The executive is vested in a President, elected for six years.

President of the Republic.—General José María Orellana (March, 1922, to March, 1928).

The administration is carried on, under the President, by the heads of seven departments—of Foreign Affairs, Government and Justice, Hacienda and Public Credit, Public Instruction, Fomento, War, and Agriculture.

Area and Population.

Area, estimated at 48,290 English square miles. • In 1903 the population was 1,842,134; and according to the 1920 census it was 2,004,900. About 60 per cent. are pure Indians, most of the remainder being half-caste, there being very few descendants of Europeans. Guatemala is administratively divided into 22 departments.

Capital of the Republic and seat of the government was Guatemala, with 91,380 inhabitants (1921), almost all *ladinos* or descendants of Europeans. Earthquakes from December 25, 1917, to January 24, 1918, completely destroyed the city. Other towns are Quezaltenango, 35,000, Coban, 30,770, and Totonicapan, 28,310. A boundary convention with Honduras of March, 1905, was extended to March 1, 1915, and a New Convention was signed and ratified in 1915.

Religion and Instruction.

Roman Catholicism is the prevailing religion; but all other creeds have complete liberty of worship. Guatemala has an archbishopric.

Education is free, and obligatory for all children between 6 and 14 years of age. In 1922 there were 2,218 Government schools, including 921 public schools for boys, 1,084 for girls, 90 private schools for boys, and 123 private schools for girls. The number of pupils enrolled in 1922 was 76,970 and the average attendance was 66,282. On May 2, 1918, the Government promulgated a decree establishing the University of Guatemala, which is to be known as the "Universidad Nacional." The University was opened on September 15, 1918. The National Central Institute confers degrees which are recognised in all the Central American Republics. Among the other institutions are a School of Handicraft for Women, a National Conservatoire of Music, and a School of Art. Total estimated expenditure on education in 1922–23, 50,806,700 pesos. The national library contains 19,400 volumes. •

Justice and Crime.

Justice is administered in a supreme court, 6 appeal courts, and 26 courts of first instance. In all the municipalities there are Justices of Peace.

Finance.

Ordinary revenue and expenditure in currency (186 paper dollars = £1 in 1917; 194 = £1 in 1916; 216 = £1 in 1921):—

—	1917-18	1918-19	1919-20	1920-21 ¹	1921-22
	dollars	dollars	dollars	dollars	dollars
Revenue	135,471,585	110,937,325	127,249,490	168,482,214	256,261,970
Expenditure	131,413,218	77,666,023	101,028,476	195,714,577	387,365,234

¹ Estimates.

On December 31, 1921, the outstanding amount of the 4 per cent. External Debt of 1895 was 1,096,040*l.*; certificates in respect of unpaid interest, 844,603*l.*; total, 1,940,643*l.* The internal debt on December 31, 1921, amounted to 157,700,000 dollars currency and 1,381,570 dollars gold.

Defence.

The military force of Guatemala, as reorganised, numbers 85,535 officers and men when mobilised. The reserve army consists of 40,575, divided into 81 battalions. All male citizens are liable to conscription from 18 to 50.

Military budget 1922-23, 66,978,635 paper pesos.

Production and Industry.

The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the greater. The Pacific slope, though comparatively narrow, is exceptionally well watered and fertile between the altitudes of 1,000 and 5,000 feet, and is the most densely settled part of the Republic. The Atlantic slope is sparsely populated and has little of commercial importance beyond the timber cutting of the Peten, coffee cultivation of Coban region, and banana raising of the Motagua Valley and Lake Izabal district.

By the National Land Law of 1894, the State lands (except those on the frontiers and the sea-shore) were divided into lots for sale, the maximum allotment permitted to one person being 15 caballarias (or about 1,687 acres); and these cannot be sold under ten years. In December, 1915, the state took over all the ore lands in the country, and such land may be exploited only under leasehold. The forest area has an extent of 1,316,482 acres.

The soil in general is exceedingly fertile. The most important crop is coffee, of which there are 1,500 plantations under cultivation, covering an area of 220,686 acres in 1921, and containing some 450,000,000 coffee trees. The quantity exported in 1921 was 92,208,340 pounds. Germans own and control between 30 and 40 per cent. of the coffee plantations of Guatemala. Next to coffee, sugar is the most important crop; the area in 1921 was 54,270 acres. The quantity exported in 1921 was 14,518,903 pounds. Other crops in 1921 were 6,318 acres of rice, 477,446 acres of maize, 19,150 acres of bananas. In 1921 3,988,575 bunches of bananas were exported. Of the smaller crops, area in 1921, beans, 31,114 acres, wheat, 33,188 acres, and potatoes, 2,690 acres.

The department of Petén is rich in mahogany and dye woods, for which there is a ready market in the United States. Petén is also the centre of the chicle (gum) industry; in 1921, 787,641 lbs. were exported. Cotton is grown in small quantities. On the high plateaux the area of the cattle-grounds (potreros) is about 758,640 acres. In 1921 there were estimated to be in the Republic 296,995 head of cattle, 62,648 horses and mules, 105,464 sheep, and 40,791 pigs.

There are silver, gold, copper, iron and lead mines, but owing to the lack of transport, mining is little developed. Chrome was discovered in 1916. In 1919-20 the ferro-chromium mines of the department of Jalapa produced 2,241,341 kilos; of Estrada Cabrera, 11,352 kilos. The mines of Santa Rosa produced 680,770 kilos of mineral ore; the lead mines of Huehuetenango produced 1,249 quintals.

Commerce.

Value of the commerce in pounds sterling for 5 years :—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports . . .	1,798,314	1,326,800	2,246,164	2,909,995	2,139,218
Exports . . .	1,561,946	2,263,800	4,483,827	3,620,559	2,428,165

The values of the principal imports and exports in U.S. dollars for 2 years were :—

Imports	1920	1921	Exports	1920	1921
	Dollars	Dollars		Dollars	Dollars
Cotton . . .	4,708,948	2,915,879	Coffee . . .	13,942,083	9,220,833
Foodstuffs . . .	784,156	463,173	Chicle . . .	259,571	252,045
Linen, hemp, and jute . . .	411,348	294,432	Timber . . .	451,011	526,442
Paper, etc. . .	416,924	338,555	Hides . . .	398,558	183,130
Iron and Steel . .	1,261,609	1,289,259	Bananas . . .	990,138	1,196,672
Leather . . .	428,230	139,713	Sugar . . .	1,070,373	290,378
			Honey . . .	32,849	48,906
Total (including all others). . .	14,549,977	10,696,089	Total (including all others) . . .	18,102,799	12,140,826

In 1921 imports from Great Britain amounted to 1,897,650 dollars; from the United States, 6,532,170 dollars; from France, 4,428,229 dollars; and from Germany, 1,109,951 dollars.

Total trade between Guatemala and the U.K. for 5 years (according to Board of Trade returns) :—

	1918	1919	1920	1921	1922.
	£	£	£	£	£
Imports from Guatemala to U.K.	—	315,291	270,189	104,425	141,192
Exports to Guatemala from U.K.	281,416	397,983	897,427	385,238	392,548

Shipping and Communications.

In 1921, 493 vessels of 709,517 tons (212 of 406,612 tons being American, and 85 of 106,394 tons British) entered and 495 vessels of 711,356 tons cleared the ports of the Republic. The chief ports on the Atlantic side are Puerto Barrios and Livingston; on the Pacific side, San José, Champerico, and Ocos.

The International Railway of Central America was incorporated in 1912 and represents a consolidation of the Guatemala Railway (195 miles), the Guatemala Central Railway (139 miles), the Occidental Railway (51 miles), and the Ocos Railway (22 miles). The company's main lines at present extend from Puerto Barrios to Guatemala City, a distance of 194.5 miles, thence to San José de Guatemala, on the Pacific Ocean, a distance of 74 miles. The company receives subsidies from the Governments of Guatemala and Salvador, and controls a railway mileage of 652 miles. The Salvador division of 40 miles is operated separately. The Government of Guatemala may purchase the lines after the year 2002 at a price to be decided by arbitration. The lines located in Salvador may be purchased after June, 1978, by the Government of that country at an arbitrated price. After the year 2006 Salvador will receive the lines without indemnity. In 1914 the International Railways of Central America acquired by purchase a 60-mile railroad extending from Santa Maria, on the main line between Guatemala City and San José de Guatemala, to Las Cruces. The same year it built an extension from Las Cruces to Ayutla, a distance of 45 miles. Ayutla is on the border of Mexico; Suchiate, in Mexico, being on the other side of the river Suchiate, which forms the boundary between the two countries. Although the road was constructed in 1914, through freight and passenger traffic between Guatemala City and Ayutla was not inaugurated until October 1, 1916. The International Railways of Central America has also projected a line to run south-east from Santa Maria to Santa Ana in Salvador. It is stated that when this and other lines in Central America, projected or under construction, are completed, a direct through route will be afforded between Vera Cruz, Mexico, and Panama and Colon, extending along the western portion of Central America through the five Republics of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica.

There are few good roads, and many bridges have been recently built, but away from the railway most of the traffic is on mule-back. In November, 1916, a concession was granted to a company for the construction of an intra-coastal canal, to be known as the Chiquimulilla Canal, skirting the Pacific Coast of Guatemala and extending 80 miles from San José to the Esclaves River, but the work has not yet been started.

There were in 1917, 423 post-offices, through which passed 17,285,844 letters, &c. In 1920 the national telegraph lines had a length of 4,512 miles, and the telephones 416 miles. There were 262 telegraph and 252 telephone offices. Number of telegrams sent in 1920, 1,523,512.

Money, Weights, and Measures.

On April 11, 1918, the National Assembly established a National Bank (Banco Nacional Privilegiado), with headquarters in the City of Guatemala. The principal functions of this bank is the making of agricultural loans, aiding in the reconstruction of the national capital and of other towns damaged by earthquakes, and co-operating in the settlement of economic questions. The funds of the bank are to consist of money subscribed by the Government and the proceeds of the sale of shares to national and foreign capitalists who

may desire to participate in the enterprise. The President of the Republic is authorised to negotiate and conclude such financial arrangements, either at home or abroad, as he may deem necessary or expedient in establishing and operating the bank.

On June 30, 1921, the position of the Banks of Guatemala was as follows:—(1) The Bank of Guatemala (1895), capital, 10,000,000 pesos; paid-up capital, 2,500,000 pesos; reserve, 20,967,495 pesos. (2) The International Bank of Guatemala (1877), subscribed capital, 2,000,000 pesos; reserve fund, 3,931,175 pesos. (3) The American Bank (1895), paid-up capital, 4,000,000 pesos; reserve fund, 8,400,000 pesos. (4) The Western Bank (Banco de Occidente) of Quezaltenango (1881), capital, 2,000,000 pesos; paid-up capital, 1,650,000 pesos; reserve fund, 35,188,742 pesos. (5) Banco Agrícola Hipeuario, capital, 5,000,000 pesos; reserve fund, 3,264,000 pesos. (6) Colombiano, capital, 4,250,000 pesos; reserve fund, 14,227,522 pesos. On June 30, 1922, there were in circulation 367,435,298 pesos in paper money issued by the banks.

The silver peso or dollar is not now current, the money in use being paper or fractional nickel and copper coin.

The *Dollar or Peso*, of 100 *Centavos*, weight, 25 grammes, '900 fine; nominal value, 4s. Nickel coins are the *real*, nominal value 6d., and the half and quarter real. Copper coins (introduced in 1915) are 25 and 12½ centavos. In 1917, 1,200,000 of the former and 2,468,000 of the latter were coined.

The Spanish <i>Libra</i> of 16 ounces . . .	= 1·014 lb. avoirdupois.
„ <i>Arroba</i> of 25 libras . . .	= 25·35 lb. „
„ <i>Quintal</i> of 4 arrobas . . .	= 101·40 „
„ <i>Tonclada</i> of 20 quintals . . .	= 18·10 cwt.
„ <i>Fanega</i> . . .	= 1½ imperial bushels.

The metric system has been officially adopted.

Diplomatic and Consular Representatives.

1. OF GUATEMALA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Don Manuel Arroyo. (Appointed 1920).

Secretary.—Don Jorge Garcia Granados.

There are also Consular representatives at Glasgow, Liverpool, London, Southampton, Birmingham, Cardiff, Grimsby.

2. OF GREAT BRITAIN IN GUATEMALA.

Envoy Extraordinary, Minister and Consul-General.—The Legation is closed (February, 1923).

There is a British Consul at Quezaltenango; Vice-Consuls at Livingston, Puerto Barrios, and San José.

Statistical and other Books of Reference concerning Guatemala.

HAITI.

(RÉPUBLIQUE D'HAÏTI.)

Constitution and Government.

THE Republic of Haiti, formerly a French colony, was proclaimed independent January 1, 1804, and is now governed under a Constitution ratified on June 12, 1918. The legislative power is vested in a Chamber of Deputies on the basis of one member for each 60,000 inhabitants, members being chosen for 2 years by direct popular vote, and in a Senate of 15 members chosen for 6 years likewise by direct vote of the people. Citizens over 21 enjoy the franchise. The President is elected for 4 years by the two Chambers in joint session. Members of both houses are paid a monthly salary of 150 dollars throughout the year.

President of the Republic.—Louis Borno; elected April 10, 1922; assumed office, May 15, 1922.

The administration of the Republic is carried on, under the President, by five Secretaries of State. The President receives an annual salary of 24,000 dollars.

In November, 1915, both Houses of the Haitian Congress ratified the treaty with the United States establishing a virtual protectorate by the United States over Haiti.

Area and Population.

The area of the Republic, which embraces the western portion of the island of Haiti—the larger but less populated eastern division forming the Republic of *Santo Domingo*—is estimated at 10,204 English square miles.

The inhabitants were estimated to number 960,000 in 1887; the ecclesiastical estimate, based on parish registers, in 1909 put the number at 2,029,700. In 1912 the estimated population was 2½ millions. The majority of them are negroes; there are also great numbers of Mulatto Haitians, the descendants of the former French settlers. There are about 5,000* foreigners, of whom about 10 per cent. are white. Capital; Port-au-Prince, with 120,000 inhabitants, situated on a large bay, and possessed of an excellent harbour. Cape Haiti has an estimated population of about 15,000; Jacmel, 20,000; Cayes about 15,000; Gonaïves, 8,000; Port de Paix, 5,000. The official language of the country is French, though most of the common people speak a debased dialect known as Creole French.

Religion and Instruction.

The religion is Roman Catholicism. There is an archbishop with 4 suffragan bishops. The Catholic clergy are French. Public elementary education is free, the country being divided into 15 inspectors' districts. The sum allotted for public instruction amounts to nearly 1,000,000 dollars annually, but the educational system is still very imperfect, especially in rural districts. In 1910 education was made compulsory. In the 6 national lycées in 1920-21 there were 650 pupils, and in 10 private secondary schools 2,792 pupils. There were in the 11 national primary schools in charge of friars 3,260 pupils divided among 66 classes, and in 32 in charge of nuns there were 4,782 pupils. There were also 29 school-teachers who are laymen and are visited by the friars as supervisors. During the 1920-21 school year 15 private rural primary schools had 530 pupils, and 38 private city primary schools 2,951; 563 national rural primary schools, 18,187 pupils; 105 religious schools, 5,857 pupils; 118 girls' primary schools, 10,481 pupils; 100 boys' schools, 8,331 pupils; and 10 half-time schools, 963 pupils. In 1921 there was created the University of Haiti.

Justice.

Justice is administered by a Court of Cassation and by lower courts. All the judges are nominated by the President and are irremovable.

Finance.

The revenue of Haiti is derived almost exclusively from customs, paid in American gold on exports and imports. The largest portion of the expenditure is for debt charges.

The following table shows the revenue and expenditure for two years:—

	Revenue		Expenditure	
	U.S. Gold dollars	Currency gourdes	U.S. Gold dollars	Currency gourdes
1918-19	5,115,930	3,013,958	2,349,880	4,534,121
1919-20	5,608,414	5,011,703	3,748,498	4,602,494

The budget for 1919-20 has also been adopted for the fiscal year 1920-21.

On December 31, 1921, the total debt of Haiti amounted to 17,871,470 dollars, made up of the 87,023,425 francs debt, equivalent to 6,971,874 dollars, 1 971,029 dollars internal bonds; 3,275,379 dollars interior debt; and 5,668,188 dollars floating debt.

Defence.

An armed constabulary (Gendarmerie d'Haiti), both urban and rural, was instituted in 1916. The officers are drawn from the United States Marine Corps. The establishment consists of 110 officers and 2,688 non-commissioned officers and men. A coastguard service of one armed auxiliary schooner is attached to the constabulary.

Production.

The industries of Haiti are mainly agricultural, and the most important product is coffee of excellent quality, but the export duty (3 cents gold per lb.) is so considerable as to hamper the development of its cultivation. Cocoa is grown extensively and cotton is exported in increasing quantities. The cultivation of tobacco is extending, and a cigar and cigarette factory is successful. Sugar is likewise grown, and there are 4 sugar-making establishments. An extensive sugar central, founded with American capital, has been constructed near Port-au Prince. Rum and other spirits are distilled but not exported: the rum is of a superior quality. Logwood is an important product, and other valuable woods are now exported. Cattle breeding is neglected.

Haiti possesses considerable mineral resources quite undeveloped. Gold, silver, copper, iron, antimony, tin, sulphur, coal, kaolin, nickel, gypsum, limestone and porphyry are found but are little worked. Some effort has been made to work copper mines in the last few years, and concessions have been granted for mining coal, iron, and copper.

Commerce.

Imports and Exports for 4 years:—

—	Imports	Exports	—	Imports	Exports
	Dollars	Dollars		Dollars	Dollars
1916-17	1,661,369	1,692,968	1919-20	27,398,411	18,990,032
1918-19	17,117,608	21,400,044	1920-21	11,957,205	4,953,570

The values of imports into Haiti from various countries for the year 1920-21 were as follows:—From the United States, 9,543,010 dollars (79.81 per cent.); from Great Britain, 818,756 dollars (6.84 per cent.); from France, 1,137,589 dollars (9.51 per cent.). Of the exports, 1,603,652 dollars went to the United States (32.37 per cent.); 2,511,586 dollars to France (50.70 per cent.); and 179,300 dollars to the United Kingdom (3.61 per cent.).

Total trade between Haiti and the U.K. for 5 years (Board of Trade Returns):—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports . . .	18,074	161,981	158,292	135,359	213,636
Exports . . .	71,812	216,868	437,323	102,406	188,927

Shipping and Communications.

In 1919 there entered and cleared at the ports of the Republic 988 steam vessels of 90,566 tons, and 481 sailing ships of 923 tons. Several lines of steamers (French, Dutch, and Norwegian) connect the ports of Haiti with New York.

Port-au-Prince is connected with Cape Haiti by a road 169 miles long, and with Mirebalais and Lascahobas by a road 33 miles long. A light railway has been constructed from Port-au-Prince to Lake Assuéi (28 miles), and to Léogane (22 miles), but the traffic is small. A concession has been granted the 'National Railroad Company of Hayti' for a railroad from Cape Haiti to Port-au-Prince, now in construction. Total length of line, 64 miles. Port-au-Prince has 5 miles of tramway.

The principal towns are connected by the Government telegraph system. A cable runs from the Mole St. Nicholas to Santiago de Cuba and from the Mole to Port-au-Prince, and also to Cape Haiti, whence it runs to Puerto Plata (Santo Domingo) and to South America.

There are 31 post offices. Haiti joined the Postal Union in 1880. Length of telegraph lines, 124 miles.

Money, Weights, and Measures.

The Banque Nationale de la République d'Haiti, established October 21, 1910, with a capital of 10,000,000 francs, undertakes to render services to the Government in respect of loans and other matters. In 1916, the National City Bank of New York purchased control over this bank. In 1919 the Royal Bank of Canada established a branch at Port-au-Prince.

The *Gourde*, or dollar, nominal value, 4s. Nickel coins are 50-, 20-, 10- and 5-centime pieces, and bronze 3-, 2-, and 1-centime pieces. The money in circulation consists of paper money, 7,394,972 gourdes; nickel coins, 7,000,000 gourdes; bronze coins, 245,000 gourdes; treasury bonds, 1,468,437 gourdes; total, 16,108,409 gourdes. It is estimated there are also 2,100,000 dollars in American gold in circulation. The bank notes are to be issued by the Banque Nationale de la République d'Haiti under the control of the Haitian Government. In 1917 the premium on gold as against Haitian gourdes was stationary at 400 per cent., at which rate the local currency has been stabilised.

The metric system of weights and measures came into use officially on October 1, 1920, and by a presidential decree of May 9, 1922, was made obligatory in all operations after July 1, 1922.

Diplomatic and Consular Representatives.

1. OF HAITI IN GREAT BRITAIN.

Secretary of Legation.—Abel Théard, Chargé d'Affaires.

Consul.—Maurice Erdmann.

There are Consuls at Belfast, Cardiff, Cork, Liverpool, Birmingham, Manchester, Southampton, Grimsby, Dundee, Glasgow.

2. OF GREAT BRITAIN IN HAITI.

Consul and Chargé d'Affaires.—J. E. M. Carvell.

HONDURAS.

(REPÚBLICA DE HONDURAS.)

Constitution and Government.

On September 15, 1821, the State of Honduras declared its independence of Spain and set up as a Republic which is governed under a charter proclaimed October, 1894. It gives the legislative power to a Congress of Deputies consisting of 42 members, chosen for 4 years directly by popular vote, in the ratio of one per 10,000 inhabitants. It meets for 60 days on January 1 each year. The executive authority rests with a President, nominated and elected by popular vote for 4 years, and holding office from February 1st.

President.—General Rafael Lopez Gutierrez (1920-1924).

The administration of the Republic is carried on by a Council of six ministers, to whom are entrusted the departments of Foreign Relations, Government and Justice, War, Treasury and Public Credit, Public Works and Agriculture, and Instruction.

Area and Population.

Area about 44,275 English square miles, with a population, on January 1, 1922, of 662,422, according to official figures, or 14.9 inhabitants to the square mile. The inhabitants are chiefly Indians with an admixture of Spanish blood. On the north coast there is a considerable proportion of negroes. The Republic is divided into 17 departments. La Mosquitia is still practically unexplored and is inhabited by native races who speak no Spanish. The capital of Honduras is Tegucigalpa, with 38,950 inhabitants in 1920. Other towns are

Pespire, 7,132 ; Nacaome, 8,152 ; La Esperanza, 11,453 ; Santa Rosa, 10,574 ; Choluteca, 8,065 ; San Pedro Sula, 7,820. The main ports are Amapala on the Pacific, and, on the Atlantic, Puerto Cortez (2,500), Omoa (1,000), La Ceiba, Trujillo, Puerto Castilla, Roatan, and Tela. Amapala, on Tiger Island, is 3 hours by gasoline launch from San Lorenzo on the mainland, where an automobile road starts for Tegucigalpa 81½ miles (130 kilometres) distant.

Vital statistics in 1920 :—Births, 17,435 (9,038 boys and 8,397 girls) ; deaths, 11,531 (5,953 males and 5,578 females) ; surplus of births, 5,904.

Religion, Instruction, Justice.

The Roman Catholic is the prevailing religion, but the Constitution guarantees freedom to all creeds, and the State does not contribute to the support of any. Instruction is free, compulsory (from 7 to 15 years of age), and entirely secular. In 1921 there were 922 schools, with 1,241 teachers. In 1921 there were 88,453 children of school age, of whom 39,000 attended school. The percentage of children who could neither read nor write was 56 per cent. The expenditure for education in 1921 was 509,840 pesos. At Tegucigalpa there is a National University with 98 students in 1921, also a military school, and at Comayagua there is a school of jurisprudence. For secondary instruction the Government maintains a Central Institute at Tegucigalpa, and subsidised colleges in the departments. To these colleges nine normal schools are annexed.

The Judicial power resides in the Supreme Court with five judges chosen directly by the people for 4 years ; four Appeal Courts, and departmental and local judges.

Finance.

The revenue is mainly derived from customs, and from spirit, explosives, and tobacco monopolies. For the years stated, ending July 31, the revenue and expenditure are given as follows (the silver peso is legally fixed at one-half the value of an American dollar).

—	1918-19 ¹	1919-20 ¹	1920-21 ²	1921-22 ²	1922-23 ³
	£	£	£	£	£
Revenue . . .	794,114	1,003,346	951,491	834,350 ³	912,379 ³
Expenditure . . .	823,775	1,165,587	960,546	834,350 ³	912,379 ³

¹ Peso converted at 3s.

² Peso converted at 2s. 6d.

³ Estimates.

On December 31, 1921, the external debt of Honduras consisted of four loans contracted as follows : 1867, 78,800*l.* and 900,700*l.* ; 1869, 2,176,570*l.* ; 1870, 2,242,500*l.* ; amounting to 5,398,570*l.* The arrears of interest to January¹ 1, 1921, amount to 22,326,112*l.* ; total, 27,724,682*l.* No interest has been paid since 1872. The bonds of this debt were floated to build a Trans-oceanic railway, but the scheme ended in a complete failure. Afterwards the Government took over the railway.

The internal debt on July 31, 1921, amounted to 3,777,000 silver dollars, an increase of 222,018 silver dollars over the preceding year.

Defence.

Every citizen of Honduras belongs to the regular army from the age of 21 to 35 ; to the reserves from the age of 35 to 40. Foreigners are exempt from service, naturalised citizens being exempt for 10 years.

Production and Industry.

The chief culture is that of bananas, mostly on the Atlantic coast, where coconuts are also grown. For the year ended July 31, 1922, there were exported 13,516,397 bunches of bananas, Tela being the principal banana-exporting port. The coconut groves of Puerto Sal extend from the Uluá River to the Cuero River, a distance of about 60 miles, and are said to contain over 28,000 fruit-bearing trees. The export of coconuts in 1921 was 10,056,977. Rubber is produced in decreasing quantity ; coffee of fine quality is grown, and the industry is increasing. Tobacco too is grown. While the Department of El Paraíso has become noted for its fine quality of tobacco, the Department of Copan still leads in quantity, producing 75 per cent. of the total amount raised in the Republic (about 2,000,000 pounds annually). This finds a market in the neighbouring Republics and also in Peru. Henequen is being widely planted, the Government having offered a subsidy.

Honduras is essentially a cattle producing country. The total number of farms was 3,658 ; of cattle ranches, 1,561. Cattle breeding is carried on extensively, and dairy farming on a small scale. In 1920 there were within the Republic approximately 500,000 head of cattle, horses, mules, donkeys and pigs, etc.

The mineral resources of Honduras are—gold, silver, copper, lead, zinc, iron, antimony, some of them being found in almost every department. Gold, bar silver, some copper and lead, and various ores are exported. Deposits of brown and other coal have also been found. The production of silver for the fiscal year ended July 31, 1922, was 780,970 ounces, and of gold 2,432 ounces. The chief requisites for the development of the mining industries are capital and facilities for transport.

Straw hats and cigars are manufactured for local consumption. A very good quality of Panama hat is manufactured in the Departments of Copan and Santa Barbara. There is a large number of small factories of all classes in the Republic.

Commerce.

Imports and exports for 5 years :—

—	1917-18	1918-19	1919-20	1920-21	1921-2
	£	£	£	£	£
Imports . . .	1,435,334	2,079,412	3,858,228	4,180,675	3,201,065
Exports . . .	1,376,079	1,799,322	2,083,418	1,357,147	1,346,601

The exports from Honduras in 1921-22 were : live stock (45,985 U.S. dollars), foodstuffs (4,533,587 dollars), raw materials (33,319 dollars), manufactured articles (37,520 dollars).

COMMUNICATIONS—MONEY, WEIGHTS, MEASURES 1011

The United States takes practically all the exports of Honduras (4,696,253 dollars in 1921-22), and furnishes practically all its imports (10,857,419 dollars).

In February, 1916, Congress agreed to the establishment of a free port, called Puerto Herrera, and built at the point where the Cruta River joins the Bay of Caratasca.

Total trade between Honduras and United Kingdom for 5 years was (according to Board of Trade returns) as follows :—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Honduras . . .	—	540	12,302	38,768	461,688
Exports to Honduras . . .	64,259	72,278	331,816	126,287	147,586

The transport of fruit, &c., to the United States is effected largely by steamships, some of them built for the purpose.

Communications.

In general, travelling and transport are accomplished by means of mules and ox-carts. Slow improvements in road-making and repairing continue to be made. There is a good mail service by automobiles. The two principal roads are the Carretera del Sur from San Lorenzo, on the Pacific Coast, to Tegucigalpa, 84 miles; and the Carretera del Norte, from Tegucigalpa to Comayagua, 63 miles. A third road is being built from Lake Yojoa to Signatepeque, and thence to Comayagua; and a fourth from Tegucigalpa to Juticalpa.

There is a railway of 60 miles (95 kilometres) from Puerto Cortez to Potrerillos; the line, which was taken over by the Government in 1912, has been almost completely overhauled and repaired, and is now in a condition to meet the heavy demands made upon it by the banana crop. The other four railroads are owned and operated by the various fruit companies on the north coast. The Trujillo Railway, which will eventually reach Juticalpa, has about 87 miles completed; the Tela Railway has about 155 miles completed; the Cuyamel Fruit Co. Railway (Department of Cortes) has an extension of 49 miles; and the Vaccaro Brothers' Railway, which is being built towards the town of Yoro, has 160 miles. Total length of line (1921) 556 miles.

In 1920 the country had 877 miles of telephone lines and 4,663 miles of telegraph lines. Number of telephone offices, 664; number of telegraph offices, 277. Number of pieces of mail matter handled in 1920, 4,337,917.

Money, Weights, and Measures.

The silver *peso* or *dollar*, of 100 cents, weighing 25 grammes, 900 fine, is the monetary unit. The fractional silver money consists of 50, 25, 20, 10, and 5 cent pieces. The *real* is also in popular use. It is equivalent to 12½ cents. There are 1-cent and 2-cent copper coins. But the currency is at present almost entirely American paper money. The value of the silver peso is legally fixed at one-half the value of an American dollar.

On May 30, 1922, the Government signed a contract for 25 years with the Banco de Honduras (founded in 1889), whereby the Bank becomes the Bank of the Republic, with a capital of 2,000,000 silver pesos, of which the

Government will provide one-fifth. Present and future notes of the Bank will be recognized as currency. The Banco Atlantida (founded in 1913), which belongs mainly to American interests, also operates in the Republic. Its capital is 500,000 gold dollars.

The metric system of weights and measures has been legal since April 1, 1897, but English pounds and yards and the old Spanish system are still in general use :

1 <i>Vara</i>	= 32 inches.
1 <i>Arroba</i>	= 25 lb.
1 <i>Quintal</i>	= 100 lb.
1 <i>Tonelada</i>	= 2,000 lb.

HUNGARY.

(KINGDOM OF HUNGARY.)

Constitution and Government.

On October 31, 1918, a revolution broke out in Hungary with the object of establishing a Republic and making the country independent of Austria. On November 13 King Charles issued a letter of abdication, and on November 16, 1918, Hungary was proclaimed an independent Republic (Hungarian People's Republic), of which Count Michael Karolyi became Provisional President. The two Houses of the Legislature were abolished, and their place taken by a Provisional National Assembly. The Karolyi régime continued until March 22, 1919, when the Count resigned in consequence of an Entente note in reference to the boundary between Hungary and Rumania. Count Karolyi's Cabinet was succeeded by a Soviet Government, which proclaimed the dictatorship of the proletariat. An opposition Government was, however, soon set up at Arad and Szeged, which with the assistance of the Rumanian army swept away the Soviet Government, and on August 7, 1919, a National Government was again in the Capital. Elections were held on the basis of universal suffrage in January and February 1920, and as a result a *bloc* composed of parties of the Right was returned to power. The new Parliament proceeded to elect a Regent who as long as the throne is not occupied has to exercise the rights of the King.

Regent.—Admiral Nicholas Horthy de Nagybánya. (Elected March 1, 1920).

At the elections held in May and June, 1922, the following parties were returned :—Government Party, 140 ; Ernész Group, 15 ; Heinrich Group, 2 ; Independents, 9. These form the 166 supporters of the Government. The Opposition is made up of 78 members, including 25 Socialists. Total Members of Parliament, 245.

The Ministry was formed on June 17, 1922, as follows :—

Prime Minister.—Count Stephen Bethlen.

Minister (ad interim) of Foreign Affairs.—Geza Daruvary.

Minister of the Interior.—Ivan Rakovsky.

Minister of Finance.—Tibor Kallay.

Minister of Agriculture.—Stephen Szabó.

Minister of Commerce.—Louis Walko.

Minister of Public Instruction.—Dr. Count Kuno Klebelsberg.

Minister of Justice.—Dr. Geza Daruvary.

Minister of National Defence.—General Alexander Belitska.

Minister of Social Welfare.—Dr. Joseph Vass.

On March 23, 1920, a Government Order was issued that Hungary is a Monarchy, that the official style of the Ministry is 'Royal Hungarian Ministry,' that Hungary should be described as a Monarchy in all official documents, and that the Royal Arms were to be adopted again.

II. LOCAL GOVERNMENT.

In Hungary a distinction is observed between communes which are large or small, or may be townships with regular magistrates, and municipalities, which are regarded as communes of a higher order. The communal electoral right is possessed by every male inhabitant over twenty

years of age who for two years has paid the State tax. The representative body is composed half of members elected for six years, and half of persons who pay the highest taxes. The committee consists of members appointed, in the towns for six years, in the rural communes for three years, with officials appointed for life. The counties and cities invested with similar rights are independent municipalities. Each has its council constituted similarly to the representative body of the communes; and the members are elected also for six years. All electors for the Parliament are qualified to vote. In Budapest they must be able to read and write. The executive is in the hands of the official body of the municipality, who sit and vote with the council.

Area and Population.

The Treaty of Trianon, signed on June 4, 1920, and ratified by Hungary on November 13, 1920, mentions in general terms the boundaries of the new State with Austria, Czechoslovakia, Yugo-Slavia and Rumania. The exact boundaries with Yugo-Slavia and Rumania are to be determined by a mixed commission. As a result of negotiations with Austria and of the consequent plebiscite, Hungary has obtained Sopron (Oedenburg) in Western Hungary.

The population of Hungary according to the census of 1921 is 7,945,878, and its area 35,790 square miles.

Vital statistics for 1920:—Births, 211,697; marriages, 88,089; deaths, 146,408.

PRINCIPAL TOWNS, WITH POPULATION IN 1920.

Budapest (Census Jan. 1, 1921)	1,184,616	Hódmezővásárhely . . .	60,854	Győr . . .	50,035
Szeged . . .	109,896	Miskolcz . . .	57,384	Békéscsaba . . .	46,679
Debreczen . . .	103,228	Újpest . . .	55,825	Nyiregyháza . . .	41,112
Kecskemét . . .	72,768	Kispest . . .	50,244	Erzsébetfalva . . .	40,325

Religion.

Religious toleration is one of the fundamental principles of the Hungarian State. There is perfect equality among all legally recognised religions, which include the Roman and Greek Catholic, the Evangelical (Augsburg and Helvetian), the Unitarian, the Greek-Oriental, the Gregorian-Armenian, the Baptist (since 1905), the Jewish, and the Mohammedan (since 1916). Each has the independent administration of its own affairs.

Instruction.

Public education in Hungary comprises the following grades:—(1) Infant schools; (2) elementary schools; (3) industrial and commercial apprentice schools; (4) higher primary and primary schools; (5) training colleges for teachers; (6) middle or secondary schools: gymnasias and realschools, secondary schools for girls; (7) academies (high schools) of law; (8) institutions for religious education; (9) universities; (10) technical high schools, economic, mining, industrial, and commercial special schools.

School attendance is compulsory for children of six to twelve years. There were in the school year 1918 altogether 1,962 infants' schools and permanent foster-homes with 171,867 infants, and 9 training colleges for female teachers of infant schools.

In Old Hungary there were in the school-year 1917-18, 15,390 elementary

schools with 1,737,860 pupils and 28,893 teachers. The number of primary schools was 553, with 138,068 pupils and 4,425 professors. The number of training colleges for teachers and female teachers for elementary schools was 89, and for primary schools 9.

In the middle schools the curriculum extends over eight years. They are maintained by the State, by the larger communes, or (in the case of the denominational schools) by ecclesiastical foundations, with sometimes a subvention from the State. There were in 1917-1918, 186 gymnasia, with 2,949 teachers and 68,236 pupils; 34 realschools, with 615 teachers and 13,394 pupils, and 47 secondary schools for girls, with 855 teachers and 10,442 pupils.

Hungary has four universities and (since 1919) an independent Faculty of Economics at Budapest (19 professors, about 2,400 students in 1922), all maintained by the State. In the winter semester of the year 1917-18 the University of Budapest had 390 professors and 10,732 students; the University of Kolozsvár, 110 professors and 1,730 students; the Universities of Pozsony (Pressburg) 36 professors and 413 students, and Debreczen 40 professors and 638 students—the last two having been founded in 1912. There are also 42 theological colleges, viz., 26 Roman Catholic, 4 Greek Catholic, 3 Greek Oriental, 7 Protestant, 1 Unitarian, and 1 Jewish, with a total of 140 professors and 1,093 students; and 8 law schools with 61 professors and 1,292 students. The technical high school (polytechnicum) in Budapest has 88 professors and 3,115 students. In the school-year 1917-18 there were 68 high commercial schools separately for boys and girls, 1 industrial school of art, 4 high industrial schools. There were 53 industrial schools.

Justice and Crime.

The Supreme Court in Budapest is the highest instance in all civil and criminal matters. As courts of first instance, there are county courts (törvényszékek) with collegiate judgeships; district courts (járásbíróságok) with single judges; and jury courts, (sajtóbíróságok) for press offences, besides an army special court.

Pauperism.

In Hungary poor relief is in the main left to communal administration. In the smaller communes orphans and the indigent are cared for by official guardians and overseers, while in the larger there are poor-houses, the funds being mostly derived from fines and taxes. The number of asylums for paupers and orphans is about 300. The Church and charitable societies also render assistance, and several millions of crowns are annually bestowed in legacies and gifts towards benevolent purposes.

Finance.

Budget estimates for 2 years :—

	1920-21	1921-22
	Korona	Korona
Revenue . . .	10,520,555,804	20,296,193,738
Expenditure . . .	20,210,748,615	26,764,508,209
Deficit . . .	9,690,192,811	6,468,314,471

The ordinary revenue in 1921-22 was given at 18,595,223,070 korona, and the extraordinary revenue at 1,700,970,668 korona, making a total of 20,296,193,738 korona.

Principal items of expenditure (in korona):—Regent's Civil List, 32,230,695; Public debt, 2,825,546,562; Pensions, 517,875,180; Defence, 3,600,000,000; Education, 1,113,770,600.

The public debt of Hungary on December 31, 1920, was given at 54,453,041,000 korona, of which 8,287,835,000 korona are pre-war debt, 32,631,056,000 korona debt incurred during the war, and 13,534,150,000 korona incurred since the armistice.

Defence.

The armed forces of Hungary consist of the National Army, the Police, the Gendarmerie and the Customs Guards.

According to the Treaty of Trianon, Hungary is authorised to maintain an army of 35,000 officers, non-commissioned officers and men. The Treaty laid down that conscription was to be abolished, and consequently recruiting on a voluntary basis has been substituted. All recruits have to undertake to serve in the Army for a minimum period of 12 consecutive years, at least 6 of which are to be with the colours. Officers now serving will continue to do so until they attain the age of 40 years at least. Officers newly appointed must undertake to serve on the active list for a minimum of 20 consecutive years. No reserves or measures for mobilisation are permitted.

Hungary is divided into the following seven military districts:—Budapest, Szombathely, Szekesfehar, Kaposvar, Szeged, Miskolcz, and Debreczen. To each of these districts is allotted a mixed brigade each composed of 1 brigade staff, 1 cavalry squadron, 2 infantry regiments, 1 trench mortar company, 1 field artillery group, 1 cyclist battalion. In addition to the 7 mixed brigades there are the following army troops: 4 hussar regiments, 1 field artillery group, and 3 pioneer battalions.

Hungary has a force of 12,000 gendarmerie and 12,000 police, as well as 4,500 customs guards. The members of this force are under the obligation to serve for a minimum of 6 consecutive years. The authorised armament is as follows:—Gendarmerie: 1 rifle or 1 carbine per man; Police: 1 sword or revolver per man (automatic pistols for 5% of the establishment, *i.e.* 600); Customs Guards: 1 rifle per man.

A force of 3,000 finance guards is also maintained. These are armed with revolvers.

Hungary has no navy or air force, but only eight patrol vessels and ten motor launches on the Danube.

Production and Industry.

The cultivation of the soil is the chief industry of Hungary. The oil is noted for its fertility and the variety of its products. The area and reduction of crops in Hungary in 1920-21 was as follows:—

Crop	Area	Yield	Crop	Area	Yield
	Acres	Quintals		Acres	Quintals
Wheat . . .	2,886,652	14,346,914	Maize . . .	2,166,126	8,052,950
Rye . . .	1,340,425	5,879,867	Tobacco . .	49,200	184,470
Burley . . .	1,183,901	4,661,103	Sugar . . .	102,876	5,429,445
Oats . . .	884,544	3,188,058	Grapes . . .	600,084	—

In Hungary there were in 1920 746,423 horses, 2,221,988 cattle, 1,817,405 sheep, and 3,729,190 pigs.

The total area under forest in Hungary (1920) was 1,357,438 acres.

The production of coal in Hungary was in 1900, 6,575,000 tons; in 1910, 9,036,000 tons; in 1913, 10,274,000 tons; in 1920, 4,956,000 tons; in 1921, 6,119,660 tons. The best quality coal is found in the Mecsek Mountain, in the district of Pecs. Bituminous coal is found at Ajk. Hungary has a considerable number of brown-coal and lignite mines.

Hungary retains important fishery preserves in the Danube and Theiss rivers and in lake Balaton. The latter, situated in the west, is the largest lake in central Europe, being 50 miles long and from 2 to 7 miles broad. Its waters contain plentiful supplies of perch, carp, pike, sheat-fish, shad and other fish. The north shore of Lake Balaton is an important wine-producing district. The best known Hungarian wines come from the hilly country, "Tokay," in the northeast section of New Hungary. Rock salt and the precious metals are also found in the foothill spurs of the Carpathians in this section of Hungary.

The industries of Hungary are based on agriculture. They include milling, distilling, the manufacture of sugar, hemp and flax, and also iron and steel works.

Commerce.

Trade for 2 years is shown as follows :—

Year.	Imports.		Exports.	
	Quantity.	Value.	Quantity.	Value.
	Million Quintals.	Million Korona.	Million Quintals.	Million Korona.
1920 . .	5.4	24,355	5.2	9,502
1921 . .	23.3	43,024	8.4	22,289

For 1921 imports and exports were as follows :—

	Imports.	Exports.
	Million Korona.	Million Korona.
Vegetable products	2,000.3	9,894.5
Animal „	538.8	1,450.9
Mineral „	260.0	45.1
Live animals	512.7	1,339.8
Raw materials for industry and agriculture	3,725.9	1,251.1
Manufactured articles	25,986.3	8,301.6
Total	43,024.0	22,289.0

In 1921, 52 per cent. of the imports came from Czechoslovakia, and 8 per cent. from Austria; of the exports, 57 per cent. went to Austria, and 27 per cent. to Czechoslovakia.

Total trade between Hungary and the United Kingdom in 1922, according to Board of Trade returns :—Imports, 409,535*l.*; Exports, 204,982*l.*

Internal Communications.

The length of railways in Hungary in March, 1922, was 7,230 kilometres

or 4,493 miles, of which 1,858 are owned by the State. Of the total 965 kilometres or 598 miles are double track.

Number of Hungarian post-offices, 2,156.

Money and Credit.

The korona is the unit of currency. Pre-war value, 24 korona = 1*l*.

Notes of the Austro-Hungarian Bank circulating in Hungary on December 31, 1922, amounted to 25,174,941,187 korona. The Hungarian Government in a decree issued on March 18, 1920, ordered the stamping of Austro-Hungarian bank notes circulating in Hungarian territory. This order was issued in conformity with a clause in the draft of the peace treaty and is effective with regard to all currency circulating in Hungary except the following: Notes of 1 and 2 korona issued by the Austro-Hungarian Bank; notes of 5, 10, and 20 korona issued by the Hungarian Postal Savings Bank; falsifications of 25 and 200 korona notes of the Austro-Hungarian Bank printed by the Bolshevik Government; and certain old notes which have been recalled by the Austro-Hungarian Bank, some of which are still in circulation.

The metric system of weights and measures is in use.

Diplomatic Representatives.

1. OF HUNGARY IN GREAT BRITAIN.

Envoy and Minister.—Count Ladislas Szápáry. Appointed March, 1922.

Counsellor.—William de Ruttkay.

Attaché.—Antoine de Balásy.

Secretary of Chancery.—E. Joseph Bolgár.

2. OF GREAT BRITAIN IN HUNGARY.

Envoy and Minister.—Thomas Beaumont Hobler, C.B., C.M.G. Appointed January 5, 1920.

Secretaries.—John Balfour and D. J. Cowan.

Commercial Secretary.—R. J. E. Humphreys.

Consul at Budapest.—B. P. Sullivan.

ITALY.

(REGNO D'ITALIA.)

Reigning King.

Vittorio Emanuele III., born November 11, 1869, the only son of King Umberto I. of Italy and of Queen Margherita; succeeded to the throne on the death of his father, July 29, 1900; married October 24, 1896, to *Elena*, born January 8, 1873, daughter of Nicholas, King of Montenegro; offspring, Princess *Jolanda*, born June 1, 1901; Princess *Mafalda*, born November 19, 1902; Prince *Umberto*, Nicola Tommaso Giovanni Maria, Prince of Piedmont and Heir Apparent, born Sept. 15, 1904; Princess *Giovanna*, born November 13, 1907; Princess *Maria*, born December 26, 1914.

Mother of the King.

Queen *Margherita*, born November 20, 1851, the only daughter of the late Prince Ferdinando of Savoy, Duke of Genoa, married, April 22, 1868, to Umberto of Savoy, Prince of Piemonte (King of Italy, 1878), widow July 29, 1900.

Uncle of the King.

Prince *Tomaso Alberto Vittorio*, of Savoy, Duke of Genoa, born February 6, 1854.

Cousins of the King.

Prince *Emanuele Filiberto*, of Savoy, Duke of Aosta, born January 13, 1869, married, June 25, 1895, to Princess *Elena*, d'Orleans, daughter of the late Comte de Paris; offspring, Prince *Amedeo Umberto*, Duke of Apulia, born October 21, 1898, and Prince *Aimone*, Duke of Spoleto, born March 9, 1900; Prince *Vittorio Emanuele*, of Savoy-Aosta, Count of Turin, born November 24, 1870; Prince *Luigi Amedeo*, of Savoy-Aosta, Duke of the Abruzzi, born January 30, 1873—children of the late Prince Amedeo of Savoy, Duke of Aosta, from his union with Maria Vittoria, Princess of Pozzo della Cisterna, who died November 8, 1876.

Most genealogists trace the origin of the reigning house to a German Count Berthold, who, in the eleventh century, established himself on the western slope of the Alps, between Mont Blanc and Lake Leman. In the end of the eleventh century the Count of Savoy acquired the countries of Turin and Susa. Count Amadeus, in 1383, founded a law of primogeniture which led to the immediate acquisition of the territory of Nice. In 1416 the Counts of Savoy adopted the title of Duke; in 1418 they acquired the Principality of Piedmont; and in 1713 they obtained the island of Sicily, with the title of King. Sicily had to be exchanged, in 1720, for the isle of Sardinia, to which henceforth the royal dignity remained attached. The Genoese territory was added at the peace of 1815. The direct male line of the House of Savoy died out with King Carlo Felice in 1831, and the crown fell to Prince Carlo Alberto, of the house of Savoy-Carignano, a branch founded by Tommaso Francesco, born in 1596, younger son of Duke Carlo Emanuele I. of Savoy. King Carlo Alberto abdicated the throne March 23, 1849, in favour of his son, the late King Vittorio Emanuele II., who, by the Peace of Zürich, November 10, 1859, obtained Lombardy, with the exception of Mantua and a part of the surrounding territory. On March 11, 1860, annexation to Sardinia was voted by *plebiscites* in Parma, Modena, the Romagna, and Tuscany; on October 21, Sicily and Naples (including *Benevento* and *Pontecorvo*, part of the Papal States), and on November 4, the Marches and Umbria. The first Italian Parliament assembled in February 1861, and declared (March 17, 1861) Vittorio Emanuele King of Italy. The remaining part of the province of Mantua and Venetia were added in 1866. Finally, the remaining part of the Papal States (province of Rome), having been taken possession of by an Italian army (September 20, 1870), after the

withdrawal of the French garrison, was annexed to the Kingdom by *plébiscite* on October 2.

The civil list has been settled at 16,050,000 lire.¹ From this amount the children of the late Prince Amedeo, Duke of Aosta, receive jointly allowance of 400,000 lire; Prince Tomaso, Duke of Genoa, an allowance of 400,000 lire; and Queen Margherita, an allowance of 1,000,000 lire.

The greater part of the private domains of the reigning family were given up to the State in 1848.

Constitution and Government.

The present Constitution of Italy is an expansion of the 'Statuto fondamentale del Regno,' granted on March 4, 1848, by King Charles Albert to his Sardinian subjects. According to this charter, the executive power of the State belongs exclusively to the Sovereign, and is exercised by him through responsible ministers; while the legislative authority rests conjointly in the King and Parliament, the latter consisting of two Chambers—an upper one, the Senate, and a lower one, called the 'Camera de' Deputati.' The Senate is composed of the princes of the royal house who are twenty-one years of age (with the right to vote when twenty-five years of age), and of an unlimited number of members, above forty years old, who are nominated by the King for life; a condition of the nomination being that the person should either fill a high office, or have acquired fame in science, literature, or any other pursuit tending to the benefit of the nation, or, finally, should pay taxes to the annual amount of 3,000 lire, or 120*l*. On January 1, 1922, there were 393 senators and 9 members of the royal family. The electoral law of December 1920, made the suffrage universal for men and women 21 years of age, and also for men aged less than 21 years who have performed military service during the war. The Electoral Reform Act of 1919 introduced the principle of proportional representation and *scrutin de liste*. The number of deputies is 535, or 1 to every 71,000 of the population (census 1911). In 1921 the number of enrolled electors was 11,821,168 (34 per 100 inhabitants without distinction of sex or age) inclusive of the electors temporarily disfranchised on account of military service. For electoral purposes the whole of the Kingdom is divided into 508 electoral colleges or districts, and these again into several sections (19,508). A deputy must be thirty years old, and have the requisites demanded by the electoral law. Incapable of being elected are all salaried Government officials, as well as all persons ordained for the priesthood and filling clerical charges, or receiving pay from the State. Officers in the army and navy, ministers, under-secretaries of State, and various other classes of functionaries high in office, may be elected, but their number must never be more than forty, not including the ministers and the under-secretaries of State. All deputies receive 15,000 lire (600*l*.) annually, and all deputies and senators travel gratis on the railways.

Lower House, elected May, 1921: Constitutionalists, 275; Socialists, 122; Catholics, 107; Communists, 16; Republicans, 7; Germans, 4; and Slavs, 4.

The duration of a Parliament is five years, and it must meet annually; but the King has the power to dissolve the lower House at any time, being bound only to order new elections, and convoke a new meeting within four months. Each of the Chambers has the right of introducing new bills, the same as the Government; but all money bills must originate in the House

¹ The amount of the civil list is, in fact, 15,050,000 lire, because the King repays to the State the annuity settled on Queen Margherita by law of December 6, 1900.

of Deputies. The ministers have the right to attend the debates of both the upper and the lower House; but they have no vote unless they are members. No sitting is valid unless an absolute majority of the members are present.

The executive power is exercised, under the King, by a ministry. The ministry, constituted October 30, 1922, is as follows:—

President of the Council, Minister of the Interior and of Foreign Affairs (ad interim).—Signor Benito Mussolini (Fascista).

Minister for the Colonies.—Signor Luigi Federzoni (Nationalist).

Minister of Justice.—Signor Aldo Oviglio (Fascista).

Minister of Finance and (interim) of the Treasury.—Signor Alberto De Stefani (Fascista).

Minister of War.—General Armando Diaz duca della Vittoria.

Minister of Marine.—Admiral Thaon de Revel.

Minister of Public Instruction.—Signor Giovanni Gentile (Democrat).

Minister of Public Works.—Signor Gabriele Carnazza (Nationalist).

Minister of Agriculture.—Signor Giuseppe de Capitani (Fascista).

Minister of Industry and Commerce.—Signor Teofilo Rossi (Nationalist).

Minister of Labour.—Signor Stefano Cavazzoni (Popular Party).

Minister of Posts and Telegraphs.—Signor Giovanni Colonna di Cesaro (Nationalist).

Minister of the Liberated Provinces.—Signor Giovanni Giuriali (Fascista).

LOCAL GOVERNMENT.

The administrative divisions of Italy are provinces (69), territories or circondari (214), districts or mandamenti (1805), and communes.

In 1923 (January 1) there were 8,366 communes. The two principal elective local administrative bodies are the communal councils and the provincial councils. According to the law of February 4, 1915, each commune has a communal council, a municipal council, and a syndic. Both the communal councils and the municipal councils vary according to population, the members of the latter being selected by the former from among themselves. The syndic is the head of the communal administration, and is a Government official; he is elected by the communal council from among its own members, by secret vote. Each province has a provincial council and a provincial commission, the numbers varying according to population. The council elects its president and other officials. The provincial commission is elected by the council from its own members. It conducts the business of the province when the latter is not sitting. Both communal and provincial councillors are elected for 4 years. The communal council meets twice and the provincial once a year in ordinary session, though they may be convened for extraordinary purposes. All communal electors are eligible to the council except those having an official or pecuniary interest in the commune. Electors must be Italian citizens, resident in the kingdom, or belonging to Italian provinces outside Italy, and be on the Parliamentary electoral list.

In 1920 the number of enrolled *administrative* electors was 11,950,756 (33·1 per cent. of population).

Area and Population.

The following figures show the increase of the population of the present territory of the Kingdom of Italy.

Year (1 Jan.)	Population	Increase per cent. per annum	Year (1 Jan.)	Population	Increase per cent. per annum
1816	18,383,000	—	1917	36,755,764	0·24
1872 ³	26,801,154	0·720	1918	36,557,615	0·54
1882 ³	28,459,628	0·619	1919	35,970,464	1·61
19011 ³	32,475,253	0·738	1920	36,099,657	0·36
19112 ³	34,671,877	0·658	1921 ^{3,4}	38,835,941	—

¹ February 10.

² June 10.

³ Census Figures.

⁴ December.

As a result of the Treaty of St. Germain there has been a considerable rearrangement of the Italo-Austrian frontier, and Italy has obtained large tracts of what were formerly Austrian lands. (See below, p. 1055.)

In the following table areas of 19 provinces marked with an asterisk are definitely ascertained by the Government Survey Department; the others are estimated by the General Statistical Department:—

Provinces and Departments.	Area in square miles	Population Present				Population per square mile, 1921
		Census 1882, Jan. 1	Census 1901, Feb. 10	Census 1911, June 10	Census 1921, Dec. 1

Emigrants.—Total number in 1921, 255,166, of whom 60,846 went to other European countries or those bordering on the Mediterranean, and 194,320 to countries overseas.

The number of Italians who returned to Italy was :—In 1921, 92,212 (of whom 71,974 were from the United States).

PRINCIPAL TOWNS.

The numbers of inhabitants at the different centres do not in Italian statistics afford a sufficient basis for distinguishing between the urban and rural population. In Northern Italy the population is scattered over the country and there are few centres. In Southern Italy and in the islands the country people live in the towns, coming and going to cultivate their own plots of land ; consequently there are many populous centres where, if numbers alone were considered, the population would be regarded as urban, though it is, in truth, almost exclusively rural. The following statement gives the classification of communes according to resident population on December 31, 1920, on the basis of the 1911 census :—

	Number	Population	Per 1,000
Communes with population over 100,000	13	3,913,958	109·2
From 50,001 to 100,000	30	1,976,361	55·2
From 30,001 to 50,000	50	1,909,536	53·2
From 20,001 to 30,000	99	2,336,556	65·2
From 15,001 to 20,000	96	1,632,038	45·5
Others	8,070	24,676,599	671·7
Total	8,358	35,845,048	1,000·0

According to Census of December 1, 1921, the communal population of the capitals of provinces was as follows :—

Communes	Population	Communes	Population	Communes	Population
Napoli	780,220	Messina	176,794	Reggio Emilia	82,908
Milano	718,304	Venezia	171,665	Modena	82,487

Religion.

The Roman Catholic Church is, nominally, the ruling State religion of Italy; but the power of the Church and clergy is subordinated to the civil government, and there is freedom of worship to the adherents of all recognised religions. The census returns of 1911 were as follows:—

Profession	Total	Per cent.
Roman Catholics	32,983,664 ¹	95.13
Evangelical Protestants	123,253	0.36
Jews	34,324	0.11
Other professions	2,200	—
Not professing any religion	874,532	2.52
Not known	653,404	1.88
Total	34,671,377	100.00

¹ See also Rome, See and Church of.

Of the Protestants, 22,500 belonged to the Waldensian Church of Piedmont, about 10,000 to the other Evangelical Italian Churches, and 30,000 to foreign Protestant bodies.

Italy is divided into 13 apostolical provinces, comprising 272 episcopal jurisdictions, viz., 1 patriarchate (Venice), 49 archbishoprics, 6 cardinal bishoprics, and 216 bishoprics, 11 abbeys, and a number of prelates without dioceses. Every archbishop or bishop is appointed by the Pope, on the advice of a committee of Cardinals; but the royal *exequatur* is necessary for his installation. In 1911, the number of parishes was 20,707. According

to the census, 1911, the secular clergy numbered 67,147: the regulars (monks, lay-brothers, nuns, &c.), 45,253; sacristans, &c., 10,761; persons employed at the Pontifical and Episcopal Courts, &c., 284¹. There were in 1911, 358 Evangelical pastors and ministers, and 54 Jewish Rabbis.

The suppression of the religious corporations began for the old provinces in 1855, and was continued for the whole of the country by a law of July 7, 1866, and completed by the law of June 19, 1873, which extended the measure to the city and province of Rome. Of the monastic edifices some were occupied by the State, others assigned to communes or provinces. The corporations of Lombardy were privileged by the treaty of Zürich, and their lands and houses were left to the disposal of their individual members. The administration of the revenue from the proceeds of land destined for charity or instruction now belongs to the communes; that from monastic parish church property in Rome, to the parish churches; that from property of foreign religious orders in Rome (400,000 lire) to the Holy See; while the remainder is administered by two institutes which pay the pensions and other dues, and provide (1) for beneficent work and for worship in Rome; and (2) for worship in the rest of Italy.

Instruction.

The State regulates public instruction, and maintains, either entirely or in conjunction with the communes and provinces, public schools of every grade.

Schools in Italy may be classified under four heads, according as they provide: (1) elementary instruction; (2) secondary instruction—classical; (3) secondary instruction—technical; (4) higher education.

(1) Schools providing elementary instruction are of two grades. Religious instruction is given to those whose parents request it. Only the *lower-grade* instruction is compulsory. Every commune must have at least one lower-grade school for boys and one for girls; and no school with only one master should have more than seventy pupils. Higher-grade elementary schools are required in communes having normal and secondary schools, and in those with over 4,000 inhabitants. In both grades the instruction is free. The age-limit of 6 to 9 exists for communes where there is no higher elementary school, but where there is such higher school, children are required to attend till they have completed the course of instruction, the compulsory age being thus raised to 12 years. This law provides that illiterate persons shall be under various disabilities.

(2) Secondary instruction—classical—is provided in the *ginnasi* and *licei*, the latter leading to the universities.

(3) Secondary instruction—technical. This is supplied by the technical schools, technical institutes, and institutes for the mercantile marine.

(4) Higher education is supplied by the universities, by other higher institutes, and by special higher schools.

According to the census of 1911 the smallest percentage of illiterates above six years was in Piedmont, male 9·1, female 12·8 (male and female 11·0); and the largest in Calabria, male 59·5, female 78·1 (male and female 69·6). Since then there has been much improvement, and now there are *circondari* (arrondissements), e.g. Domodossola Pallanza, and Varallo in the province of Novara, and others in the provinces of Turin, Como, Cuneo, &c., where all young people twenty years of age can read and write.

¹ If this total are not comprised the priests, monks, nuns, etc., engaged in education (males, 1,343, females, 3,860), or as nurses (males, 450, females, 3,147).

Besides the universities there are also three institutions of university rank—the Institute of Higher Education in Florence ; the Royal Scientific and Literary Academy in Milan ; and the Higher Technical Institute of Milan.

There were, also, six higher institutes for commercial education (Turin,

Genoa, Milan, Venice, Rome, and Bari), with 4,916 students in 1919-20; three higher schools of agriculture (Milan, Perugia, and Portici) with 905 students; five engineering colleges (Turin, Milan, Bologna, Rome and Naples) with 8,426 students; the higher naval college at Genoa with 437 students; the high school of forestry in Florence, with 20 students (1914-15); the school of social science in Florence, with 131 students (1919-20); the school for Oriental languages in Naples, with 167 students; 3 veterinary colleges (Turin, Milan, and Naples) with 351 students; 3 women's training colleges (Florence, Rome, and Naples), with 1,165 students.

In 1919 there was set up a national institute for the instruction of illiterate adults.

Justice and Crime.

Italy has 5 Courts of Cassation (4 of which have jurisdiction exclusively in civil matters), and is divided for the administration of justice into 20 appeal court districts, subdivided into 162 tribunal districts, and these again into mandamenti, each with its own magistracy (*Pretura*), 1,535 in all. In 12 of the principal towns there are also *Pretori urbani* (15), who have jurisdiction exclusively in penal matters. For civil business, besides the magistracy above-mentioned, *Conciliatori* have jurisdiction in petty plaints.

The *Pretori* have jurisdiction concerning all misdemeanours (*contravvenzioni*) and offences (*delitti*) punishable by imprisonment (reclusion and detention) not exceeding six months, or banishment not exceeding one year, or by fine not exceeding 2,000 lire. The penal Tribunals have jurisdiction in the first instance in offences (*delitti*) for which the Code establishes a *minimum* penalty not exceeding five years of imprisonment and a *maximum* not exceeding ten years, or in offences punishable by a fine, exceeding 2,000 lire.

The Courts of Assize, which in all cases have juries, have jurisdiction in all proceedings concerning serious offences punishable by imprisonment for life (*ergastolo*), or by imprisonment (reclusion and detention) exceeding in the *minimum* five years, and in the *maximum* ten years. They have exclusive jurisdiction (save that the Senate is, on occasion, a high Court of Justice) concerning offences against the internal and external security of the State, and all press offences. Appeal is allowed to the penal Tribunals from the sentences of the *Pretori*, and to the Courts of Appeal from those of the penal Tribunals. There is no appeal from sentences of the Courts of Assize. The Court of Cassation in Rome has power to annul, for illegality, sentences passed by the inferior magistracy and to decide questions of jurisdiction or competency.

Statistics of persons convicted of offences of all kinds:—

Year	Convictions			
	Total	Before the Pretori	Before the Tribunali (first instance)	Before the Corti d'Assise
1917	423,707	382,838	39,616	1,253
1918	337,398	297,312	38,942	1,144
1919	265,493	220,844	43,434	1,215
1920	357,080	303,674	51,694	1,712

In 1919 (January 1) there were 28,492 males and 2,839 female prisoners; and 8,091 males and 1,341 females were placed in reformatories. At that

date there were 167 central and arrondissement prisons, 70 penal establishments, 32 reformatories, and 8 colonies for persons under domiciliary restraint. There were, besides, 1,239 cantonal prisons.

Pauperism.

In Italy legal charity, in the sense of a right in the poor to be supported by the parish or commune, or of an obligation on the commune to relieve the poor, does not exist. Public charity in general is exercised through the permanent charitable foundations, called 'Istituzioni pubbliche di beneficenza' (Opere pie), regulated by the law of July 17, 1890. The general results of an inquiry in 1900 were:—Leaving out of account institutions intended for lending, or for the encouragement of saving (that is, monti di pietà, monti frumentari, casse di prestanze agrarie), there were 27,078 opere pie, with a gross capital of about 2,205,000,000 lire. Their net income amounted to 52,559,000 lire. Added to this net income were casual legacies, contributions from private benefactors, subsidies from communes (for hospitals), &c., all of which receipts are spent annually, and thus the sum at the disposal of the opere pie in 1900 (last available data) amounted to 120,765,000 lire. Between 1901 and 1917 the capital of all the benevolent institutions was increased by 385 million lire. On December 31, 1920, the charitable foundations numbered 33,117, and their capital was 2,742,887,315 lire.

Finance.

Revenue and Expenditure.

Direct taxes are those on lands, on houses, and on incomes derived from movable capital and labour. The tax on houses is at the rate of 12·5 per cent. (with three-tenths additional) of the amount taxable, which is two-thirds of the real annual value in the case of factories, and three-fourths in the case of dwelling houses. The tax on incomes from movable wealth was raised to 20 per cent. of the amount taxable. The communes and provinces also tax lands and buildings. The State grants to the communes one-tenth of the proceeds of the tax on incomes as compensation for other communal revenues made over to the State by various laws.

The principal indirect taxes are:—the customs duties, the octroi, the taxes on manufactures, the salt and tobacco monopolies, lotto.

Total revenue and expenditure for five years (25 lire = 1*l.*):—

Years ending June 30	Total Revenue	Total Expenditure	Difference

Treasury ordinary bonds (interest)	—	1,500,000,000	—	—
Current accounts (interest)	—	44,000,000	—	—
Advances by the Bank	—	21,400,000	—	—
Total		1,565,400,000	—	—

¹ By-law of May 1, 1912, the interest on the 5 p.c. (gross) and 4 p.c. (net) consolidated debts is reduced from 3½ p.c. (net) to 3½ p.c.

The capital (nominal) of the consolidated and redeemable debt amounted to 72,574,300,000 lire on July 1, 1920, and the interest to 3,542,000,000 lire. On June 30, 1920, the property of the State was as follows :—

	Estimated Value, Lire.
Financial assets (Treasury)	36,003,122,315
Property, immovable, movable, loans, and various titles	5,025,829,673
Property of industrial nature	5,725,399,003
Material in use in army and navy	4,200,257,459
Property used in the service of the State	1,205,815,206
Scientific and artistic material	275,352,600
Gold in dépôt	3,263,405
Total	52,439,039,661

In the financial year 1917-18 the revenue from State property was :— Ecclesiastical, 284,169 lire ; from fixed capital, 8,687,369 lire ; from the Cavour Canals, 3,614,550 lire ; from railways, 4,242 lire ; various, 8,187,445 lire ; total, 20,777,775.

Defence.

I. FRONTIER.

The extent of the land frontier of Italy is as follows :—French frontier 300 miles ; Swiss 418 ; Austrian 566 ; frontier of San Marino 24 ; in all (exclusive of San Marino) 1,284 miles. The coast line of the peninsula measures 2,052 miles ; of Sicily, 630 ; of Sardinia, 830 ; of Elba and the small islands, 648 ; the total length of coast is thus 4,160 miles.

On the Continental frontier of Italy the principal passes of the Alps are defended by fortifications. The basin of the Po is also studded with fortified places ; the chief strong places in the region are the following :—Casale, Piacenza, Verona, Mantua (these two belong to the old Austrian Quadrilateral), Venice, Alessandria. On the coasts and islands are the following fortified places :—Vado, Genoa, Spezia, Monte Argentaro, Gaeta ; works in the Straits of Messina, Taranto. To the north of Sardinia a group of fortified islands form the naval station of Maddalena. Rome is protected by a circle of forts.

II. ARMY.

Service in the army (or navy) is compulsory and universal. The total period is 19 years, beginning at the age of twenty. The young men of the year are divided into 3 categories ; the first being posted to the permanent army ; the second also to the permanent army but with 'unlimited leave' ; and the third, that is those exempted from active service, to the territorial militia. The second category men form what is called the 'complementary force.'

The term of service in the ranks of the permanent army is 2 years for all arms. After passing through the ranks, the men are placed on 'unlimited leave,' i.e., they are transferred to the reserve, in which they remain until they have completed a total of 8 years' service. From the reserve the soldier passes to the mobile militia, the term of service in which is 4 years. After completing his time in the mobile militia he is transferred to the territorial militia, in which he remains 7 years ; thus finishing his military service at the age of 39.

The second category recruits are regarded as belonging to the permanent army for the first 8 years of their service. During this period they receive from 2 to 6 months' training, which may be spread over several years. They then pass to the mobile militia, and afterwards to the territorial militia, the periods of service in each being the same as in the case of the first category soldiers. The men allotted to the third category, who are posted at once to the territorial militia, receive 30 days' training.

In Italy each regiment receives recruits from all parts of the country, and the troops change their stations by brigades every four years. On

mobilisation regiments would be filled up by reservists from the districts in which they are quartered at the time. Reliefs are so arranged that at least half the reservists shall have previously served in the unit which they would join on mobilisation.

The field army is organized into 10 Territorial Army Corps, sub-divided into 30 divisions and 2 cavalry divisions, and includes—the General Staff and Commands of the larger units, the Royal Carabinieri, Infantry, Cavalry, Artillery, Engineers, Aerial Corps, the Military Districts, Invalid and Veteran Corps, Mechanical Transport, Railway Transport, Medical Corps, Supply Corps, Administrative Services, Veterinary Corps, the Military Schools, Institutes and various Technical establishments, the Army and Navy Supreme Tribunal and the Military Penal Establishments.

Besides the above-mentioned units permanently maintained on service, other units and corps that are generally formed at time of mobilisation for instructional duties of a temporary nature, or for internal duties, will form part of the Royal Army. The establishment of the active army in 1922 was 210,000 men. It is proposed to increase this in 1923 to 250,000.

The army corps consists of 2 divisions, the divisions of 2 brigades of infantry each of 3 battalions, and of artillery, engineers and auxiliary services. A regiment of Bersaglieri and a proportion of heavy artillery will be attached to each army corps.

Each regiment of Bersaglieri (light infantry) consists of 3 battalions of infantry and 1 battalion of cyclists, the cyclists being intended to supplement the cavalry in the field. The Alpini are frontier troops, specially organised to defend the mountain passes leading into Italy; they consist of 8 regiments (26 battalions) of Alpine infantry, and 2 regiments of 36 mountain artillery batteries.

Cavalry divisions each consist of 2 brigades of 2 regiments and of a horse artillery regiment. Each cavalry regiment comprises regimental headquarters, 2 squadron groups and 1 depot squadron.

The regiments of field artillery, heavy field artillery, heavy and coast artillery each comprise 1 headquarters, 4 groups and a depot. The mechanically transported artillery is composed of a headquarters, 5 groups and a depot. The regiment of horse artillery comprises 1 headquarters, 2 groups and a depot.

The Carabinieri are a force of military police. They are recruited by selection from the army, and remain in the force for 3 years. They then serve in the reserve of the Carabinieri for 4 years, after which they are transferred to the territorial militia for the remainder of their service, and are reckoned as a part of the army. In 1923 the Carabinieri numbered 60,000; the public safety police 30,000 and the Customs Guards 30,000.

The garrison of Libya consists of 3 infantry battalions, 4 companies mounted infantry, 2 field batteries and 2 mountain batteries as colonial troops recruited voluntarily in Italy for 3 years' service. The native army is to consist of 12 battalions, 6 squadrons, 6 mountain batteries, 3 camel squadrons, etc.

The Italians have a special African corps in Erythrea, consisting of 3 companies of white infantry and 10 native battalions; also 1 squadron of native cavalry, a local company of artillery (Italians), and a native mountain battery. Its total strength is about 8,600 of all ranks.

In Italian Somaliland there is a native corps of 15 infantry companies, 1 camel company and 1 artillery company, with Italian officers, and a body of military police. Total strength about 4,700 of all ranks.

III. NAVY.

The future of the Italian Navy is quite uncertain, but no great developments are possible. The Treaty of Washington, which makes Italy the equal of France in capital ship tonnage, has now been ratified, and the Government contemplates naval re-organization. The replacement tonnage is fixed at 175,000 tons (177,800 metric), and the existing ships are returned at a total of 182,800 metric tons, but this is brought about by including the four ships of the *Roma* class, which are in no sense capital ships, and had been condemned. The *Leonardo da Vinci*, which having been sunk, has been repaired and restored to the list. Italy may begin to build capital ships, if she should so desire, in 1927, but there will be no compulsory scrapping until 1931.

The Navy underwent complete revision and much reduction after the Armistice. The armoured cruisers are of little value. The list of light cruisers has been expanded by the accession of five enemy vessels. No large shipbuilding is contemplated, and all attention is directed to the flotillas, and to the naval air service. In the 1923-24 programme are 2 light cruisers, 4 destroyers and 4 submarines, and the same programme is to be repeated in 1924-25. Mine-layers and other vessels are also in the programme. There have been considerable reductions in the *personnel*. The expenditure in 1921-22 was estimated at about 34,000,000*l.* at pre-war rates, and in 1922-23 there is a reduction to 24,600,000*l.*

The naval administration is under the Minister of Marine, with an assistant secretary; a Chief of the Staff; a Superior Board which controls the general administration and advises on policy. Under its direction are the heads of the various services of the *personnel*, naval constructors (*Genio Navale*), ordnance, equipment, engineering, and civil administration. A civil officer administers the department of the merchant marine, which is under the direction of the assistant secretary for the navy. For purposes of local naval administration and defence the Italian littoral is divided into the following commands: Spezia, Taranto, and Pola. Venice and Naples have been reduced. There are torpedo stations all round the Italian coasts. Summary of the Italian navy:—

	Completed at end of		
	1920	1921	1922
Dreadnoughts	5	5	6
Pre-Dreadnoughts	4	4	4
Armoured cruisers	5	3	3
Light cruisers, scouts and flotilla leaders	20	18	17
Flotilla leaders and destroyers	49	65	62
Torpedo boats	86	91	81
Submarines	50	46	43

The four pre-Dreadnoughts included in the summary and in the following table are to be sold, also the two older armoured cruisers.

The tables which follow of the Italian fleet are arranged after the manner of other similar tables in this book.

BATTLE FLEET.

First of class laid down	Name	Displace- ment.	Armour		Principal Armament	Torpedo Tubes	Indicated horse-power	Max. speed
			Belt	Big guns				

Dreadnoughts.

1909	Dante Alighieri	19,000	9½	9½	12 12in. ; 20 4.7in.	3	34,000	knots 23

1911	Libia	4,394	—	—	2 6in. ; 8 4.7in.	2	12,500	22
1912	CampANIA	2,444	—	—	6 6in. ; 5 2in.	2	5,000	16.5
1911	Marsala	3,500	—	—	6 4.7in.	2	25,000	28
1911	Nino Bixio							
1912	Quarto	4,842	—	—	7 5.9in. ; 3 4in.	2	26,000	27.5
1912	Ancona							
1912	Taranto	4,480	—	2	7 5.9in. ; 2 3.4in.	2	34,000	28
1913	Bari	4,320	—	—	8 5.9in. ; 2 3in.	5	27,400	27.5
1911	Brindisi	3,444	—	—	8 3.9in.	3	25,000	27
1911	Venezia							

The five cruisers last named are ex-enemy vessels. Older Italian cruisers are the *Lipuria* and *Puglia*. There are 8 modern scouts or flotilla leaders, ranging upward from 1,000 tons to 2,500 tons, and a speed from 28 to 32 knots. One of them is the *Premuda*, ex-German V. 116. Twelve of the light cruisers and other smaller vessels are equipped as mine-layers and carry large supplies.

The large flotillas of destroyers are composed of 30 and 35 knot vessels, very effective in character, and there are flotillas of quite modern torpedo-boats. Considerable additions are being made. The destroyers include 2 ex-German and 7 ex-Austrian. The naval flying service is being developed.

Monitors and armed pontoons: *Faà Di Bruno*, *Carso*, *Cucco*, and *Vodice*, 1,650 tons.

The *personnel* normally consists of over 1,000 officers and 40,000 men, but the numbers have been greatly reduced.

Production and Industry.

I. AGRICULTURE.

The systems of cultivation in Italy may be reduced to three:—1. The system of peasant proprietorship (*coltivazione per economia o a mano propria*); 2. That of partnership (*colonia parziaria*); 3. That of rent (*affitto*). Peasant proprietorship is most common in Piedmont and Liguria, but is found in many other parts of Italy. The system of partnership or *colonia parziaria*, more especially in the form of *mezzadria*, consists in a form of partnership between the proprietor and the cultivator. This system is general in Tuscany, the Marches, and Umbria. Large farms (*la grande coltura*) exist in the neighbourhood of Vercelli, Pavia, Milan, Cremona, Chioggia, Ferrara, Grosseto, Rome, Caserta, and in Apulia, the Basilicata, Calabria, and at Girgenti and Trapani in Sicily. In Italy generally the land is much subdivided.

The area of Italy comprises 71,652,592 acres. Of this area 65,995,000 acres are under crops and 5,662,500 acres are waste.

Number of proprietors in Italy, 1911:—Proprietors of lands, 1,326,736; of buildings, 732,484; of lands and buildings, 1,737,341; total, 3,796,561. Proprietors of lands and buildings (3,796,561) per 100 of population, 11; proprietors of lands (3,064,077) per square mile, 27.

The principal crops for 3 years were as follows:—

	Acreage			Produce in cwt.		
	1920	1921	1922	1920	1921	1922
Wheat . . .	11,362,000	11,927,000	11,403,665	76,932,000	102,400,000	87,400,000
Barley . . .	500,000	550,000	538,678	2,556,000	4,800,000	3,350,000
Oats . . .	1,172,500	1,200,000	1,191,022	7,032,000	11,000,000	8,660,000
Rye . . .	285,750	290,000	281,694	2,306,000	2,600,000	2,420,000

¹ Produce in thousand gallons.

In 1918 Italy had 989,786 horses, 949,162 asses, 496,743 mules, 6,239,741 cattle, 24,026 buffaloes, 2,338,926 pigs, 11,753,910 sheep, and 3,082,558 goats.

Silk culture, though flourishing most extensively in Lombardy, Piedmont and Venetia, is carried on all over Italy. In 1922 the silk cocoon crop was 31,100 tons. On June 30, 1920, there were 670 silk spinning mills and 164 weaving mills, the latter employing 23,759 operatives (21,851 women).

In the year 1898-99 there were only 4 sugar factories, with an output of 5,972 metric tons; in 1920-21 there were 34 their output being 124,391 tons.

The value of the output of industrial chemical products in 1915 was 215,093,928 lire (in 1893, 26,134,000 lire).

II. FORESTRY.

The forest area (belonging to the State) on June 30, 1921, was 115,629 hectares (289,072 acres). The yield from these forests was valued as follows in 1920-21:—Timber, 26,933 cubic metres; firewood, 248,960 cubic metres, of a total value of 3,724,282 lire.

This total is exclusive of secondary produce valued at about 55 millions of lire annually. The forest produce thus amounts to 225 millions of lire. From 1867 to June 30, 1915, 33,555 hectares were replanted by or with assistance from the Government.

III. MINES AND MINERALS.

The Italian mining industry is most developed in Sicily (Caltanissetta), in Tuscany (Arezzo, Florence, and Grosseto), in Sardinia (Cagliari, Sassari, and Iglesias), in Lombardy (particularly near Bergamo and Brescia), and in Piedmont.

Production in metric tons (1 metric ton = 2,204 lbs., or 1,016 metric tons = 1,000 English tons) of metallic ores and other minerals in 1920:—

Ores, &c.	Productive mines	Metric tons	Lire	Workers
Iron	59	339,876	17,434,330	2,660
Manganese	25	36,158	3,880,540	618
Copper	4	14,450	1,529,496	552
Zinc	111	95,985	46,720,102	10,769
Lead		40,634	40,718,330	
Gold ¹	—	—	—	—
Antimony	7	882	189,057	290
Mercury	9	1,401	43,776,000	2,605

Sulphur ore	453	296,099	172,700,720	23,088
Asphaltic and bituminous substances	10	106,642	6,046,485	1,054
Boric acid	8	1,719	2,320,650	791
Totals (including graphite, petroleum and other minerals)	1,018	—	644,798,281	67,456

¹ No mine was productive in 1918.

The quarries of Italy employed in 1916, 46,820 persons (1,257 females), the output of building and decorative stone being valued at 61,739,320 lire.

IV. FISHERIES.

On December 31, 1915, the number of vessels and boats employed in fishing was 26,725, with an aggregate tonnage of 70,443. These numbers include 48 boats of 419 tons engaged in coral fishing. There were 162,755 fishermen, of whom 6,902 were engaged in deep-sea or foreign fishing.* The value of the fish caught in 1916 (excluding foreign fishing) was estimated

at 17,473,503 lire; the value obtained from tunny-fishing was in 1915 221,331 lire, and from coral-fishing 350,340 lire, the quantity being estimated at 327 kilogrammes.

V. MANUFACTURES.

The Italian industrial census of June 10, 1911, showed that there were 243,926 industrial establishments in the country, having 2,304,438 employees, and possessing 1,620,404 horse-power. The particulars as to the kind of industries were as follows:—

Industries	Establishments	Employees	Horse-power
Industries connected with products of agriculture, hunting, and fishing	135,461	640,856	293,942
Mining and metal-working industries (except the chemical industry) and construction work (buildings, roads, water power, &c.)	58,836	695,737	268,763
Textile industry	32,691	656,733	177,610
Chemical industry	5,661	100,924	85,152
Public services	5,309	76,788	791,855

Commerce.

Year	Special trade (in sterling) (exclusive of precious metals)		Precious Metals (in sterling)	
	Imports	Exports	Imports	Exports
	£	£	£	£
1916	335,611,043	123,533,191	23,978	61,498

Japan	145,534	311,978	7,367	11,330*

For the determination of Customs' values, &c., in Italy there is a permanent central commission, comprising official members, representatives of commercial corporations, &c. The values recorded are those of the goods at the frontier, exclusive of import or export duties. For imports and exports the parties interested declare the value of the goods, their quantity, and the country of origin or destination. For imports there is recorded the

gross weight in the case of goods subject to a duty of 20 francs per quintal (8s. 1½d. per cwt.) or less; the net legal weight (*i.e.* with deduction of an official tare) in the case of goods subject to duty of 20 or 40 francs per quintal (8s. 1½d. to 16s. 3d. per cwt.); the actual net weight in the case of goods taxed at over 40 francs per quintal (16s. 3d. per cwt.). For exports the gross weight is usually given. Inaccurate declarations are punishable by fine if the inaccuracies are prejudicial to the Treasury.

The trade of Italy is regarded either as general or special. The general trade comprehends all imports from abroad, whether intended for consumption within the kingdom or merely for transit, and all exports to foreign countries, whether national, nationalised or only issuing after transit. The special trade is restricted to imports for consumption and exports of national or nationalised merchandise. National merchandise consists of the produce and manufactures of the kingdom, while foreign imports on which the duties have been paid at the frontier are said to be nationalised. Transit trade denotes merchandise merely passing through the kingdom whether directly or after having been temporarily warehoused.

The treaty of 1883 provides for 'the most-favoured-nation' treatment in matters of commerce and navigation between Italy and the United Kingdom, and Italy is a party to the International Sugar Convention.

The principal articles of import into Great Britain from Italy, and British exports to Italy (according to the Board of Trade returns) in 2 years were:—

Imports into U.K.	1920	1921	Exports to Italy	1920	1921
	£	£		£	£
Olive oil	187,753	52,258	Coal	11,759,464	6,998,404
Hemp	4,112,643	178,014	Iron and Steel	3,152,453	550,939
Canned vegetables	689,483	466,238	Machinery	1,343,125	1,094,038
Lemons	477,503	701,607	Fish	428,303	577,747
Silk manufactures	812,113	930,548	Woollen goods	5,030,073	639,350
Stone and slate	417,473	260,868	Cottons	3,473,892	969,026

Total trade between Italy and the United Kingdom (Board of Trade returns) for 5 years (in thousands of pounds sterling):—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Italy to United Kingdom	18,364	14,635	17,880	8,891	11,282
Exports to Italy from United Kingdom	29,208	27,750	39,701	16,938	19,257

Navigation and Shipping.

On January 1, 1921, the mercantile marine consisted of 603 vessels, of 1,754,508 gross tons; on January 1, 1922, of 856 vessels, of 2,484,182 tons.

In 1919 the vessels entered and cleared at Italian ports were as follows:—

—	Entered Italian Ports		Cleared from Italian Ports	
	Vessels	Tons	Vessels	Tons
Italian	98,397	15,164,409	93,850	15,176,981
Foreign	4,792	8,929,230	4,794	8,967,556
Total	98,169	24,093,639	98,144	24,143,487

INTERNAL COMMUNICATIONS—MONEY AND CREDIT 1073

Vessels entering and clearing in 1919 at the principal Italian ports :—

Port	Entered		Cleared	
	No.	Tonnage	No.	Tonnage

Internal Communications.

I. RAILWAYS.

Railway history in Italy began in 1839, with a short line between Naples and Portici (5 miles). Length of State railways 10,290 miles (June 30, 1921). Receipts from State railways in 1920-21, 3,021,272,425 lire; expenditure, 4,066,798,686 lire.

The Government proposes to electrify nearly 4,000 miles of State railways. By June 30, 1921, 639 miles had already been electrified.

II. POSTS AND TELEGRAPHS.

In the year 1921 (June 30) there were 11,228 post offices. The postal traffic was as follows :—

	1920-21		
	Internal	External and Transit	Total
Letters	387,000,000	96,890,000	483,890,000
Post cards	141,000,000	22,267,000	163,267,000
Newspapers, Printed matter, &c.	822,000,000	40,021,000	862,021,000
Post Office orders, &c.	21,895,000	49,000	21,944,000
Total	1,371,895,000	159,227,000	1,531,122,000

On June 30, 1920, the telegraph lines had a length of 35,205 miles, and the wires 239,517 miles. There were 10,017 telegraph offices, of which 7,353 were State offices and 2,664 railway offices. There were, in that year, 19,501,640 private telegrams sent inland; and 1,710,013 private international telegrams.

The telephone service in 1919-20 had 111,719 subscribers. There were 324 urban systems; and 855 inter-urban systems with 19,374 miles of line and 239,354 miles of wire. Total number of conversations in the year, 7,232,826 (excluding international conversations). In 1907 the telephone service passed to the direct working of the State.

Money and Credit.

State notes and bank notes in circulation in lire :—

	1917	1918	1919	1920	1921
State notes	1,747,849,125	2,123,991,725	2,271,300,255	2,268,864,000	2,267,000,000
Bank notes	8,424,997,250	11,750,263,050	16,281,342,600	19,731,640,700	19,208,893,975

The total coinage from 1862 to the end of 1919 was : gold, 430,840,430 lire ; silver, 694,028,777 lire ; nickel, 66,295,678 lire ; bronze, 85,474,017 lire ; total, 1,276,638,902 lire, exclusive of recoinage.

The nominal value of the money coined (including recoinage) in each year :—

—	Gold	Silver	Nickel	Bronze	Total
	Lire	Lire	Lire	Lire	Lire
1912	2,323,460	10,197,050	4,208,000	93,900	16,822,410
1916	—	23,681,004	—	129,250	23,810,254
1917	—	21,979,328	—	96,710	22,076,038
1918	—	—	8,619,400	239,200	8,858,600
1919	—	—	9,213,345	759,000	9,972,345

On June 30, 1922, the paper currency consisted of 17,822,962,575 lire of Bank notes, and 2,267,000,000 lire of State notes.

There is no national bank in Italy. According to the law of August 10, 1893, there are only three banks of issue : the Banca d'Italia, the Banco di Napoli, and the Banco di Sicilia. Assets and liabilities of these banks on December 31, 1921 :—

—	Assets	—	Liabilities
	Lire		Lire
Cash	2,001,527,252	Capital	302,000,000
Bills	5,248,742,078	Notes in circulation . .	19,208,893,975
Anticipations	5,324,231,844	Accounts current, &c. .	3,108,003,984
Credits	1,570,944,849	Titles and valuables	
Deposits	41,451,209,153	deposited	41,451,209,153
Various securities . .	11,428,626,450	Various	2,955,174,514
Total	67,025,281,626	Total	67,025,281,626

On December 31, 1921, the gold reserve amounted to 1,091,912,260 lire ; the silver reserve to 100,027,072 lire ; and the note circulation to 19,208,893,975 lire.

On June 30, 1918, there were 747 co-operative credit societies and popular banks, 1,904 rural banks, 221 ordinary credit companies, and 10 agrarian credit institutions, and (January, 1920) 11 *crédit foncier* companies, of which 4 were in liquidation, with 739,198,250 lire of '*cartelle fondiariae*' in circulation, and with 705,586,789 lire of '*mutui con ammortamento*.'

The following table gives statistics of the savings-banks on December 31, 1921 :—

—	Depositors	Total Deposits
		Lire
Post Office savings banks	—	7,943,894,343
Ordinary savings banks	—	7,426,441,549

On June 30, 1921, the savings deposited with the co-operative credit and ordinary credit companies amounted to 3,409,577,737 lire, and *Monti di pietà*, 372,032,572 lire, and with *Casse rurali* 444,850,164.

On August 12, 1912, a Law came into operation establishing life assurance as a State monopoly. The existing insurance companies were allowed

to continue their operations for 10 years under certain conditions. The National Insurance Institute carries out the Government business. It started operations on January 1, 1913, and has already assumed large proportions, having absorbed the business of 24 insurance companies (15 foreign and 9 Italian). According to the law, the companies which at the end of 1911 were engaged in life insurance in the Kingdom which did not cede their business to the Government were given the privilege of continuing their business for not more than 10 years, with the obligation of turning over to the Government Institute 40 per cent. of the business done after the beginning of the new régime. Only 3 Italian and 9 foreign companies continued business in Italy under these conditions and later one of these also ceded its business to the Institute. Branches of the National Institute of Insurance were established in every Province of Italy, 2,386 branches in all.

The insurance effected by the Institute in the years 1920 and 1921 was as follows :—

	1920		1921	
	No. of Contracts	Amount	No. of Contracts	Amount
Insurance paid	82,607	Lire 911,722,936	35,837	Lire 636,066,000

Money, Weights, and Measures.

The money, weights, and measures of Italy are the same as those of France, the names only being altered to the Italian form.

The *Lira* of 100 *Centesimi* ; intrinsic value, 25·22½ to 1*l.* sterling.

The coin in circulation consists of gold 10-lire, 20-lire, 50-lire and 100-lire pieces ; of silver 50 cent, 1-lira, 2-lire, and 5-lire pieces ; nickel 20 cent pieces, and bronze 1, 2, 5 and 10 cent pieces. Nickel coin is being substituted for bronze to a large amount. Bank notes of 25, 50, 100, 500 and 1,000 lire are in circulation ; also small notes, issued by the State (*biglietti di Stato*), for 5 and 10 lire. During the war there were issued cash notes (*buoni di cassa*) of 1 and 2 lire, in substitution for silver pieces of corresponding value.

Diplomatic Representatives.

1. OF ITALY IN GREAT BRITAIN.

Ambassador.—Marchese Pietro Tomasi della Torretta dei principi di Lampedusa (appointed November 15, 1922).

Counsellor.—Gabriele Preziosi.

Secretaries.—Francesco M. Taliani, C.B.E., Giovanni Balsamo, and Mario Porta

Military Attaché.—Col. Virginio Riggi, C.M.G.

Naval Attaché.—Captain Luigi Bianchi.

Air Attaché.—Major Carlo Graziani, M.C.

Commercial Attaché.—Francesco Giannini, C.B.E.

Chanceller.—Giuseppe L. de Grossi.

Archivist.—Cavaliere Ugo Catani.

Consul in London.—Marquis A. Faà di Bruno.

There are also Consular representatives at Dublin (C.), Glasgow, Liverpool (C.G.), &c.

2. OF GREAT BRITAIN IN ITALY.

Ambassador.—Rt. Hon. Sir R. W. Graham, K.C.M.G., C.B., appointed November 25, 1921.

Counsellor.—H. W. Kennard, C.M.G.

Secretaries.—E. H. J. Leslie, C.M.G., C. J. W. Torr, and O. C. Harvey.

Commercial Secretaries.—J. H. Henderson, O.B.E., and H. C. A. Carpenter.

Naval Attaché.—Commander R. T. Down, D.S.O., R.N.

Military Attaché.—Major-General J. Duncan, C.B., C.M.G., D.S.O.

Consuls-General.—P. A. Somers Cocks, C.M.G. (at Naples), H. L. Churchill (at Genoa), and G. B. Michell (at Milan).

There are also Consular representatives at Brindisi, Cagliari, Florence, Leghorn, Messina, Palermo, Spezia, Turin, and other towns.

FOREIGN DEPENDENCIES.

Colony of Eritrea.

The dominion of Italy on the coast of the Red Sea extends from Cape Kasar (18° 2' N.) to Cape Dumeirah on the Strait of Bab-el-Mandeb (12° 30' N.). The length of coast is about 670 miles. The area is about 45,435 square miles, and the whole population is estimated at 402,793, exclusive of 4,681 European, of whom 4,283 are Italian (exclusive of the military forces) and 338 of other nationalities. Massawah has 2,645 inhabitants, of whom about 260 are European, mainly Italian. The seat of the Government is Asmara, a modern town 7,765 feet above the sea-level, with 14,711 inhabitants (2,500 European). The religions of the native population are the Christian (Coptic rite) and the Mohammedan. There are some Roman Catholics and a few Pagans. Tigrean (an Abyssinian dialect) is spoken in the plateau, and Arabic in the lowlands.

The Italian possessions on the Red Sea are constituted as the Colony of Eritrea, with the management of its own finances and an autonomous administration in 8 commissariats, as follows :—

Commissariat	Area in square miles	Total Native Population (Census 1920)	Capital
Hamassen	1,160	60,234	Asmara
Massowah	5,000	47,910	Massowah
Assab	5,500	3,926	Assab
Acchele Guzai	3,475	62,169	Adi Caieh
Serae	3,300	69,311	Adi Ugri
Cheren	8,800	73,737	Cheren
Parca	12,700	58,540	Agordat
Gasc and Setit	5,500	26,966	Barentu

Military force : 138 commissioned and non-commissioned officers and 5,457 men (5,164 natives and 293 Italians, exclusive of the police force of the colony).

In the Italian dependencies the central government is represented by a civil governor, who is nominated by the King and is under the direction of the Minister for the Colonies.

Governor.—Marquis G. Cerrina Feroni (1919).

For the financial year 1922-23 the revenue and expenditure of the Colony of Eritrea were estimated at: Colonial revenue, 27,548,737 lire; expenditure, civil administration, 20,554,737 lire; military, 6,994,000 lire.

For climatic and agricultural purposes the country must be divided into two zones, the lowlands along the sea coasts and in the plains, where the tropical climate is very hot and the rains fall in winter; and the uplands, where the climate is cool and sometimes cold and the rains fall in summer. Both in the lowlands and the uplands the annual rain is sufficient for the successful raising of the crops. Irrigation works are being carried on in the lower zone in order to facilitate intensive production by Italian farmers. Pasture is abundant, but the pastoral population is partly nomadic. Camels, oxen, sheep, goats, are common, and the produce, consisting of meat, hides, butter, supplies articles of local trade. Pearl-fishing is carried on at Massawah and the Dahlak archipelago to the annual value of from 450,000 lire for pearls and 800,000 lire for mother-of-pearl. A very promising trade is being carried out in palm nuts. The exportation of these nuts in 1919 was 1,600,000 lire. There are gold mines worked successfully in several localities of Hamasién. Other minerals have recently been found, including petroleum.

At Massawah the imports by land and sea, the exports, and the tonnage entered were as follows:—

—	1917	1918	1919	1920	1921
Imports . Lire	47,591,643	103,811,379	80,000,000	145,000,000	110,000,000
Exports . „	21,660,428	84,844,958	41,000,000	47,000,000	28,000,000
Transit	2,498,293	5,415,030	—	—	—
Tonnage entd. Tons	157,237	166,078	214,471	427,330	354,256

Through the land frontier the imports in 1920 amounted to 39,969,504 lire, and the exports to 31,126,555 lire.

There are 75 miles of railway from Massawah to Asmara (end of 1912), and 65 miles from Asmara to Cheren (end of 1922); and now the line is being taken by Cheren to Agordat (54 miles). There are 12 post-offices. There is a telegraph line of 514 miles in length. There are 863 miles of telephone lines. Two wireless telegraph stations have been opened at Massawah and Assab. They communicate with the radiotelegraphic system of Italian Somaliland and also with Italy (St. Paola of Rome). There is, thus, through wireless communication between Italy and Italian Somaliland, via Massawah.

The legal currency consists of Italian coins and those of the Latin Union, but in actual circulation there are still Maria Theresa dollars. The Italian mint in 1918 issued a new silver coin, the *Tallero d'Italia*, the weight of which is 28.0668 grammes.

Italian Somaliland.

The Colony and Protectorates of Italian Somaliland have an area of 139,430 sq. miles and a population of about 450,000 (656 Italians). They extend along the east coast of Africa from British Somaliland to the course of the Juba. The inland boundaries are determined under the Treaty of May 16,

1908, between Italy and Abyssinia, by a line (only partially demarcated) from Dolo on the Juba to the confluence of the Juba with the Daua, thence to the Webi Shebéli (comprising in Benadir the territory of the Somali tribe Baddi Addo and dependent clans), and finally to the Anglo-Abyssinian frontier fixed by protocol of May 14 and June 4, 1897. As a result of the Treaty of 1915 and the Colonial rearrangements consequent on the war, Britain will grant Italy territories on the right bank of the Juba with the port of Kismayu. Italy thus controls the whole of the Juba.

Italian Somaliland comprises (I.) The Protectorates, viz.—(1) The Sultanate of the Mijertins (Sultan Osman Mahmud), from Bender Ziade, the most northerly point belonging to Italy on the Gulf of Aden, to Cape Gabbee on the Indian Ocean ($8^{\circ} 13' \text{ N. lat.}$), with an Italian Commissioner, resident at Alula, capital of the Sultanate; (2) the territory of the Nogal, from Cape Gabbee to Cape Garad ($6^{\circ} 47' \text{ N. lat.}$), formerly occupied by the Mad Mullah; (3) the Sultanate of Obbia (Sultan Ali Iusuf), from Cape Garad to the northern boundary of the colony of Benadir, determined by a line which ends at the sea near the wells of Fah (about $4^{\circ} 30' \text{ N. lat.}$), with an Italian Commissioner resident at Obbia, capital of the Sultanate. (II.) The Colony formerly called 'Benadir' but now officially known as 'Southern Italian Somaliland,' which extends from $4^{\circ} 30' \text{ N. lat.}$ to the mouth of the Juba, and comprises the following four administrative divisions:—(1) Medio Shebéli, with Afgoi (population 3,000) as capital, (2) Basso Shebéli and Gosha, with Brava (8,000) as capital, (3) Alto Shebéli, with Mahaddei (5,000) as capital, and (4) Alto Juba, with Baidoa (2,000) as capital. Mogadisho (population 16,000), capital of the Colony, with its territory, has been placed under the direct dependence of the Governor.

The Colony is administered by a civil governor who resides at Mogadisho. A royal decree of December 8, 1910, provides for the minting of silver coins of 1 rupee, $\frac{1}{2}$ and $\frac{1}{4}$ rupee for Italian Somaliland, of the value of 15 rupees to 1*l.* sterling. A royal decree of May 13, 1920, provides for the issuing of currency notes in rupees. These have been issued since November 1920 by the Banca d'Italia, a branch of which has been established at Mogadisho. The currency is fully covered by a corresponding reserve of silver rupees. Silver coins, however, are still largely circulating in the Colony and in the Protectorates.

The principal occupations of the people are cattle-rearing and agriculture. Formerly only the lower classes of the population cultivated the fields; but in Southern Somaliland, after the Italian occupation of the interior, the shepherds were turned into farmers, and now the whole country near the banks of the Webi Shebele is inhabited and cultivated by the higher classes also of the Somali tribes. The most productive districts are Gheledi, Mobilen and Bur Acaba. But in Northern Somaliland the Mijertins rear camels and sheep. Exports (1921) are 12,130,000 *lire*; imports, 71,112,001 *lire*. Imports are cottons, sugar, rice, petroleum, yarn, timber; exports, dura, maize, gum, hides, butter, cotton. Animal produce is exported to Italy, Aden and Zanzibar, whence it is shipped to Europe, America, or India. Length of roads 1,135 miles; steamship service on the Juba River from Kismayu to Bardera. A monthly service of steamers between Genoa and Port Durban, and the East African line of the Indian Steamship Company, Cowjee Dinshaw, from Aden to Zanzibar, connects the colony with Italy, the former directly, the latter through Aden and the India lines. Military force, 74 (Italian) officers and 2,738 (coloured) men. A detachment of the Flying Corps has recently been added.

Governor.—Carlo Riveri (1919).

The budget of Italian Somaliland for the year 1922-23 is as follows: Revenue proper of the colony, 2,242,000 lire; State contribution, 8,422,000 lire; extraordinary revenue, 9,000,000 lire; total, 19,664,000 lire. Civil expenditure, 6,567,246 lire; military, 3,281,700 lire; special expenditure, 429,000 lire; extraordinary expenditure, 9,386,054 lire; total, 19,664,000 lire.

Thirteen wireless telegraph stations are working in the Colony connecting the principal coast and inland towns. The wireless station at Mogadisho communicates with Italy, via Massawah.

There are in the Colony 6 principal post offices (Mogadisho, Merca, Brava, Jumbo, Baidoa, and Mahaddei), but postal business is carried out at every station. The construction of the railway line from Mogadisho to Baidoa has been started.

An agricultural company (initial capital 24,000,000 lire; Chairman, H. R. H. the Duke of the Abruzzi) has undertaken the agricultural colonisation of a stretch of land (12,000 hectares) on the Webi Seebeli, whose waters are used for irrigation. The agricultural work is already well advanced and the building of a powerful barrage across the river has been initiated. A navigation service on the Webi Seebeli from Afgoi to Buloburti (480 km.) with small steam traffic and lighters has been established.

In 1921, 706 steamers of 206,968 tons entered and cleared the ports of Italian Somaliland.

Tripolitania and Cyrenaica.

(LIBIA ITALIANA.)

Italian Libia lies along the north coast of Africa between Tunis on the west and Egypt on the east, in longitude from about 9° to 25° east. The extreme northerly point of Libia is at about the parallel of latitude 33° north; the southernmost point is unknown, as the territory runs into the unmapped Sahara indefinitely. According to an arrangement with France (September 12, 1919) as a result of the Treaty of 1915, the western frontier extends in a curve from west of Ghadames to south of Tummo. On the Egyptian frontier Italy has obtained Jarabab from Britain.

Government.—Tripoli fell under Turkish domination in the sixteenth century, and though, in 1714, the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet. In September, 1911, a quarrel broke out between Turkey and Italy, and the latter invaded Tripoli and established an army there. On November 5, 1911, a decree was issued annexing Tripoli, and on February 23, 1912, the Italian Chamber passed the Bill which ratified the decree of annexation. The war, nevertheless, continued until October 18, 1912, when the Treaty of Ouchy was signed, by which the sovereignty of Italy in Tripoli was established. This has been recognised by the Great Powers.

For administrative and military purposes the country is divided (decree of May 17, 1919) into two independent districts, Tripolitania and Cyrenaica, with their respective capitals at Tripoli and Bengazi, both under the jurisdiction of the Italian minister of colonies. In both provinces natives have equal rights with Italians, and in each there is a small local parliament elected by all citizens.

Governor of Tripolitania.—Giuseppe Volpi (1921).

Governor Cyrenaica.—General Bongiovanni (1923).

Area and Population.—The entire area of the territory is estimated at about 406,000 square miles. According to a census taken on December 1, 1921, there were 569,093 natives. This census gave the European population of Cyrenaica as 9,293 (8,998 Italians). It is estimated that the total population is about 1 million, of whom some 30 per cent. are Arabs, 40 per cent. Negroes, 23 per cent. Jews, and about 7 per cent. Europeans. The civil European population numbers 28,364 (Census 1921), mostly Maltese and Italians. Arabic is generally spoken, and both Italian and Arabic are the official languages. The principal towns are on the coast, Tripoli, with 73,000 inhabitants, Benghazi with 35,000, Derna, with 11,182 inhabitants, and Homs; inland are the caravan halting places, Ghadames, Murzûk, and Ghat.

Justice.—In both districts justice, in so far as family or succession matters are concerned, is administered by Mahommedan or rabbinic tribunals, and by regional tribunals, presided over by civil magistrates who are assisted by Italian or Mussulman assessors according as the cases concern Italians or native subjects. In civil and commercial matters the laws of the Koran or the Talmud are in force for natives; and in penal matters, the judicial law of Italy holds good. The Court of second instance is the Assize Court, which deals with more serious cases. The Royal Court of Appeal for Libya held its first session in December, 1912.

Finance.—For the financial year 1922–23 the revenue and expenditure of Tripolitania and Cyrenaica were estimated at: Colonial revenue, 43,029,000 lire; State contribution, 202,878,300 lire; extraordinary revenue, 14,050,000 lire; total revenue, 259,957,300 lire. Civil and military expenditure, 180,503,700 lire; extraordinary expenditure, 79,453,600 lire; total expenditure, 259,957,300 lire.

Defence.—The military force in Tripolitania consists of 299 officers and 13,023 men (9,383 natives and 3,640 Italians); that in Cyrenaica of 197 officers and 9,679 men (5,570 natives and 4,109 Italians).

Production and Industry.—Tripolitania has four zones, the first of which, along the sea, is covered with palm, olive, lemon, and fruit trees. The second is formed by the highlands of Gebel and Tarhuna; the former has olive groves and palm and fig trees, while cereals and saffron are also grown. The country, however, is rather barren. The Tarhuna land is rich in esparto grass. The rest of the second zone, which includes the hills of Mesellata and Bondara, as well as numerous valleys, is most fertile, and olive trees are abundant. The third zone consists chiefly of oases and is rich in palms. The oases (of which Ghadames is the most important) are some distance apart. The fourth zone is covered with palms, figs, vines, and almonds.

In Cyrenaica, olives and cypresses predominate. Pasturage is abundant and cattle could be bred on a vast scale. Bananas are grown at Derna. Barley is the chief food of the people.

Commerce.—There is a considerable caravan trade between Benghazi and Wadai and between Tripoli and Central Sudan when the routes are free from raiders. An important article of trade is ostrich feathers, which are brought overland from Central Africa, and exported to Paris and London from Tripoli to the value of 50,000*l.* annually, and 20,000*l.* from Benghazi.

In 1921, the trade of Tripolitania was:—Imports, 105,858,963 lire; exports, 10,641,487 lire; of Cyrenaica: imports, 5,180,700 lire; exports, 17,100,000 lire.

Sponge-fishing was started in 1885. In good years the returns from the industry amount to some 2,000,000 lire (£80,000) out of a total of 10,000,000 lire (£400,000) for the whole Mediterranean. The two fishing seasons in Libya are from November to February, and from March to October, the latter being the more important. During the summer season, 1922, 5 boats engaged in fishing from Tripolitania; the sponges collected totalled 6,218 kilos; 717,011 kilos of tunny fish were also caught in 1921, as compared with 784,649 kilos in 1920.

Communications.—The principal means of communication inland are the caravans which follow long-frequented routes. Tripoli (town) is connected by telegraph cable with Malta, and by land lines with Bengardane (Tunis). In 1912 two Italian cables were laid, one between Syracuse and Tripoli, and the other between Syracuse and Benghazi.

Total length of railways, 163 miles. The principal lines in Tripolitania are: a line 53 miles in length, running from the coast to Hencair el Abiad; another, 75 miles long, along the coast, from Tripoli to Zuara; a third, 12 miles long, from Tripoli to Tagiura, and a fourth, 6 miles long, from Tripoli to Ain-Zara. In Cyrenaica a line 20 miles long runs from Benghazi inland. In both districts some 600 miles of line are in operation.

In Tripolitania, during the year ending June 30, 1922, 175,576 registered letters were received and 201,837 despatched; 7,032 insured letters received and 9,129 despatched; 39,517 parcels received and 21,496 despatched. Deposits in savings bank, 8,349,598 lire; number of telegrams despatched, 104,643; number received, 97,377.

In Cyrenaica the telegraph and telephone lines have a length of about 372 miles; 50,854 registered letters were received and 52,507 letters despatched; 3,326 insured letters received and 4,074 despatched; 19,055 parcels received and 2,763 despatched. Deposits in savings bank, 4,929,839 lire; number of telegrams despatched, 156,412; number received, 150,303.

Banking and Currency.—The Banca d'Italia, the Banco di Sicilia, the Banco di Napoli, the Banco di Roma and other banks carry on financial operations.

There is a British Consul at Benghazi, and a Vice-Consul at Homs.

Concession of Tientsin.—The Italian concession of Tientsin, under the agreement with China of June 7, 1902, lies on the left bank of the Peiho and has an area of about half a square kilometer with a population of 10,017 (Chinese, 9,887; Italians, 51; other Europeans, 79) in 1915. It contains a village and salt-pits. Revenue 1915-16, 433,532 lire; expenditure, 513,002 lire.

Aegean Islands.—During the war with Turkey in 1912, Italy occupied as base, the islands of Egeo, Rhodes and the other small islands of the Sporadi group (Stampalia, Scarpanto, Caso, Piscopi, Nisiro, Calimno, Liro, Patimo, Cos, Simi, Calchi and Lipso—the Dodecanese). The total population in 1917 was 100,198.

Statistical and other Books of Reference concerning Italy.

1. OFFICIAL PUBLICATIONS.

The *Annuario Statistico Italiano* (Annual), issued by the General Statistical Department of the Ministry of Labour, gives statistical information about Italy and its Colonies.

The publications of the various Departments of Government: Agriculture; Industry, Commerce, and Labour; Public Works; Treasury; Finance; War; Marine; Interior; Public Instruction; Justice; Foreign Affairs; Post and Telegraphs; Colonies.

Census publications are issued by the General Statistical Department of the Ministry of Industry, Commerce, and Labour.

JAPAN.

(NIPPON.)

Reigning Sovereign.

THE Japanese claim that their empire was founded by the first Emperor Jimmu Tennō, 660 B.C., and that the dynasty founded by him still reigns. It was revived in the year 1868 (the first year of the *Meiji*), when the now ruling (*de jure*) sovereign overthrew, after a short war, the power of the Shogun (the *de facto* sovereign), who had held the ruling power in successive families, since the twelfth century; and in 1871 the feudal system (Hōken Seiji) was entirely suppressed. The Emperor bears title of Tennō; but the appellation by which he is called in relation to external affairs is 'Kōtei,' a word of Chinese origin. Only foreigners make use of the poetical title 'Mikado.'

Emperor of Japan.—*Yoshihito* (Harunopia), born at Tōkyō, August 31, 1879; succeeded his father, Mutsuhito, July 30, 1912; married, May 10, 1909, to Princess Sadako, born June 25, 1884, daughter of Prince Kujō.

Children of the Mikado.—I., Prince Hirohito, born April 29, 1901 (Crown Prince). II., Prince Yasuhito, born June 25, 1902. III., Prince Nobuhito, born January 3, 1905. IV., Prince Takahito, born December 2, 1915.

Sisters of the Mikado.—I., Princess Masako, born Sept. 30, 1888, married, April 27, 1908, to Prince Tsunehisa. II., Princess Fusako, born Jan. 29, 1890, married, April 29, 1909, to Prince Narihisa. III., Princess Nobuko, born August 7, 1891, married May 6, 1910, to Prince Yasuhiko. IV., Princess Toshiko, born May 11, 1896, married May 18, 1915, to Prince Naruhiko.

By the Imperial House Law of February 11, 1889, the succession to the throne has been definitely fixed upon the male descendants. In case of failure of direct descendants, the throne devolves upon the nearest Prince and his descendants. The civil list is fixed at 4,500,000 yen.

On November 25, 1921, owing to the continued ill-health of the Emperor, the Crown Prince of Japan was constituted Regent.

Constitution and Government.

By the Constitution of February 11, 1889, the Emperor combines in himself the rights of sovereignty, and exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, who are responsible to him, and are appointed by himself. There is also a Privy Council, who are consulted by the Emperor on important matters of State. The Emperor can declare war, make peace, and conclude treaties. The Emperor exercises the legislative power with the consent of the Imperial Diet. It is his prerogative to give sanction to laws, to convoke the Imperial Diet, to open, close, and prorogue it, and to dissolve the House of Representatives. The Imperial Diet consists of two Houses, a House of Peers and a House of Representatives. Every law requires the consent of the Imperial Diet. Both Houses may respectively initiate projects of law, can make representations to the Government as to laws or upon any other subject, and may present addresses to the Emperor.

The House of Peers (373 members) is composed of (1) male members of the Imperial family of full age, sixteen in number; (2) princes and marquises of the age of 25 and upwards (14 princes and 34 marquises); (3) counts, viscounts, and barons of the age of 25 and upwards, who have been elected by the members of their respective orders, never to exceed one-fifth of each order (101 counts and 20 members, 381 viscounts and 73 members, 410 barons and 73 members); (4) persons above the age of 30 years, who have been nominated members by the Emperor for meritorious services to the State or for erudition (7 viscounts, 14 barons and 97 others); (5) persons who shall have been elected in each Fu and Ken from among and by the 15 male inhabitants thereof, above the age of 30 years, paying therein the highest amount of direct national taxes on land, industry, or trade, and have been nominated by the Emperor. The term of membership under (3) and (5) is seven years; under (1), (2), and (4) for life. The number of members under (4) and (5) must not exceed the number of other members.

The members of the House of Representatives number 463, a fixed number being returned from each electoral district. The proportion of the number of members to the population is one to about 120,610. Voting is by secret single ballot. Electors are (1) male Japanese subjects of not less than full 25 years of age, (2) permanent and actual residents in the electoral district for not less than a year; and (3) those paying land tax to the amount of not less than 3 yen in a year for more than one year, or direct taxes other than land tax to the amount of not less than 3 yen in a year for more than two years or of land tax together with other direct national taxes to the amount of not less than 3 yen in a year for more than two years. In general, male Japanese subjects of not less than 30 years of age are eligible to the House of Representatives, without any qualification arising from payment of taxes. Disqualified for membership are the Imperial Household officials, priests, students, teachers of elementary schools, government contractors, election officials. The President and Vice-President of the House of Peers are nominated by the Emperor from among the members, and President and Vice-President of the House of Representatives are nominated by the Emperor from among three candidates, elected by the House. The Presidents of both Houses receive an annual salary of 7,500 yen; Vice-Presidents, 4,500 yen; elected and nominated members of the House of Peers and members of the House of Representatives, 3,000 yen, besides travelling expenses. The Imperial Diet, which must meet annually, has control over the finances.

After the elections held in May, 1920, the following parties were returned

to the Diet :—Seiyūkai (Government Party), 283 ; Kenseikai, 108 ; Kokuminto (Popular Party), 26 ; Koshin Club, 25 ; and Independents, 21.

The Cabinet (formed on June 12, 1922) consists of the following members :—

Prime Minister and Minister of Marine.—Admiral Baron Tomosaburo Kato.

Home Affairs.—Mr. Rentarō Mizuno.

Foreign Affairs.—Count Yasuya Uchida

Finance.—Mr. Otohiko Ichiku.

War.—General Hanzo Yamanashi.

Minister of Justice.—Mr. Keijirō Okano.

Education.—Mr. Eikichi Kamada.

Agriculture and Commerce.—Mr. Kentarō Arai.

Communications.—Viscount Toshisada Mayeda.

Railways.—Count Enkichi Ohki.

Minister of the Imperial Household.—Viscount Shinken Makino.

Chief Secretary of the Cabinet.—Mr. Mitsuo Miyata.

Local Government.

For local administration Japan (except Hokkaidō or Yezo ; Chōsen, formerly Korea or Cháo-psien ; Karafuto or Japanese Sakhalin ; and Taiwan or Formosa) is divided into prefectures ('Fu' and 'Ken'). The prefectures are subdivided into municipalities ('Shi') and counties ('Gun') ; and the counties are again subdivided into towns ('Chō') and villages ('Son'). Okinawa Prefecture and some islands have, however, special organisations. Municipality, town, and village are the units of local government. These administrative divisions form at the same time local corporations of the same names, except Gun, the corporation of which was abolished in 1921. In each prefecture there are a governor ('Chiji'), a prefectural assembly ('Fu-kwai' or 'Ken-kwai'), and a prefectural council ('Fu-Sanji-kwai' or 'Ken-sanjikwai'), of which the governor is president ; in each county a sheriff, in each municipality a mayor, a municipal assembly, and a municipal council, of which the mayor is the president ; and in each town or village a chief magistrate and a town or village assembly. Prefectural, municipal, town and village assemblies give decisions mainly upon financial matters. The prefectural council gives decisions upon matters delegated by the prefectural assemblies and upon matters of pressing necessity when the assembly is not in actual session.

The qualifications of the prefectural electors are (1) citizenship and residence in the prefecture ; (2) payment of the direct national tax to the amount of not less than 3 yen for one year in the prefecture. Persons eligible for election must pay direct national tax to the amount of not less than 10 yen. Citizenship is shared by all male Japanese subjects not less than 25 years of age, who for two years (1) reside in the municipality, or town, or village ; (2) share its burden ; and (3) pay land tax or not less than 2 yen direct national tax annually in it. The governor and sheriff are appointed by Government ; the mayor is that one of three candidates elected by the municipal assembly who has obtained the Emperor's approval ; and chief magistrate of town or village is one who has been elected by the town or village assembly and has obtained the governor's approval.

Hokkaidō has a governor and a special organisation. Chōsen has a Governor-General. The peninsula is administered in 13 Do or provinces, these being sub-divided into 329 Tuand Yun or districts. Taiwan (Formosa) also has a governor-general, who is invested with very extensive powers. The island is divided into 5 provinces (Shū), each of which has a governor. Karafuto is divided into 5 local divisions (Chō).

Area and Population.

The Empire consists of the five principal islands of Honshiu (mainland), Kiushiu, Shikoku, Hokkaidō (Yezo), and Taiwan (Formosa); besides the Chishima (Kuriles), Sado, Oki, Awaji, Iki, Tsushima, Riukiu (Luchu Islands), Ogasawarajima (Bonin Islands), Hōkotō (Pescadores) islands, the peninsula Chosen (Korea), and the southern half of the island of Karafuto (Sakhalin). Total area is shown as follows:—

Principal Islands	Number of Adjacent Small Islands	Area in square miles			
		Principal Islands	Adjacent Small Islands	Total	Per cent.
Mainland	167	86,953	473	87,426	33.29
Shikoku	74	6,907	176	7,083	2.70
Kiushiu	150	13,870	1,833	15,703	5.98
Hokkaidō (excluding the Chishima)	13	30,340	162	30,502	11.61
Chishima or Kurile Islands (31 islands)	—	6,068	—	6,068	2.31
Sado	—	337	—	337	0.13
Oki	1	130	1	131	0.05
Awaji	1	219	1	220	0.08
Iki	1	51	1	52	0.02
Tsushima	5	263	3	266	0.10
Riukiu (55 Islands)	—	941	—	941	0.36
Ogasawarajima or Bonin Islands (20 islands)	—	27	—	27	0.01
Total	412	146,106	2,650	148,756	56.64
Chōsen (Korea)	—	—	—	84,733	32.60
Taiwan (Formosa)	7	13,911	33	13,944	5.81
Hōkotō (Pescadores)	12	25	22	47	0.02
Karafuto (Japanese Sakhalin)	—	—	—	13,253	5.34
Grand Total	431	160,042	2,705	260,738	100.00

Administratively there exists a division into 47 prefectures. There is also a division into 636 rural districts, 81 cities, 1,352 towns, and 10,804 villages (1919).

Taiwan (Formosa) and Hōkotō (the Pescadores) were ceded by China in accordance with the treaty of Shimonoseki in 1895, and Japanese Karafuto was ceded by Russia by the Treaty of Portsmouth, N.H., in 1905. By the same Treaty of Peace the Russian Government ceded to Japan the lease of Port Arthur, Ta-lien, and adjacent territory and waters, and also the railway between Chan-Chun and Port Arthur, and the coal mines worked in connection therewith. In March, 1915, the Chinese Government agreed to extend the lease of the territory on Liaotung Peninsula, including Port Arthur and Dalny, to 99 years. The Chino-Japanese Treaty of December 22, 1905, provided for the interests of China and Japan with respect to

Manchuria. By a treaty between Japan and Korea on Aug. 23, 1910, the Korean Territory was annexed to the Empire of Japan.

By an agreement signed May 25, 1915, Japan obtained from China exclusive mining rights in Eastern Mongolia, and the right to settle in the province, and in Shantung the transference of all mining and railway privileges hitherto enjoyed by the Germans; also the extension of the lease of Port Arthur to 99 years, and a joint control over certain industrial works in which they have a large financial interest, besides other privileges. (For full details, see Introduction to THE STATESMAN'S YEAR-BOOK for 1916.)

The population of Japan on December 31 of the years shown :—

Year	Male	Female	Total	Annual Increase per 1,000
1913	26,964,586	26,398,093	53,362,682	15.99
1916	28,118,981	27,518,462	55,637,443	12.79
1917	28,472,320	27,863,663	56,335,983	12.79
1918	28,625,617	28,042,094	56,667,711	12.79
1920 ¹	28,044,341	27,918,712	55,963,053	—

¹ Census.

The estimated population of the Mainland on October 1, 1922, was 56,745,400.

In 1920 (Census) the population of Chōsen was 17,264,119; of Taiwan, 3,654,398; of Karafuto, 105,899. Total, 76,987,469.

Up to October 1, 1920, 581,421 Japanese emigrated, and of these 114,841 men and 87,519 women were living in the United States (including Hawaii); 139,888 men and 85,899 women in China; 4,998 men and 276 women in Australia; 19,885 men and 14,373 women in Brazil; and 2,724 men and 201 women in Europe. On October 31, 1920, the number of foreigners in Japan (exclusive of Formosa) was 35,380, of whom 22,240 were Chinese, 3,791 English, 3,786 American, 626 German, 664 French, 285 Portuguese, 283 Dutch, 1,701 Russian.

Movement of population for five years :—

Year	Marriages	Births	Deaths	Still-births	Divorces	Excess of Births
1917	447,970	1,812,413	1,199,669	140,328	55,812	612,744
1918	500,580	1,791,992	1,493,162	142,507	56,474	298,830
1919	480,136	1,778,685	1,281,965	132,939	59,812	496,720
1920	549,279	2,061,981	1,444,193	—	—	617,788
1921	522,497	2,031,179	1,306,524	—	—	724,655

In 1920 the figures represented per 1,000 of the population, 9.8 for marriage, 36.8 for births, and 25.8 deaths.

The following is a list of large towns and cities on October 1, 1920 (census figures) :—

Tokyo . . .	2,173,201	Nagasaki . . .	176,534	Otarū . . .	108,113
Osaka . . .	1,252,983	Hiroshima . . .	160,510	Kagoshima . . .	103,180
Kōbe . . .	608,644	Hakodate . . .	144,749	Sapporo . . .	102,580
Kyoto . . .	591,323	Kurū . . .	130,862	Yahata . . .	100,235
Nagoya . . .	429,997	Kanazawa . . .	129,265	Fukuoka . . .	95,381
Yokohama . . .	422,938	Sendai . . .	118,984	Okayama . . .	94,585

Niigata . . .	92,130	Toyama . . .	61,812	Ōita . . .	43,150
Yokosuka . . .	89,879	Asahigawa . . .	61,319	Yonezawa . . .	43,007
Sasebo . . .	87,022	Fukui . . .	56,639	Morioka . . .	42,403
Sakai . . .	84,999	Kōfu . . .	56,207	Nagaoka . . .	41,627
Wakayama . . .	83,500	Muroran . . .	56,082	Nara . . .	40,301
Shizuoka . . .	74,093	Naha . . .	53,882	Mito . . .	39,363
Shimonoseki . . .	72,300	Matsuyama . . .	51,250	Uji-Yamada . . .	39,270
Moji . . .	72,111	Matsumoto . . .	49,999	Hachi-oji . . .	38,955
Kumamoto . . .	70,388	Wakamatsu . . .	49,336	Okazaki . . .	38,527
Tokushima . . .	68,457	Kōchi . . .	49,329	Wakamatsu . . .	37,549
Toyohashi . . .	65,163	Aomori . . .	48,941	Nagano . . .	37,308
Hamamatsu . . .	64,749	Yamagata . . .	48,399	Takasaki . . .	36,792
Ōmura . . .	64,317	Tsu . . .	47,741	Takaoka . . .	36,648
Utsunomiya . . .	63,771	Takamatsu . . .	46,550	Akita . . .	36,281
Gifu . . .	62,713	Himeji . . .	45,750	Saga . . .	33,528
Maebashi . . .	62,325	Kurume . . .	43,629	Ōtsu . . .	31,453

¹ Shimonoseki was formerly called Akamagasaki.

Religion (excluding Formosa).

There is absolute religious freedom. The chief forms of religion are—(1) Shintoism, with 13 sects; (2) Buddhism, with 12 sects (56 denominations). There is no State religion, and no State support. In 1919 Shinto shrines numbered 49,459 (besides 66,738 minor shrines), and the priests, 14,698. Buddhist temples, 71,626 (besides 36,036 minor temples); high priests and priestesses, 52,894. There were, besides, 2,695 licensed preachers and 1,482 churches and preaching stations of the Roman Catholic, Greek, Catholic, and Protestant Churches. Since 1891 the Roman Catholics have had an episcopate of one archbishop and three suffragan bishops. There are shrines dedicated to the eminent ancestors of the Imperial House, and to meritorious subjects; these are independent of any religious sect, and some of them are supported by State or local authorities.

Instruction.

Elementary education is compulsory. The following are the educational statistics for 1919–20:—

Institutes	Number	Teaching Staff	Students and Pupils		
			Male	Female	Total
Kindergarten . . .	707	1,090	32,092	26,836	58,928
Elementary schools . . .	25,644	178,450	4,425,743	3,927,249	8,352,992
Middle " . . .	345	7,219	—	—	166,616
Girls' High " . . .	462	5,795	—	131,711	131,711
Normal " . . .	97	1,958	18,580	9,082	27,662
Schools for the Blind and for Deaf Mutes . . .	74	490	2,561	1,139	3,720
High schools . . .	12	456	—	—	7,497
Universities . . .	5	1,047	—	—	9,478
Technical schools . . .	13,971	9,816	859,668	176,875	1,036,538
Special schools (Law, Pharmacy, Music)	73	2,600	40,565	2,303	42,868

Japan has 5 Imperial universities, and 21 other institutions² have

been admitted to university rank, making 26 in all. Particulars of the Imperial universities are given as follows:—

University	Location	Established	1919-20	
			Teachers	Students
Tokyo Imperial University . . .	Tokyo . . .	1877	417	5,233
Kyoto Imperial University . . .	Kyoto . . .	1897	191	2,052
Tohoku Imperial University . . .	Sendai . . .	1907	197	1,781
Kyusou Imperial University . . .	Fukuoka . . .	1910	90	630
Hokkaido Imperial University . . .	Hokkaido . . .	1918	57	911

The remaining 21 institutions had 1,432 teachers and 30,057 students.

In 1919-20 there were 1,511 libraries in Japan, with 5,022,767 volumes (4,763,512 Japanese and Chinese, and 259,255 European). In 1919, 34,493 books of various kinds, and 3,423 periodicals, monthly, weekly, and daily, were published.

In Formosa there is a special educational system.

Justice and Crime.

A system of justice founded on modern jurisprudence has been established. Judges are irremovable, except by way of criminal or disciplinary punishment. There are four classes of courts in Japan (exclusive of Formosa); namely, sub-district courts, district courts, courts of appeal, and court of cassation. In the court of cassation seven judges preside; in the courts of appeal eight judges; in the district courts three judges; in each case one of them being the chief judge. In the subdistrict courts a single judge presides. A court which deals with disputes respecting administrative affairs is under the direct supervision of the Emperor.

A few judges of high rank are directly appointed by the Emperor, and some are appointed by him on nomination by the Minister of Justice. The following are the criminal statistics for five years:—In 1916, 102,691 criminals were condemned; in 1917, 106,747; in 1918, 115,753; in 1919, 112,681; and in 1920, 92,876.

In 1920 there were 52 prisons, 1,224 detached prisons and houses of correction. Number of prisoners of all kinds, convicted and accused, and those in houses of correction at the close of 1920:—Men, 49,420; women, 1,735; total, 51,155.

For the trial of cases connected with the military and naval services there are courts-martial.

Pauperism.

In 1899 new legislation settled that the minimum amount of prefectural funds for the relief of sufferers from extreme calamity shall be 500,000 yen; that funds below that limit are to be made up by the Treasury; and that when the amount of relief exceeds 5 per cent. of the funds at the beginning of the fiscal year, one-third of the amount thus granted is to be supplied from the Treasury.

The relief statistics for 3 years show expenditure as follows (in yen, exclusive of Formosa) :—

Year	Shelter	Food	Clothing	Medicine	Temporary lodgings	Providing with work	Total (including miscellaneous)
1917-18	18,963	319,835	10,895	2,898	100,349	43,770	498,618
1918-19	14,317	245,843	8,287	2,319	53,878	52,622	380,707
1919-20	4,719	119,425	17,376	224	61,412	20,107	229,613

In 1919 the Central Government relieved 6,619 persons to the amount of 42,155 yen (excluding Formosa). At the end of 1919, 1,392 foundlings (excluding Formosa) were being maintained, and the expense in that year was 84,683 yen. There are, besides, several workhouses established by local corporations and private persons. The number of hospitals in 1919 was 1,279 (7 state, 83 public and 1,189 private).

Finance.

I. IMPERIAL.

Revenue and expenditure, ordinary and extraordinary (excluding Formosa) (the yen = about 24½*d.*) :—

	1919-20	1920-21 ¹	1921-22 ¹	1922-23 ¹	1923-24 ¹

Total ordinary (including other receipts) . . .	1,245,457,634	Total ordinary . . .	941,763,000
Extraordinary Revenue . . .	236,962,327	Extraordinary expenditure . . .	540,657,200
Total Revenue . . .	1,482,419,961 (148,241,996 <i>d.</i>)	Total expenditure . . .	1,482,420,000 (148,242,000 <i>d.</i>)

¹ Including all items.

Public debt, April 30, 1922 :—Internal loans (4 and 5 per cent.), 2,234,000,000 yen; foreign loans (4 to 5 per cent.), 1,359,000,000 yen; total, 3,593,000,000 yen.

II. LOCAL.

The revenue of the Prefectures for the year 1921–1922 was 285,424,312 yen, and expenditure 285,677,882 yen. Of the revenue 195,026,076 yen was from rates. The revenue of the cities in 1920–21 was 266,061,771 yen (67,662,875 yen from rates), and the expenditure was 249,374,539 yen. The revenue of the towns and villages in 1920–21 was 322,143,481 yen (237,662,657 yen from rates), and the expenditure was 322,049,985 yen. The total local debt at the end of October 1921 was 475,816,826 yen (436,409,008 yen at end of 1920).

Defence.

I. ARMY.

Service in the army (or navy) is universal and compulsory. Liability commences at the age of 17 and extends to the age of 40, but actual service begins at 20. All those physically capable of bearing arms are divided into two classes, the 'fit,' and the 'absolutely fit.' The numbers necessary for the first line (or active army), called *Gen-eki*, are taken solely from the 'absolutely fit.' Service in the ranks is for 2 years in all arms; then for 5 (or 4) years and 4 months in the reserve (*Yōbi*). One year volunteers are admitted. Reservists are called out twice for training during their reserve service, for 60 days on each occasion. Having completed 7 years and 4 months in the first line, including its reserve, the men are transferred to the second line, called *Kōbi*. Service in the *Kōbi* is for 10 years, with two trainings of 60 days each in the whole period. At the end of their *Kōbi* service the men are in the 38th year of the age, and they are passed into the *Kokumin*, which is the territorial or home defence army. In this they serve for 2 years and 8 months, to complete their total service of 20 years.

The reserve for making good the waste of war, or *supplementary reserve*, is called *Hōjū*. It is composed of the balance of the 'absolutely fit' recruits not required for the first line, and of as many of those classed as "fit" as may be required to make up a certain fixed number. They all serve in the *Hōjū* for 7 years and 4 months, during which they have a first training of 90 days, and two subsequent trainings of 60 days each. After completion of this period of their service they are passed to the *Kōbi*, in which they serve for ten years, like the men who have passed through the first line. Like them also they are finally passed to the *Kokumin* for 2 years and 8 months to complete their army service.

The *Kokumin* is divided into two 'bans.' The first ban comprises all the men who have passed, as shown above, through the first line and landwehr, or through the supplementary reserve and landwehr, and who therefore have only 2 years and 8 months to spend in the *Kokumin*. The second ban is the levy *en masse* of all those capable of bearing arms. It includes (1) those who though 'fit' are not required for the *Hōjū*; (2) those who for various reasons have been exempted from military service; and (3) the

young men between 17 and 20 years of age who have not been called up. None of these classes receive any military training, but they can be drawn on in case of national emergency.

The partially trained men who have been passed into the Kōbi from the Hojū are not included in the fighting units of the Second Line. They supply the large number of men required for the transport service on mobilisation, and for the expansion of other departmental corps.

The field army of Japan consists of 21 divisions, including the guard, 4 independent cavalry brigades, 2 independent regiments of mountain guns, and 8 regiments of heavy field artillery.

Two infantry regiments form a brigade, and two brigades (12 battalions) a division. The divisional artillery consists of a regiment of field artillery (6 batteries of 4 guns). A regiment of cavalry of 2 squadrons, and a battalion of engineers, complete the division. Four infantry, and 4 artillery, ammunition columns, 6 field hospitals, 4 supply columns, and 1 remount depot accompany each division in the field. The war strength of a division is reckoned at 18,700 officers and men, 4,800 horses, 36 guns, and 1,674 vehicles.

The strength of an independent brigade of cavalry is 2 regiments, each of 4 squadrons and a battery of 8 machine guns; total about 1,650 men and 1,680 horses. The strength of an independent artillery brigade of 12 batteries is about 2,500 men and 1,000 horses. Divisions are grouped directly into armies, 3 to 5 divisions forming an army of from 80,000 to 130,000 men. The war strength of the army on mobilization may be taken at about 700,000 combatants, including Kōbi troops detailed for the lines of communication.

The active army consists at present of 86 regiments and 6 independent battalions (264 battalions in all) of infantry, 29 regiments of cavalry (58 squadrons), 1 battalion of cavalry artillery, 19 regiments (each of 24 guns) of field artillery, 4 regiments and 2 independent companies of mountain artillery, 8 regiments of heavy field artillery, 3 regiments and 8 independent battalions of heavy artillery, 21 battalions of engineers, 2 regiments of telegraph corps, 6 aero battalions, 1 balloon corps, 1 automobile corps, and 19 battalions of transport corps.

The Kōbi comprises 228 battalions, 57 squadrons, 114 field batteries, 12 battalions of garrison artillery, and 19 battalions of engineers, and would on mobilisation form independent divisions.

The Japanese Islands are divided into military districts, corresponding to the divisions of the army, and the district is the unit of administration as well as of territorial command. Each division is supplied with recruits from its own district, except the Guards, whose infantry recruits are selected from the whole country; the other arms of the Guard division are recruited from the large district of the 1st division. Abroad there are the separate units of Formosa, also some 25,000 to 30,000 men in Korea and Manchuria, and 4,500 in China.

During 1922 a reduction of the Japanese army was begun, and the establishment was reduced by 400 officers and 56,000 men.

The Emperor is the head and supreme commander of the army, and also of the navy. He nominates the War Minister (always a general officer of high rank), the Chief of the General Staff, the Director of Military Schools, and the Members of the Military Council.

The arm of the Japanese infantry is the improved rifle ; calibre, 6.5 mm. (.256"), a Mauser with an altered chamber. The cavalry are armed with a carbine of similar construction. The field gun is a q.-f. shielded Krupp of 7.5 cm. calibre, which fires a shrapnel of 14.3 lb. The mountain artillery has a gun of the same calibre firing a lighter shell. There are a certain number of field howitzer batteries, armed with 4.6" and 5.9" howitzers, firing shells of about 44 lb. and 80 lb. respectively. A 4" gun for heavy field batteries is being introduced.

The peace strength of the Japanese army amounts to about 250,000 of all ranks.

The military budget for 1922-23 amounted to 332,000,000 yen.

II. NAVY.

The direction of the Navy is in the charge of the Minister of Marine. The departments are those of the chief of the staff, with Operations, Mobilization, and Intelligence branches ; the Administrative division ; the Departments of Naval Construction and Material, Naval Engineering and Naval Works.

The coast of Japan is divided into five maritime districts having their headquarters at Yokosuka, Kure, Sasebo, Maizuru, and Chinkai. The two last named have now been reduced to the position of second-class bases.

The Japanese Fleet is affected by the Washington Agreement, but Japan remains the third great naval power of the world. Her replacement tonnage has been fixed by the Treaty at 315,000 tons in capital ships, which is markedly superior to the strength allowed to France and Italy. At Washington Japan insisted on completing the post-Jutland battleship *Mutsu*, sister of the *Nagato*, which action affected the distribution under the agreement, enabling the United States to complete the *Colorado* and *West Virginia*, and Great Britain to build two additional ships. The obsolete vessels have been removed from the Japanese fleet ; there will be no scrapping until 1931. It was being expanded in pursuance of the programme of 1916-17, supplemented by a new programme which was sanctioned in 1920, but had not been put in hand. The plan was to provide a strength of 8 battleships and 8 battle-cruisers, not any one of which should be of greater age than 8 years, but of these vessels only the battleships *Nagato* and *Mutsu* were to be completed, the rest being cancelled. The 1920 programme included 12 light cruisers in addition to 8 of the 1916 programme, and destroyers and submarines, all to be completed by 1927-28. Of these programmes, 16 cruisers of the *Kuma* class, 5,570 tons, have been completed or are in hand. It is anticipated that in 1923 or 1924 Japan will possess 44 first-class destroyers, 50 second-class destroyers, and about 46 of a smaller class. Full information regarding the submarines is not accessible, but the Japan Year Book says there will be 80 of the first-class by 1927, and about 30 of these are now in hand, with a gross displacement of 22,165 tons.

The principal state dockyards are at Kure and Yokosuka, where capital ships have been built, and there is a dockyard also at Sasebo, where lighter vessels are constructed. The Kawasaki private shipbuilding yard at Kobe and the Mitsubishi establishment at Nagasaki received new plant, and there are lesser building yards at Maizuru, Uraga and elsewhere, as well as the government armour and armament factory at Kure. Japan has made herself practically independent of Europe for the building and arming and equipment of her warships.

A statement of the Japanese fleet follows, but there may be some doubt as to the actual number of destroyers and submarines to be completed in 1923 :—

	Completed at end of		
	1921	1922	1923
Dreadnoughts	11	10	10
Pre-Dreadnoughts	8	—	—
Armoured Cruisers	12	5	3
Light Cruisers	11	12	15
Torpedo Gunboats, etc.	4	4	4
Destroyers (including about 60 modern, 1923)	95	98	125
Torpedo Boats	20	12	19
Submarines	37	35	45

The following table includes all the battleships and battle-cruisers which are to be retained, and the armoured cruisers and principal protected cruisers. The *Aki*, *Mikasa*, *Satsuma*, *Settsu*, *Kashima*, *Katori*, *Hiizen*, and other older vessels have been removed from the lists (or are classed as coast-defence vessels), as well as some of the armoured cruisers and older destroyers, torpedo boats and submarines.

Year of intended scrapping	Name	Displace- ment	Armour		Main Armament	Torpedo Tubes	Indicated Horse-power	Designed Speed
			Water-line	On Guns				
<i>Dreadnoughts</i>								
1934	Kongō*	27,500	10	10	8 14 in. ; 16 6 in.	8	64,000	27

1941	Nagato	33,800	—	—	8 16 in. 20 5·5 in.	8	46,000	23·0
1942	Mutsu							

* Battle-cruisers.

The battleships *Kaga* (launched November 17, 1921) and *Tosa*, and the battle-cruisers *Atagi*, *Amagi*, *Atago* and *Takao*, all of which were in hand,

will not be completed, but the two battle-cruisers first named are expected to join the fleet converted into aircraft carriers.

1920	Yura . . .						
1920	Kinu . . .						

The *Naka*, *Abukama*, *Sendai*, *Jintsu* and *Yubari*, light cruisers of the 5,700 ton class, are in earlier stages of construction. There are the older light cruisers *Yodo*, *Suma*, *Akashi*, and *Chitose*, and several torpedo and river gunboats. The seaplane carrier *Hosho* has been completed, and another is being built. A large air service is attached to the Navy. Coastal motor-boats, each carrying 2 18in. torpedoes, have been built.

The new programme includes 4 light cruisers of 10,000 tons, 4 of 7,000 tons, 24 destroyers and about 28 submarines.

The budget estimate for 1921-22 for the cost of the Navy was approximately £51,076,000.

Production and Industry (exclusive of Formosa).

About three-fifths of the arable land is cultivated by peasant proprietors and the remaining portion of it by tenants. According to the official report of January 1, 1921, taxed land owned by private persons and local corporations was in chō (1 chō = 2 4507 acres) 15,422,879 : of which under rice, 2,929,889 ; other cereals, 2,551,068 ; forests, 8,090,433 ; plains, 1,359,003 ; pasturages, 62,075.

The forest area in 1918 was 18,628,280 chō, of which 7,228,027 belonged to the State, and 1,292,348 to the Imperial household.

The following are some agricultural statistics for three years :—

Crop	Acreage			Produce (quarters)		
	1918	1919	1920	1918	1919	1920
Rice	7,578,844	7,006,298	7,658,984	33,913,433	37,707,271	39,178,283
Wheat	1,389,448	1,343,842	1,299,007	3,987,512	3,943,725	3,636,728
Barley	1,298,607	1,308,983	1,326,260	3,188,380	6,897,746	5,139,712
Rye	1,562,169	1,533,586	1,659,571	4,822,006	4,724,830	5,144,195
Tobacco ¹	65,307	59,875	75,653	833,855	761,137	1,040,884
Tea ¹	121,676	119,665	117,957	794,234	767,753	712,278

¹ Produce in cwts.

The wheat crop in 1921 amounted to 3,564,418 quarters ; barley, 5,758,398 quarters ; rye, 4,518,931 quarters ; and rice, 33,750,000 quarters.

In 1919 the number of cattle was 1,314,865 ; horses, 1,479,682 ; sheep, 5,098 ; goats, 125,089 ; swine, 470,082

The mineral and metal products for 1920 with their values were :—

Minerals, &c.	Quantity	Value	Minerals, &c.	Quantity	Value
		Yen			Yen
Gold (monméi) ¹	2,060,537	10,352,701	Coal (metric tons)	29,245,384	418,073,754
Silver ²	40,577,090	9,865,435	Sulphur, refined (metric tons)	40,900	1,576,955

Iron pyrites ²	36,908,266	2,498,498	Total value (including others)	—	632,350,765

¹ 120 monméi = 1 lb. avoirdupois.

² kin = 1·323 lb. av.

³ kwan = 3·28 lbs.

⁴ koku = 39·7 gall.

In 1919 the number of mining workers was as follows :—in collieries, 348,240 ; in metal mines, 100,800 ; various, 16,118 ; total, 465,158.

In 1920, 5,719,988 cocoon egg-cards were hatched, and the total number of cocoons obtained was 6,333,152 koku ; (1 koku = 4·9 bushels).

The industrial census on December 31, 1919, showed that there were 23,831 factories (employing more than 10 hands). Number of employees, 1,390,942 (619,976 males and 770,966 females).

Principal manufactures in 1919 were woven goods, 2,000,743,498 yen (cotton, 1,033,831,737 yen ; silk, 673,937,366 yen ; woollen goods, 131,296,686 yen) ; Japanese paper worth 79,574,079 yen ; European paper, 112,714,137 yen ; matches, 45,952,876 yen ; earthenware, 64,659,835 yen ; lacquered ware, 24,150,237 yen ; matting, 31,611,893 yen ; leather, 28,499,383 yen ; oil, 61,839,209 yen ; knittings, 94,189,713 yen.

In April 1922 there were 60 cotton spinning companies operating in Japan, with 3,934,839 working spindles and employing 40,531 men and 125,722 women.

In 1920 the raw marine products amounted to the value of 270,294,228 yen ; the manufactured products to the value of 149,521,516 yen.

The recorded values are ascertained from shipping documents and invoices, in the case of exports being given as the market values in Japan, and of imports as the values in the countries of purchase, inclusive of the cost of transport, insurance, &c. The prime origin and ultimate destination, as far as they are known, are recorded as disclosed in the shipping documents.

Chief articles of the foreign commerce, excluding re-imports and re-exports :—

Imports	1921	1922	Exports	1921	1922
	Yen	Yen		Yen	Yen
Rice	28,812,913	61,328,000	Cotton yarn	80,568,002	114,725,000

SHIPPING, ETC.—INTERNAL COMMUNICATIONS 1099

The imports of bullion and specie (gold and silver) in 1922 amounted to 1,672,000 yen, and exports to 2,181,000 yen; in 1921, imports, 138,621,575 yen; exports, nil.

The staple articles of import from Japan into Great Britain (Board of Trade returns) in the year 1921 were silk manufactures, 1,777,315*l.*; straw plaiting, 334,835*l.*; unwrought copper, 201,181*l.*; electrical goods, 59,996*l.*; wheat, 1,253,633*l.*; paper, 36,472*l.*; soya beans, 655,154*l.* The staple articles of British export to Japan consist of cotton goods of the value of 1,201,912*l.*; cotton yarn, 361,788*l.*; woollen goods, 3,373,268*l.*; iron, wrought and unwrought, 3,823,646*l.*; machinery, 5,485,668*l.*; hats, 59,261*l.*; cycles, 452,350*l.*

Total trade between Japan and U.K. for 5 years in thousands of pounds sterling :—

	1918	1919	1920	1921	1922
Imports from Japan to U.K.	23,872	23,871	29,699	8,762	8,440
Exports to Japan from U.K.	6,039	12,913	26,603	21,434	23,974

Shipping and Navigation.

Shipping movements at Japanese ports for 2 years :—

	Entered				Cleared			
	1920		1921		1920		1921	
	No.	Tons	No.	Tons	No.	Tons	No.	Tons
Steam . .	12,223	26,082,829	11,894	27,930,507	12,227	26,532,194	11,794	27,823,773
Sailing . .	434	58,010	380	52,025	457	60,232	459	63,799
Total . .	12,657	26,140,839	12,274	27,982,532	12,684	26,592,426	12,253	27,887,572

Of the total steamships entered in 1921, 1,104 vessels of 4,859,984 tons were British; 38 of 30,152 tons Russian; 18 of 28,498 tons Norwegian; 610 of 2,527,787 tons American; 117 of 329,314 tons French; and 10,148 of 19,355,832 tons were Japanese.

On December 30, 1920, the merchant navy (without Formosa) consisted of 2,931 steamers of 3,011,634 tons gross; 14,415 sailing vessels of European style, of 976,286 tons; and 988 sailing vessels of Japanese style, of 286,873 koku. The Japanese Government subsidises shipping companies for foreign trade, and now Japanese vessels run on four great routes to Europe, North America, South America, and Australia. There are also lines plying between Japanese ports and Korea, Northern China, and nine ports on the Yangtse-Kiang.

Internal Communications.

The first railway in Japan was built in 1872, between Tokyo and Yokohama, a distance of 18 miles. By 1880 there were 73 miles of railway in operation; by 1900, 3,638 miles; by 1910, 5,130 miles; by April, 1922,

6,728 miles. The following table gives the railway statistics (including, except revenue and expenditure, Formosa) for 1920-21 :—

—	State Railways	Railways owned by Private Companies	Total
Length in miles	6,481	1,994	8,475
Gross income, yen	422,208,964	35,352,658	457,561,622
Expenditure, yen	362,835,789	22,223,199	385,058,988
Goods carried, tons	56,623,871	12,644,589	68,668,451
Passengers, number	405,819,694	116,007,153	521,826,847

It has been decided to make the standard gauge 4.85 feet. The work is expected to be completed in 1943, and the cost estimated at 1,408,000,000 yen. Japan has been conceded by China the right to build five railway lines in Manchuria and Mongolia. A railway tunnel under the MojiShimonoseki Straits was commenced in 1920 and is expected to be completed in 1928. The tunnel will connect the island of Kiushu with Honshu. The whole length of the tunnel will be 7 miles, of which one mile will be completely under the sea. Comprehensive plans have been made for the electrification of the Japanese Government railways. The first section to be electrified will be the Tokaido line, 408 miles, from Tokyo to Kobe.

There are (1920) 983 miles of electric tramway in Japan.

The following are postal and telegraphic statistics for four fiscal years :—

—	1917-18	1918-19	1919-20	1920-21

Money and Credit.

Coinage issued in the years stated :—

—	1916	1917	1918	1919	1920
	Yen	Yen	Yen	Yen	Yen
Gold coins	41,949,700	119,937,880	65,888,660	37,260,120	5,911,140
Silver "	4,883,044	9,039,384	14,187,858	7,604,912	—
Bronze "	214,310	309,831	1,205,431	2,218,226	2,819,675
Nickel "	—	335,853	469,859	2,173,124	7,910,594
Total	47,047,054	129,622,948	81,751,808	49,256,412	16,641,409

The total amount of coins in circulation at the end of 1919 was 212,589,701 yen ; notes, 1,874,011,000 yen (1,550,000,000 yen at the end of 1921). On December 31, 1921, the gold stock of Japan was 2,080,000,000

yen, of which 791,000,000 yen were held by the Government and 1,289,000,000 yen by the Bank of Japan.

The modern banking system dates from 1872. The principal banks of Japan are the Nippon Ginko (Bank of Japan), the Yokohama Specie Bank, the Hypothec Bank, the Industrial Bank of Japan, the Hokkaidō Colonisation Bank, the Bank of Taiwan, Bank of Chōsen. There are also (1920) 46 agricultural and industrial banks, 1,388 ordinary banks, and 659 savings banks. The condition of the banks (ordinary, saving and special) for three years (December 31st) was as follows.

Year	Paid-up Capital	Reserve Fund	Deposits	Net Earnings	Rate of Dividend
	Yen	Yen	Yen	Yen	Per cent.
1918 . .	899,047,988	333,192,641	8,025,867,338	112,943,010	8.2
1919 . .	1,209,002,014	336,018,713	9,694,304,346	298,192,220	10.5
1920 . .	1,576,072,376	454,654,944	9,539,303,248	244,853,492	7.7

The total postal bank savings on December 31, 1921, amounted to 900,922,684 yen, the number of depositors being 24,978,309. At the end of 1920 there were 203 Mutual Loan Societies with a paid-up Capital of 4,497,408 yen.

Money, Weights, and Measures.

The present monetary law came into force from October, 1897, by which gold standard was adopted. The unit of value is 0.75 gramme of pure gold, and is called the yen = 24. 0 $\frac{1}{2}$ d., which, however, is not coined. The pieces coined are as follows:—Gold coins (20, 10, and 5 yen pieces), silver coins (50, 20, and 10 sen pieces), nickel coin (10 and 5 sen pieces), and bronze coins (1 sen and 5 rin pieces). The sen is the hundredth part of a yen, and the rin is the tenth part of a sen. The gold coins are 900 fine, and the silver coins 800 fine. The gold coins formerly issued (20, 10, 5, 2, and 1 yen pieces) are used at double their face value. The one-yen silver coin formerly issued is withdrawn. The old copper 2, 1 and $\frac{1}{2}$ sen pieces, are used as formerly.

The <i>Kin</i>	= 160 <i>momme</i>	= 1.323 lb. avoirdupois
„ <i>Kwan</i>	= 1,000 „	= 8.267 lbs. „
„ <i>Sun</i>	= 1.193 inch.
„ <i>Shaku</i> (10 sun)	= 11.930 inches.
„ <i>Ken</i>	= 6 <i>shaku</i>	= 5.965 feet.
„ <i>Chō</i>	= 60 <i>ken</i>	= $\frac{1}{5}$ mile, 5.4229 chains.
„ <i>Ri</i>	= 36 <i>chō</i>	= 2.44 miles.
„ <i>Ri sq.</i>	= 5.9552 sq. miles.
„ <i>Chō</i> , land measure	= 2.45 acres.
„ <i>Koku</i> , liquid	= 39.6804 gallons.
„ „ dry	= 4.9601 bushels.
„ <i>Tō</i> , liquid = $\frac{1}{10}$ <i>koku</i>	= 3.9680 gallons.
„ „ dry	= 1.9851 peck.

The metric system was made obligatory by a law passed in March, 1921, but has not yet been enforced. The following rates are recognised:—

metre = 3.3 *shaku*.

gramme = 0.266667 *momme* ($\frac{1}{3}$ *momme*)

Diplomatic Representatives.**1. OF JAPAN IN GREAT BRITAIN.**

Ambassador Extraordinary and Plenipotentiary. — His Excellency Baron Gonsuké Hayashi, G.C.V.O. Born in 1861. (Appointed May 27, 1920.)

First Secretaries. — Iyemasa Tokugawa, O.B.E., and Takezo Okamoto.

Second Secretary. — Gicho Nishisawa.

Third Secretaries. — Kojiro Inoué, Katsutaro Miyasaki, Kikusuki Minetomo, Katsusaburo Sasaki, Toyokichi Fukuma, and Yakichiro Suma.

Attachés. — Yokichi Okuma, Takemi Miura, and Nobushiro Sugiyama.

Naval Attaché. — Rear-Admiral Tamaki Tosu, C.B.

Military Attaché. — Commander Renichuro Okamoto.

Financial Attaché. — Kengo Mori, C.B.

Commercial Attaché. — Shinjiro Matsuyama.

Chancellors. — Saburo Kasawara, Chuhei Umino, and Tsuneo Hattori.

Consul-General in London. — Yoshiatsu Hori (1923).

There are Consuls at Glasgow, Liverpool, Cardiff, and Middlesbrough.

2. OF GREAT BRITAIN IN JAPAN.

Ambassador Extraordinary and Plenipotentiary. — Rt. Hon. Sir Charles N. E. Eliot, K.C.M.G., C.B., appointed September, 1919.

Counsellor. — C. M. Palairt, C.M.G.

Secretaries. — J. H. S. Birch, H. F. B. Maxse, and J. L. Dodds.

Naval Attaché. — Captain R. M. Colvin, C.B.E., R.N.

Military Attaché. — Lt.-Col. F. S. G. Piggott, D.S.O.

Japanese Counsellor. — H. G. Parlett.

Commercial Counsellor. — Sir E. T. F. Crowe, C.M.G.

There are Consular Representatives at Dairen (Dalny), Hakodate, Kobé, Nagasaki, Yokohama, and at Tainan and at Tamsui in the Island of Formosa.

KOREA (CHŌSEN).

Government. — The ex-Emperor, whose surname is Yi and name Chōk, was born March 25, 1874, and succeeded his father, Yi Hiung, on the latter's abdication, July 20, 1907. He is reckoned as the thirty-first in succession since the founding of the dynasty in 1392; but four of the so-called Kings were Crown Princes who never ascended the throne.

For details of treaties between Japan and China, Russia, and Korea from 1895, see THE STATESMAN'S YEAR-BOOK for 1916, p. 1112.

By a treaty concluded between Japan and Korea on August 22, 1910, the Korean territory was formally annexed to the Empire of Japan. The Emperor was deprived of all political power, and was accorded the title of Prince Yi, and his father (the former ex-Emperor), who died in January, 1919, that of Prince Yi, Senior. The title of the country was changed back to "Chōsen," from Tai Han, which had been adopted in 1897, and the office of Japanese Governor-General established. Henceforth Korea became an integral part of the Japanese Empire. By an Imperial Rescript of 1919, Korea is to be treated as in all respects an integral part of Japan, Koreans to be on the same footing as Japanese. Members of the Korean Imperial House and the late Korean Cabinet have had Japanese

patents of nobility conferred upon them. In 1919 certain changes were introduced with a view to assimilate more closely the Korean administration with that of Japan.

Governor-General.—His Excellency Baron Minoru Saito (September, 1919).

Area and Population.—The area is 85,156 square miles. Census population 1920, 17,264,119 (25,061 foreigners). Estimated population on December 31, 1921, 17,452,928 (17,059,358 Koreans, 367,618 Japanese, and 25,952 foreigners). The vast majority of the foreign residents are Chinese, numbering 23,989 at the end of 1920. The latest returns (December 31, 1920), give the number of British subjects as 204, Americans 705, French 73, and Germans 54. At the end of 1920 the population of the largest cities and towns was as follows:—Keijo-fu (Seoul), 250,208 (65,617 Japanese), Fuzan-fu (Pusan), 73,855 (33,085 Japanese), Heijo-fu (Pyongyang), 71,703 (16,289 Japanese), Taikyū-fu (Tai-Ku), 44,707 (11,942 Japanese).

The language of the people is intermediate between Mongolo-Tartar and Japanese, with a large admixture of Chinese words, and an alphabetical system of writing is used. Official correspondence, except with Korean provincial officials, is conducted in Japanese. The written language of the people is a mixture of Chinese characters and native script.

Religion and Instruction.—The worship of ancestors is observed with as much punctiliousness as in China. In the country there are numerous Buddhist monasteries, which, however, are looked upon with scant respect. The knowledge of Chinese classics and of Confucian doctrine, formerly essential to the education of the upper classes, is giving way under Japanese influence to a more practical system of instruction. There is a large number of Christian converts. In 1890 an English Church mission was established, with a bishop and 20 other members. At the end of 1920 there were 3,279 Christian Churches with 2,477 pastors and 1,407 Buddhist temples with 7,913 priests. The American missionaries have two hospitals in Seoul, where the Japanese have also established a large Government hospital. The number of government hospitals in the country was 25 on March 31, 1922; while the Red Cross Society has a numerous membership (about 35,900) among both Japanese and Koreans. There are over 250 Protestant missionaries (British and American), and 60 Roman Catholic, also a Russian Greek Church mission in Seoul.

There are numerous Christian Mission schools for boys and girls throughout the country. Technical and industrial schools are rapidly springing up. A model farm and agricultural school has been established at Suigen. At the end of May 1920, there were for the education of Japanese 399 elementary schools with 45,699 pupils, 5 middle schools with 2,197 pupils, 1 medical school with 100 students, 11 girls' high schools with 2,342 pupils, 4 special industrial schools with 846 pupils and various kindergarten and private schools. For the education of Koreans there were 595 common schools with 107,282 pupils, 14 higher common schools with 3,513 pupils, 7 girls' higher common schools with 771 pupils, besides various industrial schools, a medical and technical college at Keijo with 164 and 234 students respectively. On March 31, 1922, there were 1,247 schools of all kinds with 227,652 pupils.

In Seoul there are three daily Korean newspapers, and 2 Japanese, besides others published at Chemulpo and in other parts of the country. There is a Government-owned daily newspaper in English, published at Seoul.

Finance.—The finances of Korea form a special account in the Budget of Japan. The estimated revenue for two years is shown as follows (1 yen = 2s. 0½d. nominally):—

Revenue.	1921-22	1922-23	Expenditure.	1921-22	1922-23
	Yen	Yen		Yen	Yen
Ordinary ...	96,121,020	101,547,184	Ordinary ...	101,415,683	102,564,997
Extraordinary ...	61,235,688	56,183,869	Extraordinary ...	55,926,606	55,166,056
Total ...	157,356,717	157,731,053	Total ...	157,342,289	157,731,053

The main sources of revenue are taxes and public undertakings.

The total debt on March 31, 1922, was 37,671,210 yen.

Production.—Korea is almost entirely an agricultural country; the cultivated area at end of 1920 was 10,588,985 acres. The chief crops are rice, barley, wheat, beans, and grain of all kinds, besides tobacco and cotton. The rice crops for 5 years were (in bushels):— 1917, 67,938,346; 1918, 68,622,018; 1919, 62,561,761; 1920, 73,859,654; 1921, 71,626,630; 35,077,500 bushels of barley were produced in 1921; 23,576,865 bushels of Soya Beans, 154,145 cwt. of tobacco, 1,041,874 cwt. of Upland American cotton and 309,449 cwt. of native cotton (1920). Whale fishing is carried on on the coast. Silkworm rearing is also carried on and in 1920 there were 485,100 sheets of eggs hatched producing 132,946 koku of cocoons. Live-stock is raised as a by-product of agriculture. The cattle are well known for their size and quality. In 1920, there were 1,489,797 cattle, 54,521 horses, 1,077,789 pigs, 10,444 donkeys and 21,075 goats. The fishing industry is developing; value of catch in 1920, 39,264,645 yen.

Gold mining is carried on; the value of the 1920 output was 3,583,465 yen. There are four foreign-owned gold mines in active operation. Copper, iron, and coal are abundant in Korea, but the development of these resources is impeded by defective means of communication. The output of pig iron in 1920 was valued at 8,266,823 yen; iron ore at 4,189,848 yen; and coal 3,917,153 yen. An anthracite coal mine in the north of Korea is in operation. Graphite and mica also are found in considerable quantities. The total value of mineral products in 1921 was 15,537,225 yen. The government has the monopoly of ginseng, salt and tobacco, the latter yielding 282,321 cwt. in 1920. At end of 1919 there were 1,900 factories with a capital of 129,378,762 yen, and 48,705 employees, while the value of the output was 225,404,275 yen.

Commerce.—The open ports are Seoul, Chemulpo, Fusan, Wousan, Chinnampo, Mokpo, Kunsan, Songchin, Ping-Yang (inland city), Wiju, Yong Am-Po (1908), Yuki, Chung-jin and Shin-wi-ju.

Trade (merchandise only) at the open ports:—

	1917	1918	1919	1920	1921
	Yen	Yen	Yen	Yen	Yen
Imports	102,886,736	158,309,363	280,786,318	249,286,544	232,381,584
Exports	83,775,387	154,189,148	219,665,781	197,020,194	218,277,223

The imports in 1921 included cotton goods, 44,864,861 yen; cotton yarn, 3,873,909 yen; machinery, 5,448,568 yen; silk goods, 545,087 yen;

timber, 7,955,857 yen ; kerosene oil, 4,384,144 yen ; grass cloth, 5,527,151 yen ; sugar, 4,546,180 yen ; paper, 4,542,182 yen ; and coal, 8,767,363 yen. The principal exports were rice, 92,812,971 yen ; beans, peas and pulse, 24,381,144 yen ; hides, 2,719,535 yen ; cattle 3,583,897 yen ; and gold ore, 2,499,322 yen. Of the total imports in 1921, the value of 156,482,573 yen was from Japan ; of the exports, the value of 197,392,646 yen was to Japan. From Great Britain and the United States of America respectively, imports amounted to 7,808,066 yen and 14,374,153 yen.

Shipping and Communication.—The foreign-going shipping entered at the open ports in 1921 had a tonnage of 500,570, and those that cleared a tonnage of 480,115.

Transport in the interior is by porters, pack-horses and oxen, and by river. Improvements in road making are being effected. At the end of March 1920 there were 4,060 miles of completed roads. Length of railways, 1922, 1,450 miles, of which 1,170 miles are government lines, operated by the South Manchuria Railway Company in connection with their Manchurian system ; number of passengers carried (1921-22), 13,821,144.

Number of post offices (1922) 602. There were 16,712 miles of telegraph line open (March 1922), and the lines connect with the Japanese and the Chinese systems. The telephone has been introduced at Seoul, Chemulpo, and several other towns ; length of lines 31,754 miles (1922). During the fiscal year ending 1920 there were 13,142 telephone subscribers and 59,974,020 calls were made, 9,457,705 telegrams were also sent.

In 1921, 134,879,283 ordinary mails were collected and 145,115,035 delivered, 1,654,961 parcels were collected and 2,230,625 delivered.

Money.—Regulations for banking were framed in 1906. In 1921 there were 21 ordinary banks with 18,050,000 yen paid-up capital, and deposits amounting to 54,423,000 yen.

A central bank, the Bank of Chōsen, was established in August, 1909, and in November it took the place of the First Bank of Japan (Dai-Ichi-Ginko) as the Government Treasury. Notes of this bank are permitted to circulate unrestrictedly within the jurisdiction of the Government-General of Chōsen and are exchangeable with gold coin and convertible notes issued by the Bank of Japan. The Bank of Chōsen has a paid-up capital (1922) of 50 million yen, the deposits amounting to 152,726,545 yen (June 30, 1922). Notes issued to June 30, 1922, 95,000,000 yen. Against their issue must be provided a reserve of the same amount, consisting of gold coin, gold and silver bullion, and convertible notes of the Bank of Japan ; silver bullion, however, must not exceed one-fourth of the total reserve. The savings bank in 1921-22 had 1,416,325 depositors with a total amount 68,726,438 yen.

The coinage consists of gold pieces of 5-, 10-, and 20-yen, silver of 10-, 20-, and 50-sen, nickel of 5 sen, and bronze of 1-sen. The gold coins, however, are not in general use, the ordinary medium of commerce being the notes of the Bank of Japan or of the Bank of Chōsen which are issued in the following denominations, viz. : 100 yen, 20 yen, 10 yen, 5 yen, 1 yen and 50 sen. Notes of smaller value largely issued during the last few years are being withdrawn from circulation. The old nickel coin has been practically wholly withdrawn from circulation, and the cash currency is now rarely seen, and then only in remote parts of the country. Under certain regulations, bills of exchange and cheques may pass into the currency. In

the more important commercial towns there are authorised 'note associations' of merchants for the transaction of business relating to bills.

British Consul-General at Seoul.—A. Hyde Lay, C.M.G.

Vice-Consul at Seoul.—W. B. Cunningham.

FORMOSA (TAIWAN).

THE Island of Formosa, or Taiwan, was ceded to Japan by China by the treaty which was ratified on May 8, 1895, and Japan took formal possession on June 2 of the same year. Japanese civil government in the island began on March 31, 1896.

Governor-General.—Baron Kenjiro Den.

The Island has an area of 13,839 square miles, with a population (1919) of 3,714,899 (1,921,237 males and 1,793,662 females). Census population 1920, 3,654,398. There were 153,330 Japanese, and 22,888 foreigners in the Island in 1919. The chief towns are Taihoku (162,782 inhabitants in 1920), Tainan, Kagi and Taichu.

Many improvements have been effected by the Japanese administration. A colonising scheme was commenced in 1909, whereby Japanese were settled in Taiwan. There are four villages containing (1916), 652 families consisting of 3,268 persons. An educational system has been established for Japanese and natives. In 1919 there were for the instruction of the Japanese 123 primary schools, with 621 teachers and 18,048 pupils; 4 other schools, with 99 teachers and 1,917 pupils. For the instruction of the natives there were 438 schools, with 3,451 teachers and 129,580 pupils; and 5 other schools, with 119 teachers and 1,130 pupils. There are also normal schools, a medical school, and a school for teaching the Japanese language to natives, and native languages to Japanese.

The receipts of the Japanese administration are from inland taxes, customs, public undertakings, and also subsidies from Japan ranging from 5 to 9 million yen annually. The expenditure is chiefly for internal administration and the working of public undertakings.

¹ Estimates.

The agricultural products of Formosa are rice, tea, sugar, sweet potatoes, ramie, jute, turmeric; while camphor is worked in the forests under a Government monopoly. The production of camphor was in 1917-18, 4,297,662 lbs.; in 1918-19, 3,122,733 lbs.; in 1919-20, 2,933,333 lbs.; in 1920-21, 4,000,000 lbs. Production of rice (two crops) in 1922, 27,434,900 bushels; production of sugar 1921-22, 5,564,739 piculs, produced on an area of 561,415 acres. There are active fisheries: value of catch in 1919, 5,057,969 yen. The number of animals (December 31, 1919) was:—horses, 137; goat, 3, 99,493; cattle, 404,162; pigs, 1,313,067. The industries comprise flour-milling, sugar, tobacco; oil, spirits, iron-work, glass, bricks, soap,

and many other manufactures. Mining is making steady progress: gold (863,995 yen); silver (41,459 yen); copper (713,221 yen); and coal (8,825,002 yen) being the principal minerals in 1919; the output of coal in 1920 was 1,130,528 tons. The total value of minerals in 1919 was 11,167,426 yen. There are 60 sugar mills in Taiwan.

The commerce of Formosa is largely with Japan; of the foreign countries with which there is traffic, China and the United States are the most important. In 1921 the imports from Japan amounted to 93,521,168 yen; exports to Japan 128,896,879 yen. Imports from other foreign countries, 40,433,290 yen; exports to other foreign countries, 23,541,621 yen. The chief exports in 1920 were tea, 6,400,258 yen; sugar, 6,718,703 yen; camphor, 4,335,487 yen; coal, 8,982,299 yen. The chief imports were opium, 6,062,314 yen; rice, 3,945,203 yen; oil-cake, beans and tea-seed, 12,405,898 yen.

In 1919, 2,757 vessels, of 1,117,899 tons entered and cleared the ports of Taiwan.

Roads have been and are being constructed throughout the Island. There were, in 1920, 369 miles of railway open. In 1920 there were 168 post offices, through which passed 54,140,019 packets and 785,965 parcels. The telegraph service has 166 offices; length of line 661 miles; of wire, 3,038 miles; messages (1920), 2,963,629. Telephone line, 997 miles; calls, 35,674,560.

At the end of 1920 the post office savings bank had 396,578 depositors with 6,312,142 yen to their credit.

The coinage current in the Island is that of Japan.

Hōkotō, or the **Pescadores**, consist of about 12 islands, with a total area of about 50 square miles.

Japanese **Sakhalin** (or **Karafuto**) consists of that portion of Sakhalin which lies to the south of the parallel of 50° north latitude. It has an area of about 13,148 sq. miles, and, in 1920, a population of 91,136 (51,314 males and 39,822 females). The most important industry of the island is the herring fishery, but large areas are fit for agriculture and pasturage, and Japanese settlers have been provided with seed and domestic animals. There is a vast forest area of larch and fir trees. The minerals found are coal and alluvial gold; coal raised in 1920, 154,193 tons.

The revenue for the year ending March 31, 1922, is estimated at 14,045,806 yen, and expenditure the same.

The leased Territory of **Kwantung**, the southern part of the Liaotung Peninsula, has an area of about 538 sq. miles, and a population (December 31, 1920) of 667,382 (392,289 males and 275,093 females), of whom 592,913 (240,728 females) are Chinese and 74,290 (34,289 females) Japanese (exclusive of army and navy). The Territory is under a Japanese governor-general, the seat of administration being at Dairen (or Tairend, formerly called Dalny). In 1920 there were 36 elementary schools with 16,532 pupils, 5 other schools with 1,786 pupils for the instruction of the Japanese, and 135 schools with 21,776 pupils for the instruction of the natives; also an American Presbyterian Mission with a church and a hospital.

The estimated revenue and expenditure for 1921-22 balance at 15,929,087 yen.

The chief agricultural products of the Territory are maize, millet, beans, wheat, buckwheat, rice, tobacco, hemp, and various vegetables. There is an active fishing industry, the value of the catch in 1920 (14,059 tons) being 1,944,504 yen as compared with 11,354 tons in 1919, valued at 2,222,924 yen. The chief manufactured product is salt, which is abundant in the Territory. Since July 1, 1907, the Territory forms a Customs district under the Chinese Imperial Customs, Dairen being the Customs port, with out-stations at Kinchow, Pulantien, Pitzewo, and Port Arthur. The port is free, goods being subject to duty only on crossing the frontier of the leased territory. The trade is mostly with Japan and China. Imports (1920), 81,211,303 haikwan taels (tael = about 4s. 4d.) ; exports, 115,030,780 haikwan taels, of which 48,077,331 hk. tls. was imported from Japan, and 59,923,856 hk. tls. exported to that country. Dairen has a fine harbour, ice-free all the year, and protected by a breakwater 1,000 yards long. The harbour is provided with sheds and warehouses, under the control of the South Manchuria Railway Company. The railway connects Port Arthur and Dairen with Mukden, Kharbin, and the Eastern Chinese Railway System. 8,128,411 passengers and 10,154,259 tons of goods were carried during 1920. In 1920 its total length was 686 miles.

Gold and silver coin and the notes of the Yokohama specie bank are current.

Pacific Islands.—Under the Treaty of Versailles Japan was appointed mandatory to the former German possessions north of the Equator. These include :—(1) *The Marianne (or Ladrone) Islands*.—By treaty of February 12, 1899, these islands, with the exception of Guam (the largest of the Marianne Islands) ceded to the United States in 1898, passed on October 1, 1899, from Spanish to German possession for payment of 840,000*l*. Sipan is the seat of Government. The Japanese population of the islands numbers 1,754, and the natives 3,638. The northern group is actively volcanic and uninhabited.

(2) *The Caroline Islands*.—The Carolines consist of about 500 coral islets, Ponapé having about 2,000 inhabitants, Yap 7,155, and Kusai 400. The population is mainly of Malay origin, with some Chinese and Japanese. The chief export is copra. For administrative purposes the islands were divided into two groups : (a) the Eastern Carolines, with Truk and Ponapé as the centres of administration. There are in Truk 169 Japanese, 5 Europeans, and 15,004 natives ; in Ponapé there are 193 Japanese, 5 Europeans, and 6,778 natives. (b) The Western Carolines, with Palau and Yap as administrative centres. There are in Palau 206 Japanese, 4,598 natives, 1 European, and 15 Chinese. In Yap there are 76 Japanese, 8,537 natives, and 3 Europeans.

(3) *Marshall Islands*.—The Marshall Islands, consisting of two chains or rows of lagoon islands (several uninhabited), known respectively as Ratack (with thirteen islands) and Ralick (with eleven islands), first came under German rule in 1885. The population consists of 102 Japanese, 5 Europeans, and 8,901 natives. The chief island and administrative centre is Jaluit ; the most populous island Majeru, with 2,600 inhabitants. Protestant (American) and Catholic missions are at work. There are plantations of coco-palm (1,275 hectares). The chief export is copra.

LATVIA.

(REPUBLIKA LATVIJA.)

LATVIA, along the southern part of the Baltic littoral, is inhabited chiefly by Letts. As early as the 13th century the Letts fought against the German (battle of Durbe, 1260), but in the long run the Germans carried the day, and the state created by the Teutonic Order under the form of a Federal Republic (consisting of Estonia, Latgale, Livonia, and Courland) lasted until 1560. Eventually, Estonia passed under the rule of Sweden, Latgale and Livonia under that of Lithuania-Poland, while Piltene and Oesel

became Danish. Courland alone retained her independence under the form of a vassal duchy of Lithuania-Poland. In 1621 Livonia was annexed by Sweden, and in 1710 by Russia. In 1772, after the first partition of Poland, Latgale was assigned to Russia, and in 1795 Courland joined Russia. From this time onwards, Latvia was under Russian rule.

In 1917 Lettish public opinion expressed itself in favour of the separate existence of Latvia, and announced its view officially in the Russian Constituent Assembly in January 1918. An organization for establishing the independence of the country was formed, and on November 18, 1918, it proclaimed in Riga the sovereign Free State of Latvia, which was recognised as an independent State by most of the Powers, and was admitted to the League of Nations on September 22, 1921.

Constitution and Government.—The Latvian Constitution which was passed by the Constituent Assembly on February 15, 1922, declares that Latvia is an independent democratic Republic and that the sovereign power of the State is vested in the Latvian people. The *Saeima* (Parliament) consists of 100 representatives elected for 3 years by universal, equal, direct, and secret vote on the basis of proportional representation, by citizens of both sexes over 21 years of age. Its powers expire on the day on which the new *Saeima* assembles. The *Saeima* elects the President of the State by absolute majority, and he holds office for 3 years. No person can hold this office for more than 6 consecutive years. The President must be over 40 years of age. He is the Chief of the armed forces of the State, and, for the period of war, appoints a commander-in-chief. War can only be declared after a vote of the *Saeima*. The President chooses the Prime Minister, who forms the Cabinet. The President may propose the dissolution of the *Saeima*, which proposal shall then be followed by a vote of the people. If this proposal is accepted by the people, the *Saeima* is dissolved and new elections are proclaimed; if not, the President of the State is to be considered as having resigned and the *Saeima* elects a new President. All citizens are equal before the Law. The Judges are independent and irrevocable. The State Control is an independent collegial institution elected by the *Saeima* for a definite period.

The national flag is made up of horizontal stripes of red, white and red, the white stripe being one-fifth of the width of the flag.

The *Saeima* was elected on October 7 and 8, and assembled on November 7, 1922. The political grouping is as follows: 30 Social Democrats (Left); 17 Farmers' Union, 7 Social Democrats (Right); 6 Democratic Centre Party; 6 Latgallian Christian Farmers; 4 Christian Nationalists; 4 Latgallian Labour Party; 4 Independent National Centre Party; 3 Settlers' Party; 1 each of the Latgallian People's Party, Latgallian Farmers' Union, Catholics, and National Minorities; 6 Germans; 2 Jewish Group; 2 Agudas Israel; 1 Zeire Zion; 2 Russians; 1 Russian Old Believer; 1 Pole and 1 Jewish "Bund."

The Ministries are those of Interior, Foreign Affairs, Finance, Trade and Industry, National Defence, Public Works, Education, Agriculture, Justice, and Communications.

President of the State.—J. Tschakste.

Prime Minister.—Jahnis Pauluks (appointed January 13, 1923).

Area and Population.—Latvia consists of the former Russian Province of Courland (about 10,485 square miles), four southern districts (Riga, Wenden, Wolmar, Walk) of the former Russian province of Livonia (about

8,715 square miles) and three western districts (Dvinsk, Reshitza, Lutsin) of the former Russian province of Vitebsk (about 5,292 square miles), making a total of about 24,440 square miles, or, including inland lakes, about 25,000 square miles. The total length of the frontier line of Latvia is 1,040 statute miles, with a coast line of 338 statute miles. For administrative purposes Latvia is divided into: Vidzeme (Livonia), Latgale, Kurzeme (Courland), and Zemgale.

The chief towns are Riga (the capital of Latvia), population (1920) 185,137, Libau (51,533), Mitau (19,643), Windau, Wenden, Wolmar, Walk, Daugavpils (Dvinsk).

The census taken on June 15, 1920, showed a population of 1,503,193 in Latvia. Of these 1,416,090 were Latvian citizens, and 87,103 foreigners. Of the Latvian citizens 80.41 per cent. were Letts, 8.86 per cent. Russians, 4.29 per cent. Jews, 3.23 per cent. Germans, 2.19 per cent. Poles, 0.52 per cent. Lithuanians, 0.25 per cent. Estonians, and 0.25 per cent. other nationalities.

The population on January 1, 1922, was 1,850,622. The birth-rate during 1921 was 20 (111 boys to 100 girls), and the death-rate 14 per 1,000.

Religion and Instruction.—The majority of the population in Latvia is Protestant (58 per cent.), but in Latgale and one district of Courland there are also many Roman Catholics (23 per cent.), while in Riga, Windau and south-east of Livonia there are about 200,000 Greek Orthodox Letts (8.7 per cent.). Jews form about 5 per cent. of the population. According to a Draft Bill to be presented to the *Saeima* there is to be no State Church.

On December 31, 1921, there were 1,725 elementary schools in Latvia, with 165,598 pupils and 5,530 teachers. Most of these schools were supported by the State or municipal institutions, only 99 being supported by private persons or societies. The State or municipal institutions also supported 59 secondary schools, 48 being supported by private persons or societies. In these 107 secondary schools 1,882 teachers taught 15,080 pupils.

Each national minority has the right to its own schools (elementary and secondary) with its own language of instruction. The State contributes to the maintenance of these schools according to the percentage of inhabitants of the respective national minorities. In 1921, instruction was given in elementary schools in the following languages (figures in brackets refer to secondary schools):—

Language	No. of Schools	No. of Pupils	No. of Teachers
Lettish	1,317 (60)	120,858 (9,382)	3,662 (1,080)
German	73 (10)	9,057 (1,582)	453 (181)
Russian	198 (25)	17,257 (2,923)	715 (431)
White Russian	46 (—)	2,202 (—)	92 (—)
Hebrew	51 (9)	8,738 (1,103)	393 (164)
Polish	28 (3)	5,417 (90)	173 (26)
Lithuanian	6 (—)	752 (—)	35 (—)
Estonian	6 (—)	287 (—)	7 (—)
Total	1,725 (107)	165,598 (15,080)	5,530 (1,882)

Formerly the University of Dorpat served the whole of the Baltic provinces of Russia, and as Dorpat became an Estonian institution, the

Riga Polytechnic was in 1919 raised to be the Latvian University. The number of students is (1922) 5,421, and of professors, 161. There are also 34 technical schools with 3,059 pupils and 297 teachers. A Musical Academy has also been re-opened in Riga.

Finance.—Budget estimates for three years are shown as follows :—

	1920-21	1921-22	1922-23
	Latvian Roubles	Latvian Roubles	Latvian Roubles
Revenue . . .	4,516,000,000	9,855,893,800	9,585,364,831
Expenditure . . .	4,516,000,000	9,855,893,800	9,585,364,831

The National Debt of Latvia on October 1, 1922, was as follows :—To United States of America, 2,521,870 dollars ; to American Relief Administration, 2,610,418 dollars ; to Norway, 6,737,558 crowns ; to Great Britain, 20,169*l.* ; to France, 1,741,516 francs ; to private banks, 178,400*l.* The internal debt amounts to 18,619,700 Latvian roubles ; and currency notes, 2,418,974,481 Latvian roubles.

Defence.—The standing army numbers 19,000 men. .

The only fighting vessel appears to be the ex-German gunboat M68, now named *Virsaitis*.

Production and Industry.—Latvia is mainly an agricultural country, but an increasing number of people are passing from agricultural to industrial life. In 1922 the principal crops were rye, 583,166 acres, 7,397,296 bushels ; barley, 387,954 acres, 6,857,294 bushels ; oats, 674,595 acres, 18,870,189 bushels. At present Latvia can export in large quantities only flax and timber. Before the war the Latvian flax crop averaged about 35,000 tons per annum, but this season (1922-23) only 15,000 tons are estimated to be available for export. Latvian timber lands, State and private (3,775,000 acres), produce annually about 172 5 million cubic feet of timber, mostly redwood, which can be exported to the extent of about 14 per cent either as logs or sawn goods, or manufactured into furniture, or building material. On December 31, 1921, there were 1,709 industrial enterprises in Latvia, employing 28,643 hands.

Live-stock in 1921 : horses, 282,500 ; cattle, 799,500 ; sheep, 1,332,000 ; pigs, 482,000.

Latvia does not possess any mineral wealth, although brown coal has been found in the country. The extensive peat bogs of Latvia can be utilised for fuel. A scheme is under consideration to harness the waters of the Dvina for generating electricity at the expenditure of 7,000,000*l.* When fully equipped the stations will be able to generate 360,000 horse power.

Commerce and Communications.—Latvia possesses about 340 miles of sea-coast ; its 3 principal harbours are Riga, Libau, and Windau. Three Russian main lines converge on Latvian ports, viz. the Riga-Tsaritsin line, the Windau-Moscow line, and the Libau-Romni line.

In 1921 the imports amounted to 4,684,892,947 Latvian roubles, and the exports to 1,958,233,720 roubles. Of the imports 48 per cent. were from Germany, 14 per cent. from Great Britain, and 9 per cent. from the United States ; of the exports, 35 per cent. were to Great Britain, 18 per cent. to Germany, and 16 per cent. to Belgium.

The commerce in 1921 was distributed as follows (in millions of Latvian roubles):—

	Imports	Exports
Raw materials and semi-manufactured articles	1,344·6	1,759·8
Manufactured articles	1,552·8	122·2
Food products	1,742·8	76·2
Cattle	41·7	—
Total	4,684·9	1,958·2

Total trade between Latvia and the United Kingdom for 2 years (according to Board of Trade returns):—

	1921	1922
	£	£
Imports from Latvia into the United Kingdom	1,618,046	2,991,351
Exports to Latvia from the United Kingdom	521,239	1,093,578

On January 1, 1922, 20 steamboats of 23,096 tons, and 62 sailing vessels of 10,783 tons, making a total—including several motor vessels and 1 ice-breaker—of 91 vessels of 33,984 tons, were sailing under the Latvian flag.

In 1921, 2,104 vessels of 784,850 tons entered and 2,038 vessels of 774,257 tons cleared the ports of Latvia.

To facilitate the transit of goods to and from Russia, the Latvian main lines converging on the ports of Riga and Windau have been altered to the Russian gauge, while for Western traffic (Riga-Ostend-Paris line) and internal communications the normal and narrow gauges are used. Of the total length of Latvian railways—1,861 miles in 1921—916 miles were of Russian gauge and 290 miles of the normal gauge. There were also 470 miles of macadamised high roads. The navigable inland waterways (170 miles) carried about 58,000 tons of goods.

Money, Banking, and Currency.—The only legal tender in Latvia up to November 1, 1922, was the Latvian rouble, of which 2,418,974,481 were issued and guaranteed by all property of the State. The stabilisation of the rouble at 50 to one franc gold permitted the change over to the latter currency. On November 1, 1922, the Bank of Latvia (*Latvijas Banka*), the chief shareholder of which is the Latvian Government, began its operations. Now only this Bank has the right to issue currency notes. These notes are entirely covered by gold, £ and \$; in its calculations £1 covers 20 francs gold. One franc contains 2903226 grammes of pure gold.

Up to January 1, 1922, there were 10 joint stock banks, 25 mutual credit institutions, and 115 co-operative credit societies in Latvia, with aggregate balances of 769,096,083 Latvian roubles, and 1 State Credit and Savings Bank with a balance of 763,917,946 roubles.

The metric system has been established by law, but the old Russian system of weights and measures may be used until January, 1, 1924.

Diplomatic Representatives.

1. OF LATVIA IN GREAT BRITAIN.

Envoy and Minister.—G. W. *Bissenceck* (appointed November 7, 1921).
First Secretary.—J. *Gilbert*.

There is also a Consulate-General in London, and consular representatives in Belfast, Hull, Newcastle, Swansea, and other towns.

2. OF GREAT BRITAIN IN LATVIA.

Envoy and Minister.—J. C. T. *Vaughan*, C.M.G., M.V.O. (appointed November 2, 1922).

There are consular representatives in Riga and Libau.

LIBERIA:

Constitution and Government.—The Liberian Republic had its origin in the efforts of several colonisation societies of Europe and America to make permanent provision for freed American slaves. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On July 26, 1847, the State was constituted as the Free and Independent Republic of Liberia. The new State was first recognised by France and Great Britain, and ultimately by other Powers. The Constitution of the Republic is on the model of that of the United States, with trifling exceptions. The executive is vested in a President and a Council of 6 Ministers, and the legislative power in a parliament of two houses, called the Senate and the House of Representatives. The President and the House of Representatives are elected for four years, and the Senate for six years. The President must be at least thirty-five years of age, and have real property to the value of 600 dollars, or 120*l*. Electors must be of negro blood, and owners of land. The natives of the country are not excluded from the franchise, but, except in the centres of civilisation, they take no part in political life. The official language of the Government is English.

• *President of Liberia.*—Hon. Charles D. B. *King* (1920–24).

• *Vice-President.*—Hon. Samuel A. *Ross* (1920–24).

• The President is assisted in his executive function by the Secretary of State, the Secretary of the Treasury, the Secretary of the Interior, the Attorney-General, the Postmaster-General, the Secretary for War and Navy, and the Secretary for Education.

Area and Population.—Liberia has about 350 miles of coast line, extending from the British colony of Sierra Leone, on the west, to the French colony of the Ivory Coast on the east, and it stretches inland to a distance, in some places, of about 200 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1892 and 1907-10. Early in 1911 an agreement was concluded between the British and Liberian Governments transferring the territory of Kanre Lahun to Sierra Leone in exchange for a strip of undeveloped territory of about the same area on the south side of Morro River, which now becomes the boundary.

The total area is about 40,000 square miles. The total population is estimated at 1,500,000 to 2,000,000, all of the African race. Since the organisation of the frontier force the Government has obtained complete control of Northern Liberia and of the Kroo countries in Southern Liberia. The indigenous natives belong in the main to six principal stocks: (1) the Mandingos (Muhammadan), (2) the Gissi; (3) the Gola, (4) the Kpweni, (5) the Kru negroes and their allies, and (6) the Greboes. The Kru tribes are mostly Pagan. The number of American Liberians is estimated at about 12,000. About 50,000 of the coast negroes may be considered civilised. All such use English as their language in daily life, and are Christian in religion. There is a British negro colony of about 500, and there are about 200 Europeans, including 100 Englishmen. The coast region is divided into counties, Bassa, Sino, and Maryland, each under a Government superintendent, and Monterrado, subdivided into 4 districts, each under a superintendent. Monrovia, the capital, has, including Krutown, an estimated population of 6,000. It is one of the 15 ports of entry, along the 350 miles of coast, the others being Liberian Jene (river port), Saywolu (river port), Robertsport (Cape Mount), Marshall (Junk), Grand Bassa, River Cess, Greenville (Sinoe), Nana Kru, Sasstown, Grand Cess, Harper (Cape Palmas), Kablaki (river port), Half Cavalla, and Webbo (river port). Other towns are Robertsport, Royesville, Marshall, Arthington, Careysburg, Millsburg, Whiteplains, Boporo (native), Rocktown (native), Philadelphia, Cuttington, Upper Buchanan and Edina.

Religion and Instruction.—The Americo-Liberians are all Protestant (Anglican, Presbyterian, Baptist, or Methodist). There are several American missions at work and one French Roman Catholic. The Government educational system is supplemented by mission schools, instruction being given both to American and to native negroes. The Methodists have a college at Monrovia; the Protestant Episcopalians a high school at Cape Palmas and 3 other important schools. The Government has a college with (1916) 3 professors and 20 students. A criminal code was enacted in 1900; the customs laws were codified in 1907.

Finance.—The revenue and expenditure for 5 years (in American dollars; latest available information):—

	1912-13	1913-14	1914-15	1915-16	1917-18
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue . . .	618,809	531,500	273,368	295,233	273,016
Expenditure . .	529,548	531,500	266,861	282,392	255,767

The customs duties for 1918 were 162,120 dollars; for 1919 they were 226,720 dollars; and for 1920, 314,690 dollars.

In 1912 an international loan of 1,700,000 dollars was raised, secured by the Customs revenue, rubber tax, and tax on native labourers shipped from Liberia. The administration of the Customs is in the hands of a Customs Receiver, designated by the Government of the United States. British financial interests preponderate in the loan. It is further provided that for the security of the revenue a frontier police force sufficient for the maintenance of peace in Liberia shall be established, and that the United States shall designate trained military officers to organise the force. In 1918, 72,207 dollars were spent on the force.

On September 30, 1918, the total debt was 2,131,700 dollars, *i.e.* 1,608,000 dollars refunding loan of 1912, 423,128 dollars internal floating debt; 84,603 dollars due to Bank of British West Africa Limited; and 15,269 dollars owing by post office to money-order bureau.

Defence.—For defence every citizen from 16 to 50 years of age capable of bearing arms is liable to serve. The organised militia, volunteers, and police number about 5,000.

Production, Commerce.—The agricultural, mining, and industrial development of Liberia has scarcely begun. There are forests unworked; the soil is productive, but cultivation is neglected; cocoa and cotton are produced in small quantities only, and indigenous coffee is the staple product. Piassava fibre, prepared from the raphia palm, palm oil and palm kernels, kola nuts, chillies, bené seed, coffee, anatto seed and rice are also produced. Beeswax is collected, and gum copal is found but is not collected. Tortoiseshell, improperly prepared, is sold in small quantities. In the forests there are rubber vines and trees of 22 species. Iron is worked by the natives. Gold in small quantities, tin, copper, zinc, monazite, corundum, lead, bitumen or lignite, and diamonds have been at different times found in the interior, but not as yet in payable form or abundance.

The trade for four years was as follows (in dollars):—Imports, 1911, 1,154,924; 1912, 1,194,128; 1913, 902,063; exports, 1911, 1,013,849; 1912, 1,150,491; 1913, 1,288,915; 1917, 618,536.

The chief imports are rice, Manchester goods, gin, tobacco, building timber, galvanised roofing iron, ready-made clothing, and dried and preserved fish. The chief exports are rubber, palm oil, palm kernels, piassava fibre, cocoa, coffee, ivory, ginger, and camwood. The trade is chiefly with Great Britain, Holland, Spain, and the United States.

According to the 'Annual Statement of Trade' issued by the Board of Trade, the value of the trade between the United Kingdom and Liberia was as follows in five years:—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports into U.K. from Liberia	161,423	528,219	537,362	106,089	90,953
Exports of U.K. produce to Liberia	178,161	163,715	271,992	106,521	129,715

There are no railways or vehicular means of transport in the country, except ox-carts and a motor road of about 20 miles recently constructed. The river St. Paul is navigable for 25 miles from the sea northwards (including

creeks, for 38 miles), and various Liberians maintain steam launches thereon. The Liberian Government has a river launch. There is direct cable communication with Europe and New York. There are two wireless stations at Monrovia.

Money, Weights, and Measures.—The money chiefly used is British gold and silver, but there is a Liberian coinage in silver and copper. Accounts are kept generally in American dollars and cents. The Liberian coins are as follows:—Silver, 50-, 25-, and 10-cent pieces; copper, 2- and 1-cent pieces.

Weights and measures are the same as Great Britain and the United States.

The Bank of British West Africa, Ltd., has a branch at Monrovia, and agencies at other ports of the Republic.

Diplomatic and Consular Representatives.

1. OF LIBERIA IN GREAT BRITAIN.

Minister.—J. P. Crommelin.

Secretary.—C. W. Dresselhuys.

Consul-General for Great Britain (residing at Liverpool), C. E. Cooper.

There are Consuls in London, Birmingham, Cardiff, Glasgow, Hull, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton, Swansea.

2. OF GREAT BRITAIN IN LIBERIA.

H. B. M. Consul-General at Monrovia.—E. H. G. Shepherd (1920).

LIECHTENSTEIN.

THE Principality of Liechtenstein, lying between the Austrian Land of Vorarlberg and the Swiss cantons of St. Gallen and Graubünden, is a sovereign State consisting of Schellenberg and Vaduz (formerly immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of January 23, 1719, granted by the Emperor Karl VI., the two lordships were constituted as the Principality of Liechtenstein. After the break-up of the Empire in 1806 the Principality was incorporated in the Rhine Confederation; from 1815 to 1866 it formed part of the German Confederation, since the break-up of which it has joined no similar union.

The Reigning Prince is **John II.**, born October 5, 1840; succeeded his father, November 12, 1858. The reigning family originated in the twelfth century, and traces its descent through free barons who in 1608 became princes of Liechtenstein. The monarchy is hereditary in the male line. The constitution, adopted in October 1921, provides for a Diet of 15 members elected for four years by direct vote on the basis of universal suffrage and proportional representation. The capital and seat of Government is Vaduz (pop. 1,142). The principality has a High Court. Since February 1921, Liechtenstein is included in the Swiss Customs Union, and the posts and telegraphs are administered by Switzerland.

Area, 65 square miles; population, of German origin and nearly all Catholic, 1912, 10,716 (5,266 males and 5,450 females). The Budget for 1922 balanced at 384,500 francs. There is no public debt. The inhabitants of Liechtenstein since 1867 have not been liable to military service. The Principality has no army (since 1868). The population is in great part agricultural, the chief products of the country being corn, wine, fruit, and timber. The rearing of cattle, for which the fine Alpine pastures are well suited, is highly developed.

Administrator.—Gustav *Schaedler* (appointed June 9, 1922).

LITHUANIA.

(LIETUVA.)

LITHUANIA became a Grand Duchy in the early part of the thirteenth century. In 1386 the Grand Duke Jogaila embraced Christianity and married the Polish Queen Hedvig, thus becoming King of Poland. During the reign of Vytautas (Vitold) the Great (1392-1430) Lithuania reached the zenith of her

power and prosperity, her frontiers extending from the Baltic to the Black Sea. After the death of Vytautas the Great, Polish influence gradually increased in Lithuania, and in 1569 the Lithuanians were forced to unite with the Poles at Lublin, the Lithuanians retaining their own treasury, laws, courts of justice, and army. Both countries elected the same king and had a common Seim (parliament).

At the end of the eighteenth century Lithuania shared the fate of Poland. Greater Lithuania fell under Russian rule, and Lithuania Minor was annexed by Prussia.

In 1917 a Lithuanian Conference of 200 representatives at Vilna elected a Lithuanian State Council (*Taryba*) and demanded the complete independence of Lithuania. The independence of the Lithuanian State was proclaimed on February 16, 1918.

On December 20, 1922, Lithuania received *de jure* recognition by the Great Powers. Russia had already accorded that recognition in the Treaty of Peace of July 12, 1920. On September 21, 1921, Lithuania was admitted a member of the League of Nations.

Constitution and Government.—The constitution adopted by the Constituent Assembly on August 1, 1922, declares that the State of Lithuania is an independent Democratic Republic. The Diet (or *Seim*) is the exponent of the sovereign power of Lithuania, and makes laws, ratifies treaties with other States, approves the State budget and superintends the execution of the laws. The Executive Power is placed in the hands of the President of the Republic and of the Cabinet of Ministers. The President of the Republic is elected by the Diet, and he chooses the Minister-President (Premier), who forms the Cabinet. The President also appoints the higher military and civil officials of the State. In case of the death, resignation or illness of the President, his place is to be taken by the President of the Diet. All the acts of the President must be countersigned by the Premier or the proper Minister. The Cabinet of Ministers is responsible to the Diet and resigns on an expression of a lack of confidence by the latter. The Members of the Diet on entering the Cabinet of Ministers do not cease to be Members of the Diet.

All the citizens of Lithuania, without distinction of sex, nationality or religion, are equal before the law; there are no classes or titles. All citizens are also guaranteed inviolability of person, homes, and correspondence, and freedom of religion, conscience, press, speech, strikes, assembly and organization. The penalty of death is abolished.

The Diet of Lithuania was elected on October 10, 1922, by universal, equal, direct and secret suffrage according to the proportional system, the electoral unit being one representative to 50,000 inhabitants. There were elected 78 representatives, composed as follows:—Christian Democrats, 38; Social Populist Democrats, 19; Social Democrats, 11; Jews, 3; Poles, 2; Workers' Party, 5.

President of Lithuania.—A. Stulginskis (appointed December 21, 1922).

The present Cabinet of Ministers was formed on February 22, 1923, and is presided over by:—

Prime Minister.—E. Galvanauskas.

For administrative purposes the non-occupied territory of Lithuania is divided into 20 districts, of about 100,000 inhabitants each. The districts are divided into communities, with about 15 communities to each district. National minorities (Jews, White Russians, and Poles) enjoy cultural autonomy.

Area and Population.—The Lithuanian Government claims that Lithuania consists of: (1) the whole of the former Russian Province of Kaunas (Kovno); (2) the Province of Vilnius (Vilna), minus the districts of Disna and Vileika; (3) a part of the Province of Gardinas (Grodno), north of the Niemen River and the narrow hinterland of the city of Gardinas (Grodno) in the south; (4) the Province of Suvalki minus the southern parts of the districts of Suvalki and Augustovo; (5), part of the Province of Courland between the old German frontier and the Holy Aa (Sventoji) River by the Baltic Sea.

The *eastern* frontier of these territories is defined in the Treaty of Peace between Lithuania and Russia, signed July 12, 1920, at Moscow, and runs as follows: Beginning at the Dvina River westward from Druja (estate of Safronovo), along the Drujka River, along the eastern shore of Lake Driviaty, southward through Koziany, Postavy, by the eastern shore of Lake Narocz, along the Narocz River; then it cuts in half the Molodecno railway junction, runs by Volozino, along the Beresina River, and further to the west along the Niemen to the Svislocis River; further on it circles the city of Gardinas at a radius of 15 to 20 versts to the south.

The *northern* frontier (with Latvia) almost coincides with the old boundary between the Provinces of Courland and Kaunas. A special arbitration convention was adopted by the Lithuanian and Lettish Governments on September 28, 1920, at Riga, according to which the British representative acted as arbiter in finally fixing the details of this frontier and determining the corrections to be made.

In the *south* (in the region of the Province of Suvalki) the frontier with Poland has not yet been conclusively agreed upon by Lithuania and Poland. Both Lithuania and Poland lay claim to Vilna, but though the League of Nations has endeavoured to bring about a solution of this problem, so far (March, 1923) no agreement has been reached.

This territory had, according to the statistics of 1914, an area of 154,491 sq. kilometres (59,633 square miles) and 4,800,800 inhabitants, viz.: the whole of the former Province of Kaunas, 20,260 sq. kilometres, and 1,857,100 inhabitants; 5 districts of the former Province of Vilnius, 29,818 sq. kilometres, and 2,075,700 inhabitants; 5 districts of the former Province of Suvalki, 101,913 sq. kilometres, and 718,000 inhabitants; also parts of the former Provinces of Courland and Gardinas, 2,500 sq. kilometres, and 150,000 inhabitants.

The Lithuanians form 70 per cent. of the total population, the Jews, 13 per cent.; the Poles, 8 per cent.; the Russians and White-Russians, 7 per cent.; and other nationalities, 2 per cent.

The Memel territory (population 188,530), which by the Treaty of Versailles was detached from Germany and placed under the control of the conference of ambassadors, was handed over to Lithuania on February 16, 1923, subject to certain conditions intended to regulate the use of the port by both Lithuania and Poland.

The population of Lithuania in 1922 is given as 2,293,100.

For every thousand males there are females in Vilna, 1,014; in Kovno, 1,677; and in Suvalki, 1,058; making an average of 1,049 for the whole country.

The capital of Lithuania is Vilnius (Vilna), with a population of 214,600 in 1914. Other large towns were: Kaunas (Kovno), 90,300; Gardinas (Grodno), 61,600; Kiaipeda (Memel), 32,000; Suvalkai (Suvalki), 31,600; and Siauliai (Shavli), 31,300.

Religion.—In the three districts of Vilna, Kovno, and Suvalki Roman Catholics form 75 per cent., Jews 12 per cent., Greek Orthodox 9 per cent., Protestants and Calvinists 4 per cent.

Instruction.—In 1922 there were 1708 primary schools with 160,230 pupils, and 93 secondary schools with 17,149 pupils. On February 16, 1922, the University of Kovno was opened, with 25 professors and 800 students.

Finance.—The budget for 3 years is shown as follows:—

	1920	1921	1922
	Marks	Marks	Marks
Revenue	411,000,000	672,582,658	4,312,280,089
Expenditure	422,000,000	885,725,375	4,312,280,089

By the Treaty of Peace of Moscow, Russia took over, in place of an indemnity for the damage done by the Russian Army, the whole of the old Russian debt devolving on Lithuania; in addition, it was agreed to hand over to Lithuania 3,000,000 roubles in gold and to concede to Lithuania 100,000 hectares of forests.

Defence.—The Lithuanian Army is approximately 50,000 men.

Production.—Lithuania is an agricultural country, and preponderantly rural in character; the resources of the country consist of timber and agricultural produce. Of the total area, 45·8 per cent. is arable land, 24·3 per cent. meadow and pasture land, 20·3 per cent. forests, 3·1 per cent. unproductive lands, and 6·5 per cent. waste land. In 1920 in the territory administered by the Lithuanian Government 5,200,000 hectares (about 13,000,000 acres), there was produced (in cwts.) rye, 10,000,000; wheat, 1,500,000; barley, 3,000,000; oats, 5,000,000; potatoes, 20,000,000; peas, 1,200,000; and flax-seed, 700,000.

In 1921 the country possessed 380,000 horses, 780,000 cattle, 1,056,000 sheep, and about 1,262,000 pigs. Poultry-farming is considerably developed, particularly geese-rearing. Bee-keeping is also an important occupation, the figures for 1910 being as follows: Hives, 57,426; honey sold, 5929 cwt., and wax, 1,304·6 cwt.

Forests cover 1,946,000 acres, of which 889,600 acres (or 44 per cent.) belong to the State; 80 per cent. of the forests consist of needle-bearing trees, mostly pines, and the remainder of leaf-bearing trees.

Commerce.—Trade for three years:—

	1920	1921	1922 (Jan.-Oct.)
	Marks	Marks	Marks
Exports	428,728,541	876,874,930	2,729,480,000
Imports	321,797,163	681,744,123	3,047,191,560

Of the imports in 1921, 555,698,988 marks came from Germany, 58,011,154 marks from Danzig, and 7,379,668 marks from Great Britain.

The chief articles of export are corn, cattle, hams, poultry, eggs, butter, timber, flax, linseed, hides, and wool. The imports are chiefly manufactured articles, fertilisers and agricultural machinery.

Total trade between Lithuania and Great Britain for two years (according to Board of Trade returns):—

	1921	1922
	£	£
Imports from Lithuania into Great Britain . . .	344,059	1,102,629
Exports to Lithuania from Great Britain . . .	53,500	114,431

A commercial treaty between Great Britain and Lithuania was signed on May 6, 1922.

Internal Communications.—In 1920 the total length of railways was 1,550 miles, of which 1,178 miles were broad gauge lines. The total cost of construction of these railways was 20,600,000*l*.

There are about 930 miles of roads in the country, while of the waterways those navigable for steamboats extend to 117 miles; those for smaller craft to 453 miles; those for rafts to 1,450 miles; total, 2,020 miles. The river Niemen is navigable for about 270 days in the year.

Banking and Credit.—By a law promulgated on August 16, 1922, a national currency, based on the gold standard, with the *Litas* as unit, was introduced to replace the Ost mark, Ost rouble, and German mark hitherto in circulation but now withdrawn. The Litas contains 0.150462 grammes of pure gold, and is equivalent to a tenth of the American gold dollar. In this connection the Bank of Lithuania (*Lietuvos Bankas*) was established in August 1922, on joint-stock principles, 50 per cent. of the shares being held by the State and the balance being available for private subscription. The Bank's capital-stock is 12,000,000 Litas. Foreigners may own one-third of the capital-stock. The Bank enjoys during twenty years the sole right of issuing bank-notes. Although under the law the bank-note issue calls for a gold cover of one-third, yet in practice the Government has decided that the actual security must represent 100 per cent. in the form either of gold or stable currencies backed by gold. On December 15, 1922, the bank-notes in circulation amounted to 6,577,849 Litas in round figures.

The weights and measures are still Russian, but at the same time the metric system is used. Arrangements are being made for making the metric system obligatory.

Diplomatic and Consular Representatives.

1. OF LITHUANIA IN GREAT BRITAIN.

Envoy and Minister.—Thomas Naroushevitch (May, 1921).

LUXEMBURG.

Reigning Grand Duchess.—**Charlotte** born January 23, 1896, succeeded on the abdication of her sister *Marie-Adelaide*, on January 9, 1919; married to Prince Felix of Bourbon-Parma on November 6, 1919.
Offspring :—Prince *Jean*, born January 6, 1921, and a daughter, born December 23, 1922. **Sisters of the Grand Duchess** :—Princess *Marie-Adelaide*, born June 14, 1894; Princess *Hilda*, born February 15, 1897; Princess *Antoinette*, born October 7, 1899; Princess *Elisabeth*, born March 7, 1901; Princess *Sophie*, born February 14, 1902.

The early history of Luxemburg may be divided into four periods, viz., from 963 to 1443, when the country was part of the Holy Roman Empire; from 1443 to 1506, the Burgundian period; from 1506 to 1714, the Spanish period; and from 1714 to 1795, the Austrian period. From 1795 to 1815 the Duchy was French. The Congress of Vienna made the Duchy into a Grand Duchy, and from 1815 to 1866 the Grand Duchy was included in the dissolved Germanic Confederation. By the Treaty of London, May 11, 1867, it was declared neutral territory, and its integrity and independence were guaranteed.

Constitution and Government.—The Constitution now in force was proclaimed on October 17, 1868; in 1919 some important changes were introduced into it, viz. the Constituent Assembly decided that the sovereign power resided in the Nation (Article 32); that all secret treaties were abolished (Article 37); that the deputies are to be elected on the basis of universal suffrage, pure and simple, by scrutiny of lists, according to the rules of

proportional representation and in conformity with the principle of the smallest electoral quotient.

The country is divided into four electoral districts: the South, North, Centre, and East. In order to qualify as an elector it is necessary to be a citizen (male or female) of Luxemburg and to have completed 21 years of age; to be eligible for election it is necessary to have completed 25 years of age and to fulfil the conditions required for active electorate. The electors may be called upon to record their votes by means of a referendum or plebiscite in all cases and under the conditions to be determined by law (Article 52). The Members of the Chamber of Deputies receive a salary which may not surpass 4,000 francs per annum; they are also entitled to receive a travelling allowance (Article 75).

The Chamber of Deputies consists of 48 members, elected May 28, 1922. The state of the parties is as follows:—Catholics, 26; National Party, 4; Liberals, 9; Socialists, 7; Popular Party, 2.

The head of the State takes part in the legislative power, exercises the executive power, and has a certain part in the judicial power. The Constitution leaves to the sovereign the right to organise his Government, which consists of a Minister of State, who is President of the Government, and of at least three Directors-General. The Cabinet, appointed April, 1921, is composed as follows:—

Minister of State and President of Government.—Emile Reuter.

Director-General of Finance.—A. Neyens.

Director-General of Home Affairs and Public Instruction.—J. Bech.

Director-General of Justice, and Public Works.—W. Leidenbach.

Director-General of Agriculture, Industry and Social Welfare.—Raymond de Waha.

Besides the Government there is a Council of State. It deliberates on proposed laws and bills, on amendments that might be proposed; it also gives administrative decisions and expresses its opinion regarding any other question referred to it by the Grand Duke or by the Law. The Council of State is composed of 15 members chosen for life by the sovereign, who also chooses a president among them each year.

On September 23, 1919, a Referendum was taken in Luxemburg to decide on the political and economic future of the country. Those entitled to vote were men and women of 21 (voters on the register, 127,775; actual voters, 90,984). The voting resulted as follows:—for the reigning Grand Duchess, 66,811; for the continuance of the Nassau-Braganza dynasty under another Grand Duchess, 1,286; for another dynasty, 889; for a Republic, 16,885; for an economic union with France, 60,133; for an economic union with Belgium, 22,242. But France refused in favour of Belgium to consider the possibility of an economic union, and negotiations to this end between Belgium and Luxemburg were concluded on December 22, 1921, when the Chamber of the Grand Duchy passed a Bill for the economic union between Belgium and Luxemburg. The Agreement, which is for 50 years, provides for the disappearance of the customs barrier between the two countries and the use of Belgian currency in the Grand Duchy. It came into force on May 1, 1922.

Area and Population.—Luxemburg has an area of 999 square miles, and a population (Dec. 1, 1916) of 263,824 (130,514 males and 133,310 females). The population is Catholic, save (1910) 4,007 Protestants, 1,270 Jews, and 302 belonging to other sects. The chief town, Luxemburg, has 45,986 (1921) inhabitants. Other towns are Esch a Alz, the centre of the mining district,

20,672 inhabitants; Differdange, 13,229 inhabitants; Dudelange, 9,834 inhabitants; Rumelange, 4,998 inhabitants; and Diekirch, 3,776 inhabitants.

Instruction.—Education is compulsory for all children between the ages of 6 and 13. In 1920 the primary schools had 1,027 teachers (504 women); there are 35 higher elementary schools, 3 classical schools, 2 commercial and industrial colleges, a college of agriculture, and an academy of music.

Finance.—Estimated revenue and expenditure (including extraordinary for the last five years) in francs :—

—	1918-19	1919-20 ¹	1920-21	1921-22	1922-23
Revenue . . .	42,632,228	126,044,256	63,808,926	56,695,802	158,024,078
Expenditure . . .	101,969,074	194,624,200	159,705,845	174,777,583	203,927,496

¹ Revenue includes loan of 90,000,000 francs; expenditure includes 39,000,000 francs deficits of previous years.

The debt on September 30, 1922, amounted to 463,663,938 francs.

The armed forces of the State number 250 men.

Production and Industry.—Agriculture is carried on by about 90,000 of the population (about 36 per cent.); about 250,000 acres are agricultural land. The principal crops are oats and potatoes, but mining is the chief industry. Production of iron and steel for 3 years :—

Year	Iron		Steel	
	Tons	Value in francs	Tons	Value in francs
1918	3,131,400	14,995,635	1,266,671	254,590,396
1919	3,112,472	25,366,646	617,422	157,870,782
1920	3,704,890	27,997,000	692,935	382,109,601

Communications.—There were 330 miles of railway in 1921, and 585 miles of telegraph line with 1,541 miles of wire, and 369 telegraph offices in 1921. There were also (1921) 53 telephone systems with 872 miles of line and 5,667 miles of wire. In 1921 there were 138 post-offices, through which there passed 12,744,000 letters and 5,236,000 post-cards, &c.

Diplomatic Representatives.

MEXICO.

(REPÚBLICA MEXICANA.)

Constitution and Government.

MEXICO was annexed to the Spanish Crown by conquest in 1521, and for three centuries continued to be governed by Spain. In all 64 Spanish Viceroyals ruled the Courts, from Antonio de Mendoza (1535-1550) to Juan O'Donojú (1821-1822). In 1810 the rule of the Spanish Viceroyals had become so tyrannical that it caused an outbreak headed by the patriot priest Miguel Hidalgo, who on September 15, 1810, declared the Independence of Mexico. On May 18, 1822, General Augustin Iturbide declared himself Emperor of Mexico, but in 1824 he had to flee, and the Republic was established. Several Presidents (Felix Fernandez Victoria, 1824-28, was the first) ruled the destinies of the country with more or less severity until 1864, when the throne of Mexico was offered to Archduke Ferdinand Maximilian of Austria. He was shot in 1867, and Benito Juarez, who had been President in the northern part of the country, took the reins of government. He was followed by Lerdo de Tejada, who in 1876 fled, and General Porfirio Diaz (died July 2, 1913) made his entry into Mexico City. He ruled the country with the exception of four years (1880-4, General Manuel Gonzalez) until May 25, 1911, when he presented his resignation to Congress. On November 6, 1911, Señor Francisco I. Madero assumed office as President and ruled until February, 1913, when a *coup d'état* took place, resulting in the President's murder (February 23, 1913) and his replacement by General Victoriano Huerta.

Civil war broke out in April, 1913, and on July 15, 1914, Huerta resigned. The internal discord continued, until December, 1915, when most of the American and European States recognized General Carranza as head of the Government of Mexico. In May 1920, civil war broke out again and Carranza fled from the capital, and he was shortly afterwards killed. General Adolfo de la Huerta was elected Provisional President in May, 1920, and in September, 1920, the presidential elections returned General Alvaro Obregon.

President.—Alvaro Obregon. Assumed office, December 1, 1920.

A new Constitution, amending the Constitution of 1857, was promulgated on February 5, 1917. By its terms Mexico is declared a federative republic, divided into States, each of which has a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the supreme Government are divided into three branches, the legislative, executive, and judicial. The legislative power is vested in a Congress consisting of a House of Representatives and a Senate, and the executive in a President. Representatives are elected for two years by universal suffrage at the rate of one member for 60,000 inhabitants. The qualification is to be over twenty-five years of age on the day of election. The Senate consists of fifty-eight members, two for each State, of at least thirty years of age, who are returned in the same manner as the deputies. The members of both Houses receive salaries of about 7,000 dollars a year. The President is elected by direct popular vote in a general election, holds office for four years, and cannot be re-elected. Failing the President, Congress acts as an electoral college for the election of a successor. If the vacancy occurs during the first half of the President's term of office, Congress chooses a provisional President and arranges for new elections; if the vacancy occurs in the second term, Congress chooses the President for the remainder of the term. The Session of Congress is to be from September 1 to December 31. During the recess there is a Permanent Committee consisting of fourteen Senators and fifteen Representatives appointed by the respective Houses.

According to the law of April 13, 1917, the administration is carried on, under the direction of the President and a Council, by seven Secretaries of State (Foreign Affairs, Interior, Finance and Public Credit, War and Marine, Communications and Public Works, Industry, Commerce, and Labour, and Agriculture), and three Departments of State (Judicial, Educational, and Public Health).

LOCAL GOVERNMENT.

Mexico is divided into twenty-eight States, one Federal District, and two Territories. Each separate State has its own internal constitution, government, and laws; but inter-State customs duties are not permitted, though State taxes are levied. Each State has its governor, legislature, and judicial officers popularly elected under rules similar to those of the Federation. The Governors of the Federal District and the Territories are appointed by the President. All the States of the Mexican Union have their own special codes based, more or less, on those of the Federal District; but at the same time they must publish and enforce laws issued by the Federal Government.

Area and Population.

The population of the census of 1921 is shown in the following table. The capitals of the States and districts are in brackets :—

States and Territories	Area, in square miles	Census Population, 1921		
		Males.	Females	Total
Aguascalientes (Aguascalientes).	2,969	51,159	55,466	106,625
Baja California (La Paz)	58,338	31,419	27,722	62,141
Campeche (Campeche)	18,089	36,658	37,512	74,170
Chiapas (Tuxtla Gutiérrez)	27,527	206,273	211,449	417,722
Chihuahua (Chihuahua)	90,036	198,479	198,463	396,942
Coahuila (Saltillo)	63,786	195,800	195,585	391,385
Colima (Colima)	2,272	44,197	47,651	91,848
Distrito Federal (Mexico)	578	391,755	470,732	862,487
Durango (Durango)	42,272	163,865	168,787	332,652
Guanajuato (Guanajuato)	10,950	393,600	416,488	810,088
Guerrero (Chilpancingo)	25,279	267,385	279,377	546,762
Hidalgo (Pachuca)	8,637	306,098	321,893	627,991
Jalisco (Guadalajara)	33,492	579,491	619,894	1,199,325
México (Toluca)	9,230	425,661	443,771	869,432
Michoacán (Morelia)	22,621	450,331	471,949	922,280
Morelos (Guernavaca)	1,895	51,386	52,439	103,825
Nayarit (Tepic)	10,953	71,699	75,349	147,048
Nuevo León (Monterrey)	25,032	161,503	168,915	330,418
Oaxaca (Oaxaca)	35,689	412,070	433,769	845,839
Puebla (Puebla)	12,992	491,165	535,172	1,026,337
Querétaro (Querétaro)	4,493	112,309	109,205	221,514
Quintana Roo (Santa Cruz de Bravo)	19,270	6,185	4,730	10,915
San Luis Potosí (San Luis Potosí)	24,004	222,178	219,306	441,478
Sinaloa (Culiacán)	27,557	166,854	176,393	343,247
Sonora (Hermosillo)	76,633	135,989	133,167	269,156
Tabasco (Villa Hermosa)	10,374	71,344	73,228	144,572
Tamaulipas (Ciudad Victoria)	30,831	147,760	140,191	287,951
Tlaxcala (Tlaxcala)	1,534	89,389	90,745	180,134
Vera Cruz (Córdoba)	27,850	561,991	563,495	1,125,486
Yucatán (Mérida)	15,939	163,101	161,307	324,408
Zacatecas (Zacatecas)	24,471	182,021	190,254	372,275
Islands	1,575	698	79	677
Grand Total	767,198	6,792,713	7,094,367	13,887,080

The above returns are for 2,019 out of a total of 2,551 municipalities, and 98 out of 196 agencies which reported the results of the Census up to March 1922.

Total immigration into Mexico: 1918, 53,780; 1919, 60,327; 1920, 91,121; 1921, 32,627.

The chief cities, 1910, are:—Mexico (capital), 1,080,000; Puebla, 96,121; Guadalajara, 119,468; San Luis Potosí, 68,022; León, 57,722; Monterrey, 73,528; Pachuca, 39,009; Zacatecas, 25,900; Guanajuato, 35,682; Mérida, 62,447; Querétaro, 33,062; Morelia, 40,042; Oaxaca, 38,011; Orizaba, 35,263; Aguascalientes, 45,198; Saltillo, 35,414; Durango, 32,263; Chihuahua, 39,706; Vera Cruz, 48,633; Toluca, 31,023; Celaya, 23,062.

Religion, Instruction, and Justice.

The prevailing religion is the Roman Catholic, but according to the new Constitution of 1917, the Church is separated from the State, and there is toleration of all other religions. No ecclesiastical body can acquire landed property. There are 7 archbishops and 23 bishops. In 1910, there were

15,032,176 Roman Catholics; 68,839 Protestants; 33,348 of other faiths; 25,011 of no professed faith.

Education is free and compulsory, and, according to the Constitution of 1917, secular. In the Federal District and in the Territories education is controlled by the National Government; elsewhere the State authorities regulate education. The Federal capital is the seat of the National University of Mexico, re-organised in 1910. Another University, the National University of the South-east, was established at Mérida (Yucatan) in 1922. In 1921 the Republic had 9,715 primary schools (of which 8,388 were public schools), with 819,775 pupils (5·41 per cent. of the population), and 20,407 teachers. Expenditure on education in 1921, 12,447,022 dollars.

In 1921, 147 newspapers were published in Mexico in Spanish, two in French, one in English and one in German.

The judicial power, which is entirely distinct from and independent of the executive, consists of the Supreme Court, with 11 judges chosen for a period of four years, nine Circuit Courts, with 3 judges, and District Courts, with 44 judges. After 1923 judges are to be appointed for life. The Federal District has a Higher Court of Justice composed of 14 magistrates; 10 civil, 8 penal and 8 correctional judges. In Tlalpam and Xochimilco there are Judges of First Instance with mixed jurisdiction, and Taculaya has one civil judge and one penal. Popular juries are part of the judicial system. The General Congress appoints the magistrates of the Higher Court, the civil, penal, and correctional judges, and the Judges of First Instance. In the Territories there is a Judge of First Instance and a magistrate with authority of Second Instance, appointed like the others.

Federal Finance.

The ordinary receipts and expenditure for six years :—

—	Revenue	Expenditure	—	Revenue	Expenditure
	£	£		£	£
1913-14 ¹	13,230,715	13,210,873	1919 ¹	14,938,400	20,349,161
1914-15 ^{1 2}	14,597,000	15,220,489	1920 ¹	17,739,919	17,305,932
1918 ¹	14,914,137	18,713,587	1921 ¹	27,696,693	27,113,566

¹ Estimates. ² Owing to civil disturbances, no figures were published between 1915 and 1918.

The principal items of expenditure in 1921 were 5,001,408 pesos for legislative authority, 25,409,648 pesos for the Treasury, 2,564,972 pesos public health, 18,679,271 pesos industry, 5,329,097 pesos agriculture, 26,257,574 pesos public works and 134,161,545 pesos war and marine.

On December 31, 1921, the outstanding external debt, together with arrears of interest, amounted to 74,839,055 $\frac{1}{2}$. The internal debt amounted to 136,347,300 pesos.

Defence.

Before the Revolution every Mexican capable of bearing arms was obliged to serve in the Active Army or in the National Guard. The army then consisted of the Active Army, the Reserve, and auxiliary troops, and was organised on a peace footing as follows: infantry, 34 battalions, 20

auxiliary battalions, and 49 irregular corps; cavalry, 18 regular regiments, 21 auxiliary regiments and 2 squadrons of army gendarmes, 52 irregular corps, and 26 scout corps; artillery, 5 regiments. In addition there were 1 sapper battalion, 1 engineer park, 1 telegraph section, 2 war schools, 1 naval school, 1 school of musketry, 1 school for fencing, 1 medical school, and 57 schools for soldiers. Since 1914 the Army has been continuously on a war footing and the Reserve has disappeared. The nominal strength of the Army in 1922 was 84,000, but the actual strength is believed to be much lower.

The infantry is armed with 7 mm. Mauser rifle, the cavalry with a carbine of the same type, artillery with Q.F. guns (Saint Chaumont Mondragon and Schneider-Canet).

Attention has been paid to aviation; the machines employed are of Mexican design and construction. There are 2 engineering parks, 2 telegraph stations. Military education is compulsory in all schools throughout the country.

The Navy, which is little more than a police force, consists of the gun-boats *Bravo*, *Vera Cruz*, and *Tampico*, with the training sloop *Zaragoza*. There are a few old torpedo-boats, a couple of armed transports, and some smaller vessels, and on the Pacific side two gunboats.

Production and Industry.

Mexico is well suited for agriculture. Within a radius of 300 miles may be produced the crops of the Tropical, Semi-tropical, and Temperate Zones, owing to the varying altitude, the land rising rapidly from the coast to the centre of the country. The soil is rich in all sections. In the tropical regions, in the mountain valleys, and on the great central plateau are millions of acres of virgin soil and millions more which have been barely skimmed by the antiquated methods of agriculture in vogue.

Cultivated lands, 30,027,500 acres; pastoral lands, 120,444,200 acres; forest lands, 43,933,200 acres. Principal products are maize (1,803,628 tons in 1921), sugar (119,800 tons in 1922), henequen (115,684 tons in 1921), wheat (133,508 tons in 1921), coffee (34,424 tons), beans (71,034 tons), tobacco (6,548 tons). There are 1,226 tobacco factories in the Republic.

Timber lands are estimated to extend over 25,000,000 acres and to contain pine, spruce, cedar, mahogany, logwood, and rosewood.

Live-stock in 1920: Cattle, 2,162,984; horses, 929,385; mules, 354,351; asses, 287,989; sheep, 1,089,976; goats, 1,987,869; and pigs, 1,654,089.

The chief Mexican oil-fields may be grouped in five districts:—(1) The Ebano district, about 40 miles west of Tampico (largely the property of the Mexican Petroleum Company); (2) The Panuco district, including the Topila region; (3) The Huasteca district, south of Tampico, in which the famous 'Casiano,' 'Cerro Azul,' and 'Potrero del Llano' wells occur; (4) The Tuxpam district, including the Furbero region, south-west of Tuxpam; and (5) The Tehuantepec-Tabasco district, in the neighbourhood of Minutitlan. The fields actually in exploration occupy a surface of 62,175 acres, and the total number of productive wells in the Republic is (1922) 513. The potential production of all the wells of the Republic is 1,337,012 barrels daily. On December 31, 1921, there were in existence the following constructions for storing petroleum:—1,696 steel tanks, with a capacity of 53,924,856 barrels, and 20 earthen tanks with a capacity of 23,191,960 barrels, making a total storage capacity of 77,116,816 barrels. On the same date there were 108 pipe lines with a total length of 1,847 miles and a flowing capacity of 1,014,709 barrels daily.

Petroleum was produced as follows :—In 1912, 16,558,215 barrels ; in 1915, 33,910,508 barrels ; in 1916, 40,545,712 barrels ; in 1917, 55,292,770 barrels ; in 1918, 63,828,326 barrels ; in 1919, 87,072,954 barrels ; in 1920, 163,540,000 barrels ; and in 1921, 193,397,587 barrels.

Mining is the principal industry in Mexico. It is carried on in 24 of the 31 States and Territories, nearly all the mines yielding silver either alone or in combination with other ores. The following table shows the quantities of mineral products for three years.

Metals	1919	1920	1921
	Kilos	Kilos	Kilos
Gold	23,586	22,960	21,275
Silver	2,049,898	2,073,476	2,005,143
Copper	52,172,235	49,192,401	15,228,085
Lead	71,375,068	82,517,506	60,513,232
Zinc	11,559,685	15,050,590	1,256,986
Antimony	470,738	622,572	44,545
Tin	1,588	—	492
Tungsten	21,970	40,020	14,306
Molybdenum	1,767	4,230	3,230
Manganese	2,794,227	1,137,400	558,800
Mercury	118,939	75,748	46,244
Arsenic	2,246,378	2,091,704	784,956
Amorphous graphite	4,023,015	3,222,941	2,911,092

Coal is produced only in the State of Coahuila. The output in 1919 was 728,374 tons and in 1920, 715,789 tons. Opals are mined in Querétaro.

In 1921, 120 cotton textile factories were in operation, employing 38,277 operatives.

Commerce.

The trade of Mexico for 4 years is shown as follows :—

	1918	1919	1920	1921
	pesos	pesos	pesos	pesos
Imports	276,217,464	237,038,347	357,550,441	506,784,316
Exports	375,568,385	393,390,000	406,546,809	727,760,098

The principal imports and exports for 2 years were as follows (in pesos) :—

	Imports		Exports	
	1919	1920	1919	1920
Animal products	22,081,226	38,981,669	15,330,915	6,589,555
Vegetable products	43,249,944	56,907,258	121,457,289	105,295,152
Mineral products	51,899,455	83,778,888	251,322,386	279,503,661
Manufactured goods	31,944,258	51,031,121	5,679,609	15,164,530

The distribution of imports and exports for 2 years among principal countries was as follows (in pesos) :—

Country	Imports		Exports	
	1920	1921	1920	1921
Great Britain . . .	32,691,898	44,878,915	14,588,755	48,999,751
United States . . .	266,870,325	339,412,852	358,811,990	595,986,086
France . . .	21,832,553	46,638,943	4,404,355	8,204,618
Spain . . .	9,032,144	19,602,069	934,463	369,782
Argentina . . .	1,068,653	460,725	2,555,906	13,853,910
Japan . . .	1,693,669	1,075,523	22,266	1,274,380
Germany . . .	8,962,800	24,393,129	1,319,161	2,653,766
Italy . . .	2,306,381	5,744,235	119,019	1,724,441

The principal articles of commerce between the United Kingdom and Mexico for 1921 (according to Board of Trade Returns) were as follows :— Imports: petroleum spirit, 1,930,812*l.*; fuel oil, 6,076,725*l.*; lamp oil, 901,109*l.*; lubricating oil, 320,176*l.* Exports: cotton piece goods, 836,763*l.*; other cotton goods, 1,021,167*l.*; sodium, 62,102*l.*; machinery, 699,581*l.*

Total trade between Mexico and the United Kingdom for 5 years (according to Board of Trade returns) :—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Mexico to U. Kingdom	5,125,844	7,173,840	13,444,493	9,859,235	8,603,846
Exports to Mexico from U. Kingdom	1,093,931	1,312,776	4,344,402	4,590,621	2,212,607

Shipping and Communications.

The most important ports are Vera Cruz and Tampico, both on the Gulf of Mexico. In 1920 there entered at all the ports, 5,250 vessels of 13,125,000 tons, and cleared 5,084 vessels of 12,710,000 tons.

In 1909 the main railway lines of Mexico were united in one corporation—The National Railways of Mexico. Since 1914 this system and practically all the private lines have been taken over and worked by the government under the name of the Constitutionalist Railways of Mexico. The National Railways of Mexico own 6,818 miles of track and control an additional 1,220 miles. The Mexican Railway has 520 miles of track. The Tehuantepec Railway owns the line (184 miles of track) between Puerto Mexico on the Atlantic to Salina Cruz on the Pacific. The Mexico North-Western Railway owns 512 miles of track. The Southern Pacific Railway of Mexico has about 1,000 miles of track. The United Railways of Yucatan have a length of 500 miles. A railway between Toluca and Zitacuaro (81 miles) has been commenced.

On December 31, 1920, the Federal telegraph and telephone lines had a length of 25,015 miles of line and 55,304 miles of wire. There were other lines belonging to individual States and private persons totalling 17,010 miles of line and 20,706 miles of wire. There were on October 31, 1921, 562

telegraph offices, 9 telephone offices and 26 wireless stations. Number of telegraph messages in 1920, 10,240,818.

In 1921 there were 2,835 post-offices. The post handled, in 1921, 101,711,571 pieces of mail matter.

A new wireless station has been established on the Island of Lobos, off the coast of Tampico, largely for the purpose of affording the various petroleum companies facilities for communicating with vessels while at sea. It is provided with powerful apparatus and is able to communicate with the wireless stations at Mexico City, Tuxpam, Tampico, Vera Cruz, Progreso, Frontera, Mazatlan, Santa Rosalia, La Paz, Queretaro, Monterrey, Saltillo, Torreon, and by way of Habana with various stations in the United States.

Banking and Credit.

An executive decree of January 31, 1921, provided for the return to their owners of the banks declared in liquidation by the decree of December 14, 1916.

On December 31, 1921, the banks of the Republic held coins to the value of 5,193,868 pesos, including gold to the value of 4,427,647 pesos.

It is proposed to set up a Central Bank of issue with a capital of 200 million pesos and the right to issue paper currency to the amount of 20 million pesos.

Money, Weights, and Measures.

By an executive decree of November 13, 1913, the monetary unit is the gold peso or dollar, the legal value of which has been fixed at .75 gramme of pure gold. There are 20-peso (called *aztecas*), 10-peso, 5-peso, 2.50-peso, and 2-peso gold coins, .900 fine and .100 copper, weighing respectively 16.666 $\frac{2}{3}$, 8.333 $\frac{1}{3}$, 4.166 $\frac{2}{3}$, 2.083 $\frac{1}{3}$, and 1.666 $\frac{2}{3}$ grammes. In 1919 American gold coin was decreed to be legal tender at the fixed rate of 1 dollar for 2 Mexican gold pesos. An executive decree of September 22, 1921, provides for the issue of new silver and bronze coins. The silver coins are in denominations of 1-peso, 50 and 20 centavos, with a fineness of 720 milligrams of silver and 280 of copper for all the silver coins except the 2-peso, which is .900 fine of silver and .100 of copper. The bronze coins are to be in denominations of 20, 10, 5, 2 and 1 centavos, and have a composition of 95 per cent. copper, 2.5 per cent tin, and 2.5 per cent. zinc. These coins are restricted legal tender up to 20 pesos for the silver coins. There are 5-centavo nickel coins. The value of the gold peso or dollar in peace time was 24.58 pence.

From 1537 to December 31, 1920, a total of 4,129,351,481 pesos have been coined in Mexico, made up as follows:—385,393,070 pesos gold, 3,726,154,321 pesos silver, 7,137,287 pesos copper, 5,660,951 pesos nickel, and 5,025,852 pesos bronze. For the year ending June 30, 1922, there was coined gold to the value of 24,810,000 pesos, silver to the value of 19,729,000 pesos, and bronze to the value of 334,500 pesos, making a total of 44,873,500 pesos.

The weights and measures of the metric system were introduced in 1884 and their use is enforced by law of June 19, 1895, though the old Spanish measures are still in use. The old weights and measures were:—

Weight.

1 libra = 0.46 kilogramme = 1.014 lb. avoirdupois.

1 arroba = 25 libras = 25.357 lb. avoirdupois.

For gold and silver. 1 marco = $\frac{1}{2}$ libra = 4,608 granos.
 1 ochava = 6 tomines.
 1 tomin = 12 granos.
 20 granos = 1 French gramme.
Length. 1 vara = 0.837 mètre = 2 ft. 8 $\frac{1}{8}$ English in.
 1 legua comun = 6,666 $\frac{2}{3}$ varas.

Diplomatic and Consular Representatives.

1. OF MEXICO IN GREAT BRITAIN.

First Secretary (in charge of Mexican Legation).—Juan F. Urquidi.

There are Consular representatives at Barrow-in-Furness, Birmingham, Belfast, Bristol, Cardiff, Dover, Dublin, Falmouth, Glasgow, Great Grimsby, Liverpool, Manchester, Maryport, Newcastle, Southampton.

2. OF GREAT BRITAIN IN MEXICO.

Chargé des Archives.—H. A. C. Cummins, C.M.G., O.B.E.

Consul-General.—N. King.

There are Consular representatives at Colima, Progreso, Salina Cruz, Vera Cruz, and other towns.

MONACO.

Prince Louis II, born July 12, 1870, succeeded his father, Prince Albert, June 26, 1922.

Monaco is a small Principality on the Mediterranean, surrounded since 1860 by the French Department of Alpes Maritimes except on the side towards the sea. From 988 it belonged to the house of Grimaldi. In 1715 it passed into the female line, Louise Hippolyte, daughter of Antony I., heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thorigny, who took the name and arms of Grimaldi. Antony I died in 1731, Louise Hippolyte reigning only ten months and dying in 1732. She was succeeded by her husband under the name of Jacques I., who also succeeded Antony I. as Duc de Valentinois, and was in his turn succeeded by his son Honorius III. This Prince was dispossessed by the French Revolution in 1792, and died in 1795. In 1814 the Principality was re-established, but placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna (1815).

In 1848 Mentone and Roccabruna revolted, and declared themselves free towns; in 1861 Charles III. ceded his rights over them to France, and the Principality thus became geographically an *enclave* of France, when the Sardinian garrison was withdrawn and the Protectorate came to an end.

On January 7, 1911, a Constitution was promulgated, which provides for a National Council elected by universal suffrage and *scrutin de liste*. The Government is carried out under the authority of the Prince by a Ministry assisted by a Council of State. The legislative power is exercised by the Prince and the National Council, which consists of 21 members elected for four years. The territory of the Principality is divided into three communes, administered by municipal bodies, in the election of which women are entitled to take part.

In 1819 the Government adopted a code founded upon the French codes and a Court of First Instance, as well as a Juge de Paix's Court. The Principality has its own coinage (it issues only 100-franc pieces) which is current since 1876 in all the States of the Latin Union; it also issues its own separate postage-stamps, and has its own flag.

The small harbour, absolutely sheltered, has an area of 42 acres, depth at entrance 90 feet, and alongside the quay 24 feet at least. The Customs duties are the same as in France.

The area is eight square miles. Population (census January 9, 1913), 22,956. Towns: Monaco, 2,247; La Condamine, 11,082; Monte Carlo, 9,627.

There has been since 1887 a Roman Catholic bishop. A semi-military police force has taken the place of the 'guard of honour' and troops formerly maintained. The value of the commerce of the Principality is not stated. The revenue is mainly derived from the gaming tables. The annual grant for the concession was 80,000*l.* in 1917; in 1927 it will be 90,000*l.*, and in 1937 100,000*l.*

Consul-General for Monaco in London.—Th. Lumley.

British Consul.—J. W. Keogh (residing at Nice).

British Vice-Consul.—E. Attwell-Smith (residing at Monte Carlo).

MOROCCO.

(MAGHREB-EL-AKSA.—EL GHARB.)

THE Shereefian Empire was founded at the close of the seventh century by Arab invaders, who named it *Moghreb-el-Aksa*, *i. e.* 'The Farthest West.' In 1912 the country became a French Protectorate, with the exception of Tangier, which is internationalised, and the Spanish zone.

Reigning Sultan.

Mulai Yusef, G.C.M.G., son of Mulai-Hassan, was proclaimed Sultan on August 18, 1912, on the abdication of his brother, Sultan Mulai-Abd-el-Hafid, who received a lump sum of 400,000 francs and an annual pension of 375,000 francs.

The present Sultan of Morocco is the seventeenth of the dynasty of the Alides, founded by Mulai-Ahmed, and the thirty-sixth lineal descendant of Ali, cousin and son-in-law of the Prophet. His five predecessors were :—

Sultan	Reign	Sultan	Reign
Mulai-Abderrahman	. 1822-1859	Mulai-Abd-el-Aziz	. 1894-1903
Sidi-Mohamed	. 1859-1873	Mulai-Abd-el-Hafid	. 1908-1912
Mulai-Hassan	. 1873-1894		

The Shereefian umbrella is hereditary in the family of the Filali Sharifs of Tafilelt. Each Sultan was supposed, prior to death, to indicate the member of the Shereefian family who, according to his conscientious belief, would best replace him. This succession was, however, elective, and all members of the Shereefian family were eligible. This was the case in the past, but now that the protectorate is firmly established, the French Authorities will doubtless see that a suitable Sultan succeeds. They are preparing Mulai-Yusef's eldest son for the throne on his father's death.

Government.

In April, 1912, a treaty was signed at Fez by which the Sultan formally accepted the French Protectorate.

The form of government of the Sultanate, or Empire of Morocco, is in reality an absolute despotism, unrestricted by any laws, civil or religious. The Sultan—who is known to his subjects under the title of 'Amir-el-Mumenin,' or Prince of True Believers—is chief of the State, as well as head of the religion. As spiritual ruler, the Sultan stands quite alone, his authority not being limited, as in Turkey and other countries following the religion of Mahomet, by the expounders of the Koran, the class of 'Ulema,' under the 'Sheik-ul-Islam.' Since the establishment of the French Protectorate, however, the Sultan has to follow the advice of the French Resident-General (an office created April 28, 1912) in all matters. The Government of the French Protectorate is in the hands of a French and a Shereefian (native) administration. The Resident-General holds the appointment also of Minister for Foreign Affairs. The Officer Commanding the French troops is Minister of War. The Shereefian administration consists of six Viziers, viz. (1) the Grand Vizier, (2) Vizier of Justice, (3) Vizier of Crown Lands, (4) Vizier of 'Habous' or Pious Foundations, (5) Delegate Vizier for Instruction, and (6) President of Shereefian High Court.

The capitals of Morocco are Fez, Tafilelt, Marakesh, and Rabat, in each of which towns the Sultan has palaces. The seat of Government is Rabat, where the Resident-General has his residence. The Sultan, however, at times makes lengthy visits to the other capitals.

The negotiations between France and Spain as to their respective rights in Morocco came to an end in the Franco-Spanish Treaty of Madrid, signed on November 27, 1912. In this France acknowledged the right of Spain to exercise its influence in the Spanish zone, the extent of which was clearly defined. (See map STATESMAN'S YEAR-BOOK for 1913.) The north Spanish zone lies along the Mediterranean for some 200 miles in length, with

an average breadth of 60 miles but varying in depth. It extends from the Algerian border to the sea, and westward to the town of El Kasar el Kebir, and then by a straight line to the Atlantic. The zone is administered, under the control of a Spanish High Commissioner, by a Calipha (whose headquarters are at Tetuan) chosen by the Sultan from a list of two candidates presented by the Spanish Government. It was further agreed that Tangier and its district should be excluded from the Spanish zone, and become a special zone, some 140 square miles in extent.

The Spaniards had, in 1921, been extending their zone of occupation, and intended to occupy all the territory between Melilla and the old Spanish possession, the island of Alhucemas. In July, however, they met with a serious disaster; their advance posts being captured by the Rifians. The Spanish Government hurried large numbers of troops into their zone, and eventually succeeded in retaking Nadur and Zilnan. A new policy of pacification was instituted in 1922 and a civil High Commissioner appointed.

French Resident-General.—Marshall Lyautey (held office from April 28, 1912, to December 13, 1916. Re-appointed April 7, 1917).

Spanish High Commissioner.—Don Luis Silvela, appointed February 14, 1923.

Calipha of the Spanish Zone.—Mulai El-Mehdi, appointed April 19, 1913.

Area and Population.

According to the most recent investigation, the area is about 231,500 English square miles. Of this Spain claims 8,280 square miles for the north zone, 9,500 square miles for Cape Juby (southern zone), and 580 for Ifni on the west coast (*see* under SPAIN). The population consists of Berbers, Tuaregs, Shellahs, and Arabs, and a considerable number of Jews and Negroes. According to a census taken on March 6, 1921, the French Service des Renseignements estimated the native population of the French zone at 5,400,000, the urban population being put at 537,071, of whom 399,979 are Mussulmans, 65,510 Jewish natives and 66,875 Europeans, of whom 1,025 are British, 41,028 French, 14,114 Spanish and 9,155 Italian. By adding to the 5,400,000 of the French zone, 600,000 for the Spanish zones and Tangier (which can only be taken as a rough estimate), we get 6,000,000 as the total population of Morocco.

The following table shows 1921 Census returns for the principal towns in the French zone, and estimates for the principal towns in the Spanish zone:—

French Zone.						Spanish Zone. ¹		
—	Total	Euro- pean	—	Total	Euro- pean	—	Total	Euro- pean
Rabat ...	30,953	9,226	Meknes ...	36,592	2,622	Tetuan ...	30,000	1,000
Salé ...	24,102	1,048	Fez ...	70,540	2,217	Arzila ...	5,000	—
Kenitra ...	9,438	3,064	Marakesh ...	139,874	1,956	Larache ...	10,000	—
Casablanca ...	101,690	35,283	Azemmour ...	14,037	136	Alcazar ...	8,000	—
Mazagan ...	21,495	1,444	Settat ...	5,599	371			
Safi ...	26,396	1,140	Sefrou ...	8,162	63			
Mogador ..	20,299	732	Taza ...	5,461	785	Tangier ...	50,000	12,000

¹ Melilla, Ceuta and other Spanish possessions are not included. Melilla, created a municipality by decree of December 14, 1918, has a total population of 42,590.

During 1920, 27,926 immigrants disembarked at Casablanca, and of these 11,237, chiefly French (7,062) for permanent residence. There were 1,613 Spanish, 1027 Italian, 516 Portuguese and 383 English. In the same year 18,933 left the country by this port.

Tangier has about 12,000 Jews and 26,000 Moors. Of the European population about 700 comprise the British colony.

An agreement (July 20, 1901) makes the valley of the Wad Gir the boundary between Morocco and Algeria, and to the east of this only those who acknowledge French authority will be permitted to dwell. A French and Moroccan Commission is entrusted with the formation of police arrangements in the region. The number of Christians is estimated at about 87,800, of whom about 11,000 are at Tangier and 39,283 at Casablanca. The Sultan and his subjects are of the Malekite sect of Sunnite Mohammedans.

The most important languages are French, Spanish, Arabic and the Berber languages, of which there are different dialects spoken in the Socs, the Riff and other Berber tribes.

Instruction.

The number of schools in the French zone has increased from 37 in 1912 to 192 in 1921 (87 French, 63 French Arabic, 42 French Jewish). In 1921, there were in the high schools, 24 teachers, 390 pupils; in secondary schools, 140 teachers, 2,534 pupils; primary schools, 605 teachers, 19,705 pupils; professional schools, 63 teachers, 705 pupils; evening schools, 1,825 pupils. Total, 832 teachers, 25,159 pupils. For the education of the natives there are two Moslem colleges at Rabat and Fez respectively with 272 pupils; three schools for the daughters of notables, with 150 pupils. In Rabat there is a College (or Research Institute) for Arabic and the Berber languages (established in 1920). The Spanish Administration has also opened numerous schools. The expenditure on instruction in the Spanish zone (1922-23) 662,920 pesetas.

Justice.

In November, 1913, French Law Courts (Court of Appeal, Courts of Assize, and Petty Courts, civil and criminal) with a special code of laws were established for the needs of Europeans. Courts of Appeal, both civil and criminal, have been established for natives, and the administration of justice by the Governors and codes is controlled. Native judges are the *cadis*, religious magistrates who administer justice according to the Koran.

Finance.

Revenue and expenditure of the French zone for five years:—

	1918	1919	1920	1921 ¹	1922 ¹
	Francs	Francs	Francs	Francs	Francs
Revenue . . .	109,449,045	137,436,418	271,953,517	269,004,243	293,762,000
Expenditure . .	81,159,137	113,567,139	218,977,900	268,998,310	292,538,059

¹ Estimates.

The following are the chief items of estimated income in 1922: Direct taxes, 67,600,000 francs; indirect taxes, 163,025,000 francs; monopolies, 14,260,000. And of expenditure: Residency, 24,718,740 francs; justice, 71,191,149 francs; economic and social services, 121,180,191 francs.

The estimated revenue and expenditure of the Spanish zone for the year 1922-23 was 17,097,268 pesetas. Chief items of expenditure (1922-23):—General expenses of the zone, 808,813 pesetas; justice, 409,300 pesetas; califian military forces, 2,319,436 pesetas; administration, 2,286,910 pesetas. Chief sources of revenue are from indirect taxes, 5,734,284 pesetas, and monopolies, 996,000 pesetas.

The Moroccan debt consists of French loans (1904, 1910, 1914, 1918 and 1920). The 1904 loan amounted to 62,500,000 francs and bears interest at 5 per cent. The 1910 loan was for 101,124,000 francs and also bore interest at 5 per cent. The 1914 loan, guaranteed by the French Government, was for 170,250,000 francs. By a law dated March 25, 1916, the 1914 loan was increased to 242,000,000 francs. The first issue of 70,250,000 in July, 1914, was at 4 per cent. and the second issue 171,750,000 in March, 1918, was at 5 per cent. By the law of August 19, 1920, a further loan, also guaranteed by the Government, was authorised for 744,140,000 francs. Of this amount 300 million francs had been issued by March, 1922, by which date, therefore, the total Moroccan debt amounted to 705,624,000 francs for loans.

Defence.

The Shereefian army is under the supreme command of the Resident-General. The military forces in Morocco are divided into six areas: Rabat, Casablanca, Meknes, Fez, Marrakesh, the region of Oujda and Taza. Each area is commanded by a General Officer, who, except at Rabat and Casablanca, is in charge of the troops, the civil service and the municipality. The French garrison of Morocco was in December 1921 made up as follows:—2 regiments of zouaves, 10 regiments of tirailleurs, 3 regiments of the foreign legion, 1 regiment of colonial infantry, and 6 regiments of mixed colonial infantry (partly French, partly Moroccan). Each of the above regiments is composed of 3 battalions. The cavalry consists of 2 regiments of Chasseurs d'Afrique, and 4 regiments of Spahis; the artillery of 4 groups of African artillery each of 3 battalions; the engineers of two battalions. The total *personnel* was 22,000 French and 47,000 Moroccan troops. There is in addition a force of Moroccan auxiliary troops, consisting of:—the Shereefian guard, 6 regiments of infantry + 1 company, 2 regiments of cavalry + 3 squadrons, 2 mountain batteries of artillery, 3 companies of engineers, 1 signal company; the strength being approximately 16,000. In November, 1922, the total strength of the garrison of Morocco was 85,000.

The Spanish zone is normally divided for military purposes into two zones, under the command of a general stationed at Tetuan, but in consequence of the war in Spanish Morocco this organisation was still in suspense at the end of 1922.

Production and Industry.

The interior of Morocco, although generally open to travellers, is not permanently occupiable as yet on account of lack of security to both life and property. Immigration is confined principally to the towns and especially to the ports and neighbouring districts. Morocco, therefore, is still in the rudimentary stages of both economic and commercial development, though

great progress has recently been made, particularly in the French zone, where measures have been adopted to encourage colonisation, land being sold to Europeans at a comparatively low price for farming purposes on condition that Europeans settle thereon and farm by European methods. Of the 63,275 acres of country properties, French citizens hold 56,515 acres (89 per cent.), other nationalities, 2,765 acres (4 per cent.), and natives, 3,995 acres (7 per cent.).

The Woods and Forests Department estimate that the forest-covered area of the French zone is about 3,750,000 acres in extent. Cork oak, cedar, pine and argan are the chief species.

The soil is capable of agricultural production, but the methods in use are somewhat primitive. The yield of crops (in metric quintals of 220 pounds) in 1921 is given as follows:—barley, 8,113,413; wheat, 6,325,262; beans, 489,364; oats, 80,488; maize and sorgho, 1,498,756; chickpeas, 249,644; linseed, 106,299. In 1921 the number of animals in the French zone was sheep, 6,733,022; goats, 2,040,304; cattle (bovine), 1,517,117; pigs, 115,036; asses, 420,232; horses and mules, 202,006; and camels, 98,252. The vine is of ancient growth in Morocco. In the regions of Fez, Mequinez, Rabat and Donkkala, there are 14,247 acres of vineyards under native cultivation (5,367,392 plants in 1921). European vineyards are of recent establishment, the first having been planted near Casablanca in 1908; their total area was 3,715 acres in 1921. A great variety of fruit is grown. In 1921 there were in the French zone 2,187,637 olive trees, 118,059 orange and lemon trees, 349,548 palm trees (date), 405,862 almond trees, and 2,887,891 figs, etc. In February, 1911, cotton was introduced. Fish of all kinds abound in Moroccan waters; more especially sardines and tunny. The natural resources of the Tangier zone are confined to agriculture. The principal crops grown are wheat, barley and chickpeas, but the amounts produced are quite insufficient for the population and only barely suffice for the needs of the native villages.

Agriculture in the Spanish zone is conducted on primitive lines. Eggs form one of the principal exports.

In addition to its agricultural resources, rich mineral deposits of copper, iron, lead, antimony, sulphur, silver, gold, phosphates and petroleum are also said to exist in various parts of the country. In 1921, 115,489 tons of iron ore were exported from Melilla in the Spanish zone, of which 80,678 tons went to the United Kingdom. An Industrial census in the French zone, taken in July, 1921, shows 268 industrial establishments with 4,060 employees and total capital invested 173,298,090 francs. Compared with census of 1918 the number of establishments has increased by 44·8 per cent. and capital invested by 207·5 per cent.

Commerce.

Imports and exports of French Morocco for five years (25 francs = 1l.):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports . . .	10,803,621	12,575,199	19,280,895	40,018,978	86,366,570
Exports . . .	4,645,923	4,598,616	9,109,708	10,755,002	12,257,574

In 1920 and 1921 the commerce of French Morocco was distributed as follows:—

From or to	Imports		Exports	
	1920	1921	1920	1921
	Francs	Francs	Francs	Francs
France and Algeria	460,410,487	451,943,472	127,293,521	90,902,287
United Kingdom and Gibraltar	212,133,926	141,142,955	69,932,607	46,152,437
Germany	2,708,441	2,617,522	61,840	4,208,405
Spain	26,241,065	22,752,829	29,085,179	80,072,763
Belgium	31,976,007	26,940,269	7,640,900	8,215,262
Italy	10,433,266	5,615,451	4,545,477	12,522,688
Austria	—	269,955	—	—
United States	40,219,850	77,447,616	3,967,934	997,207
Portugal	1,853,388	4,126,917	800,561	6,550,887

The chief imports and exports of French Morocco for two years were:—

Imports	1920	1921	Exports	1920	1921
	Francs	Francs		Francs	Francs
Cottons	155,419,770	146,014,754	Wool	8,710,462	—
Sugar	162,896,853	123,005,478	Eggs	29,910,442	32,121,051
Tea	29,779,966	22,258,470	Almonds	14,946,603	16,716,835
Machinery, hardware	82,978,054	74,691,372	Barley	24,192,435	63,327,862
Candles	20,972,229	5,276,551	Beans	31,140,380	32,350,724
Wines, spirits, beer, &c.	33,901,413	31,901,452	Wheat	2,878	—
Oil, vegetable	5,798,553	6,979,521	Linseed	24,944,227	19,958,374
Woollen goods	8,362,777	10,500,697	Gums	4,256,952	1,430,200
Soap, unscented	7,984,393	4,080,737	Gummi	2,370,317	2,339,020

In 1921 the imports at Melilla in the Spanish zone amounted to 72,552,340 pesetas, and the exports to 6,431,713 pesetas. The bulk of the trade was with Spain.

The imports at Tangier in 1921 amounted to 59,379,252 francs and the exports to 4,522,468 francs. Of the imports 22,384,596 francs came from France, 14,919,779 francs from Spain and 8,596,688 francs from United Kingdom. Of the exports 2,176,602 francs went to Spain, 572,087 francs to France and 419,847 francs to the United Kingdom.

Total trade between Morocco and the United Kingdom for 5 years (Board of Trade Returns):—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Morocco to U.K.	610,180	816,722	1,647,136	1,147,157	545,685
Exports to Morocco from U.K.	3,235,781	3,474,082	4,389,998	3,029,278	2,843,178

Shipping and Communications.

Shipping entered (in foreign trade) in the ports of French Morocco in two years :—

Nationality	1920		1921	
	Vessels	Tonnage	Vessels	Tonnage
French	2,162	2,024,875	3,061	2,849,456
British	672	444,514	786	505,638
Spanish	1,295	185,725	1,476	272,228
Others	1,128	667,678	1,798	889,210
Total	5,257	3,322,792	7,071	4,516,592

In 1921, 2,091 vessels of 1,327,661 tons entered the port of Tangier. Of these, 1,226 vessels, of 353,985 tons, were Spanish, 417, of 579,018 tons, French, and 273, of 205,451 tons, British.

The Moorish Government have now established a postal service under French management. Postal services have long been maintained by the British, French, German and Spanish Governments, with offices at all the ports and at Fez, Mequinez, Alcazar and Marrakesh, but the French have now suppressed their services in the French and Spanish zones, and the Spanish postal service has been suppressed in the French zone. The British services continue. Regular couriers serve all the places named, mails being also sent by all the steamers. There is a daily post to Europe *via* Cadiz and Algeciras, also parcel post and money order systems, and an aerial convey service every day between Toulouse and Rabat.

The Moroccan Post Office in 1920 received 11,853,156 letters, 976,880 registered letters, 250,249 parcels, and 3,012,783 printed papers; and dispatched 11,024,971 letters, 725,902 registered letters, 73,050 parcels, and 1,275,930 printed papers.

The total length of the telegraph lines open to the public on December 31, 1920, was 5,527 miles, carrying 13,227 miles of wire. In 1920, 661,132 telegrams were received and 808,631 were dispatched, exclusive of 318,745 telegrams received and 255,472 sent free of charge (official, etc.).

The following railway lines are being worked :—Oudja to Taza, Taourist, Guercif, and Fez, 223 miles; from Algerian frontier to Oudja, 9 miles; from Fez to Rabat and Casablanca, 210 miles; from Casablanca to Marrakesh, 171 miles. Branch lines are from Guercif to Fritissa, 7 miles; from Taza to Touahar 17 miles; from Ber Rechid to Oued Zem, 82 miles; from Fritissa to Outat-el-Hadj, 66 miles. There is also a branch line from Taourist to Ain Guettar 55 miles. The following line is nearly completed :—Branch line from Meknes to Azroleh and Ain, 74 miles.

In the Spanish zone there is a metre gauge railway from Ceuta to Tetuan, and a small military railway from Rio Martin to Tetuan.

Telephone systems are now in operation in Tangier, and in all the towns of the French Protectorate : Tangier, Arcila, and Larache are connected by telephone. Casablanca, Rabat, and Kenitra have also inter-urban telephone communication and connections are being effected between Casablanca, Rabat, Fez, and Marrakesh. There are telephones also at Sallé, Mazagan, Ber-Rechid and Sellat, and inter-urban lines connecting them all. In 1920 there were in the French zone 2,558 subscribers, who sent 2,789,467 messages.

On November 30, 1921, there were 1,507 miles of main roads and 342 miles of secondary roads in the French zone, and 466 miles of main road and 258 miles of secondary roads under completion. In the Spanish zone, in the Melilla district, the Ceuta-Tetuan road is open (26 miles), and roads are now under construction from Tetuan to the frontier of the Tangier zone and from Laraiche to Alcazar, and in other directions. A main coast road runs from Kenitra to Mogador, whilst from Rabat and Salé a road runs via Meknès, Fez, Taza, and Oujdah to Algeria. From Meknès a road runs south to Azrou and Timhadit on the middle Atlas Plateau, and is the beginning of the Imperial Road to Tafilalet. Further south Marrakesh is connected with the coast by roads running to Casablanca, Mazagan, Saffi, and Mogador. A further road runs from Casablanca to Kasba Tadla, and a minor network of military roads (*pistes aménagées*) run all over the country.

Money, Weights, and Measures.

In the French zone the currency is the French franc. The Hassani or native silver coinage comprises dollars, $\frac{1}{2}$ and $\frac{1}{4}$ dollars, and dirhems and $\frac{1}{2}$ dirhems (1 dollar=10 dirhems). On October 8, 1917, the Moorish dollar was officially fixed as equal to the franc, but in October, 1919, the Hassani was set free, as owing to the rise in the price of silver its intrinsic value became greatly enhanced. In 1920 the State Bank of Morocco was authorised to issue a Moorish franc currency based on a gold standard and current in Morocco only. At Tangier European goods are paid for in Spanish coin or French coin; French coin is much used at Casablanca (Dar-al-Baida) and other ports in the French zone; in other parts of Morocco Moorish coin is now almost exclusively used. On July 27, 1914, the new bronze Hassani coinage was issued. The Rial Makhzani is to be divided into 500 mouzounis, so that the mouzouni may represent a hundredth part of a Hassani peseta. Coins of 2, 5 and 10 mouzounis have been struck. They are of the same type, differing only in size and the figure indicating their value. Spanish notes of 20 pesetas are in circulation in the Spanish zone.

The metric system of weights and measures are current in the French zone; the metric and native systems in the Spanish zone and the Tangier zone. Native measures:—The *Kantar*, used for the produce of the country sold by weight, contains 100 *Rotals*, and is generally equal to about 168 lb., but varies in different districts. The *Kantar*, 100 *Rotals*, equal to 112 lb. English. The *Drah*, 8 *tominis*, about 22 English inches. The Tangier *Mudd*, 8 *tominis*, equal to $1\frac{1}{8}$ English bushel. Oil is sold, wholesale, by the *kula*; that of Tangier actually weighs 28 *rotals*, 47 lb. English, and is equal to about $5\frac{2}{3}$ British imperial gallons.

Diplomatic and Consular Representatives.

OF GREAT BRITAIN IN MOROCCO.

Agent and Consul-General.—M. A. Robertson, C.M.G.

Second Secretary.—W. M. Codrington.

There are also Consuls at Casablanca (Dar-al-Baida) and Rabat; Vice Consuls at Casablanca (Dar-al-Baida), Laraiche, Mazagan, Saffi, Tetuan, Mogador, Fez, and Marrakesh, and Consular Agent at Alcazar and Arzila.

NEPÁL.

AN independent Kingdom in the Himálayas, between $26^{\circ} 25'$ and $30^{\circ} 17'$ N. lat., and between $80^{\circ} 6'$ and $88^{\circ} 14'$ of E. long.; its greatest length 500 miles; its greatest breadth about 150; bounded on the north by Tibet, on the east by Sikkim, on the south and west by British India.

The sovereign is His Majesty Mahárájadhírája **Tribhubana Bir Bikram Jung Bahádur Shah Bahádur Shumshere Jung**, who was born on June 30, 1906, and succeeded his father on December 11, 1911. The Prince-Royal and Heir-apparent was born on June 11, 1920. The government of Nepál is a military oligarchy. All power is in the hands of the Prime Minister, to whom it was permanently delegated by the Mahárájadhírája Surendra Bikram Shah under pressure of the Bharadars or nobles of the State in 1867. The present Prime Minister is His Highness Maharájá Sir Chandrá Shumshere Jung, Bahádur Rana, G.C.B., G.C.S.I., G.C.M.G., G.C.V.O., D.C.L., who was appointed on June 26, 1901. He holds the rank of General in the British army.

The Gurkhas, a Rájpút race originally from Udaipur in Rajputana, who had settled in the province of Gurkha in Nepál, overran the whole country during the latter half of the eighteenth century, and have maintained their supremacy ever since. A commercial treaty between Indía and Nepál was signed in 1792, and a British Resident was sent to reside at Katmandu, but was recalled two years later. A frontier outrage, in 1814, compelled the Indian Government to declare war; and a British force advanced to within three marches of the capital. Peace was concluded and the Treaty of Segowlie signed in March 1816. Since then the relations of the British with Nepál have been friendly. In 1854 hostilities broke out between the Nepalese

and Tibetans, and in 1856 a Treaty was concluded between the Nepalese and Tibetan Governments by which the Tibetans bound themselves to pay an annual tribute of Rs.10,000 to Nepal, to encourage trade between the two countries, and to receive a Representative of Nepal at Lhasa. Besides, trade agents are maintained at Gyantse, Kuti, Kerrong, and other trade marts in Tibet.

In accordance with the treaty of Segowlie, which amongst other things provides that accredited ministers of each shall reside at the Court of the other, a British Envoy, with a small escort of Indian sepoys, lives at the capital; but he does not interfere in the internal affairs of the State.

Area and Population.—Area about 54,000 square miles; population estimated at about 5,600,000. The estimated gross revenue is 15,000,000 rupees. The races of Nepal, besides the dominant Gurkhas, include earlier inhabitants of Tartar origin, such as Magars, Gurangs, and Bhutias. The Newars, who came from Southern India, live in the valley or adjacent to it.

Capital, Katmandu; population about 80,000, and of the surrounding valley 300,000.

Religion.—Hinduism of an early type is the religion of the Gurkhas, and is gradually but steadily overlaying the Buddhism of the primitive inhabitants. The people are in general prosperous. Charitable hospitals have been built at Katmandu and other towns, and charitable dispensaries are established, two in each of the districts east and west.

Defence.—There is a standing regular army of about 30,000, organised in battalions and armed with Lee Enfield and Martini-Henry rifles. An irregular force, nearly as numerous, is armed with old Snider and Enfield rifles. The artillery force has about 250 guns, two batteries being light field pieces, fairly modern, but the rest old smooth-bore muzzle-loading guns.

Trade.—The trade of Nepal with British India during three years ending March 31, has been as follows (merchandise and treasure):—

From or to Nepal	1919-20	1920-21	1921-22
	£	£	£
Imports into India . . .	1,936,300	2,820,300	2,492,700
Exports from India . . .	3,467,500	5,969,300	5,914,200

The principal articles of export are cattle, hides and skins, opium and other drugs, gums, resins and dyes, jute, wheat, pulse, rice and other grains, clarified butter, oil seeds, spices, tobacco, timber, saltpetre. The chief imports are cattle, sheep and goats, salt, spices, sugar, tobacco, drugs and dyes, petroleum, leather, brass, iron and copper wares, raw cotton, twist and yarn, silk, cotton and woollen piece goods. Nepal possesses very valuable forests in the southern part of the country.

The silver mohar is valued at 6 annas and 8 pies of British Indian currency. Copper pice, of which 50 go to a silver mohar, are also coined. The Indian rupee passes current throughout Nepal.

British Envoy at the Court of Nepal, Kathmandu.—Lt.-Colonel W. F. T. O'Connor, C.V.O., C.I.E., I.A.

NETHERLANDS (THE).

(KONINKRIJK DER NEDERLANDEN.)

Reigning Sovereign.

Wilhelmina Helena Pauline Maria, born August 31, 1880, daughter of the late King Willem III., and of his second wife, Princess Emma, born August 2, 1858, daughter of Prince George Victor of Waldeck ; succeeded to the throne on the death of her father, November 23, 1890 ; came of age August 31, 1898, and was crowned September 6 of that year ; married to Prince Henry of Mecklenburg-Schwerin, February 7, 1901. Offspring : Princess Juliana Louise Emma Marie Wilhelmina, born April 30, 1909.

The royal family of the Netherlands, known as the House of Orange, descends from a German Count Walram, who lived in the eleventh century. Through the marriage of Count Engelbrecht, of the branch of Otto, Count of Nassau, with Jane of Polanen, in 1404, the family acquired the barony of Breda, and thereby became settled in the Netherlands. The alliance with another heiress, only sister of the childless Prince of Orange and Count of Châlons, brought to the house a rich province in the south of France ; and a third matrimonial union, that of Prince Willem III. of Orange with a daughter of King James II., led to the transfer of the crown of Great Britain to that prince. Previous to this period, the members of the family had acquired great influence in the United Provinces of the Netherlands under

the name of 'stadthouders,' or governors. The dignity was formally declared to be hereditary in 1747, in Willem IV. ; but his successor, Willem V., had to fly to England, in 1795, at the invasion of the French republican army. The family did not return till November, 1813, when the United Provinces were freed from French domination. After various diplomatic negotiations, the Belgian provinces, subject before the French revolution to the House of Austria, were ordered by the Congress of Vienna to be joined to the Northern Netherlands, and the whole to be erected into a kingdom, with the son of the last stadthouder, Willem V., as hereditary sovereign. In consequence, the latter was proclaimed King of the Netherlands at the Hague on the 16th of March, 1815, and recognised as sovereign by all the Powers of Europe. The union thus established between the northern and southern Netherlands was dissolved by the Belgian revolution of 1830, and their political relations were not readjusted until the signing of the treaty of London, April 19, 1839, which constituted Belgium an independent kingdom. King Willem I. abdicated in 1840, bequeathing the crown to his son Willem II., who, after a reign of nine years, left it to his heir, Willem III. This king reigned 41 years, and died in 1890 ; in default of male heirs, he was succeeded by his only daughter Wilhelmina.

The Sovereign has a civil list of 600,000 guilders. There is also a large revenue from domains, and in addition an allowance of 50,000 guilders for the maintenance of the royal palaces. The family of Orange is, besides, in the possession of a very large private fortune, acquired in greater part by King Willem I. in the prosecution of vast enterprises tending to raise the commerce of the Netherlands.

Government and Constitution.

I. CENTRAL GOVERNMENT.

The first Constitution of the Netherlands after its reconstruction as a Sovereign State was promulgated in 1814, and was revised in 1815 (after the addition of the Belgian provinces, and the assumption by the Sovereign of the title of King) ; in 1840 (after the secession of the Belgian provinces) ; in 1848, in 1887 and in 1917. According to this charter the Netherlands form a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture : in default of male heirs, the female line ascends the throne. In default of a legal heir, the successor to the throne is designated by the Sovereign and a joint meeting of both the Houses of Parliament (each containing twice the usual number of members), and by this assembly alone if the case occurs after the Sovereign's death. The age of majority of the Sovereign is 18 years. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the State Council.

The executive power of the State belongs exclusively to the Sovereign, while the whole legislative authority rests conjointly in the Sovereign and Parliament, the latter—called the States-General—consisting of two Chambers. The Upper or First Chamber is composed of 50 members, elected by the Provincial States. Members of the First Chamber not residing in the Hague, where the Parliament meets, are allowed 10 guilders (16s. 8d.) a-day during the Session of the States-General. The Second Chamber of the States-General numbers 100 deputies, who are elected directly. Members are allowed 5,000 florins (420*l.*) annually, with travelling expenses. Members of the States-General must be Dutch subjects, men or women, and recognised as such.

First chamber (elected 1913): 17 Catholics, 19 Anti-Revolutionists, 4 Protestant Party, 9 old Liberals, 6 Liberal Union, 2 Democrats and 3 Socialists, and 13 others.

Second chamber (elected 1922): Catholics, 32; Social Democrats, 20; Anti-Revolutionists, 16; Christian Historicals, 11; Liberty Union, 10; other parties, 11.

The electoral reform act, passed December 12, 1917, provides for universal suffrage and proportional representation. The Members of the Second Chamber are, according to the Electoral Reform Act, passed August 9th, 1919, directly elected by citizens of both sexes who are Dutch subjects not under 23 years. Criminals, lunatics, and certain others are excluded; for certain crimes and misdemeanours there may be temporary exclusion. It is stipulated, however, that until further regulations are introduced, the Members of the Second Chamber will be elected by citizens of the Kingdom who are 25 years of age. The electoral body numbered May 15, 1921, 3,299,672 voters, *i.e.* 97·7 per cent. of the number of citizens of 25 years and older.

The members of the Second Chamber are elected for 4 years, and retire in a body, whereas the First Chamber is elected for 9 years, and every 3 years one-third retire by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, being bound only to order new elections within 40 days, and to convoke the new meeting within two months.

The Government and the Second Chamber only may introduce new bills; the functions of the Upper Chamber being restricted to approving or rejecting them without the power of inserting amendments. The meetings of both Chambers are public, though each of them, by the decision of the majority, may form itself into a private committee. The ministers may attend at the meetings of both Chambers, but they have only a deliberative vote unless they are members. Alterations in the Constitution can be made only by a bill declaring that there is reason for introducing those alterations, followed by a dissolution of the Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly declared, the laws concern only the realm in Europe, and not the Colonies. The executive authority, belonging to the Sovereign, is exercised by a responsible Council of Ministers. The names of the members of the Ministry are:—

1. *President of the Council of Ministers, Minister of the Interior and of Agriculture.*—Jonkheer Dr. Ch. J. M. Ruys de Beerenbrouck; born December 1, 1873; appointed September 9, 1918.

2. *The Minister of Foreign Affairs.*—Jonkheer Dr. H. A. van Karnebeek; born August 21, 1874; appointed September 9, 1918.

3. *The Minister of Finance.*—Jonkheer Dr. D. J. de Geer; appointed July 28, 1921.

4. *The Minister of Justice.*—Dr. Th. Heemskerk; appointed September 9, 1918.

5. *The Minister of the Colonies.*—S. de Graaff; appointed November 13, 1919.

6. *The Minister of War.*—J. J. C. van Dijk; appointed July 28, 1921.

7. *The Minister of Public Works (Waterstaat).*—G. J. van Swaay, appointed September 18, 1922.

8. *The Minister of Marine.*—E. P. Westerveld; appointed September 18, 1922.

9. *The Minister of Labour, Commerce, and Industry*.—Dr. P. J. M. Aalberse; appointed September 25, 1918.

10. *The Minister of Instruction, Science, and Arts*.—Dr. J. Th. de Visser; appointed September 25, 1918.

Each of the above Ministers has an annual salary of 18,000 guilders, or 1,500*l*. The Minister of Foreign Affairs enjoys besides 10,000 guilders for representation.

There is a State Council—'Raad van State'—of 14 members, appointed by the Sovereign, of which the Sovereign is president, and which is consulted on all legislative and a great number of executive matters.

II. LOCAL GOVERNMENT.

The territory is divided into 11 provinces and 1,110 communes (January 1, 1920). Each province has its own representative body, 'the Provincial States.' The members are elected for 4 years, directly from among the Dutch inhabitants of the province who are 25 years of age. Except that they must be inhabitants of the province, the electors are the same as for the Second Chamber. The members retire in a body and are subject to re-election. The number of members varies according to the population of the province, from 82 for Holland (South) to 35 for Drenthe. The Provincial States are entitled to make ordinances concerning the welfare of the province, and to raise taxes according to legal precepts. All provincial ordinances must be approved by the Crown. The Provincial States exercise a right of control over the municipalities. They also elect the members of the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 (in Drenthe 4) of their members, called the 'Deputed States,' is charged with the executive power in the province and the daily administration of its affairs. This committee has also to see the common law executed in the province. Both the Deputed as well as the Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but in the latter named only a deliberative vote. He is the chief magistrate in the province. The Commissioner and the members of the Deputed States receive an allowance.

Each of the communes forms a Corporation with its own interests and rights, subject to the general law. In each commune is a Council, elected for four years directly, by the same voters as for the Provincial States, provided they inhabit the commune. All the Dutch inhabitants 23 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Council has a right of making and enforcing by-laws concerning the communal welfare. The Council may raise taxes according to rules prescribed by common law; besides, each commune receives from the State Treasury an allowance proportioned to the total number of its inhabitants and to the share which its non-contributing inhabitants have failed to pay towards local taxes. All by-laws may be vetoed by the Sovereign. The Municipal Budget and the resolutions to alienate municipal property require the approbation of the Deputed States of the province. The Council meets in public as often as may be necessary, and is presided over by a Mayor, appointed by the Sovereign for 6 years. The executive power is vested in a college formed by the Mayor and 2–6 Aldermen (wethouders), elected by and from the Council; this college is also charged with the execution of the public law. The Municipal Police is under the authority of the Mayor; as a State functionary the Mayor supervises the actions of the Council; he may suspend their resolutions for 30 days, but is bound to inform the Deputed States of the province.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Population at various census periods :—

1829.	2,613,487	1869	3,579,529	1909	5,858,175
1849.	3,056,879	1889	4,511,415	1920	6,865,314

Area (excluding water) and the population, according to the communal population lists for December 31, 1921 and the Census of 1920 :—

Provinces	Area : English square miles (1920)	Population		
		Dec. 31, 1921	Census 1920	Per sq. mile 1921
North Brabant	1,920	748,227	733,936	389.7
Guelanders	1,939	741,711	729,856	382.5
South Holland	1,131	1,707,784	1,678,670	1,509.9
North Holland	1,066	1,316,002	1,293,051	1,234.5
Zealand	707	246,297	245,117	348.3
Utrecht	525	351,279	342,322	669.1
Friesland	1,243	386,506	382,876	310.1
Overijssel	1,295	445,888	438,818	344.3
Groningen	881	369,897	365,586	419.8
Drenthe	1,023	212,871	209,718	207.0
Limburg	847	450,968	440,364	432.4
Total	12,582	6,977,430	6,865,314	554.5

Of the total on December 31, 1920, 3,410,262 were males and 3,455,052 females.

The area, including the interior waters, amounted in 1920 to 13,205 square miles, whilst the total area, including gulfs and bays, amounted in 1920 to 15,763 square miles.

On June 14, 1918, a law was passed for the purpose of forming a new province by the draining of the 'Zuiderzee' to the extent of 523,000 acres. The work is expected to take 15 years, and the total outlay for the first stage is calculated at 66,250,000 florins.

Urban and rural population was as follows :—

Year	Population of the principal Towns ¹	Percentage of the whole Population	Rural Population	Percentage of the whole Population
Dec. 31, 1889	1,674,474	37.11	2,836,941	62.89
" " 1899	2,144,017	42.00	2,959,962	58.00
" " 1909	2,562,023	43.73	3,926,152	56.27
" " 1920	3,133,084	45.63	3,732,062	54.37
" " 1921	3,186,120	45.66	3,791,310	54.34

¹ The towns with a population of more than 20,000 inhabitants at the census of 1920.

II. MOVEMENT OF THE POPULATION.

Years	Total Births Registered as Living	Illegiti- mate	Deaths	Marriages	Surplus of Births over Deaths	Stillborn
1919	164,447	3,355	89,646	58,270	74,801	5,516
1920	192,987	4,112	81,525	65,425	111,462	7,506
1921	189,546	3,986	77,002	63,572	112,544	7,362

The emigration has been as follows, mostly to North America: 1918, 1,160; 1919, 2,439; 1920, 5,978; 1921, 3,286 (1,556 were males, 1,156 females, and 575 children)

The total number of emigrants, Dutch and foreigners, who sailed from Dutch ports was, in 1920, 42,337, and in 1921, 35,799.

III. PRINCIPAL TOWNS.

Population on December 31, 1920:—

Amsterdam	647,427	Maastricht	54,328	Zwolle	55,743
Rotterdam	516,271	Dordrecht	54,094	Deventer	32,248
The Hague	354,987	Apeldoorn	47,995	Amersfoort	31,130
Utrecht	140,309	Leeuwarden	43,127	Breda	29,869
Groningen	90,778	Enschede	41,488	Helder	28,012
Haarlem	77,327	Emmen	41,073	Zaandam	28,828
Arnhem	71,599	Schiedam	40,469	Gouda	26,472
Nimeguen	66,911	Delft	39,415	Hengelo	26,303
Leiden	65,604	Hilversum	38,998	Alkmaar	24,296
Tilburg	63,111	'sHertogenbosch	38,446	Flushing	22,511

Religion.

Entire liberty of conscience is granted to the members of all religious confessions. The royal family and the majority of the inhabitants belong to the Reformed Church. The State Budget contains fixed allowances for the different churches: for Protestant Churches, about 1,388,000 guilders; for Roman Catholics, about 576,000; and for Jews, about 14,000.

The number of adherents of the different churches in the various provinces, according to the census of 1920 was: Dutch Reformed Church, 2,826,633; Other Protestants, 832,164; Catholics, 2,444,583; Jansenists, 10,461; Jews, 115,222; and other creeds or those of none, 635,241; unknown, 1,010.

The government of the Reformed Church is Presbyterian. At the end of 1912 the Dutch Reformed, Walloon, English Presbyterian, and Scotch Churches had 1 Synod, 10 provincial districts, 44 classes, and 1,362 parishes. Their clergy numbered about 1,640. The Roman Catholic Church had one archbishop (of Utrecht), 4 bishops, and 1,133 parishes. The Old Catholics had 1 archbishop, 2 bishops, and 27 parishes. The Jews had about 171 parishes.

Instruction.

Public instruction (primary) is given in all places where needed, religious convictions being respected. Instruction was made obligatory by the Act of 1900; the school age is from 7–13.

In 1806, and more expressly in 1848, secular instruction was separated from religious or sectarian instruction. The law on the point of the year 1879 is still in force. By a modification of the Act of 1887 public instruction is diminished and a greater share in education is left to private instruction, if approved as efficient by the State, in which case it is paid for out of public funds. The cost of public primary instruction is borne jointly by the State and the communes, the State contributing to the salaries of the teachers and being responsible for 25 per cent. of the costs of founding or purchasing schools.

The Secondary Education Act dates from the year 1863, but it has repeatedly been modified since. Superior instruction is given in the larger communities in public or private schools. Private schools may be endowed by the State, private professional schools also by the province and the community. The Higher Education Act dates from the year 1876, but

it has repeatedly been modified since. Higher education is given at Universities, in high schools, and grammar schools, either public or private. Private institutions may be endowed by the State. Tuition in Kindergartens has not been regulated by law.

The following table is taken from the Government returns for 1919-20 :

Institutions	Number	Teaching Staff	Pupils or Students	
			Total	Female
Universities (public) ¹	4	332	5,430	1,266
Technical University.	1	86	2,311	114
Private University	1	17	216	—
High School of Commerce ²	1	32	565	34
Classical (public) schools	34	582	3,526	1,417
Schools for the working people.	555	4,718	58,472	19,153
Navigation schools	12	162	1,160	—
Middle class schools	160	2,594	24,234	7,781
Elementary Schools :				
Public	3,437	19,697	650,459	280,050
Private	2,510	15,618	461,370	251,971
Infant Schools.				
Public	211	1,620 ³	35,600	16,674
Private	1,142	3,476 ³	111,457	56,039

¹ Leiden (founded 1575), Utrecht (1636), Groningen (1614) Amsterdam (1632). In 1918 Veterinary School at Utrecht and the Agricultural School at Wageningen were created the Universities.

² Rotterdam.

³ Figures for the year 1918-19

Besides the schools named in the table, there is a great number of special schools, mostly technical. Since 1908 there is also a Government school to train functionaries of the colonial service for superior posts.

In 1919 the State spent on education 8,132,000*l.*; the provinces, 75,000*l.*; the Communes, 1,490,000*l.*

Of the conscripts called out in 1913, 0·6 per cent. could neither read nor write, the percentage being highest in Drenthe, 1·5. Of the persons married in 1918, 0·22 per cent. of the males and 0·41 per cent. of the females could not sign the marriage certificate. Of the convicts in 1911, 4 per cent. could neither read nor write. Of the total number of children from 7 to 13 years (school age) on January 15, 1920, 4·54 per cent. received no elementary instruction.

Justice and Crime.

Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 23 district tribunals, and by 101 cantonal courts; trial by jury is unknown in Holland. The Cantonal Court, which deals with minor offences, is formed by a single judge; the more serious cases are tried by the district tribunals, formed as a rule by 3 judges (in some cases one judge is sufficient); the courts are constituted of 3 and the High Court of 5 judges. All Judges are appointed for life by the Sovereign (the Judges of the High Court from a list prepared by the Second Chamber). They can be removed only by a decision of the High Court.

Juvenile courts have recently been called into existence. The juvenile court is formed by a single judge specially appointed to try children's civil cases, at the same time charged with the administration of justice for criminal actions committed by young persons who are not yet 18 years old, unless

imprisonment of more than a year ought to be inflicted, in which case the judge of the juvenile court acts as judge-examiner.

The number of persons convicted was:—

Year	By the Cantonal Courts		By the District Tribunals	
	Male	Female	Male	Female
1918	111,981	15,807	29,028	5,680
1919	154,295	17,221	29,881	5,208
1920	226,976	22,729	21,998	5,337
1921	218,959	21,249	16,149	1,972

The number of inmates in the 28 prisons during the years 1919, 1920, and 1921 was respectively, 10,146, 8,720, and 5,119 males, and 1,247, 823, and 466 females; in the 27 houses of detention, 18,682, 19,240, and 17,210 males, and 1,520, 1,133, and 946 females. There are also 5 State-work establishments; the numbers of inmates of these establishments were respectively in the years 1919, 1920, and 1921, 9,848, 7,152, and 5,047 males, and 356, 39, and 38 females.

In 1901 an Act was passed reforming State reformatories for the education of juvenile criminals and establishing disciplinary schools for juvenile criminals and for children admitted by request of parents or guardians (*correction paternelle*). The number of inmates during the years 1918, 1919, and 1920 in the State reformatories was: 1,394, 1,341, 1,615 boys, and 113, 123, 116 girls; in the disciplinary schools: 2,145, 1,176, 964 boys, and 173, 162, 160 girls.

There are both State and communal police. The State police consists of field-constables and cavalry. The former are spread over the country, the latter guard the frontiers (eastern and southern). The cavalry police (*maréchaussée*) numbers about 25 officers and about 1,018 men. There are about 1,339 field-constables—appointed and paid by the Government—divided into numerous brigades. Besides each commune has its own field-constables or police force.

Pauperism and Social Insurance.

The relief of the poor is in the first place in the hands of the religious societies and organised private charity. The State interferes whenever no relief is to be obtained from private charity; in that case the pauper must be supported by the commune where he is living, which is most often the case. There is no poor rate in the Netherlands. Mendicity and vagabondage are treated as offences, and persons so convicted can be placed in a State-work establishment. Workhouses for the poor are found in very few communes.

Number of poor relieved in the Kingdom during the year 1920:—Heads of families, 169,547; other persons, 50,472; lunatics and idiots, 15,243; women in childbed, 8,856; in asylums (almshouses), 75,029; in hospitals, 74,741; in workhouses, 3,685.

The amount spent on outdoor relief in 1920 was 26,486,665 florins, for lunatics and idiots 11,877,799 florins, for maternity cases 82,346 florins, for asylums 14,550,352 florins, for hospitals 13,465,848 florins, and for workhouses 555,049 florins.

On September 19, 1916, a Government scheme for unemployment insurance was set up in Holland.

Finance.

The revenue and expenditure in five years were (12 guilders = £1):—

REVENUE.

Year 1	Ordinary	Extraord. (loans, &c.)	Total
	Guilders	Guilders	Guilders
1919	738,015,000	45,670,000	783,685,000
1920	805,001,000	44,087,000	939,088,000
1921	825,907,000	65,310,000	891,217,000
1922	723,849,600	108,533,000	832,382,000
1923	662,786,000	96,744,000	759,530,000

EXPENDITURE.

Year 1	General	Debt	Defence	Extraordinary	Total
	Guilders	Guilders	Guilders	Guilders	Guilders
1919	424,191,000	113,954,000	212,945,000	148,719,000	899,809,000
1920	528,233,000	136,787,000	124,227,000	249,077,000	1,048,324,000
1921	514,796,000	155,000,000	117,697,000	403,234,000	1,190,727,000
1922	497,522,000	170,344,000	119,859,000	311,124,000	1,098,848,000
1923	418,080,000	187,300,000	104,645,000	262,323,000	972,348,000

Budget voted for the year 1922 and estimates for 1923 were as follows:—

Branches of Expenditure	1922	1923	Sources of Revenue	1922	1923
	Guilders	Guilders		Guilders	Guilders
Civil list	900,000	1,700,000	Direct taxes:—

	50,000	50,000	Part paid by the East Indies in the interest and sinking fund of public debt		
			Share in the profits of the Bank of the Netherlands	1,956,368	1,891,242
			State mines	15,000,000	14,500,000
			Misc. receipts	43,901,500	42,862,500
				94,699,082	113,733,822
Total expenditure	1,098,848,300	972,347,456	Total revenue	607,126,840	581,906,504
	(91,570,692L)	(81,028,955L)		(59,593,908L)	(48,492,209L)

1 Provisional

Exclusive of defence taxes.

The amount of the chief taxes per head of the population was, in 1921, 95.98 guilders.

The expenditure of the 'Department for the Colonies' entered in the budget estimates only refers to the central administration. There is a separate budget for the great colonial possessions in the East Indies, voted as such by the States-General. The financial estimates for the year 1923 are distributed between the colonies and the mother country in the following proportions:—

	Guilders		Guilders
Expenditure in the colonies	630,246,581	Revenues in the mother country	5,854,670
Home Government expenditure	170,370,407	Revenues in the colonies	609,355,225
Total expenditure	800,616,988 (66,718,082L.)	Total revenue	615,209,895 (51,267,491L.)

In the Budget for 1923 the national debt is given as follows:—

	Nominal Capital	Annual Interest
Funded Debt	Guilders	Guilders
2½ per cent. debt	556,816,000	13,920,401
3 " " debt of 1895, 1896, 1899 and 1905	416,821,000	13,404,621
3½ " " debt of 1910	43,142,000	1,509,987
4 " " debt of 1916	123,280,000	4,931,200
4½ " " debt of 1916 and 1917	598,981,000	26,954,145
5 " " debt of 1918 and 1919	676,147,000	34,262,615
6 " " debt of 1922	—	27,812,550
Annuities	—	4,818,559
Sinking fund	—	41,649,460
Unforeseen expenditure	300,000,000	18,011,250
Total debt	2,745,187,000 (228,765,583L.)	187,274,788 (15,606,232L.)

During the years 1850–1922, 585,685,015 guilders have been devoted to the redemption of the public debt.

The rateable annual value of buildings was given at 235,812,042 guilders in 1921, and of land, 98,427,242 guilders.

The various provinces and communes have their own separate budgets; the provincial expenditure for 1919 was 64,113,240 guilders; the revenue at 65,483,086 guilders; the communal expenses in 1919 amounted to 1,465,886,602 guilders, whereof 775,978,992 guilders for debt. The communal revenues were, in the same year, 1,412,736,824 guilders.

Defence.

I. FRONTIER.

The Netherlands are bordered on the south by Belgium, on the east by Germany. On the former side the country is quite level, on the latter more hilly; the land frontier is open all round. The frontiers are defended by few fortresses. The scheme of defence adopted in 1874 contemplates concentration of the defensive forces in a restricted area, known as the 'Holland Fortress.' This comprises the provinces of North and South Holland, with parts of Zeeland and Utrecht. Two-thirds of the area is surrounded by the sea. On the land side, to the East and South, are lines of more or less permanent works, which can be rendered very difficult of

attack by inundations. There are also strong works on the coast, notably the Helder group, barring access to the Zuiderzee, and the Hollandsch Diep and Volkerak position, while the entrances to the Amsterdam and Rotterdam ship canals are defended by powerful forts. The citadel of the whole is Amsterdam, which is well fortified. Here also inundations would almost preclude a successful attack. The coast defences are in good order and are to be further strengthened, but the defences on the land side, except the position of Amsterdam, have of late years been neglected. Moreover, the control of the inundations is not entirely in military hands.

Apart from the Holland Fortress are the works on the Western Schelde. These have hitherto been unimportant, but a plan has been adopted to augment them by entirely new works at Flushing.

II. ARMY.

According to an Act of 1912, service in the army is partly voluntary and partly compulsory: the voluntary enlistments bear a small proportion to the compulsory. Every Dutch citizen and, in certain circumstances, every other resident in the Netherlands, is liable to personal service in the army (or navy) from the age of 19 up to 40. Actual service in the ranks is determined by lot, but substitution is not permitted. The maximum strength of the annual contingent is fixed at 25,500 (including 600 for the sea service).

The conscripted militiamen belong to the active army for 6 years for the unmounted corps, and 8 years for the mounted corps (sea service 5 years). The 'full' training time is $8\frac{1}{2}$ months in the infantry, engineers, and garrison artillery (under certain circumstances $6\frac{1}{2}$ months), and 24 months in the cavalry, horse and field artillery. A certain proportion of the full-course men of the infantry and garrison artillery (between 3,800 and 4,500 men, designed by lot) are retained for an additional 44 months. The full-course men are called up in two batches, two-thirds in January (March), one-third in October.

With regard to further training, men belonging to mounted corps are liable to be called out once in their army service for 4 weeks; the others, once for 4 and the second time for 3 weeks.

After having fulfilled their active service the militiamen pass to the 'landweer' for 5 years; they can be called out once in their 5 years, for 6 days. Men of mounted corps and of the navy are excused from landweer service. Men after they have completed their landweer service belong to the 'landstorm' up to the age of 40, together with all men who have not passed through the ranks.

The landweer forces are organised in units corresponding to those of the first line, except that there are no mounted troops. Cadres are maintained in time of peace for the landweer formations.

The field army consists of 4 divisions and an independent cavalry brigade. A division contains 3 brigades of infantry each consisting of 2 regiments of 3 battalions, 1 squadron, a field artillery regiment (16 three-gun batteries, 48 guns), a group of 2 four-gun batteries of heavy artillery, 2 companies of cyclists, 54 machine guns, and 2 companies of engineers. The total strength of a division in the field, with staff, would be about 20,000 officers and men. The cavalry brigade has 4 regiments, each of 3 squadrons, 4 companies of cyclists and 4 three-gun batteries of horse artillery. There are also 66 battalions of army troops, of which 48 are Landweer battalions. The landweer troops, with the fortress artillery of the active army, would hold the fortresses.

The strength of the Netherlands army, including the 'landweers,' was

PRODUCTION AND INDUSTRY

on April 2, 1922, 6,458 officers and 252,534 men, and comprises 137,9 rifles, 156 field and 42 heavy guns. The strength of the regular arm, exclusive of 'landweers' was 29,400. There are 156,000 additional trained men, and 250,000 untrained men available for mobilisation. Military budget for 1923 was 71,503,489 florins.

The Netherlands infantry is armed with the Mannlicher magazine rifle, model 95. Cavalry and engineers carry the Mannlicher carbine. The field artillery, including the horse batteries, is armed with a shielded Q. F. Krupp gun of 7.5 cm.

III. NAVY.

The Navy is maintained for a double purpose—viz. the protection of the Dutch waters and coast, and the defence of the East Indian possessions. These latter contribute to the maintenance of that division of it known as the Indian Marine. A plan is under consideration for adding to the Navy vessels mainly for the defence of the Dutch East Indies.

Following is a list of the principal ships of the Dutch Navy.

Name	Displacement, Tons	Armour water line	Max. Armour on gun	Principal Armament	Torpedo Tubes	Indicated Horse-power	Nominal Speed Knots	Designed
COAST DEFENCE SHIPS								
Hertog Hendrik Koningin Regentes De Ruijter	5,080	6	10	2 9.4-in., 4 6-in.	3	6-7,000	17	'98
Tromp	5,300	6	10	2 9.4-in., 4 6-in.	3	6-7,000	17	'95
Zeven Provinciën	6,530	6	10	2 11-in., 4 6-in.	—	7,500	16	'08
CRUISERS								
Zeeland	3,900	deck	—	2 5.9-in., 8 4.7-in.	4	10,000	20	'95
Gelderland	4,030	deck	—	10 4.7-in.	1	„	20	'97
Java Sumatra	7,050	3-in.	—	10 6-in., 4 3-in.	—	65,500	30	'16

There are also 3 armoured gunboats, and 4 for the defence of the Zuyderzee, and about 9 in the East Indies; 8 destroyers of 480 tons; 15 torpedo boats; 21 submarines, and 4 building; a submarine dépôt ship and 14 mine layers. The Zeven Provinciën, Java and Sumatra are assigned to the East Indies Fleet, as are the 8 destroyers, 4 of the torpedo-boats, and 10 of the completed submarines.

Production and Industry.

I. AGRICULTURE.

The surface of the Netherlands was divided in 1921 as follows (in hectares: 1 hectare=2.47 acres):—Uncultivated land (heath) 473,467; water and morass, 129,041; dykes and roads, 59,802; untaxed land, 76,440; building land, houses, &c., 57,341. Total, 796,091. Cultivated land: arable land, 902,749; pasture, 1,224,902; gardens and orchards, 94,656; forest, 248,685. Total, 2,470,992.

Large estates prevail in the provinces of Zealand, South Holland, Groningen, and North Holland; small estates in North Brabant, Guelders, Limburg, and Overijssel.

The areas under the principal crops, in acres, were as follows:—

Products.	1919	1920	1921	Products.	1919	1920	1921
	Acres	Acres	Acres		Acres	Acres	Acres
Winter wheat . . .	141,340	138,937	169,194	Brown mustard seed . . .	607	1,692	870
Summer wheat . . .	28,545	18,792	12,278	White mustard seed . . .	1,312	3,292	677
Winter rye . . .	498,132	494,355	499,320	Carraway seed . . .	1,522	2,427	1,176
Summer rye . . .	4,635	—	—	Flax . . .	24,465	54,107	21,510
Winter barley . . .	34,107	35,515	38,748	Tobacco . . .	666	985	788
Summer barley . . .	23,677	20,707	22,711	Table potatoes . . .	382,942	426,092	440,755
Oats . . .	380,270	396,410	382,637	Factory potatoes . . .	67,680	—	—
Buckwheat . . .	19,017	17,392	12,860	Sugar beets . . .	132,757	158,675	171,901
Horse beans . . .	60,775	63,619	54,315	Chicory . . .	2,587	2,226	1,764
Peas . . .	80,310	66,292	63,349	Onions . . .	5,320	5,630	6,180
Beans . . .	37,957	25,537	21,520				

The yield of the more important products for 3 years was as follows:—

Crop	Produce			Crop	Produce		
	1919	1920	1921		1919	1920	1921
	Quarters	Quarters	Quarters		Tons	Tons	Tons
Wheat . . .	774,918	791,750	973,621	Sugar beet . . .	1,494,108	1,905,452	2,708,277
Barley . . .	311,833	351,453	298,404	Flax . . .	5,272	7,125	4,923
Oats . . .	2,388,823	2,701,545	1,807,245				
Rye . . .	1,296,293	1,955,210	1,625,275				

According to the live-stock census of May-June, 1921, Holland possessed 363,668 horses, 2,062,771 cattle, 668,211 sheep, and 1,519,245 pigs.

II. MINING AND MANUFACTURES.

A few coal-mines are found in the province of Limburg; some of them belong to the State. The quantity of coal extracted in 1921 was 3,921,065 metric tons, valued at 76,902,000 guilders. In 1921 the private mines produced 2,065,704 tons, and the State mines, 1,855,361 tons; total for 1921, 3,921,065 tons. There is one salt mine at Bockelo.

There are no official returns of all the manufacturing industries. According to the last reports there were, in 1921: 1,344 distilleries, 10 sugar refineries, 21 beet-sugar refineries, 22 salt works, and 239 breweries.

III. FISHERIES.

In 1921, 5,733 vessels of all kinds were engaged in the fisheries, with crews numbering about 16,809. The produce of the herring fishery in the North Sea was valued at 7,034,410 guilders in 1921. The quantity of oysters produced in 1921 amounted to 1,502,020 kilos.

Commerce.

The Netherlands is a free-trading country. A few duties are levied, but they have only a fiscal or statistical, not a protectionist, character.

The following are the returns of the imports (exclusive of gold and silver coins and bullion) for home consumption and the export of home produce for six years (in thousands of guilders) :—

Year	Imports	Exports	Year	Imports	Exports
1917	964,731	819,245	1920	3,335,714	1,701,492
1918	608,357	381,210	1921	2,240,219	1,369,599
1919	2,825,739	1,411,308	1922	2,626,579	1,231,231

The values of the leading articles of import and export in the last two years were (in thousands of guilders, 12 guilders = 1L.) :—

	Imports		Exports	
	1921	1922	1921	1922
Iron and steel of all kinds	137,122	107,670	32,354	27,792
Textiles, raw and manufactured	217,695	271,149	121,700	123,940
Cereals and flour	256,929	201,077	31,761	19,981
Coal	126,770	114,646	36,424	35,305
Rice and flour thereof	18,490	12,179	3,102	2,956
Mineral oil	59,300	40,267	3,581	1,783
Coffee	44,987	48,325	23,323	20,916
Butter	3,990	5,711	48,670	44,125
Margarine (raw and edible)	10,826	8,517	58,324	36,419
Sugar	16,272	24,880	62,914	59,920
Cheese	610	423	67,706	53,626
Gold and silver	48,283	7,142	101,965	35,480
Wood	92,746	91,104	4,107	3,833
Skins	23,346	17,235	22,022	20,382
Indigo	350	290	56	26
Copper	10,026	8,087	1,874	2,534
Paper	29,977	31,884	33,974	34,760
Soot, grease, tallow, suet	21,643	21,866	13,354	11,849
Saltpetre	167	195	191	211
Zinc	3,425	3,433	2,373	6,282
Tobacco (unmanufactured)	38,062	26,157	3,106	1,660
Tin	2,246	1,911	402	402
Colours (painters' wares)	12,621	13,503	10,712	14,917
Seeds (colza, linseed, &c.)	66,584	64,083	9,256	10,833
Manures (all sorts)	51,898	50,139	10,801	15,515

Value of the trade (excluding gold and silver coins and bullion) with the leading countries for two years in thousands of guilders :—

Imports		1921	1922	Exports		1921	1922
Germany	628,267	608,434	Germany	254,311	167,775		
Great Britain	312,032	323,608	Great Britain	351,617	302,968		
Belgium	226,586	187,992	Belgium	169,506	174,063		
Dutch East Indies	128,687	102,373	United States	46,978	62,094		
Russia	3,044	—	Dutch East Indies	190,629	127,382		
United States	392,289	270,795	Austria	26,348	—		
British India	19,678	—	Sweden	18,221	—		
France	65,060	57,290	France	84,625	114,525		
Sweden	26,756	—	Switzerland	25,545	—		

The principal articles of trade between the United Kingdom and the Netherlands (Board of Trade Returns) in two years were :—

Imports into U.K. from Netherlands	1920	1921	Exports of produce and manuf. of U.K. to Netherlands	1920	1921
	£	£		£	£
Flax	1,049,096	287,706	Cottons	3,143,060	1,403,197
Fish	281,569	390,958	Cotton yarn	3,434,598	3,037,613
Cheese	724,194	768,956	Coal	923,744	2,566,176
Butter	1,583,482	744,245	Iron and Steel	4,572,030	1,905,530
Margarine	5,231,770	5,149,224	Machinery	2,033,814	2,337,639
Paper, Strawboard	3,253,261	1,015,839	Boots and Shoes	48,210	235,626
Sugar	50,763	3,149,849	Woolens	3,314,795	1,213,778
Tomatoes	768,231	739,236	Sodium compounds	215,883	32,677
Condensed milk	2,639,372	3,886,864	Cottonseed oil	382,761	44,603

Much of the trade here entered as with the Netherlands consists of goods on transit from and to Germany, notably the imports of silk goods and metal goods.

Total trade between the Netherlands and the United Kingdom (in thousands of pounds sterling) for 5 years (Board of Trade Returns) :—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Netherlands to U.K.	7,670	21,658	39,253	38,834	34,198
Exports to Netherlands from U.K.	14,986	34,316	47,699	27,341	34,903

Shipping and Navigation.

The number of vessels in the mercantile navy at the end of 1921 was :—
Sailing vessels 217, of 20,159 English tons; steamers 651, of 1,174,840 English tons.

The following table gives the number and tonnage (in English measurement) of vessels which entered and cleared the ports of the Netherlands :—

Year	Entered.					
	With Cargoes		In Ballast		Total	
	No.	Tonnage	No.	Tonnage	No.	Tonnage
1919	5,647	6,009,525	1,435	1,088,191	7,082	7,097,716
1920	8,317	6,691,234	2,797	1,359,166	11,114	8,030,400
1921	10,702	6,422,519	3,372	1,628,584	14,074	8,051,103
	Cleared.					
	No.	Tonnage	No.	Tonnage	No.	Tonnage
	No.	Tonnage	No.	Tonnage	No.	Tonnage
	No.	Tonnage	No.	Tonnage	No.	Tonnage
1919	4,408	3,663,276	3,062	3,587,044	7,470	7,250,320
1920	7,712	4,911,739	3,708	3,184,277	11,420	8,096,016
1921	9,995	5,129,672	4,143	2,631,012	14,138	7,760,684

Of the total number in 1921, 4,340 Dutch vessels entered with a tonnage of 2,847,144, and 9,734 foreign vessels with a tonnage of 5,203,969; 4,322 Dutch vessels cleared, with a tonnage of 2,572,359, and 9,816 foreign vessels with a tonnage of 5,188,327.

The vessels with cargoes which entered at the chief ports were as follows :—

Port	<i>Entered.</i>					
	1920			1921		
	Number	Tons	per cent.	Number	Tons	
Rotterdam	4,015	4,032,352	53·7	5,750	3,935,375	
Amsterdam	1,650	1,143,417	22·0	2,122	1,340,248	
Flushing	368	209,649	4·1	337	156,942	
Hook of Holland	333	237,538	4·4	370	180,951	
<i>Cleared.</i>

Amsterdam	1,222	856,291	18·0	1,682	943,124	
Flushing	310	204,601	4·5	349	155,697	
Hook of Holland	298	229,342	4·4	325	167,725	

Internal Communications.

I. CANALS AND RAILWAYS.

The total extent of canals is about 2,000 miles; of roads about 3,000 miles.

In 1921 the total length of the principal tramway lines was 1,775 miles; 302,038,000 passengers were carried, and 2,241,036 kilogrammes of goods. Their revenue amounts to 41,134,000 guilders.

In 1921 the 2 principal railways had a length of 2,377 miles. The breadth of the railway gauge is 1·50 metres, or 4 ft. 11 in. In 1921 55,380,000 passengers were carried on the railways. The revenue was 190,014,000 guilders. All railway companies are private; there is a State railway company, only so named because the road is owned by the State. A project is on foot for bringing the four railway companies under one control.

II. POST AND TELEGRAPHS.

The postal traffic was as follows in 2 years :—

—	Letters	Post Cards	Newspapers and Printed Matter	Parcels	Letters with Money Orders
1920					
Internal .	192,368,000	131,892,000	401,018,000	8,822,000	671,784
Foreign .	59,383,000	18,725,000	29,747,000	1,967,000	181,800
1921					
Internal .	181,069,000	116,444,000	406,394,000	8,246,000	521,123
Foreign .	54,866,000	17,544,000	28,072,000	582,000	336,838

The receipts of the Post Office in 1921 were 50,816,000 guilders, the expenditure in 1921 59,270,000 guilders.

There are several private telegraph lines, but most of the lines are owned by the State. The length of State lines on Dec. 31, 1921, was 5,617 miles, the length of wires 30,161 miles. The number of State offices was, on December 31,

1921, 1,565. The number of paid messages by State and private lines in 1920 was 9,095,800. The receipts of the State amounted in the same year to 19,115,000 guilders, and the ordinary expenses in 1921 to 13,439,000 guilders.

In 1921 the interurban telephone system had 2,742 miles of line and 93,233 miles of wire, and is administered by the State; 11,150,827 interurban and 886,330 international conversations were held. The receipts were in the same year for interurban and international intercourse 16,081,000 guilders, and the total expenses 11,655,000 guilders.

There is an aeroplane service subsidised by the Government between Amsterdam and London, Rotterdam and Hamburg, and Amsterdam, Brussels and Paris. In 1921 1.5 tons of postal matter, 38.6 tons of goods and 1,674 passengers were carried.

Money and Credit.

The money in general circulation is chiefly silver. Before 1875 the Netherlands had the silver standard; but a bill which passed the States-General in the session of 1875 allowed an unrestricted coinage of ten-guilder pieces in gold, whereas the coinage of silver was suspended for an unlimited time.

Value of money minted during the following years (in thousands of guilders):—

Year	Gold	Silver	Copper and Nickel	For the East and West India Colonies	Total value	Total number of pieces
1881-1900	8,564	14,710	1,310	10,834	34,418	452,342,090
1901-1910	992	33,870	2,005	15,230	52,097	400,679,000
1914-1920	11,385	53,100	1,703	18,392	84,580	573,038,476
1921	—	3,000	134	14	3,134	21,100,000

The Bank of the Netherlands is a private institution, but it is the only one which has the right of issuing bank-notes. This right, granted in 1863 for 25 years, was prolonged in 1888 for 15 years, and prolonged again for the same term in 1903, with some alterations in the conditions; e.g. all the paper money is to be issued by the Bank. In 1918 the Charter was once more prolonged for a further 15 years. The Bank does the same business as other banks, only with more guarantees. Two-fifths of the paper money in circulation must be covered. It has agencies in all places of importance.

Year	Notes in Circulation, March 31	Total Exchanges years ending March 31	Stock of Gold, March 31	Stock of Silver, March 31
			1,000 guilders	1,000 guilders
1920	1,051,722,000	1,618,251,658	634,871	8,432
1921	1,052,253,000	1,847,486,105	621,033	16,687
1922	996,088,000	1,964,639,459	606,139 ¹	5,690

¹ Gold and silver.

The capital amounts to 20,000,000 guilders, the reserve fund in 1922 to 5,660,600 guilders. The Bank keeps the State-Treasury and the cash of the State Postal Savings-Bank and of other institutions. It receives 3½ per

cent. of the clear gains; the remainder is divided between the State and the Bank in proportion of 2 : 1.

There are many savings-banks, all private. Besides these there is a State postal savings-bank, established in 1881. The following table gives some particulars of both :—

Year	Number of Savings Banks	Amount deposited (in 1,000 gldrs.)	Amount withdrawn (in 1,000 gldrs.)	Total Deposits at end of year (in 1,000 gldrs.)	Number of Depositors at end of year	Amount per inhabitant. Gldrs.
1919	—	—	—	—	—	—
State P. S. B.	—	137,836	117,919	268,188	1,887,362	39·26
Private banks	287	106,613	83,105	205,240	603,133	30·04
1920	—	—	—	—	—	—
State P. S. B.	—	124,983	127,038	272,954	1,908,305	39·90

1921	—	—	—	—	—	—
State P. S. B.	—	125,806	121,852	283,449	1,914,863	—

On June 30, 1922, the total deposits in the Postal Savings-Bank was 61,459,000 guilders.

Money, Weights, and Measures.

MONEY.

The standard coin is the 10-florin piece weighing 6·720 grammes, ·900 fine, and thus containing 6·048 grammes of fine gold. The unit of the silver coinage is the gulden or florin, weighing 10 grammes, ·945 fine and containing 9·45 grammes of fine silver.

Gold is legal tender, and the silver coins issued before 1875.

The principal coins are :—

The *gulden*, *guilder* or *florin* of 100 cents = 1s. 8d. ; or 12 g. = £1.

The *rijksdaalder* = 2½ guilders.

The gold-pieces are of ten guilders and of five guilders ; silver, of 10, 25, 50, 100 and 250 cents ; bronze, ½ cent, 1 cent and 2½ cents ; nickel, 5 cents.

Treasury notes of 1 and 2½ florins are also in circulation.

WEIGHTS AND MEASURES.

The metric system of weights and measures, and, with trifling changes, the metric denominations are adopted in the Netherlands.

Diplomatic and Consular Representatives.

1. OF THE NETHERLANDS IN GREAT BRITAIN.

Envoy and Minister.—Jonkheer R. de Marees van Swinderen (October 13, 1913).

Councillor of Legation.—R. C. T. Roosmale Nepveu.

Attaché.—A. Loudon.

Naval Attaché.—Capt. K. F. Sluys.

Commercial Attaché.—F. B.'s Jacob.

Director of the Chancery.—H. N. Brouwer.

Consul-General in London.—D. J. S. Parvé ; appointed February 1, 1923.

2. OF GREAT BRITAIN IN THE NETHERLANDS.

Envoy and Minister.—Sir C. M. Marling, K.C.M.G., C.B. Appointed November 25, 1921.

First Secretary.—H. Knatchbull-Hugessen, C.M.G.

Third Secretary.—Sir Adrian Baillie, Bart.

Military Attaché.—Lieut-Col. A. C. Temperley, C.M.G., D.S.O.

Naval Attaché.—Captain G. A. Wells, R.N.

Commercial Secretary.—R. V. Laming, O.B.E.

Consul General at Rotterdam.—W. N. Dunn.

There are consular representatives at Amsterdam (C.G.), Dordrecht, Flushing, The Hague, Harlingen, and Ymuiden.

Colonies.

The colonial possessions of the Netherlands, situated in the East Indies and the West Indies, embrace an area of about 733,000 English square miles. The total population, according to the last returns (November 1920), was 49,350,834, or nearly seven times as large as that of the mother-country.

DUTCH EAST INDIES.

The Dutch possessions in Asia, forming the territory of Dutch East India (Nederlandsch Oost Indie), are situated between 6° N. and 11° S. latitude, and between 95° and 141° E. longitude.

In 1602 the Dutch created their East India Company. This Company conquered successively the Dutch East Indies, and ruled them during nearly two centuries. After the dissolution of the Company in 1798 the Dutch possessions were governed by the mother-country.

Government and Constitution.

Politically, the territory, which is under the sovereignty of the Netherlands, is divided into (1) Lands under direct government; (2) Subject native States.

With regard to administration, the Dutch possessions in the East Indies are divided into residencies, divisions, regencies, districts, and *dezzas* (villages). They are also very often divided into: (1) Java and Madura; (2) the Outposts—Sumatra, Borneo, Riau-Lingga Archipelago, Banca, Billiton, Celebes, Molucca Archipelago, the small Sunda Islands, and a part of New Guinea.

Java, the most important of the colonial possessions of the Netherlands, was formerly administered, politically and socially, on a system established by General Johannes Graaf Van den Bosch in 1832, and known as the 'culture system.' It was based in principle on the officially superintended labour of the natives, directed so as to produce not only a sufficiency of food for themselves, but a large quantity of colonial produce best suited for the European market. To-day, however, the old system no longer exists.

The whole of Java—including the neighbouring island of Madura—is divided into seventeen residencies, each governed by a Resident, assisted by several Assistant-Residents and a number of subordinate officials, called *Contrôleurs*. The Resident and his assistants exercise almost absolute control over the province in their charge; not, however, directly, but by means of a vast hierarchy of native officials. The Outposts are administered by functionaries with the titles of 'Governor,' 'Resident,' 'Assistant-Resident,' 'Contrôleur,' &c.

The superior administration and executive authority of Dutch East India rest in the hands of a Governor-General. He is assisted by a Council of five members, partly of a legislative, partly of an advisory character. The members of the Council, however, have no share in the executive. The Governor-General and the members of the Council are nominated by the Queen. In 1917 a 'Volksraad' was installed to discuss the budget, and to advise the Government on matters of general importance as a first step towards the development of self-government in the colony. Some of the members are appointed by the Government, some are elected by the local councils. It includes Europeans, natives and foreign Orientals (Chinese, Arabs).

Governor-General.—Dr. D. Fock, appointed September 28, 1920.

The Governor-General represents not only the executive power of government, but he has a right of passing laws and regulations for the administration of the colony, so far as this power is not reserved to the legislature of the mother-country. However, he is bound to adhere to the constitutional principles on which the Dutch Indies are governed, and which are laid down in the 'Regulations for the Government of Netherlands India,' passed by the King and States-General of the mother-country in 1854, and altered many times since.

Area and Population.

—	Area : English square miles	Population 31 Dec. 1905 • (Census)	Population Nov. 1920 (Census)	Population per sq. mile 1920

Approximate total . . .	733,642	38,070,782	49,350,834	67.2

¹ Tolerably accurate.

² Approximate.
⁴ A province created in 1920.

³ Mere conjecture.

According to the Census of 1920 (preliminary figures), 24,443,902 were males and 24,717,145 were females; 169,355 were Europeans, 48,112,706 natives, and 878,986 other Orientals, chiefly Chinese and Arabs.

Marriages, births, and deaths among Europeans and persons assimilated to them :—

	Marriages		Births		Deaths	
	1918	1919	1918	1919	1918	1919
Java and Madura	1,195	1,176	3,655	3,105	2,484	1,777
Outposts	164	174	1,025	1,066	551	454

The whole population of the colony is legally divided into Europeans and persons assimilated with them, and natives and persons assimilated with these. The former generally live under the same laws as the inhabitants of the mother-country, while in the government of the latter the Indian customs and institutions are considered. The Governor-General, however, is, in agreement with the Council, authorised to make individual exceptions to this rule.

Religion.

Entire liberty is granted to all religious denominations. The Reformed Church counted, in 1921, 37 ministers and 25 assistants, the Roman Catholic 32 curates and 115 priests, not salaried out of the public funds. In 1921, about 600 missionaries of various societies were at work.

The bulk of the natives are Mohamedans ; there are also some millions of converted Christians and Animists, and a small number of Buddhists.

Instruction.

There are public (Government) primary schools, where instruction is given through the medium of the Dutch language, for (1) Europeans and persons assimilated with them (a 7 years' course); (2) Chinese ('Dutch-Chinese schools', with a 7 years' course); and (3) Natives ('Dutch-Native schools', with a 7 years' course). Public schools where instruction is given through the medium of a native tongue are (1) the 'second class' schools (with a 3, 4, or 5 years' course); and (2) 'Desa schools' (with a 3 years' course of extremely elementary instruction). Besides, there are schools with an extended primary instruction (in the Dutch language) with a 3 years' course (Mulo-schools) open to all, without distinction of race. Side by side with the public schools, there are various private schools.

For secondary education there are public secondary schools with 5 and 3 year courses in connection with the primary schools, and also with 3 year courses in connection with the extended primary school. In addition to the Government institutions there are private secondary schools for girls with a 3 years' course. Higher education is given at the Technical High School at Bandoeng, erected in 1920.

The following table shows the number of schools, the school attendance, the teaching staff, and the expenditure on education in 1922:—

Schools	Number	Teaching Staff	Pupils	Cost (in guilders)
Public European primary schools	195	804	27,317	14,186,369
Private " " "	55	347	10,587	
Public Dutch-Chinese " "	35	253	8,460	
Private " " "	17	130	3,086	
Public Dutch-Vernacular " "	146	1,103	81,919	
Private " " "	60	279	8,023	

Schools	Number	Teaching Staff	Pupils	Cost (in guilders)
Public second-class for Natives	1,910	8,196	279,681	9,732,808
Private schools for Natives	2,429	3,989*	145,336	1,693,000
Désa-schools	8,760	11,250	521,263	4,276,200
Public Mulo-schools (extended primary)	19	155	3,479	1,206,034
Private " " "	7	20	417	661,000
Public secondary schools	7	186	2,468	1,893,950
Private " " "	6	82	369	222,900

Furthermore, there were in 1922 the following training schools:—Four public schools for training in engineering, architecture, and mining (4 years' course) and one trading school (3 years' course), with 139 teachers and 1,958 pupils; one private trade school (3 years' course), with 14 teachers and 117 pupils; one 2 years' and one 3 years' commercial school with 110 pupils; one 1 year's navigation course with 14 pupils; two training schools for physicians (9 years' course) with 54 teachers and 431 pupils; a training school for native jurists (6 years' course) with 8 teachers and 93 pupils; a training school for civil-service officers, a training school for police officers, 9 training schools for native officials (7 years' course) with 62 teachers and 757 pupils; 7 training schools for European teachers (3 years' course) with 144 pupils, and 13 private schools with 236 pupils.

For native teachers there are the following schools with instruction in the Dutch language: 13 (1 for girls) public training schools (5 years' course), and two higher training schools (3 years' course) with 1,060 pupils (143 girls); with instruction in the native tongue; 21 (5 for girls) normal schools (4 years' course, 1,645 pupils, 385 being girls), 200 normal classes (2 years' course) for native teachers for Désa-schools. Besides, there are 19 private training schools with the Dutch language (6 years' course, 1,194 pupils), and 16 with a native tongue (4 years' course, 776 pupils).

For Chinese teachers there is a school with instruction in the Dutch language (77 pupils).

For kindergarten teachers (Fröbel) there is a training school (4 years' course, 73 pupils).

Justice and Crime.

The administration of justice for Europeans is entrusted to European judges, while for natives their own chiefs have a large share in the trial of cases. There is a High Court of Justice at Batavia—courts of justice at Batavia, Samarang, Soerabaya, Padang, Medan and Makassar—Resident courts and police courts for Europeans; native courts, magistrate courts, police courts, Regent courts, district courts, and courts of priests for natives.

• Finance.

The local revenue is derived from land, taxes on houses and estates, from licences, customs duties, poll and income taxes, and a number of indirect taxes; from the Government monopolies of salt, pawnshops, and opium, railways, and from the sale of Government products.

Revenue and expenditure:—

Year	Revenue	Expenditure	Surplus or Deficit
	Guilders	Guilders	Guilders
1921	708,592,111	1,005,170,886	— 296,578,775
1922	751,849,066	965,841,366	— 213,992,300
1923	614,080,895	806,942,146	— 192,861,251

The sources of revenue in 1923 are stated as follows (in guilders):

Receipts in the Netherlands from sales of cinchona, 824,300; railways 350,000; share of the State in the profits of the Bilton Company, 950,000; various, 2,601,870. Receipts in India from sales of opium, 46,546,600; import, export, and excise duties, 103,275,000; land revenues, 30,077,000;

sales of salt, 20,332,750; forests, 13,013,550; railways, 90,415,000; coal, 22,207,000; income-tax, 53,500,000; from all other sources, 229,988,325.

Public debt on December 31, 1922, was 761,683,499 guilders.

Defence.

The Dutch forces in the East Indies constitute a colonial army which is entirely separate from the home army. The colonial army consists of about one-quarter Europeans to three-quarters Natives, and comprises 32 battalions and 3 dépôt battalions of infantry, 4 machine-gun companies, 2 companies of cyclist-soldiers, 4 squadrons, 1 dépôt squadron of cavalry, 6 field batteries, 6 mountain batteries, 2 howitzer batteries, 6 motor batteries, 1 fortress and coast-company of artillery, 2 field companies, 1 motor-car company, 2 technical companies and 1 dépôt company of engineering troops; and a flying corps with 26 officers and 40 aeroplanes, including 10 Vickers Viking Amphibie. In 1918 compulsory service was introduced in the militia for Europeans between 19 and 32 years of age, and in the landstorm between the ages of 33 and 45. It is calculated that this will yield 25,000 men.

In most battalions there are 4 companies composed either of Europeans or of Natives; the greater part of the officers, and a proportion of the non-commissioned officers, are Europeans. The artillery has European and Native gunners and Native drivers. The Europeans (except the militia) and Natives are recruited by volunteers. The strength of the colonial army in 1923 was 1,444 officers, 34,990 volunteers, of whom 6,326 were Europeans and 8,876 militiamen.

Besides the Army there are different armed troops, viz.: (1) The Legion of the Native Prince Mangkoe Negara, consisting of infantry, numbering 925 men. In case of war this Legion would be placed at the disposal of the Government. (2) The Barisan, being a native infantry of Madoera, 1,800 men, designed to maintain peace in the island and to participate in campaigns in case of war. (3) The police-soldiers, numbering about 9,600 men. (4) Some voluntary corps, composed of Europeans and Natives, to assist in case of war or insurrection.

The expenditure for defence (army and navy) estimated for 1923 amounts to about 120,000,000 guilders.

The Netherlands Navy in the East Indies numbers 231 officers and 1,157 European and 1,528 native non-commissioned officers and sailors, and consists of 31 men-of-war, including 8 submarines, 5 minelayers and 6 destroyers. There is, besides, a flying corps with 25 hydroplanes, and the Colonial Navy, consisting of 19 smaller ships of no naval value, with 173 Europeans and 756 natives, employed for civil service duties.

Production and Industry.

The greater part of the soil of Java is claimed as Government property, and it is principally in the residencies in the western part of Java that there are private estates, chiefly owned by Europeans and by Chinese. The bulk of the people are agricultural labourers. Formerly the Government or private landowners could enforce one day's gratuitous work out of seven, or more, from all the labourers on their estates; in 1882 the greater part of these enforced services for the Government was abolished, in return for the payment of one guilder per head yearly, and the remainder were abolished in 1914 in return for an increased poll tax.

The harvested area under various 'native' cultures (first and second) in Java and Madura were as follows, in acres:—In the year 1921: irrigated rice, 6,474,259; non-irrigated rice, 754,553; maize, 3,698,767; cassava, 1,947,237; arachis, 487,909; soya beans, 399,703; potatoes, 482,598; other pulses, 535,170; other secondary crops, 1,788,524; sugar-cane, 39,746; tobacco, 250,244; indigo, 28,960; capsicum, 93,255; native tea, 19,300.

Owing to the 'agrarian law' (1870), which has afforded opportunity to private energy for obtaining waste lands on hereditary lease (emphyteusis) for seventy-five years, private agriculture has greatly increased, as well in Java as in the Outposts. In 1920 were ceded on lease in Java by the Government to 929 companies and Europeans, 1,288,000 acres; to 145 foreign Orientals, 68,400 acres; to 9 natives, 2,500 acres—total, 1,359,000 acres. The total area in use for private agriculture in Netherlands-India was, in 1920, 7,576,000 acres, of which 3,010,000 acres were in Java (1,359,000 acres land on lease, and 1,651,000 private lands).

The following table gives a comparison of the production of sugar for 3 years:—

	1918	1919	1920
Planted area . . . acres .	402,961	340,146	369,213
Total production . . . tons .	1,778,207	1,336,112	1,577,528
Production per acre . . . do .	4.41	3.96	4.27
Factories . . . number .	186	174	183

Other products are shown (for 2 years) as follows:—

	1920	1921		1920	1921
Coffee (tons) . .	45,547	45,140	Tobacco (kilos) . .	31,465,201	32,258,352
Rubber (kilos) . .	69,056,618	—	Tea (kilos) . . .	48,110,000	32,259,134
Cinchona (kilos) . .	10,457,472	10,362,716	Cacao (kilos) . . .	849,745	675,144

The tin mines of Banca are worked by the Government; those of Biliton and Rian by private enterprise. Their total yield was, in tons: 1919, 20,724; 1920, 22,560; 1921, 27,700.

The yield of the principal coal mines in Java, Sumatra and Borneo was, in tons: 1919, 947,915; 1920, 1,055,832; 1921, 1,212,665.

The production of the principal mineral oil enterprises was, in thousands of kilogrammes: 1917, 1,605,610; 1918, 1,764,203; 1919, 2,159,862; 1920, 2,365,320; 1921, 2,361,509.

Commerce.

No difference is made between Dutch and foreign imports and vessels. There is a tariff on certain goods; on some articles there is a small export duty.

Imports and exports in guilders (12 guilders = £1):—

<i>Imports</i>							
Year	Government			Private			Grand Total
	Merchandise	Specie	Total	Merchandise	Specie	Total	
1919	101,692,487	11,708,840	113,401,327	639,029,401	40,802,497	679,831,898	793,233,225
1920	108,713,312	11,051,608	119,764,920	1,125,903,748	65,155,231	1,191,058,979	1,310,823,899
1921	113,370,644	11,872,000	125,242,644	1,095,116,792	24,620,835	1,119,737,627	1,245,480,271

1919	5,224,227	—	5,224,227	2,162,115,836	130,455	2,162,246,291	2,167,470,518
1920	3,137,437	—	3,137,437	2,260,309,944	4,424,348	2,264,734,292	2,267,871,729
1921	2,099,872	100,000	2,199,872	1,193,142,569	716,637	1,193,858,656	1,196,058,528

The principal exports in 1921 are sugar, 1,677,137 tons; coffee, 43,710,169 kilos; tea, 35,863,781 kilos; cinchona, 6,507,233 kilos; tobacco, 46,213,827 kilos; rubber, 74,410,190 kilos; copra, 311,571,598 kilos; tin, 15,546,920 kilos.

Total trade between the United Kingdom and Java (Board of Trade figures) for five years:—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Java to U.K.	5,786,020	17,425,359	28,775,277	5,489,943	6,962,257
Exports to Java from U.K.	5,841,933	7,111,561	18,383,309	11,337,782	7,772,273

Shipping and Communications.

Year		Entered		Whereof, under British Flag:	
		Number	Tons	Number	Tons
1920	Steamers	8,974	4,815,025	6,369	1,539,725
	Sailing vessels	3,193	291,131	1,293	147,146
1921	Steamers	9,603	5,359,787	6,271	1,657,824
	Sailing vessels	6,656	371,596	4,921	272,478

At the end of 1920 the total length of railways (State and private) was about 1,989 miles (1,690 in Java and 299 in Sumatra); the gross receipts (1920) about 80,039,000 guilders; working expenses, 65,972,000 guilders; number of passengers about 84,142,000.

The Government telegraphs extended in 1921 over 7,041 miles, the Government telegraph cables over 7,707 miles, together over 14,748 miles. The number of post and telegraph stations in 1921 was 688 for Java and Madura, and 404 for the other islands, while the numbers of telegrams were 1,901,081 (internal) and 724,788 (foreign intercourse). Internal letters and postcards carried in 1921, 37,358,317, while there were 24,831,607 newspapers, &c., for the interior.

The Government telephone aerial lines extended in 1921 over 29,275 miles, the Government telephone cables over 37,987 miles. At the end of 1921 there were 277 telephone exchanges and 36,221 telephones, while the number of the long distance calls in that year was 1,389,400.

Money and Credit.

The 'Java Bank,' established in 1828, has a capital of 6,000,000 guilders, and a reserve on March 31, 1922, of 4,789,753 guilders. The Government has a control over the administration. Two-fifths of the amount of the notes, assignats, and credits must be covered by specie or bullion. In March, 1922, the value of the notes in circulation was 267,470,555 guilders, and of the bank operations 172,051,653 guilders. There are some other Dutch and Chinese banks, besides branches of British, American, and Japanese banks.

In the savings-banks, including the Postal savings-bank, there were in 1920, about 206,360 depositors, with a deposited amount of 17,229,350 guilders.

Weights and Measures.

The <i>Amsterdamsch Pond</i> .	= 1.09 lb. avoirdupois.
„ <i>Pikol</i>	= 133 $\frac{1}{2}$ „ „
„ <i>Catty</i>	= 1 $\frac{1}{2}$ „ „
„ <i>Tjengkal</i>	= 4 yards
„ <i>Paal</i> (Java)	= 1,507 metres
„ <i>Paal</i> (Sumatra)	= 1,852 „
„ <i>Square Paal</i>	= 227 hectares = 591.18 acres
„ <i>Bouw</i>	= 1.7537 acres

The legal coins of 10, 5, 2 $\frac{1}{2}$, 1 and $\frac{1}{2}$ guilders, as well as the weights and measures, of Dutch India, are those of the Netherlands. But the country has coins of its own, viz., 25, 10, 5, 2 $\frac{1}{2}$, 1, and $\frac{1}{2}$ cent. pieces.

Consular Representatives.

British Consul-General at Batavia.—F. G. Gorton.

There are also consular officers at Samarang, Sourabaya, Makassar, Medan, Padang, and Koepang.

DUTCH WEST INDIES.

The Dutch possessions in the West Indies are (a) *Surinam*, or *Dutch Guiana*, and (b) the colony *Curaçao*.

Surinam or Dutch Guiana.

Dutch Guiana or Surinam is situated on the north coast of S. America between 2 and 6° N. latitude, and 53° 50' and 58° 20' E. longitude, and bounded on the north by the Atlantic Ocean, on the east by the river Marowijne, which separates it from French Guiana, on the west by the river Corantyn, which separates it from British Guiana, and on the south by inaccessible forests and savannas to the Tumuc-Humac Mountains.

At the peace of Breda, in 1667, between England and the United Netherlands, Surinam was assured to the Netherlands in exchange for the colony

of New Netherlands in North America, and this was confirmed by the treaty of Westminster of February, 1674. Since then Surinam has been twice in the power of England, 1799 till 1802, when it was restored at the peace of Amiens, and in 1804 to 1816, when it was returned according to the Convention of London of August 13, 1814, confirmed at the peace of Paris of November 20, 1815, with the other Dutch colonies, except Berbice, Demerara, Essequibo, and the Cape of Good Hope.

The administration and executive authority is in the hands of a governor assisted by a council consisting of the governor as president, a vice-president and three members, all nominated by the Queen. The Colonial States form the representative body of the colony. The members (13) are chosen for 6 years.

Governor.—Baron van Heemstra. Appointed December, 1920.

Dutch Guiana is divided into twelve districts.

Area, 46,060 English square miles; population (January 1, 1921) 113,181 exclusive of the negroes and Indians living in the forests. Capital, Paramaribo, 50,560 inhabitants (January 1, 1920).

Births and deaths for 3 years :—

	Births			Deaths		
	1919	1920	1921	1919	1920	1921
Males	1,302	1,607	1,698	1,705	1,142	1,359
Females	1,291	1,617	1,868	1,183	938	1,218
Total	2,593	3,224	3,566	2,888	2,080	2,577

There is entire religious liberty. At the end of 1920 the numbers of the different religious bodies were: Reformed and Lutheran, 11,000; Moravian Brethren, 29,233; Roman Catholic, 22,140; Jews, 1,182; Mohammedans, 15,431; Hindus, 21,500, &c.

There were, in 1921, 35 public schools with 4,867 pupils, and 45 private schools with 7,802 pupils. There is a Government normal school with 96 pupils (1921).

There is a court of justice, whose members are nominated by the Sovereign. There are three cantonal courts and two circuit courts.

The relations of the Government to pauperism are limited not only to subventions to orphan-houses and other religious or philanthropical institutions, but the Government itself maintains an almshouse.

The local revenue, derived from import, export, and excise duties, taxes on houses and estates, personal imposts, and some indirect taxes, is shown as follows for 4 years in thousands of guilders :—

—	Expenditure	Local Revenue	Subvention	—	Expenditure	Local Revenue	Subvention
1919	5,172	3,907	1,265	1921	8,297	6,440	1,854
1920	10,501	8,720	1,780	1922	8,300	6,678	1,682

The Dutch forces in Surinam consist of a civic guard and infantry, the latter containing, in 1921, 9 officers and 268 non-commissioned officers and men.

In 1921 sugar was produced to the amount of 11,105,900 kilogrammes; cacao, 1,579,942 kilogrammes; bananas, 297,605 bunches; coffee, 1,812,394

kilogrammes ; rice, 11,797,386 kilogrammes ; maize, 1,826,925 kilogrammes ; rum, 690,856 litres ; and molasses, 84,153 litres.

Gold production in 1921 was 291,347 grammes, and of balata 464,437 kilos.

In 1921 there entered 191 vessels of 372,431 tons, and cleared 190 vessels of 367,999 tons.

Imports and exports for 6 years :—

Year	Imports	Exports	Year	Imports	Exports
	Guilders	Guilders		Guilders	Guilders
1916	5,911,326	8,054,002	1919	8,946,144	8,987,870
1917	7,645,941	8,852,170	1920	13,718,026	7,477,512
1918	6,157,727	7,080,019	1921	13,150,205	6,562,014

Principal exports in 1921 : Sugar, 9,565,417 kilos ; rum, 188,676 kilos ; cocoa, 1,636,465 kilos.

The communication between several districts of the colony is carried on by vessels and small steamers. A Colonial steamship service extends to British Guiana.

Vice-Consul at Paramaribo.—Rev. W. L. Kissack.

Curaçao.

The colony of *Curaçao* consists of two groups of islands about 500 miles apart. One group is made up of the first three islands in the following list ; the other of the last three :—

	Square Miles	Population Dec. 31, 1921
Curaçao	210	33,232
Bonaire	95	8,888
Aruba	69	7,177
St. Martin ¹	17	2,708
St. Eustache	7	1,276
Saba	5	1,682
	403	54,963

¹ Only the southern part belongs to the Netherlands, the northern to France.

There is a Governor, assisted by a Council composed of a vice-president and three members, nominated by the Sovereign. There is also a Colonial Council consisting of thirteen members nominated by the Sovereign. The city of Willemstad (population 14,828), on Curaçao, is the seat of government. The different islands, except Curaçao, are under officials called 'Gezaghebbers,' nominated by the Governor. In 1921 there were 48,633 Roman Catholics, 5,736 Protestants, 546 Jews. Schools in 1921 numbered 40 with 7,083 pupils. In 1921, 1,317 births were registered, 297 marriages and 1,113 deaths.

The revenue is derived from import, export, and excise duties, taxes on income, on land, and some indirect taxes. In the Budget for 1923* the revenue is estimated at 1,408,650 guilders, and the expenditure at 2,452,134 guilders ; the difference is supplied by the mother-country.

The militia (Schutterij) of the Isle of Curaçao consisted at the end of 1921 of 23 officers and 325 men ; the garrison of 7 officers and 176 men.

The imports of Curaçao and the other islands in 1921 were valued at

19,024,235 guilders; the exports of Curaçao and the other islands at 13,296,090 guilders. The chief products are maize, beans, pulse, cattle, salt, and phosphate of lime. The chief industry is oil-refining.

There entered the ports of the different islands in 1921, 3,611 vessels of 2,710,786 tons net.

Consul at Curaçao.—Jacob Thielen.

NICARAGUA.

(REPÚBLICA DE NICARAGUA.)

Constitution and Government.

THE Constitution of the Republic of Nicaragua is that which came into operation on April 5th, 1913. This is the same as was promulgated on March 12, 1912, with the exception of Articles 168 and 170. Previous constitution was that of March 30, 1905. It vests the legislative power in a Congress of two houses consisting of 40 deputies, elected for 4 years by universal suffrage, and 13 Senators elected for 6 years. The Executive power is with a President appointed for 4 years.

President.—Dr. Diego Manuel Chamorro. (Inaugurated January 1, 1921. Term of office expires December 31, 1924.)

The President exercises his functions through a council of responsible ministers, composed of the heads of the departments of Foreign Affairs and

Public Instruction; Finance; Interior, Justice, and Police; War, and Marine; Public Works.

The Republic is divided into 13 departments and 2 comarcas, each of which is under a political head, who has supervision of finance, instruction and other matters, and is also military commandant. The Mosquito Reserve now forms a department named Bluefields. The Indians in this region were long under the protection of Great Britain; but under the treaty of April 19, 1905 (ratified August 24, 1906), the treaty of 1860 was abrogated, and Great Britain agreed to recognise the absolute sovereignty of Nicaragua over the territory.

The judicial power is vested in a supreme Court of Justice, three chambers of second instance, and judges of inferior tribunals.

On February 18, 1916, a treaty between Nicaragua and the United States was ratified, under which the United States in return for 3 million dollars acquires the canal route through Nicaragua and also a naval base in the Bay of Fonseca on the Pacific coast and Corn Island on the Atlantic coast. Ratified by Nicaragua on April 7, 1916.

Area and Population.

Area estimated at 51,660 English square miles, and it has a coastline of about 300 miles on the Atlantic and of about 200 miles on the Pacific. The population according to the census of 1920, was 638,119. At least 75 per cent. of the inhabitants live in the western half of the country. The two halves of the Republic differ greatly in many respects and there is little communication between them, the journey by trail and river being so slow and difficult that passengers usually go by way of Costa Rica, while the small amounts of merchandise shipped from one side to the other are sent mainly by way of Panama.

The people of the western half of the Republic are principally of mixed Spanish and Indian extraction, though there are a considerable number of pure Spanish descent and many Indians. The population of the eastern half is composed mainly of Mosquito and Zambo Indians and negroes from Jamaica and other islands of the Caribbean, with some Americans and a comparatively small number of Nicaraguans from the western part of the Republic.

There are within the Republic 105 municipalities of which 28 have from 2,000 to 30,000 inhabitants. The capital of the Republic and seat of government is the town of Managua, situated on the southern border of the lake of the same name, with (1920) 27,839 inhabitants. Leon, formerly the capital, has a population of 38,318; Granada, 16,773; Matagalpa, 10,271; Masaya, 10,287; Jinotega, 6,990; Chinandega, 8,415; Esteli, 4,583; Matapa, 4,561; Somoto, 6,182; Boaco, 4,342; Jinotepe, 6,317; Diriamba, 6,151; Bluefields, 4,706. Other towns are Corinto, and San Juan del Sur on the Pacific.

Religion and Instruction.

The prevailing form of religion is Roman Catholic. In 1914 the Republic constituted one archbishopric and ecclesiastical province (Nicaragua). The Seat of the Archbishop is Managua. There are three bishoprics, Leon, Granada and Matagalpa, the Bishop of Matagalpa being coadjutor to the Archbishop at Managua.

There are about 356 elementary schools and ten secondary schools. It is estimated that at least 50 per cent of the population is illiterate.

Secondary education is neither obligatory nor free, the secondary schools being carried on not by the state, but by private individuals. Nicaragua has three universities, in the cities of Managua, León, and Granada, called respectively, Universidad Central (Central University), Universidad de Occidente y Septentrión (Western and Northern University), and Universidad de Oriente y Mediodía (Eastern and Southern University). There are also a number of state normal schools.

A national Industrial, Commercial, and scientific Museum has been established at Managua.

Finance.

Revenue and expenditure for 5 years :—

—	1916-17	1917-18	1918-19	1919-20	1921-22
	£	£	£	£	£
Revenue . . .	460,479	480,321	598,547	850,478	576,088
Expenditure . .	396,159	351,553	424,167	427,203	572,888

A five (formerly six) per cent. loan for 1,250,000*l.* was issued in 1909 for the construction of railways, &c., and for conversion purposes. Of this 298,240*l.* has been redeemed. Total External Debt, February 1922, 1,214,830*l.* ; total Internal Debt, February 1922, 711,649*l.*

Defence.

The active army consists of 2,000 men ; in war it may rise to 7,000. Military service is obligatory between 17 and 55 years of age. The period of active service is a year. The marine consists of one very small boat, on the Pacific coast, capable perhaps of carrying a machine gun and 25 men.

Production and Industry.

The agricultural, timber and mining industries are the principal source of national wealth. The area of cultivation in Nicaragua has extended in recent years and would probably extend still further but for the scarcity of labour. The banana is the principal agricultural product of the eastern part of the Republic. Cocoanuts are also of some importance, and a few plantains, oranges, and pineapples, and some yucca are raised. Rice is grown to a small extent, and some wheat in the hilly Nueva Segovia district, while tobacco is cultivated round Masaya. The products of the western half are much more varied, the most important being coffee, sugar cane, cacao, corn, and beans. The annual average coffee crop is estimated at 22,500,000 lbs. With the exception of bananas, plantains, and yucca or cassava, the greater part of the food supply of the eastern section is imported from the United States. The western half of the country produces much of its own food, and occasionally exports small quantities of beans, corn, cheese, lard, and sugar to the neighbouring Republics.

The forests contain mahogany and cedar, which are largely exported, many valuable timber trees, dye-woods, gums, and medicinal plants. They are worked both from the Atlantic and Pacific.

There are 1,200,000 cattle in Nicaragua.

There are several gold mines, worked by American and British companies, one having also silver. The gold export amounted in 1921 to 204,718*l.* The mines towards the east coast in Mico, Tunkey, Cuicuina and Pizpiz districts are showing increased activity. Copper and precious stones are also found.

Commerce.

The foreign trade of Nicaragua was as follows in 5 years :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports . .	1,278,613	1,185,961	1,582,530	2,772,877	1,094,412
Exports . .	1,195,051	1,550,988	2,481,894	2,157,669	1,664,113

The customs receipts in 1919 were 302,736*L.* ; in 1920, 454,470*L.* ; and in 1921, 225,365*L.*

In 1921 the value of the principal imports (in dollars) was:—Cotton goods, 1,118,188 ; chemicals, 268,819 ; iron and steel, 307,325 ; wheat flour, 313,436. The principal countries of import were (values in dollars):—United States, 3,857,202 (73 per cent.) ; United Kingdom, 654,426 (12 per cent.) ; France, 199,816 (4 per cent.) ; and Germany, 101,047 (2 per cent.).

In 1921 the value of the principal exports (in dollars) was:—coffee, 2,352,487 ; bananas, 1,405,143 ; timber, 900,679 ; gold 989,973 ; and sugar, 1,308,653. The principal countries of export were (values in dollars):—United States, 6,264,531 (77 per cent.) ; France, 857,640 (10 per cent.) ; United Kingdom, 109,474 (1 per cent.) ; Costa Rica, 141,191 (2 per cent.) ; Honduras, 119,142 (1 per cent.) ; and Mexico, 127,800 (2 per cent.).

A treaty of commerce between Great Britain and Nicaragua, signed at Managua in July, 1905, and ratified at London on August 14, 1906, provides mutually for the most favoured nation treatment, except that Nicaragua may accord certain advantages to other Central American States.

Total trade between Nicaragua and United Kingdom (Board of Trade Returns) for 5 years :—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Nicaragua to U.K. .	4,091	119,944	91,401	97,707	84,830
Exports to Nicaragua from U.K. .	139,685	167,720	438,517	150,549	114,785

Shipping and Communications.

Western Nicaragua has two seaports, Corinto and San Juan del Sur, through which pass approximately 64 per cent. of the imports and 86 per cent. of the exports of the Republic. The eastern ports are Bluefields, Cape Gracias a Dios, Las Perlas (Pearl Lagoon), and San Juan del Norte (Greytown). In 1921, 1,064 ships of 479,208 tons entered the five ports of Nicaragua, and 1,069 of 480,729 tons cleared.

There are very few good roads in the country, but contracts have been made for roads and transport from Managua to Matagalpa, 79 miles, and for 3 roads leading respectively from Matagalpa, from New Segovia, and from the Pipiz mines in the Cape Gracias district to the head of steamboat navigation on the Coco or Wanks river, about 160 miles from its mouth. A good cart road has recently been completed between Matagalpa and Jinotega, about 24 miles. There is also a road between Puerto Diaz and Juigalpa, of which 7 miles have been constructed ; a highway from the capital to Sierras de Managua, 3 miles constructed ; there will be two branches from this road, one leading to la Cuchilla and the towns to the south by way of

Camino del Ventarron, and the other to Cuchilla and the Pacific coast by way of Camino de Chiquilistagua. There will also be a highway from Tipitapa to Matagalpa, of which the last 2 miles are the most difficult of all the stretch of road in the Tamarindo region.

The Pacific Railroad of Nicaragua is the only line in the republic, having a total length of 146 miles. The line runs from Corinto to Leon, Managua, Granada, and Diriamba. There are 20 miles of private railway on the Atlantic coast near the Rio Grande, and, on the west side of Lake Nicaragua, 3 private steam tramways aggregating 3 miles in length. The Government contemplate constructing a railway from San Miguelito, on the Lake of Nicaragua, to Monkey Point, on the Atlantic Coast, and negotiations are now proceeding with New York bankers with a view to obtaining a loan for this purpose. The projected route has already been surveyed. This railway is badly needed in view of the isolation of the Atlantic littoral.

The national railways have been sold to an American company for two million dollars, 51 per cent. of stock being owned by Brown Bros. and J. W. Seligman and Co. of New York, and 49 per cent. by the Government, but held on escrow by American bankers for a loan of 1,060,000 dollars due.

There are 3,637 miles of telegraph wire, and 130 offices; also 805 miles of telephone wire and 29 telephone stations. Between December 1, 1915 and October 31, 1916, 351,786 telegrams were sent, and 3,921 cablegrams. Receipts 3,0517.

The Government has contracted for the installation of wireless telegraph stations at Managua, Granada, San Juan del Norte, Bluefields and Cabo Gracias a Dios.

Two wireless stations already exist at Managua. One belongs to the camp of the American marines stationed here and the other to the Government.

Money, Weights, and Measures.

The National Bank of Nicaragua, with a capital of over 100,000 dollars, was established in Managua in 1912. Other banks are the Commercial Bank of Spanish America and the Anglo Central American Commercial Bank, Ltd.

In 1912 a new monetary unit was introduced, the gold *cordoba*, equivalent to the American dollar, containing 1.672 gr. of gold nine-tenths fine, and divided into 100 equal parts. Other gold coins provided for by the monetary law of 1912 are 10, 5 and 2½ cordobas, but no gold coins have ever been struck. As the National Bank suspended the sale of gold drafts on the United States in October, 1914, the monetary reform has fallen to pieces as there is presumably no gold reserve at all behind the circulation of 2 million paper cordobas. No statements are published either by the Bank or by the Government, and very little silver is in circulation. The country again has an unconvertible paper currency, and exchange keeps at 2 per cent. on account of general shortage of currency. On December 31, 1921, the cordobas in circulation amounted to only 1,860,000.

The silver coins are the silver cordoba, containing 25 grammes of silver nine-tenths fine; the half and quarter cordoba; 10 cents, a coin containing 2½ grammes of silver eight-tenths fine; 5 cents, a coin three-quarters of copper and one of nickel; 1 cent, ninety-five parts of copper and 5 of zinc; ½ cent, in same proportion. 300,000 dollars' worth of cordobas in silver were coined at Birmingham in 1912.

Since January 7, 1893, the metric system of weights and measures has been in use.

Diplomatic and Consular Representatives.

1. OF NICARAGUA IN GREAT BRITAIN.

Chargé d'Affaires.—Eduardo Perez-Triana.

There are Consular Representatives at Manchester, Birmingham, and Nottingham.

2. OF GREAT BRITAIN IN NICARAGUA.

Minister and Consul-General.—Hugh William Gaisford (resident at Guatemala).

Consul and Chargé d'Affaires in Nicaragua.—T. Ifor Rees.

There are Vice-Consuls at Managua, Matagalpa and Corinto.

NORWAY.

(NORGE.)

Reigning King.

Haakon VII., born August 3, 1872; the second son, Carl, of Frederik, King of Denmark, elected King of Norway by the Storting, November 18, 1905; accepted the crown through his grandfather, the late King Christian of Denmark, November 18, 1905; landed in Norway November 25, 1905; married, July 22, 1896, to Princess *Maud*, born November 26, 1869, the third daughter of the late Edward VII., King of Great Britain and Ireland.

Son.—Prince *Olav*, Crown Prince, born July 2, 1903.

According to the Constitution, Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

By Treaty of January 14, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederick of Denmark as their King. The foreign Powers refused to recognise this election, and on August 14 a convention was made proclaiming the independence of Norway in union with Sweden. This was followed on November 4 by the election of Karl XIII. as King of Norway. Norway declared this union dissolved, June 7, 1905, and after some months' negotiation, a mutual agreement for the repeal of the union was signed, October 26, 1905. The throne of Norway was offered to a prince of the reigning house of Sweden, but declined, and, after a *plébiscite*, Prince Carl of Denmark was formally elected King. In October, 1907, a treaty guaranteeing the integrity of Norwegian territory was signed at Kristiania by the representatives of Norway, Great Britain, France, Germany, and Russia, and on January 8, 1908, received the unanimous approval of the Storting.

The following is a list of the Sovereigns of Norway since the year 1204, with the date of their accession.

Inge Baardssøn	1204	Erik af Pommern	1389
Haakon Haakonssøn	1217	Kristofer af Bayern	1442
Magnus Lagabøtter	1263	Karl Knutssøn	1449
Erik Magnusson	1280	Same Sovereigns as in Denmark	
Haakon V. Magnusson	1299		1450-1814
Magnus Erikssøn	1519	Kristian Fredrik	1814
Haakon VI. Magnusson	1355	Same Sovereigns as in Sweden	
Olav Haakonssøn	1381		1814-1905
Margræta	1388	Haakon VII.	1906

The King has a civil list of 700,000 kroner, or 38,546*l*.

Constitution and Government.

The Constitution of Norway, called the *Grundlov*, bears date May 17, 1814, with several modifications passed at various times. It vests the legislative power of the realm in the Storting, the representative of the sovereign people. The royal veto may be exercised twice; but if the same bill pass three Stortings formed by separate and subsequent elections, it becomes the law of the land without the assent of the sovereign. The King has the command of the land and sea forces, and makes all appointments, but except in a few cases, is not allowed to nominate any but Norwegians to public offices under the crown.

The Storting assembles every year. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first weekday after January 10 each year, and the Storting can sit as long as it may find it necessary. Every Norwegian citizen of twenty-three years of age (provided that he resides and has resided for five years in the country) is entitled to elect, unless he is disqualified from a special cause. Women are, since 1913, entitled to vote under the same conditions as men, and since 1915 are eligible as members of the Cabinet. The mode of election is direct, and the method of election is proportional. Every third year the people choose their representatives, the total number being 150. The country is divided into districts, each electing from three to eight representatives. Representatives must not be less than thirty years of age, must have resided in Norway for ten years, and be voters in the district from which they are chosen. Former members of the Cabinet can be elected representatives of any district of the Kingdom without regard to their residence. At the election in 1921 the number of electors was 1,352,676

or 51·05 per cent. of total population, while 917,736 votes, or 67·85 per cent. of the whole number, were recorded.

Storting (1922-24) : Conservatives and Moderate Liberals 57, Liberals 37, Communists 29, Agricultural Party 17, Socialists 8, Democrats 2.

The Storting, when assembled, divides itself into two sections, the 'Lagting' and the 'Odelsting.' The former is composed of one-fourth of the members of the Storting, and the other of the remaining three-fourths. The Ting nominates its own presidents. Questions relating to laws must be considered by each section separately. The inspection of public accounts and the revision of the Government, and impeachment before the Rigsret, belong exclusively to the Odelsting. All other matters are settled by both sections in common sitting. The Storting elects five delegates, whose duty it is to revise the public accounts. All new laws must first be laid before the Odelsting, from which they pass into the Lagting to be either accepted or rejected. If the Odelsting and Lagting do not agree, the two sections assemble in common sitting to deliberate, and the final decision is given by a majority of two-thirds of the voters. The same majority is required or alterations of the Constitution. The Lagting and the ordinary members of the supreme court of justice (*Høiesteret*) form a High Court of the Realm the *Rigsret* for the impeachment and trial of Ministers, members of the *Høiesteret*, and members of the Storting. Every member of the Storting has a salary of three thousand kroner per annum, besides travelling expenses, and, in recent years, an additional grant to cover the higher cost of living.

The executive is represented by the Kigg, who exercises his authority through a Cabinet called a Council of State (*Statsraad*), composed of a Prime Minister or Minister of State (*Statsminister*), and at least seven ministers (*Statsraader*). The ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote. The following are the members of the Cabinet, originally appointed March 5, 1923.

Premier and Minister of Justice.—Otto Høivorsen.

Ministry for Foreign Affairs.—C. F. Michelet.

Ministry for Finance.—M. Berg.

Ministry for Social Affairs.—O. I. Klingenberg.

Ministry for Agriculture.—M. Venger.

Ministry for Commerce, Navigation, Industry and Fishery.—J. H. Rye Holmboe.

Ministry for Defence.—C. W. Wefring.

Ministry for Worship and Instruction.—M. Sælen.

Ministry of Public Works.—C. Middelthon.

II. LOCAL GOVERNMENT.

The administrative division of the country is into twenty districts, each governed by a chief executive functionary (*Fylkesmann*), viz., the town of Kristiania and Bergen, and 18 *Fylker* (counties). There are 43 towns, 22 'Ladesteder,' and 641 rural communes (*Herreder*), mostly parishes or sub-parishes (wards). The government of the Herred is vested in a body of representatives (from 12 to 48), and a council (*Formannskap*), elected by and from among the representatives, who are four times the number of the 'Formannskap.' The representatives elect conjointly every third year from among the 'Formannskap' a chairman and a deputy chairman. All the chairmen

of the rural communes of a Fylke form with the Fylkesmann the Fylkesting (county diet), which meets yearly to settle the budget of the Fylke. The towns and the ports form 63 communes, also governed by a council (5 to 21), and representatives (four times the size of the council). The members of the local governing bodies are elected under the same conditions as those of the Storting. Since 1910 women are entitled to vote and to be elected, under the same conditions as men.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Fylker	Area : English square miles	Census Population Dec. 1, 1920	Population Dec. 1, 1910	Pop. per square mile 1920
Kristiania (town)	6.3	258,483	241,834	41,029.04
Akershus	2,058.9	179,962	128,042	87.41
Østfold	1,614.1	160,128	152,306	99.20
Hedmark	10,635.7	149,619	134,555	14.07
Opland	9,751.9	129,149	119,236	13.24
Buskerud	5,717.7	137,249	123,643	24.00
Vestfold	901.8	124,060	109,076	137.57
Telemark	5,863.8	125,245	108,084	21.36
Aust-Agder	3,608.2	74,700	76,456	20.70
Vest-Agder	2,804.7	82,807	82,067	29.52
Rogaland	3,526.9	166,423	141,040	47.19
Hordaland	5,991.5	156,218	146,006	26.07
Bergen (town)	13.5	91,443	76,867	6,773.56
Sogn og Fjordane	7,132.3	90,111	90,040	12.63
Møre	5,811.5	159,391	144,622	27.43
Sør-Trøndelag	7,211.6	166,797	148,306	23.13
Nord-Trøndelag	8,652.9	89,221	84,948	10.31
Nordland	14,700.3	173,826	164,687	11.82
Troms	10,420.8	90,750	61,902	8.71
Finmark	18,590.9	44,190	38,065	2.38
Total	124,964.3	2,649,775	2,391,782	21.20

In 1920, 1,864,371 were domiciled in rural districts, and 785,404 in towns.

In 1920 there were 1,290,469 males, and 1,359,306 females.

Conjugal condition of the present population, 1920 :—

—	Unmarried	Married	Widowed	Divorced	Not stated
Males	809,563	427,616	49,434	3,542	314
Females	820,152	428,141	105,655	5,157	201

Of the population in 1920 2,575,013 were born in Norway, 47,216 in Sweden, 1,992 in Finland, 4,937 in Germany. In 1920 the number of Laps was 19,328, of Fins, 7,309, of Lap-Fins, 2,814.

II. MOVEMENT OF THE POPULATION.

1. *Births, Deaths, and Marriages.*

Year	Marriages	Births '(exc. still- born)	Stillborn	Illegiti- mate, living	Deaths (exc. still- born)	Excess of Births
1916	17,312	66,055	1,350	4,689	34,362	31,693
1917	18,086	64,746	1,460	4,637	34,106	30,640
1918	20,019	63,508	1,516	4,180	43,408	20,100
1919	15,492	58,366	1,383	3,823	35,676	22,690

III. PRINCIPAL TOWNS.

At the census taken, December 1, 1920, the number of towns with a population of above 100,000 was one, above 20,000 five, above 10,000 eighteen, above 5,000 twenty-six in all. The population of the principal towns was:—

Kristiania	258,483	Ålesund	16,412	Larvik	11,362
Bergen	91,443	Kristiansand	16,305	Fredrikshald	11,149
Trondhjem	55,030	Skien	16,525	Sarpsborg	10,947
Stavanger	43,778	Fredrikstad	15,563	Horten	10,388
Drammen	26,204	Kristiansund	15,198	Arendal	10,269
Haugesund	16,565	Tonsberg	12,568		

• Religion and Instruction.

The evangelical Lutheran religion is the national Church and the only one endowed by the State. Its clergy are nominated by the King. All religions (except Jesuits) are tolerated. Ecclesiastically Norway is divided into 6 *Bispedømmer* (bishoprics), 90 *Prostier* (provostships, or archdeaconries), 514 *Prestegjeld* (clerical districts). In 1920 there were 71,062 dissenters, including 2,612 Roman Catholics, 11,455 Methodists, 7,214 Baptists, 464 Mormons, 73 Quakers. The Roman Catholics are under a Vicar Apostolic resident at Kristiania.

Education is compulsory, the school age being from six and a half in towns and seven in the country to fourteen. In 1917-18 (the latest date for which there are statistics) there were in the country 5,999 public elementary schools with 282,117 pupils, and in towns 3,379 classes with 96,784 pupils; the amount expended on both being 30,313,225 kroner, of which 12,242,046 kroner was granted by the State, the rest being provided locally. There are 413 secondary schools: 15 public, 88 communal, with 20,714 pupils in 1920-21, 10 schools are private. Most of the secondary schools are mixed. There were in 1921-22, 6 public normal schools and 6 private, with 2,104 students. Norway has one University, viz. at Kristiania (founded 1811), attended in 1921 by 1,383 students. There is one training college with 60

students, a technical high school at Trondhjem, attended in 1920-21 by 672 students, and one agricultural high school in Aas, with 170 students in the same year. There are also some special schools, particularly continuation schools for young people between 15 and 18.

There are 12 schools for abnormal children, deaf, blind, and feeble-minded, also 10 reformatory schools for neglected children. The number of children in reformatories in 1918 was 482 boys and 332 girls. There are, besides, 4 communal compulsory schools, established mainly for children neglecting the ordinary school.

Norwegian is an independent language side by side with Danish and Swedish. As to the written language, there exist two idioms ('riksmaal' and 'landsmaal') and both may be officially used.

Justice and Crime.

For civil justice Norway is divided into 110 districts, each with an inferior court. There are 3 superior courts, having each one chief justice and two other justices, and one supreme court for the whole kingdom (*Höiesteret*), consisting of 1 president and at least 6 other justices. There is a court of mediation (*Forlikskommission*) in each town and *Herred* (district), consisting of two men chosen by the electors, before which, as a rule, civil cases must first be brought.

According to the law of criminal procedure of July 1, 1887, all criminal cases (not military, or coming under the *Rigsret*—the court for impeachments) shall be tried either by jury (*Lagmandsret*), or *Meddomsret*. The *Lagmandsret* consists of three judges and 10 jurors. The Kingdom is divided into 4 jury districts (*Lagdømmer*), each having its chief judge. Each district is divided into circuits, in which courts are held at fixed times. The *Meddomsret* consists of the judge and is held in the district of the inferior court, and 2 assistant judges (not professional) summoned for each case. The *Lagmandsret* takes cognisance of the higher classes of offences, and is also a court of appeal. The *Meddomsret* is for the trial of other offences, and is also a court of first instance.

There are four convict prisons; inmates, June 30, 1922, 363 males and 10 females. There are 138 local prisons, in which were detained, June 30, 1922, 447 males and 37 females.

• Pauperism.

The relief of the poor is mostly provided for by local taxation by the State. The number of persons receiving relief amounted to 62,606 in 1919.

¹ Nominal value.² Interest on unfunded debt not included.³ Including unfunded debt 420,188,000 kroner (temporary advances to the Government Food Commission).⁴ Including unfunded debt 396,643,000 kroner (temporary advances to the Government Food Commission).⁵ Net including interest on unfunded debt contracted for the use of the Government Food Commission.⁶ Including unfunded debt 346,331,000 kroner (chiefly applied to temporary advances to the Government Food Commission). Amount of funded debt, including two loans of 150,000,000 kroner together, which do not concern the budget, payment of interest and amortisation of the loans being charged to municipalities and private banks.

The most important fortresses of Norway are Oscarsborg, Tönsberg, Kristiansand, Bergen, and Agdenes; the old fortresses, Karljohansvaern, Akershus in Kristiania, Bergenhus in Bergen, Munkholmen near Trondhjem, and Vardöyhus, are of no importance.

The army of Norway is a *national militia*. Service is universal and compulsory, liability commencing at the age of 18, and continuing till the age of 55. The men are called out at 21, and for the first 12 years belong to the line; then for 12 years to the *landvärn*. Afterwards they pass to the *landstorm*, in which they remain until they have attained 55 years of age. The initial training is carried out in recruits' schools; it lasts for 48 days in the infantry and garrison artillery, 62 in the mountain batteries, 72 in the engineers, 92 in the field artillery, and 102 in the cavalry. As soon as their courses are finished the men are passed to the units to which they will permanently belong, and with them go through a further training of 24 days. Subsequent training consists of 24 days in the second, third and seventh years of service.

The line is now organised in 6 divisions of all arms, besides which there is the garrison artillery. There are 55 battalions of infantry, 5 companies of cyclists (skiers), 3 regiments of cavalry (19 squadrons), 27 four-gun field batteries, 3 batteries of mountain artillery, 9 batteries of heavy artillery, and 1 regiment and 2 battalions of engineers. The Flying Corps is organised in 3 divisions. The divisions are of unequal strength, according to the importance of the district in which they are recruited. In event of war, each division would mobilize 2 or 3 regiments of infantry (of 3 battalions), 3 or 4 squadrons of cavalry, a battalion of field artillery (of 3 batteries), a battalion of heavy artillery, a sapper company, a telegraph company, a medical company, a company of train and a company of automobiles. Each regimental district also forms one battalion of landvärn (of 6 companies), and the other arms would form landvärn units in the same proportion. The total peace strength in 1922 was 60,000 men. The additional numbers available on mobilisation amount to about 300,000 men.

The Norwegian infantry is armed with the Krag-Jørgensen rifle of 6.5 mm. The field artillery has Erhardt Q.F. guns of 7.5 cm.

The budget of the army for 1922-23 is 44,471,600 kroner.

The navy is administered under the Minister of Defence by a Commander-in-Chief. The principal vessels are:—

Laid down	Name	Displacement	Armour		Principal Armament	H. P.	Max. Speed
			Belt	Big Guns			
1896	(Harald Haarfagre . . .) (Tordenskiold . . .)	3,900	7	8	2 8in.; 6 4.7in. . . .	4,500	17
1899	(Norge) (Eidsvold)	4,200	6	8	2 8in.; 6 6in.	5,200	17

None of the above possess any other than local value. The whole navy is designed for coast-defence duties.

There are also 1 gunboat, 3 destroyers, 27 torpedo boats, 4 submarines and several minelayers. The naval flying service has about 30 various 'planes.

The navy numbers about 190 officers on active service and about 160 in the reserve, and about 1,000 petty officers and seamen on permanent engagement. All seafaring men between the ages of twenty and forty-four are enrolled on the lists of the active fleet, and are liable to the maritime conscription. The conscripts (about 750) have to go through a training of at least 6 months.

Production and Industry.

I. AGRICULTURE.

As Norway is a barren and mountainous country, there is little opportunity for agriculture. The arable soil is found in comparatively narrow strips, gathered in deep and narrow valleys and around fjords and lakes. Large continuous tracts fit for cultivation do not exist. Of the total area, 74·7 per cent. is unproductive, 21·9 per cent. forest, and 3·4 per cent. under cultivation. On January 1, 1921, there were 207,440 real estates separately registered, and the number of farms was 248,025. The 248,025 farms were classified as follows according to their cultivated area:—

Without cultivated area (not including gardens).	5,851
Up to 2 hectares „	162,877
2·01-10 „ „	63,934
10·01-50 „ „	15,095
Above 50 „ „	268

248,025

The acreage and products of the principal crops for 3 years were as follows

Crops	Acreage			Produce (quarters)		
	1919	1920	1921	1919	1920	1921
Wheat	40,941	40,451	24,239	119,811	121,386	118,045

¹ Bushels.

² Tons.

On December 31, 1920, the country possessed live-stock as follows:—Horses, 223,900; cattle, 1,093,600; sheep, 958,100; goats, 178,900; swine, 131,800.

The value of cereals imported (including flour) was 265,156,600 kroner in 1920, and 165,635,900 kroner in 1921; the principal articles being rye, wheat, maize, barley, wheat and rye-flour. The imports of animal products amounted in 1920 and 1921 to 120,558,200 kroner and 103,277,500 kroner

respectively, and their exports in the same years to 421,495,200 kroner and 150,171,800 kroner respectively.

II. FORESTRY.

The forests and the fisheries are the two chief natural sources of wealth. The total area covered with forests is estimated at 27,434 square miles, of which 75 per cent. is under pine trees. The State forests occupy about 3,678 square miles. The value of unwrought or partly wrought timber exported from Norway in 1920 and 1921 was respectively 109,846,200 and 33,836,800 kroner, and of wrought timber (mostly wood pulp) 226,669,000 kroner in 1920 and 107,097,200 in 1921.

III. MINES AND MINERALS.

The pyrite is the most important mineral product for both its sulphur and copper content. Iron-ore deposits occur in many places, but there is a shortage of coal for smelting. The total value of mineral products in 1920 was 20,290,000 kroner (11,220,000 in 1910); of furnace products, 7,895,000 kroner (2,470,000 in 1910). The chief mineral products are silver, 1,819,000 kroner in 1920; copper ore, 310,000 kroner; pyrites, 15,376,000 kroner; iron ore, 2,110,000 kroner; nickel ore, 299,000 kroner. Of the smelting products in 1920, silver was valued at 1,772,000 kroner; copper, 1,175,000 kroner; electrolyte pig iron, 1,005,000 kroner. At the end of 1920 there existed about 55 mining establishments employing 4,427 workpeople, and 11 smelting furnaces with 614 workpeople.

IV. FISHERIES.

Fish and fish-products comprise about a third of Norway's total annual export values. The number of persons in 1919 engaged in cod fishery was 58,318; in summer-herring fishery, 21,840; and in mackerel fishery, 5,249.

The value of the fisheries in 1919 was: Cod, 52,581,385; herring, 78,731,889; mackerel, 5,979,643; salmon and sea trout, 2,295,405; other fisheries, 18,586,318; lobsters, 862,972; total, 159,037,612.

Other fisheries are the whale, walrus, seal, and shark fisheries, which in 1919 produced a total of about 41,541,605 kroner.

Whale-oil production in metric tons, 1917, 40,425; 1918, 25,725; 1919, 28,525; 1920, 37,275 (210,673 barrels in 1920 and 273,090 barrels in 1921).

V. MANUFACTURES.

Though the country lacks coal and is dependent entirely on imported supplies, it possesses an enormous amount of water power, which produce motive power for manufacturing industry. The chief manufacturing use of this power has been for the production of pulp and paper and of electrochemical products, which are important Norwegian industries. The principal products of the electrochemical industry are ammonium nitrate, calcium nitrate, sodium nitrate, sodium nitrate, calcium carbide, and ferrosilicon.

The numbers of establishments and workers in the principal industries on December 31, 1921, were as follows:—

Industries	Estab-lish-ments	Workers over 18 years		Workers under 18 years		Total
		Male	Female	Male	Female	
Chemicals, paints, oils, and soaps	327	6,952	899	217	132	8,200

The total amount of the import duties collected in 1920 was 102·8 millions of kroner and in 1921 59·7 millions of kroner. The value of imports subject to duty in 1920 and 1921 was respectively 1,466,354,000 and 679,542,900 kroner and of duty-free 1,566,819,100 kroner, and 784,006,600 kroner.

Under the treaty of 1826 there is the 'most-favoured-nation' treatment between the United Kingdom and Norway.

Values of imports and exports, divided into classes, for 1921 :—

Classes of Goods	1921		Classes of Goods	1921	
	Imports of Foreign Goods	Exports Norwegian Goods		Imports of Foreign Goods	Exports Norwegian Goods
	Kroner	Kroner		Kroner	Kroner
Animals, living .	9,851,800	1,500,400	Minerals, unwrought .	98,532,200	20,950,200
Animal produce (malty food) .	103,277,500	150,171,800	Minerals, manufactured .	40,275,100	74,434,300
Breadstuffs .	165,635,900	767,300	Metals, unwrought or partly wrought	33,495,000	38,056,800
Groceries .	100,532,260	692,100	Metals, manufactured .	84,798,700	3,467,100
Fruits, plants, &c.	48,937,400	701,200	Vessels, carriages, machinery, &c.	404,904,200	30,641,800
Spirits, &c.	20,604,500	748,800	Total .	1,463,549,500	605,273,400
Yarn, rope, &c.	27,320,000	1,863,800	Re-exports .		32,692,700
Textile manufactures, &c.	95,004,000	1,478,000	Grand Total .		637,966,100
Hair, skins, &c.	39,662,800	25,910,900			
Tallow, oils, tar, &c.	117,368,400	45,041,900			
Timber & wooden goods	22,076,400	140,934,000			
Dye stuffs .	7,643,700	985,500			
Different vegetable produce .	34,355,600	968,100			
Paper and paper manufactures .	9,774,100	65,959,400			

Imports and exports to and from the principal Norwegian ports :—

	Imports			Exports

Internal Communications.

The length of State Railways on December 31, 1921, was 1,870 miles; of private companies 271 miles; total 2,141 miles. 1,469 miles have a gauge of 4ft. 8½in.; 604 miles, 3ft. 6in.; 16 miles, 3ft. 3½in.; 52 miles, 2ft. 5½in. Total receipts year ending June 30, 1921: State railways, 104,886,556 kroner; companies, 19,286,567 kroner. Total expenses: State railways, 122,743,977 kroner; companies, 20,191,196 kroner. Goods carried: State railways, 6,396,711 tons (of 1,000 kilogs.); companies, 1,765,895. Passengers carried: State railways, 24,222,677; companies, 5,313,685. The State railways have been constructed partly by subscription in the districts interested and partly at the expense of Government. The receipts, expenses and traffic refer to the year July 1, 1920, to June 30, 1921. A beginning is made for the electrification of the State Railways in Norway.

The following are the postal statistics:—

—	1917	1918	1919	1920	1921
Letters	94,985,181	110,292,121	126,075,227	115,517,673	101,797,135
Post-cards	15,922,855	18,227,739	16,942,466	15,658,909	13,875,857
Letters with declaration of value	6,713,411	7,219,912	6,815,885	6,611,674	5,339,116
Registered letters	3,860,366	4,596,400	4,785,734	5,045,527	4,415,916
Journals	155,556,346	184,521,243	192,626,382	185,269,797	176,526,187
Other printed matter	15,886,593	18,827,492	18,252,290	16,032,640	13,847,746
Samples and parcels	3,998,458	4,860,091	5,512,228	4,787,029	4,170,528

Length of telegraph and inter-urban telephone lines and wires, June 30, 1922 : 16,910 miles of line, 112,646 miles of wires. Number of paid messages on the State lines, 5,598,373. Number of telephone conversations on trunk lines, 11,420,490. State telegraph offices, 2,203 ; receipts, 31,592,502·69 kroner ; expenses, 35,185,448·74 kroner.

The Government possesses 11 wireless telegraph stations in Norway and one at Spitsbergen.

Money and Credit.

On June 30, 1921, the nominal value of the coin minted (the coinage after the monetary reform deducting the coins melted down) was : Gold coin, 22,639,850 kroner ; silver coin, 25,697,701 kroner ; nickel coin, 3,390,500 kroner ; bronze and iron coin, 2,226,116 kroner ; total, 53,954,167 kroner.

There exists no Government paper money.

The value of income in 1920 and property at the end of 1920 assessed for taxes in the fiscal year 1921-22 was :—

	Income.	Property.
The towns	2,144·0 millions of kroner	5,285·9 millions of kroner
The rural districts	1,745·5 „ „	6,905·8 „ „
The whole kingdom	3,889·5 „ „	12,191·7 „ „

The 'Norges' Bank is a joint-stock bank, of which, however, a considerable part is owned by the State. The bank is, besides, governed by laws enacted by the State, and its directors are elected by the Storting except the president and vice-president of the head office, who are nominated by the King. It is the only bank in Norway that is authorised to issue bank notes for circulation. The balance-sheets of the bank for 1921 show the following figures :—Assets at the end of the year—billion, 147,292,188 kroner ; outstanding capital, mortgaged estates, foreign bills, &c., 521,298,352 kroner ; total, 668,590,540 kroner. Liabilities—notes in circulation, 409,812,279 kroner (the issue of notes allowed was 447,292,188 kroner) ; deposits, 143,262,465 kroner ; other liabilities, 115,515,796 kroner ; total, 668,590,540 kroner ; dividends payable for the year, 3,500,000 kroner, 10 per cent. ; balance, 28,249,470 kroner.

The 'Kongeriget Norges Hypothekbank' was established in 1852 by the State to meet the demand for loans on mortgage. The capital of the bank is mostly furnished by the State, and amounted to 32,000,000 kroner in 1921. At the end of 1921 the total amount of bonds issued was 246,655,840 kroner. The loans on mortgage amounted to 251,349,102 kroner.

The Norwegian 'Arbeiderbruk og Boligbank' was established in 1903 by the State to meet the demand for loans on mortgage from labourers and small proprietors. The capital of the bank is furnished by the State, and amounted to 7,200,000 kroner in 1921. On June 30, 1921, the total amount of bonds issued was 32,257,400 kroner. The loans on mortgage amounted to 39,581,392 kroner. This bank will shortly be replaced by the 'Norske Stats Småbruk og Boligbank,' which was established in 1917. Its capital amounted to 12,000,000 kroner in 1920 ; on June 30, 1921, the total amount of bonds issued was 20,000,000 kroner. The loans on mortgage amounted to 41,236,060 kroner.

There were at the end of 1921, 185 private joint-stock banks reported, with a collective subscribed capital of 517,581,680 kroner and a paid-up capital of 500,424,711 kroner. The reserve funds amounted to 278,142,345 kroner. The deposits and withdrawals in the course of the year amounted to

8,717,497,667 kroner and 8,868,525,119 kroner respectively. Deposits at the end of the year 2,982,297,204 kroner, of which 161,956,743 kroner deposits on demand, and 2,820,340,461 kroner on other accounts.

All savings-banks must be chartered by royal licence. Their operations are regulated, to a considerable extent, by the law, and controlled by the Ministry of Finance. In 1921 their number was 571; depositors 1,755,516, with 2,295,613,329 kroner to their credit at the end of the year being 1307.65 kroner to each depositor.

Money, Weights, and Measures.

By a treaty signed October 16, 1875, Norway adopted the same monetary system as Sweden and Denmark. The Norwegian krone, of 100 öre, is of the value of 1s. 1½d., or about 18 kroner to the pound sterling. The gold 20-kroner piece weighs 8.960572 grammes, .900 fine containing 8.0645 grammes of fine gold, and the silver krone weighs 7.5 grammes, .800 fine, containing 6 grammes of fine silver. The standard of value is gold. National Bank notes for 5, 10, 50, 100, 500, and 1,000 kroner are legal means of payment, and the Bank is bound to exchange them for gold on presentation. In 1922 the duty of the bank to pay the notes in gold is temporarily suspended.

The metric system of weights and measures is obligatory.

SPIITSBERGEN, BEAR ISLAND, AND ADJACENT ISLANDS (SVALBARD).

An archipelago situated between 10° and 35° longitude east of Greenwich and between 74° and 81° latitude north. The distance from Norway to Bear Island is 250 miles north, and to Spitsbergen 375 miles.

It is claimed that in all probability the archipelago was discovered by Norwegians in 1194 and re-discovered by the Dutch navigator Barents in 1596. The English explorer Henry Hudson visited Spitsbergen in 1607. In the 17th century a very lucrative whale fishery was started and for some time there were Dutch, British, and Norwegian claims to sovereignty and quarrels about the fishing places. But when in the 18th century the whale-fishery ended, the question of the sovereignty of Spitsbergen lost its actuality, and it was not until the beginning of this century that the question was again raised, owing to the discovery and exploitation of rich coalfields. It was settled by a Treaty, signed on February 9, 1920, at Paris, in which Norway's sovereignty over the Archipelago was recognised by the United States of America, the British Empire, Denmark, France, Italy, Japan, Netherlands and Sweden. Claims to land by nationals of the interested Powers are fully protected by the Treaty.

Total area about 25,000 square miles. The chief islands are West Spitsbergen or Mainland, North East Land (about half the former), Prince Charles Foreland, Edge Island, Barents Land, King Karl's Land, Hope Island, and Bear Island. The climate is essentially arctic, tempered by the Gulf Stream.

For over 300 years the islands have been frequented by sailors of various nationalities—in the last 100 years practically only Norwegians—engaged in the whale and seal fisheries, and hunters in search of fur-bearing animals. Since the beginning of this century Spitsbergen and Bear Island have

attracted much greater interest than before on account of the discovery of extensive coal resources. Coal occurs in several formations and of various qualities. In Bear Island is found coal of Devonian and Carboniferous age. The first kind has been mined since 1915 by a Norwegian Company. The shipping season lasts about six months. In Spitsbergen there occurs carboniferous, cretaceous, and tertiary coal. Only the last kind of coal is actually worked. There are two or three seams about 3 to 4 feet thick, each of which covers an area of at least 460 square miles with a contents of probably more than 2,000 million tons. The coal is of excellent quality. The number, extent and contents of the coal-seams of the other formations are not known and their coal is not so good as the tertiary coal. The coalfields belong to British, Norwegian, Swedish, Russian, and Dutch companies, and coal is at present mined at and exported from four places. Shipping is only possible in three or four months of the year. There are five mining camps inhabited all the year round. The largest is Longyear "City" in Advent Bay with about 350 inhabitants.

The export of coal and the population of Spitsbergen and Bear Island were :—

	Population		Export
	Summer 1921	Winter 1921-22	Summer 1922
Spitsbergen	1,315	895	Tons 297,000
Bear Island	188	85	9,000
Total	1,503	980	306,000

Besides coal there is found lowgrade iron in a few places, but of no economic value. The same is true of gypsur that occurs in great quantities, and of asbestos, which is found in one place.

Diplomatic Representatives.

1. OF NORWAY IN GREAT BRITAIN.

Envoy and Minister in London.—Paul Benjamin Vogt. (Appointed June 2, 1910.)

Counsellor.—Peter Hersleb Birkeland.

Secretary.—Reidar Kildal.

Naval Attaché.—Captain S. Scott Hansen.

Consul General.—G. K. Conradi.

Press Attaché.—M. M. Mjelde.

2. OF GREAT BRITAIN IN NORWAY.

Envoy and Minister.—Sir Mansfeldt de Cardonnel Findlay, K.C.M.G., C.B. (1911).

Second Secretary.—W. St. C. H. Roberts.

Third Secretary.—D. Fr. Howard.

Military Attaché.—Colonel W. Robertson, D.S.O.

Naval Attaché.—Captain J. Wolfe Murray, D.S.O., R.N.

Commercial Secretary.—C. L. Paus, C.B.E.

Consul at Kristiania.—E. Cable.

There are consular representatives at Bergen, Skien, Stavanger, Tromsø, Trondhjem, Larvik, and other places.

OMAN.

AN independent State, in South-eastern Arabia, extending along the southern shore of the gulf of that name from the entrance into the Persian Gulf to the extreme eastern point of Arabia, and thence S.W. as far as Ras Sajir, lat. 16° 8' N. The coast line is nearly 1,000 miles long. Inland Oman is bounded on the S.W. by the great desert. Area, 82,000 square miles; population, estimated at 500,000, chiefly Arabs, but there is a strong infusion of negro blood, especially along the coast. The towns of Muscat and Matrah hardly contain an Arab, being inhabited almost entirely by Baluchis and Negroes. The capital, Muscat, and the adjacent town of Matrah have together about 20,000 inhabitants.

Muscat was occupied by the Portuguese from 1508 to the middle of the seventeenth century. After various vicissitudes it was recovered in the eighteenth century by Ahmed bin Sa'eed, of Yemenite origin, who was elected Inam in 1741, and whose family has since ruled, though under the title of Sultans for the last three generations.

The present Sultan is **H.H. Seyyid Taimur bin Feysil**, eldest son of H.H. the late Seyyid Feysil bin Turki, who succeeded his father October 5, 1913.

In the beginning of last century the power of the Inam of Oman extended over a large area of Arabia, the islands in the Persian Gulf, a strip of the Persian coast, and a long strip of the African coast south of Cape Guardafui, including Socotra and Zanzibar. On the death of Sultan Sa'eed in 1856, one son proclaimed himself Sultan in Zanzibar and another in Muscat. Eventually the rivals agreed to submit their claims to the arbitration of Lord Canning, Viceroy of India, who formally separated the two Sultanates. Subsequent

troubles curtailed the area of the state in Asia. The island of Kishm or Tawilah, near the entrance of the Persian Gulf, formerly belonging to the Imam of Oman, is now under Persian government and is ruled by a Shaikh, but the port of Basidu at the western extremity of the island is British. Further south on the Persian coast of the Gulf of Oman is the Port of Jask, formerly belonging to Oman, but now Persian. The sole remaining possession of the Sultan on the Persian coast is the town of Gwadar, which is of considerable importance, as through it passes a fair amount of the trade of Mekran. The closest relations have for years existed between the Government of India and Oman, and a British Consul and Political Agent resides at Muscat.

The revenue of the Sultan from all sources varies between ten and eleven lakhs of rupees yearly. Since the end of 1919 the Customs have been reorganised under trained customs officials and a considerable increase in revenue has resulted. The population is poor. In the valleys of the interior, date cultivation has reached a high level, and there are possibilities of agricultural development where the water supply more certain. Inland camels are bred in large numbers by the tribes, and these are said to be the best breed in Arabia, but in size and strength they are inferior to those of north-western India. As to the mineral resources of the country little is known.

Trade is mainly in the hands of British Indians, and imports and exports are mainly from and to India. Rice, coffee and cotton piece goods are the chief imports. Dates are the principal export. Their produce and sale are the controlling factors in trade. Pomegranates, dried limes and dried fish are the only other export of any note. There are no industries of any importance. No accurate statistics of trade are published for the country as a whole. As far as can be judged from the information available the total value of imports and exports is about 750,000*l.* a year. Import duty is at present 5 per cent. *ad valorem*. There is no export duty, and imports for re-export by the importer within six months are not subject to any duty.

The only port of call for steamers is Muscat. It is one of the ports on the subsidiary mail route between Bombay and Basrah. The mail service is a weekly one in both directions. The Indian Government maintains a post office and a telegraph office at Muscat.

The common medium of exchange is the Maria Theresa dollar. On the coast, but not in the interior, the rupee circulates (rupee exchange 100 dollars equal to from Rs. 176 to Rs. 195 in 1921-22). There is one Omanese copper coin, which fluctuates in value. The muhammadi of 20 *gaj* (1 dollar = 11½ muhammadi) is only money of account. The weights in use are 1 Kujas = the weight of 6 dollars or 5.9375 oz.; 24 Kujas = 1 Maskat Maund; 10 Maunds = 1 Farāsala; 200 Maunds = 2 Bahār. Rice is sold by the bag; other cereals by the following measures:—40 Palis = 1 Farrah; 20 Farrahs = 1 Khandi.

Political Agent and H.B.M.'s Consul.—Major M. E. Rae, I.A.

PANAMA.

(REPÚBLICA DE PANAMÁ.)

Government.—Panama, formerly a department of the Republic of Colombia, asserted its independence on November 3, 1903, and the *de facto* Government was on November 13 recognised by the Government of the United States, and soon afterwards by the other Powers. In 1914 Colombia, in virtue of the Treaty of Bogota entered into with the United States (see under Colombia), undertook to agree to recognise the independence of Panama. This Treaty has been ratified by Colombia but not by the United States.

The Constitution, adopted February 13, 1904, and amended on December 26, 1918, provides for a Chamber of Deputies of 33 members (one for every 10,000 inhabitants), which meets biennially on September 1, and for a President of the Republic, elected by direct vote for 4 years, and not eligible for the succeeding term. The President who has been called to exercise the executive power owing to the death or resignation of a President is not eligible for re-election if he has exercised the power during any of that time. Nor is the President eligible for re-election if he has been called to exercise the executive power on account of the accidental or temporary absence of the titular President, and remains in power during any part of the six months immediately preceding the date of election for the new President. Beginning with 1924, elections of deputies are to be held every four years.

President of the Republic.—Dr. Belisario Porras. Assumed office, October 1, 1920.

There are three Vice-Presidents, and a Cabinet of five Ministers. The Republic is divided into eight provinces, each under a Governor.

A treaty for the demarcation of the boundary line between Panama and Costa Rica was signed on behalf of the respective Governments on March 17, 1910, and has been ratified by the congresses of both countries. By this treaty the question of what is the true boundary line was submitted to the arbitration of the Chief Justice of the Supreme Court of the United States, who gave his decision in 1914. Panama, however, refused to accept the award. The United States Government has, however, insisted upon the acceptance of the White Award, with the result that in September, 1921, the disputed region was occupied by Costa Rica. Panama, however, has protested against the decision, and does not recognise the occupation.

Area and Population.—Extreme length is about 480 miles; breadth between 37 and 110 miles; total area is 32,380 square miles; population according to the census of 1920 (excluding the Canal Zone), 434,208. The inhabitants are of a mixed race, comprising Spanish, Indian, and Negro elements, with a small number of temporary immigrants from the United States and European countries. Chinese subjects are estimated at 3,500. There are 40,191 British subjects in the Republic, chiefly from the West Indies. There are 8 provinces as follow (the capitals in brackets):—Bocas del Toro (Bocas del Toro), 14,398 inhabitants; Coclé (Penonomé), 42,219 inhabitants; Colón (Colón), 41,206 inhabitants; Chiriquí (David), 68,484 inhabitants; Herrera (Chitré), 28,984 inhabitants; Los Santos (Las Tablas), 34,638 inhabitants; Panama (Panama), 103,876 inhabitants; Veraguas (Santiago), 60,212 inhabitants. The capital, Panama, founded in 1518, on the Pacific coast, has (1920) 66,851 inhabitants (32,867 males

and 33,984 females), and Colón on the Atlantic coast, (1920) 31,230 inhabitants (16,399 males and 14,804 females). Smaller ports on the Pacific are Aguadulce, Pedregal, Montijo, and Puerto Mutis; on the Atlantic Bocas del Toro, Portobello, and Mandinga (opened September 26, 1916).

Movement of population for three years :—

Year	Births					Marriages	Deaths
	Total	Boys	Girls	Legitimate	Illegitimate		
1919	10,713	5,508	5,205	3,296	7,417	356	5,403
1920	11,616	5,811	5,805	3,603	8,013	840	5,801
1921	10,782	5,493	5,289	3,293	7,489	738	5,715

Religion.—The religion of the country is Catholicism, but other denominations are represented and have a fair following. In the Canal Zone Protestantism chiefly prevails. There are 71 Catholic churches and 58 parishes, served by 70 priests of various nationalities (20 are Panamanians, 27 Spaniards, 5 Italians, 4 French, 1 English, 3 North Americans, 3 Germans, 4 Colombians, 2 Venezuelans, and 1 Swiss).

Education.—Elementary education is obligatory for all children from 7 to 15 years of age. The Government maintains 339 public schools throughout the eight provinces and 35,255 children (excluding children enrolled in the Canal Zone public schools) received or were receiving free instruction in 1922 from 782 teachers. The co-educational system has been adopted in all the schools of the Republic. Panama has a University (Instituto Nacional), a normal school for girls, and a school of arts and crafts or trades for boys from 14 years of age. In addition there are about twenty private institutions. Many young men and women are being educated in Europe and the United States at the cost of the Panama Government.

Justice.—The laws have been codified and took effect on October 1, 1917, with the exception of the Administrative Code which was brought into force on November 15, 1918. These codes—civil, penal, commercial, judicial, administrative, fiscal, and mining—are designed to meet national needs and modern conditions, and will replace the old Colombian laws that have been in use since the separation of Panama. The death penalty has been abolished.

Finance.—All the revenue collected on importations into the Republic or zone belongs to the Panama Government, but the United States reserve the right to import supplies of all descriptions required for canal construction and for the use of their employees free of all taxes.

The national revenue and expenditure for five years were as follows for year ending June 30 (17. = 4.80 dollars):—

	1917-18	1918-19	1919-20	1920-21	1921-22
	£	£	£	£	£
Revenue . . .	793,882	646,752	1,290,250	1,191,358	1,104,166
Expenditure . .	732,170	707,464	878,642	918,672	1,498,940

PRODUCTION—COMMERCE, SHIPPING, COMMUNICATIONS 1207

The finances of the Republic have been reorganised by a fiscal agent of the United States. Under the new regime, the budget is for biennial periods.

The Republic has 1,260,000*l.* in United States banks and 410,000*l.* in the National Bank. The foreign debt consists of bonds to the value of 556,600*l.* issued in the United States for railway construction, &c. The internal debt amounts to 164,000*l.*

The Republic has no army or navy to support. The National Police Force numbers 69 officers and 750 men.

Production.—The soil of Panama is of great fertility. Of the whole area about five-eighths are unoccupied, and of the remainder only a small part is properly cultivated. Immigration is encouraged, and land is offered to small farmers on favourable terms. The most important product is the banana. Caoutchouc (about 130 tons annually) is collected by the Indians of the Cordillera, or is obtained from trees planted by Europeans near the coast. Coffee (about 500,000 bushes) is grown in the province of Chiriqui, near the Costa Rican frontier. The crop for 1922-23 is estimated at 250,000 lb. In the province of Coclé (Atlantic coast) there is one large agricultural undertaking, begun in 1894 with German capital. Here about 75,000 cocoa trees, 50,000 coffee bushes, and 25,000 caoutchouc trees have been planted and are now beginning to yield returns. Other products of the soil of Panama are coconuts, mahogany and other woods, copaiba, sarsaparilla and ipecacuanha. Sugar and tobacco growing are assuming importance. The total production of sugar in 1921 was 60,557 bags of 100 lb. each. The country has great timber resources. Cattle rearing is carried on successfully, and hides form an important article of export. In 1916 the live stock was estimated at 200,000 head of cattle, 15,000 horses, 2,000 mules, 30,000 pigs, and 5,000 goats.

Pearl fishing is carried on at the Pearl Islands in the Gulf of Panama, and at Coiba Island to the west. Turtle-shell is also exported to a considerable amount. It is claimed that Panama possesses nearly every common mineral except coal.

Commerce, Shipping, Communications.—The imports and exports (excluding the Canal Zone) for 6 years are shown as follows (1*l.* = 4·8 dollars :—

Year	Imports	Exports	Year	Imports	Export
	£	£		£	£
1916	1,879,473	1,141,345	1919	2,281,376	785,711
1917	1,921,490	1,153,413	1920	3,609,673	739,978
1918	1,609,395	1,067,923	1921	2,369,244	519,876

Of the total imports in 1921, 75·2 per cent. came from the United States (exclusive of canal materials) and of the exports about 97 per cent. went to the United States. The principal exports in 1921 were bananas, coconuts, cocoa, balata, hides, and gum, and the principal imports cottons, iron and steel, and flour.

Total trade between Panama and the United Kingdom (Board of Trade Returns) for 5 years :—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Panama to U.K.	84,731	250,261	228,476	138,983	65,504
Exports to Panama from U.K.	173,246	211,588	508,434	305,095	220,893

The Isthmus on both sides is in communication with European and American countries by several lines of steamers. All the maritime traffic (International commerce) for Colón and Panama now runs through the Canal Zone ports of Cristóbal and Balboa ; Bocas del Toro remains for the provincial trade. The new port of Mandinga, about 80 miles from the city of Colón, was opened on September 26, 1916.

A railway, 47 miles (first built in 1850-55), connects the ports of Colón and Panama. It belongs to the Panama Railroad Company (United States Government). In the Province of Bocas del Toro the United Fruit Company (American) owns about 140 miles of track with branches, which is used to transport bananas and passengers to the port of Almirante in the Chiriqui lagoon. At present the line extends into Costa Rica for a distance of about 30 miles. This line is being extended towards Port Limón (Costa Rica) and its terminal is now distant from that port 30 miles. The Chiriqui line is 65 miles long, and is being extended for 16 miles more. A concession was granted in 1917 for the construction of a railway on the Atlantic Coast of Panama, starting from the mouth of the river Chagres and running south-west to Almirante for at least 31 miles.

There are telegraph cables from Panama to North American and South American ports, and from Colón to the United States and Europe. Roads are being constructed throughout the country. There are 96 post-offices and 37 telegraph offices.

Money and Credit.—The monetary unit is the gold *Balboa* weighing 1·672 gramme ·900 fine, to which the United States gold dollar is legally equivalent. Silver coins are the peso (of 25 grammes ·900 fine), and the half, fifth, tenth and twentieth peso pieces and nickel coins of 2½ cents. There is no paper money. Two silver pesos of Panama currency are taken as equivalent to one U.S. gold dollar. Altogether four millions of silver dollars of the new currency have been coined and placed in circulation. In November, 1916, the sum of 1,000,000 pesos was withdrawn from circulation by the Canal Zone Government, and in August and September of 1917, the local banks withdrew 952,000 pesos ; total amount withdrawn 1,952,000 pesos, equal to 976,000 dollars U.S. currency.

Part of the 10,000,000 dollars (canal money) paid by the United States has been applied to the establishment of a real estate loan bank, part to public improvements in the several provinces, and 6,000,000 dollars have been invested in the United States.

The Panama Canal and the Canal Zone.

On November 18, 1903, a treaty between the United States and Panama was signed, providing facilities for the construction and maintenance of the inter-oceanic Canal. In this treaty, Panama granted in perpetuity the use of a zone (Canal zone) five miles wide on each side of the Canal route, and within

this zone the exclusive control for police, judicial, sanitary and other purposes. For subsidiary canals other territory was ceded and, for the defence of the Canal, the coastline of the zone and the islands in Panama Bay were also ceded. The cities of Panama and Colón remain under the authority of Panama, but complete jurisdiction was granted to the United States in both the cities and in their harbours in all that relates to sanitation and quarantine. In return for these grants the United States paid 10,000,000 dollars on the ratification of the treaty, and is paying 250,000 dollars yearly, beginning after nine years. The treaty was ratified on February 23, 1904, and in July, 1904, the provisional delimitation of the boundaries of the United States territory on the Isthmus was signed. According to this agreement the city of Panama is, for all practical purposes, left without a seaport for foreign commerce, as the anchorage of vessels at Flamenco Island and the wharves at Balboa, both lie within the territory of the zone. Moreover, a similar port was opened on the Atlantic entrance to the Canal, called Cristobal.

Governor of Canal Zone.—Colonel Jay J. Morrow (U.S. Army). Appointed March 28, 1921.

The area of the Canal zone within the limits of 5 miles on either side of the centre line of the canal, including land and water, but not including the area within the 3-mile limit from the Atlantic and Pacific ends, is 441.4 square miles made up of : Land area, 332.35 square miles ; Gatun Lake, 106.5 square miles ; Miraflores Lake, 1.9 square miles ; and the area of the channels from the coast to Gatun and Miraflores Locks, 0.85 square mile. Including all the waters of Gatun Lake, over which and its shores to the elevation of 100 ft. above the sea level the Panama Canal has absolute control, the total area of the Canal Zone is 502.5 square miles, plus the territory between the 85 and 100 foot contours, the area of which has not been computed. The area of Gatun Lake, when its surface is at its normal elevation of 85 feet above sea level, is 164 square miles. The civil population of the Canal Zone on June 30, 1922, was 23,671, of whom 6,903 were Americans. Of this population, 1,849 American men, and 269 American women, and 4,595 men and 78 women of other nationalities (chiefly British West Indian negroes) were employed by The Panama Canal and Railroad. There are in the Canal Zone 2,359 American women and 2,481 American children, and 3,883 women and 6,908 children of other nationalities. The Zone has been depopulated of landowners in order to make it a military reservation, and therefore no private individuals or traders are permitted to acquire land.

The Canal has a summit elevation of 85 feet above the sea. It is 43.84 nautical miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about 4 miles, and from the Pacific shore line to deep water is about 4½ miles ; hence the length of the Canal from shore to shore is approximately 35½ miles. The channel ranges in width from 300 to 1,000 feet. The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet. The Canal has a minimum depth of 41 feet. The average time of passage through the Canal is from 7 to 8 hours. The record passage is 4 hours 10 minutes. The maximum traffic capacity of the Canal is estimated at 36 ships per day.

The Gatun dam along the crest is 8,000 feet long, including the spillway, or about 1½ miles, and 2,100 feet wide at its greatest width. The crest of the dam is at an elevation of 105 feet above sea level, or 20 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the

normal water level of the lake, *i.e.*, 85 feet above sea level, is about 388 feet. The length of the cut through the Continental divide (Culebra, now Gaillard Cut), is 6.97 nautical miles. The minimum bottom width of the cut is 300 feet. The bottom is 40 feet above sea level, giving a normal depth of 45 feet.

The appropriations for the construction, operation and maintenance of the Canal to June 30, 1922, totalled 452,157,414.25 dollars, and the revenues from tolls and other sources since it was opened to navigation have totalled 58,117,185.94 dollars. The current expenses of operation and maintenance during the fiscal year 1922 were 7,919,017.63 dollars, and the gross revenue was 11,708,851.48 dollars.

The Canal was informally opened to commerce by the passage of the 9,000 ton steamer *Ancon* on August 15th, 1914, with specially invited guests. The journey was made without mishap in ten hours. The Canal has been in use since, except that owing to landslides in the Gaillard Cut traffic was interrupted for various short periods in 1915, and from September 18, 1915, to April 15, 1916, the channel was entirely blocked. Since April 15, 1916, traffic has moved with only slight delays, save only that in the latter part of August, 1916, Cucaracha slide became active, causing a suspension for six days, and Culebra slide caused a stoppage on January 10 and 11, 1917. Since that time the channel has been maintained at full depth, and there has been no interruption of traffic.

The President of the United States proclaimed the official and formal opening of the Canal on June 12, 1920.

Particulars of the traffic through the Canal are given as follows:—

Fiscal year ending June 30	Northbound (Pacific to Atlantic)		Southbound (Atlantic to Pacific)		Total		Tolls levied
	Vessels ²	Cargo, tons	Vessels	Cargo, tons	Vessels	Cargo, tons	
1915 ¹	553	2,817,461	522	2,070,993	1,075	4,888,454	4,343,383
1916	362	1,725,095	306	1,369,019	758	3,094,114	2,399,830
1917	929	4,129,303	874	2,929,260	1,803	7,058,563	5,631,781
1918	1,154	4,892,731	915	2,639,300	2,069	7,532,031	6,264,765
1919	1,167	4,176,367	857	2,740,254	2,024	6,916,621	6,156,118
1920	1,298	5,281,983	1,180	4,097,516	2,478	9,374,499	8,493,082
1921	1,421	5,707,136	1,471	5,692,078	2,892	11,399,214	11,261,919
1922	1,227	5,388,976	1,509	5,495,934	2,736	10,884,910	11,197,832

¹ 10½ months only, from August 15 to June 30.

² *i.e.* ocean-going vessels, excluding Canal vessels and launches.

Of the total number of commercial ships that passed through the Canal during the year ended June 30, 1922, 1,095 were American, 935 British, 113 Norwegian, 189 Japanese, 53 Chilean, 60 Peruvian, 51 French, 9 Spanish, 53 Danish, 66 Dutch, 35 Swedish, 20 Italian, and 57 German.

The (Hay-Pauncefote) treaty between Great Britain and the United States signed November 19, and ratified by the United States Senate December 16, 1901, provides for the use of the Canal on equal terms by vessels of all nations. On August 24, 1912, the United States Congress passed the Panama Canal Act whereby privileges were given to certain classes of American shipping using the canal. The British Government lodged a protest against some of the provisions which it regarded as involving violation of the Hay-Pauncefote treaty. After much discussion and many suggestions, President Wilson, on March 5, 1914, requested Congress to repeal that provision of the Act which discriminates between American and

other vessels, holding that the exemption was 'in plain contravention of the treaty with Great Britain concerning the Canal concluded on November 19, 1901.' The repealing Bill was signed on June 15, 1914.

Diplomatic and Consular Representatives.

1. OF PANAMA IN GREAT BRITAIN.

Secretary and Chargé d'Affaires.—Señor Don Carlos R. Zachrisson.

Attaché.—Señor Don Enrique Stagg

Consul-General.—J. B. Chevalier (January, 1919).

2. OF GREAT BRITAIN IN PANAMA.

Envoy Extraordinary and Minister Plenipotentiary.—A. P. Bennett, C.M.G. Appointed March, 1919.

Consul for the Republic.—Constantine Graham.

Vice-Consul at Panama.—W. Ewing.

There are also Vice-Consuls at Colón, and one at Bocas del Toro, and a Consular Agent at David.

PARAGUAY.

(REPÚBLICA DEL PARAGUAY.)

Constitution and Government.

THE Republic of Paraguay gained its independence from Spanish rule in 1811, and after a short government by two consuls, the supreme power was seized, in 1815, by Dr. José Gaspar Rodríguez Francia, who exercised autocratic sway as dictator till his death, September 20, 1840. Dr. Francia's reign was followed by an interregnum, which lasted till 1842, when a National Congress, meeting at the capital, Asuncion, elected Don Mariano Roque Alonso and Don Carlos Antonio López joint consuls of the Republic. Another Congress voted, March 13, 1844, a new Constitution, and, March 14, elected Don Carlos Antonio López sole President; he was continued by another election, March 14, 1857. At the death of Don Carlos, September 10, 1862, his son, Don Francisco Solano López, born 1827, succeeded to the supreme power. President López, in 1864, began a dispute with the Government of Brazil, the consequence of which was the entry of a Brazilian army, united with forces of the Argentine Confederation and Uruguay, into the Republic, June, 1865. After a struggle of five years, in which Paraguay lost probably 500,000 men, López was defeated and killed at the battle of Cerro Corá, March 1, 1870.

A new Constitution was proclaimed on November 25, 1870, whereby the legislative authority is vested in a Congress of two Houses, a Senate and a Chamber of Deputies, the executive being entrusted to a President, elected for the term of four years, with five ministers. There is also a non-active Vice-President, who is at the same time President of the Senate. The Senate and

Chamber of Deputies are elected directly by the people, the former in the ratio of one representative to 12,000 inhabitants, and the latter one to 6,000 inhabitants, though in the case of the sparsely populated divisions a greater ratio is permitted. The new electoral law of November 30, 1916, provides for 20 Senators and 40 Deputies. The Senators and Deputies receive each 3,000 dollars per month.

Provisional President of the Republic.—Dr. Eusebio Ayala. (Assumed office on October 29, 1921, on the resignation of Senor Gondra.)

The President exercises his functions through a cabinet of responsible ministers, five in number, presiding over the departments of the Interior; of Finance; of Justice, Worship and Public Instruction; of War and Marine; and of Foreign Affairs. The President receives a salary of 20,000 dollars per month, and each of the ministers 10,000 dollars. The total administrative expenses are estimated (year ending August 15, 1922) at 1,071,882 dollars gold and 105,189,819 dollars currency (together about 768,006*l.*). The apparent large decrease of expenditure compared with that estimated for the years 1919, 1920 and 1921, is due solely to the great depreciation of the paper currency.

The country is divided into 2 sections: the 'Oriental,' east of Paraguay river, and the 'Occidental,' west of the same river. The Oriental section is divided into 12 departments, subdivided into 93 'partidos'; the Occidental section is divided into 3 'comandancias militares.'

The 12 departments are: Concepción, San Pedro, Caraguatay, Villarrica, Yhú, Carzapá, Encarnación, San Ignacio, Quiyindy, Villeta, Paraguari and Pilar. The capital, Asunción, formed a district subdivided into 'secciones policiales.' The civil authority is exercised by a *jefe político* in each of the latter, who is subject to the control of Government *delegados*, or *comisionados*, 12 in number, among whom are included the military commanders of the five military zones.

Area and Population.

The approximate area of Paraguay proper, which is situated between the rivers Paraguay and Alto Paraná, is estimated at 196,200 square kilometres, or 75,673 square miles. An area officially stated to be 100,000 square miles in extent, lying between the rivers Paraguay and Pilcomayo, known as the Chaco, is claimed by Paraguay, whose rights, however, are disputed by Bolivia. In 1917 the total population was estimated at 1,000,000, not including the Chaco Indians, roughly estimated at 50,000, but these figures are probably too high. The population of Paraguay proper consists of people of Guaraní Indian, European (chiefly Spanish) and Negro blood, the Guaraní largely predominating. Of foreigners in Paraguay, in 1916, there were probably upwards of 60,000, including 25,000 to 30,000 Argentines, 10,000 to 15,000 Italians, 1,400 Brazilians, 7,000 Spanish, 3,000 German, 800 to 1,000 French, 1,000 Uruguayans, 400 English. On September 30, 1920, the population of the capital, Asunción (founded 1537), was estimated to be 99,836: other towns are Villarrica, 26,000; Concepción, 15,000; Encarnación, 12,500; San Pedro, 8,700; Luque, 15,000; Carapeguá, 15,000; Paraguari, 10,000; Villa del Pilar, 10,000. These figures include the surrounding districts in each case, and the figures are estimated.

In 1913 the immigrants assisted by Government numbered 1,512; in 1918, 270; in 1919, 349; in 1920, 330; in 1921, 576. A census taken in August, 1921, of the 27 National Colonies in the Republic gives them a total population of 13,808 (7,755 males). Very little land is now national

property, most of it having been transferred to private ownership, much of it in very large tracts. The receipts from the sale of Government land amounted to 374,830 pesos in 1920, and 499,405 pesos in 1921.

In 1916 the number of marriages was 2,526; of births, 29,381 (13,256 legitimate, and 16,125 illegitimate); of deaths, 8,273.

Religion, Instruction, and Justice.

The Roman Catholic Church is the established religion of the State, but the free exercise of other religions is permitted. Asuncion, Suffragan to Buenos Aires, is the only Paraguayan Episcopal See. The law of civil marriage came into force on August 1, 1899. Roman Catholic and other religious marriage ceremonies are allowed, but the civil ceremony alone gives validity to a marriage.

Education is free and nominally compulsory, but schools are not everywhere available. In 1919 there were 1,268 government primary schools with 78,399 pupils (44,137 boys and 34,262 girls). The teachers numbered 1,808 (653 men and 1,155 women). There were also 74 private schools, with 4,021 pupils (2,173 boys and 1,848 girls). There are National Colleges (*i.e.*, high schools) at Asuncion, Villarrica, and Pilar. The aggregate number of students is 740 and of teachers 46. There is also a University which grants degrees in law, medicine, and social sciences, and certificates to notaries public and practitioners in pharmacy and obstetrics. Number of students in 1919, 247; of professors, 34. There are also 6 normal schools (Asuncion, Villarrica, Concepcion, Encarnacion, Barrero Grande, and San Juan Bautista), with 27 male and 195 female students. Besides contributions from general taxes, there is a special Government fund for education consisting of a proportion of the proceeds of land sales, customs dues, &c. A national library, the national archives, and a natural history museum and botanic zoological garden are under the care of the department of Public Instruction.

Justice is administered by a Supreme Court, two courts of appeal (one for civil causes and another for commercial and criminal causes), a court of jurymen, 10 judges of First Instance, and (at the capital) 3 police magistrates. The functions of magistrates are exercised in the provinces by upwards of 100 *jueces de paz* (all laymen), who are at the same time registrars of births, deaths, and marriages.

Finance.

The revenue is derived from import and export duties, inland revenue, transit dues, post and telegraph and other dues. The estimated revenue and expenditure for six years are given as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1917-18 ¹	523,311	577,182	1920-21 ²	675,690	768,006
1919 ¹	1,105,911	1,071,332	1921-22	1,140,542	1,266,274
1920 ¹	1,069,530	1,082,846	1922-23	707,632	601,317

¹ The budget for the year ending June 30, 1918, remained in force until December 31, 1918.

² Estimated.

On December 31, 1921, the outstanding external debt amounted to 1,259,253*l.*, and the acknowledged internal debt to 439,067*l.* (not including

the paper currency, viz., 176,756,060 dollars, in circulation on September 15, 1922). The war debt to the Argentine and Brazil (the portion due to Uruguay was condoned) is not included in Government accounts. It may be said to exist only as a political weapon in the hands of those countries, and is by some considered an effective guarantee of the independence of Paraguay.

Defence.

The small army of Paraguay is drilled and trained and armed on the German model. Total about 100 officers and 2,500 men, distributed at 5 centres. In the event of war the National Guard is called to the colours. Service is compulsory in the ranks for 2 years, but the law is not enforced. The territory of the Republic is divided into 5 military zones.

The navy consists at present of a flotilla of 3 small converted merchant vessels armed with modern guns. The largest is about 200 tons gross register (three larger vessels having been sold).

Production and Industry.

Of the total area of the Republic, which is officially given at 111,250,000 acres, 57,231,250 acres are utilised in various ways, and 54,018,750 acres are unexploited land. The utilised land comprises 30,000,000 acres of grazing land, 7,031,250 acres of yerbales land, and 20,000,000 acres of timber land. In 1921 rural property holdings numbered 38,348, and extended to 81,917,345 acres.

The soil of Paraguay is productive and the climatic conditions favourable to the cultivation of many sub-tropical products. But in its present condition much of the country is admirably suited to pastoral purposes. Excellent grazing land is abundant in Paraguay proper and in the Chaco region. The cattle census of 1915 showed that there were in the Republic 5,249,043 cattle, 600,000 sheep, 478,000 horses, 17,000 mules, 18,000 asses, 61,000 pigs, and 87,000 goats. The meat packing and curing industry is encouraged by Government; hides, jerked beef, and other animal products are exported. *Yerba maté*, or Paraguay tea, which is a natural product of the virgin forests, is one of the chief articles of export. The total export of *yerba* in 1921 was 4,596,268 kilos. Tobacco is also one of the principal products. The normal output is about 220,000 cwt., of which about 60 per cent. was (before the war) exported to Europe, chiefly to Germany. In 1921, 7,159,455 kilos were exported. Paraguay also produces quebracho extract; in 1920 the quantity exported amounted to 29,356 tons. Fruit-growing, especially oranges, is general; 176,322,700 oranges were exported in 1921. The export of petit grain oil, the essential oil made from the leaves of the sour orange, amounted in 1921 to 57,541 kilos. The total area devoted to sugar cultivation (largely for the manufacture of spirit) is about 11,120 acres; estimated sugar production in 1920, 5,230 tons; 1921, 2,579 tons. There are 7 sugar refineries in Paraguay, the most important of which is at Tebicuari. The output in 1921 of industrial and rectified spirit was 366,409 litres, and of rum 424,312 litres. Roots (chiefly mandioca, sweet potatoes, and ground-nuts), maize, beans, rice, &c. are grown for local consumption, but agriculture is primitive. The cultivation of cotton is encouraged by the authorities, but has not yet assumed commercial importance for want of labour. The timber industry is also of great importance.

Iron, manganese, copper, and other minerals are encountered in abundance. The Ibicui iron mines were worked as early as 1863. The Quiriú

and Ibicuí manganese mines contain ore deposits estimated at 60,000,000 tons. Copper has also been found at San Miguel and Quiquió.

Commerce.

The following is the value of the imports and exports (5 dollars = £1) :—

	1916	1917	1918	1919	1920	1921
	£	£	£	£	£	£
Imports . . .	930,305 ¹	1,021,240 ¹	2,210,324 ²	3,167,194 ²	2,623,701 ²	1,671,784
Exports . . .	961,492	1,300,040	1,234,264	3,588,291	3,037,116	1,863,344

¹ The comparison between the import values with the export values is apt to be misleading, since these figures represent the *conventional values* only (assigned by the customs tariff as the basis on which duties are collected) and not the ascertained value of the goods.

² The actual, or ascertained, value.

Import duties (estimated) in 1917-18, 235,657*l.*, in 1919, 444,500*l.*, in 1921-22, 213,700*l.* The export duties were estimated in 1917-18, at 179,390*l.*, in 1919 at 163,000*l.*, in 1921-22, 123,600*l.*

The chief exports in 1921 were hides (190,893), yerba (4,600 tons), oranges (14,693,500 dozens), tobacco (7,160 tons), timber, canned and preserved beef, cattle, petit grain oil, and quebracho extract (29,356 tons). Of the imports in 1921, the most important were foodstuffs, 335,131*l.*; hardware, 359,074*l.*; and textiles, 772,780*l.* Of the total exports in 1921, goods to the value of 1,308,067*l.* went to Argentina, whence the bulk is re-exported. The imports from Great Britain (chiefly consisting of textiles and hardware) amounted in 1921 to 349,784*l.*, or only 21 per cent. of the total. The exports from Paraguay to the United Kingdom were valued at 2,266*l.* The 'most favoured nation treaty' of 1884 between Great Britain and Paraguay is in force. A free trade treaty was signed in 1916 between Paraguay and Argentina, but has not yet been ratified.

The trade between Paraguay and the United Kingdom (Board of Trade returns) for 5 years :—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Paraguay to U.K. .	320	1,250	2,413	9,952	3,679
Exports to Paraguay from U.K. .	245,919	294,882	169,350	69,958	100,068

Communications.

In 1921, 3,012 vessels, with an aggregate tonnage of 309,813 tons, entered at the port of Asuncion, and 3,085 with a tonnage of 305,608 cleared. These figures include sailing vessels. The principal company engaged in the river service is the Argentine Navigation Company, Ltd., the controlling interest in which is British.

There is a railway (the Paraguay Central Railway) from Asuncion to Encarnacion, on the Rio Alto Paraná. This railway has a total main track length of 274 miles, with 26 miles of side-track. The change of gauge from 5½ ft. to the standard 4 ft. 8½ ins., was effected in 1910 and a through train service without break of bulk from Asuncion to Buenos Aires was opened in 1911. Opposite Encarnacion is Posadas, to which an Argentine line is extended, and the two lines are connected by a train ferry (opened October 10, 1913). El Ferrocarril del Norte, owned by a Paraguayan

company, runs from Concepcion as far as Horqueta, a distance of 43 kilometers (26 miles). This road is projected to run as far as Pedro Juan Caballero on the Brazilian border. The Azucarera Paraguaya, in the Department of Ibytymi, has 13 kilometers (8 miles) of its line open to the public. It is owned by Paraguayan capital. The country roads are in general mere bullock tracks, and transport is difficult and costly.

There is a line of telegraph at the side of the railway. The national telegraph (915 miles of line and 1,440 miles of wire) connects Asuncion with Corrientes and Posadas in the Argentine Republic, and thus with the outside world; there are altogether 1,436 miles of telegraph line and 61 telegraph offices in 1919. Number of messages in 1918, transmitted, 127,892; received, 100,378. The telephone at Asuncion was destroyed by fire in 1913. Wireless telegraph stations have been erected at Asuncion, Encarnacion, Concepcion, and Paraguari. They are said to have a radius of 500 kilom. by day and 1,000 kilom. by night. Paraguay joined the postal union in 1881; in 1917 the number of post offices was 385. In 1919 the total number of pieces of mail matter handled was 5,028,896.

Money and Credit.

The principal banks in Paraguay are the Bank of the Republic, opened in June, 1908 (capital, 4,000,000 dollars gold); London and River Plate Bank, opened early in 1920; the Mercantile Bank, established 1891, with a capital of 25,000,000 dollars paper; the Banco de España y Paraguay, with a capital of 5,300,000 dollars paper; the Banco Constructor, with a capital of 2,000,000 dollars paper; and the Agricultural Bank, established 1887, with a capital of 35,664,468 currency dollars advanced by Government. The total currency in circulation on September 15, 1922, was 176,756,060 dollars. The total gold credit, chiefly in Buenos Aires banks, was 2,830,555 dollars.

There is no gold and silver current, and paper is the only circulating medium with the exception of nickel coins to the value of 2,983,500 dollars currency. The average rate of exchange in 1921 was 181.45 dollars paper to 17. The exchange is subject to fluctuation and transactions are frequently made in Argentine gold or paper dollars. On January 20, 1916, a law was passed establishing an Office of Exchange or Conversion. For the purpose of buying gold currency the office had placed at its disposal (1) 10,000,000 pesos paper currency, (2) the amounts received from the sale of gold currency, and (3) the available funds in hand at the Agricultural Bank. A new paper currency was issued in 1922 in denominations of 5, 10, 50, 100 and 500 pesos.

Weights and Measures.

The metric system was officially adopted on January 1, 1901, and is now in general use, but the old local units are still used in certain cases. (For these, see THE STATESMAN'S YEAR BOOK, 1922, p. 1186).

Diplomatic and Consular Representatives.

1. OF PARAGUAY IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Don Cecilio Bacz, May, 1920).

Consul-General in Great Britain.—Alfred James. Appointed November 20, 1897.

There are Consuls at Glasgow, Birmingham, Manchester, Cardiff, Liverpool, Bradford, and Southampton.

2. OF GREAT BRITAIN IN PARAGUAY.

Envoy Extraordinary and Minister Plenipotentiary.—Sir B. F. Alston, K.C.M.G., C.B. (residing at Buenos Aires).

Consul at Asuncion (Local rank of Secretary of Legation and Charge d'Affaires in absence of Minister).—F. W. Paris.

PERSIA.

(IRÂN.)

Reigning Shah.

Sultan Ahmad Shah, born January 20, 1898 (27th Shaban 1315), succeeded his father, Muhammad Ali Shah (who abdicated) July 16, 1909, under regency of Ali Riza Khan, Azud ul Mulk, chief of the Kajar tribe. Azud ul Mulk, the Regent, died September 22, 1910, and on the 25th of the same month the National Council elected Abul Kasim Khan, Nasir-ul-Mulk,

who was then in Europe, as his successor. The Regent arrived in Teheran on February 8, 1911, and definitely assumed his functions by taking the oath before the National Council on March 4. The coronation of the Shah took place on July 21, 1914.

Brothers of the Shah.—I. Itezad es Saltaneh. II. Muhammad Hasan Mirza, Valiahd (heir apparent), born February 19, 1899 (9th Shaban 1316). III. Muhammad Mehdi Mirza. IV. Mahmud Mirza.

Uncles of the Shah.—I. Abu'l Fath Mirza, Salar ed Dowleh, born 1881. II. Abu'l Fazl Mirza, Azud es-Sultan, born 1883. III. Husein Kuli Mirza, Nusrat-es-Sultaneh, G.C.V.O., born 1894. IV. Nâsr-ed-dîn Mirza, born 1896.

The Royal Family is very numerous: there are some thousands of princes and princesses.

The Shah of Persia—by his official title, 'Shâhinshâh' (a corruption of Shâhân Shâh), or King of Kings—was until 1906 absolute ruler within his dominions, and master of the lives and goods of all his subjects. The whole revenue of the country being at their disposal, recent sovereigns of Persia were able to amass a large private fortune.

The present sovereign of Persia is the seventh of the dynasty of the Kajârs, which took possession of the crown upon the overthrow of the Zand dynasty. The date of accession of each of the sovereigns of the dynasty was as follows:—

- | | |
|--|--|
| 1. Agha Muhammad . . . 1779-1794 | 5. Muzaffar-ed-dîn, son of Nasir-u-dîn . . . 1896-1907 |
| 2. Fath Ali, nephew of Agha Muhammad . . . 1797-1834 | 6. Muhammad Ali, son of Muzaffar-ed-dîn . . . 1907-1909 |
| 3. Muhammad, grandson of Fath Ali . . . 1835-1848 | 7. Sultan Ahmad, son of Muhammad Ali . . . July 16, 1909 |
| 4. Nasir-u-dîn, son of Muhammad . . . 1848-1896 | |

According to the Constitution the Shah must belong to the Shi'a faith and his successor must be his eldest son, or next male heir in succession, whose mother was a Kajâr princess.

Constitution and Government.

The form of government in Persia up to the year 1906 was, in its most important features, similar to that of Turkey. The Shâh, within the limitations imposed by the Moslem religion, was an absolute ruler, but had to reckon with the power of the leading doctors of law (*Mujtahid*), who resided at Najaf and Kerbela in Mesopotamia. Unlike the Sultan of Turkey he had no religious standing. In 1905, the Persian people demanded representative institutions, and in January, 1906, the Shâh gave his consent to the establishment of a National Assembly, or 'Majlis,' which sat from October, 1906, to June, 1908, and drew up a 'Constitution' which received the Shah's approval on December 30, 1906. The 'Majlis' has had Sessions in 1909 and 1915 and was re-opened on June 22, 1921, by the present Shah. The government of the country is in the hands of the Cabinet, which was formed on February 15, 1923, as follows:—

Prime Minister and Minister of the Interior.—Mustanfi-ul-Mumalik.

Minister of War.—The Sardar Sepah (Riza Khan).

Minister for Foreign Affairs.—Zuka-ul-Mulk.

Minister of Education.—Mohtasham-es-Saltaneh.

Minister of Finance.—Nasir-ul-Mulk.

Minister of Justice.—Mumtuz-ul-Mulk.

The country is divided into thirty-three provinces, which are governed by governors-general, who are directly responsible to the central Government, and can as a rule nominate the lieutenant-governors of the districts comprised in their own governments. Some of the governments are very small, and do not bear subdivision into districts, &c.; others are very large, and comprise several provinces. Governors-general and governors are generally called Hâkim, the former also often have the title of Wâli. Every town has a mayor or chief magistrate called Kalântar, or Darogha, or Begler-begi. Each quarter of a town or parish, and every village, has a chief who is called Katkhuda. These officers, whose chief duty is the collection of the revenue, are generally appointed by the governors, but sometimes elected by the citizens. Most of the governors have a vizîr or a pîshkâr, a man of experience, to whom are entrusted the details of the government. The chiefs of nomad tribes are called Ilkhânî, Ilbegî, Wâli, Sirdâr, Sheikh; they are responsible for the collection of the revenues to the governors of the province in which their tribes reside.

A law of May, 1907, provides for the election of rural and town councils. In these elections practically all subjects have a right to vote, and it was intended that the councils should be in direct communication with the Majlis.

Area and Population.

Persia, which has an area of about 628,000 square miles, lies between 25° and 40° north latitude and between 44° and 63°30' east longitude. A vast portion of this area is an absolute desert, and the population is everywhere so scanty as not to exceed, on the average, fifteen inhabitants to the square mile.

The population is estimated at between 8 and 10 millions, but all figures are largely conjectural. It is estimated that the country contains some three million nomads. Of these, 260,000 are Arabs, 720,000 Turks, 675,000 Kurds and Leks, 20,700 Baluchis and Gipsies, 234,000 Lurs. These figures, however, are merely round numbers, and estimates vary.

The number of Europeans residing in Persia does not exceed 1,200. There are about 600 British subjects resident in Persia (exclusive of British Indians).

The principal cities of Persia are:—Teheran, with over 220,000 inhabitants; Tabriz, with 200,000; Isfahan with 80,000; Meshed and Kerman, with 70,000 to 80,000 each; Yezd, with 45,000; Barfurush, Kermanshah, and Shiraz, with 50,000 each; Hamadan, Kazvin, Kum, Kashan, Resht, each with 30,000 to 40,000 inhabitants.

Religion.

Of the population about 8½ millions are Moslems of the Shî'a sect, and of that branch of it known as the *Ithnâ-'Ashariyya*, who recognise twelve Imâms or spiritual successors of the Prophet Mahomet; 850,000 are of the Sunnî sect; 10,000 are Parsîs (Gabrs), 40,000 Jews, 50,000 Armenians, and 30,000 Nestorians.

The Moslems of the sect called Shî'a differ to some extent in religious doctrine, and more in historical belief, from the Moslems of the Turkish Empire, who are called Sunnî. The Persian priesthood (ulemâ) is very powerful. Any person capable of reading the Koran and interpreting its laws may act as a priest (mullâ). As soon as such a priest becomes known for his just interpretation of the divine law, and for his knowledge of the traditions and articles of faith, usually gained by many years of study at

Najaf and Kerbela, he is called a mujtahid, or doctor of law. There are many mujtahids in Persia, sometimes several in one town; there are, however, only four or five whose decisions are accepted as final. The highest authority, the chief priest of all, is the leading mujtahid, who resides at Najaf or Kerbela, near Baghdad, and some consider him the vicegerent of the Prophet, the representative of the Imâm. The Shah and the Government have no voice in the matter of appointing the mujtahids, but the Sheikh-ul-Islâm, chief judge, and the Imâm-i-Jama, chief of the great mosque (Masjid-i-Jama) of a city, are appointed by Government. Under the Imâm-i-Jama are the pish namâz or khatib (leader of public prayers and reader of the Khutba, the Friday oration), the mu'azzin (crier for prayers), and sometimes the mutavali (guardian of the mosque); this latter, as well as the mu'azzin, need not necessarily be a priest. All mosques and shrines have some endowments (wakf), and out of the proceeds of these are provided the funds for the salaries of the priests attached to them. The shrines of some favourite saints are so richly endowed as to be able to keep an immense staff of priests, servants, and hangers-on.

The Gregorian National Armenians form two dioceses, each under a bishop. One bishop resides at Tabriz, the other at Isfahan. There are also a few thousand Roman Catholic Armenians in Persia who have a bishop of their own rite at Isfahan, the bishop of the Latin rite residing at Urumia. There is a wide tolerance exercised towards Armenians and Nestorians, Jews, and Parsis in cities where Europeans reside; in other places, however, they occasionally suffer oppression from Moslems belonging to the lower classes.

Instruction.

In recent years many schools of various degrees, entirely on European lines, have been established; the Ministry of Education has undergone radical reforms; and female education has been greatly advanced. There are probably some 50 schools in Persia with an aggregate of 4,000 pupils of both sexes.

There are many colleges (medresseh), supported by public funds, in which students are instructed in religion and Persian and Arabic literature, as well as in a certain amount of scientific knowledge, and many schools for children, while private tutors are very common, being employed by all families who have the means. A polytechnic school with a number of European professors, opened in Teheran in 1849, has done much towards introducing the knowledge of Western languages and science into Persia. There are also military colleges at Teheran and Tabriz. At Teheran there is a French school supported by the Alliance Française. But the bulk of the population are taught only to read the Korân. A 'political college,' Medressch i Siasi, with about 50 pupils, was opened in 1900, and prepares candidates for service in the Foreign Office, which pays 133,000 krans per annum for its maintenance. Some 40 new schools have been opened at the cost of all who draw pay from the Government, regardless of class, who have to pay 1 per cent. on their emoluments for the upkeep of these schools. Medical schools have also been started under the supervision of French doctors.

Justice.

The Minister of Justice, assisted by an Advisory Council, composed of a legal adviser, the Attorney General, Chief of the High Court of Appeal, and three of the chief directors of the Ministry of Justice, endeavours to supervise the organisation and the proper function of justice in Persia. The

'Jurisconsult' of the Ministry of Justice is a Frenchman, who has now also been made the Chief of the "Ecole des Droits."

There are in every town of Persia police magistrates, and in big towns tribunals which deal with cases coming within the sphere of public and criminal laws. There are also courts of appeal in big towns and a High Court of Appeal in Teheran which is similar to the *Cour de Cassation* in France.

Finance.

The revenue for 1911-12 amounted to 2,042,850*l.*, and the expenditure to 1,608,600*l.* In 1912-13 the revenue amounted to 1,055,792*l.*, and in 1913-14 to 1,480,778*l.* These are the latest available figures.

More than half of the revenue consists of payments in cash or kind raised by assessments upon towns, villages, and districts, each of which has to contribute a fixed sum, the amount of which is changed from time to time by tax-assessors (*mumayiz*) appointed by the Government. Almost the entire burthen of taxation lies upon the labouring classes.

Approximate gross Customs receipts for three years (£1=28 Krans in 1918-19; £1=25 Krans in 1919-20; and £1=34 Krans in 1920-21):—

	1918-19	1919-20	1920-21
Northern Zone:—	£	£	£
Azerbaijan (Tabriz)	27,071	28,428	25,000
Astara	8,270	28,328	4,308
Gilan (Enzeli)	57,120	288,364	252
Meshed-i-sar	4,130	13,940	3,852
Bandar Guez	11,031	10,732	4,309
Khorassan and Sistan	82,740	158,468	169,986
Kermanshah	148,085	356,608	431,981
Southern Zone:—			
Bushire	281,600	225,728	366,123
Bandar Abbas	143,510	119,060	165,760
Mohammamah	298,246	204,588	215,392
Teheran	12,337	3,704	12,262
Total	1,074,140	1,438,008	1,398,725

In December, 1922 the recognised foreign debts of Persia were:—

Loans	Original Amount	Outstanding
1. Indian 5 per cent. loan (£)	314,281 16 4	138,744 17 10
2. Imperial Bank of Persia (£)	1,250,000 0 0	1,199,112 9 1
3. British Advances 1912-14 (£)	490,000 0 0	490,000 0 0
4. Ditto, 1915-17 (£)	817,000 0 0	410,000 0 0
5. Ditto (Krans)	1,000,000	1,000,000
6. Ditto, 1918-20 (Krans)	92,500,000	92,500,000

By the Treaty of March 21, 1921, between Soviet Russia and Persia, all Loans and Advances made by the former to the latter were cancelled. This arrangement included half of the advance 4 although it was the British Government who paid the entire amount here.

The instalments of 1 and 2 are fully paid up, as are the *interests* (only) on 3. No arrangements have so far been made for the repayment of 4, 5, and 6.

Defence.

Prior to the Russian Revolution there was at the capital the 'Cossack Brigade,' of 8 squadrons, 1 infantry battalion, and a battery of 6 (Krupp) guns. The men are Persians, organised and trained by Russian officers. In 1912, Russia obtained the formal consent of the Persian Government to the formation of a similar Cossack Brigade at Tabriz under Russian officers; the consent of the Persian Government was conditional on the withdrawal of Russian troops from Azerbaijan. The 'Cossack Brigade' was in the hands of Russia until the Bolsheviks came into power. The two brigades were in 1919 formed as the Cossack Division and consisted of 56 Russian officers, 202 Persian officers and 7856 Persian rank and file. The chief expense of maintaining the Division was borne by Britain, the balance of rather more than one-third being paid by Persia. In October, 1920, the Russian officers of the Cossack Division were dismissed, and British officers were being chosen to replace them.

At the end of 1920 there were two brigades of South Persia Rifles (47 British officers, 190 Persian officers, 256 British and Indian non-commissioned officers, and 5400 Persian rank and file), with headquarters at Shiraz and Kerman respectively, also a regiment at Bandar Abbas. This force, in which was incorporated a part of the Swedish gendarmerie, was recruited locally and officered and trained by British officers, and forms the only efficient Persian force in Southern Persia.

The Anglo-Persian Agreement of August 9th, 1919, provided for the formation of a uniform Military Force under the command of British officers. This agreement not having been ratified, it lapsed in 1921, and all British officers and men were withdrawn. The South Persia Rifles, which were in effect a British organisation, therefore, ceased to exist. No systematic organisation of the Persian forces has since taken place.

The navy is quite unimportant. The two boats of which it consists are normally used for Customs purposes.

Production and Industry.

Besides wheat, barley, rice, fruits, gums, drugs, wool, cotton, &c., Persia produces much silk. The opium industry, as well as the production of gums, chiefly tragacanth, are increasing. The wool of Khurasan is famous. Persian carpets, of which there are many kinds, are all made by hand. The principal centres of the industry are Tabriz, Hamadan, Sultanabad, and Kerman.

The mineral deposits of Persia are considerable but undeveloped. They include iron, coal, copper, lead, manganese, marble, borax, nickel, and cobalt. Oil is being developed with much success by the Anglo-Persian Oil Company near Ahwaz in the Karun Valley, and borings are being made in the country behind Bushire. Elsewhere in Persia, and in the island of Kishm, there are rich indications of oil. The turquoise mines of Nishapur are worked in a most primitive fashion but with profit, as also are the iron ochre and rock salt in the Persian Gulf.

Commerce.

The principal centres of commerce are Tabriz, Teheran, Hamadan, and Isfahan; the principal ports, Bandar Abbas, Mohammera, and Bushire on the Persian Gulf, and Astara, Enzeli, Mushed-i-sar, and Bandar Gaz on the Caspian. On March 21, 1899, the Government abolished the farm system in

Azerbaijan and Kermanshah, and one year later in all other provinces, establishing at the same time a uniform duty of 5 per cent. *ad valorem* on imports and exports.

According to the statistics published by the Minister of Finance the values of the imports and exports for the six years were as follows :—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1915-16	7,735,000	6,285,577	1918-19	17,010,240	9,531,030
1916-17	14,552,100	12,761,000	1919-20	25,191,704	14,712,692
1917-18	15,602,200	11,290,500	1920-21	14,183,842	10,917,023

The following table shows the distribution of trade in 1920-21 according to categories :—

	Imports		Exports	
	Weight (batman)	Value (krans)	Weight (batman)	Value (krans)
Live animals	—	12,561,426	—	506,539
Food stuffs	24,521,517	207,718,882	9,927,050	20,652,183
Raw materials	10,366,480	31,085,789	459,759,819	286,255,050
Manufactured articles	9,201,819	225,580,931	1,285,981	60,804,932
Precious metals	—	5,404,605	—	2,980,075
Total	—	482,351,633	—	371,198,779

The following table shows (if thousands of Krans : 34 Krans = 1L. in 1920-21 and 25 Krans = 1L. in 1919-20) the values of the chief imports into, and exports from, Persia :—

Imports	1919-20	1920-21	Exports	1919-20	1920-21
	1000* Krans	1000 Krans		1000 Krans	1000 Krans
Cotton tissues.	219,273	115,974	Fruits	29,939	14,655
Sugar	119,121	146,824	Carpets of wool	29,709	49,966
Tea	35,949	25,282	Cotton	4,571	2,343
Gold and silver bars	124	15	Fish, fresh and preserved	637	436
Do. coin	23,331	5,251	Rice	11,622	367
Petroleum	11,739	3,878	Gold and silver coins	5,177	2,978
Yarn	18,257	11,521	Gums	8,889	7,477
Flour	4,772	5,193	Opium	24,166	22,178
Tissues of pure wool	4,035	7,650	Wool	1,408	2,573
Indigo and kermes	3,370	3,708	Cocoons	1,226	10
Haberdashery	10,051	6,766	Skins, raw and prepared	7,227	5,012
Rice	6,824	13,058	Animals	659	507
Spices	5,840	2,696	Silk stuff	1,954	1,868
Wool	396	257	Cotton tissues.	30,826	3,500
Animals	18,860	12,561	Wheat, barley and other cereals	5,451	865
Tissues of silk mixed with cotton	2,603	3,982	Drugs	2,553	3,219
Tin, zinc and lead in bars and sheets	3,719	865	Tobacco, unmanufactured	4,184	3,726
Tobacco, unmanufactured	1,747	934	Petroleum	180,778	233,557
Copper and nickel in bars and sheets	1,896	2,014			

In the years ending March 20, 1920 and 1921, the distribution of the trade of Persia was as follows:—

From or to	Imports		Exports	
	1919-20	1920-21	1919-20	1920-21
	£	£	£	£
Afghanistan	330,450	147,830	98,128	25,640
Germany	5,780	15,800	—	5,150
Austria	2,864	2,200	—	—
Belgium	116	490,000	—	5,660
China	157,324	5,840	11,624	23,520
Egypt	1,465,300	930,600	5,032,612	4,458,900
United States	256,776	150,660	520,396	671,900
British Empire	17,943,114	10,762,570	3,264,168	3,136,430
France and Colonies	106,496	104,480	50,268	58,000
Italy	161,280	66,490	1,336	5,800
Netherlands and Colonies	34,620	308,380	—	346,530
Russia	3,398,028	591,270	3,018,904	253,380
Switzerland	8,964	8,550	—	22,000
Turkey	659,892	757,000	2,063,726	2,667,900
Muscat	23,848	2,300	3,804	5,400
Oman	190,972	113,200	871,336	190,000
Japan	242,952	91,900	248,800	46,630
Mesopotamia ¹	—	193,500	—	1,353,550

¹ Previously included under Turkey.

Of the total trade in the year ending March 20, 1921, the British Empire enjoyed 55 per cent.

Tonnage entered at Bushire, Lingah, Bandar Abbas, Mohammera, and several smaller ports was : in 1920-21, 2,255,445 tons, of which 2,011,431 tons were British. At Caspian Sea ports in 1920-21, 57,621 tons, all Russian.

Total trade between Persia and United Kingdom (Board of Trade returns) for 5 years:—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Persia to U.K.	212,775	1,683,193	3,745,305	6,540,141	8,124,238
Exports to Persia from U.K.	1,274,004	1,661,102	2,206,757	1,511,019	1,702,540

Banking and Credit.

The Shah in 1889 granted a concession to Baron Julius de Reuter for the formation of a State Bank of Persia, with head office at Teheran and branches in the chief cities. The bank was formed in the autumn of the same year, with the title "The Imperial Bank of Persia," and incorporated by Royal Charter, dated September 2, 1889. The authorised capital is 4 millions sterling, which may be increased. The bank started with a capital of one million sterling, of which the greater part was remitted to Persia at the then reigning exchange of 32-34. In consequence of the great fall in silver and the rise in the exchange, to 50 or more, the capital was reduced in December, 1894, to 650,000*l*. The bank has the exclusive right of issuing bank-notes—not exceeding 800,000*l*. without the assent of the Persian Government. The issue of notes is on the basis of the silver krân. In virtue of one of the articles of the concession the cash reserve for the first two years was 50 per cent., and afterwards 33 per cent. There is also established at Teheran

the Russian 'Banque d'Escompte,' formerly 'Banque des Prêts de Perse' (which is connected with the Russian State Bank and floated the loans of 1900 and 1902 to Persia). This Bank, with all its Concessions, was in March, 1921, handed over to the Persian Government by the Soviet authorities.

Communications.

There are several trade routes in Persia:—The Western Trade Route, from Teheran to Baghdad, is the main Persian trade route, running from the railhead of Kuraitu (near Khanikin) by a lightly metalled road to Kermanshah and Hamadan. In the north there are six trade routes, viz., (1) Julfa to Tabriz, 86 miles; (2) Astara to Ardebil, 45 miles; (3) Enzeli to Teheran, 240 miles; (4) Enzeli to Hamadan, 280 miles; (5) Bandar Gaz to Shahrud, 90 miles; and (6) Askabad to Meshed, 90 miles. There are three central trade routes, viz., (1) Teheran to Qum, 90 miles; (2) Qum to Sultanabad; and (3) Qum to Kashan, 60 miles. In the South there are five trade routes, viz., (1) Karun Valley to Isfahan, 200 miles; (2) Bushire to Shiraz and Isfahan, 520 miles; (3) Bandar Abbas to Yazd, 300 miles; (4) Bandar Abbas to Kerman, 310 miles; and (5) Duzdab to Meshed, 500 miles.

A small railway from Teheran to Shah Abdul Azim (six miles) was opened in July, 1888, and is in the hands of a Belgian company, 'Société des chemins de fer et tramways de Perse.' A Russian company has also constructed a railway from Julfa (Perso-Russian frontier) to Tabriz (opened March 7, 1916) 85 miles long; and another from Pirebazar to Resht, 7 miles long. In southern Persia a military railroad, about 52 miles in length, has been constructed from Bushire to Borazjan, in the direction of Shiraz. The railroad from Quetta to Nushki, in India, has been extended to Duzdab. Total railway mileage, 350.

The river Karun at the head of the Persian Gulf has been opened to foreign navigation as far as Ahwaz. It is served by a fortnightly steamship service subsidised by the British Government.

Persia has a system of telegraphs consisting of 6,312 miles of line, with 10,754 miles of wire, and 131 stations.—(1) 1,706 miles of line with 5,318 miles of wire are worked by an English staff, and form the 'Indo-European Telegraph Department,' a British Government department, established in virtue of a number of conventions from 1863 to 1901 between the British and Persian Governments. The last convention was for the construction and working by the British Government of a three-wire line from Kashan to British Baluchistan via Yazd, Kerman, and Bam. Telegraphic communication with India was effected in May, 1904. (2) 457 miles of line with three wires, 1,371 miles of wire between Teheran and Julfa on the Russo-Persian frontier, are worked by the Indo-European Telegraph Company, Limited, according to its concession of 1868. (3) About 4,149 miles of single wire lines belong to the Persian Government, and are worked by a Persian staff.

The first regular postal service, established by an Austrian official in Persian employ, was opened January, 1877. There are 218 post offices. In 1902 the post office was joined to the Customs Department worked by Belgian officials. In August, 1909, posts and telegraphs were placed in charge of a Minister of Posts and Telegraphs, who is a member of the Cabinet, but as to the number of letters, post cards, parcels, &c., conveyed, and telegrams transmitted, very few statistics are obtainable. During the year 1912-13, about 284,000 letters, post cards and newspapers, of which 4,000,000 were registered, were delivered in Persia, and there were 320,000 parcels delivered from Europe via Russia.

Money, Weights, and Measures.

Persia has a silver monetary standard. The monetary unit is the kran, a silver coin weighing only 24 nakhods (71 grains) or somewhat less. The proportion of pure silver was before the new coinage (commenced 1877) 92 to 95 per cent.; it was then fixed at 90, but occasionally coins with only $89\frac{1}{2}$ have been turned out from the Mint. In 1874 a kran had the value of a franc, 25 being equal to 1*l*.

The coins in circulation, with their values calculated at exchange 1*l*. = 50 kran, are:—

Copper.		Silver.	
<i>Pál</i>	0·12 <i>d</i> .	Ten <i>Sháhís</i> = $\frac{1}{2}$ <i>Kran</i>	2·40 <i>d</i> .
<i>Sháhí</i> = 2 <i>Pál</i>	0·24 <i>d</i> .	One <i>Kran</i> = 20 <i>Sháhís</i>	4·80 <i>d</i> .
Four <i>Sháhís</i> = (1 <i>Abbásí</i>)	0·96 <i>d</i> .	Two <i>Kran</i>	9·60 <i>d</i> .
Five <i>Sháhís</i> = 10 <i>Pál</i> = $\frac{1}{4}$ <i>Kran</i>	1·20 <i>d</i> .	Five <i>Kran</i>	2 <i>s</i> . 0·00 <i>d</i> .

Copper is out of circulation. In consequence of an excess of coinage by a former mint-master the copper money greatly depreciated in value since 1896 and was circulating at less than its price of copper, viz. 80 to 83 copper shahis (weighing about $\frac{1}{4}$ lb.) to one silver kran ($4\frac{1}{2}$ *l*.). The Government then decided to introduce a nickel coinage instead; great quantities of five and ten centime pieces, of same size and weight as those current in Belgium, and of the nominal value of $\frac{1}{20}$ and $\frac{1}{10}$ kran, were coined at Brussels and put into circulation in the autumn of 1900.

Gold coins are: $\frac{1}{4}$ *Toman*, $\frac{1}{2}$ *Toman*, 1 *Toman*, 2, 5 and 10 *Tomans*, but they are not in circulation as current money, because of their ever-varying value in *Kran* (silver) and no coins of the higher values have been struck for some years. They are a commodity and are used for presents and hoarding. A *Toman* in silver is the equivalent of 10 *kran* (now worth 3*s*. 4*d*.), but a gold *Toman* has a value of 22 *Kran* (7*s*. 4*d*.).

Accounts are reckoned in *dinârs*, an imaginary coin, the ten-thousandth part of a toman of ten *kran*s. A *kran* therefore = 1,000 *dinârs*; one *sháhí* = 50 *dinârs*.

The unit of weight is the *miskâl* (71 grains), subdivided into 24 *nakhods* (2·96 grains) of 4 *gandum* (·74 grain) each. Sixteen *miskâls* make a *sir*, and 5 *sir* make an *abbâsí*. Most articles are bought and sold by a weight called *batman* or *man*. The *mans* most frequently in use are:—

<i>Man-i-Tabriz</i> = 8 <i>Abbâsí</i>	640 <i>Miskâls</i>	= 6·49 lb.
<i>Man-i-Noh Abbâsí</i> = 9 <i>Abbâsí</i>	720	" = 7·30 "
<i>Man-i-Kohneh</i> (the old man)	= 1,000	" = 10·14 "
<i>Man-i-Sháh</i> = 2 <i>Tabriz Mans</i>	= 1,280	" = 12·98 "
<i>Man-i-Rey</i> = 4 <i>Tabriz Mans</i>	= 2,560	" = 25·96 "
<i>Man-i-Bandar Abbâsí</i>	= 840	" = 8·52 "
<i>Man-i-Hâshemi</i> = 16 <i>Mans</i> of.	720	" = 116·80 "
Corn, straw, coal, &c., are sold by <i>Kharvâr</i> = 100 <i>Tabriz Mans</i>		= 649·142 "

The unit of measure is the *zar* or *gaz*; of this standard several are in use. The most common is the one of 40·95 inches; another, used in Azerbaijan, equals 44·09 inches. A *farsakh* theoretically = 6,000 *zar* of 40·95 inches = 3·87 miles. Some calculate the *farsakh* at 6,000 *zar* of 44·09 inches = 4·17 miles. It is about $3\frac{1}{2}$ miles in South Persia and about 4 miles in the North.

The measure of surface is *jerib* = 1,000 to 1,066 square *zar* of 40·95 inches = 1,294 to 1,379 square yards.

Diplomatic Representatives.

1. OF PERSIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Mirza Davood Khan, Miftah-es-Saltaneh, K.C.M.G. (appointed November, 1920).

Counsellor.—Prince Nader Mirza, Arasteh.

First Secretary.—Fathollah Khan Noury, Monazam-es-Saltaneh.

Second Secretaries.—Gholam Ali Khan Ardalani and Abdol Hossein Khan Ansari.

Third Secretary.—Ebrahim Khan Gharagozlu.

Attaché.—Mirza Abdol Hossein Khan Meftah.

Honorary Attachés.—Gholam Hossein Khan Sadri, Farid-es-Saltaneh, and Prince Anowshiravan Mirza Salour.

Consul-General.—Sir Harry S. Foster.

2. OF GREAT BRITAIN IN PERSIA.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Percy I. Lorraine, Bart., C.M.G. Appointed October 1, 1921.

Acting Counsellor.—E. St. J. D. Mounson.

Secretaries.—R. H. Hadlow and M. H. Huxley.

Military Attaché.—Lt.-Col. M. Saunders, D.S.O.

Acting Oriental Secretary.—G. T. Havard.

There are Consular representatives at Teheran, Tabriz (C.), Resht, Bushire (C. G.), Bandar Abbas, Meshed (C.-G.), Istahan (C.-G.), Sestan, Kerman, Mohammera, Shiraz, Kermanshah, Hamadan, Yezd, Ahwaz, Sultanabad.

Statistical and other Books of Reference concerning Persia.

1. OFFICIAL PUBLICATIONS.

Blue Books.—Affairs of Persia, December 1906, to November 1908, 1909, 1910, 1911, 1912, 1913, and 1914.

Eastern Persia: an Account of the Journeys of the Persian Boundary Commission, 1870-72. 2 vols. 1876.

PERU.

(REPÚBLICA DEL PERÚ.)

Constitution and Government.

THE Republic of Peru, formerly the most important of the Spanish Viceroyalties in South America, issued its declaration of independence July 28, 1821; but it was not till after a war, protracted till 1824, that the country gained its actual freedom from Spanish rule. The Republic is politically divided into departments, and the departments into provinces. According to the Constitution of January 18, 1920, the legislative power is vested in a Senate (35 members) and a House of Representatives (110 members), and renewed totally every five years. The number of senators and deputies can only be altered by reform of the Constitution. An organic law designs the departmental and provincial electoral districts, and the number of senators and deputies which corresponds to each of them. Both senators and deputies are elected by a direct vote. Congress meets annually on July 28, and sits for 90 to 120 days. It may be summoned as often as necessary, but no extraordinary session may last more than 45 days.

The executive power is entrusted to a President, elected for 5 years and not re-eligible till after another 5 years. He receives 30,000 soles (3,000*l.*) a year and an amount for administration expenses, fixed by Congress each year. There are two Vice-Presidents, who take the place of the President only in case of his death or incapacity, and they are elected for 5 years. The Vice-Presidents receive no salary as such. The President and Vice-Presidents are elected by direct vote.

President.—Señor Augusto B. Leguía, who assumed the Presidency by means of a *coup d'état* on July 4, 1919. His position was afterwards confirmed and legalised by Congress, and the President took the oath on October 15, 1919, for the term 1919-24.

The President exercises his executive functions through a Cabinet of five ministers, holding office at his pleasure. The ministers are those of the Interior, War, Marine, Foreign Affairs, Justice, with Worship and Instruction, Finance and Public Works. Each minister receives 16,800 soles (1,680*l.*) a year. None of the President's acts has any value without the signature of a minister.

The departments are divided into provinces (113 in all), and these are subdivided into districts (930 in all). Each department is administered by a Prefect, and each province by a Sub-Prefect. There are three regional congresses in the country, one in the north, a second in the centre, and the third in the south. Deputies to these legislatures are chosen by the provinces. Municipal councillors are elected by direct vote, and foreigners are eligible.

Area and Population.

There has been no enumeration of the population in recent years. The census returns of 1862 showed a total population of 2,487,916; that of 1876 put the number at 2,660,881, of whom about 13·8 per cent. were white, 1·9 per cent. negroes, 57·6 per cent. Indian, 24·8 per cent. mestizos (Cholos and Zambos), and 1·9 per cent. Asiatic, chiefly Chinese. An estimate in 1921 gives the population in that year as 5,550,000.

The population of the capital, Lima, according to the official census of December 17, 1920, was 176,467; Callao 52,843, Arequipa 35,000 to 40,000, Cuzco 10,000 to 15,000, Iquitos district 12,000, Ayacucho 14,346, Huaráz 7,646, Huacho 6,283.

The Republic (including Tacna) is divided into 19 departments and 3 provinces (Callao, Tumbes and Moquegua), the areas of which, according to estimates supplied by the Lima Geographical Society, are given below with the population, according to the census returns of 1876 (the latest official one) and an estimate for 1896. The estimate, however, is not to be accepted as satisfactory, grave doubts being entertained whether the population is increasing. The chief towns are shown in brackets:—

Departments and Provinces	Area : English square miles	Population		Pop. per square mile, 1896
		1876 (census)	1896 (estimated)	
<i>Departments :</i>				
Amazonas (San Carlos)	13,943	34,284	70,676	5·0

² Created in 1912.

³ Province of Callao, pop. (1920) 52,843.

There are, besides, many uncivilised Indians, but their numbers are absolutely unknown. The Peruvian Government encourages immigration

of properly qualified persons, but would-be settlers entirely destitute of capital are mentioned as undesirable.

As a result of the war with Chile, the latter country has annexed the province of Tarapacá. The Chileans have also, under the Treaty of Ancon of March 8, 1884, occupied the provinces of Tacna and Arica since 1883. A popular vote should in 1894 have decided to which country they are to belong, but owing to the failure of negotiations for arriving at a *modus operandi*, the decision was deferred. In December, 1921, the Chilean Government invited the Government of Peru to concur in the holding of the plébiscite. The Government of Peru, however, suggested a settlement by arbitration, and in January, 1922, the Government of the United States invited Peruvian and Chilean delegates to Washington to discuss the Tacna-Arica controversy. In March, 1922, both parties agreed to this proposal.

As to the boundary dispute with Bolivia an arrangement has been come to by direct negotiations between Bolivia and Peru. The frontier line between them was fixed from the mouth of the Heath to that of the Yaverija (1912), and finally demarcated by a joint commission. Those with Colombia and Ecuador were referred to the King of Spain. The question at issue concerned the possession of over 100,000 square miles of land rich in rubber, timber, and probably gold lying about the head waters of the Amazon. The King, on the evident unwillingness of Ecuador to decide the dispute by arbitration, renounced his functions as arbitrator in November, 1910. The United States then intervened, and hostilities were for the moment averted by the agreement of the disputants to accept the mediation of the United States, Argentina, and Brazil. A definite arrangement has been made with Brazil as to boundary, favourable, on the whole, to Peru.

The region north of the Marañon from the Pongo de Manseriche is claimed by Ecuador and Colombia and Peru. This region formed in the Spanish Colonial days the Comandancia de Maynas, and was allocated to the Virreynato of Santa Fé, then to the Audiencia of Quito, and for religious and ecclesiastical purposes subject to the Archbishop of Lima. It has been occupied by Peru since 1840.

Religion.

By the terms of the new Constitution (January 18, 1920) there exists absolute political and religious liberty. The Roman Catholic religion is the religion of the State. There is a Roman Catholic archbishopric (Lima, dating from 1545), 13 bishoprics, 2 Apostolic Vicarages, and 2 Apostolic Prefectures. The ecclesiastical division of the country is (1920) into 105 vicarages, 60 rectories, 616 parishes and 681 sub-parishes. The churches and convents are the property of the State. In 1920, 19,685% were voted for public worship, and 660% for missions. In 1897 an Act was passed enabling non-Catholics to contract civil marriages. In 1903 an Act was passed giving still greater facilities for the marriage of non-Catholics.

Instruction and Justice.

By the law of February 5, 1921, elementary education is compulsory for both sexes between the ages of 7 and 14, and is free. In 1920, there were in Peru 3,338 primary schools with 5,059 teachers and 194,701 pupils. There were also in 1920, 29 Government high schools, with 6,669 pupils and 372

teachers. Secondary schools are either general or vocational. Higher education is provided at the central university in Lima, called 'Universidad de San Marcos,' founded by Charles V. in 1551; it had in 1920, 1,308 students in five faculties. There are also universities at Arequipa (founded in 1827), Cuzco (165 students in 1921), and Trujillo; while the Education Law of February 5, 1921, created the University of Technical Schools, which comprises advanced schools of engineering, agriculture, commerce, industrial arts, and a school of pedagogy.

Justice is administered in the Supreme Court at Lima composed of 11 judges and 3 fiscals, and in Superior and Minor Courts at Lima and 11 other judicial districts. The judges of the Supreme Court are chosen by Congress from lists of names presented by the Government; those of the Superior Courts and of the Minor Courts are chosen by the Government from lists of names presented by the Supreme and Superior Courts, respectively.

Finance.

For the collection of the dues on alcohol, opium, tobacco, stamped paper for official uses, legacy and property transfer dues, etc., a new syndicate was formed under Government approval called the *Compañía Recaudadora de Impuestos* (the Tax Collecting Company), which began operations on the 1st April, 1913, making a loan to the Government, as a condition of its contract, of 1,245,000*l.*, which sum is to earn 1 per cent. interest per annum. The Company retains 115,000*l.* for administration expenses as also 1 per cent. of the profits.

Salt is a Government monopoly created originally (1896) for the purpose of raising a fund for the ransom of the Provinces of Tacna and Arica. Latterly, however, the *Compañía Recaudadora de Impuestos* has undertaken, as one of the stipulations of its contract, to furnish the Government at any given moment with the necessary sum to make the service of amortization and interest of a loan it may contract for the ransom of the Provinces mentioned. This monopoly produced a net revenue of 313,706*l.* in 1920.

The revenue and expenditure for 5 years (ended May 31) were as follows (10 soles = 1*l.*):—

	1918	1919	1920	1921	1922
Revenue	£ 4,892,461	£ 6,154,171	£ 8,087,297	£ 5,479,690	£ 6,164,750
Expenditure	4,693,343	5,799,981	7,481,803	5,666,713	6,033,740

The foreign debt of Peru was made up of two loans, contracted in England in 1870 and 1872, amounting to 32,688,320*l.* In 1876 Peru was forced to suspend payments on its external debt, and in 1889 the debt, including arrears of interest, amounted to 55,209,133*l.* In January, 1890, by the signing of the Grace-Donoughmore contract, the Committee of Peruvian Bondholders assumed all responsibility for the foreign debt of Peru, and in return the Peruvian Government granted that organisation certain concessions (rights over guano deposits, mines, and lands) and the control of all State railways, for a period of 66 years. The Peruvian Corporation was then created by the Committee of Peruvian Bondholders to administer these concessions. In 1907 a new contract was effected between the Peruvian

Corporation and the Peruvian Government by which certain disputes were adjusted and under which the railway lease was extended for an additional 17 years, during which time the Government was to receive 50 per cent of the net profits resulting from the operation of the railways after the service of the corporation's railway bonds had been met. The Government extended the contract with the Peruvian Corporation for 10 years from September 11, 1911.

The total debt of Peru (June 30, 1921) amounted to 7,837,774L., of which the internal debt amounted to 4,641,290L., the foreign debt to 934,840L., and the floating debt to 2,261,644L.

In 1919 a law was passed authorising the President to issue at par bonds of the International Consolidated Debt of a nominal value of 2,000,000 Peruvian pounds redeemable in 31 years by semi-yearly drawing, bearing interest at the rate of 7 per cent. per annum.

Defence.

ARMY.

Military service is compulsory and universal, though only a limited number of the annual quota of conscripts is called up for active duty with the colours, the remainder being formed into local battalions, who receive instruction one day in the week (Sundays). The term of service is 2 years in the active army, 5 years in the first reserve, 5 in the second reserve, and 20 years in the National Guard.

The country is divided into 5 military districts, each furnishing a complete division, with the exception of the 5th "Amazonian District" which consists of only local garrisons quartered at various points of strategical and commercial importance. The division is made up of 2 regiments of infantry of 2 battalions each, with 1 machine gun company; in addition there is 1 light infantry company per division, which can be turned into a mounted infantry company in case of necessity; 1 engineer company (railway and labour), 1 topographical section, 1 medical section, 1 commissariat section, 1 or 2 regiments of cavalry (2 squadrons), 1 regiment of mountain artillery.

The army at present is organized as follows: of infantry there are 13 regiments, including 1 labour regiment; of cavalry, 7 regiments, including the Presidential bodyguard; and of artillery, 4 regiments of mountain, artillery, 1 regiment of coast defence artillery, and 1 group (2 batteries) of field artillery. In addition the military school furnishes 1 battalion of infantry, 1 regiment (2 squadrons) of cavalry, 1 group of mountain artillery.

The peace establishment of the army is 8,000. Police and gendarmerie amount also to about 8,000 including civil guards and mounted police.

The General Staff is quartered at Lima, and is composed of 3 sections, a geographical department, commissariat, medical and engineer services.

The infantry is armed with the 1912 Peruvian model of the Mauser rifle, cavalry with carbine of the same type and model, artillery with the Schneider-Canet gun.

Aviation is controlled by a Director-General of Aviation, responsible for military, naval and civilian aviation. There are three training centres, 1 military, 1 naval, and a military controlled civilian school.

NAVY.

The Peruvian Navy consists of the following units:—2 (old) light cruisers, *Almirante Grau* and the *Coronel Bolognesi*, 3,200 tons, 24 knots speed, each with 2·6 inch and smaller guns, which were launched at Barrow in 1906; 1 converted auxiliary cruiser, *La Lima*, 1 destroyer and 2 submarines. In addition there is a river flotilla on the Amazon consisting of six vessels.

Military instruction in Peru is in charge of a French military mission, and that of the navy under an American naval mission. Aviation instructors are all ex-R.A.F. officers.

Agriculture and Industry.

The country may be divided into three zones: the coast strip, with an average width of 30 miles; the Sierra, or Uplands, lying between the coast range of mountains and the Andes proper; and the forest or wooded region, called the Montaña. The chief agricultural productions of Peru are sugar, cotton, coffee, wool, hides, and skins. The cotton area in 1919 was 222,160 acres; cotton production in 1921 was 36,000 tons. The chief coffee-growing districts are those of Chanchamayo, Perené and Paucartambo in Central Peru, where the Peruvian Corporation has done much useful colonising work. Coffee is also grown in the Huanuco district. The concession to the Corporation comprises about 2,750,000 acres, but the labour and transport difficulties in the tropical forest region are serious; much less than half the area conceded for colonisation is as yet occupied. The sugar industry, the most important in the country, is carried on chiefly in the coast region. The area devoted to cane cultivation was given in 1921 as 100,000 acres approximately, and the number of labourers in the industry as 23,456. In 1918, 287,480 tons were produced; in 1921, 300,000 tons. Cocoa cultivation is extending, about 200,000 cocoa trees having been recently planted in the Perené region. Wheat in 1919 was grown on 373,546 acres, which produced 71,647 tons. Rice is extensively grown; in 1919 the area was 72,555 acres; the production in 1919 was 63,790 tons; in 1921, approximately 31,000 tons. The quality is excellent, but the quantity is insufficient to meet local wants. There are about 20 rice mills in the country. Tobacco, wines and spirits, olives, ramie, rubber, and maize are also produced. In 1909 the Government created a tobacco monopoly for the manufacture, importation and sale of tobacco. This industry is conducted by an organisation known as the *Compañía Recaudadora de Impuestos, Estanco del Tabaco*, at Lima. Silk culture is being tried in the coast region. The most important coca growing district is in the province of Otuzco in the department of La Libertad, where there are several coca estates. Cocaine is manufactured in Lima, Otuzco, and several other towns. Besides, there are in the country dyes, cinchona, and other medicinal plants. There is a large export of alpaca, sheep, and llama wool. Thousands of square miles of healthy and fertile land on the eastern slopes of the Andes are available for colonisation.

The guano deposits on Huanillos, Punta Lobos, and Pabellón de Pica, which had been delivered over to the Peruvian Corporation, reverted to the Chilean Government on February 2, 1901; they contained 40 or 50 thousand tons of guano; but those on the island of Lobos de Afuera, and at some places on the coast, still remain in possession of the Corporation. In 1919 a new company was set up by the Government for the administration

of guano. In the 1920-21 season 69,685 Spanish ton loads of guano were extracted.

The following table shows the mineral production for two years:—

		1920		1921	
		Quantity	Value	Quantity	Value
			£		£
Copper	Metric tons	32,982	2,358,243	33,284	2,178,407

¹ The value after the petroleum has been refined.

Commerce.

The value of the trade of Peru in five years (including the Department of Loreto) has been as follows (10 soles = 1£) :—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports	13,502,851	9,705,113	12,203,840	18,358,223	15,521,706
Exports	18,643,414	19,972,595	26,899,422	33,304,155	15,700,616

The values of the principal imports and exports for 2 years are shown by the following table :—

Imports		1919	1920	Exports		1919	1920
		£	£			£	£
Cottons		899,748	1,497,187	Sugar		8,310,770	15,584,889
Provisions, etc.		1,781,486	4,148,877	Cotton		6,656,845	11,190,061
Machinery		2,247,771	1,952,338	Copper		4,812,929	3,625,280
Metals		1,511,788	2,235,285	Petroleum		2,320,819	1,430,953
Woollens		841,330	919,766	Wool		1,631,644	855,145

The distribution of the trade was mainly as follows (10 soles = 1*l.*):—

From or to	Imports		Exports	
	1919	1920	1919	1920
	£	£	£	£
U.S. America	7,549,655	10,168,937	12,499,234	16,265,092
United Kingdom	1,645,946	2,694,195	8,441,341	12,681,632
Germany	111	312,986	50,584	15,281
Belgium	—	80,970	1,763	58,628
Italy	111,616	411,235	52,504	52,257
France	153,017	546,861	384,499	840,035
Chile	682,630	1,039,876	3,231,635	3,214,415

Custom receipts in the year ending June 30, 1921, amounted to 3,594,927*l.*; in 1921-22 to 1,527,939*l.*

Under the treaty of 1850 there is reciprocal freedom of commerce and navigation between the United Kingdom and Peru.

Total trade between Peru and United Kingdom in thousands of pounds for 5 years (Board of Trade returns):—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Peru to United Kingdom	8,047	8,897	14,619	6,441	7,410
Exports to Peru from United Kingdom	1,630	1,700	4,733	2,149	1,749

Shipping and Navigation.

At Callao there entered, in the foreign trade, in 1921, 575 steamers of 1,554,388 tons, and cleared 572 of 1,523,090 tons. Of the total entering, 179 steamers were British, 106 Chilean, 162 Peruvian, 25 Japanese, and 112 United States. Since 1886, foreign sailing vessels may not engage in Peruvian coasting trade; but foreign steamers, with special authorisation, may.

The merchant navy of Peru in 1920 consisted of 15 steamers (over 100 tons) with 14,248 tons; 37 sailing vessels (over 100 tons) with 23,368 tons; and 108 barques with 2,915 tons.

Internal Communications.

At the end of 1919 there were in the country 347 miles of road suitable for motor traffic, 90 miles under construction, and 141 miles planned, making a total of 578 miles.

In 1920 the total working length of the Peruvian railways was 1,984 miles, 1,385 miles being State railways under the control of the Peruvian Corporation. These include (1) the Peruvian Central (Oroya) Railway, from Callao and Lima to Huancayo, 249 miles; (2) the Southern Railway of Peru, from Mollendo to Puno, 326 miles; from Juliaca, 30 miles from Puno, the Cuzco section strikes off northward for 210 miles; (3) the Paita to Piura Railway, 60 miles; (4) the Pacasmayo to Guadalupe Railway, 63 miles; (5) the Pisco to Ica Railway, 46 miles. All the lines are standard gauge railways (4 ft. 8½ in.), with the exception of the Trujillo Railway (75 miles long) between Salaverry and Ascope, and the Chimbote Railway (36 miles) between Chimbote and Tablones, which are 3 ft. gauge, and the Guaqui to La

Paz Railway, which is a metre gauge line. A small Government line connecting up Lima with the Port of Chilca, a short distance south of Callao, is being constructed.

By an agreement (March, 1921) between the Peruvian Government and the Marconi Company, the latter undertakes the administration of the posts, telegraphs, and wireless services for a period of 25 years from May 1, 1921. There were 326 telegraph offices in 1920. The length of State telegraph lines on December 31, 1920, was 8,817 miles. Number of telegrams (1919) 956,223 despatched and 1,061,326 received. Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the Republics to the north. Wireless communication between Iquitos and Masisea, and between Iquitos and Puerto Bermudez was inaugurated July 8, 1908. In 1919 Peru had 19 wireless stations.

In 1920 there were 723 post offices; letters and packets handled, 26,320,053 in the home service and 7,067,863 in the international service.

Money and Credit.

A decree was issued by the President of the Republic on January 10, 1898, to give effect to the law of December 29, 1897, establishing a gold currency. By Act of December 14, 1901, gold became the only standard. The national gold coin, the *libra*, is of the same standard and weight as the pound sterling, which is also legal tender; 10 soles = 1*l.* sterling. Gold coins are the pound, the half pound, and the fifth of the pound. Silver is legal tender up to 100 soles. Silver coins are the sol, half-sol, and 20, 10, and 5 cents. Copper coins are 2 and 1 cent.; and nickel coins 20, 10, and 5 cents. Peru has no paper currency issued by the Government, but since the outbreak of the European War (1914) an issue in notes has been made by a number of banks with the sanction of Congress, the total on December 31, 1920, being 7,763,162*l.*, of which 5,936,389*l.* are in circulation.

These notes (10*s.*, 1*l.*, 5*s.* and 10*l.*) are guaranteed by the several banks with 20 per cent. bullion and 80 per cent. in approved bonds, shares and other securities deposited by them in their vaults and subject to Government supervision; they are by law declared legal substitute for the gold *£*. The actual amount of gold coin held in deposit on December 31, 1920, was 4,282,894*l.*

The scarcity of silver coins made it necessary to issue paper notes of the value of 50 cents. These are being replaced by nickel, which issue amounted on December 31, 1920, to 221,242*l.* Notes of 50 cents remaining in circulation on the same date, 291,114*l.*

On December 31, 1920, the currency of the Republic was as follows: Gold on hand in the banks, 403,792 Peruvian pounds; silver on hand, 1,194,833 soles; gold certificates and banknotes, 7,541,920 pounds; and nickel, 2,212,427 soles.

On October 10, 1921, a Bill was introduced into the Senate for the establishment of a Government bank, to be known as the Banco de Reserva del Perú. The Bill became law in January, 1922.

In Peru the commercial banks are: the Bank of Peru and London (capital, 500,000*l.*), the Italian Bank, the International Bank of Peru, the American Mercantile Bank (founded in 1916), and the Banco Popular, the Caja de Depositos y Consignaciones, the Banco Alemán Transatlántico, and the Caja de Ahorros de la Beneficencia de Lima, a savings bank with deposits amounting to over 200,000*l.* The Anglo-South American Bank and the National City Bank of New York opened branches in Peru in 1919.

On June 30, 1921, the paid-up capital of all the banks amounted to 1,960,000*L.*, the reserves to 756,429*L.*, and the deposits to 13,914,226*L.*

Money, Weights, and Measures.

The gold coin is the *Libra*=the English sovereign. The coinage of gold 5-sol pieces (equivalent to half-sovereigns) has been authorised. Silver coins are the *Sol* (10 soles=1 libra), $\frac{1}{2}$ sol, $\frac{1}{4}$ sol, $\frac{1}{8}$ sol, $\frac{1}{16}$ sol. Bronze coins are 1 and 2 *centavo* pieces (100 centavos=1 sol). Nickel coins are also in circulation.

The <i>Ounce</i>	=	1.014 ounce avoirdupois.
„ <i>Libra</i>	=	1.014 lb. „
„ <i>Quintal</i>	=	101.44 lb. „
„ <i>Arroba</i>	{	of 25 pounds	.	.	=	25.36 „ „
		of wine or spirits	.	.	=	6.70 imperial gallons.
„ <i>Gallon</i>	=	0.74 „ gallon.
„ <i>Vara</i>	=	0.927 yard.
„ <i>Square Vara</i>	=	0.835 square yard.

The metric system of weights and measures was established by law in 1869, and is coming into general use, except for the customs tariff. It came into force in Lima and Callao on September 1, 1916.

Diplomatic Representatives.

1. OF PERU IN GREAT BRITAIN.*

Chargé d'Affairs.—Dr. Ricardo Rivera Schreiber.

Attachés.—Pablo E. Caballero, J. F. Mareategui, and Miguel Lembeke.

Consul-General (London).—Oscar Salomon.

There are Consular representatives at Belfast, Cardiff, Dublin, Dundee, Glasgow, Liverpool, Queenstown, Southampton, and other places.

2. OF GREAT BRITAIN IN PERU.

Envoy and Minister.—Arthur Grant Duff. (1920.)

Consul at Callao.—H. A. Richards.

There is a Vice-Consul at Callao, a Consul at Iquitos; Vice-Consuls at Lima, Arequipa, Mollendo, Salaverry and Paíta districts.

POLAND.

(RZECZPOSPOLITA POLSKA.)

POLAND was an independent State until the end of the eighteenth century. The Poles are Slavonic in race and Roman Catholic in religion.

During the seventeenth century the position of Poland rapidly declined, and eventually, by the three partitions of 1772, 1793, and 1795, the Polish Commonwealth, as it was then called, was divided between Prussia, Russia and Austria.

In 1807, Napoleon formed a part of the Old Commonwealth into a semi-independent State under the title of the Duchy of Warsaw and endowed it with a very liberal constitution, but in 1815, at the Congress of Vienna, this was undone, and Poland was re-partitioned between Prussia, Austria and Russia, except the small district of Cracow, which was constituted an independent republic and remained such until 1835, when it was annexed by Austria, despite a guarantee of neutrality by Prussia, Austria and Russia.

At the outbreak of the Great War in 1914, only one portion of Poland enjoyed autonomous government, viz., that annexed by Austria. Austrian-Poland was governed by the Galician Diet at Lwow (Lemberg), under the control of the Central Government in Vienna.

During the war Russian-Poland was invaded by the Germans and Austrians, and by the end of 1915 the whole country was occupied by the Austro-German forces.

On November 5, 1916, the German and Austrian Emperors, in a joint manifesto, proclaimed the independence of Poland, but neither the boundaries nor the constitution of the State were defined. Shortly afterwards a Provisional Council of State, consisting of 25 members, all Poles, was summoned in order to draft the constitution of the new State, but this body did not exist for long. In September, 1917, a new Supreme Authority, the Regency Council, consisting of three members, was appointed, and under their auspices a Ministry was formed and a new Council of State summoned. It was composed partly of elected and partly of appointed members, 110 in all. In October, 1918, this Council of State was dissolved by the Regency Council and the convocation proclaimed a Constituent Assembly to determine the constitution of the Polish State and take over the supreme authority.

On November 9, 1918, the Independence of Poland was solemnly proclaimed. On November 14, General Pilsudski, freed from the Magdeburg prison, returned to Poland, assumed Supreme Power and convoked the Constituent Assembly (*Sejm Ustawodawczy*), which confirmed him in his office. On June 28, 1919, the Treaty of Versailles recognised the Independence of Poland.

President.—Stanislaw Wojciechowski, born on March 15, 1869, in Kalisz, known as leader of the Polish co-operative movement, elected second President of the Polish Republic on December 20, 1922.

Constitution and Government.

The Constitution of the Polish Republic adopted by the Sejm (Parliament) on March 17, 1921, contains the following fundamental principles: The franchise will be universal for both sexes, the voting age being 21. Soldiers and Government officials are excluded from voting. There are two chambers, a Diet and a Senate, both elected by general suffrage on the system of proportional representation. The President (*Prezydent Rzeczypospolitej*)

convenes, opens, prorogues and closes the Sejm. It is the President's duty to convene the Sejm for an ordinary session each year before the month of November. The President is the Supreme Commander of the army, except in time of war. He is elected for a term of seven years by the Diet and Senate united in a National Assembly. He can make treaties with foreign Powers. In the case of the President's death, his duties are to be assumed by the Speaker of the House. Any Polish citizen of 41 years of age may be elected President. The President is not responsible either politically or personally, and therefore all his acts must be countersigned by a Minister. Freedom of conscience is granted to all citizens; and all citizens are equal before the law. Every citizen also has the right of preserving his nationality and developing his mother tongue.

The decree of July 28, 1922, divides Poland into 64 electoral districts, returning altogether 444 deputies for the Sejm, and 111 for the Senate. At the elections held on November 5 and 12, 1922, the following parties were returned:—Lower House: National Christian Union, 163; Centre Party, 6; Moderate Peasant Party, 6; Radical Peasant Party, 49; Polish Socialist Party, 41; National Labour Party, 18; Independent Peasant Groups, 7; Ruthenian Peasant Party, 5; Bloc of National Minorities, 83; Communists, 2.

Senate: National Christian Union, 52; Moderate Peasant Party, 14; Radical Peasant Party, 9; Polish Socialist Party, 7; National Labour Party, 2; Bloc of National Minorities, 21; Independent, 6.

The Executive (appointed December 16, 1922, called the Council of Ministers (*Rada Ministrów*)) consists of the following departments:—

Prime Minister and Minister of the Interior.—General Władysław Sikorski.

Minister for Foreign Affairs.—Aleksander Skrzynski.

Minister of Commerce and Industry.—Stefan Ossowski.

Minister of Finance.—Władysław Grabski.

Minister of Transport.—Ludwik Zagorzy-Marynowski.

Minister of Agriculture.—Józef Raczyński.

Minister of Labour.—Ludwik Darowski.

Minister of Justice.—Wacław Makowski.

Minister of Education.—Józef Mikulowski-Pomorski.

Minister of War.—General Kazimierz Sosnkowski.

LOCAL GOVERNMENT.

Local government, municipal as well as rural, has not yet (March, 1923) been unified. The Polish Constitution provides for the granting of a wide measure of autonomy to County Councils. The county of Silesia and the counties of Lwów, Stanisławów and Tarnopol, all with a mixed population, have already received their autonomous status. A uniform system for all the remaining counties of Poland is in course of elaboration.

Area and Population.

The territory of Poland comprises Congress Poland (i.e. Poland as delimited and handed over to Russia by the Congress of Vienna, 1815), Galicia, the former Prussian Poland, Upper Silesia, and a portion of the Wilno (Vilna) territory. The Republic is divided into 16 counties (*województwo*), subdivided into 276 districts (*powiaty*), and self-governing cities (*wolne miasta*). It comprises an area of 380,268 sq. kilometres (or 146,821 sq. miles), and a total population of 27,092,025.

The first census was taken in Poland on September 30, 1921, and the following table shows the area and population of the counties :—

County	Area in sq. miles	Population (Census 1921)	County	Area in sq. miles	Population (Census 1921)
City of Warsaw	47	931,176	Pomorze . .	6,327	939,495
Warsaw . .	9,000	2,112,106	Cracow . .	6,735	1,990,399
Lodz . .	7,349	2,251,097	Lwow . .	10,434	2,718,856

Nowogrodek . .	14,261	1,300,069	Silesia . .	1,634	1,125,537
Wolyn . .	11,561	1,433,157	Military persons	—	250,000 ¹
Polesia . .	16,009	876,665	Total . .	146,821	27,092,025
Poznan . .	10,271	1,974,057			

¹ Approximately.

Population of principal towns (1921) :—

Warsaw . . .	931,176	Czestochowa . .	80,567	Grodno . . .	34,916
Lodz . . .	451,813	Bialystok . .	76,971	Kalsz . . .	44,753
Lemberg (Lwow) . .	219,193	Lublin . . .	94,478	Dabrowa . .	39,840
Cracow . . .	181,700	Radom . . .	61,629	Kolomyja . .	41,440
Posen . . .	169,793	Kattowicz . .	47,422	Thorn . . .	39,419
Bydgoszcz . .	87,848	Bromberg . .	57,696	Kielce . . .	41,357
Sosnowice . .	86,698	Przemysl . .	48,017	Zawiercie . .	42,700

The density of population is 185 to the square mile. Ratio of males to females (1921) 100 to 110. Of the total population 25 per cent. is urban; engaged in agriculture, 65 per cent.; in mining industry, 14 per cent.; in trade, 8 per cent.

Emigration is chiefly to the United States and Canada (90,101 and 7,629 respectively in 1921). The Polish population in America is estimated to be over 4,000,000.

Religion.

The great majority of the population profess the Roman Catholic faith, but there is no established church in Poland and all denominations enjoy equal rights, though Article 117 of the Constitution declares Roman Catholicism to be the dominant religion.

Poland is divided into the following Catholic Dioceses: the Metropolitan Archbishopric of Warsaw, the Archbishoprics of Lemberg and Posen, the Bishoprics of Cracow, Wloclawek, Plock, Lublin, Sandomir, Kielce, Sejny, Przemysl, Tarnow, Vilna, and an Apostolic Administration of Katowice (Kattowitz) for Polish Silesia. The Greek Catholic Church has an Archbishopric in Lemberg and two Bishoprics, Przemysl and Stanislawow. Since 1922 there is an Exarchate of the Russian Orthodox Church in Warsaw. The Armenian Catholic Church has a Bishopric in Lwow.

The Roman Catholic Church has 5,965 churches and 8,142 priests; the Greek Catholic Church, 3,275 churches and 2,413 priests; the Greek Orthodox Church, 494 churches; the Armenian Church, 12 churches and 18 priests; the Protestants, 604 churches and 590 ministers.

Instruction.

The educational system of Poland has not yet been unified. All education is free, and elementary education is compulsory. The following statistics are for the Republic (except Wilno and Silesia):—Elementary schools (1920–21), 24,996, of which 21,096 were public, and 3,900 were private, with 43,427 teachers and 2,566,306 pupils. Secondary schools (1921–22), 721, of which 231 were public and 490 private, with 204,804 pupils. There were also 153 colleges for teachers with 2,068 teachers and 20,314 pupils, and 586 technical and professional schools.

The following table gives particulars as to the various Polish universities and high schools during the year 1921–22:—

University	Number of Teachers, including Lecturers	Number of Students		
		Men	Women	Total
University of Warsaw (1816)	191	4,851	2,667	7,518
University of Cracow (1384)	274	2,556	975	3,531
University of Lwow (1661)	181	3,654	1,019	4,673
University of Posen (1612 & 1919)	137	2,678	595	3,273
University of Wilno (1592 & 1919)	143	1,077	652	1,729
University of Lublin (1919)	172	719	401	1,120

Academy of Arts	27	120	35	155
Veterinary Academy	32	300	7	307
Dental Academy	17	28	369	397
Pedagogical Institute	36	133	79	212
Total	1,764	23,180	7,110	30,290

Justice and Crime.

Each of the three component parts of Poland still has its separate judiciary organisations. The unification of the courts of justice is being worked out by the Codification Commission appointed in November, 1919.

The highest court in Poland with 3 judges sitting, is the Supreme Court in Warsaw, divided into 5 chambers: 1. Civil; 2. Criminal, both for Congress Poland. 3. Civil and Criminal for Galicia. 4. Administrative (which took over the functions of the Supreme Administrative Tribunal in Vienna), and 5. Civil and Criminal for Posen.

The lowest courts in Poland are District Courts (*Sady powiatowe*) and Courts of Peace (*Sady pokoju*). Courts of the second instance are the County Courts (*Sady okregowe*), and of the third instance Courts of Appeal (*Sady apelacyjne*).

In 1922 there were seven circuits, each with a Court of Appeal (in Warsaw, Lublin, Cracow, Lemberg, Posen, the Eastern District, and Thorn). In the seven Appeal Courts there were 788 judges, in the 49 County Courts there were 1,747 judges, and in the 700 Courts of Peace (Districts Courts) there were 1,526 judges.

Pauperism and Old Age Pensions.

In the respective provinces of the Polish Republic there are still the same regulations and the same institutions as before the war in Russia, Prussia and Austria.

There are numerous private charitable institutions, such as asylums for aged and infirm, crèches for children, workhouses, eating houses for poor, etc., all over the country. In the Grand Duchy of Posen, West Prussia, East Prussia and Upper Silesia every inhabitant in distress must be relieved by the commune in which he becomes destitute; the costs are defrayed from the funds of the commune to which he belongs. In Galicia the funds for the support of the poor are derived from endowments, voluntary contributions, etc.; if these funds are insufficient the commune to which the destitute belongs must make provision. In the Kingdom of Poland the care for the poor is left entirely to private charity; in cases of hospital treatment the commune to which the patient belonged was obliged to refund the costs.

Insurance in case of sickness has been widened and unified by the law of January 11, 1919. It extends the obligation of insurance to all persons belonging to the wage-earning classes and establishes a uniform organisation of Sickness-insurance Officers in every district.

Finance.

Budget estimates for three years (in millions of Polish marks):—

	1920	1921	1922
Revenue	11,334.4	83,010.5	322,091.5
Expenditure	75,486.3	238,165.9	452,688.8

The principal items of expenditure in 1922 were: Ministry of War, 152,849,000,000 marks; education, 49,166,000,000 marks; public works, 23,666,000,000 marks.

The national indebtedness of Poland consists of internal and external debts. On January 1, 1923, the total internal debt amounted to 760,596,793,624 Polish marks, or at the then rate of exchange, 228,178,008 Swiss francs, *i.e.* 8.2 francs per head of population. The foreign indebtedness of Poland on that date consisted of loans (mostly in kind) from the following countries: United States, 184,434,339 dollars; Holland, 14,218,686 florins; Norway, 16,497,417 kronen; Sweden, 935,805 kronen; Denmark, 358,849 kronen; Switzerland, 73,600 francs; France, 912,455,222 francs; Italy, 75,000,000 liras; Great Britain, 4,530,818 $\frac{1}{2}$ sterling. Computed into gold francs the total foreign debt amounted (January 1, 1923) to 1,519,543,974 gold francs, or 54.3 francs per head of population. In all, the national debt of Poland, both internal and foreign, amounted to 1,747,721,982 gold francs, or 62.5 francs per head of population.

The amount of notes in circulation (January 31, 1923) was 909,160,307,000 Polish marks.

Defence.

Every able-bodied Polish subject is liable to serve in the army. Service in the active army is for two years.

The country is divided into 9 General Military Districts : Warsaw, Lublin, Kielce, Lodz, Cracow, Lemberg, Posen, Grodno, Pomorze. The organization of the army provides for 30 divisions of infantry and 10 brigades of cavalry. The peace strength of the army has been fixed at 275,000. The actual strength in 1922 was 260,000. There are, in addition, police and customs forces amounting to 60,000 men. In 1920 the strength of the army was 950,000, which is approximately the mobilizable strength. The military budget for 1922-23 was 153,000,000,000 Polish marks.

There are the following fortresses in Poland : in the west, Thorn and Posen ; in the south, Cracow and Przemyśl and armed camps ; in the east, Brest Litowsk, Grodno, Osowiec ; in the interior, Warsaw, Modlin, Deblin.

It has been proposed that Poland should have on the Vistula six small cruisers and gunboats, and two gunboats, *Pilsudski* and *Holler*, 500 tons, have been built in Finland. There are 5 monitors, 15 lesser vessels, and 6 ex-German torpedo-boats for police service.

Production and Industry.

Agriculture.—Poland is essentially an agricultural country. The following table shows the area and yield of the principal crops for two years :—

Crops.	Area (acres).		Yield (metric tons). ¹	
	1921	1922	1921	1922
Wheat	1,217,300	2,593,000	960,222	1,150,000
Rye	8,781,185	10,951,750	4,247,508	5,132,000
Barley	2,479,312	2,784,000	1,160,598	1,297,000
Oats	4,809,500	5,785,750	2,174,188	2,655,000
Potatoes	4,878,250	5,366,000	15,040,900	19,102,900
Sugar Beet	199,000	270,000	—	1,540,600

¹ Exclusive of Polish Upper Silesia.

Other important crops are hemp, hops, tobacco and chicory.

On July 16, 1920, a law was passed by the Sejm limiting the size of the larger estates and of holdings situated in the neighbourhood of large towns. The maximum has been fixed at 60 hectares (about 150 acres) for estates situated in industrial districts, at 400 hectares (about 1,000 acres) for Posen, Podolia, Volhynia, &c., and at 180 hectares (about 450 acres) for the other parts of the Polish Republic.

On October 1, 1921, Poland possessed 3,201,116 horses, 7,894,586 cattle, 2,178,216 sheep, and 5,170,612 pigs.

Industry.—There are six industrial centres in Poland, viz., Warsaw, Lodz, Cracow, Dabrowa, Katowice, and Czeszochowa.

In the textile industry in 1921 there were 1,050 works, with 750,580 spindles and 12,922 looms, employing 85,723 workmen. Other important industries are paper manufactures of various kinds, chemicals, and timber. There are 68 sugar refineries in Poland. On October 1, 1921, Poland had 5,017 industrial establishments, employing 240,487 workmen.

Mining.—The following table shows the output of the more important minerals for two years (in metric tons):—

Product	1920	1921
Bituminous coal.	6,411,668	7,572,138
Lignite	248,477	270,415
Crude petroleum	765,004	704,874
Natural gas	404,972 ¹	403,717 ¹
Salt	245,604	301,612
Potash	10,293	15,511
Iron ore	120,000	238,000
Zinc ore	64,400	57,000

¹ In thousands of cubic metres.

The supply of salt is said to be nearly inexhaustible.

Commerce.

Polish statistics of trade in 1920 and 1921 furnished only weights; in 1922 statistics for values were also issued.

Imports and exports for 1920 and 1921 were given as follows (in tons):—

	Imports		Exports	
	1920	1921	1920	1921
Foodstuffs	405,736	5618,110	143,147	163,031
Raw materials	2,912,123	3,735,930	249,062	1,470,640
Semi-manufactures	7,908	12,980	4,921	16,269
Manufactures	202,577	378,244	121,302	377,875
Total	3,528,424	4,745,264	618,432	2,027,835

An estimate of the value of 1921 trade places the value of the imports at 440,667,523,000 Polish marks, and the exports at 90,574,786,000 Polish marks.

Total trade between Poland and the United Kingdom for two years (according to Board of Trade Returns) were:—

	1921	1922
	£	£
Imports from Poland into the United Kingdom	1,840,009	2,862,710
Imports to Poland from the United Kingdom	3,002,028	2,454,166

Internal Communications.

Poland has 30,070 miles of road. Of navigable waterways Poland has 1,875 miles, of which 298 miles are accessible for vessels of over 400 tons. In June, 1922, there were 9,849 miles of railways open for traffic in the Republic. All are property of the State.

At the end of 1921 there were in Poland 1,500 post and telegraph offices, and 2,200 postal agencies, 3,500 telegraph stations, and 1,400 telephone exchanges with 50,100 instruments. The length of telegraph lines was 51,645 miles, of telephone lines 7,674 miles, of telephone and telegraph lines, 4,347 miles. In 1921 the posts effected the following deliveries: 505,800,000 letters, 5,100,000 parcels, 171,400,000 newspapers, 6,300,000 money orders, 32,000,000 telegrams, and 120,100,000 telephone calls.

Shipping and Navigation.

The Free City of Danzig is Poland's chief seaport.

The programme for Poland's commercial fleet as approved by Parliament, provides for 220,000 gross tons, including 20 vessels of 8,000 tons each and 10 vessels of 3,000 tons each, besides other smaller vessels for coast traffic.

Money and Credit.

The Polish national currency (*złoty* = 1 gold franc) has not yet (March, 1923) been put into circulation. The temporary monetary unit is the 'Marka Polska,' of no fixed value. On January 1, 1923, there were notes to the value of 793,437,498,844 Polish marks in circulation.

The Bank of Poland, created by Act of Parliament, has not yet (March 1923) commenced its functions, which are being performed by the Polish State Loan Bank in Warsaw. The position of this Bank, on December 31, 1922, showed that its assets and liabilities balanced at 1,030,621,796,417 Polish marks.

In 1921 there were 70 banks in Poland, with a capital of 3,813,379,320 Polish marks, and reserves amounting to 1,281,293,470 Polish marks.

The weights and measures are those of the metric system.

Diplomatic and Consular Representatives.

1. OF POLAND IN GREAT BRITAIN.

Envoy and Minister.—Constantine Skirmunt. (Appointed October 18, 1922.)

Councillor.—Jan Ciechanowski.

First Secretary.—Count Edward Raczyński.

Military Attaché.—Lt.-Col. J. Bardziński.

Financial Counsellor.—Mieczysław Rutkowski, K.C.M.G.

Commercial Counsellor.—Alphonse Poklewski-Kozieł.

Consul-General.—Casimir Komierowski.

2. OF GREAT BRITAIN IN POLAND.

Envoy and Minister.—Sir William Grenfell Max Müller, K.C.M.G., C.B., M.V.O. (January 3, 1921.)

First Secretary.—R. H. Hoare.

Third Secretaries.—P. S. Scrivener and H. L. Farquhar.

Naval Attaché.—Captain G. A. Wells, R.N.

Commercial Secretary.—Richard Kimens, C.M.G.

Consul at Warsaw.—F. Savery.

There are consular representatives at Lemberg and Borislav.

PORTUGAL.

(REPUBLICA PORTUGUESA.)

PORTUGAL has been an independent State since the twelfth century; until 1910 it was a monarchy. The last King was Manoel II. of the house of Braganza-Coburg, born November 15, 1889, younger son of King Carlos I. and Queen Mary Amélie, daughter of Philippe Duc d'Orléans. Manoel II. succeeded to the throne on the assassination of his father and elder brother, Prince Luiz Philip, February 1, 1908. On October 5, 1910, the republic was proclaimed, after a short revolution, and a provisional government established with Dr. Theophilo Braga as the Provisional President (October 5, 1910, to August 24, 1911). The first President of the Republic was Dr. Manoel de Arriaga (August 24, 1911, to May 27, 1915).

On August 20th, 1911, a new constitution was adopted. This provides that there shall be two Chambers. In the first, which is called the National Council, the members (164) shall be elected by direct suffrage for three years. The Second or Upper Chamber (71 members) shall be elected by all the Municipal Councils, and shall be renewable half at a time every three years. The President of the Republic is elected by both Chambers with a mandate for four years, but he cannot be re-elected. The President must be at least 35 years of age. He appoints Ministers, but these are responsible to Parliament. The President may not be present in the Chambers at debates. He is to receive a yearly salary of 2,600*l.*, with 1,300*l.* for allowances, or a total of 3,900*l.* yearly. The Constitution may be revised every ten years.

The Powers formally recognised the Republic on September 11, 1911.

President of the Republic.—Dr. Antonio José de Almeida. (Born 1866. Elected August 6, 1919.)

Senators (January, 1922).—33 Democrats, 9 Liberals, 15 other parties.

Deputies (January, 1922).—73 Democrats, 30 Liberals, 46 other parties.

The Cabinet, which was formed on February 9, 1922, and reconstructed in January 1923, is as follows:—

Premier and Minister of the Interior.—Senhor Antonio Maria da Silva.

Minister of Foreign Affairs.—Senhor Domingos Pereira.

Minister of Finance.—Senhor Victorino Guimarães.

Minister of Justice.—Senhor Abranches Ferrão.

Minister of War.—Colonel Fernando Freire.

Minister of Marine.—Senhor Azevedo Coutinho.

Minister for the Colonies.—Senhor Rodrigues Gaspar.

Minister of Instruction.—Senhor Leonardo Coimbra.

Minister of Commerce and Labour, ad interim.—Senhor Fernando Braderode.

Minister of Agriculture.—Senhor Fontura da Costa.

Area and Population.

Area and population at the Censuses of 1911 and 1920. The Azores (3 districts) and Madeira (1 district), are regarded as an integral part of the Republic.

Provinces and Districts	Area in sq. miles	Population		Per sq. mile 1920
		1911	1920	
Entre Minho-e-Douro:—				
Vianna do Castello	857	227,420	226,046	268.8
Braga	1,040	382,461	376,141	361.7
Porto	893	679,978	702,274	786.4
	2,790	1,289,859	1,304,461	467.6
Tras-os-Montes:—				
Villa Real	1,650	245,687	235,498	142.8
Bragança	2,513	192,133	170,252	67.7
	4,163	437,820	405,750	97.5

Provinces and Districts	Area in sq. miles	Population		Per sq. mile 1920
		1911	1920	
Beira:—				
Aveiro	1,065	336,243	344,178	323.2
Vizeu	1,937	416,860	404,864	209.0
Coimbra	1,508	360,056	353,121	234.2
Guarda	2,116	271,816	256,243	121.1
Castello Branco	2,582	241,509	239,167	92.6
	9,208	1,626,484	1,597,573	173.5
Estremadura:—				
Leiria	1,317	262,558	270,124	211.9
Santarem	2,555	322,753	332,012	129.9
Lisbon	3,065	853,415	939,326	306.4
	6,937	1,438,726	1,550,462	223.5
Alentejo:—				
Portalegre	2,405	141,778	147,398	61.3
Evora	2,856	144,307	154,057	53.9
Beja	3,958	192,499	200,615	50.6
	9,219	478,584	502,070	54.5
Algarve (Faro)	1,937	274,122	268,294	138.5
Total Continent	34,254	5,545,595	5,628,610	164.3
Islands:—				
Azores	922	242,613	—	—
Madeira (Funchal)	314	169,777	—	—
Total Islands	1,236	412,390	—	—
Grand total	35,490	5,957,985	—	—

In 1911 the population consisted of 2,828,691 males and 3,131,365 females, or 110 females to every hundred males. In 1900 the continental urban population was 1,627,476 or 32.4 per cent., and the rural 3,388,791 or 67.6 per cent.

The chief towns with their population in 1920 (census) were: Lisbon, 489,667; Oporto, 203,199; Setubal, 37,074; Braga, 21,970; Coimbra, 20,841; Evora, 16,148; Covilhã, 14,049; Faro, 12,925; Tavira, 11,002; Portalegre, 11,171; Aveiro, 10,357; Elvas, 11,747; Castello Branco, 10,486; Beja, 10,521; Angra, do Heroismo (Azores), 10,057.

MOVEMENT OF THE POPULATION.

Births, deaths, and marriages (including the Azores and Madeira) for 3 years:—

Years	Births	Deaths	Marriages	Emigrants
1917	190,485	134,691	34,210	15,825
1918	181,408	253,227	31,325	11,672
1919	167,704	153,697	48,804	37,138

In 1919 the stillborn numbered 7164, the illegitimate 21,608, and the legitimate 146,096.

Portuguese emigration is chiefly to Brazil (1919, 21,228), and the United States (1919, 5,246).

Religion.

There is freedom of worship in Portugal; the predominant faith is the Roman Catholic. Portugal, including the Azores and Madeira, is divided into three ecclesiastical provinces, with their sees severally at Lisbon, Braga and Evora. The Archbishop of Lisbon (Patriarch since 1716) has seven suffragans, of whom only two are on the European mainland; while the Archbishop of Braga (the oldest see in Portugal) has five, and the Archbishop of Evora two. The Azores, Madeira, and the Portuguese colonial possessions of West Africa, continental and insular, with five episcopal sees, constitute part of the ecclesiastical province of Lisbon. In East Africa there is also the province of Mozambique. In Asia there is a province of Goa with four suffragan sees (Macao included).

The total income of the upper hierarchy of the Church is calculated to amount to 300,000 milreis. In 1900 the number of Protestants in Portugal was 4,491, and that of Jews 481. The Republican government has separated the Church from the State, and State payments for the maintenance and expenses of worship have now ceased. The conventual establishments of Portugal were suppressed by decree of May 28, 1834, and their property confiscated for the benefit of the State. Notwithstanding, several establishments of this nature were formed in later years; they were suppressed by the provisional government, which enforced the law of 1834.

Instruction.

Education in Portugal is of three kinds—primary, secondary, higher and special. Primary education is compulsory, and is rigorously enforced by a decree of the Provisional Government of March 29, 1911. In 1913-19 there were 7,007 public elementary schools with 170,415 pupils. In 1919 there were 32 secondary schools (with 11,791 pupils in 1917). For higher education there are 3 Universities: at Lisbon (founded in 1858), Coimbra (founded 1290), and Oporto. The Technical School at Lisbon provides instruction in engineering, chemistry, etc. There are also special colleges for music, art (Lisbon and Oporto), commercial schools, a military academy at Lisbon, and a naval school.

Justice and Crime.

The Republic is divided for judicial purposes into 193 comarcas; in every comarca there is a court of first instance. There are two courts of appeal (Tribunaes de Relação) at Lisbon and Oporto, and a Supreme Court in Lisbon.

Finance.

The revenue and expenditure for six years were in pounds sterling (normal rate):—

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	£	£		£	£
1916-17	14,315,966	21,887,988	1919-20	29,443,625	52,931,863
1917-18	11,186,527	22,671,385	1920-21	26,913,445	52,802,831
1918-19	10,247,441	14,235,039	1922-23	55,857,571	114,495,767

On June 30, 1921, the external debt of Portugal was as follows:—

New external 3 per cent. converted debt of 1902, 33,085,707*l.*; 4½ per cent. tobacco loan, 1891 and 1896, 2,745,600*l.*; total 35,831,307*l.*

The internal debt on June 30, 1920, amounted to 1,862,815,897 escudos.

Defence.

The Army of Portugal is a militia raised by conscription. It is in three categories, the active army, the reserve and the territorial army. All adult males are liable to be called out from the age of 17 to 45, but, practically, service only begins at the age of 20. 10 years are passed in the active army, 10 in the reserve, and 8 in the territorial army, which latter also includes surplus men from other categories. In the active army, recruits undergo from 15 to 30 weeks' preliminary training, according to the arm of the service; afterwards there is a fortnight's training during the annual mobilisation. The country is divided into 8 territorial districts, each supposed to produce a division. The active army consists of 35 regiments of 3 battalions, 11 cavalry regiments of 4 squadrons, 8 field artillery regiments, comprising 63 batteries, 2 horse batteries, 9 mountain batteries, 20 garrison batteries, and engineer units. Batteries have 4 guns.

The peace establishment of the active army in 1922 was 40,000 men. There are about 2,800 officers, all told.

The reserve army was to consist of 35 regiments of infantry, 8 squadrons of cavalry, and 24 field batteries, with other units.

The territorial army has no cadres.

The Republican Guard, and the Fiscal Guard, are civil corps recruited from the army, the men of which can be employed in the field in war time. The Republican Guard is a military police, numbering about 5,000 men, of whom about 800 are mounted. The Fiscal Guard is a preventive service about 5,200 strong.

The arm of the Portuguese infantry is the Mauser-Vergueiro, a magazine weapon, calibre 6·5 mm. The field artillery is armed with 7·5 cm. Schneider Canet guns.

With regard to over-sea garrisons, 2 line regiments of infantry (of 2 battalions) are normally stationed in the Azores, and 1 at Madeira. The latter has also a battalion of garrison artillery, and there are 2 in the Azores. Besides these troops, the Portuguese have a separate Colonial Army, partly European and partly Native, which garrisons their possessions on the West Coast of Africa, in Mozambique, India, &c. The force consists of about 700 officers, about 3,000 European non-commissioned officers and men, and 9,000 natives, the Europeans being enlisted voluntarily, the natives compulsorily. The military budget for 1922-23 was 88,770,320 escudos.

The navy of Portugal comprises:—3 protected cruisers, *Almirante Reis* (1,253 tons), *Adamastor* (1,757 tons); *São Gabriel* (1,772 tons); four gunboats for Mozambique, a variety of old gunboats, a mine-layer, 4 transports, 2 training ships, the former royal yacht, 5 *de Outubro* (1,365 tons), 6 sloops, bought from the British Navy in 1920, 5 destroyers, 7 torpedo boats, 4 submarines, 1 steamer for torpedo and mine service; also 3 ex-Austrian torpedo boats for police duties. A naval flying service has been established.

The naval personnel is about 6,000.

Production and Industry.

Of the whole area of continental Portugal 26·2 per cent. is annually cultivated under cereals, pulse, pasture, etc.; 3·5 per cent. is under vineyards; 3·9 per cent. under fruit trees; 17·3 per cent. under forest; 49·1 per cent. is waste. In Alemtejo and Estremadura and the mountainous districts of other

provinces are wide tracts of waste lands, and it is asserted that many hectares, now uncultivated, are susceptible of cultivation.

The chief cereal and animal produce of the country are:—In the north, maize and oxen; in the mountainous region, rye and sheep and goats; in the central region, wheat and maize; and in the south, wheat and swine, which fatten in the vast acorn woods. Throughout Portugal wine is produced in large quantities. Olive oil (area covered by olive trees about 825,000 acres; annual production about 12,760,000 gallons of oil); figs; tomatoes are largely produced, as are oranges, onions, and potatoes.

The forests cover 17 per cent. of the total area of the country; pines extending to 1,909,663 acres; oaks, 898,833 acres; corks, 817,081 acres; chestnut, 210,345 acres; Pyrenean oak, 169,150 acres: total, 4,005,072 acres. Cork is one of the principal sources of wealth; the annual production is estimated at 176,368,000 pounds.

Portugal possesses considerable mineral wealth, but coal is scarce, and, for want of fuel and cheap transport, valuable mines remain unworked. The most important mineral is wolfram; others are iron, copper, manganese, antimony, lead, tin, and gold.

The exports of sardines and tunny fish are considerable. The centre of the sardine industry is at Setubal, about 10 miles south of Lisbon.

A characteristic industry of Portugal is the manufacture of *azulejos* or porcelain tiles. This was inherited from the Moors, and tiles are used extensively for interior and exterior decoration of public and private buildings. At Sacavem, near Lisbon, a large factory makes tiles and chinaware. In Peniche, an old fishing village on the coast north of Lisbon, there is a local pillow lace industry, and at Guimarães famous embroidery is made.

Commerce.

Imports for consumption and exports (exclusive of coin and bullion) for six years (normal rate of exchange):—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1913	17,586,222	8,152,222	1916	23,839,766	12,548,000
1914	15,632,222	6,400,900	1918	20,284,200	17,144,775
1915	17,575,112	8,081,333	1919	52,110,675	24,974,650

The principal articles of imports and exports in 1920, showing quantity and value, were:—

Article	Imports 1920		Article	Exports 1920	
	Kilos	Escudos		Kilos	Escudos
Coal	599,904,000	70,153,568	Chemicals	1,998,672	1,087,836
Cotton	11,759,000	47,459,638	Manufactured cork	4,579,179	3,948,100
Fertilizers	51,661,435	7,363,790	Raw cork	1,244,286	86,130
Beans	2,861,933	555,229	Raw hides	512,963	315,555
Codfish	31,268,298	40,620,190	Olive oil	516,680	316,068
Coffee	2,478,907	2,559,670	Rosin	1,281,065	457,670
Rice	14,645,083	12,623,281	Wooden planks	80,402	21,329
Animal Fats	687,947	1,124,989	Raw wool	2,073,297	1,701,249
Rubber	124,981	218,082	Sardines	5,156,985	1,664,712

1 Tons.

2 Litres.

Wine is the staple article of import from Portugal into the United Kingdom, the quantity amounting in 1921 to 4,593,144 gallons, valued at 2,392,355*l*.

Total trade between Portugal and the United Kingdom in thousands of pounds for five years (Board of Trade Returns) :—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Portugal into U. Kingdom	9,747	10,797	6,899	4,167	4,589
Exports to Portugal from U. Kingdom	3,744	6,434	10,555	3,373	4,219

Shipping, Navigation, and Internal Communications.

In 1920, 9,909 vessels of 16,101,695 tons entered the ports of Portugal.

Portugal has two State-owned railways, 733 miles in length, and five privately owned lines, 1,314 miles in length; total railway mileage on December 31, 1918, 2,047; and on December 31, 1920, 2,128 miles. The railways have a gauge of 5ft. 5½in., except two lines, one of which has a 3ft. 3½in. gauge, and the other a 2ft. 11½in. gauge.

Money, Weights, and Measures.

The Government financial institution is the Bank of Portugal. The cash on hand of the bank on January 18, 1922, was: Gold, 8,577,180 escudos. The notes in circulation amounted on January 18, 1922, to 734,388,164 escudos.

There are 18 other banks registered in the Republic with a nominal capital of 47,000,000 escudos, and total deposits on December 31, 1919, of 331,465,000 escudos.

The gold coinage of Portugal issued since 1854 amounts to the nominal value of 7,967,002, and the silver coinage to 37,934,523 escudos.

The Decree of the Provisional Government of May 22, 1911, established a new monetary system. The unit is the gold *escudo*, of 100 *centavos*, which is equivalent to the *le milreis* gold piece, and is worth normally about 4*s*. 5½*d*. (but the rate varies: March, 1922, 2½*d*.); 1,000 escudos are called a *conto*. Gold coins are 2, 5, and 10-escudo pieces; silver coins are 1-escudo (0.835 fine) and 50, 20, and 10-centavos pieces; there are bronze and nickel coins of 4, 2, 1, and ½-centavo. The gold coins and the silver escudos are .900 fine; the other silver coins are .835 fine.

Owing to the disappearance of practically all gold and silver in Portugal, the currency is on a paper basis. New notes of 5, 10, and 50 centavos have been issued by the Bank of Portugal. Small coins of 1 and 4 centavos have been placed in circulation to relieve the scarcity of small change.

On January 1st, 1912, the legal time for Portugal was placed in accordance with the Greenwich meridian.

The metric system of weights and measures is the legal standard. The chief old measures still in use are :—

The <i>Libra</i>		= 1.012 lb. avoirdupois.
„ <i>Almude</i>	{ of Lisbon	= 3.7 imperial gallons.
	„ Oporto	= 5.6
„ <i>Alqueire</i>		= 0.36 „ bushel.
„ <i>Moio</i>		= 2.78 „ quarters.

Diplomatic Representatives.

1. OF PORTUGAL IN GREAT BRITAIN.

Ambassador.—Senhor Manuel Teixeira Gomes, G.B.E. (appointed 1920).

First Secretary.—José Jorge Rodrigues dos Santos.

Second Secretary.—Henrique Gabriel da Silva.

Naval Attaché.—Commander Fernando Branco.

Commercial Counsellor and Consul-General in London.—Oscar George Potier.

There are Consular representatives at Cardiff, Newcastle, Liverpool, and Consular agents at Cork, Dublin, Dundee, Leith, Glasgow, Hull, Southampton.

2. OF GREAT BRITAIN IN PORTUGAL.

Ambassador.—Hon. Sir Lancelot D. Carnegie, G.C.V.O., K.C.M.G., appointed September 30, 1913.

Secretaries.—H. A. Grant-Watson and J. W. T. Perowne.

Military Attaché.—Major-General the Hon. Sir C. Sackville-West, K.B.E., C.M.G.

Naval Attaché.—E. B. C. Dicken, D.S.O., R.N.

Consul-General at Lisbon.—G. B. Beak.

There are Consular representatives at Lisbon (C.), Belem, Faro, Setubal, Figueira, Leixões, Oporto, &c.; Funchal (Madeira), St. Michael's (Azores), St. Vincent (Cape Verde).

Consul-General at Lourenço Marques.—H. Hall-Hall (Acting).

There are Consuls or Vice-Consuls at Bissau (Guinea), Chinde, Mozambique, Tete, Quilimane, Lobito, and São Thomé, Consul at Marmagao (Goa).

* Dependencies.

The colonial possessions of Portugal, situated in Africa and Asia, are as follows :—

Colonial Possessions	Area : English sq. miles	Popula- tion	Colonial Possessions	Area : English sq. miles	Popula- tion
Possessions in Africa:			Possessions in Asia :		
Cape Verde Islands			In India—Goa (1910)	1,469	515,772
(1912)	1,480	140,793	Damão, Diu (1910) .	160	32,700
Guinea	13,940	239,000	Timor (1915)	7,330	377,815
Príncipe and St. Thomas' Islands			China: Macao, &c. (1910)	4	74,866
(1914)	360	58,907			
Angola	484,800	4,119,000			
Mozambique . . .	426,712	3,120,000	Total, Asia	8,972	1,001,153
Total Africa . .	927,292	7,736,700	Total, Colonies . .	936,264	8,737,853

On August 15, 1914, partial autonomy was granted by the Home Government to all Portuguese colonies, giving each the right to establish its own code of laws for civil and financial Government.

Portuguese India consists of **Goa**, containing the capital, Panjin, or Nova-Goa, on the Malabar coast; Damão, on the coast about 100 miles north of

Bombay; and Diu, a small island about 140 miles west of Damão. In 1915 there were 142 schools with 9,546 pupils (6,066 boys and 3,480 girls). In Gôa there are 501 salt works employing 1,968 men, the annual production amounting to about 12,200 tons. In Damão there are 11 salt works, and in Diu 5. In 1906 deposits of manganese were discovered near Mormugão and about 6 concerns with about 20 mines are at work. The military force consists of not less than 1,082 men (786 natives). The Mormugão railway (51 miles) connects this port with the lines of British India. The estimated revenue of Gôa, &c., in 1920-21 was 1,651,140 escudos; expenditure, 2,086,697 escudos. The trade is largely transit. In 1920 the imports by sea and land amounted to 4,751,746 escudos, the exports to 1,401,833 escudos. Chief exports are: coco-nuts, fish (fresh and salted), spices, caju-nuts, salt, and copra. There are in Portuguese India 18 telegraph offices and 167 miles of telegraph line.

Macao, in China, situated on an island of the same name at the mouth of the Canton River, forms with the two small adjacent islands of Taipa and Colôane, a province, the city being divided into two wards, one inhabited by Chinese and the other by non-Chinese, each having its own administrator. The population, according to the census of December 31, 1910, is 74,866 (42,263 males and 32,603 females). There are 2,171 Portuguese, 71,021 Chinese and 1,674 of various nationalities. Estimated revenue in 1922-23, 2,731,470 escudos and expenditure 2,731,470 escudos. The military force contains at least 488 men (164 natives). The trade, mostly transit, is in the hands of Chinese. Imports in 1920, 9,519,003 escudos; exports, 7,018,973 escudos.

Portuguese **Timor** consists of the eastern portion of the island of that name in the Malay Archipelago, with the territory of Ambeno and the neighbouring isle of Pulo Cambing. By treaty of 1859 the island was divided between Portugal and Holland; by convention of October 1, 1904, ratified in 1908, a boundary arrangement was made between the two Governments, certain *enclaves* being exchanged and the possession of other territories settled. This possession, formerly administratively joined to Macao, was in 1896 made an independent province. Population in 1915, 377,815 (201,121 males and 176,694 females). Estimated public revenue and expenditure for 1921-22, 702,442 escudos. Military force not less than 323 men (212 natives). Imports (1921), 458,369 escudos; exports, 360,360 escudos. Chief exports are: coffee, sandal-wood, sandal-root, copra, and wax. The port is Dilly.

•• The **Cape Verde Islands**, fourteen in number, are administered by a Governor, whose seat is at Praia, the capital. The population according to the census of December 31, 1912, is 149,793 (69,001 males and 80,792 females) including 295 foreigners, and its distribution is as follows: whites, 4,799; coloured, 87,621; negroes, 51,509. Military force not less than 264 men (168 natives). The chief products are coffee, medicinal produce, hides, and millet. The estimated public revenues and expenditures in 1921-22, 2,788,406 escudos; imports in 1919, 8,493,802 escudos; exports, 749,709 escudos.

Portuguese **Guinea**, on the coast of Senegambia, is bounded by the limits fixed by the convention of May 12, 1886, with France, and is entirely

enclosed on the land side by French possessions. It includes the adjacent archipelago of Bijagoz, with the island of Bolama, in which the capital of the same name is situated. Estimated population, 289,000. The chief commercial products are rubber, wax, oil seeds, ivory, hides. Estimated public revenue for 1922-23, 5,777,627 escudos, and expenditures, 5,777,627 escudos. Military force not less than 247 (143 natives). Imports in 1921, 20,486,106 escudos; exports, 9,511,254 escudos. The chief port is Bissau. There are 100 miles of telegraph lines.

The islands of **S. Thomé** and **Príncipe**, which are about 125 miles off the coast of Africa, in the Gulf of Guinea, were discovered in 1471, and now constitute a province under a Governor. In 1914 the population of the two islands was 58,907 in S. Thomé and 4,938 in Príncipe, and the distribution (S. Thomé) was as follows: whites, 1,570; natives, 57,337. The islands are hilly, the soil volcanic, and the vegetation rich and various. The chief commercial products are cacao, coffee, rubber and cinchona. Area of cacao plantations, 125,000 acres; production in 1916, 629,450 bags (of between 132 to 140 pounds). Estimated revenue for 1922-23, 3,035,291 escudos, and expenditure, 3,035,291 escudos. Military force, at least 240 men (181 natives). Imports at S. Thomé and Príncipe (1921), 12,408,786 escudos; exports, 19,221,771 escudos. On S. Thomé a railway of 9 miles is open for traffic.

Angola (Portuguese West Africa), with a coast-line of over 1,000 miles, is separated from French Congo by the boundaries assigned by the convention of May 12, 1886; from the Congo by those fixed by the convention of May 25, 1891; from British South Africa in accordance with the convention of June 11, 1891, and from South-west Africa in accordance with that of December 30, 1886. The colony has belonged to the Portuguese since 1575, with the exception of the years 1641 to 1648, when it was held by the Dutch. It is under a High Commissioner, who resides at Loanda, and is vested with large powers; it is divided into eleven districts: Loanda, Congo, Luanza-Norte, Luanza-Sul, Benguella, Moxico, Mossamedes, Huila, Cubango, Malanje, and Lunda. The capital is S. Paulo de Loanda, other important towns being Cabinda, Ambriz, Novo Redondo, Benguella, Mossamedes, and Port Alexander. The indigenous population numbered 2,124,361 in 1914. There are said to be 52 Government schools, and 7 municipal and 2 private schools, with altogether about 2,410 pupils. Various missions are at work in the country. The military force varies between 2,721 men (1,976 natives) and 4,731 (3,602 natives). Estimated revenue in 1922-23, 79,107,000 escudos, and expenditure 79,107,000 escudos. The chief products are coffee, rubber, wax, sugar (for rum distilleries), vegetable oils, coco-nuts, ivory, oxen and fish. Rubber supplies are now becoming exhausted; cotton-growing, formerly remunerative, has been neglected but is now increasing; tobacco is grown and manufactured for local consumption; petroleum and asphalt are worked by a British syndicate. The province contains large quantities of malachite and copper, iron, petroleum, and salt. Gold has also been found. Imports, exclusive of Congo (1921), 89,895,382 escudos; exports exclusive of Congo, 23,597,548 escudos. The chief imports of the province are textiles, and the chief exports are coffee and rubber. Dried fish are exported in considerable quantities. The trade is largely with Portugal. The Portuguese National Navigation Company has most of the

carrying trade to and from Europe; the steamers of 3 British lines and one German line visit ports of the Colony. The length of railways open for traffic, is 818 miles, made up as follows: Loanda-Lucalla line, 226 miles (metre gauge); Lucalla-Malanje line, 149 miles (metre gauge), which it is intended should link up with the Central African Railway; Canhoca-Golungo Alto, 9 miles; Lobito-Chinguar, 323 miles; and Mossamedes-Chela Mountains, 111 miles. In July, 1918, the Government purchased the Trans-African railway. Angola is connected by cable with East, West, and South African telegraph systems.

Mozambique (Portuguese East Africa) is separated from British Central and South Africa by the limits of the arrangement between Great Britain and Portugal in June, 1891. It is separated from late German East Africa, according to agreements of October and December, 1886, and July, 1890, by a line running from Cape Delgado at 10° 40' S. lat. till it meets the course of the Rovuma, which it follows to the point of its confluence with the 'Msinje, the boundary thence to Lake Nyasa being the parallel of latitude of this point. In accordance with the Treaty of Versailles the Peace Conference on September 23, 1919, allotted to Portugal 'as the original and rightful owner' the territory south of the Rovuma, known as the "Kionga Triangle" (formerly part of German East Africa).

Portuguese East Africa, with an area of 428,132 square miles, comprises three distinct entities: (1) the Province of Mozambique (295,000 square miles); (2) the Companhia de Moçambique (59,840 square miles), and (3) the Companhia do Nyasa (73,292 square miles). The first, which is ruled by a High Commissioner, with his seat at Lourenço Marques, is divided into 6 districts: Lourenço Marques, Gaza, Inhambane, Quilimane, Tete and Mozambique, each with its own Governor. Lourenço Marques (population 13,154 in 1912) is the capital of the Province. There is a Government Council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and a Provincial Council with the attributions of an administrative and account tribunal. The existing organisation of the province is that which was established by decree of May 23, 1907, with some modifications. The Manica and Sofala region is administered by the Mozambique Company, which has a royal charter granting sovereign rights for 50 years from 1891. Under the Company's administration the country on the Zambezi has become settled, there is convenient transport by river, and facilities are granted for securing titles and working mines. The Nyasa Company, with a royal charter, administers the region between the Rovuma, Lake Nyasa, and the Lurio. Estimated population, about 3 million natives, 10,500 whites, and 1,100 Asiatics and half-castes. The military force of the Colony varies between 2,250 men (1,379 natives) and 3,904 men (2,468 natives). For 1922-23 the estimated revenue was 16,300,835 escudos.

The chief products of the Colony are sugar, coco-nuts, bees-wax, and mining products. Important gold-bearing reefs have been discovered on the Upper Zambezi, and extensive coal deposits in the Tete region.

The principal ports are Mozambique (population, 1910, 472 Europeans, 895 Asiatics, and about 361,367 natives), Ibo, Quilimane, Chinde (population 1,690, of whom 218 European), Beira (population, 3,420, of whom 738 white), Inhambane (population, 3,330, of whom 100 European and 250 Asiatic), and Lourenço Marques (9,849, of whom 4,691 European).

As the result of a cyclone on February 24, 1922, Chinde was practically destroyed.

The trade registered (exclusive of coin and bullion) at the following ports in 1921 is given below :—

—	Imports	Exports	Re-exports	Transit	Total
	Escudos	Escudos	Escudos	Escudos	Escudos
Lourenço Marques	18,953,238	7,784,709	10,971,897	122,819,532	160,529,376
Inhambane . . .	751,870	313,301	630	—	1,065,801
Chinde . . .	1,692,933	4,702,210	2,891,745	1,402,264	10,689,152
Quelimane . . .	2,132,822	3,973,430	1,540	—	6,107,792
Mozambique . . .	6,385,270	3,624,606	2,339,066	—	12,348,942
Tete . . .	241,477	86,412	414	52,090	880,393
Beira . . .	7,446,798	4,630,851	25,779,101	11,106,640	48,963,390
Ibo . . .	2,207,905	1,001,994	71,554	13,000	3,294,453
Grand Total .	39,812,313	26,117,513	42,055,947	135,393,526	243,379,299

The chief articles imported into the colony are cereals, foodstuffs, cement, cotton, alcoholic liquors, and animals. The exports are mainly sugar, rubber, various ores, wax, and ivory. The Zambeze is navigable for stern-wheelers as far as Tete. At the port of Lourenço Marques there entered, in 1920, 618 vessels of 2,321,698 tons (328 of 1,626,892 tons British), and cleared 590 vessels. At the port of Beira 340 vessels arrived and 336 departed in 1919. At the port of Ibo, 2,104 vessels arrived in 1919, and 2,100 departed.

The Delagoa Bay railway has a length of 57 miles in the colony, and is continued for 290 miles to Pretoria. The commercial relations and transit of goods by this railway between the Portuguese and British possessions are regulated by the agreement signed April 1, 1909. A new line from Lourenço Marques to the Swaziland border is under construction, 44 miles being open for traffic, including the Umeluzi branch. The Gaza railway, from Chai-Chai to Manjacaze, has 32 miles open for traffic, and the line from Mutamba to Inharrime 25 miles. The Beira railway has a length of 204 miles in the colony, and is continued from the British frontier to Bulawayo.

The Government has been working on a definite plan, and the finished scheme for the Province south of parallel 22, the southern boundary of the Mozambique Co.'s territories, embraces the following lines: Moamba to Xinavane, 55 miles (completed); Xinavane via Chissane to Chai-Chais 70 miles (not yet begun); Chai-Chai via Manjacasse to Chigomo, 51 miles, (completed); Chigomo via Jinagai to Inharrime, 51 miles, projected; Inharrime to Mutamba, 40 miles (completed); Mutamba to Inhambane, 15 miles (under construction). Activities north of the Mozambique Co. are represented by two lines of penetration, one from the port of Quelimane, which will tap what is said to be the richest region on the whole coast and whose interior terminal will connect with the existing railway in British Nyasaland, and the other from the port of Mozambique, capital of the district of that name and formerly capital of the Province.

Beira is connected by telegraph with Salisbury in Mashonaland, and Lourenço Marques with the Transvaal system. Quelimane has telegraphic communication with Chiromo. In 1915 there were 3,397 miles of telegraph line.

Since September 1, 1922, the escudo currency has been in vogue in Portuguese East Africa.

ROME, SEE AND CHURCH OF.

For many ages until Pius IX.'s reign, with some comparatively short breaks, the Popes or Roman Pontiffs bore temporal sway over a territory stretching across Mid-Italy from sea to sea and comprising an area of some 16,000 square miles, with a population finally of some 3,125,000 souls. Of this dominion the whole has been incorporated with the Italian Kingdom. Furthermore, by an Italian law dated May 13, 1871, there was guaranteed to His Holiness and his successors for ever, besides possession of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire or 129,000*l.*, which allowance still remains unclaimed and unpaid.

Supreme Pontiff.—Pius XI. (*Achilles Ratti*), born at Desio, May 30, 1857; Archbishop of Milan, September 1921; Cardinal, June 13, 1921; elected Supreme Pontiff, as successor of Benedict XV., February 6, 1922.

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar; and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body; the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds of the votes in his favour he is declared elected.

From the accession of Innocent IX., 232nd in the usual list of Roman Pontiffs, to Pius XI., 261st, the Popes (all Italian) have been as follows:—

Name and Family of Pontiff	Year of Election	Name and Family of Pontiff	Year of Election
Innocent IX. (<i>Facchinetti</i>) .	1591	Benedict XIII. (<i>Orsini</i>) .	1724
Clement VIII. (<i>Aldobrandini</i>) .	1592	Clement XII. (<i>Corsini</i>) .	1730
Leo XI. (<i>Medici</i>) .	1605	Benedict XIV. (<i>Lambertini</i>) .	1740
Paul V. (<i>Borghese</i>) .	1605	Clement XIII. (<i>Rezzonico</i>) .	1758
Gregory XV. (<i>Ludovisi</i>) .	1621	Clement XIV. (<i>Ganganelli</i>) .	1769
Urban VIII. (<i>Barberini</i>) .	1623	Pius VI. (<i>Braschi</i>) .	1775
Innocent X. (<i>Pamphily</i>) .	1644	Pius VII. (<i>Chiaramonti</i>) .	1800
Alexander VII. (<i>Chigi</i>) .	1655	Leo XII. (<i>della Genga</i>) .	1823
Clement IX. (<i>Rospigliosi</i>) .	1667	Pius VIII. (<i>Castiglioni</i>) .	1829
Clement X. (<i>Altieri</i>) .	1670	Gregory XVI. (<i>Cappellari</i>) .	1831
Innocent XI. (<i>Odiscalchi</i>) .	1676	Pius IX. (<i>Mastai-Ferretti</i>) .	1846
Alexander VIII. (<i>Ottoboni</i>) .	1689	Leo XIII. (<i>Pecci</i>) .	1878
Innocent XII. (<i>Pignatelli</i>) .	1691	Pius X. (<i>Sarto</i>) .	1903
Clement XI. (<i>Albani</i>) .	1700	Benedict XV. (<i>della Chiesa</i>) .	1914
Innocent XIII. (<i>Conti</i>) .	1721	Pius XI. (<i>Ratti</i>) .	1922

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, namely, 6 Cardinal-Bishops (holders of the suburbicary sees), 50 Cardinal-Priests, and 14 Cardinal-Deacons but hardly ever comprising the full number. In March, 1923, the Sacred College consisted of 6 Cardinal-Bishops, 48 Cardinal-Priests, and 10 Cardinal-Deacons.¹ The following list gives the names, dates, and offices of these 60 Cardinals:—

Name	Office or Dignity	Nationality	Year of Birth	Year of Creation
<i>Cardinal-Bishops:—</i>				
Vincenzo Vannutelli	Bishop of Palestrina, Arch-priest of the Patriarchal Liberian Basilica, Datary of His Holiness	Italian	1836	1889
Gaetano de Lai	Bishop of Sabina	"	1853	1907
Antonio Vico	Bishop of Porto and Santa Rufina	"	1847	1915
Gennaro Granito Pignatelli di Belmonte	Bishop of Albano	"	1851	1915
Basilio Pompili	Vicar General of His Holiness Cardinal Bishop of Velletri	"	1858	1917
Giovanni Cagliero	Bishop of Frascati	"	1838	1915
<i>Cardinal-Priests:—</i>				
Michael Logue	Archbishop of Armagh	Irish	1840	1893
Giuseppe Nava di Bontife	Archbishop of Catania	Sicilian	1846	1899
Agostino Richelmy	" Turin	Italian	1850	1899
Leo von Skrbnsky	Archbishop of Olmütz	Austrian	1863	1901
Rafael Merry del Val	Camerlengo of the Holy Roman Church, Secretary of the Congr. of the Holy Office, Archpriest of the Vatican Basilica	Spanish	1865	1903
Joaquim Arcoverde de Albuquerque Cavalcanti	Archbishop of Rio de Janeiro	Brazilian	1850	1905
Ottavio Cagiano de Azevedo	Chancellor of the Holy Roman Church	Italian	1845	1905
Pietro Maffi	Archbishop of Pisa	"	1858	1907
Alessandro Lualdi	" Palermo	"	1858	1907
Désiré Mercier	" Mechlin	Belgian	1851	1907
Pietro Gasparri	Pontifical Secretary of State	Italian	1852	1907
Louis Henri Lugin	Archbishop of Reims	French	1842	1907
Paulin Pierre Andrieu	Archbishop of Bordeaux	"	1849	1907
Antonio Mendes Bello	Patriarch of Lisbon	Portuguese	1842	1911
Francis Bourne	Archbishop of Westminster	English	1861	1911
William O'Connell	" Boston	American	1859	1911
Enrique Almaraz Santos	" Toledo	Spanish	1847	1911
Willem van Rossum	—	Dutch	1854	1911
Louis Nazaire Bégin	Archbishop of Quebec	Canadian	1840	1914
John Csernoch	Archbishop of Esztergom (Gran)	Hungarian	1852	1914
Gustav Piff	" Vienna	Austrian	1864	1914

¹ The terms Cardinal-Priest and Cardinal-Deacon have for centuries ceased to imply severally the particular orders of priest or deacon. Nowadays in the Sacred College a presbyteral title is freely given to one in episcopal or diaconal orders, and a deaconry to a priest or even to a simple clerk.

Giuseppi Mori	Secretary of the Congregation of the Council . .	"	—	1922
Friedrich Ehrle	Librarian to the Vatican . .	—	—	1922

Though primarily belonging to the local Roman Church, the Cardinals, drawn from every nation of Christendom, are now regarded as Princes of the Church at large. Originally they were simply the parish rectors of Rome, or the deacons of Roman deaneries. In 1586 their number was finally settled by Sixtus V. at seventy. The Cardinals compose the Pope's Senate or Council and the various Sacred Congregations, govern the Church while the Apostolic See is vacant, and elect the deceased Pontiff's successor.

They received the distinction of the red hat under Innocent IV., during the first General Council of Lyons, in 1246; and the title of Eminence from Urban VIII., in 1630.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now eleven Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Index, Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Seminaries and Universities. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains three tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature, and the Sacred Roman Rota; and, lastly, various offices, as the Apostolic Chancery, the Apostolic Datary, the Apostolic Chamber, the Secretariate of State, etc.

The States wherewith the Holy See maintains diplomatic relations are Austria, Bavaria, Belgium, Czechoslovakia, France, Germany, Hungary, Yugoslavia, Monaco, the Netherlands, Poland, Portugal, Rumania, Russia, Spain, and the United Kingdom (1914), together with most of the American Republics, except the United States and Mexico.

Within the British Empire the present number of Roman Catholic residential sees is 216, viz., 38 archbishoprics and 114 bishoprics, besides 54 apostolic vicariates (mostly held by Bishops of titular sees), and 10 apostolic prefectures: while the Roman Catholic population subject to King George V. is estimated at 14,439,941 souls, of whom 6,041,647 are in Europe; 2,682,397 in Asia; 699,063 in Africa; 3,842,660 in British America; and 1,174,154 in Australasia. Throughout the world the Roman Catholic population is reckoned at 31,888,975 souls, of whom 309,718,779 are of the Latin Rite (*Catholic Directory*, London).

RUMANIA.

(ROMÂNIA)

Reigning King.

Ferdinand I., King of Rumania, born August 24, 1865, nephew of the late King Carol, whom he succeeded on October 11, 1914. Married, January 10, 1893, to Princess Marie, daughter of the Duke of Saxe-Coburg and Gotha, born October 29, 1875.

Children of the King.—(1) Carol, born October 15, 1893, Crown Prince, married March 10, 1921, to Princess Helen of Greece; offspring: Michel, born October 25, 1921; (2) E'isabeth, born October 11, 1894; (3) Marie, born January 8, 1900, married to Alexander, King of the Serb, Croat, and Slovene State, June 8, 1922; (4) Nicholas, born August 18, 1903; (5) Ileana, born January 5, 1909.

The King has, in addition to revenues from certain Crown lands, an annual allowance of 2,500,000 lei, or 100,000*l.* The heir to the crown has an annual donation of 300,000 lei (12,000*l.*).

The union of the two Principalities of Wallachia and Moldavia was publicly proclaimed at Bucharest and Jassy on Dec. 23, 1861, the present name being given to the united provinces. The first ruler of Rumania was Colonel Cuza, who had been elected 'Hospodar,' or Lord, of Wallachia and of Moldavia in 1859, and who assumed the government under the title of Prince Alexandru Joan I. A revolution which broke out in February 1866 forced Prince Alexandru Joan to abdicate, and led to the election of Prince Carol I. The representatives of the people, assembled at Bucharest, proclaimed Rumania's independence from Turkey, May 21, 1877, which was confirmed by Art. 43 of the Congress of Berlin, signed July 13, 1878. King Carol I. reigned as Prince from 1866 to 1881, and as King from 1881 to 1914. In March, 1918, Bessarabia was joined to Rumania; Bukovina in November, 1918; and Transylvania in December, 1918.

Constitution and Government.

The Constituent Assembly elected in May and June, 1920, for United Rumania by universal, direct, and secret suffrage will have to unify the different constitutions of the Old Kingdom, Bessarabia, Bukovina, and Transylvania. The constitution of the Old Kingdom, which was voted in 1866 and twice modified, once in 1879 and again in 1884, provided for a Legislature of two Houses. The Senate consists (March, 1920) of 170 members (Old Kingdom, 82; Transylvania, 45; Bessarabia, 24; and Bukovina, 19), including 4 for the Universities and 19 Bishops. The Heir to the Crown is also a Senator. The Chamber of Deputies consists of 347 members (Old Kingdom, 168; Transylvania, 112; Bessarabia, 51; and Bukovina, 16). A Senator must be 40 years of age, and a Deputy 25. Members of either House must be Rumanians by birth or naturalisation, in full enjoyment of civil and political rights, and domiciled in the country. All citizens of 21 years, paying taxes, are electors. Both Senators and Deputies receive 160 lei per each day of actual attendance, besides 2000 lei per month and free railway passes. The King has a suspensive veto over all laws passed by the Chamber of Deputies and the Senate. The executive is vested in a council of Ministers.

The elections held on June 6, 1920, resulted in the return of the following parties:—Peoples' Party, 215; Federal Democrats, 34; Bessarabian Peasants, 25; Transylvanian Nationalists, 21; Socialists, 19; Independent Democrats, 6; other parties, 27.

The Cabinet (appointed January 19, 1922) is composed as follows:—

Prime Minister.—Joa Bratiano.

Minister of the Interior.—General Vaitoiano.

Minister of Foreign Affairs.—Jon Duca.

Minister of Agriculture.—A. Constantinesco.

Minister of Public Instruction.—Dr. Angelesco.

Minister of Finance.—Vintila Bratiano.

Minister of Labour.—G. Marzesco.

Minister of Public Worship.—C. Bano.

Minister of Justice.—J. Floresco.

Minister of Industry and Commerce.—B. Sasso.

Secretary of State for Bessarabia.—J. Inculetz.

Secretary of State for Bukovina.—J. Nestor.

Minister of War.—General G. Mardarescu.

Minister of Communications.—General Tr. Usovici.

Minister of Public Works.—Dr. Cosma.

LOCAL GOVERNMENT.

For purposes of local government Wallachia is divided into 17 districts, Moldavia into 13, the Dobrudja into 4, Bessarabia into 8, Bukovina into 11, and Transylvania (with Banat, Crisana and Maramuresh) into 24 districts, each of which has a prefect, a receiver of taxes, and a civil tribunal. In Rumania (1919) there are 735 districts and 5,864 communes, 129 urban and 5,735 rural. In the rural communes there are 15,593 villages and 1,048 hamlets. The appellations 'urban' and 'rural' do not depend on the number of inhabitants, but is given by law.

Area and Population.

As a result of the Treaties of Peace of 1919 Rumania was enlarged, and the area and population of the New Kingdom is shown as follows:—

Country.	Area in sq. miles	Population.		
		Males	Females	Total
Old Rumania	53 489	3,989,676	3,914,498	7,904,174
Bessarabia	17,146	1,198,900	1,145,900	2,344,800
Bukovina	4 030	395 963	404,135	800,098
Transylvania	22,312	1,850 480	1,327,887	2,678,367
Crisana	8,038	659,836	657,145	1,316,981
Maramuresh	6,258	378,205	387,461	765,666
Banat	11,009	799,102	793,031	1,592,133
Total	122,282	8,762,092	8,631,057	17,393,149

¹ Estimate for 1915.

The four historic divisions of Old Rumania were populated (1912) as follows:—Moldavia, 2,145,464 (area, 14,710 square miles); Grand Wallachia (Muntania), 3,298,394 (area, 29,810 square miles); Oltenia, 1,413,897; Dobrudja, 381,806 (area, 8,969 square miles.)

By the Treaty of Bucharest (August 7, 1913) between Bulgaria and Rumania, the former ceded to the latter 2,969 sq. miles of territory, with a population of 273,090, mostly Turks. The new land was formed into two departments, Durostor and Caliacra.

Among Rumanians there are racial differences of which the Rumanian census takes no account. In Central Moldavia and East Transylvania there are thousands of habitants of Magyar descent (Changer and Szeklers); in South Transylvania and in the Banat there are thousands of Saxons and Swabes. In Bukovina and Bessarabia there are some German and Ruthenian colonies. The communes along the Danube have some inhabitants of Bulgarian and Serbian origin; in the Dobrudja there are many foreign elements—Bulgars, Russians, Germans, but the greatest part of them are Turks and Tartars.

The number of births, deaths, and marriages, with surplus of births over deaths, was as follows (for the Old Kingdom) for three years :—

Years	Births	Deaths	Marriages	Surplus of Births over Deaths
1918	103,072	297,310	57,354	—194,238
1919	285,579	261,107	72,580	24,472
1920 ¹	375,978	297,816	136,678	78,162

¹ For Greater Rumania.

The principal towns in Greater Rumania are (population 1914) :—Bucharest, the capital and seat of Government, 345,628 (on January 6, 1917, 308,987—119,958 males and 189,029 females); Chisinau, 114,100; Cernauti, 87,128; Ismail, 85,600; Iasi (Jassy), 76,120; Galatz, 73,512; Timisioara, 72,223; Braila, 65,911; Oradea Mare, 64,169; Arad, 63,166; Cluj, 60,808; Ploesti, 57,376; Craiova, 51,877; Brasov, 41,056; Tughina, 36,400; Satul Mare, 34,892; Cetatea Alba, 33,600; Sibiu, 33,419; Botosani, 32,874; Buzeu, 29,483; Constantza, 27,662; Berlad, 25,367; Focsani, 25,287.

Religion, Instruction, Justice, &c.

Of the total population of Rumania (in 1918) 9,695,714 belonged to the Orthodox Church, 1,456,147 were Greek Catholics, 1,483,929 were Roman Catholics, 1,344,970 Protestants, 17,596 Armenians, 834,344 Jews and 44,087 Mahometans. The government of the Orthodox Church rests with the four archbishops, the first of them styled the Primate of Rumania, the second the Archbishop of Moldavia, the third of Transylvania, and the fourth of Bukovina. Besides, there are, ten bishops of the National Church. In Transylvania there is a Greek Catholic archbishop and three bishops. In Rumania there are three Roman Catholic Bishops, two Protestant and one Unitarian. The clergy of the National Orthodox Church are paid by the State. The clergy of the other denominations are subventioned by the State. Full liberty of religion is assured to every creed or sect.

Education is free and compulsory 'wherever there are schools,' and it is improving from year to year. In 1909, according to a special census return, 60·16 per cent. of the population over 7 years of age could neither read nor write; in 1909, 43·12 per cent., and in 1910, 41 per cent. of the army recruits could neither read nor write. In 1918-19 there were 5,764 elementary schools with 11,088 teachers and 692,896 pupils.

The secondary schools in 1918-19 were, for boys, 56 (38 State and 18 private) lyceums, 13 gymnasiums and 7 seminaries, these 76 institutions having 1,287 teachers and 44,983 pupils; for girls 66 (12 State and 54 private) high schools with 1,051 teachers and 9,584 pupils; 12 normal schools for men with 181 teachers and 2,425 students, and 4 for women with 93 teachers and 1,435 students; 75 professional schools for boys with 334 teachers and 3,221 students, and 54 for girls with 535 teachers; 25 commercial schools with 216 teachers and 4,656 pupils; 25 agricultural schools with 59 teachers and 669 pupils; 11 schools of domestic economy for girls with 35 teachers and 201 pupils. There are 4 universities: at Bucharest, founded in 1864 (289 professors and 4,644 students), Iasi (Jassy), founded in 1860 (172 professors and 952 students), Cluj (Kolozsvar), in Transylvania, founded in 1919 (1,980 students in 1920), and Cernauti (Czernowitz), in Bukovina, founded in 1920.

Justice is administered by a court of cassation, 11 appeal courts, 64 tribunals, and 494 justices of the peace. The prison population in 1920 numbered 15,536 (11,699 men, 1,618 women, 2,160 boys, and 59 girls). Assistance is given to the sick in 163 hospitals and *hospices* (departmental, communal, rural, and private).

Finance.

The following table shows (in thousands of lei) the revenue and expenditure for years ending March 31 (old style):—

	1919-20 ¹	1920-21 ¹	1921-22 ²	1922-23
Revenue . . .	1,114,687	3,546,102	6,226,900	10,498,233
Expenditure . .	4,430,611	6,250,865	5,545,411	10,498,283

¹ Actual.

² Estimate.

The main items of the Budget for 1922-23 were as follows:—

Revenue	Lei	Expenditure	Lei
Direct taxes . . .	650,000,000	Ministry of War . . .	925,019,042
Indirect taxes . . .	3,310,000,000	„ „ Finance . . .	1,926,600,000
Stamps and fees . . .	571,050,000	„ „ Education . . .	781,000,000
State monopolies . . .	1,626,500,000	„ „ the Interior . . .	65,000,000
Public services . . .	3,125,712,200	„ „ Public Works . . .	202,000,000
State domains . . .	186,086,000	„ „ Justice . . .	224,724,580
Subventions . . .	31,950,000	„ „ Agriculture . . .	298,560,596
Special revenues . . .	996,985,282	„ „ Commerce and Industry . . .	93,784,715
		„ „ Foreign Affairs . . .	32,281,600
		„ „ Public Worship . . .	215,000,000
		„ „ Labour . . .	22,500,000
		„ „ Communica- tions . . .	2,260,155,457
		Cabinet . . .	3,102,200
		Special expenditure . . .	2,828,565,292
Total . . .	10,498,283,482	Total . . .	10,498,283,482

The public debt of Rumania amounted on April 1, 1921, to 20,311,293,312 lei, of which 3,733,862,452 lei is the consolidated debt, and 121,500,000 lei the floating debt. This is exclusive of the proportions of the public debts of Austria-Hungary and Russia which have been assumed by Rumania, the total of which is estimated at 10,000,000,000 lei.

Defence.

Military service in Rumania is compulsory and universal from the ages of 21 to 46. The normal terms of service are 2 years in the infantry and 3 years in the other arms, followed by 5, or 4, years in the reserve of the first line. The men then pass to the second line, or reserve force, for 10 years, after which they are transferred to the territorial force at the age of 38, and remain in it 4 years, thus completing 21 years' service. Young men exempted from service in the ranks, and those surplus to the annual contingent, are posted to a supplementary reserve.

By the Treaty of Bucharest the army was reduced to 30,000 men, whilst matériel, &c., was controlled by the Germans. A partial mobilisation was ordered on November 9, 1918; on the 10th an ultimatum was handed to the German commander demanding evacuation of occupied territory within 24 hours; and on the 18th the Allies entered Bucharest, which had fallen to the Germans on December 6, 1916. Some 400,000 men were again placed under arms. A gradual reduction of this number was begun in 1919, and by January, 1923, the approximate strength of the army was 200,000. These were organised in 7 army corps. Each army corps was composed of 3 divisions and army corps troops. The division consisted of 2 brigades, each of 2 regiments of 3 battalions, and a battalion of chasseurs, 13 battalions in all; an artillery brigade of 2 regiments of field artillery and a group of howitzers; divisional cavalry and divisional engineers.

There are 2 cavalry divisions in the army each composed of 2 brigade of 2 regiments, and 2 batteries of horse artillery.

The infantry is armed with the Mannlicher rifle; the Rumanian artillery is still largely armed with guns of the Krupp type, but a considerable number of batteries have the French type of 75 mm. field guns and French medium and light howitzers. The military budget for 1922-23 was 1,700,000,000 lei.

In the Black Sea are 2 flotilla leaders, 6 torpedo boats, 4 gunboats formerly French, and 6 motor launches. The Danube force now comprises 7 monitors (600 tons, 3 4·7-in. guns, 7 vedettes and some small craft, and there are 7 ex-Austrian torpedo boats for police duties. A naval base has been established at Sulina, on the Black Sea, where is the old cruiser *Elizabetha*, used as a hulk, with some mine-layers and small vessels. The naval school is in Galatz.

Production and Industry.

According to a statistical estimate, the distribution of the soil of Rumania with respect to agriculture in 1919 was as follows:—Ploughed land, 30,715,834 acres; meadows, 4,580,267 acres; vineyards, 393,533 acres; forests 16,918,964 acres; pastures, 7,218,505 acres; other lands, 12,884,387 acres. Total, 72,711,490 acres.

In 1922, 1921 and 1920 the chief agricultural crops for Greater Rumania were as follows:—

Crop	Area cultivated		Production	
	1921	1920	1921	1922
	Acres	Acres	Tons	Tons
Wheat	6,148,853	5,006,644	2,138,146	2,600,000
Rye	806,803	771,988	230,673	265,000
Barley	3,856,983	3,384,733	985,290	1,955,000
Oats	3,058,356	2,164,701	963,167	1,430,000
Maize	8,510,172	7,544,280	2,772,897	2,360,000
Total	22,281,167	18,871,746	7,090,173	8,610,000

The tobacco area in Transylvania in 1920 was 11,250 acres (7,500 acres in 1919) and the yield 5,000 tons.

The forests of Rumania have an aggregate area of 16,918,964 acres, of which 6,820,000 acres are in the Old Kingdom, 5,500,000 acres in Transylvania, 1,700,000 acres in Maramuresh, and 1,500,000 acres in the Banat.

In 1920, Rumania had 1,497,009 horses, 4,875,624 cattle, 9,189,918 sheep and goats, and 2,513,610 swine.

The principal minerals are salt, lignite, iron and copper ores, and petroleum. Petroleum springs, both government and private, are worked at Prahova, Dambovitza, Bacau, and Buzau. The total output reached in 1900, 250,000 metric tons; in 1915, 1,673,145; in 1916, 1,244,093; in 1917, 517,491; in 1918, 1,214,219; in 1919, 919,847; in 1920, 1,034,022; in 1921, 1,160,885. The salt mines are situated in the region of the lower Carpathians, from Bukovina to the west of Oltenic, a stretch of over 250 square miles. Salt mining has been a state monopoly since 1863 (production in 1921, 232,800 tons). Output of coal, 1921, 1,785,000 tons (1,570,000 tons in 1920).

Industries of some importance are flour milling, brewing, and distilling. In 1919 there were 2,747 industrial establishments, with a capital of 2,837,296,627 lei, and employing 157,423 workmen.

Commerce.

The values of the imports into and exports from Rumania, exclusive of gold and silver (in sterling 25 lei = 1*l.*) were:—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1912	25,516,220	25,684,148	1915	13,185,828	22,581,469
1913	23,600,004	26,828,212	1919	143,317,825	4,115,447
1914	19,969,922	17,896,666	1920	276,077,608	137,355,987

A Treaty of Commerce and Navigation providing for the most-favoured-nation treatment between Rumania and Great Britain was signed at Bucharest on October 31, 1905.

Imports and exports are estimated in accordance with values settled by a Commission appointed from time to time.

In 1920 the chief imports and exports were as follows :—

Classes.	Imports		Exports	
	Tons	Lei	Tons	Lei
Live-stock	199	2,032,728	572	6,569,704
Alimentary animal products	7,732	83,099,852	2,156	19,400,212
Non-alimentary animal products	655	8,362,307	—	90
Hides, articles thereof	3,985	468,268,538	577	7,274,576
Furs	56	7,797,700	23	1,093,986
Wool and hair, and manufactures thereof	3,113	704,421,764	155	2,108,621
Animal waste and various animal sub- stances	2,770	58,007,999	1,234	6,101,078
Silk and manufactures thereof	298	196,256,440	—	17,200
Cereals and cereal by-products	22,040	95,540,104	977,522	2,303,882,167
Vegetables, flours, seeds, and plants	3,921	48,054,641	83,890	226,997,218
Vegetable oils	636	12,306,414	747	9,520,824
Beverages	239	5,249,718	1,783	9,894,032
Colonial fruits and food-stuffs	18,137	200,024,209	6,421	22,064,189
Sugar and manufactures thereof	18,051	234,522,505	18	163,161
Trees, timber, and manufactures thereof	33,247	76,953,921	91,834	120,348,381
Vegetable fibres, and manufactures thereof	23,026	2,564,514,112	2	102,420
Ready-made clothes	6,142	352,093,681	36	788,645

Explosives	12,455	90,609,598	—	—
Total	304,884	6,901,940,204	1,461,004	3,433,898,435

Total trade between Rumania and United Kingdom for five years (Board of Trade Returns) in sterling :—

	1917	1919	1920	1921	1922
Imports from Rumania to U. Kingdom	—	2,742	3,231,892	3,390,567	1,695,489
Exports to Rumania from U. Kingdom	701,040	5,585,085	7,112,462	5,798,593	2,636,441

Shipping and Communications.

In 1919 the merchant navy of Rumania consisted of 158 vessels of 71,158 tons, including 17 steamers of 29,441 tons. Number of vessels entering Rumanian ports in 1919 was 10,546 of 2,991,095 tons.

The European Commission of the Danube, called into being in 1856, consisted before the war of 8 delegates, one representing each of the following powers : Austria-Hungary, France,

Germany, Great Britain, Italy, Rumania, Russia, and Turkey. By article 346 of the Treaty of Versailles, only representatives of Great Britain, France, Italy and Rumania constitute the Commission at present. It has its seat at Galatz. Since November 24, 1904, it has existed, or will exist, for successive periods of 3 years unless denounced by one of the contracting powers a year before the conclusion of any such period. By the operations of the Commission the Danube below Braila and along the Sulina branch has been deepened and corrected, so that at Sulina the depth has been increased from 9 ft. to 24 ft., and of the Sulina branch the minimum depth has been increased from 8 ft. to 18½ ft., while by canalisation and other works the navigation has been shortened from 45½ to 33½ nautical miles. The income of the Commission is derived entirely from taxes levied on shipping leaving the river.

Railway history in Rumania commenced in 1860. In 1920 Rumania had 7,246 miles of railway (Old Rumania, 2,707 miles; Transylvania and the Banat, 3,438 miles; Bessarabia, 701 miles; Bukovina, 400 miles). The State has the working of all the lines, and has besides, under the general railway direction, a commercial navigation service on the Danube and Black Sea. Several additional lines are projected or in course of construction to the extent of 460 miles.

Within Rumania there were 27,635 miles of metalled roads in 1915.

In 1915-16 there were 4,700 post-offices, through which there passed 21,965,098 letters, 31,969,461 post-cards, and 76,606,141 newspapers, samples, &c. In 1915-16 there were 8,612 miles of telegraph lines, and 18,801 miles of wire, on which 3,864,825 messages were forwarded. The number of offices was 3,143. In 1913-14 there were 7 urban telephone systems with 1,004 miles of line and 24,605 miles of wire, and 7,966 inter-urban systems with 24,168 miles of line and 45,378 miles of wire. On the urban systems during the year there were 24,860,479 conversations, and on the inter-urban 1,689,596.

Money, Weights, and Measures.

The National Bank of Rumania has a capital and reserves of 39,402,565 lei; its notes in circulation on December 31, 1921, were of the value of 13,722,231,453 lei. Other public credit institutions are a Savings Bank, a Deposit and Consignment Bank, an Agricultural Loan Bank, 1,849 Popular Banks, a Rural *Crédit Foncier*, 2 Urban *Crédit Fonciers* (at Bucharest and Jassi), an Agricultural Bank, and a *Cassa Rurala*, an institution whose purpose is to buy properties and sell them in lots to peasants. There are also three private banking institutions.

A unified paper currency came into use for the whole of Rumania on August 1, 1920.

The decimal system was introduced into Rumania in 1876, the unit of the monetary system being the *leu* (of 100 *bani*), equivalent to the franc. The gold *leu* is the monetary unit. Silver is legal tender up to 50 lei only. Gold coins are 20-, 10-, and 5-lei pieces. Nickel is coined in 5-, 10-, and 20-centime (*bani*) pieces.

Diplomatic and Consular Representatives.

1. OF RUMANIA IN GREAT BRITAIN.

Envoy and Minister.—Nicholas Titulesco. (Appointed December 1921.)

Secretaries.—Radu T. Djuvara, Frederic C. Nano, Viorel Virgil Tilea, Constantin Constantinesco, Nicolas Mishu and Nicolas Michel Vladesco.

Military Attaché.—Lt.-Col. Douglas Capitaneano, D.S.O.

Commercial Attaché.—G. Michaelesco.

2. OF GREAT BRITAIN IN RUMANIA.

Envoy and Minister.—Sir Herbert Guy Dering, K.C.M.G., K.C.I.E., M.V.O. (Appointed August 28, 1920.)

First Secretary.—J. H. E. Millington-Drake.

Third Secretary.—H. L. Baggallay.

Military Attaché.—Col. F. J. Duncan, C.B., C.M.G., D.S.O.

Naval Attaché.—Commander R. T. Down, D.S.O., R.N.

Commercial Secretary.—A. A. Adams.

Consul at Bucharest.—E. Keyser.

There are Consuls at Braila and Czernowitz; and Vice-Consuls at Braila, Constantza, and Galatz.

Statistical and other Books of Reference concerning Rumania.

RUSSIA

(UNION OF SOCIALIST SOVIET REPUBLICS.)

ON March 12, 1917, a revolution broke out in Russia, as a result of which the Emperor Nicholas II abdicated. A Provisional Government under Prince George Lvoff was set up by the Duma, which held office until May 16, 1917, when it was reorganised. On August 6, 1917, a new Cabinet under M. Alexander Kerensky was formed. This too was reorganised on October 8, 1917, and maintained itself until November 7, 1917, when the Military Revolutionary Committee of the Petrograd Soviet seized the government authority, and handed it over the next day to the All-Russian Congress of Soviets.

The Constitution of the new State was adopted at the fifth All-Russian Congress of Soviets, on July 10, 1918, and additions or alterations were made at subsequent Soviet Congresses (December, 1920, 1921, 1922). On December 30, 1922, delegates from the four principal Soviet Republics met at Moscow and concluded a Treaty of Union, setting up a Union of Socialist Soviet Republics, covering Russia (R.S.F.S.R.), Ukraine (U.S.S.R.), White Russia (W.R.S.S.R.), and the Transcaucasian Federation (T.S.F.S.R.).

Russia is now a Union governed by a Union Central Executive Committee and a Union Council of People's Commissaries. The former, consisting of 371 members, is elected annually by the Union Congress of Soviets, the supreme authority of the Union, and between Congresses is the sovereign legislative, administrative, and judicial authority of the Union. It meets for fortnightly sessions every three months, current business being transacted by the 'Presidium' (the chairman, secretary, and 15 members).

Chairman of Presidium.—M. Kalinin.

Secretary.—M. Sapronov.

Subordinate legislative and executive authority is vested in the Union Council of People's Commissaries, or Cabinet. Each People's Commissary is the head of a 'collegium' or Board responsible for the work of the People's Commissariat or ministry under its care. Decisions of the Union Council of People's Commissaries may be revised by the Presidium of the Union Central Executive Committee, which alone has the right of making war, ratifying peace treaties, conferring decorations, receiving the credentials of foreign diplomatic representatives, etc. The Council of People's Commissaries is also responsible to the full Central Executive Committee and to the Union Congress of Soviets, to which it makes a report as a whole, in addition to the departmental reports.

The following is the constitution of the Council of People's Commissaries, appointed in December, 1922 :—

1. *President.*—M. Vladimir Ilich Ulianov-Lenin.
2. *Foreign Affairs.*—M. G. V. Chicherin.
3. *War and Marine.*—M. B. D. Trotsky.
4. *Finance.*—M. G. Y. Sokolnikov.
5. *Health.*—M. N. A. Semashko.
6. *Posts and Telegraphs.*—M. V. S. Dorgulevsky.
7. *Transport.*—M. F. E. Dzerzhinsky.
8. *Supreme Economic Council.*—M. P. A. Bogdanov.
9. *Agriculture.*—M. V. G. Yakovenko.
10. *Food.*—M. A. P. Brickhanov.
11. *Justice.*—M. D. I. Karsky.
12. *Social Welfare.*—M. N. A. Miliutin (Assistant).
13. *Labour.*—M. V. V. Schmidt.
14. *Education.*—M. A. V. Lunacharsky.
15. *Nationalities.*—M. I. V. Stalin.
16. *Workers' and Peasants' Inspection.*—M. A. D. Tsurupa.
17. *Home Affairs.*—M. F. E. Dzerzhinsky.
18. *Foreign Trade.*—M. L. B. Krassin.

In addition, there are three vice-chairmen of the Council of People's Commissaries, and the Procureur-General of the Republic enters the Council with a consultative voice, as does also the chairman of the State Political Department.

Each of the four constituent bodies of the Union—R.S.F.S.R., Ukraine, White Russia, and Transcaucasia—retains its own Central Executive Committee and Council of People's Commissaries: the Union existing to co-ordinate diplomatic, military, economic, and labour activities only.

The British Government has concluded a Trade Agreement with the Soviet Government (March 16, 1921), but has not recognised it *de jure*.

Constitution and Government.

The greater part of the former Russian Empire is under the rule of the Soviet Government. But a number of States have gradually evolved and are maintaining themselves on the borders of the old Empire. Five have received formal recognition by the Western Powers, viz., Finland, Poland, Estonia, Latvia, and Lithuania. A number of other independent Republics, which have adopted the Soviet form of Government, are federated with the Government of Russia. These include: White Russia, the Ukraine, Armenia, Georgia, Azerbaijan. (The last three constituting the Transcaucasian Federation of Soviet Republics.) All the remaining territory of the former Russian Empire, with the exception of the five non-Soviet States previously mentioned, and of Khiva and Bokhara, which are 'popular' and not 'Socialist' Soviet Republics, and are therefore allied, not federated, with the others, constitutes the Russian Socialist Federal Soviet Republic (R.S.F.S.R.). This contains the provinces of Russia proper, autonomous Republics (Turkistan, Kirghiz, Tartar, Bashkir, Daghestan, Mountain, Yakutsk, Crimea), and autonomous regions or areas (Karelian Commune, German Volga Commune, Votiak and Mari areas, Chuvash area, Far Eastern region—previous to December, 1922, the Far Eastern Republic). The autonomous republics are governed by their own Central Executive Committee and Council of People's Commissaries: the regions and areas are governed by executive committees elected by the local Congress of Soviets, like the ordinary provinces (gubernii).

So far as the Russian Socialist Federal Soviet Republic is concerned, a Constitution was adopted by the fifth All-Russian Soviet Congress, the text of which was published on July 19, 1918, and amended and amplified 1919-1922. According to the Constitution, which has been declared a 'fundamental law' of the Republic, Russia is a Republic of Soviets of Workers', Soldiers', and Peasants' Deputies; and all central and local authority is vested in these Soviets. Private property in land is abolished, all land being the common property of the people; all forests, mines, waters having a national importance and all live-stock and fixtures, model estates and agricultural concerns are all national property. The State owns all factories, mines, railways, and other means of production and transport, but may, according to recent legislation, lease them to private individuals, corporations, or State trusts.

The Russian Republic is a free Socialist community of all the labouring masses of Russia. Freedom of conscience, of opinion, of the press, and of meeting are guaranteed by the Constitution. In order to protect the conquests of the revolution, universal military service is incumbent on all citizens. The privilege of defending the Revolution with arms is, however, reserved for the labouring classes only; the non-labouring sections of the population will discharge other military duties. The political rights of Russian citizenship will be granted without any formalities to foreigners residing on the territory of the Russian Republic for purposes of labour.

The highest authority in the State is the All-Russian Congress of Soviets, which consists of representatives of town Soviets on the basis of one delegate for every 25,000 inhabitants, and of Provincial Congresses of Soviets on the basis of one delegate for every 125,000 inhabitants. The Congress elects an All-Russian Central Executive Committee, consisting of 886 members, which constitute the supreme legislative, administrative, and controlling body in the Republic, and meets not less frequently than once in two months, current affairs being administered by a Standing Committee (Presidium). The Central Executive Committee also forms a Council of

People's Commissaries for the general administration of the affairs of the Republic, to consist of 18 People's Commissariats (see list above). Each People's Commissary has a Board attached to him under his chairmanship.

The franchise is enjoyed irrespective of religion, nationality, residence, sex, etc., by all citizens over 18 years of age who earn their livelihood by productive labour, and soldiers and sailors in the Red Army and Navy.

The following classes are deprived of the franchise: Those employing others for profit, or living on unearned income, monks and priests of all religions, agents and employees of the former police, secret service, etc., members of the former reigning dynasty, imbeciles and wards, and persons deprived of civic rights by the criminal courts.

Provision is also made in the Constitution for Local Government by means of local Soviets in villages and towns, with district, provincial and regional Congresses, which meet annually. Each Congress elects an Executive Committee, which administers the territory under its control until the next Congress.

Area and Population

PROGRESS AND PRESENT CONDITION.

The old Empire of Russia comprised one-seventh of the land-surface of the globe. Its area, without internal waters, was, since the Treaty of Portsmouth, 8,417,118 English square miles (19,156,587·7 square versts).

Until 1897 there have been but various enumerations of the population called *revisions*. On January 28 (February 9), 1897, a census was taken over the whole of the country. The rapidity of growth of the population of the country (its acquisitions being included in the figures of population) is seen from the following:—

Year	Population	Year	Population
1722	14,000,000	1859	74,000,000
1796	36,000,000	1897	129,209,297
1815	45,000,000	1914	178,378,800
1835	60,000,000	1915	182,182,600

Of the total in 1915 131,796,800 were in European Russia, 13,229,100 in the Caucasus, 10,377,900 in Siberia, and 11,254,100 in the Central Asiatic Provinces.

The total area of the Soviet Union is 8,166,130 square miles, with a population of 131,546,045.

As the census did not completely cover all areas of the Soviet Union and the associated republics, it was necessary in some cases to supplement the returns with estimates based on the most recent statistics available. The final census of 1920, therefore, is not precise; but it nevertheless provides an accurate enough basis for practical purposes. The following are the main statistics of area and population of the Union, distinguishing the various autonomous areas and associated Republics.

1. *European Russia.*

Three distinct nationalities inhabit this territory :—

	Territory (square miles).	Population (both sexes).
Great Russians (thirty-nine provinces, the Don area, and three provinces of N. Caucasus)	1,290,440	65,761,898
Ukraine (nine provinces)	174,510	26,001,802
White Russia	23,290	1,684,223
Total	1,488,240	93,387,923

2. *Minor Areas of the R.S.F.S.R.*

On the north, south, and east of the central nucleus of Russia lie other areas forming different administrative and political units, the population of which is often mixed, but with preponderating elements which are the basis of their political divisions. All of these territories under the Soviet régime have complete local autonomy. The following table shows the area and population of the various territories :—

	Territory (square miles).	Population (both sexes).
<i>Labour Communes.</i>		
Karelia	28,890	144,392*
German Volga Commune	7,680	454,368
<i>Autonomous Areas.</i>		
Votlak	11,800	686,049
Ziranian	107,060	186,878
Kalmuk	38,440	126,256
Mari	6,040	300,069
Chuvash	6,720	758,161
<i>Autonomous Republics.</i>		
Bashkir	40,420	1,268,132
Tartar	25,960	2,852,135
Crimean	15,060	761,600
Mountain (N. Caucasus)	17,420	808,420
Daghestan	13,730	798,181
Kirghiz	843,640	5,058,553
Turkestan	577,400	7,201,551
Total	1,739,760	21,404,745

3. *Siberia.*

In Siberia there are 12 provinces with a territory of 4,863,160 square miles and a population of 11,069,550. These form an integral part of the R.S.F.S.R.

4. *Transcaucasia.*

The following Republics in addition to the White Russian and Ukrainian Republics, constitute, with the R.S.F.S.R., the Union of Soviet Republics :—

Republics.	Area (square miles).	Population.
Azerbaijan	33,970	2,096,973
Armenia	15,240	1,214,391
Georgia	25,760	2,372,403
Total	74,970	5,683,767

5. *New Asiatic Connections.*

Bokhara, Khiva, and Mongolia have made agreements of a permanent character with the R.S.F.S.R. The area and population of these countries is as follows :—

Country.	Area (square miles).	Population.
Bokhara	79,440	3,000,000
Khiva	24,310	519,438
Mongolia ¹	1,367,600	643,000
Total	1,471,350	4,164,438

¹ For the claims of Russia to Mongolia see section on Mongolia under China, p. 794.

The principal towns of Soviet Russia with their population for the years given are:—Petrograd (1915), 2,318,615; Moscow (1920), 1,050,011; Odessa (1912), 631,040; Kharkov (1913), 258,360; Kazan (1913), 195,300.

• • Religion.

The Soviet Government has disestablished the Church and appropriated certain categories of its property. Since the revolution of March, 1917, all religions may be freely professed in the Empire. The prevailing religion of the country is the Græco-Russian, officially called the Orthodox Faith. It has its own independent synod, but maintains the relations of a sister Church with the four Orthodox patriarchates of Constantinople, Alexandria, Antioch, and Jerusalem. The Holy Synod, the board of government of the Russian Church, was established in 1721; to it was committed the superintendence of the religious affairs of the Empire. It was composed of the three metropolitans (Petrograd, Moscow, and Kiev), the archbishop of Georgia (Caucasus), and several bishops sitting in turn.

It is estimated that there are more than 12,000,000 dissenters in Great Russia alone. The affairs of the Roman Catholic Church are entrusted to a Collegium, and those of the Lutheran Church to a Consistory, both settled at Petrograd. Roman Catholics are most numerous in the former Polish provinces, Lutherans in those of the Baltic, and Mohammedans in Eastern and Southern Russia, while the Jews are almost entirely settled in the towns and larger villages of the western and south-western provinces.

Before the Revolution, Russia was divided into 66 bishoprics (*eparchiya*), which were under 3 metropolitans, 14 archbishops, and 50 bishops; the latter had under them 37 vicars; all of them were of the monastic clergy. The management of Church affairs was in the hands of 62 'consistoria.' For Roman Catholics there was an Archbishop of Warsaw and another of Mohilev, each with six suffragan bishoprics. Of the suffragans of Mohilev one was of the Græco-Ruthenian rite, of which rite there was another bishop immediately subject to Rome.

Instruction.

The highest educational authority in the country is centred in the Commissariat for Education, which has replaced the former Ministry of Popular Education and enlarged its scope so as to cover the whole field of popular education, having taken over (1) the State theatres, the Academy of Arts, the Imperial Musical Society, and various art and musical schools and institutions; (2) the educational institutions of a more or less specialised type which had been conducted by various other ministries and State departments; and (3) municipal and *zemstvo* schools. The Commissariat consists of three 'sections' and a few special 'departments,' the 'sections' being: (1) The Pedagogical Section, which includes departments of 'the Unified Labour School,' 'school reform,' technical schools, pre-school education, out-of-school education, and training of teachers; (2) the Scientific Section, which includes departments of scientific societies, higher educational institutions, and libraries; and (3) the Art Section, which includes departments of representative arts, preservation of monuments, music, theatres, and cinema.

One of the principal reforms carried out by the Commissariat for Education has been the introduction of 'the Unified Labour School,' which has superseded the various types of elementary and secondary schools of the pre-revolutionary period. The labour school has two grades, one for children from 8 to 12, and the other for children from 13 to 16.

Education is made obligatory, and no private schools of any kind are permitted. Co-education has been adopted in all schools. The principle of 'labour' education is applied differently in the schools of each grade; in the first grade children are taught to make their school self-supporting; in the second technical work is conducted as a part of the general industrial life of the country.

Owing to the necessity of balancing the Budget, it was decided in 1922 to transfer elementary and secondary education to the local authorities, payment being authorised in case of necessity, although a minimum of free places is compulsory. Grants in aid continue to be made by the State, however.

In 1911 there were 47,855 elementary and secondary schools with 3,060,000 pupils; in 1919, 63,317 schools, with 4,796,000 pupils; in 1921, 94,205 schools with 7,264,108 pupils; in 1922, 55,000 schools with 4,750,000 pupils.

Previous to the revolution universities existed in the following places in the territory now included in the Soviet Republic and administered by the People's Commissariat for Education: Moscow (2), Petrograd, Kazan, Saratov, Tomsk, Perm, Irkutsk. The Universities of Dorpat and Warsaw, evacuated during the war, were reorganised in 1918 as the Voronezh and Don Universities, and in the same year another was set up at Nizhni-Novgorod. In 1919 universities were established at Yaroslavl, Smolensk,

Kostroma, Tambov, Astrakhan, Tashkent, Samara, Simbirsk, Orel ; in 1920, at Ekaterinburg, Ekaterinodar, and Veliki Ustug.

In addition to the institutes of various descriptions—medicine, economic, archaeological, veterinary, philological—existing before the revolution in various larger towns, others have been established for the study of medicine (Moscow, Petrograd), economics (Petrograd, Moscow), archaeology (Caucasus and Don), veterinary science (Petrograd, Saratov, Moscow, Novocherkassk), geography (Petrograd), philology (Petrograd), and radiology (Petrograd).

In 1914 there existed 1,600 places of technical education, elementary and advanced, with 170,000 students; in 1919, 2,300, with 200,000 students; on Feb. 1, 1921, 3,758 schools with 298,263 students. These include 326 higher schools and polytechnics and 34 'workers' faculties' (preliminary courses attached to higher technical institutions) with 17,000 students.

Justice and Crime.

By two decrees, in November 1917 and February 1918, the old judicial system was radically changed. Civil and minor criminal cases were handed over to popular courts, consisting of one judge and two assessors, elected in rotation from a list prepared by the local Soviet. Sentences might be revised by a district or area council of judges. Criminal cases, including economic and political counter-revolution, were handed over to provincial revolutionary tribunals, consisting of one judge and six assessors, elected as above. Appeals from these tribunals lay only to the All-Russian Central Executive Committee. A Supreme Judicial Control (Board) was established as part of the People's Commissariat for Justice, to see that sentences corresponded to the law.

In 1919 the functions of the popular court, consisting of a judge and two or six assessors (all elected), were still further widened. Appeals could lie to the provincial councils of judges. The provincial revolutionary tribunals, consisting of one permanent chairman and two members chosen in rotation by the provincial executives, had their competence limited to strictly political crimes. This system was confirmed in 1920, when it was also provided that the defence might be assumed by any citizen, as well as by the registered lawyers.

In 1922 the provincial revolutionary tribunals were amalgamated with the provincial councils of judges, which, retaining their elective character, thus became the sole supreme court for all cases within the boundaries of the province.

At the present time appeal from all courts is first to the Supreme Judicial Control Board, which does not hear arguments but examines the sentence and evidence, if necessary directing a re-trial. Major crimes are dealt with in the same way by the Cassation Board of the Supreme Tribunal, an integral part of the All-Russian Central Executive Committee (as the embodiment of the judicial sovereignty of the State).

The All-Russian Extraordinary Commission, which during the first four years of the Revolution was invested with special powers for combating counter-revolution and sabotage, was abolished by decree in February, 1922, its investigating functions being handed over to the State Political Department of the Commissariat for Home Affairs. No extraordinary procedure in actual prosecution of offenders now exists.

A recent decree institutes a Public Prosecutor of the Republic, with provincial procureurs directly subordinated to him. The function of this organisation is to supervise the correct working of the judiciary and the application of the laws.

Finance.

The budget balances for four years are shown as follows (in millions of paper roubles) :—

	1918	1919	1920	1921	1922 ¹ (Nine Months)	1922-23 ¹
Revenue	15,580	48,959	159,604	4,189,900	368	1,056
Expenditure	46,706	215,402	1,215,159	26,076,816	922	1,418
Deficit	31,126	166,443	1,055,555	21,936,916	554	362
Deficit per cent.	67	77	87	£4	60	25

¹ Gold roubles.

On September 1, 1917, the total indebtedness of Russia amounted to 32,300 million roubles, made up as follows :—Pre-war debt, 8,800 million roubles ; seven internal war loans, 10,500 million roubles ; loans contracted abroad, 8,000 million roubles ; short-dated loans, 5,000 million roubles. On March 31, 1921, the indebtedness of Russia to Great Britain was £561,402,000 (excluding interest since December 31, 1918).

Defence.**I. ARMY.**

By a decree of February 1, 1918, the Government established a Workers and Peasants Red Army of volunteers, and under the pressure of military events the organisation and discipline of that army steadily improved. A large number of regular officers of the old Russian army joined the Red Army either voluntarily or under compulsion, an efficient general staff was organised for planning and executing military operations, and most of the former rules of military discipline were gradually reintroduced. Wherever former officers were suspected of lukewarm sympathies with their new position, a civilian 'political Commissary' was attached to them to supervise their work and organise political propaganda in the unit for which he was responsible. Many officers in the course of the civil war by their activities justified the withdrawal of the Commissary, in other cases the Commissary himself acquired the necessary military experience to enable him to take over command. There are still a large number of units, however, with the dual organisation in the Red Army.

The Red Army is supplemented by the militia, organised on a basis of universal military service. Training begins at the age of 18, and consists of a preliminary course of 96 hours, lasting 1½ months, and a supplementary course of 280 hours, lasting 28 days. For militia purposes the territory of the Republic is divided into 93 regimental districts, sub-divided into battalion, company, and platoon subdistricts. Each of the latter consists of several 'training points,' usually an urban centre or a factory : there are 28,000 of these in all.

In December, 1920, according to M. Trotsky's report at the Ninth Soviet Congress (December, 1921), the strength of the Red Army was 5,300,000. More peaceful conditions permitted its reduction in 1921 to a strength of 1,595,000. During 1922 further reductions took place, bringing the total present strength down to 600,000. About two-thirds of the officers come

from the worker and peasant class, 43 per cent. have had no specialist military training, and 10 per cent. have passed through Soviet training schools and courses.

II. NAVY.

Some reconstruction of the Russian Navy is in progress. Certainly it is not a negligible force. The Soviet Government has shown so much ability in reconstructing its Army, that the Fleet may yet be made effective. There were manoeuvres in the Gulf of Finland in the autumn, concluding with an attack on Kronstadt, designed to test the defence of Petrograd, in which the flying service took part. Trotsky is directing the naval preparation, and it is officially stated that a reconstitution of the forces is contemplated. Construction and reconstruction of the flotillas has gone on both in the Baltic and the Black Seas. There are four battleships. The four battle-cruisers, two launched in 1915 and two in 1917, *Borodino*, *Navarin*, *Ismail*, and *Kinburn*, upon which work was stopped, are not likely to be completed.

In the Black Sea the force is yet inconsiderable. In April, 1919, by the action of secret hostile agents the main machinery was wrecked by explosive means in five of the battleships, and General Wrangel's force, comprising one Dreadnought, 10 destroyers, 4 submarines and other vessels arrived at Bizerta to be placed under French protection, where they will probably be broken up or sold. The Soviet Government has entered a protest.

State dockyards were at Nevsky, New Admiralty and Galernyi Ostrov, Petrograd; Kronstadt, Sevastopol, and Vladivostok. The New Admiralty is the only establishment apparently now at work. Guns were made at the Putiloff steel works, but only the shipyard there is believed to be working.

The following table gives the ships remaining of the armour-clad fleet and principal cruisers of the Baltic and the Black Sea Fleets, the new names being inserted.

BALTIC FLEET.

Date of Launch	Name	Displacement	Horse-power	Speed	Officers and Men	Main armament
<i>Dreadnoughts.</i>						
1911	Pariskaja-Kommuna Poltava Gangut Marat.	23,000	42,000	23	59—1,000	12 12in.; 16 4.8in.

The Pariskaja-Kommuna and Marat are the former Sevastopol and Petropavlovsk. The Respublica (1906), 18,600 tons, is believed to be in good condition.

Armoured Cruiser.

1906 | Rurik. . . | 16,900 | 19,700 | 21½ | 908 | 4 10in.; 8 8in.

Light Cruiser.

1915 | Svetlana. . . | 6,800 | 50,000 | 30 | — | 15 6in.; 4 3.9in.

There remain now in the Baltic about twenty first-class destroyers and some forty older and smaller. The modern submarines are about fifteen in number. There are also mine-

sweeping trawlers, motor-boats, and surveying and training ships. The flying service includes 50 or 60 planes. A small destroyer and submarine force is in the Arctic.

BLACK SEA FLEET.

Date of Launch	Name	Displacement	Horse-power	Speed	Officers and Men	Main armament
<i>Dreadnought.</i>						
1916	<i>Demokratiya</i>	27,300	29,700	21	—	12 12in.; 20 5·2in.
<i>Light Cruisers.</i>						
1915	<i>Admiral Lazareff</i>	7,600	55,000	32	—	16 5·1in.
1917	<i>Nakhimoff</i>					
1917	<i>Istomine</i>					
1917	<i>Korvilloff</i>					

The battleship *Demokratiya* at Nikolaiëff and the eight cruisers appear not to have been completed. Two divisions of destroyers in the Black Sea include about 24 boats. There were two modern submarines, and more recently several have been sent in parts overland from the Baltic. A number of useful auxiliaries are in the Black Sea, and the flying service includes about 40 various planes. There is a flotilla on the Dnieper, and a small force is in the Caspian.

Production and Industry.

The economic system inaugurated by the Soviet Government is based on the conception of State ownership and control of the principal means of production, distribution and exchange. During the first eight months after the November revolution the nationalisation of various industrial and trading enterprises was effected largely by local Soviets, which followed no definite plan. This led to a number of working undertakings being brought to a standstill, as the necessary administrative machinery was either entirely lacking or inadequate for coping with the immense task of setting up a public organisation of industry. To remedy the situation and introduce a greater unity and efficiency of method the Soviet Government issued a decree, dated June 28, 1918, which specified the conditions governing the nationalisation of private enterprises. Thus, only large and well-equipped factories and works were to be taken over by the State, the smaller undertakings being left in the hands of their owners. But even those liable to nationalisation were not to be taken over until a proper organisation for running them had been established. On April 1, 1920, out of 6,775 industrial establishments on the territory of Soviet Russia, employing 1,185,542 workpeople, there had been nationalised 4,141, employing 983,049 workpeople.

All industry was controlled through the Supreme Economic Council, with about 50 industrial departments and its local organs.

Side by side with this policy was developed that of compulsory requisitioning of grain from the peasants, to meet the primary requirements of the town population and the Army. Beginning as an organised series of requisitions to meet the food shortage in 1918, it was rapidly developed through the Food Commissariat into a regular series of *corn levies*, distributed amongst provinces according to harvest statistics, and redistributed amongst

the several villages, which were made collectively responsible for their quotas. In 1917-18, 47·5 million poods were collected; in 1918-19, 107·9 millions; in 1919-20, 212·5 millions; in 1920-21, 283·8 millions.

The number of cattle is shown as follows:--

	1916	1920	1921
Horses	18,791,900	11,732,500	--
Cows	17,000,000	16,500,000	13,500,000
Sheep	28,700,000	20,400,000	18,200,000
Pigs	13,000,000	7,800,000	6,500,000

In March, 1921, there was introduced the 'new economic policy,' as it is popularly called, although in essence it amounts to the relaxation of most of the restrictions imposed by the military conditions between 1918 and 1920. Its main features are (1) the replacement of the corn levies (423 million poods) by a much smaller food tax (240 million poods), collected from the individual producer; (2) the authorisation of free trading in food and other necessities within the territory of the Republic; (3) the concentration of State control on the most important of the nationalised enterprises, and their combination for the most part into State autonomous trusts (430, uniting 4,144 enterprises with 976,942 workers), under the general direction of the Supreme Economic Council; (4) the leasing of the vast majority of nationalised and State-controlled enterprises. (Out of 10,276 enterprises leased up to the end of 1921, 53 per cent. were taken by private individuals, 36·5 per cent. by co-operatives and workers 'artels,' and 5·5 per cent. by local Soviet institutions.) (5) The reduction of the number of persons on the State rationing list (from 38 millions in March, 1921, to 8 millions in November), and the conclusion of a number of agreements for 'collective payment' of the remaining employees and workers, the basic ration adopted being that of the living wage, and the total varying with output; (6) the encouragement of co-operation, locally and nationally, and the institution of a State Bank.

The following statistics show the area under cultivation during the last four years (excluding the Don and 3 provinces of the Ukraine):—

	1919	1920	1921	1922
Thousands of Dessiatines				
Famine area	4,622·4	4,227·2	3,160·4	4,476·8
Partial famine area	1,249·5	1,157·5	1,717·1	2,066·4
Producing non-famine areas	2,242·4	2,080·7	3,574·1	3,745·1
Consuming area	1,050·7	986·0	4,287·9	4,421·4

The harvest in 1922 amounted to about 47 million tons of grain.

In 1922, 120,000 acres were sown with cotton (one-sixth of the 1916 figure). In 1921-22, 513,000 acres were sown with sugar, yielding 423,000 tons; in 1922-23, the area was 4,374,000 acres, yielding 1,549,000 tons.

Salt production: 1918, 445,000 tons; 1919, 163,000 tons; 1920, 350,000 tons; 1921, 993,000 tons.

Platinum output: 1920, 21·5 poods; 1921, 12·4 poods; 1922, 26·5 poods.

Gold output: 1920, 109·25 poods; 1921, 83·75 poods; 1922, 157·25 poods.

Petroleum output in 1922: Baku, 3,150,000 tons; Grozny, 1,515,000 tons; Emba, 142,000 tons; total, 4,807,000 tons.

Commerce.

The following table gives the exports and imports of Russia for six years in the trade with Europe, Asia, and Finland (bullion not included), in millions of roubles :—

Years	Imports	Exports	Years	Imports	Exports
1911 .	1,161·7	1,591·4	1914 .	1,098·0	956·1
1912 .	1,171·8	1,518·9	1915 .	1,114·0	397·2
1913 .	1,374·0	1,520·1	1916 .	2,750·0	575·0

The total value of Russia's foreign trade since the Revolution was (in millions of gold roubles): 1918, 68·5; 1919, 3·1; 1920, 38·3; 1921, 269·9; 1922, 580·0.

The total value of Russian trade for 1922, calculated in pre-war prices (in millions of gold roubles at 1913 prices), is shown as follows :—

Imports		Tons	Value	Exports		Tons	Value
Foodstuffs		978,955	91,648	Foodstuffs		7,700	3,438
Timber seed		220,030	3,969	Timber		593,700	14,500
Coal		613,785	13,150	Flax and Hemp		43,600	12,241
Metals and machinery		138,300	78,380	Metal ores		69,900	6,823
Total (all items)		2,054,455	262,211	Total (all items)		865,450	74,982

The above import figures are exclusive of 643,700 tons, valued at 176 million gold roubles, imported for famine relief.

For pre-war trade of Russia, see THE STATESMAN'S YEAR-BOOK for 1920, pp. 1208 and 1209.

The chief articles of import from Russia into the United Kingdom and of export (domestic produce and manufactures) from the United Kingdom to Russia in 1921 were, according to the Board of Trade returns:—Imports: Hides and skins, 210,994*l.*; tobacco, 59,378*l.*; flax, 78,333*l.*; manganese ore, 50,553*l.*; petroleum, 82,822*l.*; sawn timber, 755,785*l.*; fish, 687,368*l.* Exports: Machinery, 35,733*l.*; coal, 225,901*l.*; boots, 6,645*l.*; cotton, 123,460*l.*; woollen, 9,534*l.*

Total trade between Russia and the United Kingdom in thousands of pounds for 5 years (Board of Trade returns):—

	1918	1919	1920	1921	1922
Imports from Russia into U. Kingdom	6,711	16,370	33,522	2,695	8,176
Exports to Russia from U. Kingdom	298	12,993	11,992	2,181	3,679

Internal Communications.

Russian railway history began in 1836. In European Russia there are 153,782 miles of rivers, canals and lakes, 20,670 miles being navigable for steamers, 7,482 for small sailing vessels, 88,739 for rafts. In Asiatic Russia

there are 86,422 miles of rivers, canals, and lakes, 21,421 miles being navigable for steamers, 8,678 for small sailing vessels, 33,224 for rafts.

Length of railways in use (in miles):—1913, 42,498; 1917, 39,520; 1918, 16,738; 1919, 19,676; 1920, 35,840; 1921, 41,560; 1922, 42,504.

Banking.

The State Bank began operations on November 16, 1921.

The following is the statement of accounts of the Note Issuing Department of the State Bank on February 16, 1923:—

(N.B.—1 chervonetz = roubles 10 gold = 1*l.* 2*s.* 3*d.* at current rates; 1 zolotnik = 96 dolyas = 65·8239 grains troy; 1 dolya = 0·6857 grains troy. The State Bank notes are issued in chervonetz.)

Money, Weights, and Measures.

MONEY.

The legal unit of money is the *Rouble* of 100 *Kopecks*. It was of the value of 2*s.* 1·6*d.*, but in official calculations 9·46 roubles were taken as equal to the pound sterling. Exact equivalents: 1,000,000 roubles = £105,735 7*s.*

In 1923 new paper notes were issued for 1, 2, 3, 5, 10, 20, 25 and 50 *Kopecks*, and for 1, 2, 5, 10, 25, 50 and 100 roubles.

WEIGHTS AND MEASURES.

1 <i>Verst</i> (500 <i>sajènes</i>)	= 3,500 ft., or two-thirds of a statute mile (0·662879).
1 <i>Sajène</i> (3 <i>arshins</i>)	= 7 feet English.
1 <i>Arshin</i> (16 <i>vershoks</i>)	= 28 inches
1 <i>Square verst</i>	= 0·439408 square mile.
1 <i>Desyatine</i>	= 2·69972 English acres
1 <i>Pound</i> (96 <i>zolotniks</i> = 32 <i>lots</i>)	= $\frac{1}{16}$ of a pound English (0·90283 lb.).
1 <i>Pod</i> (40 <i>pounds</i>)	= 36 lbs. English.
	= 0·32243578 cwt.
	= 0·016121789 tons.

- 1 *Vedro* (8 *shloffs*) . . . = 2½ imperial gallons (2·7056).
 1 *Chelvert* (8 *Chetveriks*) . . = 5·7719 imperial bushels.

The Soviet Government issued a decree adopting the Gregorian Calendar as from February 14, 1918.

RUSSIAN DEPENDENCIES IN ASIA.

Bokhara and Khiva in Central Asia were before the Revolution under the suzerainty of Russia:—

BOKHARA.

(BOKHARAN PEOPLE'S SOVIET REPUBLIC.)

A State in Central Asia, lying between N. latitude $41^{\circ} 30'$ and $36^{\circ} 40'$, and between E. longitude $61^{\circ} 40'$ and 73° , bounded on the north by the

Russian provinces of Syr-Daria and Samarkand, on the east by the province of Ferghana, on the south by Afghanistan, and on the south-west by the Russian Trans-Caspian province and the Khanat of Khiva.

The modern State of Bokhara was founded by the Usbeks in the fifteenth century, after the power of the Golden Horde had been crushed by Tamerlane. The dynasty of Manguts, to which the present ruler belongs, dates from the end of the 18th century. Mir Muzaffar-ed-din in 1866 proclaimed a holy war against the Russians, who thereupon invaded his dominions, and forced him to sign a treaty ceding the territory now forming the Russian district of Syr Daria, to consent to the demand for a war indemnity, and to permit Russian trade. In 1873 a further treaty was signed, in virtue of which no foreigner was to be admitted to Bokhara without a Russian passport, and the State became practically a Russian dependency.

Amirs of Bokhara.—Sayid Ameer Hyder, 1799-1826; Mir Hussein, 1826; Mir Omir, 1826-27; Mir Nasrulla, 1827-60; Muzaffer-ed-din, 1860-85; Amir Sayid Abdul Ahad, 1885-1911. Sayid Mir Alim Khan, 1911-1919.

On August 30, 1919, a revolution took place, the Amir being expelled and a Soviet Government (Council of People's Nazirs) being set up, of which the Chairman is M. Hodjajev. The Government has concluded a military and political agreement with the Russian Government.

Area 79,000 square miles, population about 3,000,000. Chief towns: Bokhara, about 75,000; Karshi, 25,000; Khuzar, Shahr-i-Zabz, Hissar, 10,000; Charjui, Karakul, Kermine.

The religion is Mahomedan.

Bokhara produces corn, fruit, silk, tobacco, cotton, and hemp; and breeds goats, sheep, horses, and camels. Gold, salt, alum, and sulphur are the chief minerals found in the country.

The yearly imports of green tea, mostly from India, are said to amount to 1,125 tons. The imports from India also include indigo, Dacca muslins, drugs, shawls, and kincobs. Bokhara exports raw silk to India, the quantity exported in one year being estimated at 34 tons.

The Russian Trans-Caspian Railway runs through Bokhara from Charjui, on the Oxus, to a station within a few miles of the capital, and thence to Tashkent; the distance from Charjui to the Russian frontier station of Katty Kurghan being about 186 miles. There is steam navigation on the Oxus.

There is a telegraph line from Tashkent to Bokhara, the capital.

Russian paper roubles are current everywhere. The Bokhara silver tenga is valued at 5d.

KHIVA.

(KHORASMIAN PEOPLE'S SOVIET REPUBLIC.)

A State in Central Asia, lying between N. latitude 43° 40' and 40°, and E. longitude 57° and 62° 20'. Bounded on the north by the Aral Sea, on the east by the river Oxus, on the south and west by the Russian Trans-Caspian province.

Russian relations with the Khanate of Khiva—an Usbeg State, founded, like that of Bokhara, on the ruins of Tamerlane's Central Asian Empire—date from the beginning of the 18th century, when, according to Russian writers, the Khivan Khans first acknowledged the Tsar's supremacy. In 1872, on the pretext that the Khivans had aided the rebellious Kirghiz, an expedition advanced to the capital, bombarded the fortifications, and compelled the Khan to sign a treaty which put the Khanate under Russian control. A war indemnity of about 274,000*l.* was also exacted.

A Soviet Government is in power, and concluded a treaty of amity with the Russian Government on September 30, 1920.

Area, 24,000 square miles; population estimated at 519,000, including 100,000 nomad Turcomans. Chief towns: Khiva, 4,000–5,000; New Urgenj, 3,000; Hazar Asp, and Kungrad.

The religion is Mahomedan. Army, about 2,000 men.

The chief commercial products are cotton and silk.

ARMENIA. *

*(SOCIALIST SOVIET REPUBLIC OF ARMENIA.)

Constitution and Government.—The Armenian Republic of Erivan was constituted in May, 1918, having, in common with the Georgians and the Tartars, persuaded the Turks and the Germans to recognise their independence. The territory of the Russian Armenian Republic consists of the south-eastern frontier districts of Transcaucasia, which formerly belonged to the Russian Empire.

In November, 1917, Transcaucasia refused to recognise the Bolsheviks and constituted a Transcaucasian Commission as the Supreme Authority in the country. In February, 1918, the 'Seim,' or Diet, of Transcaucasia, convoked in the city of Tiflis, formed a Provisional Government. On April 22, 1918, the Transcaucasian Diet declared its *de jure* independence of Russia and called itself the Federal Democratic Republic of Transcaucasia. The three main peoples in Transcaucasia—the Armenians, the Georgians, and the Tartars—were parties to this Federation, each holding their own respective territories. This Federal Republic lasted only five weeks owing, mainly, to the divergent political tendencies of these three nationalities. On May 26, 1918, the Transcaucasian Republic was dissolved and Georgia declared its independence, as also did Armenia. Its *de facto* independence was recognised by the Allies in January, 1920, and its *de jure* recognition was embodied in the Treaty of Sévres signed in August, 1920, between the Allied Powers and Turkey.

On April 2, 1921, Armenia was proclaimed a Soviet Republic. The Chairman of the Council of People's Commissaries is M. Miasnikoff, and the People's Commissary for Foreign Affairs M. Mravian.

Area and Population.—The area of the State is 15,240 square miles and the population 1,214,391. Erivan is the Capital; population, 90,000. *

By an agreement between the Caucasian States in the summer of 1921, Batum has been declared a free port.

AZERBAIJAN.

(AZERBAIJAN SOCIALIST SOVIET REPUBLIC.)

In October, 1917, the peoples of Transcaucasia, Azerbaijan, Georgia, and Armenia united to form a federation of republics under one Government, with a House of Representatives, or *Seim*. Serious disagreement arose and the federation broke up, Azerbaijan declaring its independence on May 28, 1918. The National Council or Constituent Assembly formed a Government of twelve Ministers. The British Government recognised this Government as a *de facto* administration in January, 1920. In April, 1920, the Bolshevik party overthrew the existing Government and broke off all relations with the Entente and 'other enemies of Soviet Russia.' On September 30, 1920, a military and economic treaty was concluded between Azerbaijan and Russia.

The Chairman of the Azerbaijan Soviet Government is M. Narimanov.

It is claimed for Azerbaijan that it consists mainly of the two former Russian provinces of Baku and Yelisavetpol, and that as at present constituted the territory is bounded on the east by the Caspian Sea, on the north by Daghestan, Northern Caucasus and Georgia, on the west by Georgia and Armenia, on the south by Persia. The area is 33,970 square miles, and the population, according to official Russian statistics, is estimated at 2,096,973. Moslems represent about 75 per cent. of the population.

The capital of Azerbaijan is Baku (population 250,000) the centre of the great petroleum industry.

One of the most important industries of Azerbaijan is the petroleum industry of which Baku is the centre. Other industries capable of development are cotton, sericulture, fisheries, viticulture, cereals, cattle breeding.

There are railways crossing the country westward and northward from Baku, and others under construction to the south-west.

Reference.

Statements of Claims with accompanying documents, maps, &c., presented by the Azerbaijan Peace Delegation to the Peace Conference at Paris.

GEORGIA.

(GEORGIAN SOCIALIST SOVIET REPUBLIC.)

The Georgians claim that they first appear in authentic history in the time of Alexander the Great, by whom they were conquered. But on Alexander's death (323 B.C.), the Georgians regained their independence under Pharnavas. With Pharnavas (302-237 B.C.) began the first of four dynasties: Karthlosi (302-93 B.C.), Arsacidi (93 B.C.-267 A.D.), Khosro-Sassanidi (267-570 A.D.), and Bagratidi (570-1801). In 1801 the Russian Emperor Alexander I. annexed the Kingdom of Georgia. When the Soviet régime was set up in Russia the Georgians, together with the Tartars, and Armenians, formed the Transcaucasian Republic, which refused to recognise the Soviet Government. The capital of Georgia, Tiflis, became the centre of that Republic, the independence of which was formally proclaimed by the Transcaucasian Diet (*Sejm*) on April 22, 1918. But Georgia was eventually forced to form a separate State, and on May 26, 1918, its independence was proclaimed in Tiflis by the representative organ, the National Council, elected by the National Assembly of Georgia on November 22, 1917. The Act of Independence of Georgia was approved, confirmed and ratified on March 12, 1919, by the Constituent Assembly, elected according to the electoral system of direct, equal, universal, secret and proportional voting of citizens of both sexes. The Government received *de jure* recognition by the Allies on January 27, 1921.

In 1921 a revolution occurred, and a Soviet Government was set up, under the chairmanship of M. Mdivani. The constitution of the Republic is the same as that of Soviet Russia.

Area and Population.—Georgia is situated in Transcaucasia, between the Black and Caspian Seas. Her frontiers are, in the north, the Caucasus; in the east, the Republic of Azerbaijan; and in the south, Armenia. The capital of Georgia is Tiflis (in Georgian Tbilisi so called from the hot-springs found there), which was founded by King Vakh tang in the fifth century A.D.; it is also the capital of the Transcaucasian Soviet Federation (Armenia, Georgia, Azerbaijan).

The area is 25,760 sq. miles, and the population (at the 1920 census), 2,372,403.

Production and Industry.—About 90 per cent. of the population is engaged in agriculture, but methods are primitive. The principal crop is corn. The land of the great landowners has been distributed among the peasants; the minimum allowance for any one family being 7 dessiatines (about 17 acres). Wine-growing is extensive. The country is also rich in fruits. Silk production, and bee-keeping are old occupations.

There are about 12,000,000 domestic animals, and the country has vast possibilities for cattle-breeding.

A number of minerals are found, viz., naphtha, copper ore, coal, lead, manganese ore, iron ore, pyrites and sulphur, zinc and antimony. The most important mineral industry is that of manganese, the centre of which is at Tchiaturi.

Communications.—The railway system of Georgia extends to 970 miles. The trunk line leading from Batum through Tiflis to Baku on the Caspian Sea has several narrow gauge branches on Georgian territory to the coal mines of Tkhibuji, to the port of Poti, to the manganese mines of Tchiaturi, to the mineral springs of Borjom and the health resort Bakuriani,

to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coal mine district of Alverdi. The last branch divides in Armenia, going on the one side to Tabriz in Persia, and on the other to Erzerum in Anatolia. All the railway lines on the territory of Georgia belong to the State.

A railway line from Akhal-Senaki along the Black Sea coast, through Sukhum to Tuapse, is being constructed.

UKRAINE.

(UKRAINIAN SOCIALIST SOVIET REPUBLIC.)

It is claimed that the first Ukrainian State was founded in Kieff in the ninth century. In the fourteenth century the eastern portion was conquered by the Lithuanians and the western portion by the Poles. Eventually the whole of the Ukraine was incorporated with Poland. In 1648 the Ukrainians threw off the Polish yoke, and in 1654 Chmelnitzki concluded the Treaty of Pereyaslav with the Muscovite Tsars, according to which Ukraine east of the Dnieper was united to Muscovy, while Galicia passed over to Austria in 1795. The Treaty of Pereyaslav formed the constitution of the Ukrainian State until the death of the Hetman Daniel Apostol in 1734.

The independence of Russian Ukraine was proclaimed on November 21, 1917, and that of Austrian Ukraine on November 19, 1918. On December 14, 1918, the Government of Ukraine, a Directory of five members, was established as a Provisional Government, with a Ministerial Cabinet of 14, until a Parliament representing the whole nation has been elected; and on January 3, 1919, the union of 'Eastern' (Russian) and 'Western' (Austrian) Ukraine took place.

The Ukraine includes the following provinces of the former Russian Empire:—Kharkoff, Poltava, Chernigov, Kiev, Volhynia, Ekaterinoslav, Odessa, Nikolaiev, Kremenchug, Donetz, Phtomir, Podolia.

In the Treaty of Riga (March 19, 1921), between Soviet Russia and Poland, both sides agreed to recognise the independence of the Ukraine. In 1920 a Soviet Government was established, which concluded a military and economic alliance with Russia on December 28, 1920, establishing Joint People's Commissariats for Transport, Industry, Foreign Trade, Finance, Labour, War and Marine, and Posts and Telegraphs.

The constitution of Ukraine is similar to that of Russia.

The Chairman of the Council of People's Commissaries is M. Rakov'sky.

Area and Population.—The area of the Ukraine is 174,510 square miles, and the population 26,000,000.

Religion.—The overwhelming mass of the people belong to the Ukrainian-Orthodox Church, which differs but slightly from the Russian-Orthodox.

Instruction.—In 1921-22 the educational system was reorganised into two instead of the usual three stages. The first included kindergartens, children's homes, crèches, child welfare institutions, and a 7-years' 'primary school.' The second is based upon the recognition of industry and agriculture as the primary occupations of society, with socio-economic, pedagogical, medical and artistic as secondary. Each class of study is broken up into at most three grades—one lower (technical school) and two higher (technical college and institute). The technical college produces specialist *producers*, while the institute produces specialist *organisers*.

The development of primary education is shown by the following figures:—

	1914	1919	1920	1921	1922
Primary Schools	24,096	19,800	20,000	21,962	19,803
Kindergartens	—	65	130	830	638
Crèches	—	—	—	162	383
Children's Homes	—	200	300	806	1,750
Child Welfare Institutions	—	—	7	54	122

The development of higher education¹ is shown by the following figures:—

	October 1, 1921		April 1, 1922	
	Institutions	Students	Institutions	Students
Institutes	86	47,145	41	53,744
Technical Colleges	142	24,667	181	26,987
Technical Schools	505	44,758	641	45,119
Factory Schools ¹	32	2,900	133	8,805
Long-term Courses ¹	200	17,798	220	22,117

¹ These are intended as a transitional measure, to deal with those youths who have already entered industrial life without receiving systematic education.

Finance.—In 1921-22, revenue was 181,771,118 gold roubles; expenditure, 306,523,757 gold roubles; for 1922-23, revenue, 453,914,425 gold roubles; expenditure, 408,160,682 gold roubles.

Production and Industry.—The area under cultivation has varied as follows (in thousands of desiatines):—1916, 19,264; 1921, 16,288; 1922, 13,932. The production in 1922 in millions of poods was: rye, 60; wheat, 91; barley, 61; oats, 65; maize, 50. The principal industry in the Ukraine is the manufacture of sugar.

Commerce.—Imports in 1921 amounted to 1,980,000 gold roubles, while exports amounted to 896,000 gold roubles.

Internal Communications.—There are approximately 11,070 miles of railway lines in the Ukraine. About two-thirds of the railway system belongs to the State. About 2,500 miles are under construction.

SALVADOR.

(REPUBLICA DE EL SALVADOR.)

Constitution and Government.—In 1839 the Central American Federation, which had comprised the States of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica, was dissolved, and Salvador became an independent Republic. Its Constitution, proclaimed in 1824 under the Federation, and modified in 1859, 1864, 1871, 1872, 1880, 1883, and 1886, vests the legislative power in a Congress of 42 Deputies, 3 for each department. The election is for one year, and by universal suffrage. The executive is in the hands of a President, whose tenure of office is limited to four years.

President of the Republic.—Dr. Alfonso Quinónez Molina. Term of office, from March 1, 1923, to March 1, 1927.

Vice-President.—Dr. Pio Romero Bosque.

The administrative affairs of the Republic are carried on, under the President, by a ministry of four members, having charge of the departments of:—Foreign relations, Justice, and Instruction; War and Marine; Interior, Government and Agriculture; Finance, Charities, and Public Credit.

Area and Population.—The area of the Republic is 34,126 square kilometres, or 13,176 English square miles, divided into 14 departments. Estimated population (Jan. 1, 1922), 1,526,000. Aboriginal and mixed races constitute the bulk of the population, Ladinos or Mestizos being returned as numbering 772,200, and Indians 234,648. The capital is San Salvador, with 80,900 inhabitants. Other towns are Santa Ana, population 70,000; San Miguel, 33,990; Nueva San Salvador, 25,960; San Vicente, 30,080; Sonsonate, 15,940.

On June 7, 1917, an earthquake and volcanic eruption did much damage to the capital, and partially destroyed the towns of Nájapa (6,012 inhabitants), Quetzallepeque (15,804 inhabitants), and Armenia (13,291 inhabitants). A still greater earthquake overtook the city of San Salvador on April 28, 1919.

The number of births in 1921 was 55,539; the number of deaths 30,613; the number of marriages, 3,674. Of the births in 1921, 28,377 were males, and 27,162 were females. Of the births in 1920, 41·25 per cent. were legitimate, and 58·75 per cent. illegitimate. Of the deaths, 15,849 were males and 14,761 females.

Religion, Instruction and Justice.—The dominant religion is Roman Catholicism. There is an archbishop in San Salvador and a bishop at Santa Ana and San Miguel respectively. Education is free and obligatory. There were in Salvador, in 1921, 989 primary schools, with 1,478 teachers and 57,555 enrolled pupils. There were also 27 higher schools (including 2 normal and 3 technical schools), and a National University with faculties of jurisprudence, medicine, pharmacy, dentistry, and engineering. Expenditure on public instruction in 1921, 1,016,117 colones.

Justice is administered by the Supreme Court of Justice, one court of third instance (in the capital) and several courts of first and second instance, besides a number of minor courts. All judges of second and third instance are elected by the National Assembly for a term of 2 years, while the judges of first instance are appointed by the Supreme Court for a similar period. In 1918, 2,005 crimes of all kinds were committed in the Republic.

Finance.—Revenue and expenditure for five years :—

	1917-18	1918-19	1919-20	1920-21	1921-22 ¹
	£	£	£	£	£
Revenue	1,998,810	1,382,644	1,820,035	2,945,234	1,793,000
Expenditure . . .	1,013,342	1,874,079	1,671,990	3,245,516	1,793,000

¹ Estimates.

The total outstanding debt on December 31, 1921, was 33,668,209 colones, of which 20,271,409 colones were internal debt, and 13,396,800 colones external debt.

Defence.—The army may be divided into three parts : (1) available force, 78 officers, 512 petty officers, and 15,554 men; (2) forces that can be made available at short notice, 49 officers, 356 petty officers, and 4,000 men; (3) reserve force, 251 officers, 1,743 petty officers, and 56,151 men. Total, 378 officers, 2,611 petty officers, and 75,705 men. In case of war, military service is compulsory from 18 to 50 years of age.

PRODUCTION, COMMERCE—SHIPPING, COMMUNICATIONS 1301

Production and Commerce.—The population of Salvador is largely engaged in agriculture. The chief product is coffee, under which in 1922 there were about 140,000 acres, with some 100,000,000 trees. Other agricultural products are cacao, rubber, tobacco, sugar (production 1920-21, 30,000 tons). Efforts are made towards wheat cultivation. In 1908 there were 284,013 head of cattle, 74,336 horses, 21,457 sheep and 422,980 pigs. In the national forests are found dye woods and such hard woods as mahogany, cedar, and walnut. Balsam trees also abound. The mineral wealth of the Republic includes gold, silver, copper, iron, mercury. Mining operations of gold and silver are growing in importance, especially in the departments of Morazán, San Miguel, and La Unión.

The imports (subject to duty) and the exports have been as follows in five years (in pounds sterling):—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports	1,373,854	1,228,539	1,876,025	3,297,000	2,629,737
Exports	2,140,053	2,479,960	2,115,521	4,621,100	3,738,297

The trade is chiefly with the United States, the United Kingdom, and France. The chief imports in 1920 were cottons, hardware, flour, drugs and chemical products. The chief exports in 1920 were coffee, 37,587,172 kilos, valued at 12,403,766 gold dollars; henequén, 255,099 kilos, valued at 58,733 gold dollars; sugar, 6,122,442 kilos, valued at 1,103,784 gold dollars. Other exports are silver, balsam, hemp, hides and rubber. Of the total coffee exported, approximately 70 per cent. went to the United States, and 4 per cent. to Great Britain.

Total trade between Salvador and the U.K. (Board of Trade Returns) for 5 years:—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Salvador to U. K. .	12,432	62,889	234,069	45,696	87,051
Exports to Salvador from U. K. .	291,756	249,877	689,491	254,577	336,348

Shipping and Communications.—In 1921, 476 steamers entered at the ports of the Republic, with a tonnage of 762,942

A railway connects the port of Acajutla with Santa Ana and La Ceiba; with this system San Salvador, the capital, is connected—a distance of 65 miles. Another line (the International Railways of Central America) runs from the eastern to the western boundary of Salvador. The first section (La Unión to San Miguel, 40 miles), was completed in 1912; the second (San Miguel to Zacatecoluca and San Vicente) in 1915; the third (San Vicente to Cojutepeque) in 1922. Another short railway connects the capital with Santa Tecla. Total length of railway open (1922), 253 miles, all of narrow gauge. There are 1,476 miles of good road in the Republic.

In 1920 there were 176 post offices, which received 4,536,675 pieces of mail matter and despatched 3,306,906 pieces. In 1921 there were 234 telegraph offices and 2,374 miles of telegraph wire, over which passed 1,516,333 telegrams. There are 232 telephone stations and 1,366 miles of telephone line. One wireless station is in operation in San Salvador.

Money, Weights, and Measures.

MONEY.

There are 3 banks of issue, the Banco Salvadoreño (paid-up capital, 4,000,000 pesos silver), Banco Occidental (paid up capital, 5,000,000 pesos silver), and Banco Agrícola Commercial (paid-up capital, 1,560,000 pesos silver). On December 31, 1921, they had notes in circulation to the value of 7,017,820 colones.

In August, 1897, a law was passed adopting the gold standard. San Salvador has no mint.

According to the law of July 16, 1920, the theoretical monetary unit of Salvador is the *colon*, a coin containing 836 milligrams of gold 900 milésimos fine. The colon, which represents 100 centavos, will be issued in denominations of 5, 10, 20, and 40 colones. Auxiliary silver coins are to be minted in denominations of 20, 50, and 100 centavos each, and nickel coins in denominations of 1, 3, 5, and 10 centavos each.

National gold coins and gold coins of the United States of all denominations are unlimited legal tender, the United States coins having a fixed value of 2 colones to the dollar. National and United States silver coins are legal tender in an amount representing up to 10 per cent. of each payment, and national nickel coins in amounts up to 2 per cent. of each payment.

The coinage of silver must not exceed 10 per cent. of the total fiduciary circulation, and that of nickel must not be in excess of 5 per cent. of said circulation, and in no case shall nickel be coined in an amount exceeding 1,000,000 colones.

With the exception of United States gold and silver coin, foreign money is not a legal tender in the Republic, and payments contracted for in such money shall be liquidated by the equivalent of the money in question tendered in United States gold, or in colones, at the rate of exchange of the place of payment on the date of settlement.

WEIGHTS AND MEASURES.

On January 1, 1886, the metric system of weights and measures was made obligatory. But other units are still commonly in use, of which the principal are as follows —

<i>Libra</i>	= 1.043 lb. av.	<i>Atroba</i>	= 25.35 lb. av.
<i>Quintal</i>	= 104.3 lb. av.	<i>Fanega</i>	= 1.5745 bushel.

Diplomatic Representatives.

1. OF SALVADOR IN GREAT BRITAIN.

Chargé d'Affaires and Vice-Consul.—Gustavo Le Bourdormec. Appointed 1922.

There are consular agents at London, Liverpool, Glasgow, Southampton, Newport, Brighton and Birmingham.

2. OF GREAT BRITAIN IN SALVADOR.

Minister and Consul-General.—Hugh William Gaisford. (Resident in Guasimala.) Appointed January 17, 1920.

Chargé d'Affaires and Consul.—James Douglas Scott.

SAN MARINO.

The independent Republic of San Marino, which claims to be the oldest State in Europe, is embraced in the area of Italy. A new treaty of friendship with the Kingdom of Italy was concluded June 28, 1907, revised in 1908 and in 1914. The Republic has extradition treaties with England, Belgium, Holland, and United States. The legislative power of the Republic is vested in the Great Council of 60 members elected by popular vote, a third of whom are renewable every three years, and two of whom are appointed every six months to act as Regents (*Capitani reggenti*). The regents exercise executive power, assisted by various nominated congresses, viz., *Congresso Economico di Stato*, *Congresso dei Legati*, *Congresso degli Studi*, *Congresso militare*. The administration of justice is under magistrates, who are Italian citizens. There are several elementary schools and one high school, the diplomas of which are recognized by Italian universities.

The frontier line is 24 miles in length, area is 38 square miles, and population (June 1920) 12,000.

The revenue and expenditure for 1921-22 amounted to 4,667,121 and 4,765,094 lire respectively, and for 1922-23 they were 3,482,218 and 3,659,614 lire respectively. There is no public debt. The militia consists of all able-bodied citizens between the ages of 16 and 55, with the exception of teachers and students. The chief exports are wine, cattle, and the building stone quarried on Mount Titano. San Marino has bronze and silver currency coined in Italy.

Consul-General of San Marino in London.—Commendatore Melvill Allan Jamieson, F.R.G.S.

Consul-General of Great Britain in San Marino.—Edward Mervyn de Garston.

SANTO DOMINGO.

(REPÚBLICA DOMINICANA.)

Constitution and Government.—The Republic of Santo Domingo, founded in 1844, is governed under a Constitution bearing date November 18, 1844, re-proclaimed, with changes, at various dates down to 1908. By the Constitution of 1908 the legislative power of the Republic is vested in a National Congress, consisting of a Senate of 12 senators and a Chamber of Deputies of 24 members. These representatives are remunerated at the rate of 480*l.* per annum each. Each province is represented by one senator and (in practice) by two deputies. Senators are elected for six years, one-third retiring every two years, and deputies for a period of four years, one-half retiring every two years. But the powers of the National Congress only embrace the general affairs of the Republic.

United States Military Governor.—Rear-Admiral Samuel S. Robison.

The executive of the Republic is vested in a Cabinet composed of the President and seven Ministers, who are the heads of the departments of the Interior and Police, Finance and Commerce, Justice and Public Instruction, War and Marine, Agriculture and Immigration, Foreign Affairs, and Public Works and Communications.

This system of Government has been in abeyance since November 29, 1916, when a Military Government by United States naval officers was proclaimed. The Military Governor combines, for the time being, the functions both of the President and Congress.

As a result of an agreement arrived at between the political leaders of the Dominican Republic and the United States Government, it has been decided to withdraw the American forces of occupation at an early date. To this effect a Provisional Government has been elected and took up the reins of government in October, 1922.

Provisional President.—Juan B. Vicini.

The Provisional Government is to have complete control, and is to proceed forthwith to the drawing up of new electoral laws and revised lists of electors; this having been done, elections of both the Upper and Lower Houses will take place and a Constitutional Government will replace the Provisional Government. When this has been accomplished to the satisfaction of the U.S.A., the last of the forces of occupation will evacuate the Republic.

Area and Population.—The area of Santo Domingo, which embraces the eastern portion of the island of Quisqueya or Santo Domingo—the western division forming the Republic of *Haiti*—is estimated at 19,332 square miles, with 1,017 miles of coast line and 193 miles of frontier line with *Haiti*, and a population, according to the census of 1921, of 897,405. The population of each of the 12 provinces was as follows: Santo Domingo, 146,446; San Pedro de Macoris, 43,612; Seybo, 58,408; Azua, 100,577; Barahona, 48,180; Samaná, 16,915; La Vega, 105,820; Pacificador, 77,620; Espaillat, 50,956; Santiago de los Caballeros, 122,773; Puerto Plata, 59,025; and Monte Cristi, 67,073.

The population contains some creoles of Spanish descent, but is mainly composed of a mixed race of European, African and Indian blood; there are, however, many Turks and Syrians, especially in Santo Domingo City, where the dry goods trade is mainly in their hands. The language used by the populace is Spanish, but on the Samaná Peninsula there are a few hundred farmers, descended from American negro immigrants of 1828, who speak corrupt English. The Haitian patois is spoken to a considerable extent along the frontier.

The capital, Santo Domingo, on the left bank of the river Ozama, founded 1496 by Bartolomeo Columbus, brother of Christopher, was destroyed in 1502 by a hurricane, and subsequently rebuilt on the right bank of the same river. According to the census of 1921 the City of Santo Domingo had 30,957 inhabitants and the City of Puerto Plata 7,807; Santiago de los Caballeros 17,052; San Pedro de Macoris, 13,802; La Vega, 6,564; Samaná, 1,656; Sanchez, 3,075; Azua, 4,707; Monte Cristi, 2,580; Pacificador (San Francisco de Macoris), 5,188; and Espaillat (Moca), 3,994.

Religion and Instruction.—The religion of the State is Roman Catholic; other forms of religion are permitted. There is a Catholic Archbishopric with one suffragan sec, viz., Porto Rico, now belonging to the United States. The Archbishop has been appointed Apostolic Delegate to both these countries (Santo Domingo and Porto Rico) and to Cuba.

Primary instruction is gratuitous and obligatory, being supported by the communes and by central aid. Expenditure on public instruction 1919, 1,581,636 dollars; 1920, 1,868,473 dollars; 1921, 1,995,907 dollars; 1922, 966,952 dollars. The public or state schools are primary, secondary, technical schools, and normal schools. The Professional Institute was formed into a University by Presidential decree on November 29, 1914. In 1920 there were 972 public schools in the Republic (6 being secondary) with 105,000 pupils (51,585 in 1918), and 1,544 teachers. Under the Military Government steps have been taken to reform the system of public instruction, and some form of manual training or agricultural instruction is being introduced into the curriculum of the public schools.

Justice.—The chief judicial power resides in the Supreme Court of Justice, which consists of a president and 6 justices chosen by Congress, and 1 (Procurador General de la Republica) appointed by the executive; all these appointments are only for 4 years, but may be prolonged indefinitely. The territory of the Republic is divided into 12 judicial districts, each having its own civil and criminal tribunal and court of first instance, and these districts are subdivided into 60 communes, each with a local justice (alcalde), a secretary and bailiff (alguacil). There are three appeal courts, at Santiago de los Caballeros, at Santo Domingo City, and at La Vega.

Finance.—The receipts and disbursements for 6 years were, in United States dollars :—

—	Revenue	Expenditure	—	Revenue	Expenditure
	Dollars	Dollars		Dollars	Dollars
1916 . . .	4,709,518	4,104,998	1919 . . .	8,717,252	7,922,229
1917 . . .	6,663,214	4,974,462	1920 . . .	9,529,800	11,780,000
1918 . . .	7,111,818	4,971,275	1921 . . .	9,339,851	9,049,222

Customs collections for the calendar year 1921 amounted to 2,795,148 dollars; for 1920, 6,298,799 dollars.

A Treaty between the Dominican Republic and the United States of America, ratified February 8, 1907, authorised the issue of 20,000,000 dollars in 5% bonds, secured as to principal and interest by a first lien on the customs revenues of the Republic. Under the Treaty the President of the United States of America appoints the General Receiver of Dominican Customs; a sinking fund is provided for the service of the loan which is in the hands of the Guaranty Trust Company of New York as Fiscal Agent; bonds of this issue paid up and held alive in Sinking Fund July 1, 1922, 12,509,400 dollars; bonds drawn for redemption are held in the Sinking Fund until all have been redeemed; date due 1918–1958; interest dates February and August; interest and principal payable at New York, London, Paris, Brussels and Amsterdam.

Under authority of an Executive Order dated August 2, 1918, by the Military Governor of Santo Domingo, bonds under the title 'Dominican Republic 5% Bonds Issue of 1918' were issued for the purpose of settling claims and indebtedness, both foreign and domestic, accumulated prior to the establishment of the Military Government; authorised amount of issue 5,000,000 dollars; actually issued, 4,161,300 dollars: bonds are issued to claimants in settlements of awards as they are made by the Dominican Claims Commission; they are secured as a second lien on the customs revenue of the Republic; from January 1, 1918, a sinking fund is provided for, to be applied to the retirement of bonds as drawn for redemption on each interest date; the sinking fund is in the hands of the Designated Depositary for the Dominican Government, at present the International Banking Corporation of New York; date due 1918–1938; interest dates, January and July; interest and principal payable at the offices of the Designated Depositary in the Dominican Republic and in New York City.

In April, 1922, after securing authority to do so from the United States, the Military Government of Santo Domingo sold a bond issue amounting to 6,700,000 dollars, carrying a 5½ per cent. coupon, due March 1, 1942, Sinking Fund accumulations to start in March, 1930. The proceeds from this sale of bonds repaid a balance of over 2,000,000 dollars due on a 2,500,000 dollar bond issue sold in June, 1921, settled current obligations of the Government, and provided funds for special public works and other purposes.

A statement of the bonded debt of Santo Domingo as at July 1, 1922, is as follows:—Total issue of 1908 bonds, 20,000,000 dollars; paid up and held alive in Sinking Fund, 12,509,400 dollars; making the total outstanding, 7,490,600 dollars. Funds in possession of Guaranty Company for purchase of further bonds, 420,987 dollars; leaving as a total, 7,069,613 dollars. Of the 1918 bonds, the balance unliquidated on July 1, 1922, was 1,521,000 dollars. Of the 1922 Bonds the total issue outstanding was 6,700,000 dollars, making a grand total of 15,290,613 dollars.

DEFENCE—PRODUCTION AND INDUSTRY—COMMERCE 1307

Defence.—Native constabulary officered by Americans is the only defence, apart from the American marine forces in the Republic, which consist of 1,150 men, divided into 14 companies.

The Republic has no navy.

Production and Industry.—Agriculture is the principal source of wealth; and cattle-raising is a promising industry. Of the total area, about 12,500 square miles is cultivable, and about 3,000,000 acres suitable for grazing. Tobacco is grown in the northern part and cacao in the eastern. Sugar-growing is a flourishing industry; production of sugar in 1920-21, 1,291,173 bags with 199,708 tons; 1919-20, 1,301,577 bags with 197,383 tons; 1918-19, 1,219,736 bags with 184,851 tons. Cacao area in 1920 was 110,000 acres; yield, 51,457,795 pounds. Tobacco production in 1918, 33,439,648 pounds; in 1921, 8,000,000 pounds. The forest area of the Republic is 9,500,000 acres.

The live-stock census taken on May 15, 1921, showed 360,155 cows, 87,876 oxen, 199,127 calves, 162,800 horses, 64,860 mules, 674,232 pigs, 705,000 goats and 2,949,053 fowls.

Minerals of almost every kind are found at various places in the Republic, principal among which are gold and copper. Iron is found in the form of black magnetic oxide of iron, and petroleum has been found in the Azua region. Coal of the lignite variety of little commercial value is found in considerable quantities, as well as some anthracite coal. Silver, platinum, and traces of quicksilver have been found, and rock salt near Neiba is found in inexhaustible quantities, there being several hills of native salt covered with only a thin layer of soil. For building purposes there is a large variety of limestone and sandstone.

Commerce.—The total imports into and exports from the Dominican Republic for 5 years were valued as follows in pounds sterling (£1 = 4 dollars):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports	3,589,260	3,947,227	4,403,825	11,631,469	6,146,332
Exports	4,618,226	4,454,469	7,920,378	14,682,810	5,153,512

The foreign trade for 2 years was distributed as follows:—

Country	Imports				Exports			
	1920		1921		1920		1921	
	Dollars	Per cent.	Dollars	Per cent.	Dollars	Per cent.	Dollars	Per cent.
United States	35,848,791	77.03	20,615,484	83.97	51,113,990	87.03	16,017,920	77.70
United Kingdom	1,536,556	3.80	645,089	2.62	807,523	1.37	334,165	1.62
France	657,617	1.41	526,167	2.14	3,050,797	5.20	465,738	2.26
Italy	124,171	0.29	113,853	0.46	15,825	0.03	3,274	0.02
Porto Rico	6,081,177	13.08	1,219,608	4.86	564,331	0.96	517,361	2.51
Cuba	223,220	0.48	30,968	0.13	66,249	0.11	77,428	0.38
Germany	428,954	0.92	230,961	0.93	326,378	0.56	933,461	4.53
Other countries	1,615,390	3.47	1,161,222	4.74	2,786,148	4.74	2,264,18	10.98
Total	46,525,576	—	24,585,327	—	58,731,241	—	20,614,048	—

In 1921 the chief imports were: cotton goods, 1,721,571 dollars; iron and steel manufactures, 3,472,423 dollars; foodstuffs, 6,134,043 dollars; manufactured vegetable fibres (bags, sacks, &c.), 535,522 dollars; chemical products and drugs, 539,155 dollars; soap, 301,939 dollars; agricultural implements, 148,144 dollars. Principal exports in 1921, sugar, 14,338,354 dollars; cacao, 3,082,948 dollars, and tobacco leaf, 1,609,192 dollars. The bulk of the sugar and cacao is shipped for order to the U.S.A., and a large part is transhipped to Europe and Canada, the latter taking a good proportion of the sugar.

Total trade between Santo Domingo and the United Kingdom for 5 years (Board of Trade Returns):—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Santo Domingo to U.K.	352,034	68,309	118,148	64,996	521,048
Exports to Santo Domingo from U.K.	90,848	55,120	440,024	88,910	158,346

Shipping and Communications.—The merchant marine of the Republic consists of 1 steamer of 263 tons, 8 schooners between 73 and 193 tons, and 20 schooners of less than 50 tons. These vessels are principally engaged in the coastwise trade.

In 1921, 696 steamers of 969,357 tons with cargo, 148 steamers of 150,010 tons in ballast, entered in the foreign trade of the Republic, and 503 steamers of 657,346 tons with cargo, and 272 steamers of 327,720 tons in ballast, cleared.

A trunk highway from the capital on the south coast to Monte Cristy on the north coast, with a total length of 182 miles, was completed and opened to traffic in May 1922. In the east of the republic there is a road 37 miles long from San Pedro de Macoris to Seybo, *viâ* Hato Mayor, and construction work is going on. There is a road from Santo Domingo City (the capital) running east to San Isidro (10 miles), which is being continued at the present time to San Pedro de Macoris. Another road running west to San Cristóbal 20 miles long is being continued to Bani and Azua at the present time. There is a road running from Azua to San Juan (57 miles) and another from Azua to Barahona 50 miles long.

There are two railway lines in the Republic: (1) Samaná-Santiago line, belonging to an English company, runs from Sanchez on the Bay of Samaná to La Vega (73 miles); it has two branch lines (under the same management, but different ownership) from La Jina to San Francisco de Macoris (8½ miles), and from Las Cabullas to Salcedo (8 miles); this last has been extended to Moca (7 miles) in order to join the other system; (2) a Government line, the Dominican Central railway, runs from Puerto Plata to Santiago and Moca (60 miles). Total length of line (1919) 153 miles. There are, besides, about 255 miles of private lines on the large estates.

On January 1, 1919, the postal and telegraphic services were united. The number of offices handling both services was 58; number of post offices, 29; total pieces of mail handled, 410,121; total weight, 173,693,045 kilos.

The telegraph, in the hands of a French company (Compagnie Française des Câbles Télégraphiques), is in operation between Santo Domingo, Cotui, La Vega, Moca, Santiago and Puerto Plata; from Santiago to Monte Cristy and from Santo Domingo to San Pedro de Macoris, with a total length of about 310 miles. Submarine cables belonging to the same company

connect in the north Puerto Plata with New York and Puerto Rico, and in the south Santo Domingo with Puerto Rico and Curaçao. There is a telephone system owned and operated by the Dominican Government with a total length of 1,004 miles. Number of messages transmitted and received (1921-1922) was 390,163. This telephone system connects this Republic with Haiti. There are two wireless stations in the Republic: one of 5 Kw. in Santo Domingo City and the other in La Romana (a new port in the province of Seybo, declared open to foreign traffic in August 1912). The number of radiograms sent (1921-1922) was 5,442; received, 7,251.

The Military Government has established other wireless stations for its own use.

Money, Weights, and Measures.—On July 1st, 1897, the United States gold dollar was adopted as the standard of value. A small amount of debased silver coin circulates as small change at the ratio of 5 to 1, viz., 1 peso = 20 cents United States currency. There are no Dominican gold coins or paper money in circulation.

In 1912 the National Bank of Santo Domingo was established with a paid up capital of 500,000 dollars. The Royal Bank of Canada has branches at Santo Domingo City, San Pedro de Macoris, Santiago, Sanchez and Puerto Plata. The International Banking Corporation, of New York, has branches at Santo Domingo, and other places. There are also at Santo Domingo and San Pedro de Macoris branches of the Banco Territorial y Agrícola de Puerto Rico. The National Bank of Santo Domingo, the American Foreign Banking Corporation, and the Banco Territorial y Agrícola de Puerto Rico have all closed their offices and are in liquidation.

The metric system was adopted on August 1, 1913, but English and Spanish units are quite common in ordinary commercial transactions.

Diplomatic and Consular Representatives.

1. OF SANTO DOMINGO IN GREAT BRITAIN.

Consul-General.—Eduardo Cazeaux.

Consul.—Octavio Ventura.

Vice-Consul.—Albert M. Ventura.

There are consular representatives at Cardiff, Southampton, Grimsby, Liverpool, Birmingham, Glasgow, Leeds, Manchester, Nottingham.

2. OF GREAT BRITAIN IN SANTO DOMINGO.

Chargé d'Affaires in Santo Domingo.—D. Watson.

There is also a Vice-Consul at San Pedro de Macoris, Sanchez, and Puerto Plata, and a Consular Agent at Romana.

SERB, CROAT, AND SLOVENE STATE.

(KRALJEVINA SRBA, HRVATA, I SLOVENACA.)

Reigning King.

Alexander I, born December 4 (O.S.), 1889, son of King Peter I and Duchess Zorka, daughter of the late Nicholas I, ex-King of Montenegro; married on June 8, 1922, to Princess Marie, born January 8, 1900, daughter of King Ferdinand I of Rumania; Prince Regent from June 24, 1914 to August 16, 1921, when his father died. On November 6, 1921, he swore to the constitution and received full royal rights.

Brother of the King.—Prince George, born September 8, 1887; on March 27, 1909, he renounced his right of succession to the throne.

Sister of the King.—Princess Hélène, born November 4, 1884; married, September 3, 1911 to Prince Ivan Constantinovitch, son of the Grand Duke Constantine Constantinovitch of Russia.

•• The founder of the dynasty was Kara-George (i.e. Black George) Petrovitch, who, in 1804, was proclaimed Commander-in-Chief in Serbia, but was murdered in 1817, leaving two sons—Alexis, born 1801, and Alexander, born 1806. In 1842 Alexander was chosen reigning Prince by the Skupshchina or National Assembly, and the title was confirmed by the Porte, but the dignity was not hereditary. In 1858 Alexander had to abdicate and was banished, and in 1885 he died in exile. King Peter was the third of his house who have ruled in Serbia. He succeeded to the throne on the murder of King Alexander of the Obrenovitch dynasty; was elected King by the Skupshchina June 2 (O.S.), and assumed royal rights and duties June 12 (O.S.), 1903.

The independence of Serbia from Turkey was established by Article 34 of the Treaty of Berlin, signed July 13, 1878, and was solemnly

proclaimed by Prince (afterwards King) Milan at his capital, August 22, 1878. The King's civil list amounts to 18,000,000 dinars, plus 6,000,000 French francs.

After the Revolution in Austria-Hungary, Slovenia, Croatia, Dalmatia, and Bosnia declared their independence, and a movement commenced for the formation of the State of Serbs, Croats, and Slovenes (Yugoslavia) by the union of the Austro-Serbian, Croatian, and Slovenian parts of the former Austro-Hungarian monarchy with Serbia. The union with the Croats and Slovenes was proclaimed on December 1, 1918. In regard to Montenegro there was some doubt as to her position, but on the death of King Nicholas on March 1, 1921, the country was definitely joined to Greater Serbia.

On December 29, 1918, the first Ministry of the Kingdom of the Serbs, Croats, and Slovenes was formed, representing all the Yugoslav provinces, and the Allied Governments were informed of the creation of the new State, which has received recognition. By the Treaty of Rapallo the boundaries of the new State on the side of Italy were definitely determined.

Constitution and Government.

The Constitution of the Kingdom of Serbs, Croats, and Slovenes, adopted on June 28, 1921, provides for a single chamber called *Narodna Skupština* (National Assembly consisting of 313 representatives. The King is Commander-in-Chief of the Forces, and can declare war should the country be attacked or war be declared against it; he can also make peace. He summons Parliament and has the right of dissolving it. Parliament is elected for four years on the basis of one deputy for every 40,000 inhabitants.

The elections for the Constituent Assembly, held on March 19, 1923, resulted as follows:—120 Radicals, 50 Democrats, 3 Socialists, 70 Croatian Agrarians (Raditch Party), 9 Serb Agrarians, 18 Mahomedans, 22 Catholic People's Party, and 43 members of other parties.

The Radical Cabinet, formed on December 3, 1922, is composed as follows:—

Prime Minister.—N. Pashitch.

Minister of Foreign Affairs.—Momtchilo Ninitchitch.

Minister of the Interior.—M. Voujitchitch.

Minister for the Unification of Laws.—M. Trifkovich.

Minister of Justice and interim of Commerce.—Dr. L. Marcovitch.

Minister of Posts and Telegraphs.—M. Voukitchitch.

Minister of Agrarian Reform and interim of Agriculture.—Krstá Miletitch.

Minister of Finance.—Dr. M. Stoyadinovitch.

Minister of Education.—M. M. Trifunovitch.

Minister of Social Affairs.—Dr. N. Peritch.

Minister of Religions.—M. L. Moravitch.

Minister of Mines and Forests.—Dr. M. Srskich.

Minister of Public Health.—Dr. S. Miletitch.

Minister of War and Marine.—Gen. Pechitch.

Minister of Public Works.—M. Onzonovitch.

Minister of Communications.—Dr. V. Yankovitch.

In 1922 there were 152,978 Government officials.

Area and Population.

According to the census taken at the end of 1920, the area and population of the Kingdom of the Serbs, Croats, and Slovenes are shown as follows:—

	Area in sq. miles	Males	Females.	Total	Per sq. mile.
North Serbia	19,286	1,273,167	1,381,911	2,655,078	137.6
South Serbia	17,651	734,164	740,596	1,474,560	83.5
Montenegro	3,733	99,622	100,235	199,857	53.5
Bosnia and Herzegovina	19,768	965,894	924,035	1,889,929	95.5
Dalmatia	4,916	309,012	312,417	621,429	126.4
Croatia and Slavonia, Med- junurje, and the islands of Krk (Veglia) and Kastave	16,920	1,334,543	1,405,050	2,739,593	161.9
Slovenia	6,253	503,645	552,819	1,056,464	168.9
Voyvodina	7,607	673,500	706,913	1,380,413	181.4
Total	96,134	5,893,547	6,123,776	12,017,323	125.0

The principal towns (1919) are: Belgrade (Beograd) (the capital) with 120,000 inhabitants; Zagreb (Agram), 80,000; Ljubliana, 60,000; Sarajevo, 50,000; Novi Sad, 40,000; Spert, 30,000; Nish (1910), 24,949; Kragujevatch, 18,376; Sabac, 11,541; Bitolj, 48,370; Pristina, 18,174; Pirot, 10,737; Skoplyé, 47,384; Prizren, 21,244; Novi Pazar (1913), 13,433; Ohrid, 11,038; Debar, 10,199.

Religion.

The State religion of Yugoslavia is Serbian-Orthodox. According to the census of 1920 there were of the total population:—Greek-Orthodox, 5,602,227 (47 per cent.); Roman Catholics, 4,735,154 (39 per cent.); Greek Catholics, 41,597; Protestants, 216,847 (2 per cent.); Mahomedans, 1,337,687 (11 per cent.); Jews, 64,159.

In the new territories are a large number of Roman Catholics; there are Roman Catholic bishops in Prizren and Skoplyé. In May, 1914, Serbia concluded a concordat with Rome. Under the concordat a Roman Catholic Archbishopric of Belgrade is to be established, with jurisdiction over Roman Catholics within the old frontiers of Serbia. After the union of all the Orthodox Serbs in the kingdom, the Church became a Patriarchate under the rule of the Patriarch and Holy Synod for ecclesiastical purposes.

The Serbian Orthodox Church is governed by the Synod of Bishops. All the ecclesiastical officials are under the control of the Minister of Public Worship. There is unrestricted liberty of conscience.

Instruction.

Elementary education is compulsory, and, in all the primary schools under the Ministry of Education, it is free. In 1920 there were 5,974 elementary schools with 12,758 teachers and 800,868 pupils. The number of secondary schools was 139 with 2,794 teachers and 55,636 pupils. There were also 32 training colleges for elementary school teachers with 433 instructors and 5,603 students. Of civil schools there were 52, with 335 teachers and 4,892 pupils. There were also 22 commercial schools with 272 teachers and 3,910 pupils. In Zagreb (Agram) there was 1 veterinary school (founded in 1919),

with 4 teachers and 62 pupils; an engineering school with 30 teachers and 325 pupils. The number of schools for girls was 62 with 518 teachers and 10,625 pupils.

There are three Universities in the Kingdom: At Belgrade, founded in 1838, with (1921) 127 professors and 7,668 students; at Zagreb (Agram), with 133 professors and 3,219 students; and at Ljubljana, founded in 1920, with 73 professors and 769 students; a Law School at Subotica with 10 professors and 433 students; and a Philosophical Faculty at Skopje with 10 professors and 106 students.

The Government has a Military Academy with 250 cadets, and 10 schools for non-commissioned officers. There are several private schools, elementary and other, and several orphanages supported by voluntary contributions.

For elementary schools the State pays the teachers' salaries, and the municipalities provide for all other expenditure. The cost of the other public schools is borne entirely by the State.

Justice, Crime, and Pauperism.

For the present justice is administered as of old in each of the areas of the new kingdom, viz. Serbia, Montenegro, Croatia, Slavonia and Syrmia, Bosnia and Herzegovina, the Banat, Batchka and Baranja, and Slovenia and Dalmatia.

In Serbia the judges are appointed by the king and are irremovable. There is a court of cassation in Zagreb.

There is no pauperism in the sense in which it is understood in the West; the poorest peasants have some sort of freehold property, which cannot be sold. There are a few poor people in the large towns, but neither their poverty nor their number has necessitated an institution like a work-house. There are free municipal hospitals.

Finance.

State receipts and expenditure for 6 years as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1918 ¹	16,905,007	16,905,007	1921 ¹	38,841,777	39,943,668
1919 ¹	19,434,703	19,434,703	1922 ¹	17,878,793	17,878,793
1920 ¹	49,925,664	49,925,664	1923-24 ¹	17,970,000	17,869,242

¹ Estimates.

The budget estimates for 1923-24 are shown as follows in dinars (par value of dinar, 25 to the £; value in February, 1923, 475,500 to the £):—

Revenue.	Dinars.	Expenditure.	Dinars
Customs	318,000,000	Department of Education . .	542,237,184
Town taxes	1,393,000,000	Treasury	1,059,425,000
Excess profits taxes . .	1,225,000,000	War and Navy	1,508,129,109
Morophies	1,742,000,000	Public works	410,523,013
Navigation dues	905,750	Communications	1,544,355,892
Railways	1,900,000,000	Post and telegraphs	328,749,318
		Forests and mines	307,194,485
Total (including all items).	8,985,000,000	Total (including all items).	8,934,611,029

On June 30, 1922, the public debt of Yugoslavia was as follows:—
 (a) Pre-war debts: Serbia, 562,097,000 dinars; Montenegro, 17,000,000 francs; Bosnia, and Herzegovina, 191,220,987 kronen; Croatia and Slavonia, 48,096,036 kronen; Slovene Land, 24,636,392 kronen; Dalmatia, 6,152,567 kronen. (b) War debts: about 2,000,000,000 francs (to England and France, 936,035,466 francs; to the United States, 62,160,000 francs). (c) Post-war debts: foreign, 320,200,000 francs, excluding 15,000,000 drachmas to Greek National Bank; interest, 2,372,295,466 francs; 5,757,097,000 dinars; 271,586,000 kronen.

The War debts included 54,600,000 dollars to the United States; 27,000,000£. to the United Kingdom; and 1,378,000,000 francs to France.

The total debt is placed at about 4,000,000,000 francs (337,445,191 kronen and 3,234,422,466 francs).

Defence.

In 1919 the organisation of the army of the Kingdom of the Serbs, Croats, and Slovenes was commenced. In peace time the strength of the army is 7,000 officers and 120,000 men. Compulsory service is in force for men between the ages of 21 and 45, and, as a last defence, men can be taken as fit to carry arms from the ages of 18 to 21 years and from 45 to 50 years.

The kingdom is divided into four army commands subdivided into military districts. Each army command comprises from 3 to 5 divisional commands, the number of divisions being 16. Each divisional command includes 1 infantry brigade of 3 regiments each of 3 battalions and 1 machine-gun detachment, 1 artillery brigade of 2 regiments. Each army command has, besides, 1 howitzer artillery regiment, 1 pioneer battalion, $\frac{1}{2}$ bridging battalion and 1 squadron of aeroplanes. For the whole army there are 2 cavalry divisions each of 4 regiments, each of 4 squadrons and 1 machine-gun detachment, 3 artillery regiments and 1 railway transport command, 1 air force command, and 1 motor transport command.

The infantry is armed with quick-firing rifles of French pattern and those taken as booty from Austria-Hungary; the artillery with French quick-firing guns (Schneider-Canet system) and those taken as booty from Austria-Hungary, which are of various models.

The Yugoslav State possesses 12 former enemy torpedo-boats to be used solely for police purposes and some patrolling vessels, as also 4 monitors, formerly Austrian, on the Danube.

Production and Industry.

Serbia is an agricultural country, where almost every peasant cultivates his own freehold. Of the total area (11,930,740 acres), 21 per cent. is arable land; 4 per cent. is devoted to fruit and vine production and to gardens; 6·3 per cent. is forest land, 51 per cent. meadow, and the remainder is State property (mostly forest). Fruit products formed 13 per cent. of the total exports before the war. Principal crops for 2 years:—

Products.	1920		1921		Products.	1920		1921	
	Acres.	Metric tons.	Acres.	Metric tons.		Acres.	Metric tons.	Acres.	Metric tons.
Maize (corn)	4,668,240	2,846,086	4,799,189	1,909,640	Oats	1,229,056	382,538	1,025,975	214,244
Wheat	4,826,446	1,165,468	3,749,590	1,409,392	Potatoes	1,003,329	1,101,416	517,965	780,115
Barley	1,170,321	834,034	929,857	290,988	Sugar beets	49,879	339,347	41,904	188,815
Rye	561,076	168,069	491,715	147,685	Hemp	81,416	40,147	79,931	21,182

There are 59,023,768 plum trees in the kingdom (average yield of each 13·5 kilos), 6,909,601 apple trees (average yield 22·1 kilos), 3,884,113 pear trees (average yield 24·5 kilos), 3,250,270 olive trees (chiefly in Dalmatia). In 1922 there were 424,105 acres under vines yielding 69,292,410 gallons. Tobacco production of Greater Serbia in 1919, 15,000 tons. Silk culture employs a large number of persons. The total production of wheat in Yugoslavia in 1921 was 28,204,434 cwt.; of barley, 5,825,358 cwt.; and of oats, 5,488,634 cwt.; maize, 37,486,238 cwt.; and potatoes, 15,136,749 cwt. In 1920 the output of sugar was 35,000 metric tons.

In January, 1922, there were in Yugoslavia 1,171,600 horses, mules, and asses; 5,011,290 head of cattle; 7,011,204 sheep; 3,372,852 pigs; and 1,152,719 goats.

Almost half the total area of Yugoslavia is forest, amounting to 18,186,427 acres (1922). The largest forest area is in Bosnia and Herzegovina (6,380,800 acres). The forests consist largely of beech, oak, and fir, but are less profitable than, with proper management, they might be.

Yugoslavia has considerable mineral resources, including coal and lignite, iron, copper ore, gold, lead, chrome, antimony and cement. In 1921, 78 coal mines were worked, 17 in Serbia proper producing 401,472 tons; 8 in Bosnia-Herzegovina (915,331 tons); 30 in Croatia-Slavonia (359,130 tons) and 23 in Slovenia (1,272,970 tons). The total output of coal was 2,949,106 tons in 1921, 2,749,853 tons in 1920, and 2,186,506 tons in 1919. The most important iron mines are at Vares and Ljubija in Bosnia and there are also considerable siderite and limonite iron ores between Priedor and Sanski Most. Copper is exploited chiefly at Bor (Serbia) where the mines have an output of 7,000 tons yearly. The principal lead mines are at Mezica (Slovenia) and have a yearly production of 6,000 tons. Chrome mines are found in the southern part of Serbia and more especially in the neighbourhood of Skoplje (Uskub). There are 2 antimony mines in western Serbia (Podrinie) which produce about 500 tons.

Oil-boring operations are in progress at several places in Croatia.

Of the industries, flour milling is one of the most important, especially in Bačka; there are 50 large flour mills in the country; brewing and distilling are extensively carried on, as are also weaving, tanning, boot-making, pottery, and iron-working. Carpet weaving is one of the oldest industries in Serbia. The product is manufactured principally at Pirot, in south-eastern Serbia, and the carpets are named after that place. The chief characteristics of these carpets are that they are made of pure wool, dyed with natural colours by local dyers, who pride themselves that the process of dyeing and colour mixing is a secret transmitted by father to son, and is known only to the inhabitants of Pirot. Meat-packing is also becoming important.

Commerce.

Commerce for 3 years :—

	1919	1920	1921
	Dinars	Dinars	Dinars
Imports	2,982,000,000	3,487,996,150	4,122,097,642
Exports	686,000,000	1,320,995,355	2,460,727,502

The principal imports (1921) are agricultural products (287,450,513 dinars), animal products (71,647,822 dinars), chemicals (175,025,967 dinars),

metals and machinery (474,399,973 dinars). Exports (1921): Maize (325,923,782 dinars), corn (212,066,590 dinars), cattle and other animals (534,850,114 dinars), prunes (144,284,621 dinars); timber, (170,920,326 dinars). The trade is mainly with Austria, Italy and Czechoslovakia.

The Treaty of June, 1893, provides for 'the most-favoured-nation' treatment in commerce and navigation between the United Kingdom and Serbia. A new Treaty, signed February 17, 1907 (for 10 years), provides for tariff reductions and for 'most favoured nation' treatment as regards commercial travellers, the acquisition and possession of property, and other matters.

Total trade between Yugoslavia and the United Kingdom for four years (Board of Trade Returns):—

	1919 ¹	1920 ¹	1921	1922
	£	£	£	£
Imports from Yugoslavia into U. K. . .	—	10,000	764,851	643,952
Exports to Yugoslavia from U. K. . .	828,308	610,759	1,048,439	665,634

¹ Figures are for Serbia alone.

c. Shipping Communications.

Yugoslavia in 1922 possessed 271 steamers of 89,105 tons and 259 sailing vessels of 18,022 tons.

In 1921, 4,021 sailing vessels of 177,038 tons and 12,727 steamships of 3,058,661 entered and cleared the ports of the kingdom.

Yugoslavia has (1922) 5,696 miles of railway, of which 3,972 miles are of normal gauge, and 1,724 miles of narrow gauge. With the exception of about 974 miles belonging to a private company, all the lines are State owned.

Of highways there are 3,495 miles, many of them in a ruinous condition. Total length of waterways, principally the Danube, the Save, the Drave, and the Tisa, 1,697 miles. The navigation on the Danube and Save is in the hands of the Navigation Syndicate of the Kingdom of the Serbs, Croats and Slovenes.

There were (1920) 11,430 miles of telegraph line and 16,030 miles of telephone line.

There were 1,591 State post-offices and 2,195 communal post offices in 1919. In 1919 Yugoslavia had 854 telegraph stations, 726 telephone stations, and 452 railway telegraph stations.

Money and Credit.

The principal bank is the National Bank of the Kingdom of the Serbs, Croats and Slovenes, in Belgrade, with the nominal capital of 50,000,000 dinars. To cover the issue of new bank notes the State has deposited with the Bank 30,000,000 dinars. The Bank may issue notes equal to three times the amount of the metallic deposits it holds. Notes in circulation on November 1, 1922, 4,013,597,095 dinars. There were in addition at this date 12,000,000 dinars of small metal coins. The Export Bank, with agencies abroad, assists in the exportation of Yugoslav produce. The Uprawa Fondowa or Mortgage Bank, the only large State institution of the kind in Yugoslavia, makes advances to a large amount for agricultural operations.

Money, Weights, and Measures.

Serbia accepted, by the law of June 20, 1875, the decimal system for its weights, and measures. The Serbian dinar, the unit of currency, is equal to the French franc. In circulation are bank-notes of 1, 5, 10, 20, and 100 dinars, and 10 kronen (4 Yugoslav kronen = 1 dinar); 100 paras = 1 dinar and 100 hellers = 1 kroner.

The decimal weights and measures (kilogram, metre, etc.) have been in practical use since the commencement of 1883. The *wagon* of 10 metric tons is frequently used as a unit of measure for coal, roots and corn.

Diplomatic and Consular Representatives.

1. OF THE KINGDOM OF THE SERBS, CROATS, AND SLOVENES IN GREAT BRITAIN.

Minister Plenipotentiary.—Michailo Gavrilovitch, appointed April, 1919.

Counsellor.—J. Taditch.

Secretaries.—Constantine Fotitch and Slobodan Jovanovitch.

Military Attaché.—Colonel Georges Ostoitch, K.C.V.O., C.B.

Attaché.—Vidosav Andjelkovitch.

There are Consular representatives in Manchester, Bristol, Bradford, and Glasgow.

2. OF GREAT BRITAIN IN THE KINGDOM OF THE SERBS, CROATS, AND SLOVENES.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Charles Alban Young, K.C.M.G., M.V.O., appointed September 3, 1919.

Secretaries.—R. G. Howe and E. A. Walker.

Military Attaché.—Colonel E. Hoare Fairne, C.B., C.M.G.

Naval Attaché.—Commander E. T. Down, D.S.O., R.N.

Commercial Secretary.—E. Murray Harvey, O.B.E.

There are consular officers at Belgrade, Zagreb, Sarajevo and Skoplje.

Statistical and other Books of Reference concerning Serbia.

1. OFFICIAL PUBLICATIONS.

Sluzbene Novine (Official Gazette), Statistički godišnjak Kraljevine Srbije (Annuaire Statistique du Royaume de Serbie), and the publications issued by the various Departments of Government. Belgrade.

SIAM.

(SĀYAM, OR MUANG-THAI.)

Reigning King.

Rama VI. (Vajiravudh), born January 1, 1881, son of the late King Rama V. (Chulalongkorn) and Queen Sowabha, succeeded to the throne on the death of his father October 23, 1910, and was crowned on December 2, 1911, being the sixth sovereign of the present reigning dynasty. On August 27, 1922, he married Princess Lakshmi, his cousin. The royal dignity is hereditary, but on November 24, 1910, it was officially announced that until the new King has male issue, the succession will pass presumptively through the line of the Queen Mother's sons. Prince Chao Fa Asdang Tejavudh, born May 12, 1889, is, therefore, the Heir Presumptive.

Government.

The executive power is exercised by the King advised by a Cabinet consisting of the heads of the various departments of the Government: Foreign Affairs, Interior, Justice, Finance, Public Instruction, Public Works, War, Marine, Local Government, &c. Many of the portfolios are held by the King's half-brothers and uncles. The law of May 8, 1874, constituting a Council of State, has now been superseded by the Royal Decree of January 10, 1895, creating a Legislative Council. The latter is composed of the Ministers of State (Senabodi) and others, not less than 12 in number, appointed by the Crown. The total membership is now 40. In the preamble of the Royal Decree it is stated that the object of this body is to revise, amend, and complete the legislation of the kingdom. It is to meet at least once a week, and it may appoint committees of 3 or 4 members, with the addition of competent outsiders who must not outnumber the members. An important article gives the Legislative Council power to promulgate laws without the Royal assent in the event of any temporary disability of the Crown. At other times the Royal signature is indispensable. This Council has shown considerable legislative activity.

The Siamese dominions are divided into 18 circles (Monthons), of which 17 have each a Lord-Lieutenant, deriving authority direct from the King, and having under him subordinate governors over the various parts of his circle. These Lords-Lieutenant and their subordinate governors and other officials have now complete administrative control even in the North and South-West where local hereditary chiefs formerly held sway. The circle of Bangkok (which includes the capital) is under the control of the Minister of Local Government. The 18 circles are subdivided into 78 provinces (Changwats), 409 districts (Ampurs), and 5,042 communes (Tambons).

Area and Population.

Siam is called by its inhabitants Thai, or Muang-Thai, which means 'free,' or 'the kingdom of the free.' The word Siam is probably identical with Shan, applied in Burma to the Lao race, as well as to the Shan proper and the Siamese.

The limits of the Kingdom of Siam have varied much at different periods of its history, most of the border lands being occupied by tribes more or less independent. The boundary between Burma and N. W. Siam was delimited in 1891. By the Anglo-French Convention of April, 1904, the agreement of 1896 was confirmed, and its provisions more clearly defined, the territories to the west of the Menam and the Gulf of Siam being recognised as in the British sphere, and those to the east in the French. In 1904, the Luang Prabang territory to the west of the Mekong was acknowledged by Siam to belong to France, and the provinces of Maluprey and Barsak (west of the Mekong) were also transferred to French rule, so that an area of about 7,800 square miles passed from Siamese possession. On March 23, 1907, a new boundary in this region was accepted by Siam whereby the provinces of Battambang, (Siamese, Pratabong) Siem Rap, and Sisophon were ceded to France, while the strip of coast to the south with the port of Krat returned to Siam. At the same time a rectification of the boundary was made in the Luang Prabang region, whereby a tract of the Laos country was restored to Siam. It was agreed also that four ports on the Mekong are to be held by France on perpetual lease. By these arrangements the territory of Cambodia is increased by about 7,000 square miles. The treaty also

provides for the future jurisdiction of the Siamese courts over all French Asiatic subjects and protégés in Siam, under certain conditions.

A treaty for a modification of British extra-territorial rights in Siam and for the cession of the Siamese tributary States of Kelantan, Trengganu and Kedah to Great Britain, was signed at Bangkok on March 10, 1909. The three States have an area of about 15,000 square miles, and a population estimated at over 600,000, of whom about 300,000 are in Kelantan.

The area of Siam is 194,580 square miles, about 45,000 being in the Malay Peninsula. The first detailed census in Siam was taken in 1905, but included only 12 of the circles or Monthons. The first census of the whole country was taken in 1909.

The revised census figures for 1911-12 gave a population of 8,266,408, of whom 4,122,168 were males, and 4,144,240 females.

Monthon.	Population (1911-12).	Monthon	Population (1911-12).
1. Krung Tep (Bangkok)	931,171	11. Pisanulok	249,856
2. Ayut-thya	548,165	12. Bayab	1,223,761
3. Chantaburi	136,463	13. Petchaburi	74,077
4. Chumpura	166,402	14. Phuket	230,037
5. Nakorn Chaisi	287,631	15. Rajaburi	426,825
6. Nakorn Rachasima	502,218	16. Isarn	1,455,497
7. Nakorn Sawan	287,668	17. Udorn	666,405
8. Nakorn Sritamgrat	478,266		
9. Patani	276,695		
10. Prachinburi	325,271	Total	8,266,408

Of the total population the 'Thai' number well over 7,000,000.

The estimated population for 1921-22 is 9,221,000.

In 1921-22 the deck passengers arriving in Bangkok by sea numbered 75,242, mostly from Hong Kong and China; those departing numbered 46,777.

In recent years the results of Western civilisation have to a considerable extent been introduced. Much excellent work has been done by a General Adviser of American nationality (now styled Adviser in Foreign Affairs) and with the assistance of a British Judicial Adviser a French Legislative Adviser and Legal Advisers of various nationalities important progress has been made in the administration of justice in the native courts and in the International Court in which British and French Advisers assist in the trial of cases brought by Siamese against subjects of Treaty Powers and *vice versa*. The Penal Code has been completed, and came into force on September 21, 1908; work on other codes is being proceeded with. The Consular Courts exercise jurisdiction over their nationals, subject, in the case of Great Britain, France, Denmark, and the United States to the Treaty modifications. The police administration of the Provinces is entrusted to the Provincial Gendarmerie, a force which includes a body of Danish instructors. The Provincial Gendarmerie and Metropolitan Police Forces have now been amalgamated and placed under the supervision of one central department at Bangkok. The European officers, both British and Danish, are no longer employed in an executive, but only in an advisory, capacity. For commercial purposes English is in general use.

Religion and Instruction.

The prevailing religion is Buddhism. In 1918-19 there were 13,616 Buddhist temples, and 87,538 priests.

The Minister of Education is responsible for education throughout the

country, with the exception of certain Departmental Schools, such as the Military, Naval, and Law Colleges, and the Police School, and of certain schools under direct Royal Patronage.

In 1920-21 Government primary schools numbered 445, teachers 1,324, pupils 41,191; non-Government primary schools 2,526, teachers 3,092, pupils 127,957; Government secondary schools numbered 149, teachers 638, pupils 12,203; non-Government secondary schools 5, teachers 3, scholars 17; Government special schools, numbered 26, with 569 pupils. The non-Government schools include, in addition to numberless Temple schools, certain educational establishments connected with American, French, and English missions. The latest census showed that there were in the Provinces of Siam, not including that of Krung Tep (Bangkok), 833,972 literate males and 88,756 literate females.

The Chulalongkorn University was inaugurated at Bangkok, in 1917, for medicine, political science and literature, and engineering and natural science.

The Hospital service under the Red Cross Society of Siam includes a Pasteur Institute.

Finance.

Revenue and Expenditure for three years:—

	1920-21	1921-22 ¹	1922-23 ¹
Revenue	7,175,464	6,483,333	6,583,333
Expenditure against Revenue ...	7,177,408	6,836,048	7,284,726
Extraordinary Expenditure against Capital Account ²	739,280	1,429,011	1,217,405

¹ Estimates.

² Including Expenditure from Loans.

The principal sources of revenue in 1920-21 were: opium, 1,657,447; land revenue and capitation tax, 1,200,130; excise, 684,983; railways, 804,287; mines, forests &c., 478,178; custom duties, 519,227.

On March 31, 1921, the total national debt amounted to 7,312,560, made up as follows:—3,880,000, out of the Federated Malay States loan of 4,750,000 arranged for in 1911; 2,602,380, out of the 1907 European loan of 3,000,000; and 830,180, out of the 1905 European loan of 1,000,000. On March 31, 1923, the total debt was 9,909,860. All these loans were made for, and spent on, works of public utility.

A British officer occupies the position of Financial Adviser, and there are numerous other British officers holding high advisory positions under the Government, more especially in the Finance and Audit, Revenue, Forests, Survey, Police, Justice, Customs, Mining, Mint, and Education departments. There are also a number of Europeans of other nationalities in various Departments. The financial position of the kingdom is favourable, the revenue is steadily increasing, and the expenditure is less than the revenue, and well under control.

Defence.

Under the Military Service Act of 1917 every able-bodied man is liable to serve (a) two years with the colours; (b) seven years in the first reserve, with a maximum service of two months per annum; (c) ten years in the second reserve, with a maximum service of 30 days per annum; (d) five years in the third reserve, with a maximum service of 15 days per annum.

The army is divided into 10 Divisions, grouped into 3 Army Corps, and 1 independent division. Each division consists of 2 regiments of infantry, 1 regiment of either cavalry or chasseurs, 1 group of artillery, 1 company of machine guns, and 1 Ambulance Corps. The engineers are grouped into special regiments and are employed mainly in railway construction and the industrial survey of Siam. Aviation schools were started in 1914, and a Flying Corps has been formed. It is chiefly employed in the development of civil aviation.

To the small naval force, which includes some gunboats, two destroyers and four torpedo-boats and other auxiliary craft, the ex-British destroyer *Radiant*, renamed *Phra Ruang*, has been added. There are 3,000 men available for service afloat and 2,000 marines, besides a reserve of 20,000.

At the mouth of the Menam River are the Paknam forts. The bar prevents ships of more than 13 feet draught from ascending to Bangkok. The naval arsenal dock has recently been reconstructed.

The military and naval expenditure for 1920-21 amounted to 1,729,708L.

Production and Industry.

Forced labour is still exacted from the rural population, but recent enactments have made calls for it far less frequent, and a poll-tax, varying in amounts in the different districts, is now levied on all adult males with practically no exemptions. The cost of labour is probably higher than in any other Oriental country. Chinese coolies do the chief part of both skilled and unskilled labour in the south, especially in the mills and in mining; while in the north forest work is confined almost entirely to Laos, Burmese, Karens, and Khamus.

To the north of Bangkok, large tracts of land, formerly lying waste, have been opened up by an Irrigation Company, which has connected by a canal the Menam and Bangpakong rivers, and has constructed numbers of smaller canals. In 1916 the Government, acting on the advice of an irrigation expert lent by the Government of India, started work on the Prasak South Canal Project. Actual irrigation from these works commenced in 1922. The area to be protected is estimated at 100,000 hectares.

The chief produce of the country is rice, which forms the national food and the staple article of export. The cultivated area under rice in 1921-22 was given as 6,327,422 acres. For the Siamese Year (Buddhist Era) 2464 (April 1, 1921, to March 31, 1922), the export of rice amounted to 1,250,035 tons. The average annual export is 1,071,000 tons. In Bangkok and district there are some 80 rice mills.

The live-stock on March 31, 1921, consisted of 6,818 elephants, 141,793 horses and ponies, 2,625,475 bullocks, and 2,603,823 buffaloes.

Much of Upper Siam is dense forest, and the cutting of teak is an important industry, almost entirely in British hands. Siam teak wood is mainly produced in the north of Siam, the dry logs being floated by river to Bangkok during the rainy months of the year. In 1921-22 the exports of teak amounted to 59,248 tons, valued at 742,283L. The forests are under the control of a British conservator, aided by several British officers. The export of rubber is now negligible, but planting of rubber trees is proceeding in the Malay Peninsula.

The mineral resources of Siam are extensive and varied, including tin, tungsten, wolfram, coal and iron, zinc, manganese, antimony, probably quicksilver. Tin mining on a considerable scale is pursued on the island of Puket (or Junk Ceylon) and also in the northern portion of the province of Puket at Renong on the mainland, and the ore is found in ever-increasing

quantities in other parts of the Siamese portion of the Malay Peninsula, where also wolfram is now being extracted in considerable quantity. The total output of metallic tin in 1918-19 was 148,425 piculs (8,834·8 tons); in 1919-20, 143,506 piculs (8,542 tons); and in 1920-21, 104,183 piculs (6,201·37 tons). The total amount exported in 1920-21 was 103,887 piculs (6,183·75 tons).

Commerce.

Over 85% of all Siam's foreign trade passes through the capital. The following figures refer only to the port of Bangkok.

Imports and exports for five years :—

	1917-18	1918-19	1919-20	1920-21	1921-22
	£	£	£	£	£
Imports	7,456,040	7,917,040	12,272,968	15,379,106	18,958,518
Exports	9,508,068	12,444,811	15,718,170	6,903,760 ¹	17,170,777

¹ Export of rice prohibited.

The distribution of trade by principal countries was as follows :—

Imports from	1920-21	1921-22	Exports to	1920-21	1921-22
	£	£		£	£
United Kingdom	4,744,623	2,480,154	Singapore, Penang, and British Malay States	1,837,681	5,780,504
Hong Kong	3,167,411	3,582,253	Hong Kong	2,893,230	4,168,618
Singapore	2,172,465	2,445,732	United Kingdom	827,343	910,281
India and Burma	1,611,906	1,192,270	India and Burma	465,282	254,681
China	1,205,827	1,477,787	Netherlands India and Holland	159,581	1,495,512
Japan	683,042	393,250	China	215,052	244,633
United States	643,866	766,511	Japan	112,686	1,603,195
Netherlands India and Holland	766,338	679,254	Indo-China and France	84,703	108,095
Indo-China and France	262,703	302,488	United States	31,997	18,134
Switzerland	203,310	90,570	Port Said (for orders)	—	1,932,282
Germany	105,873	153,792	Belgium	6,475	8,664
			Denmark	45,202	30,2-3
			Portugal	—	143
			Sweden	—	42
			Germany	50,685	271,667

The principal imports in 1921-22 were: cotton goods, 2,642,687*l.*; food-stuffs, 1,841,625*l.*; metal manufactures, 1,037,443*l.*; cotton yarn, 607,129*l.*; tobacco, cigarettes, etc., 500,999*l.*; machinery, 278,358*l.* The principal exports were: rice, 14,429,157*l.*, and teak, 742,263*l.*

There is a considerable trade on the northern frontiers with the British Shan States and Yunnan, carried on by hawkers.

Total trade between Siam and United Kingdom for 5 years (Board of Trade Returns):—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Siam into U. Kingdom	56,074	1,419,383	795,437	1,935,673	298,976
Exports to Siam from U. Kingdom	1,618,655	1,747,770	4,074,881	2,070,667	2,285,591

Shipping and Communications.

In 1921-22, 957 vessels of 1,014,199 tons entered and 959 of 1,012,747 tons cleared the port of Bangkok. Of those entering 316 of 461,624 tons and of those clearing 314 of 458,559 tons were British.

At the end of March, 1920, 1,376 miles of State Railways were open to traffic. The Northern Line (591 miles, standard gauge) runs through Nakorn Lampang to Chiangmai, the extreme northern terminus. The Southern Line (785 miles metro gauge) runs from Bangkok down the Peninsula to the frontier station of Padang Besar, where it connects with the Federated Malay States Railway from Penang, and to Sungei Golok, where it connects with a still incomplete Federated Malay States Line, which will later give direct communication with Singapore. There are branches to Singora, Nakorn, Sritamarat and Trang. The extension on the North-Eastern line, of which Korat is the present terminus, should be completed in 1927. The extension from Petrii, the present terminus of the Eastern Line, to Aran Pradet should be completed in 1926. Since January 1922, a through express service between Bangkok and Penang has been introduced, the distance being traversed in 36 hours. A similar service between Bangkok and Chiangmai on the Northern Line was planned for the beginning of November, 1922, when it is hoped to accomplish the journey in 26 hours. Definite arrangements have been made for the construction of a railway bridge across the Menam River, whereby the Northern and Southern Railway systems will be linked together. All State railways are under one management. Private lines include those (worked by companies) from Bangkok to Paknam at the mouth of the Menam, and from Bangkok to Tachin and Meklong on the coast to the west of the Menam, together with a tramway connecting the Northern Line (northern branch) with Phrabat.

In 1920¹ there were 379 post offices and agencies. The inland mail matter received at the different offices for delivery consisted (1919-20) of 1,821,058 letters, 552,071 post cards, 1,159,483 pieces of other postal matter. For foreign countries the returns of mails dispatched were 354,859 letters, 33,475 post cards, 84,175 pieces of other postal matter; foreign letters received 755,430, post cards 64,428, other postal matter 527,683.

There were (1920) 89 telegraph offices. Number of inland telegrams 164,044, of foreign telegrams, 180,333. Length of line, 4,657 miles; length of wire, 6,530 miles.

There were (1920) two telephone exchanges, and 1,228 instruments were installed at the premises of subscribers. A complete set of new instruments from Sweden for the telephone exchange in Bangkok were installed in 1919.

Two wireless stations on the Telefunken system have been erected, one at Bangkok and one at Senggora. They are both under the control of the Siamese naval authorities.

Money, Weights, and Measures.

In Bangkok there are branches of the Hong Kong and Shanghai Bank, the Chartered Bank of India, the Banque de l'Indo-Chine, and the Bank of Taiwan, besides an agency of the Mercantile Bank of India. A number of Chinese Banks have established branches here during recent years. There is also a branch of the Chartered Bank of India, Australia and China at Phuket. A Siamese bank, formerly with a German but now with a British manager, was established under Royal Charter in 1906, with the name of the Siam Commercial Bank, Limited. The Government in 1902 began to

The postal information is the latest available.

issue currency notes (5, 10, 20, 100 and 1,000 ticals, and since October, 1918, 1 tical notes). On March 31, 1923, there was 181,203*l.* worth of currency notes in circulation; on March 31, 1922, 8,767,753*l.* The currency notes are temporarily inconvertible.

In 1914 the Siamese Treasury Savings Bank was opened with 530 depositors. By March 31, 1922, the number was 6,912, with a total deposit of 152,318*l.*

The unit of the monetary system is the silver *tical* (officially called *bakt*), weighing 15 grams, .900 fine. Its value (formerly varying with the price of silver) was, by the Gold Standard Act of 1908, fixed at 1*s.* 6½*d.* or 13 ticals = 1*l.*, the gold value of the tical being equal to that of 55.8 centigrams of pure gold. The law also provided for a 10-tical gold piece, or *Dos*, weighing 6.2 grams, .900 fine, and thus containing 5.58 grams of pure gold, but this has not yet been issued. By an amendment to the Act, dated Sept. 4, 1919, the value of the tical has been fixed at 1*s.* 8*d.*, or 12 ticals = 1*l.* sterling, the gold value of the tical being equal to 61 centigrammes of pure gold. This will correspondingly increase the pure gold content of the *Dos*, when issued, to 6.10 grams. In addition to the tical, the following coins are now actually in use:—(silver), the *Salung* = ½-tical; the 2-*Salung* piece = ½-tical; (nickel), the 10-*Satang* piece, = 1/10 of a tical; the 5-*Satang* piece, = 1/20 of a tical; and (bronze) the *Satang*, = 1/100 of a tical. The fineness of the subsidiary silver coins (2-*Salung* and 1-*Salung* pieces) was, by the Gold Standard Act, fixed at .800, but in July, 1919, the fineness was reduced to .650.

There are no standard weights and measures in Siam, but the metric system has been adopted in many of the Government departments and on the royal railways. The customary measures of weight are:—1 *Tical* = 15 grams or approximately .53 oz.; 4 *Ticals* = 1 *Tamlung* (60 grams or 2.1 oz.); 20 *Tamlungs* = 1 *Chang* (1.2 kilograms or 2 lb. 10.3 oz.); 1 *Picul* or *Hâp* = 60.48 kilogrammes = 133½ lb. = 100 *Catties* of 1½ lb., which is the catty usually used in commerce.

The unit of length is the *Wah*. The measures of length are:—1 *Niw* = .83 inches; 12 *Niw* = 1 *Krub* (10 inches); 2 *Krup* = 1 *Sawk* (20 inches); 4 *Sawk* = 1 *Wah* (80 inches); 20 *Wah* = 1 *Sen* (133 feet); 400 *Sen* = 1 *Yote* (10 miles, roughly). For square measure the unit is the *Rai* = .39 acres, and for capacity the *kanahn* = 1/3 litre.

Diplomatic and Consular Representatives.

1. OF SIAM IN GREAT BRITAIN.

Envoy and Minister.—Phya Prabha Karawongse (appointed 1922).

Counsellor of Legation.—W. J. Archer, C.M.G.

Second Secretary.—Lewis C. Bateman

Third Secretary.—Luang Bides Bochanavisuddhi.

Attachés.—Luang Chara Naovides and Luang Sundara Vachana.

Military Attaché.—Lieut. Colonel Prince Pridi.

2. OF GREAT BRITAIN IN SIAM.

Envoy Extraordinary and Minister Plenipotentiary.—R. H. Greg (appointed 1921).

Consul-General at Bangkok.—T. H. Lyle, C.M.G.

There are consular representatives at Chiangmai, Senggora, and Nakawn-Lampang and Puket.

SPAIN.

(ESPAÑA.)

Reigning Sovereign.

Alfonso XIII., son of the late King Alfonso XII. and Maria Christina, daughter of the late Karl Ferdinand, Archduke of Austria; born after his father's death, May 17, 1886, succeeding by his birth, being a male, his eldest sister; married, May 31, 1906, to Princess Victoria Eugénie, daughter of the late Prince Henry of Battenberg and Princess Beatrice (daughter of the late Queen Victoria) of Great Britain and Ireland.

Children of the King.—(1) Prince *Alfonso*, born May 10, 1907; (2) Prince *Jaime*, born June 23, 1908; (3) Princess *Beatriz*, born June 22, 1909; (4) Princess *Maria Cristina*, born December 12, 1911; (5) Prince *Juan*, born June 20, 1913; (6) Prince *Gonzalo*, born October 24, 1914.

Sisters of the King.—I. *Marta-de-las-Mercedes*, Queen till the birth of her brother, born September 11, 1880; married February 14, 1901, to Prince Carlos of Bourbon, son of the Count of Caserta; died October 17, 1904; offspring, Alfonso, born November 30, 1901; Isabel, born October 16, 1904; II. *Maria Teresa*, born November 12, 1882; married January 12, 1906, to Prince Ferdinand of Bavaria; died September 23, 1912; offspring, Luis Alfonso, born December 12, 1906; José Eugenio, born March 26, 1909; Maria de las Mercedes, born October 3, 1911.

Aunts of the King.—I. Infanta *Isabel*, born December 20, 1851; married May 13, 1868, to Gaetan, Count de Girgenti; widow, November 26, 1871. II. Infanta *Marta-de-la-Paz*, born June 23, 1862; married, April 2, 1883, to Prince Ludwig, eldest son of the late Prince Adalbert of Bavaria; offspring, Fernando Maria, born May 10, 1884; married January 12, 1906, the Infanta Maria Teresa (*see above*), married again, October 1, 1914, Luisa de Silva y Fernández de Hueserosa (Duchess of Talavera de la Reina); Adalberto Alfonso, born June 3, 1886; Maria del Pilar, born March 13, 1891. III. Infanta *Eulalia*, born February 12, 1864; married to Prince Antoine, son of Prince Antoine d'Orléans, Duc de Montpensier, March 6, 1886; the marriage was dissolved July, 1900; offspring, Alfonso Maria, born November 12, 1886; married July 15, 1909, Princess Beatrice of Saxe-Coburg Gotha; Luis Fernando Maria, born November 5, 1888. (All sisters of the late King.)

The King, Alfonso XIII., has a civil list, fixed by the Cortes, 1886, of 7,000,000 pesetas, or 280,000*l.*, exclusive of allowances to members of the royal family. The annual grant to the Queen is fixed at 450,000 pesetas (18,000*l.*), and should the King predecease her, 250,000 pesetas (10,000*l.*) during widowhood. The annual grant to the mother of the King was fixed at 250,000 pesetas. To the Prince of Asturias, heir to the throne, 500,000 pesetas have been assigned, and to the Infante Don Jaime and Infanta Doña Beatriz, 150,000 pesetas each. The Infantas, the King's aunts, receive 550,000 pesetas.

The following is a list of the sovereigns and rulers of Spain, with dates of their accession, since the foundation of the Spanish Monarchy by the union of the crowns of Aragon and Castile.

<i>House of Aragon.</i>		<i>House of Bonaparte.</i>	
Ferdinand V., 'The Catholic'	1479	Joseph Bonaparte	1808
<i>House of Habsburg.</i>		<i>House of Bourbon.</i>	
Charles I.	1516	Ferdinand VII., restored	1814
Philip II.	1556	Isabella II.	1833
Philip III.	1598	Provisional Government	1868
Philip IV.	1621	Marshal Serrano, Regent	1869
Charles II.	1665	<i>House of Savoy.</i>	
<i>House of Bourbon.</i>		Amadeo	1870
Philip V.	1700	<i>Republic 1873-75.</i>	
Ferdinand VI.	1746	<i>House of Bourbon.</i>	
Charles III.	1759	Alfonso XII.	1875
Charles IV.	1788	Maria Cristina (<i>pro tem.</i>)	1886
Ferdinand VII.	1808	Alfonso XIII.	1886

Government and Constitution.

I. CENTRAL GOVERNMENT.

The present Constitution of Spain, drawn up by the Government and laid before a Cortes Constituyentes, elected for its ratification, March 27, 1876, was proclaimed June 30, 1876. It enacts that Spain shall be a constitutional monarchy, the executive resting in the King, and the power to make laws 'in the Cortes with the King.' The Cortes are composed of a Senate and Congress, equal in authority. There are three classes of senators—first, senators by their own right, or *Senadores por derecho propio*; secondly, life senators nominated by the Crown—these two categories not to exceed 180; and thirdly, 180 senators, elected by the Corporations of State—that is, the communal and provincial States, the church, the universities, academies, &c.—and by the largest payers of contributions. Senators in their own right are the sons, if any, of the King and of the immediate heir to the throne, who have attained their majority; Grandees who are so in their own right and who can prove an annual *renta* of 60,000 pesetas, or £4,000; captain-generals of the army; admirals of the navy; the *Patriarca de las Indias* (the 'Patriarch of West Indies'), i.e., the Primate of Spain (the Bishop of Sion, head chaplain of the Royal Household) and the archbishops; the presidents of the Council of State, of the Supreme Tribunal, of the Tribunal de Cuentas del Reino, and of the Supreme Council of War and of the Navy after two years of office. The elective senators must be renewed by one-half every five years, and by totality every time the Monarch dissolves that part of the Cortes. The Congress is formed by deputies 'named in the electoral Juntas in the form the law determines,' in the proportion of one to every 50,000 souls of the population. According to a law of August 8, 1907, voting is compulsory for all males over the age of 25: with a few unimportant exceptions. This law further enacts that all such voters must be registered on the voting list, possess full civil rights, and must have been residents of a Municipal district for at least 2 years. Members of Congress must be 25 years of age; they are re-eligible indefinitely, the elections being for five years. Deputies to the number of 98 are elected by *scrutin de liste* in 28 large districts in which minorities may be duly represented. There are in all 417 deputies. The deputies cannot take State office pensions, and salaries; but the ministers and State officials of a salary higher than 15,000 pesetas are exempted from this law. Since April 1, 1920, senators and deputies are paid 6,000 pesetas (240*l.*) a year. A law was voted in July 1922, increasing this allowance to 12,000 pesetas (480*l.*) a year; this law was passed in Congress but not so in the Senate, and it is doubtful whether it will ever come into force owing to the protests made all over the country. Both Congress and Senate meet every year. The Monarch has the power of convoking them, suspending them, or dissolving them; but in the latter case a new Cortes must sit within three months. The Monarch appoints the president and vice-presidents of the Senate from members of the Senate only; the Congress elects its own officials. The Monarch and each of the legislative chambers can take the initiative in the laws. The Congress has the right of impeaching the ministers before the Senate.

State of the parties in the Senate (elected January 2, 1921):—Liberals, 58; Conservatives, 90; Regionalists, 6; Catholics and Jaimistas, 5; Reformists, 2; Republican, 1; Independents, 18.

State of parties in the Congress (elected Dec. 19, 1920):—Liberals, 111;

Conservatives, 223; Republicans, 16; Socialists, 3; Reformists, 8; Regionalists, 20; Catholics and Jaimistas, 8; Independents, 11

The Constitution of June 30, 1876, further enacts that the Monarch is inviolable, but his ministers are responsible, and that all his decrees must be countersigned by one of them. The Cortes must approve his marriage before he can contract it, and the King cannot marry any one excluded by law from the succession to the crown. Should the line of the legitimate descendants of the late Alphonso XII. become extinct, the succession shall be in this order—first, to his sisters; next to his aunt and her legitimate descendants; and next to those of his uncles, the brothers of Fernando VII., ‘unless they have been excluded.’ If all the lines become extinct, ‘the nation will elect its Monarch.’

The executive is vested, under the Monarch, in a Council of Ministers (new Government constituted December 7, 1922) as follows:—

President of the Council.—Marquis de Alhucemas.

Minister of Foreign Affairs.—Santiago Alba.

Minister of Justice and Worship.—Count de Romanones.

Minister of War.—Niceto Alcalá Zamora.

Minister of Marine.—Admiral Aznar.

Minister of Finance.—José Manuel Pedregal.

Minister of the Interior.—Duke de Almodovar.

Minister of Public Instruction.—Joaquín Salvatella.

Minister of Public Works.—Rafael Gasset.

Minister of Labour.—Joaquín Chapaprieta.

II. LOCAL GOVERNMENT.

The various provinces and communes of Spain are governed by the provincial and municipal laws. Since January 1, 1918, every commune has its own elected *Ayuntamiento*, consisting of from five to fifty *Regidores*, or *Concejales*, and presided over by the *Alcalde*, at whose side stand, in the larger towns, several *Tenientes Alcaldes*. The entire municipal government, with power of taxation, is vested in the *Ayuntamientos*. Half the members are elected every two years, and they appoint the *Alcalde*, the executive functionary, from their own body. Members cannot be re-elected until after two years. Each province of Spain has its own Assembly, the *Diputación Provincial*, the members of which are elected by the constituencies. The *Diputaciones Provinciales* meet in annual session, and are permanently represented by the *Comision Provincial*, a committee appointed every year. The Constitution of 1876 secures to the *Diputaciones Provinciales* and the *Ayuntamientos* the government and administration of the respective provinces and communes. Neither the national executive nor the Cortes have the right to interfere in the established municipal and provincial administration except in the case of the action of the *Diputaciones Provinciales* and *Ayuntamientos* going beyond the locally limited sphere to the injury of general and permanent interests. In the Basque provinces self-government has been almost abolished since the last civil war, and they are ruled as the rest of Spain. Notwithstanding the provisions of the Constitution pressure is too frequently brought to bear upon the local elections by the Central Government.

Area and Population.

Continental Spain has an area of 190,050 square miles, but including the Balearic and Canary Islands and the Spanish possessions on the north and west coast of Africa, the total area is 194,800 square miles. The growth of the population has been as follows:—

Census year	Population	Increase	Rate of annual increase
1857	15,464,840	—	—
1860	15,655,467	191,127	0·44
1877	16,631,869	976,402	0·37
1887	17,560,352	928,483	0·56
1897	18,121,472	561,120	0·32
1900	18,607,674	486,202	0·89
1910	19,950,817	1,343,143	0·72
1920	21,347,335	1,396,518	0·65

Area and population of the forty-nine provinces:—

The population of Ceuta (34,708) is included in that of Cádiz. Besides Ceuta, Spain has, on the African Coast, the Alhucema isles (pop. 406), the Chafarinas (1,322), Melilla (42,592), Peñon de la Gomera (400), Rio de Oro (495), and Nador (4,300). The North African possessions are no longer used as convict stations, the centuries old 'Presidios' having been suppressed by a recent Decree and the prisoners brought back to the Peninsula. The Basques in the North, numbering some 400,000, differ in race and language from the rest of Spain; there are 50,000 gipsies, and a small number of Jews.

The following were the populations of the principal towns on December 31, 1920, viz. :—

Town	Pop.	Town	Pop.	Town	Pop.
Madrid	751,352	Palma	77,418	Coruña	62,022
Barcelona	710,335	Cádiz	76,818	Vigo	53,091
Valencia	243,753	Córdoba	73,710	Linares	40,010
Sevilla	205,527	Santander	72,469	Badajoz	37,967
Málaga	150,584	S. Cruz (Canaries). . . .	76,284	Alcoy	36,468
Murcia	141,175	Las Palmas	67,122	Vitoria	34,785
Zaragoza	141,350	Jerez	67,076	Castellon	34,457
Cartagena	96,891	Alicante	63,908	Burgos	32,301
Bilbao	112,819	Gijon	57,573	Salamanca	32,414
Granada	103,863	Oviedo	69,375	Pamplona	32,685
Valladolid	76,791	San Sebastian	61,971	Jaén	33,444
Lorca	74,696	Almeria	50,194	Huelva	34,437

The movement of population for 3 years was as follows :—

Years	Marriages	Births	Deaths	Surplus of births
1919	165,716	585,352	482,030	103,322
1920	175,016	622,468	494,290	128,178
1921	164,958	649,171	456,425	192,746

Emigration figures for 4 years as follows :—

Year	Male	Female	Total	Year	Male	Female	Total
1918	26,377	9,877	36,254	1920	144,093	41,835	185,928
1919	76,083	23,894	101,980	1921	62,719	29,785	92,504

Emigration from Spain is chiefly to Argentina, Cuba, Brazil, Uruguay, and Mexico.

Religion.

The national Church of Spain is the Roman Catholic, and the whole population of the kingdom adhere to that faith, except about 30,000, Protestants (about 7,000), Jews (about 4,000), Rationalists, etc. Within the Peninsula, apart from Portugal, there are 9 metropolitan sees and 47 suffragan sees, the chief being Toledo. The Constitution requires the nation to support the clergy and the buildings, &c., of the Church, and for this purpose the State expended 61,455,068 pesetas in 1921. Efforts are being made for a reduction of the Church estimates. The relations between Church and State are regulated by the Concordat of May 6, 1851, and although it is laid down in this that only the orders of San Vicente de Paul, and Felipe Neri, with one other to be subsequently named, should be permitted in Spain, many other orders have been allowed to establish themselves. The third order referred to above, has never been named, and the conditions of this Concordat have never been rigidly adhered to. A law known as the 'Padlock Bill' was passed in December, 1910, prohibiting the establishment of any more religious

houses, without the consent of the Government. This law lapsed on December 31, 1912, but its effect was prolonged by an order from the Pope to the Spanish Bishops. This temporary measure will be replaced by a definite arrangement which is at present being negotiated with Rome. Liberty of worship is now allowed to Protestants and all other religious bodies. The communities of the religious orders are numerous and influential in Spain. Many of them have schools, and about 5,000 of their members are engaged in teaching boys of the upper and middle classes, while, within many of their establishments, industries of all kinds are carried on. The number of religious houses in Spain is about 3,534, of which 806 are for men and 2,728 for women. Of those for men, 648 are devoted to education, 85 to charity, and 73 to the training of priests. The total number of monks is about 9,734 (including 1,294 foreigners). The orders for women comprise 1,472 for education, 905 for charity, and 351 for a contemplative life. The number of nuns is about 37,929 (including 2,418 foreign women). In 1920 there were in Spain 66 cathedrals, 22 collegiate churches, 19,746 parish churches, and 17,847 chapels and sanctuaries.

Instruction.

The latest census returns show that a large proportion of the inhabitants is illiterate. In 1860 19·97 per cent. of the population could read and write; 4·50 per cent. could read only; and 75·52 per cent. could neither read nor write. In 1910, 38·59 per cent. could read and write, 1·77 per cent. could read only, and 59·35 per cent. could neither read nor write.

By a law of 1857 an elaborate system of primary education was ordained: education was to be compulsory, there was to be a primary school for every 500 inhabitants, and instruction was to be on a uniform plan. This system has not been rigidly enforced, but various improvements have been effected, especially by a law of June 9, 1909, which made education obligatory. The country is divided into eleven educational districts, with the universities as centres. The public and primary schools are since 1902 supported by the Government; the total sum spent in 1920 was 80,307,299 pesetas. Most of the children are educated free. The Royal Decree of July 1, 1902, regulates all schools, whether belonging to corporations or private persons, whether self-supporting or in receipt of Government or municipal subventions. It requires schools to be authorised by Government authority, and provides for their periodical inspection, for the enforcement of rules respecting sanitation and discipline, and for the appointment of properly qualified teachers.

There are (1920) 25,848 public schools, and 5,942 private schools, the total number of pupils being 2,932,720. Secondary education is conducted in institutions, or middle-class schools, and there must be at least one of them in every province. There are at present 60 institutions with 52,445 pupils. These institutions prepare for the universities, of which there are eleven, attended by 23,403 students. The universities are at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, and Zaragoza. Each university has two or more of the faculties of philosophy and letters, law, sciences, medicine, and pharmacy. There are, besides, a medical faculty at Cádiz in connection with the University of Seville, and in the Canary Islands an educational establishment dependent on the University of Seville. Government also supports various special schools. In 1920-21 the total sum expended on education and the fine arts was 143,180,762 pesetas.

Justice and Crime.

Justice is administered by *Tribunales* and *Juzgados* (Tribunals and Courts), which conjointly form the *Poder Judicial* (Judicial Power). Judges and Magistrates cannot be removed, suspended or transferred except as set forth by law.

The Judicature is composed of:—1 *Tribunal Supremo* (Supreme High Court); 15 *Audiencias Territoriales* (Divisional High Courts); 50 *Audiencias Provinciales* (Provincial High Courts); 522 *Juzgados de Primera Instancia* (Courts of First Instance); and 9,310 *Juzgados Municipales* (District Court, or Court of Lowest Jurisdiction held by Justices of the Peace).

The *Tribunal Supremo* consists of a President, three Courts of Justice and one for administrative purposes; it is empowered with disciplinary faculties; is Court of Cassation in civil and criminal trials; decides in first and second instance disputes arising between private individuals and the State; and hears criminal causes against Princes of the Royal Family, Cabinet Ministers, and Presidents of the Senate and Congress.

The *Audiencias Territoriales* have power to try in second instance sentences passed by judges in civil matters, and in first instance all criminal trials of the province.

The *Audiencias Provinciales* are Courts competent to try and pass sentence in first instance on all cases filed for delinquency. In the most important ones evidence is taken by a jury composed of twelve lay judges.

The *Juzgados de Primera Instancia* are presided over by one Judge acting in civil matters as Judge of First Instance, and in criminal matters as *Juez de Instrucción* (examining Magistrate).

The *Juzgados Municipales* are constituted of a Judge and two Deputy Judges. This Court is competent to try small civil cases not exceeding 500 pesetas (£20) in value, and petty offences.

Old Age Pensions and Social Insurance.

By a law dated February 27th, 1908, the 'Instituto Nacional de Prevision' was created for the purpose of granting Old Age Pensions, and administering a system of social insurance. The funds of the Institution are made up of an endowment, annual State subsidy, and private and public donations. The maximum annual pension obtainable is 1,500 pesetas (£60). The number of old-age pensions granted up to December 31, 1920, was 224,346, and 245,234 for infants, a total of 469,580 pensions.

Finance.

Revenue and expenditure for five years:—

	1919-20	1920-21 ¹	1921-22 ¹	1922-23 ¹	1923-24 ¹
	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas
Revenue	3,020,550	2,798,421	1,976,668	2,617,047	2,617,047
Expenditure	3,074,959	2,682,089	2,550,794	3,044,122	2,954,164

¹ Estimates.

The budget for the fiscal year 1922-23 is made up as follows:—

Revenue	Pesetas	Expenditure	Pesetas
Direct taxes	940,500,068	Royal household	9,500,000
Indirect Taxes	1,028,370,000	Legislature	10,666,500
Monopolies	572,430,000	Public Debt	664,015,641
State properties—		Pensions	91,579,000
Income	23,300,000	Presidency of the Council	
Sales	420,000	of Ministers	1,386,500
Resources of the Treasury	52,027,000	Ministry of Foreign Affairs	14,593,269
		„ „ Grace & Justice	96,807,690
		„ „ War	500,781,730
		„ „ Marine	127,120,719

		„ „ Finance	35,262,700
		Cost of collecting Revenue	264,793,274
		Spanish Possessions in the	
		Gulf of Guinea	2,387,238
		Expenditure in Morocco	328,844,386
Total	2,617,047,068 (104,681,882 <i>l.</i>)	Grand Total	3,044,122,302 (121,764,892 <i>l.</i>)

The National Debt of Spain on April 1, 1922⁶, amounted to 11,963,084,525 pesetas (478,323,381*l.*), composed as follows:—

External Debt:—

3 per cent. and 4 per cent. perpetual exterior debt—
sealed bonds 910,761,400

Internal Debt:—

4 per cent. perpetual internal debt 8,385,521,528
5 per cent. redeemable debt (1900) 1,420,002,500
5 per cent. redeemable debt (1917) 1,003,812,500
4 per cent. redeemable debt (1908) 141,980,000
Non-interest bearing debt due to officials 1,006,597
'Pagares' of the Ministry of the Colonies 100,000,000

11,963,084,525

Defence.

ARMY.

Military service in Spain is compulsory. The total term of service is for 18 years. The law in force (1912) divides this period into the following:— 1 year, recruits in dépôt ('*Reclutas en Caja*'); 3 years, active army (1st standing); 5 years, active army (2nd standing); 6 years, reserve; and 3 years, territorial reserve. There is at present no 'organisation for the territorial reserve.'

In January, 1916, a central general staff of the army was appointed. The country is divided up into 8 territorial districts, each under a 'Captain-General.' The 1st to 6th inclusive each furnish to the field army 2 divisions, the remaining two, 1 division. A division consists of 2 infantry brigades, each consisting of 2 regiments of 3 battalions, but the third battalion is only a cadre in peace time, 1 regiment of cavalry, 1 regiment of field artillery of 6 batteries. The regiments of engineers have no fixed distribution. They consist of 6 regiments of sappers, 1 of telegraphy and 1 of railways; all of which are irregularly distributed among the different army corps. There are also 3 independent brigades of chasseurs, each of 6 battalions, 4 regiments of mountain artillery, making 16 batteries, and 1 regiment of horse artillery of 6 batteries, and a railway regiment of 8 active and 8 dépôt companies. Batteries have 4 guns. There is 1 permanent cavalry division of 2 brigades, and there are 3 permanent cavalry brigades. The Aeronautical Service consists of headquarters at Guadalajara, a balloon section, an aeronautic section and a dépôt. The peace establishment for the year 1922-23 was fixed at 215,949 men of all ranks. The army is organised in 16 divisions, each of 2 brigades of infantry, and 1 of artillery.

For the units of the second line, or reserve troops, there are at present 116 battalion cadres, 14 squadron cadres, and 14 battery cadres. The second line troops are intended to provide 7 divisions of about 13,000 combatants each. Total about 90,000.

There are also the Guardia Civil and the Carabineros. The former is a constabulary, and the latter a military police used as Customs guard on the frontier. Both are recruited from the army and under military discipline. The total strength of the Guardia Civil for 1921 is as follows:—Infantry, 19,676; cavalry, 2,866. Carabineros: Infantry, 14,307; cavalry, 550.

Outside the Spanish peninsula, there are the 3 military commands of Melilla, Ceuta and Larache on the coast of Morocco, also the Balearic Islands and the Canary Islands, each of which forms a military district. The troops in the Balearic and Canary Islands are mostly recruited from the islanders. In Africa the troops are Spanish, and are always on a war footing. During 1922 military operations of a somewhat desultory nature continued in Spanish Morocco.

The Spanish infantry is armed with the Mauser rifle, model 1893. Calibre .275. The cavalry have the Mauser carbine. The field artillery gun is a Schneider Canon 14½ pr. of 19.106.

A corps of aviators has recently been created. The military school of aeronautics is at Cuatro Vientos, 5½ miles from Madrid. In the last year large orders for aeroplanes have been placed abroad, and many French, British and Italian machines are now arriving. The service of military aviation is being reorganised on a large scale, and no official figures are obtainable for the number of machines now in use. The following wireless stations (Telefunken system) have been erected and are in charge of the military: central station at Carabanchel, range 540 miles; Barcelona, range 430 miles; Melilla, Ceuta, Tetuan, Bilbao, Valencia, range 320 miles; Almeria, Larache, range 220 miles; also at Mahon (Balearic Islands) and Coruña.

Spain has several fortresses which guard the frontiers and the coast. On the Western Pyrenees, Oyarzun and Pamplona; on the central Pyrenees, Jaca; and on the eastern Pyrenees, Gerona; on the Portuguese side, Badajoz (an old fortification) and finally on the coast, Ferrol, Cádiz, Cartagena, Mahon (Balearic Islands) and Ceuta (Africa).

NAVY.

1920	Reina Victoria. .	5,590	deck	—	10 5·5 in.; 4 3 pr. .	2	11,000	25

The old battleship *Pelayo* has now no value.

There are 13 destroyers, 26 modern torpedo boats, 12 gunboats, and submarines as indicated below.

A programme covering 6 years (approved in February, 1915) was as follows:—4 cruisers, 6 destroyers, 28 submarines, 3 gunboats, 18 coast defence vessels, and the acquisition of submarine mines. The work has been delayed, and the programme is subject to variation. Two light cruisers, 4,650 tons, are building at Ferrol, as also three gunboats. As part of this programme, 3 submarines were built in Italy and 6 additional, 610–740 tons, are built or building at Cartagena, which will give Spain a submarine flotilla comprising 10 boats, including the *Peral*. At Cartagena also three destroyers, 1,140 tons, 34 knots, are building.

The dockyard at Ferrol is worked by a British syndicate, employing Spanish workmen.

A naval wireless telegraphic station, Telefunken system, with a range of 300 miles, is situated at San Fernando (Cadiz). There are also wireless stations at Cartagena and Ferrol. A naval flying service is at work.

For 1922 the strength of the navy was fixed at 12,780 sailors and 4,605 marines. Total number of officers in active service in the navy, including all departmental corps: 1,479. Reserve: 274.

Production and Industry.

Spain is a preponderatingly agricultural country. Of the total number of inhabitants engaging in economic activities, 24·61 per cent. are engaged in agriculture, 0·23 per cent in hunting and fishing, 0·42 per cent. in mining, 5·02 per cent. in manufacture, 0·73 per cent. in transport, 0·74 per cent. in commerce, and 3·16 belong to the labouring classes.

Of the soil of Spain 88·45 per cent. is classed as productive; 35·5 per cent. being devoted to agriculture and gardens, 2·5 vineyards, 2·9 olive culture, 25·3 natural grass, 22·2 fruits.

The soil is subdivided among a very large number of proprietors. Of 3,426,083 recorded assessments to the property tax, there are 624,920 properties which pay from 1 to 10 reales; 511,666 from 10 to 20 reales; 642,377 from 20 to 40 reales; 788,184 from 40 to 100 reales; 416,546 from 100 to 200 reales; 165,202 from 200 to 500 reales; while the rest, to the number of 277,188, are larger estates, charged from 500 to 10,000 reales and upwards. The subdivision of the soil is partly the work of recent years, for in 1800 the number of farms amounted only to 677,520, in the hands of 273,760 proprietors and 403,760 farmers.

The area under the principal crops and the yield (for 3 years) were as follows:—

	Area.			Yield.		
	1920	1921	1922	1920	1921	1922
	Acres.	Acres.	Acres.	Cwts.	Cwts.	Cwts.
Wheat	10,374,712	10,507,647	10,304,706	75,444,752	79,007,450	68,294,64
Barley	4,369,310	4,386,060	4,080,321	39,392,050	38,894,514	33,762,026

Tares	494,185	493,820	482,146	2,768,692	1,889,762	1,651,306
Vetches	161,812	164,147	158,423	1,148,398	1,043,346	877,572

In 1921, 3,286,367 acres were under vines (3,289,714 acres in 1920) and produced 7,456,543,584 pounds of grapes (9,576,528,864 pounds in 1920), yielding ordinary red and white wines to the extent of 506,993,599 gallons (706,756,116 gallons in 1920). Sherry, malaga, and generous wines were exported (30,407,045 gals. in 1920). 3,985,881 acres (1921) under olives yielded 1,495,898 tons of olives and 271,129 tons of oil. Other products are esparto, flax, hemp, pulse; oranges and hazel nuts are largely exported, and Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried on in Valencia, Murcia, and other provinces (654,503 kilos. were produced in 1920). There are 15 (cane) sugar factories and 40 (beet-root) sugar factories in Spain. The production in 1921 of the former was 12,033 metric tons and of the latter 159,721 metric tons. In 1919, the total number of resinous pine-trees amounted to 5,669,476. The total number of alcohol factories in 1920 was 4,432, producing brandy and spirituous liquors to the extent of 8,921,392 gallons. Beer factories in operation amounted to 46.

The number of farm animals in 1921 was estimated as follows:—Horses, 722,183; mules, 1,294,912; asses, 1,137,980; cows, 3,718,189; sheep, 20,521,677; goats, 4,298,056; pigs, 5,151,988; camels (Canary Islands), 4,268; poultry, 25,102,973.

Spain is rich in minerals. Iron is abundant in the provinces of Vizcaya, Santander, Oviedo, Navarra, Huelva, and Seville; copper in the provinces of Seville, Córdoba, and Huelva; coal is found in Oviedo, Leon, Girona,

Valencia, and Córdoba; zinc in Santander, Murcia, Guipúzcoa, and Vizcaya; cobalt in Oviedo; lead in Murcia, Jaen, and Almería; manganese in Oviedo, Huelva, and Sevilla; quicksilver in Ciudad Real and Oviedo; silver in Guadalajara; sulphate of soda in Burgos; salt in Guadalajara; sulphur in Murcia and Almería; phosphorus in Cáceres and Huelva. Platinum is reported to have been discovered in Spain in 1915.

In 1921 workers employed in connection with the mining industries were as follows: 86,278 men, 1,920 women, and 14,254 boys and girls under 18. The total value of the mineral output in 1921 was 402,607,832 pesetas at the pit mouth, there being 2,701 productive mining concessions covering an area of 302,251 hectares. Mining accidents caused 185 deaths. The quantities and values of the more important minerals in 1921 were as follow:—

Minerals	Metric tons	Value, Pesetas	Minerals	Metric tons	Value, Pesetas
Anthracite . . .	292,591	13,228,180	Coal . . .	4,719,638	230,261,537
Asphalt . . .	3,533	22,251	Lignite . . .	408,684	11,408,499
Mercury . . .	16,146	2,658,626	Manganese . . .	20,098	875,151
Sulphur . . .	85,678	1,399,741	Silver . . .	283	90,407
Zinc . . .	48,357	3,299,201	Lead . . .	151,472	38,927,140
Copper . . .	2,138,951	41,522,593	Argentiferous lead . . .	16,420	956,140
Tin . . .	12	21,477	Salt . . .	37,096	651,113
Phosphorite . . .	34,064	1,279,800	Wolfram . . .	25	27,200
Iron . . .	2,602,369	36,237,095			
Iron pyrites . . .	623,986	17,310,102			

The total production of cement in 1920 amounted to 480,186 metric tons, representing a value of 29,023,243 pesetas.

Spain has considerable manufactures of cotton goods, principally in Catalonia. In 1910 there were 742 undertakings employing about 68,300 looms, with 2,614,500 spindles; in woollen manufactures there are 8,800 looms with 662,000 spindles. There are in Spain about 165 paper mills (likewise in Catalonia) making writing, printing, packing and cigarette paper. There are 29 glass-making factories. Corks are manufactured to a large extent; in 1913, 46,320 tons, of a value of 1,970,420*l.*; in 1917, 59,073 tons, of a value of 2,302,847*l.*

In the Spanish fisheries the total number of boats employed was in 1920 30,612, of which 1,549 are steamers; fishermen, 148,720; and the value caught about 374,079,838 pesetas, representing a total weight of 403,594 metric tons. The most important catches are those of sardines, tunny fish, and cod. In Spain there are 689 factories, with 18,675 workmen, for the preparation of sardines and fish-preserves. The value of their output in 1919 was 309,087,150 pesetas.

Commerce.

Imports and exports in pounds sterling:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1916 . . .	51,238,860	55,109,389	1919 . . .	43,375,120	52,448,472
1917 . . .	53,131,596	52,331,257	1920 . . .	57,714,466	40,994,690
1918 . . .	24,394,077	37,917,084	1921 . . .	50,455,873	32,497,616

The foreign trade was distributed as follows in regard to classes of commodities :—

	Imports		Exports	
	1920	1921	1920	1921
	Pesetas	Pesetas	Pesetas	Pesetas
Raw material	424,140,000	388,380,000	213,040,000	150,960,000
Manufactured goods	630,120,000	507,640,000	322,780,000	224,600,000
Foodstuffs	329,690,000	359,860,000	473,100,000	421,180,000
All other	21,700,000	6,110,000	16,560,000	15,750,000
Total	1,405,650,000	1,261,390,000	1,025,480,000	812,440,000

The following table shows the various classes of imports and exports for two years :—

Description	1920		1921	
	Imports	Exports	Imports	Exports
	£	£	£	£
Stone, minerals, glassware and pottery	2,489,165	3,935,100	3,496,599	2,066,775
Metals and their manufactures	3,889,693	3,457,020	4,411,077	4,218,266
Drugs and chemical products	5,264,677	2,954,519	4,221,375	2,051,702
Cotton and its manufactures	6,079,726	2,785,685	5,347,438	1,544,774
Other vegetable fibres and manufactures	752,631	226,467	591,646	104,449
Wool & hair & their manufactures	775,613	2,334,482	417,319	1,058,824
Silk and its manufactures	1,353,904	889,682	698,730	315,348
Paper and its applications	841,886	564,837	824,253	489,503
Timber and its manufactures	2,449,240	2,614,721	1,768,036	1,596,369
Animals and their products	2,884,850	973,039	1,762,833	959,783
Machinery, vehicles and vessels	10,633,384	596,726	8,962,235	263,766
Alimentary substances, including grain, sugar, wine, &c.	13,187,999	18,951,908	14,374,501	16,845,592
Various	3,608,668	621,242	2,248,384	418,059
Gold (bar and coin)	208,713	196,195	5,915	147,376
Silver	65,342	394,363	10,828	416,439
Tobacco (special)	2,904,724	—	983,590	—
Packing	233,271	—	322,474	—
Totals	57,714,486	40,994,691	50,455,873	32,497,025

In 1921 the total value of wine exported was 4,385,446*l*.

The following table shows the distribution of the commerce of Spain (general and special imports, and general exports) in 1919 and 1920, in thousands of pesetas :—

Country	Imports from		Exports to	
	1919	1920	1919	1920
	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas
United Kingdom	182,816	213,815	208,217	218,704
France	111,289	219,229	492,142	280,078
Germany	3,334	86,160	4,567	15,883
United States	391,566	381,346	9,420	77,952
Cuba	14,173	16,908	44,167	81,024
Porto Rico	6,057	6,226	1,565	3,030
Philippine Islands	19,424	26,035	1,327	2,385
Morocco	7,830	12,385	22,544	20,153
Other countries	397,393	591,590	501,913	396,515

The customs receipts and post dues in 1915 amounted to 5,839,147*l.*; in 1916, 6,001,733*l.*; in 1917, 5,475,660*l.*; in 1918, 4,787,051*l.*; in 1919, 10,478,684*l.*; in 1920, 14,418,672*l.*; in 1921, 18,609,055*l.*

On October 31, 1922, a commercial treaty was signed between Spain and the United Kingdom.

The quantity and value of wine imported into the United Kingdom from Spain were as follows in each of the last five years (Board of Trade Returns):—

—	1917	1918	1919	1920	1921
Quantity (gallons) .	1,774,794	1,575,054	5,423,448	3,978,085	1,892,052
Value (£) .	425,937	613,867	2,342,133	1,444,395	647,751

Besides wine, the following were the leading imports from Spain into the United Kingdom in the two years (Board of Trade Returns):—

—	1920	1921	—	1920	1921
	£	£		£	£
Iron ore . . .	10,493,059	1,521,822	Oranges . . .	7,111,199	6,886,573
Silver ore . . .	145,890	60,256	Raisins . . .	965,685	871,459
Pyrites . . .	2,001,455	719,854	Esparto, &c. .	1,122,904	354,247
Zinc ore . . .	30,951	1,192	Onions . . .	1,839,350	1,734,769
Quicksilver . .	248,438	226,033	Cork . . .	420,117	234,232
Lead . . .	2,059,128	1,483,503			

The chief British exports to Spain in 1921 were machinery, of the value of 2,161,547*l.*; iron and steel manufactures, 1,060,000*l.*; coal, 1,914,018*l.*; medicines and drugs, 30,704*l.*; cotton goods, 578,052*l.*; woollen goods, 102,087*l.*

Total trade between Spain and the United Kingdom in thousands of pounds for five years (Board of Trade Returns):—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Spain into U. Kingdom .	30,649	34,646	37,296	22,098	18,733
Exports to Spain from U. Kingdom .	3,860	11,092	19,273	13,510	11,990

Shipping and Navigation.

The merchant navy of the Kingdom contained on January 1, 1922, 621 steamers of 912,817 tons net, and 581 sailing vessels of 101,285 tons net. Bilbao and Barcelona are the chief maritime centres.

The shipping entered and cleared at Spanish ports in two years was as follows:—

	1920		1921	
	No.	Tons	No.	Tons
Entered:				
With cargoes	10,408	8,503,928	12,189	12,279,688
In ballast	6,714	7,316,424	8,952	7,827,954
Total	17,122	15,820,352	19,121	20,107,592
Cleared:				
With cargoes	12,849	10,957,654	14,527	13,149,391
In ballast	1,760	2,038,001	2,161	2,830,586
Total	14,609	12,995,655	16,688	15,979,977

Of the vessels entered in 1921, 10,301 vessels of 7,878,313 tons (entered) and 9,097 vessels of 5,655,719 tons (cleared) were Spanish; and in 1920, 9,519 vessels of 5,426,611 tons (entered) and 8,357 vessels of 4,485,709 tons (cleared) were Spanish.

Internal Communications.

In 1919 the total length of highways and roads in Spain was 77,745 kilometres (46,647 miles).

The total length of the railways in Spain in 1920 was 15,840 kilometres (9,804 miles), of which 11,529 kilometres (6,917 miles) are of normal gauge (1·67 metres, or 5·48 feet), and 4,297 kilometres (2,579 miles) are of varying gauges, chiefly 1 metre (3·28 feet). The remaining 14 kilometres (8 miles) are cogwheel and funicular lines. In 1920, 97,783,036 passengers were carried on the different lines, and 33,105,648 tons of goods transported. In October, 1919, the first underground electric railway service in Spain (on the model of the London 'tubes') was inaugurated in Madrid, covering a distance of 5 kms. (3 miles). In 1921 the total length of electric tramways in Spain was 802 kilometres (481 miles).

The whole of the Spanish railways belong to private companies, but nearly all have obtained guarantees or subventions from the Government. These amounted in 1920 for all the different lines to 17,580,502 pesetas. The State tax on tickets and merchandise for the year 1920 amounted to 55,313,168 pesetas. The most important companies are those in the North, with 3,681 kilometres (2,299 miles); Madrid-Saragossa-Alicante (system Antigua and Catalana), 3,664 kilometres (2,198 miles); Andaluces, 1,305 kilometres (783 miles); Madrid-Caceres-Portugal and West, 777 kilometres (467 miles); South of Spain, 397 kilometres (238 miles); La Robla to Valmaseda and Luchana (narrow gauge), 312 kilometres (187 miles); Medina-Zamora Orense and Vigo, 299 kilometres (199 miles); and Calatayud-Teruel-Valencia (Central de Aragon), 299 kilometres (199 miles). The official gauge of the principal Spanish railways has hitherto, for strategical reasons, been purposely kept different from that of France, and in consequence of this passengers are obliged to change trains at the frontier stations. The attempt made in 1882 to remedy this state of affairs was not successful. In January, 1914, however, a scheme was ordered to be drawn up for the construction of a standard-gauge railway with a double track from Madrid to the French frontier.

The Post Office carried in 1921, in the inland service, 199,647,762 letters and post-cards, and 222,388,603 printed papers and samples; in the international service, 60,762,989 letters and post-cards, and 20,629,777 printed

papers and samples. There were 8,623 post-offices. Receipts, 67,061,479 pesetas; expenses, 51,836,657 pesetas.

The length of lines of telegraphs in Spain in 1921 was 72,905 miles; the total number of interior messages sent and received was 41,673,480. International messages sent 1,211,758, received 1,353,528, transit 224,382. The number of telegraph offices was 3,173.

In 1921 there were 119 urban telephone systems and 595 inter-urban circuits; the total number of telephone stations was 73,427.

The 'Compañía Nacional de Telegrafía sin Hilos' holds the Government concession for the Public Service with ships, and between the Peninsula and the Canary Islands, and the International Service with England, Italy, Austria and Germany. They have 10 wireless stations of the Marconi system: one at Aranjuez equipped with two sets: one with 430 miles range for communication with the shore stations, and another with 1,000 miles range designed to carry out international commercial service with England and other countries. Three stations situated at Cadiz, Teneriffe, and Melenara (Las Palmas), equipped with two sets each: one of 860 miles range to carry out the service between Spain and the Canary Islands, and another of 250 miles range for ship and shore traffic. One station at Barcelona with two sets: one of 600 miles range to carry out international commercial service with Italy and Austria, respectively, and another of 250 miles range for ship and shore traffic. One station at Soller (Majorca) with 500 miles range to carry ship and shore traffic. Finally, four stations with a range of 400 miles to communicate with ships at sea and with the central station at Aranjuez, which are installed respectively at Vigo, Santander, Cabo de Palos, and Cabo Finisterre.

A royal decree ordains that all Spanish merchant vessels carrying passengers or mails, or subsidised by the Government, must be fitted with wireless telegraphy. Since February, 1917, wireless telegraphy has been made compulsory by Royal Order, for all vessels from 500 tons upwards, excepting those in the coasting trade. All Spanish men-of-war built in Spain since 1911 are also fitted up with Marconi wireless. Lately the stations at Aranjuez and Barcelona have been equipped with a 15 kw. Valve Transmitter of the latest Marconi pattern and special receiving installations of the most sensitive and up-to-date design. These improvements have been developed in order to cope with the increasing volume of the International Public Service. Automatic transmission at high speed will be carried out in the near future from Aranjuez, which will help to the development of the Public Wireless service between France and Spain, besides the other services already established.

The Wireless Stations aboard the ships of the Cia. Transatlántica are being modernized and equipped with the latest type of valve and quenched spark transmitters, valve receivers and direction finders. These new arrangements will enable the ships to be permanently in communication with the shore stations throughout the whole voyage.

Money and Credit.

On December 31, 1921, the existing contract between the Bank of Spain and the Government ended. On January 1, 1922, new regulations came into force, according to which the Government will participate in the net profits of the Bank, up to certain limits. The note issue was prorogued for another 25 years, up to December 31, 1946. The capital of the Bank was increased from 150,000,000 pesetas to 177,000,000 pesetas. After 5 years the Bank is authorised further to increase the capital, up to the limit of 250,000,000 pesetas.

On January 5, 1923, the position of the Bank was as follows:—

	1,000 Pesetas		1,000 Pesetas
Cash in hand	{ gold . . . 2,524,992	Property.	9,597
	{ silver . . . 644,639	Capital and reserve . . .	230,000
	{ bronze . . . 1,938	Notes in circulation . . .	4,178,765
Portfolio . . .	1,709,139	Deposits and Accounts current . . .	1,225,360
Public Treasury . . .	308,000	Discounts . . .	802,678
Advances to Treasury . . .	150,000		

Savings bank deposits in Spain, December 31, 1920, 939,264,997 pesetas, distributed over 1,421,133 accounts. Post Office Savings Banks, which were created under the law of June 4, 1909, were opened on March 12, 1916. In 1920 there were 861 offices in operation, covering a total of 571,382 current accounts, representing 53,025,400 pesetas.

The nominal value of the money coined in Spain from 1868 to 1907 was : gold, 920,613,935 pesetas ; silver, 1,330,589,807 pesetas. In 1905-07 no gold was coined ; in 1906-07, no silver was coined. No coinage was struck during the years 1908 and 1909. In 1910, money coined to the value of 1,976,180 pesetas in 50 centime pieces (silver) to replace money retired from circulation. In 1911, 286,843 pesetas of 50 centime pieces were coined, as well as 60,286 pesetas of bronze centime pieces. In 1913, 1,429,149 pieces of 1 centime and 1,639,500 pieces of 2 centimes were coined. No new coins have been struck since 1914.

Money, Weights, and Measures.

The *Peseta* of 100 *Centesimos* is of the value of a franc, 9½*d.*, or 27 to 28 pesetas to the pound sterling, but the actual value is about 9*d.*

Gold coins in use are 25, 20, 10, and 5-peseta pieces. Silver coins are 5-peseta, 2-peseta, 1-peseta, and 50-centime pieces.

Both gold and silver coins are of the same weight and fineness as the corresponding French coins. Under a law of July 29, 1908, the Government is withdrawing from circulation the spurious 5-peseta pieces which had become common. Gold coinage is not in general circulation.

Theoretically, there is a double standard of value, gold and silver, the ratio being 15½ to 1. But of silver coins only the 5-peseta piece is legal tender, and the coinage of this is restricted.

On January 1, 1859, the metric system of weights and measures was introduced in Spain. But, besides these, the old weights and measures are still largely used. They are:—The *Quintal* = 220·4 lb. avoirdupois ; the *Libra* = 1·014 lb. avoirdupois ; the *Arroba*, for wine = 3½ imperial gallons ; for oil = 2½ imperial gallons ; the *Square Vara* = 1·09 vara = 1 yard ; the *fanega* = 1½ imperial bushel.

Diplomatic and Consular Representatives.

1. OF SPAIN IN GREAT BRITAIN.

Ambassador.—Alfonso Merry del Val, G.C.V.O. (appointed March 16, 1913).

Counsellor.—Count de Prodere,

First Secretary.—Alberto Aguilar.

Second Secretary.—Vizconde de Mambblas.

Third Secretary.—Luis de Silva.

Attachés.—Eduardo M. Peña, Marquis de Murrieta, Pedro Soto y Domecq, and Pedro de Zulueta

Military Attaché.—Lieut.-Colonel Fernando Rich y Font.

Naval Attaché.—Captain Manuel Vierna.

Consul-General in London.—José Congosto (appointed February 6, 1913).

There are Consular representatives at Cardiff, Glasgow, Liverpool, Newcastle, and Southampton; and Consular agents in all the principal towns.

2. OF GREAT BRITAIN IN SPAIN.

Ambassador.—The Rt. Hon. Sir Esmé William Howard, K.C.B., G.C.M.G., C.V.O. (appointed September 3, 1919).

Counsellor.—H. Gurney, C.M.G., M.V.O.

First Secretary.—H. L. Thomas.

Third Secretary.—W. E. Houston-Boswall.

Military Attaché.—Major-General the Hon. Sir. C. Sackville West, K.B.E., C.M.G.

Naval Attaché.—Commander E. B. C. Dicken, D.S.C., R.N.

Commercial Secretary.—U. de B. Charles.

Consul-General (at Barcelona).—A. L. S. Rowley.

There are Consular representatives at Bilbao, Cadiz, Coruña, Madrid, Seville, Malaga, Almeria, Valencia, and other places.

Colonies.

The area and population of the colonial possessions of Spain are approximately as follows:—

Colonial Possessions	Area: English square miles	Population
Possessions in Africa:		
Rio de Oro and Adrar	109,200	495
Ifni	965	20,000
Spanish Guinea	10,810	150,000
Fernando Po, Annobon, Corisco, Great Elobey, Little Elobey	795	15,896
Spanish Morocco ¹	7,700	600,000
Total, Africa	129,470	786,391

¹ See Morocco.

For administrative purposes the Canary Islands are considered part of Spain. The area of the islands is 2,810 square miles, and their population 503,151.

Rio de Oro and Adrar, stretching from the Wadi Draa 29° N. and 14° 4' W. to Cape Blanco 20° 46' N. and 17° 3' W. Politically there are three zones:—(1) Colony of Rio de Oro, 26° N. to 20° 46' N., an area of 65,500 square miles; (2) the Protectorate, between 27° 40' N. and 26° N. bordered on the East by 8° 40' W., an area of 34,700 square miles. (3) the occupied territory, between 27° 40' N. and the Wadi Draa, an area of about 9,000 square miles, settled by various treaties, 1900 to 1912. The Colonies are under the governorship of the Canary Islands, with a sub-governor resident at Rio de Oro. The capital of this colony is Villa Cisneros (lat. 23° 46' 55" N., long. 18° 11' 13" west of Paris). There is no town called Rio de Oro, the name being applied to the arm of the sea and the colony generally.

Ifni was ceded to Spain by Morocco in 1860. By the Franco-Spanish agreement of 1912 it extends along the West Coast of Morocco to the north of Wadi Draa, from Wad Nun on the south to Wad Bu Sedra on the north,

and a distance of 15 miles inland from the coast. The occupation is purely nominal. Area, 965 square miles, population, 20,000. There are several small harbours and villages; the population is engaged in fishing, and in cultivating dates and garden produce.

The Spanish territory on the Gulf of Guinea, extends from the Muni to the Campo river and the Cameroons, its eastern boundary being on the meridian of 11° 20' E. of Greenwich. The capital is Santa Isabel, in the Island of Fernando Po, with a population of 2,500. The principal mountain is known as the Pico de Santa Isabel, or Clarence Peak (9,185 feet). The island is considered one of the most fertile spots on the West Coast of Africa. The other possessions of Spain in the Gulf of Guinea comprise the Islands of Annobon ($7\frac{1}{2}$ square miles), Little Elobey (22 acres), Great Elobey ($\frac{3}{4}$ square mile) and Corisco ($5\frac{1}{2}$ square miles), and the district of Rio Muni on the mainland (9,470 square miles), the principal town of which is Bata. The coast region is low and marshy and contains vast forests. The vegetation is luxuriant and at places along the coast there are Spanish, French, and English factories. But there are no harbours and the rivers are all inaccessible to vessels. The population of Fernando Poo is 12,108. There are about 250 to 300 Europeans in the island, about 30 of these being British. The population of Little Elobey is 222. Great Elobey is covered with bush; its population is 123. Corisco has a population of 650 and Annobon of 1,313, while the population of Rio Muni territory is estimated at 130 whites and 89,000 natives. All the colonies are under the control of a Governor-General, resident at Santa Isabel. A Sub-Governor is appointed to the district of Bata and another to the district of Elobey, which includes the Islands of Corisco and Annobon. The aborigines of Fernando Poo are called Bubis. Those of Elobey and Corisco are mostly of the Benga tribe, but like the people of Annobon they take the names of their respective islands. In Bata the Pamwes are the principal tribe. There are Catholic and American Presbyterian missions at work among the natives. Spain has given to France the right of pre-emption in case of the sale of any of these African colonies or the adjacent islands.

SWEDEN.

(SVERIGE.)

Reigning King.

Gustaf V., born June 16, 1858. Succeeded to the throne on the death of his father, Oscar II., December 8, 1907. Married, Sept. 20, 1881, to Princess Victoria, born August 7, 1862, daughter of Friedrich, Grand Duke of Baden.

Children of the King.

I. The Crown Prince *Gustaf Adolf*, Duke of Skåne, born Nov. 11, 1882, married, June 15, 1905, to Princess Margaret Victoria, born January 15, 1882 (died May 1, 1920), daughter of Prince Arthur, Duke of Connaught; offspring, Prince Gustaf Adolf, born April 22, 1906; Prince Sigvard, born June 7, 1907; Princess Ingrid, born March 28, 1910; Prince Bertil, born Feb. 28, 1912; Prince Carl Johan, born Oct. 31, 1916.

II. Prince Wilhelm, Duke of Södermanland, born June 17, 1884, married, May 3, 1908, to Grand Duchess Maria Pavlovna, born April 19, 1890, daughter of Grand Duke Paul Alexandrovitch of Russia, divorced March 17, 1914. Issue, Prince Lennart, born May 8, 1909.

Brothers of the King.

I. Prince *Oscar* Bernadotte, Count of Wisborg, born Nov. 15, 1850. Renounced his succession to the throne and married, March 15, 1888, Ebba Munck of Fulkila, born Oct. 24, 1858.

II. Prince *Carl*, Duke of Västergötland, born Feb. 27, 1861. Married August 27, 1897, to Princess Ingeborg, born Aug. 2, 1878, daughter of King Frederik of Denmark. Issue, Princess Margaretha, born June 25, 1899 (married May 22, 1919, to Prince Axel of Denmark); Princess Märtha, born March 28, 1901; Princess Astrid, born Nov. 17, 1905; and Prince Carl, born Jan. 10, 1911.

III. Prince *Eugen*, Duke of Närke, born Aug. 1, 1865.

King Gustaf V. is the fifth sovereign of the House of Ponte Corvo and great-grandson of Marshal Bernadotte, Prince of Ponte Corvo, who was elected heir-apparent of the crown of Sweden by the Parliament of the Kingdom, Aug. 21, 1810, and ascended the throne Feb. 5, 1818, under the name of Carl XIV. Johan. He was succeeded at his death, March 8, 1844, by his only son Oscar. The latter died July 8, 1859, and was succeeded by his eldest son Carl XV., at whose premature death without male children, the crown fell to his next surviving brother, the late King.

The royal family of Sweden have a civil list of 1,333,000 kronor. The sovereign, besides, has an annuity of 300,000 kronor, or 16,520*l.*, voted to King Carl XIV. Johan and his successors on the throne of Sweden.

As to the dissolution of the Union with Norway, see under *Norway*.

The following is a list of the kings and queens of Sweden, with the dates of their accession, from the accession of the House of Vasa:—

<i>House of Vasa.</i>			
Gustaf I.	1521	Carl XI.	1660
Eric XIV.	1560	Carl XII.	1697
Johan III.	1568	Ulrika Eleonora	1718
Sigismund	1592	<i>House of Hesse.</i>	
Carl IX.	1599	Fredrik I.	1720
Gustaf. II. Adolf . . .	1611	<i>House of Holstein-Gottorp.</i>	
Christina	1632	Adolf Fredrik	1751
<i>House of Pfaltz.</i>		Gustaf III.	1771
Carl X.	1654	Gustaf IV. Adolf . . .	1792
		Carl XIII.	1809

<i>House of Riksdag.</i>			
Carl XIV. Johan.	.	.	1818
Oscar I.	.	.	1844
Carl XV.	.	.	1859
Oscar II.	.	.	1872
Gustaf V.	.	.	1907

Constitution and Government.

The fundamental laws of the Kingdom of Sweden are:—1. The Constitution or *Regerings-formen* of June 6, 1809; 2. The amended regulations for the formation of the Diet of June 22, 1866 (modified by acts passed in 1909, 1919 and 1921); 3. The law of royal succession of September 26, 1810; and 4. The law on the liberty of the press of July 16, 1812. The King must be a member of the Lutheran Church. His Constitutional power is exercised in conjunction with the Council of State or (in legislation) in concert with the Diet, and every new law must have the assent of the crown. The right of imposing taxes is, however, vested in the Diet. This Diet, or Parliament of the realm, consists of two Chambers, both elected by the people. The First Chamber consists of 150 members. Their election takes place by the members of the 'Landstings,' or provincial representations, and electors of six towns, not represented in the 'Landstings.' The Constituencies are 19, arranged in 8 groups, in one of which an election takes place in September every year. The manner of the election is proportional and regulated by a special election law. All members of the First Chamber must be above 35 years of age, and must have possessed for at least three years previous to the election either real property to the taxed value of 50,000 kronor (2,777*l.*), or an annual income of 3,000 kronor (166*l.*). They are elected for the term of eight years. The Second Chamber consists of 230 members elected for 4 years by universal suffrage, every man and woman over 23 years of age, and not under legal disability, having the right to vote. The country is divided into 28 constituencies, in each of which one member is elected for every 230th part of the population of the Kingdom it contains. The method of election is proportional, and the voter must indicate on the ballot paper the name of a party, or the occasional designation of a group of voters in the constituency. On the voting paper the names of the candidates must appear in vertical succession and these names may not exceed in number the number to be elected by more than two. In the counting of votes, the ballots are grouped according to parties and the order of candidates within each group determined. The places to be given to the different groups of voting papers are decided according to the d'Hondt rule. The members of both Chambers obtain salaries, free of income tax, for their services, at the rate of 3,400 kr. (24 kr. a day) and 4,500 kr. (32 kr. a day) for members living in or outside the capital, for each ordinary session, or, in the case of an extra session, 24 or 32 kr. a day, besides travelling expenses. The salaries and travelling expenses of the deputies are paid out of the public purse.

The executive power is in the hands of the King, who acts under the advice of a Council of State, the head of which is the Minister of State. The Ministry, appointed October 13, 1921, is composed as follows:—

Minister of State (Premier) and Minister for Foreign Affairs.—Hjalmar Branting.

Minister of Justice.—A. E. Akerman.

Minister of Defence.—P. A. Hansson.

Minister for Social Affairs.—H. Lindqvist.

Minister of Communications.—A. E. Örne.

Minister of Finance.—F. W. Thorsson.

*Minister of Education and Ecclesiastical Affairs.**—O. Olsson.

Minister of Agriculture.—S. Linders.

Minister of Commerce.—C. E. Svensson.

Ministers without Portfolio.—M. Sandler, M. Nothin, and K. J. D. Schlyter.

All the members of the Council of State are responsible for the acts of the Government.

The second chamber, elected 1921: 62 Moderates, 21 of the Agrarian Party, 41 Liberals, 93 Socialists and 13 of the Socialistic Left. The upper chamber (totally renewed 1921): 41 Moderates, 18 of the Agrarian Party, 38 Liberals, 50 Socialists, and 3 of the Socialistic Left.

The provincial administration is entrusted in Stockholm to a High Governor, and in each of the 24 governments to a prefect, who is nominated by the King. As executive officers of the prefects there are 491 sub-bailiffs (*Landsfiskaler*). The right of the people to regulate their own local affairs is based on the communal laws of March 21, 1862. Each rural parish, and each town, forms a commune or municipality in which all men and women over 23 years of age, and not under legal disability, who have paid the local taxes for at least one of the preceding three years are voters. In small communes and towns the communal assembly may itself decide on all questions of administration, police and communal economy. It may, however, elect a communal council to decide on the questions, and all communes with 1,500 inhabitants and over do so. These councils are named *Kommunalfullmäktige* in the country, and *Stadsfullmäktige* in the towns. Ecclesiastical affairs and questions relating to primary schools are dealt with by the parish assemblies, presided over by the pastor of the parish. Each government has a county council (*Landsting*) elected by men and women who enjoy municipal suffrage, but they must have completed their 27th year. The county council regulates the internal affairs of the government, meeting annually for a few days in September under a president elected by and from the members. Towns having a population of at least 1-150th of the total population of the realm, and towns already separated from the 'Landstings,' and where the number of inhabitants is not fallen below that which caused their separation, are administered separately by their municipal councils: these towns are Stockholm, Göteborg, Malmö, Norrköping, Hålsingborg and Gävle. As in elections for the Diet, so in the communal elections of municipal representatives, of members of the 'Landstings,' &c., the method of election is proportional. Women are eligible for communal offices.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

The first census took place in 1749, and it was repeated at first every third year, and subsequently, after 1775, every fifth year. At present, a general census is taken every ten years, besides which there are annual enumerations of the people.

The area and population of Sweden, according to the census taken on December 31, 1920, and estimate for December 31, 1921, are as follows:—

Governments (Län)	Area : English square miles	Population Dec. 31, 1920	Population Dec. 31, 1921	Pop. per square mile 1921
Stockholm (city)	53	419,440	422,042	7963.0
Stockholm (rural district)	2,987	243,194	247,185	82.7
Uppsala	2,051	136,718	138,343	67.4
Södermanland	2,629	190,478	191,763	72.9
Östergötland	4,265	305,742	307,521	72.1
Jönköping	4,447	227,629	229,542	51.6
Kronoberg	3,825	158,612	158,971	41.5
Kalmar	4,454	231,077	231,837	52.0
Götaland	1,220	55,853	56,235	46.0
Blekinge	1,164	147,098	148,407	127.5
Kristianstad	2,492	241,018	242,779	97.4
Malmöhus	1,871	487,459	490,508	262.1
Halland	1,900	148,712	149,575	79.7
Göteborg and Bohus	1,948	424,788	429,335	220.4
Älvsborg	4,914	300,371	303,079	61.6
Skaraborg	3,273	243,777	245,376	74.9
Värmland	7,459	268,681	270,978	36.3
Örebro	3,520	218,506	220,386	62.5
Västmanland	2,608	168,815	169,504	64.9
Kopparberg	11,586	254,259	256,335	22.1
Gävleborg	7,615	268,900	270,960	35.6
Västernorrland	9,856	265,227	268,096	27.1
Jämtland	19,900	133,536	134,993	6.8
Västerbotten	22,749	182,246	185,188	8.1
Norrbottn	40,731	182,953	185,378	4.5
Lakes Vänern, Vättern, Mälaren, Hjälmarén	3,512	—	—	—
Total	173,035	5,904,489	5,954,316	34.1

In 1921 there were 2,925,988 males and 3,028,328 females.

The growth of the population has been as follows:—

Year	Population	Increase per ct. per annum	Year	Population	Increase per ct. per annum
1880	4,565,668	0.95	1910	5,522,403	0.73
1900	5,136,441	0.71	1920	5,904,489	0.69

With the exception of (1920) about 29,500 Finns, 7,100 Lapps, and some thousands others, the Swedish population is entirely of the Scandinavian branch of the Aryan family.

On December 31, 1910, there were 21,708 foreigners in Sweden, including subjects of Finland 5,538, Norway 4,537, Germany, 3,400, Denmark 2,900, Russia 2,900, the United States 816, the United Kingdom 288, other states 1,329.

The population was divided as follows in 1910:—

	Male	Female		Male	Female
Unmarried	1,690,813	1,686,141	Widowed	105,170	221,816
Married	900,840	910,345	Divorced	2,906	5,872

MOVEMENT OF THE POPULATION.

1. *Births, Deaths, and Marriages.*

Year	Total living Births	Of which Illegitimate	Stillborn	Marriages	Deaths exclusive of Stillborn	Surplus of Births over Deaths
1917	120,855	18,060	2,811	35,524	57,385	43,470
1918 ¹	117,789	—	—	38,626	104,183	13,556
1919 ¹	114,505	—	—	40,327	84,247	30,258
1920 ¹	138,505	—	—	42,829	78,112	60,893
1921 ¹	126,770	—	—	39,206	73,460	53,310

¹ Provisional.2. *Emigration.*

Year	Immigrants	Total Emigrants	To U. S. of America	Year	Immigrants	Total Emigrants	To U. S. of America
1914	8,636	12,960	9,589	1918	4,932	4,853	1,416
1915	6,357	7,512	4,538	1919	7,809	7,337	3,777
1916	6,713	10,571	7,268	1920	10,841	10,242	6,691
1917	5,811	6,440	2,462	1921	8,551	8,950	5,430

II. PRINCIPAL TOWNS.

In 1860 the town population numbered only 434,519, in 1900 1,103,951, and at the beginning of 1922, 1,798,464, showing an increase of from 11 per cent. of the whole population of Sweden (in 1860) to 30 per cent. (in 1922).

Towns over 10,000 inhabitants at the beginning of 1922.—

Stockholm	422,042	Karlskrona	27,897	Kristianstad	13,062
Göteborg	227,343	Linköping	27,243	Falun	12,972
Malmö	113,602	Lund	23,450	Mölnådal	12,796
Norrköping	58,358	Landskrona	20,120	Västervik	11,876
Hälsingborg	47,655	Larstad	19,313	Nyköping	11,719
Gävle	37,969	Halmstad	18,500	Kristinehamn	11,709
Örebro	36,099	Kalmar	17,194	Ystad	11,670
Västerås	30,662	Sundsvall	16,916	Trälleborg	11,571
Ekilstuna	30,168	Södertälje	15,568	Härnösand	11,373
Jönköping	29,524	Trollhättan	14,846	Söderhamn	11,277
Uppsala	29,081	Uddevalla	13,812	Luleå	10,662
Borås	28,769	Östersund	13,803	Skövde	10,175

Religion and Instruction.

The mass of the population adhere to the Lutheran Protestant Church, recognised as the State religion. There are 12 bishoprics (Uppsala being the metropolitan see) and 2,585 parishes at the beginning of 1922. At the census of 1910, the number of 'Evangelical, Lutherans' was retified at 5,497,689, the Protestant Dissenters, Baptists, and Methodists, numbering 14,715. Of other creeds, there were 3,070 Roman Catholics (under a Vicar Apostolic resident at Stockholm), 6,112 Jews, and 817 others. No civil disabilities attach to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

The Kingdom has two universities, at Uppsala (founded in 1477) and Lund (founded in 1668), the former having 2,579 and the latter 1,410 students in the autumn of 1921. There are also a State faculty of medicine in Stockholm (founded in 1810), with 690 students, and private universities in Stockholm (founded in 1877), philosophical and law faculties, with 913 students, and Göteborg (founded in 1839), philosophical faculty, with 212 students. In Stockholm there is also an academy of commerce with 164

students. In 1921 there were 77 public secondary schools, with 28,562 pupils; 51 people's high schools, 2,944 pupils; 15 normal schools for elementary school teachers, 2,695 pupils; 2 high and 7 elementary technical schools, about 4,000 pupils; 5 navigation schools, 325 pupils; military schools, agricultural schools, veterinary and other special schools; besides institutions and schools for deaf mutes and the blind. Public elementary instruction is gratuitous and compulsory (since 1842), and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated. The school age is 7 to 14 years. In 1921 there were in the elementary schools, 25,384 teachers and 707,520 pupils. Among the recruits (Beväring) of 1916 only 0·16 per cent. were unlettered, only 0·32 per cent. unable to write.

Justice and Crime.

The administration of justice is entirely independent of the Government. Two functionaries, the Justitie-Kansler, or Chancellor of Justice, and the Justitie-Ombudsman, or Attorney-General, exercise a control over the administration. The former, appointed by the King, acts also as a counsel for the Crown; while the latter, who is appointed by the Diet, has to extend a general supervision over all the courts of law. The Kingdom, which possesses one Supreme Court of Judicature, is divided (beginning of 1922) into 3 high court districts and 216 district courts divisions, of which 91 are urban districts and 125 country districts.

In town these district courts (or courts of first instance) are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—peasant proprietors—the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. In Sweden trial by jury only exists for affairs of the press.

Pauperism.

According to the Poor-law ordinances issued in 1918 the communes are bound to assist children under 16 years of age, if their circumstances require it, and all who from age, disease, or infirmity (physical or mental) are unable to support themselves. Each commune and each town (borough) constitutes a poor district, and in each is a board of public assistance. In 1921 these districts possessed workhouses and similar establishments to the number of 1,924, capable of lodging 61,505 people. There were besides 1,596 smaller cottages for the poor, assigned as dwellings for 5,902 paupers.

The total of those in receipt of relief was, in 1921, 253,078, of which 147,043 belonged to country parishes and 106,035 to towns. Recipients of relief amounted relatively to the mean population to 3·51 per cent. in the country, 6·02 in towns, and 4·25 on the average for the whole kingdom.

Finance.

Revenue and Expenditure for six years are shown as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1919	70,356,038	46,748,944	1922 ¹	51,644,714	51,644,714

The expenditure for the Church is chiefly defrayed by the parishes and out of the revenue of landed estates belonging to the Church, and the amounts do not appear in the budget estimates. The expenses for public instruction are in great part defrayed by the parishes.

On January 1, 1923, the public liabilities of the Kingdom, contracted principally for productive purposes (railways, &c.), were as follows:—

		Kronor			Kronor
Funded loan of 1880 with 3½ int.		37,719,330	Funded loan of 1913 with 4½ int.		72,000,000

¹ These bonds may be redeemed by the National Debt Board at six months' notice. Out of this loan, the amount of 85,629,360 kronor was sold between 1887 and 1914.

The debt amounts to about 244 kronor per head of the population (at the end of 1910 it was only 96 kronor per inhabitant); but as the receipts from business undertakings and outstanding loans in ordinary times exceed the whole interest, the charge per head is nominal. The assets entered in the State register on January 1, 1922, amounted to 2,969,866,000 kronor. To this sum may be added at least 550,000,000 kronor, representing other assets that have not been booked. Thus the financial situation of the State shows a surplus of assets of about 2,096,000,000 kronor.

The income of the communes in 1918 was 462,371,600 kronor, and the expenditure 556,475,993 kronor. Their assets amounted to 1,391,245,456 kronor, and their debts to 993,105,293 kronor. The revenue of the provincial representative bodies (landsting) was 61,940,545 kronor, and expenditure 41,998,625 kronor; their assets 111,894,503 kronor, and debts 41,217,267 kronor.

Defence.

ARMY.

The military forces are recruited on the principle of universal service, but aided by a voluntarily enlisted *personnel* which forms the permanent cadres for training purposes.

Liability to service commences at the age of 20, and lasts till the end of the 42nd year. The men belong to the first 'uppbåd' of the active army or *Beväring* for 11 years; then for 4 years to the second 'uppbåd'; and finally for 8 years to the *Landstörn*. The initial period of training is 250 days for the infantry. It is 281 days for cavalry, horse and field artillery, and

heavy field artillery, and 295 days for garrison artillery and engineers. The infantry is called up for exercise 4 times, 3 in the first period of their service, for 30 days each time, and once later for 15 days. The cavalry, field artillery and heavy artillery have 3 trainings, 2 of 42 days and 1 of 25 days. The garrison artillery and garrison engineers have two trainings of 35 days and one of 15 days, other engineers have two trainings of 35 days and one of 25 days.

In 1921 the Army and Navy departments were combined in a defence ministry which controls all defensive services.

The field army is organised in 6 divisions, each of 2 brigades of 2 regiments (12 battalions and 4 machine gun companies), with a regiment of cavalry (4 squadrons and 1 machine gun section), a regiment of field artillery (11 batteries of 4 guns each), 1 or 2 companies of engineers, a pontoon train, a telegraph detachment, 1 or 2 field searchlight sections, a supply company, a bearer company, ammunition column and train. There is also a cavalry division of 4 regiments and the horse artillery division (16 squadrons and 3 batteries). The total establishment is 120,000. The first 'uppbåd' of the Beväring would be able (as far as numbers go) to furnish a nearly equal number of reserve troops, while the second 'uppbåd' would provide a sufficient reserve to make good the losses on field service, but it is not known at present what is to be the organisation of the considerable reserves which will be available.

The table below shows the peace strength in 1922 :—

Troops	Officers	Rank and File		Total
		Cadres (Voluntary Enlistment)	Conscripts (Contingent on the Repeti- tion exercise, 1916)	
Army-Staff, &c.	83	—	—	83
Infantry, 28 regiments (84 battalions)	1,672	11,321	59,600	72,593
Cavalry, 8 regiments (50 squadrons)	273	4,126	3,900	8,299
Field Artillery, 6 regiments and 1 corps (70 batteries) and 2 Horse Artillery batteries	469	4,019	7,900	12,388
Heavy Artillery, 1 regiment and 1 bat- tery (7 batteries)

Train and Medical Service, 6 corps and 1 company (19 companies)	123	215	600	938
Intendance (4 companies)				
Total Peace establishment	2,894	21,689	79,600	104,183

The total number of horses is about 11,000.

The total numbers on the rolls amount to about 655,000.

The strength of the reserve of officers and voluntarily enlisted men amounts to about 28,500, that of the Beväring to about 400,000.

The Landstorm amounts to about 195,000 of all ranks.

The Swedish infantry are armed with the Mauser rifle (calibre 6.5 mm.) ; the horse and field artillery have the Krupp 7.5 cm. Q.F. gun. The military budget for 1922 amounted to 105,593,000 kronor for the army,

41,543,000 kronor for the navy, and on the supplementary budget respectively 34,677,195 and 330,000 kronor for the ministry of defence and 16,600,000 kronor common to the army and navy.

NAVY.

The Swedish Navy is maintained entirely as a coast-defence force. The following is a list of the principal ships:—

Laid down	Name	Displacement tons	Maximum armour		Armament	Torpedo tubes	Indicated horse power	Maximum speed knots
			On belt	On guns				
1894	Oden	3,700	10	10	2 10-in. ; 6 4·7-in. .	1	5,300	17
1896	Thor							
1896	Njord							
1899	Dristigheten	3,600	8	8	2 8·2-in. ; 6 6-in. .	2	5,600	17
1900	Aras							
	Vasa							
	Tapperbeten	3,750	7	7½	2 8·2-in. ; 6 6-in. .	2	5,500	17
1902	Mänligheten							
1904	Oscar II.	4,660	6	7½	2 8·2-in. ; 8 6-in. .	2	9,000	18
1903	Fylgia	4,810	4	5	8 6-in.	2	12,400	22
1913	Sverige	7,980	8	8	4 11-in. ; 8 6-in. .	2	20,000	22·5
1915	Gustaf V.	7,605	8	8	4 11-in. ; 8 6-in. .	2	20,000	22·5
	Drottning Victoria							

There are 10 destroyers, 4 old torpedo-gunboats, 27 torpedo boats, and 15 submarines. Additional submarines, to be built at a cost of 15,000,000 kronor, are in the programme of 1922-24. The future of the Navy is under discussion. A Minister of Defence now controls the naval and military services.

The personnel of the Royal Navy is divided into three classes, viz. : 1. The Active List ; 2. The Reserve ; 3. The *Beväring*. On the active list are 5 flag-officers, 9 commodores, 44 captain-commanders, 131 captains, 110 lieutenants, 55 sub-lieutenants, 1,413 warrant officers, and 3,725 petty officers and men, while about 340 commissioned officers belong to the Reserve.

On the active list of the Royal Coast Artillery are 1 general, 2 colonels, 4 lieut.-colonels, 8 majors, 52 captains, 49 lieutenants, 24 sub-lieutenants, 383 warrant officers, and 1,105 petty officers and men.

Production and Industry.

I. AGRICULTURE.

Sweden has always been an agricultural country. In 1751 only 9·5 per cent. of the population depended for a livelihood on the various industries and commerce ; in 1840 the percentage had risen to 10·75, in 1870 it had advanced to 19·6, in 1900 to 38·8, and in 1910 to 45·8 per cent., so that to-day the population of Sweden is about equally divided in the pursuit of agriculture on the one hand and commerce and industries on the other.

The number of farms in cultivation in 1919 was 428,026 ; of these there were of 2 hectares and under, 119,899 ; 2 to 20 hectares, 270,625 ; 20 to 100 hectares, 34,926 ; above 100, 2,576. Of the total land area of Sweden

9·4 per cent. is under cultivation, 2·3 per cent. under natural meadows, and 59·8 per cent. under forests, the products of which form a staple export.

The following table shows the area and yield of the chief crops for 3 years:—

Crop	Acreage (hectares)			Produce (tons)		
	1920	1921	1922	1920	1921	1922
Wheat . . .	144,728	144,728	144,128	280,917	335,717	255,801
Rye . . .	369,735	369,735	352,834	569,850	674,616	576,061

Roots ² . . .	131,812	135,606	119,875	3,533,888	4,155,373	3,790,594
Hay ³ . . .	1,376,406	1,375,606	1,358,360	5,146,447	4,278,876	4,200,886

¹ Peas, beans, and vetches.

² Sugar-beet and fodder-roots.

³ And fodder plants.

The value of all crops was estimated in 1921 at 1,384 million kronor, and in 1922 at 1,020 million kronor. On June 1, 1919, the live-stock was as follows: Horses, 715,681; head of cattle, 2,550,828; sheep and lambs, 1,563,654; pigs, 716,783.

II. MINES AND MINERALS.

Mining has been from time immemorial the leading industry of Sweden, which was the biggest producer of iron in Europe until the use of coal for the manufacture of pig-iron revolutionized that industry. The lack of fossil fuel is the reason why at present mining in Lappland merely concerns itself with the raw products, though experiments made in recent years have carried the problem of electric production of iron ore a good step forward. There were raised in the year 1921, throughout the Kingdom, 6,464,347 tons of iron ore. The pig-iron produced amounted in 1921 to 313,080 tons, and in 1920 to 470,550 tons; the ingot iron 211,602 tons in 1921, and 437,474 tons in 1920. Of iron ore, in 1921, 4,331,046 tons, and in 1920, 3,736,329 tons, were exported; of pig-iron, 82,736 tons in 1921, and 115,417 tons in 1920. There were also raised in 1921, 578 tons of silver and lead ore, 441 tons of copper ore, 29,426 tons of zinc ore, 6,245 tons of manganese ore, and 45,772 tons of sulphur pyrites. The gold produced amounted to 1·646 kilograms, the silver to 415, the lead to 487,687, the copper to 1,148,859, the zinc to 3,510,385. There are not inconsiderable veins of coal in the southern parts of Sweden, giving 376,692 tons of coal in 1921. In 1921 there were 35,466 persons (2,299 young people under 18) engaged in mining.

III. INDUSTRIES.

The industries of Sweden are spread fairly well over the whole country. The mining of iron ore has reached its highest perfection north of the Polar circle, and the most important sawmills are located along the shores of the Gulf of Bothnia. The production of iron and steel has taken place in central Sweden since the earliest times in Swedish history; pig iron is produced chiefly in Sandviken, Domnarvet, Uddeholm, and Fagersta. Cream separators, lighthouse apparatus, telephone supplies, motors, and many kinds of electrical machinery are among the highly specialised products of the metallurgical industries. The porcelain factories of Rörstrand and

Gustavsberg and the glass factories of Kosta and Rejmyre produce wares that have achieved a high reputation in the markets of the world. Innumerable factories for the production of finished products are scattered all over the countryside. Of the workmen employed in the industries of Sweden, those who reside in the country exceed in number the workmen who live in towns.

The timber and wood-work industries of Sweden are of great importance. The public forests have an area of 9,594,978 hectares, of which crown and ecclesiastical forests extend to 7,278,024 hectares. The latter yielded, in 1920, 4,098,332 cubic metres of timber. In 1920 there were in Sweden 1,534 sawmills and planing mills with 47,287 workpeople who turned out sawn or planed timber to the value of 692,129,960 kronor; 696 factories for joinery and furniture with 13,097 workpeople, the output for the year being valued at 105,712,057 kronor; 106 factories for wood-pulp with 17,544 workpeople, output 505,037,788 kronor; and 75 paper and pasteboard mills with 14,839 workpeople, output 362,664,307 kronor. The extent of some other Swedish industries in 1920 is shown in the following table:—

Branch of industry	Factories	Workpeople	Value of output
			Kronor
Bar-iron and steel works	107	22,207	355,733,108
Iron and steel-goods factories	414	16,156	207,310,067

Other chemical industry works	306	9,587	282,987,530
Electric-power work	526	4,088	112,452,622

¹ Manufacture of metals other than iron.

In 1920, 308,283 men, 60,289 women, 36,177 boys, and 12,632 girls (under 18 years of age) were employed in factories.

Commerce.

The total customs-duties levied in 1921 amounted to 104,476,263 kronor, and in 1922 to 112,754,368 kronor.

The imports and exports of Sweden, unwrought gold and silver and coin not included, have been as follows (18'16 kronor = £1):—

—	1917	1918	1919	1920	1921	1922
	£	£	£	£	£	£
Imports	41,774,945	67,915,419	139,540,038	182,500,144	69,728,654	64,116,823
Exports	74,316,545	74,365,076	86,769,886	125,760,233	60,424,240	63,456,868

The following were the values of the leading imports and exports for two years, unwrought gold and silver and coin not included :—

Provisional figures.

Since Jan. 1, 1914, returns as to value of imports and exports are given by the importers and exporters themselves for all goods exported and for most import goods (the so-called declared value). Imports are recorded as from the country of consignment, and exports as to the country of ultimate destination.

A national Swedish trade-mark was introduced (1911) by Sveriges Allmänna Handelsförening (General Commercial Association of Sweden). The upper half of the mark shows the three royal Swedish crowns, on a light-blue ground, and the words 'Svensk Tillverkning' (Swedish manufacture) are shown on a light-yellow ground below.

The following table shows the value of the trade with the principal countries with which Sweden deals :—

Country	Imports from (1919)	Exports to (1919)	Imports from (1920)	Exports to (1920)	Imports from (1921)	Exports to (1921)
	Kronor	Kronor	Kronor	Kronor	Kronor	Kronor

Wood pulp	14,709,525	5,844,099	Tin	322,194	129,582

Total trade between Sweden and U.K. (in thousands of pounds) for 5 years (Board of Trade Returns) :—

	1918	1919	1920	1921	1922
Imports from Sweden to U.K.	22,524	35,583	56,467	21,591	19,201
Exports to Sweden from U.K.	2,619	24,483	39,327	9,623	12,292

Shipping and Navigation.

The Swedish mercantile marine engaged both in the home and foreign trade on January 1, 1921, was as follows :—

January 1, 1921	Sailing		Steam and Motor		Total	
	No.	Gross Tonnage	No.	Gross Tonnage	No.	Gross Tonnage
20-500 tons	1,292	112,005	796	132,498	2,088	244,503
500-1,000 "	8	6,068	122	85,331	130	91,399
1,000-2,000 "	12	17,975	229	332,964	241	350,939
Above 2,000 tons	4	8,469	127	471,249	131	479,718
Total Jan. 1, 1921	1,316	144,517	1,274	1,022,042	2,590	1,166,559

On January 1, 1922, Sweden's mercantile marine possessed 2,791 vessels, with a total tonnage of 1,090,069.

The port of Göteborg had the largest shipping in the beginning of 1921—namely, 340 vessels of 445,729 tons; and next to it came Stockholm, possessing 364 vessels of a total burthen of 285,428 tons.

Vessels entered from and cleared for foreign countries, with cargoes and in ballast, in 1920, as follows :—

1920	With Cargoes		In Ballast		Total	
	No.	Net Tonnage	No.	Net Tonnage	No.	Net Tonnage
Entered :						
Swedish	6,953	3,824,869	4,568	878,548	11,521	4,703,417

Total cleared	22,074	9,287,176	6,789	2,366,953	28,863	11,655,129
Total entered & cleared 1920	40,004	17,530,372	17,863	5,734,679	57,867	23,265,051

Internal Communications.

In 1920 158,992 ships and boats passed through the canals of Sweden.

At the end of 1921 the total length of railways in Sweden was 9,417 miles, of which 3,413 miles belonged to the State. The receipts of the State railways in 1921 were 258 million kronor, and expenses 250 million kronor. The total cost of construction for the State railways to the end of 1921 was 890,126,000 kronor, and for private railways 693,023,000 kronor. The total number of passengers on the State railways in 1921 was 27,527,000; weight of goods, 13,048,000 tons; private railways in 1921, 15,370,000 tons of goods, and 46,997,000 passengers. The line between Gotheborg and Stockholm is about to be electrified.

The length of the wires of the telegraph at the end of 1921 was 49,580 miles, 22,094 miles of which belonged to the railways. The wires of the State telephone had a length of 412,895 miles, the wires of the private telephone lines a length of only 6,247 miles. There were 3,487 telegraph offices. The number of messages sent in the year 1921 was 7,509,746, including 848,248 in transit. In 1921 there were 387,337 instruments (in Stockholm 114,669) employed in the telephone service, including only 5,168 private telephones.

The Swedish Post Office carried 632,242,000 letters, post-cards, journals, &c., in the year 1921. The number of post-offices at the end of the year was 3,676. The total receipts of the Post Office in 1921 amounted to 76,294,300 kronor, and the total expenditure to 65,892,500 kronor.

Money and Credit.

The Riksbank, or National Bank of Sweden, belongs entirely to the State and is managed by directors elected for three years by the Diet, except one, the president, who is designated by the King. It is a bank of exchange to regulate financial relations with foreign countries; it accepts deposits of money, and on sufficient security it lends money for purposes in which there is no speculative element. The Bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and its assets in current accounts at home and abroad; but its actual circulation is kept far within this limit.

The following table gives statistics of the National Bank, and private banks (joint-stock banks included) in Sweden for December 31, 1922 (18 16 kronor = 17.). There are 10 conjointly responsible private banks and 26 joint-stock banks (December 1922). Since December 31, 1903, only the Riksbank has the right to issue notes:—

Assets	The Riksbank	Other Banks	Total
	Kronor	Kronor	Kronor
Real estate and furniture	—	90,758,468	90,758,468
Cash	293,237,550	106,970,731	400,208,281
Bills, etc., payable at sight	33,905,772	51,451,329	85,440,901
Bonds and Government securities	97,823,368	273,547,059	371,370,427
Shares	—	95,322,288	95,322,288
Claims on Swedish banks	—	139,568,917	139,568,917
Claims on Foreign banks	129,020,339	188,094,174	317,114,513
Bills payable in Sweden	432,781,320	983,874,725	1,416,456,045
Bills payable Abroad	34,032,773	21,484,009	55,516,782

Loans raised	—	127,669,227	127,669,227
Sundries	34,788,566	499,275,648	534,064,214
Total	1,080,833,871	6,373,277,625	7,454,111,496

The savings-banks statistics (exclusive of Post Office) are as follows:—

—	1918	1919	1920	1921
Number of depositors at end of year	2,106,880	2,200,267	2,270,318	2,298,315
Deposits at end of year, kronor	1,623,660,373	1,870,771,907	2,023,953,608	2,129,973,000
Capital and reserve fund, ditto	101,706,842	107,118,607	112,680,230	120,763,000

At the end of 1922 the Post Office Savings Bank had 691,499 depositors and 118,578,000 kronor of deposits.

The Private and Joint Stock Banks also act as Savings Banks. Their statistics of depositors and deposits are as follows:—

—	1919	1920	1921	1922
Number of depositors at end of year	1,833,762	1,941,343	2,001,013	2,011,492
Deposits at end of year, kronor	960,571,800	959,701,792	919,920,072	815,920,600

Money, Weights, and Measures.

By a treaty signed May 27, 1873, with additional treaty of October 16, 1875, Sweden, Norway, and Denmark adopted the same monetary system.

The Swedish Krona, of 100 öre, is of the value of 1s. 1½d., or about 18 kronor to the pound sterling.

The gold 20-kronor piece weighs 8·960572 grammes, ·900 fine, containing 8·0645 grammes of fine gold, and the silver krona weighs 7·5 grammes, ·800 fine, containing 6 grammes of fine silver. Iron coins were issued in 1917, 1918, and 1919; nickel coins from 1920.

The standard of value is gold. National Bank notes for 1, 5, 10, 50, 100, and 1000 kronor are legal means of payment, and the Bank is bound to exchange them for gold on presentation.

At the Swedish mint 103,000 gold, 264,941 silver, 14,018,368 bronze and nickel coins were made during 1921, with a nominal value of 1,984,155 kronor. It is intended gradually to withdraw the iron coins.

The metric system of weights and measures is obligatory.

Diplomatic Representatives.

1. OF SWEDEN IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Baron E. K. Palmstierna (appointed November, 1920).

Counsellor.—C. R. P. de Reuterswärd.

Second Secretary.—T. H. W. Wistrand.

Military Attaché.—Colonel E. Mossberg, C.B.E.

Naval Attaché.—Commander A. H. de Bahr.

Special Attaché for Financial, Social and Labour Questions.—Dr. E. R. Sjöstrand.

Chancellor.—J. Stille.

Consul-General in London.—E. G. Sahlin.

There are Consular representatives at the following places:—Aberdeen, Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Dundee, Glasgow, Hartlepool, Hull, Leith, Liverpool, Manchester, Newcastle, Plymouth, Southampton, Sunderland, and many other places.

2. OF GREAT BRITAIN IN SWEDEN.

Envoy and Minister.—Sir Colville A. de R. Barclay, K.C.M.G., C.B., C.B.E., M.V.O. (November 25, 1919).

Counsellor.—Hon. P. W. M. Ramsay.

Secretary.—H. E. L. Montgomery.

Naval Attaché.—Commander J. Wolfe Murray, D.S.O.

Military Attaché.—Colonel W. Robertson, D.S.O.

Commercial Secretary.—Herbert Kershaw.

Consul-General at Gothenburg.—A. W. W. Woodhouse.

Consul at Stockholm.—D. F. S. Filliter.

There are also Consular representatives at Gävle, Hålsingborg, Kalmar, Luleå, Malmö, Norrköping, Sundsvall, Söderhamn, Varberg, Visby, &c.

SWITZERLAND.

(SCHWEIZ.—SUISSE.—SVIZZERA.)

Constitution and Government.

I. CENTRAL.

ON August 1, 1291, the men of Uri, Schwyz, and Lower Unterwalden entered into a defensive League. In 1353 the League included eight members, and in 1513 thirteen. Various allied and subject territories were acquired either by single cantons or by several in common, and in 1648 the League became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution and out of the lands formerly allied or subject increased the number of cantons to nineteen. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia, and Russia and the Federal Pact which had been drawn up at Zürich, and which included three new cantons, was accepted by the Congress of Vienna. The Pact remained in force till 1848, when a new constitution, prepared without foreign interference, was accepted by general consent. This, in turn, was, on May 29, 1874, superseded by the constitution which is now in force.

The constitution of the Swiss Confederation may be revised either in the ordinary forms of Federal legislation with compulsory *referendum*, or by direct popular vote, a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand (called the *popular initiative*) of 50,000 citizens with the right to vote. The Federal Government is supreme in matters of peace, war, and treaties; it regulates the army, the railway, postal and telegraph systems, the coining of money, the issue and repayment of bank notes, and the weights and measures of the Republic. It legislates on matters of civil capacity, copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidise, besides the Polytechnic School at Zürich, a Federal University and other educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests, and the construction of railways.

The supreme legislative and executive authority are vested in a parliament of two chambers, a 'Ständerat,' or State Council, and a 'Nationalrat,' or National Council. The first is composed of forty-four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. Their remuneration depends on the wealth and liberality of the cantons, the average being about 20 francs (16s.) per day; representatives from the canton of Geneva receive 30 francs (25s.), from Uri and from Unterwalden 15 francs (12s. 6d.) per day. The mode of their election and the term of membership depend entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land; Appenzell into Ausser Rhoden and Inner

Rhoden; and Unterwald into Obwald and Nidwald. Each of these parts of cantons sends one member to the State Council, so that there are two members to the divided as well as to the undivided cantons. The 'Nationalrat' consists (1922) of 198 representatives of the Swiss people, chosen in direct election, at the rate of one deputy for every 20,000 souls. The members are paid from Federal funds at the rate of 25 francs for each day on which they are present, with travelling expenses, at the rate of 20 centimes (2*d.*) per kilometre, to and from the capital. Members employed on commissions receive additional pay at the same rate. On the basis of the general census 1910, the cantons are represented in the National Council as follows:—

Canton	Number of Representatives	Canton	Number of Representatives
Zürich (Zurich)	25	Appenzell—Exterior and Interior	4
Bern (Berne)	32	St. Gallen (St. Gall)	15
Luzern (Lucerne)	8	Graubünden (Grisons)	6
Uri	1	Aargau (Argovie)	12
Schwyz	3	Thurgau (Thurgovie)	7
Unterwald—Upper and Lower	2	Ticino (Tessin)	8
Glarus (Glaris)	2	Vaud (Waadt)	16
Zug (Zoug)	1	Valais (Wallis)	6
Fribourg (Freiburg)	7	Neuchâtel (Neuenburg)	7
Solothurn (Soleure)	6	Genève (Genf)	8
Basel (Bâle)—town and country	11	Total	189
Schaffhausen (Schaffhouse)	2		

At the elections held on October 28-29, 1922, the following parties were returned:—Radicals, 59; Catholics, 44; Social Democrats, 43; Agrarian, 35; Liberal Democrats, 10; other parties, 7.

A general election of representatives takes place by ballot every three years. Every citizen of the Republic who has entered on his twenty-first year is entitled to a vote; and any voter, not a clergyman, may be elected a deputy. Both chambers united are called the 'Bundes-Versammlung,' or Federal Assembly, and as such represent the supreme Government of the Republic. The first step towards legislative action may be taken by means of the *popular initiative*, and laws passed by the Federal Assembly may be vetoed by the popular voice. Whenever a petition demanding the revision or annulment of a measure passed by the Legislature is presented by 30,000 citizens, or the alteration is demanded by eight cantons, the law in question must be submitted to the direct vote of the nation. For the decision of the question submitted a majority both of the cantons and of the voters is required. This principle, called the *referendum*, is frequently acted on. The chief executive authority is deputed to a 'Bundesrat,' or Federal Council, consisting of seven members, elected for three years by the Federal Assembly. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. It is only through this executive body that legislative measures are introduced in the deliberative councils,

and its members are present at and take part in their proceedings, but do not vote. Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Confederation and the Vice-President of the Federal Council are the first magistrates of the Confederation. Both are elected by the Federal Assembly in joint session of the National and State councils for the term of one year, January 1 to December 31, and are not re-eligible to the same offices till after the expiration of another year. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

President of the Confederation for 1923.—Karl Scheurer (Berne).

Vice-President of the Federal Council for 1923.—Ernest Chuard.

The seven members of the Federal Council—each of whom has a salary of 1,000*l.* per annum, while the President has 1,080*l.*—act as ministers, or chiefs of the seven administrative departments of the Republic. These departments are :—1. Foreign Affairs. 2. Interior. 3. Justice and Police. 4. Military. 5. Finance and Customs. 6. Agriculture and Industry (Economic publique). 7. Posts and Railways. The city of Bern is the seat of the Federal Council and the central administrative authorities.

II. LOCAL GOVERNMENT.

Each of the cantons and demi-cantons of Switzerland is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; each has its local government, different in its organisation in most instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons, the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the *Landsgemeinden*, exist in Appenzell, Glarus, Unterwald, and Uri. In all the larger cantons, there is a body chosen by universal suffrage, called the *Grosse Rath*, which exercises all the functions of the *Landsgemeinden*. In all the cantonal constitutions, however, except that of Freiburg and those of the cantons which have a *Landsgemeinde*, the *referendum* has a place. This principle is most fully developed in Zurich, where all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revision of the constitution, must be submitted to the popular vote. In many of the cantons, the *popular initiative* has also been introduced. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow-citizens, or receive a merely nominal salary. In each canton there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungstatthalter*) representing the canton. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, *maire* or *syndic*, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Area and population, according to the census held on December 1, 1910, and that held on December 1, 1920. The cantons are given in the official

order, and the year of the entrance of each into the league or confederation is stated :—

Canton	Area : sq. miles	Population		Pop. per square mile, 1920
		Dec. 1, 1910	Dec. 1, 1920	
Zürich (Zurich) (1351)	666	503,915	538,602	823
Bern (Berne) (1353)	2,657	645,877	674,394	254
Luzern (Lucerne) (1332)	579	167,223	177,073	306
Uri (1291)	415	22,113	23,973	58
Schwyz (1291)	351	58,428	59,731	170
Obwalden (Unterwalden-le-Haut) (1291)	183	17,161	17,567	96
Nidwalden (Unterwalden-le-Bas) (1291)	112	13,788	13,956	125
Glarus (Glaris) (1352)	267	33,316	33,834	127
Zug (Zoug) (1352)	92	28,156	31,569	343
Fribourg (Freiburg) (1481)	644	139,654	143,055	222
Solothurn (Soleure) (1481)	302	117,040	130,617	433
Basel-Stadt (Bâle-V.) (1501)	14	135,918	140,708	10,050
Basel-Land (Bâle-C.) (1501)	163	76,488	82,390	505
Schaffhausen (Schaffhouse) (1501)	114	46,097	50,428	442
Appenzell A.-Rh. (Ext.) (1513)	101	57,973	55,354	548
Appenzell I.-Rh. (Int.) (1513)	61	14,659	14,614	240
St. Gallen (St. Gall) (1803)	779	302,896	295,543	379
Graubünden (Grisons) (1803)	2,773	117,069	119,854	43
Aargau (Argovie) (1803)	542	230,634	240,776	444
Thurgau (Thurgovie) (1803)	381	134,917	135,933	357
Ticino (Tessin) (1803)	1,088	156,166	152,256	139
Vaud (Waadt) (1803)	1,244	317,457	317,498	255
Valais (Wallis) (1815)	2,027	128,381	128,246	63
Neuchâtel (Neuenburg) (1815)	312	133,061	131,349	421
Genève (Genf) (1815)	108	154,506	171,000	1,583
Total	15,975	3,753,293	3,880,320	243

The German language is spoken by the majority of inhabitants in 19 of the 25 cantons, the French in five (Fribourg, Vaud, Valais, Neuchâtel and Genève), the Italian in one (Ticino). In 1910, 2,594,186 spoke German, 793,264 French, 302,578 Italian, 40,234 Romansch, and 23,031 other languages.

The number of foreigners resident in Switzerland in 1920 was 412,306.

II. MOVEMENT OF POPULATION.

Years	Total Births	Stillbirths	Marriages	Deaths and Stillbirths	Surplus of Births over Deaths
1917	74,125	2,060	23,954	55,366	18,759
1918	74,884	2,226	26,117	57,260	2,976
1919	74,205	2,080	30,751	57,012	17,198
1920	83,623	2,433	34,975	58,425	25,198
1921	83,178	2,365	32,624	51,887	31,286

In 1921 the illegitimate births numbered 3,484, or 4.2 per cent. The number of divorces was 2,241 in 1920.

The number of emigrants in five years was : 1918, 304 ; 1919, 3,063 ; 1920, 9,276 ; 1921, 7,129 ; 1922, 5,787.

III. PRINCIPAL TOWNS.

On December 1, 1920, the census population of the principal towns was as follows :—Zürich, 207,161 ; Bâle, 135,976 ; Geneva, 135,059 ; Bern, 104,626 ; St. Gallen, 70,437 ; Lausanne, 68,533 ; Winterthur, 49,969 ; Luzern, 44,029 ; La Chaux-de-Fonds, 37,708 ; Biel, 34,599 ; Neuchâtel, 23,152 ; Fribourg, 20,649 ; Schaffhausen, 20,064 ; Montreux, 16,721 ; Chur, 15,600 ; Herisau, 15,015 ; Thun, 14,162 ; Lugano, 13,440 ; Solothurn, 13,065 ; Vevey, 12,768 ; Le Locle, 12,463 ; Rorschach, 11,582 ; Olten, 11,504 ; Aarau, 10,701 ; Bellinzona, 10,232.

Religion.

There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The order of Jesuits and its affiliated societies cannot be received in any part of Switzerland ; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action is dangerous to the State, or interferes with the peace of different creeds. The foundation of new convents or religious orders is forbidden.

According to the census of December 1, 1920, the number of Protestants amounted to 2,218,589 (57 per cent. of the population), of Roman Catholics to 1,586,826 (41 per cent.), and of Jews to 20,955 (0·5 per cent.). Protestants are in a majority in twelve of the cantons, and Catholics in ten. Of the more populous cantons, Zürich, Bern, Vaud, Neuchâtel, and Basel (town and land) are mainly Protestant, while Luzern, Fribourg, Ticino, Valais and the Forest Cantons are mainly Catholic. The Roman Catholic priests are much more numerous than the Protestant clergy, the former comprising more than 6,000 regular and secular priests. They are under five bishops, viz., of Basel and Lugano (resident at Solothurn), Chur, St. Gallen, Lausanne and Geneva (resident at Fribourg), and Sitten (Sion), all of them immediately subject to the Holy See. The government of the Protestant Church, Calvinistic in doctrine and Presbyterian in form, is under the supervision of the magistrates of the various cantons, to whom is also entrusted, in the Protestant districts, the superintendence of public instruction.

Instruction.

In the educational administration of Switzerland there is no centralization. Before the year 1848 most of the cantons had organised a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory (the school age varying in the different cantons), and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In the north-eastern cantons, where the inhabitants are mostly Protestant, the proportion of the school-attending children to the whole population is as one to five ; while in the half-Protestant and half-Roman Catholic cantons it is as one to seven ; and in the entirely Roman Catholic cantons as one to nine. The compulsory law has hitherto not always been enforced in the Roman Catholic cantons, but is rigidly

carried out in those where the Protestants form the majority of inhabitants. In every district there are primary schools, and secondary schools for youths of from twelve to fifteen. Of the contingent for military service in 1912, 0·8 per thousand could not read.

The following are the statistics of the various classes of educational institutions for 1920:—Kindergarten, 775; primary schools 4,230, with 16,841 teachers (8,109 men and 8,732 women), and 536,219 pupils (269,750 boys and 266,469 girls); the 520 secondary schools had 29,224 boys and 25,911 girls, with 2,037 men and 529 women teachers; 152 middle schools had 17,627 boys and 8,951 girls with 1,723 men and 235 women teachers. There are also commercial schools, technical schools, schools for the instruction of girls in domestic economy and other subjects; agricultural schools, schools for horticulture, for viticulture, for arboriculture, and for dairy management. There are also institutions for the blind, the deaf and dumb, and the feeble-minded. In the 35 reformatories of Switzerland in 1919, there were 1,637 children under instruction. In 1922 the State spent on primary education 2,357,528 francs.

There are seven universities in Switzerland. These universities are organised on the model of those of Germany, governed by a rector and a senate, and divided into four 'faculties' of theology, jurisprudence, philosophy, and medicine. There is a Polytechnic School, maintained by the Federal Government, at Zürich, with 2,011 matriculated students, in 1921. The academy of Neuchâtel was transformed into a university in May, 1909, but without the faculty of medicine. The following table shows the year of foundation of each university, the number of teaching staff and of matriculated students in the various branches of study in each of the seven universities in the winter of 1921-22:—

	Theology	Law	Medicine	Philosophy and Science	Total	Teaching Staff 1918
Basel (1460)	70	101	280	549	1,000	130
Zürich (1832)	22	405	606	501	1,534	163
Bern (1834)	50	577	442	573	1,642	162
Genève (1559 ¹ & 1873 ²)	15	212	299	303	829	155
Lausanne (1537 ¹ & 1890 ²)	25	144	220	434	823	108
Fribourg (1889)	199	126	—	189	514	72
Neuchâtel (1866 ¹ & 1909 ²)	11	59	—	98	168	67

¹ As an Academy.

² As a University.

These numbers are exclusive of 'hearers,' but inclusive of 824 women students.

In 1911 there were 5,798 libraries with 9,385,000 volumes.

Justice and Crime.

The 'Bundes-Gericht,' or Federal Tribunal, which sits at Lausanne, consists of 24 members, with 9 supplementary judges, appointed by the Federal Assembly for six years and are eligible for re-election; the President and Vice-President, as such, for two years and cannot be re-elected. The President has a salary of 22,000 francs a year, and the other members 20,000 francs. The Tribunal has three sections, to each of which is assigned the trial of suits in accordance with regulations framed by

the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons; between cantons and cantons; between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 3,000 francs; between parties who refer their case to it, the value in dispute being at least 3,000 francs; and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a Court of Appeal against decisions of other Federal authorities, and of cantonal authorities applying Federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into four chambers: the Chamber of Accusation, the Criminal Chamber (Cour d'Assises), the Federal Penal Court, and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid ten francs a day when serving.

Each canton has its own judicial system for ordinary civil and criminal trials.

On December 31, 1919, the prison population (condemned) of Switzerland consisted of 3,187, of whom 400 were women.

Capital punishment exists in Appenzell-I.-Rh., Obwalden, Uri, Schwyz, Zug, St. Gallen, Luzern, Wallis, Schaffhausen, and Freiburg.

Social Insurance.

The Swiss Federal Insurance Law (insurance against illness and accident), as passed by both Chambers on June 13, 1911, was accepted by the electors of the Republic with a small majority. The total number of votes cast was 523,731, of which 285,037 were for and 238,694 against the measure.

All Swiss citizens are entitled to insurance against illness, and foreigners also may be admitted to the benefits of the law. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled under the act to declare obligatory insurance for certain classes or, in general, to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees.

Insurance against accident is compulsory for all officials, employees, and workmen of all the factories, trades, &c., which are under the Federal liability law. Every person above the age of 14 can insure voluntarily at the Federal insurance administration (or at any insurance corporation). The Swiss Accident Insurance Institution commenced operations on April 1, 1918. In 1919 the 891 societies insuring against illness had 342,611 members.

Finance.

The entire net proceeds of the Federal alcohol monopoly (823,821*l.* in 1921) are divided among the cantons, and they have to expend one-tenth of the amount received in combating alcoholism in its causes and effects. Of the proceeds of the tax for exemption from military service, levied through the cantons, one-half goes to the Confederation and the other to the cantons.

Revenue and expenditure for six years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1918	8,868,203	11,343,990	1921	15,234,374	20,337,245
1919	11,475,171	15,301,898	1922 ¹	16,888,000	20,864,000
1920	13,742,254	17,723,723	1923 ¹	17,028,000	20,384,000

¹ Estimates.

The following table gives the budget estimates for 1923 :—

Source of Revenue	Francs	Branch of Expenditure	Francs
Capital invested	18,614,688	Debt, Total Charge	114,624,000
General administration	258,800	General administration	3,525,090
Departments :—		Departments :—	
Political	825,600	Political	6,880,913
Interior	1,152,300	Interior	26,463,011
Justice and Police	2,233,500	Justice and Police	5,596,509
Military	2,016,347	Military	77,847,793
Finance and Customs	190,456,550	Finance and Customs	22,388,412
Commerce, Industry, and Agriculture	3,465,780	Commerce, Industry, and Agriculture	37,007,436
Posts and Railways	203,373,649	Posts and Railways	211,679,939
Miscellaneous	3,302,786	Miscellaneous	3,586,847
Total	425,700,000 (17,028,000/.)	Total	509,600,000 (20,384,000/.)

The public debt of the Confederation (exclusive of the railway debt) amounted, on January 1, 1922, to 70,326,032*l.*, mostly at 5 per cent. The floating debt (January 1, 1922) was 7,518,000*l.* The total debt was thus 77,844,032*l.* The value of the National Properties was 8,142,644*l.*

Defence.

There are fortifications on the south frontier for the defence of the St. Gothard pass; others have been constructed at St. Maurice and Martigny in the Rhone Valley.

Switzerland depends for defence upon a *national militia*. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 20th to the end of the 48th year. The first 12 years are spent in the first line, called the 'Auszug,' or 'Elite'; the next 8 in the Landwehr; and the remaining 8 in the Landsturm. For cavalry, however, service is 11 years in the Auszug, and 12 in the Landwehr. The Landsturm only includes men who have undergone some training. The unarmed Landsturm comprises all other males between 20 and 50 whose services can be made available for non-combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 65 days for infantry, engineers, and foot artillery, 75 days for field artillery, and 90 days for cavalry. The subsequent trainings, called 'repetition courses,' are 11 days *annually*: but after going through seven courses (8 in the case of the cavalry) further attendance is excused for all under the rank of sergeant. The Landwehr men are only called out once for training, also for 11 days.

The country is divided into 6 divisional districts. The field army, formed of the Auszug, consists of 6 divisions and 4 cavalry brigades. A division consists of 3 brigades each of 2 regiments consisting of 2 or 3 battalions, 1 cyclist company, 1 machine gun detachment, 12 batteries of field artillery, 2 howitzer batteries, 2 squadrons of cavalry, and 1 battalion of sappers. A cavalry brigade consists of 2 regiments. A mountain brigade consists of 2 regiments of 3 battalions, 2 mountain batteries, and 1 company of sappers. Altogether there are 106 battalions, 72 field batteries, 12 howitzer batteries, 9 mountain batteries, and 8 cavalry regiments (each of 3 squadrons), besides 12 squadrons of divisional cavalry (guides). There

is a staff organisation for three army corps. There are the usual departmental troops, pontoon and railway corps, telegraph troops, &c. The total number of combatants in the field army may be taken at 160,000.

There are also *separate* forces, mostly Landwehr, for manning the fortifications which close the St. Gothard Pass and the Rhone Valley to a possible invader from the south. They amount to about 21,000 men. The Landwehr is organised in 56 battalions and 36 squadrons. Altogether Switzerland can mobilise nearly 200,000 men (combatants), irrespective of the organised Landsturm, who may amount to another 60,000.

The administration of the Swiss army is partly in the hands of the Cantonal authorities, who promote officers up to the rank of captain. But the Federal Government is concerned with all general questions, and makes all the higher appointments.

The Swiss infantry are armed with the Swiss repeating rifle. The field artillery is armed with a Q. F. shielded Krupp 7.5 cm. calibre. The 'position' artillery has batteries of 8.4 and 12 cm. guns. The Swiss Government inaugurated an aviation service in 1919.

Production and Industry.

The soil of the country is very equally divided among the population, it being estimated that there are nearly 300,000 peasant proprietors.

Of the total area 28.4 per cent. is unproductive; of the productive area 35.8 per cent. is under grass and meadows, 29 per cent. under forest, 18.7 per cent. under fruit, 16.4 per cent. under crops and gardens.

The chief agricultural industries are the manufacture of cheese and condensed milk. Wine is produced in five of the cantons, tobacco in three. On April 21, 1921 (last census), there were in Switzerland, 133,847 horses, 3,581 mules, 891 donkeys, 1,424,856 cattle, 746,591 cows, 244,435 sheep, 638,761 pigs, 329,192 goats.

The Swiss Confederation has the right of supervision over the police of the forests, and of framing regulations for their maintenance. The entire forest area of Switzerland is 3,290 square miles, or 2,105,214 acres in extent (comprising 91,587 acres of cantonal forest, 1,403,772 acres belonging to municipalities and other corporations, and 609,855 acres of private forests). The district over which the Federal supervision extends lies to the south and east of a tolerably straight line from the eastern end of the Lake of Geneva to the northern end of the Lake of Constance. It comprises about 1,119,270 acres, and the Federal forest laws apply to all cantonal, communal, and municipal forests within this area, those belonging to private persons being exempt, except when from their position they are necessary for protection against climatic influences. In 1876 it was enacted that the forest area should never be reduced; servitudes over it, such as rights of way, of gathering firewood, &c., should be bought up; public forests should be surveyed, and new wood planted where required, subventions for the purpose being sanctioned. In the year 1920, 16,466,785 trees (chiefly coniferous) were planted. The free forest districts comprise 1,477 square miles.

There were, in 1920-21, 218 establishments for pisciculture with 136,461,000 fry of various species, produced from the incubation of 176,086,000 eggs. Of these, 135,751,058 fry were released in public waters under official control. In 1918 there were 29,377 bee-keepers, possessing an aggregate of 205,934 bees.

Many industries flourish in Switzerland. There are 5 salt-mining districts; that at Bex (Vaud) belongs to the Canton, but is worked by a private company; that at Schweizerhalle (Basel) is worked by the Glenck family; those at

Rheinfelden, Ryburg, and Kaiseraugst (Aargau) are worked by a joint-stock company, in virtue of a concession from the Canton. The output of salt of all kinds in 1921 reached 466,595 quintals (671,137 in 1920). In 1920 there were 8,787 factories in Switzerland (9,074 in 1919). Watch and clock making is an important branch of manufacture; number of clocks exported in 1920, 13,729,870. The number of persons employed in factories (1918) was 381,170; the motive machinery had 526,098 horse-power. In 1920, 93 breweries produced 1,062,888 hectolitres (23,383,536 gallons) of beer.

On January 1, 1914, there were 1,859 Swiss embroidery establishments operating 8,090 embroidery machines.

From January 1, 1914, to December 31, 1921, there were established 14 important hydraulic power stations, and 6 more were under construction.

Commerce.

The special commerce, including precious metals, was as follows in five years:—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports	96,073,360	141,335,427	163,708,822	91,851,555	76,576,604
Exports	78,526,840	131,923,509	131,084,150	85,605,657	70,463,061

The following table (in thousands of francs) shows the value of special commerce in 1921 and 1922:—

Merchandise	Imports		Exports	
	1921	1922	1921	1922
	1000 Francs	1000 Francs	1000 Francs	1000 Francs
Cereals	323,619	216,270	8,309	5,189
Fruits and vegetables	60,580	59,564	2,622	3,680
Colonial produce	180,085	96,408	58,004	27,508
Animal food substances	183,220	104,208	77,712	101,616
Tobacco	13,532	15,234	6,222	3,820
Beverages	105,160	76,143	1,530	1,142
Animals, living	39,863	19,430	3,113	10,866
Hides and skins	31,923	40,661	50,117	52,408
Timber	41,912	33,877	16,268	14,745
Cotton goods	187,742	173,597	357,433	323,212
Linen, hemp, &c., goods	16,173	19,651	3,621	3,563
Silk goods	139,335	219,844	341,008	365,261
Woollen goods	63,040	105,792	89,186	35,435
Clothing, ready made	60,334	46,054	44,669	54,141
Mineral substances	187,140	163,129	31,082	22,009
Iron work	96,123	70,749	30,614	35,086
Copper work	28,769	23,457	11,785	17,070
Machinery	57,423	36,704	232,647	166,759
Clocks	774	832	157,958	168,585
Chemicals	64,782	64,421	18,750	17,761
Grease, oils, &c.	28,224	26,836	7,639	1,469
Total incl. other merchandise	2,296,288	1,914,465	2,140,141	1,761,576

The customs duties amounted, in 1919, to 67,611,442 francs; in 1920, to 98,033,074 francs; in 1921, to 117,098,025 francs; in 1922, to 168,679,825 francs.

The following table, in thousands of francs, shows the distribution of the special trade of Switzerland (including bullion but not coin) among the principal countries. Much of the trade with the frontier countries is really of the nature of transit trade :—

	Imports		Exports	
	1920	1921	1920	1921
	1,000 Francs	1,000 Francs	1,000 Francs	1,000 Francs
Germany	808,720	440,173	252,472	194,610
France	603,249	320,679	521,958	238,603
Italy	325,224	199,598	165,854	74,221
Austria	71,534	32,345	106,126	87,809
United Kingdom	465,734	156,124	645,559	349,294
United States	864,696	385,139	283,324	585,720 ¹
Denmark	97,703	70,122	43,879	17,804

¹ Including 357 million francs bars of gold.

According to Board of Trade returns the staple articles of import into the United Kingdom from Switzerland in 1921 were :—Watches, 649,941*l.*; embroidery, 1,697,403*l.*; condensed milk, 844,612*l.* Exports to Switzerland were chiefly cotton piece goods, 1,666,094*l.*, and cotton yarns, 1,060,499*l.*

Total trade between Switzerland and the United Kingdom (in thousands of pounds) for five years (Board of Trade returns) :—

	1918	1919	1920	1921	1922
Imports from Switzerland into U.K. . .	13,073	14,860	36,996	19,952	21,707
Exports to Switzerland from U.K. . .	8,621	13,657	12,610	5,538	9,810

Internal Communications.

In 1920 the State railways of Switzerland had a length of 3,881 miles. There are also 34 miles of foreign railways within the Confederation. The cost of construction of the railways up to the end of 1920 was 2,568,195,775 francs. The receipts from traffic of all the Swiss railways amounted (1921) to 470,397,000 francs (18,815,880*l.*), of which 202,667,000 francs (8,106,680*l.*) were for passenger traffic. The state railways are gradually being electrified (by end of 1920, 1,120 miles had been completed). The traffic on the Swiss waters in 1921 was carried on by 152 boats or barges belonging to 22 companies.

State aerial service is being gradually developed. In 1921 there were 4,900 flights, and 6,600 passengers were carried.

In 1921 there were in Switzerland 3,932 post-offices. By the internal service there were forwarded 198,823,299 letters, 72,897,948 post-cards, 85,818,672 packets of printed matter, 1,681,366 samples, 284,567,900 newspapers, and 7,349,797 registered packets, &c. In the international service there were forwarded 23,601,223 letters, 14,021,502 post-cards, 8,272,643 packets of printed matter, 1,009,534 samples, 1,474,045 newspapers, and 2,787,464 registered packets, &c. Internal post-office orders were sent to the value of 2,011,190,257 francs (80,447,610*l.*). Receipts, 1921, 108,660,387 francs (4,346,415*l.*); expenditure, 126,988,883 francs (5,079,555*l.*).

Switzerland has a very complete system of telegraphs, consisting (1921) of 1,664 miles of line with 23,843 miles of wire. There were transmitted 1,665,350 inland telegrams, 3,757,194 international; and 1,000,161 in transit through Switzerland. Number of offices, 2,404. There were 1,018 telephone systems with 13,917 miles of line and 272,667 miles of wire; conversations, 120,660,547. The telegraph and telephone receipts in 1921 amounted to 73,737,448 francs (2,949,500*l.*); the expenditure to 75,686,143 francs (3,027,445*l.*).

The Marconi Company under a concession from the Federal Government has erected a wireless telegraphy station at Münchenbuchsee near Bern.

Money and Credit.

On December 31, 1921, the coin minted in Switzerland was as follows:—10,880,000 gold coins of the nominal value of 202,600,000 francs; 80,376,000 silver coins of the nominal value of 88,530,000 francs; 180,300,000 nickel coins of the nominal value of 18,140,000 francs; and 116,000,000 copper coins of the nominal value of 1,520,000 francs; total (including other token coins), 396,556,000 coins of the nominal value of 310,790,000 francs.

There were in Switzerland in 1915, 1,047 savings banks of all kinds, with 2,025,491 depositors having to their credit 61,643,239*l.*; in 1917, the total was 82,248,000*l.*

The National Bank, with headquarters divided between Bern and Zurich, opened its doors on June 20, 1907. It has the exclusive right to issue bank-notes in Switzerland. On March 7, 1922, the condition of the bank was as follows:—

	Francs		Francs
Bullion (gold and silver)	637,628,000	Other assets	72,371,000
Bills	481,048,000	Notes in circulation	873,424,000
Advances	42,859,000	Current and deposit accounts	283,516,000
Securities	8,657,000	Other securities	43,228,000

Money, Weights, and Measures.

The international metric system is the sole legal standard of weights and measures in Switzerland. It was made compulsory in the country by the Federal law of July 3, 1875, and since January 1, 1887, no other units than the metric units have been legal. By the Federal law of June 24, 1909, the international electric units were also adopted. By that law, copies of the French standards, deposited at the International Office for Weights and Measures at Sèvres (France), were adopted as the legal standards for Switzerland.

The *Franc* of 10 *Batzen*, and 100 *Rappen* or *Centimes*, is the monetary unit. The par rate of exchange is 25·22½ francs = £1 sterling.

The 20-franc piece is ·900 fine, the 5-franc silver piece is ·900 fine, the silver 2-franc, franc, and half-franc are ·835 fine. Switzerland belongs to the Latin Monetary Union; but since Italy is exonerated from taking back its exported fractional coin in case of the dissolution of the Union, the importation into Switzerland of 2 franc, 1 franc, and ½ franc pieces is prohibited by decree of February 21, 1899, on pain of confiscation. By a Convention of November 15, 1902, with the other States within the Union, Switzerland may coin, exceptionally, 12,000,000 francs in fractional silver pieces, but the issues must be spread over at least six years.

Before the war 50-franc National Bank notes were the smallest paper currency, but in consequence of the war, notes of lesser denominations have been issued, viz., 20-franc notes (by law of July 30, 1914), 5-franc notes (August 3, 1914), and 25-franc notes (September 9, 1914).

The *Centner*, of 50 *Kilogrammes* and 100 *Pfund* = 110 lbs. avoirdupois. The *Quintal* = 100 *Kilogrammes* = 220 lbs. avoirdupois. The *Arpent* (Land) = 8-9ths of an acre.

The *Pfund*, or pound, chief unit of weight, is legally divided into decimal *Grammes*, but the people generally prefer the use of the old halves and quarters, named *Halbpfund*, and *Viertelpfund*.

Diplomatic and Consular Representatives.

1. OF SWITZERLAND IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Charles R. Paravicini, appointed October 13, 1919.

First Secretary.—Francis J. Borsinger.

Counsellor of Legation specially attached.—Charles Corragioni d'Orelli.

Attachés.—Emile Stutz and Paul G. Ritter.

Chancellor of Legation.—J. W. Sterchi.

Commercial Attaché, Counsellor of Legation, and Consul-General.—Henri Martin.

2. OF GREAT BRITAIN IN SWITZERLAND.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Milne Cheetham, K.C.M.G. Appointed December 1, 1922.

Secretaries.—O. A. Scott, D.S.O., and N. B. Ronald.

Military Attaché.—Col. F. Lyon, C.B., C.M.G., D.S.O.

Commercial Secretary.—J. Picton Bagge.

Consul-General at Zürich.—E. G. B. Maxse, C.M.G.

There are Consuls at Bâle, Bern, Geneva, Lausanne, Lucerne, Davos; Vice-Consuls at Zürich, Montreux, Lugano, and Neuchâtel.

TURKEY

IN November, 1922, a change of capital importance took place in the internal economy of Turkey. Up to that time Constantinople continued to be the residence of the Sultan, and a Government deriving its authority from him still existed there. This Government, however, exerted no effective power outside Constantinople, together with a small adjacent area and another small area adjoining Çanakkale on the Dardanelles. The Greek Government administered Thrace up to the frontier laid down by the Treaty of Sevres of August 10, 1920. Except for the small areas mentioned above, the whole of Asia Minor was under the authority of the *de facto* Government set up at Angora in April, 1920, under the name of the "Government of the Grand National Assembly of Turkey." On November 1, 1922, the Grand National Assembly voted a resolution declaring that the office of Sultan had ceased to exist and providing that the office of Caliph, which had hitherto been vested in the person of the Sultan, should be filled by election from among the Princes of the House of Osman. Previous to this the Angora Government had made preparations to take over the administration of Constantinople whenever an opportunity offered. On November 4, 1922, General Rafet Pasha, who was in charge of these preparations, declared that he had taken over the administration on behalf of the Government of the Grand National Assembly. The same day the Grand Vizier, Tewfik Pasha, presented the resignation of the Constantinople Cabinet to the Sultan. The Sultan himself, on November 17, took refuge on board a British warship and left Constantinople. The Grand National Assembly immediately elected to the Caliphate his only cousin Prince Abdul-Medjid, the eldest prince, in male descent, of the House of Osman.

The new Caliph **ABDUL-MEDJID** Efendi was born on May 25, 1868, sole surviving son of Sultan Abdul-Aziz. He has two children:—(1) Prince Omer Farruk Efendi, born February 28, 1898, married to Princess Rukia Sabiha, second daughter of the late Sultan; (2) Princess Durri Shehvar, born January 28, 1914.

The following is a list of the names, with date of accession of the thirty-seven sovereigns who ruled Turkey from the foundation of the Turkish Empire up to the events described above:—

House of Othman.

Othman	1299	Murad IV., 'The Intrepid'	1623
Orkhan	1326	Ibrahim	1640
Murad I.	1359	Mohammed IV.	1648
Bayezid I., 'The Thunder-bolt'	1389	Suleiman II.	1687
Interregnum	1402	Ahmed II.	1691
Mohammed I.	1413	Mustafa II.	1695
Murad II.	1421	Ahmed III.	1703
Mohammed II., Conqueror of Constantinople	1451	Mahmud I.	1730
Bayezid II.	1481	Othman III.	1754
Selim I.	1512	Mustafa III.	1757
Suleiman I., 'The Magnificent'	1520	Abdul Hamid I.	1773
Selim II.	1566	Selim III.	1789
Murad III.	1574	Mustafa IV.	1807
Mohammed III.	1595	Mahmud II.	1808
Ahmed I.	1603	Abdul-Medjid	1839
Mustafa I.	1617	Abdul-Aziz	1861
Othman II.	1618	Murad V. (May 30)	1876
		Abdul-Hamid II. (Aug. 31)	1876
		Mohammed V. (April 27)	1909
		Mohammed VI. (July 3)	1918

The civil list of the Sultan used to be variously reported at from one to two millions sterling. To the Imperial family belong a great number of crown domains, the income from which contributed to the revenue, but a large proportion of which were situated in Irak and other countries now detached from Turkey (March, 1923). No definite arrangements have been made for adapting the Civil List arrangements to the new conditions resulting from the abolition of the office of Sultan.

Constitution and Government.

Forms of constitution, after the model of the West European States, were drawn up at various periods by successive Ottoman Governments, the first of them embodied in the 'Hatti-Humayoun' of Sultan Abdul Medjid, proclaimed November 3, 1839, and the most recent in a decree of Sultan Abdul-Hamid II., of November 1876. This constitution became for all practical purposes a dead letter in 1878, and Abdul-Hamid II. proceeded to build up an autocracy more complete than that of his predecessors, but in 1908 the prevailing discontent, especially in the army, caused by corruption and misgovernment, compelled him to issue an Imperial decree for the convocation of a new Parliament, and constitutional government was restored July 23, 1908. No attempt had been made to convoke Parliament since the dissolution on April 11, 1920, of the last Chamber of Deputies which sat in Constantinople. Meanwhile the Grand National Assembly of Angora voted, on January 20, 1921, a Fundamental Law which introduced changes of the most radical kind into the system created under the Constitution of 1876. It declared that all sovereignty belonged to the people, and that all power, both administrative and legislative, was vested in the Grand National Assembly as being the sole representative of the people. The old name 'Ottoman Empire' was discarded in favour of the designation

'Turkey.' No provision was made for a Senate. It was laid down that the members of the Grand National Assembly should be elected for a period of two years, and that the Assembly should delegate its executive powers to a certain number of Vekils or Commissioners, who were to be, however, merely individual mandatories of the Assembly elected by it from among its own members. By way of exception, it was provided that the existing Grand National Assembly, which had been recruited partly by incorporating the members of the dissolved Constantinople Chamber and partly by a special system of election, should remain in existence pending the complete realisation of the national aims, which it was the object of the National Movement to secure.

The Council of Commissioners, which under this new system takes the place of a Cabinet, is at present (February, 1923) composed as follows:—

President.—Reouf Bey.

Commissioner of Religious Affairs.—Vehbi Efendi.

Commissioner of National Defence.—General Kiazim Pasha.

Commissioner of Foreign Affairs.—General Ismet Pasha.

Commissioner of Interior.—Fethi Bey.

Commissioner of Justice.—Rifat Bey.

Commissioner of Finance.—Hassan Fehmi Bey.

Commissioner of Public Instruction.—Sefa Bey.

Commissioner of Public Works.—Feizi Bey.

Commissioner of Public Health.—Riza Nour Bey.

Commissioner of Economic Affairs.—Mahmoud Essad Bey.

The President of the Grand National Assembly is Marshal Mustafa Kemal Pasha, who is also Commander-in-Chief of the Army, under an appointment which is to remain in force until the national aims are realised.

Subjects of Western Powers resident in Turkey enjoyed ex-territorial privileges from time immemorial, under treaties called Capitulations. The greatest single change introduced in 1914 was the abolition by a decree of the Sultan of these Capitulations (September 9, 1914). It had long been felt that these privileges needed revision, especially in so far as they exempted foreigners from the fiscal burdens of Ottoman subjects, but their abolition by an unilateral act gave rise to an unanimous protest of the Powers, and no Power had, at any rate publicly, assented to it up to November, 1914. This step, which included the suppression of foreign Post Offices and that of the International Board of Health, was taken in September, after the outbreak of the European War, and the condition of Europe made the protest of the Powers academic rather than effective for the time being. During the war the Central Powers recognised the *fait accompli* and entered into new Treaty arrangements with the Porte. In the latest peace proposals made to Turkey by the Allied Powers, January–February, 1923, provision is made for the complete abolition of the fiscal privileges formerly enjoyed by their subjects, and for the suppression of the judicial capitulations subject to the introduction of a system providing certain guarantees for foreigners for a limited period.

LOCAL GOVERNMENT.

The Fundamental Law, voted at Angora in January, 1921 (see above) altered the system in force up to 1920 by providing that the country should be divided into Vilayets, divided into *Cazas*, subdivided in their turn into

Nahies. At the head of each Vilayet is a Vali representing the Grand National Assembly. The system aimed at is one of decentralisation. Each Vilayet has an election council of its own. The *caza* is regarded as a mere grouping of Nahies for certain purposes of general administration. The Nahie or commune is an autonomous entity and possesses an elective council charged with the administration of such matters as are not reserved to the State.

Area and Population.

The Ottoman Empire before the war was made up of (1) Turkey in Europe, (2) Turkey in Asia (Anatolia, Arabia, Syria, Palestine, Mesopotamia, and Kurdistan), and (3) certain islands in the Mediterranean. After the conclusion of the 1st Balkan war (November, 1913), which commenced in October, 1912, the Turkish possessions in Europe were considerably lessened, Turkey in Europe being in part divided among the Allied States (Bulgaria, Serbia, Montenegro, and Greece), and in part created into an independent state of Albania. Cyprus and Egypt, which were formerly under the suzerainty of the Sultan, were, the one, annexed to the British Empire and the other declared a British Protectorate in November, 1914, and January, 1915, respectively.

The Treaty of Peace with Turkey, signed at Sèvres on August 10, 1920, but never ratified, contemplated a very great reduction of the Empire as it existed in 1914.

A succession of political and military events of the highest importance has necessitated the abandonment of a great part of the proposals put forward in that Treaty. Treaty arrangements with Georgia, Azerbaijan, and Armenia, following in the case of the last-named state on a successful local war, have placed Turkey in possession of a portion of the Caucasian provinces of the old Turkish Empire. A separate agreement concluded with France in October, 1921, provided her with a more favourable frontier with Syria than was contemplated in the Treaty of Sèvres. The collapse of the Greek forces in Asia Minor in September, 1922, led to the complete withdrawal of the Greeks from that country. Finally, a military Convention concluded at Moudania on October 11, 1922, between representatives of Turkey, Greece, Great Britain, France and Italy provided *inter alia* for the withdrawal of the Greeks from all Thrace east of the Maritza, and the re-establishment of a Turkish civil administration, assisted by a force of 8,000 gendarmes, in the area so evacuated. Constantinople, with a small adjacent area, and specified zones on both shores of the Dardanelles, remained provisionally under Allied military occupation under the last-named Convention.

The latest of many efforts on the part of the Allied Powers to bring about a definite settlement with Turkey has been the convocation of a Conference at Lausanne to negotiate a new Treaty of Peace. To this Conference Great Britain, France, and Italy, the 'Inviting Powers,' invited Turkey, Greece, Yugoslavia, and Rumania to send representatives. Russia and Bulgaria were invited to participate in the negotiations relative to the Straits, and the United States of America to participate as 'observers' in the whole Conference. Belgium was admitted to the discussion of certain questions, and she and the neutral European powers having capitulatory rights assisted at the discussion of the question of a new régime to replace the Capitulations. The Conference opened on November 20, 1922. After it had sat for about eleven weeks and an agreement had been reached with the Turkish delegates on many points, the Inviting Powers on January 31, 1923, propounded a

draft Treaty of Peace, with several annexed documents, embodying their proposals for a final settlement. The Turkish Delegation having taken exception to several portions of this draft and its annexes, further concessions were offered during the following days, but no settlement was reached, and the various delegations left Lausanne on and after February 4 without having made peace, but also without any formal rupture.

As regards territory, the effect of the Allied proposals of January 31, as modified between that date and February 5, would be as follows:—Subject to certain restrictions concerning the zone of the Straits and demilitarised zones on either side of the Turkish frontier in Europe, Turkey would exercise full sovereignty, without any other restriction on her military forces in Eastern Thrace, up to the Bulgarian frontier and the Maritza, which river would form the frontier between Turkey and Greece, the town of Adrianople and a station on the west bank of the river falling to Turkey, and the suburb of Kara Agatch with its railway station falling to Greece. She would similarly exercise full sovereignty in the whole of Asia Minor, her frontier with Syria being that laid down in the Franco-Turkish Agreement of October, 1921. Her frontier with Irak would fall to be determined by an arbitral decision of the League of Nations, subject to an undertaking on the part of Great Britain to allow this to stand over for one year in order to admit of a further attempt to settle the question direct with Turkey, which has hitherto claimed the restoration of the whole of the Mosul Vilayet by friendly discussion. No question arises of an autonomous or independent Kurdistan; and the question of the Caucasus frontier is implicitly treated as one concerning only Turkey and her neighbours, no mention being made of it. A separate draft Convention lays down rules for the Straits, on the basis of (a) the fullest possible freedom of navigation for merchant ships of all nations; (b) freedom of passage, but not of sojourn, for war-vessels, subject to certain restrictions, more particularly as regards the total tonnage allowed; (c) demilitarisation of certain zones on either side of the Dardanelles and Bosphorus, and of certain islands in the vicinity. Two of these islands, though situated outside the Straits, namely Imbros and Tenedos, would by an article in the draft Treaty remain under Turkish sovereignty, subject to special arrangements for their local administration!

The following table gives the area and population of Old Turkey:—

Vilayets	Area Sq. Miles	Population	Population per Sq. Mile
Europe:—			
Constantinople	1,505	1,203,000	799
Chatalja ("Independent" Sanjak)	733	78,000	106
Adrianople	8,644	610,000	70
Total	10,882	1,891,000	173
Asia Minor:—			
Ismid ("Independent" Sanjak)	3,130	222,700	71
Brûssa	25,400	1,626,300	64
Bigla ("Independent" Sanjak)	2,550	129,500	51
Smyrna, or Aidin	25,801	2,500,000	97
Kastamuni	19,570	961,200	49
Angora	27,370	932,800	34
Konia	39,410	1,069,000	27
Adana	15,400	422,400	27
Sivâs	23,970	1,057,500	44
Trebizond	16,671	1,265,000	76
Total	199,272	10,186,900	52

Vilayets	Area Sq. Miles	Population	Population per Sq. Mile
Armenia and Kurdistan :-			
Erzerum	19,180	645,700	34
Mamuret-ul-Aziz	12,700	575,200	45
Diarbekr	14,480	471,500	32
Bitlis	10,460	398,700	38
Van	15,170	379,800	25
Total	71,990	2,470,900	34
Grand Total	282,144	14,548,800	52

The events of recent years have caused an enormous reduction in the Christian population of the territory still remaining to Turkey. A very large proportion of the Armenian population of Asia Minor has disappeared. The Greek population has practically ceased to exist in large parts of Asia Minor and in European Turkey outside Constantinople. The remaining Greeks in places other than Constantinople are estimated at not more than 300,000. A Turco-Greek agreement signed at Lausanne on January 30, 1923, but not to come into force until a general Treaty of Peace is concluded, provides for the compulsory exchange of the Greeks of Turkey, not including Constantinople, against the Moslems of Greece, not including Western Thrace, as from May, 1923. Suggestions have been made for the creation in Turkish territory of an Armenian National Home, but they have been steadfastly rejected by the Turkish Government. The Moslem population of Turkey has also suffered greatly from the effects of the war. It comprises besides the Turks of Eastern Thrace and Asia Minor large numbers of Kurds in the Eastern provinces, a certain number of Arabs, Circassians, and people of other races. There is a fairly considerable Jewish element, principally in the towns.

The normal population of the chief towns still remaining under Turkey is approximately as follows :—

Constantinople	1,000,000	Sivâs (Sebasteia)	65,000
Brûssa	110,000	Bitlis	40,000
Kaisariëh	54,000	Trebizond	55,000
Konia	45,000	Diarbekr	38,000

Religion.

Mahommedanism is the established State religion. The Caliph is Supreme Head. The chief ecclesiastical dignitary was until recently the Sheikh-ul-Islam, but his functions were judicial and legal rather than spiritual. He was a member of the Cabinet, and has his counterpart in the new system in the Commissioner for Moslem Affairs in the Angora Government.

Mahommedans form the vast majority of the population in Asiatic Turkey. There are also a number of non-Mahommedan native communities or 'millets,' namely : 1. Latins or Catholics, who use the Roman Liturgy, consisting of the descendants of the Genoese and Venetian settlers in the Empire, and other native Catholics of the Latin rite ; 2. Orthodox Greeks under various separately recognised Patriarchs, of whom the principal is the Ecumenical Patriarch at Constantinople ; 3. Armenians, under their

Patriarch at Constantinople, but under the supreme spiritual control of a Catholicos at Echmiadzin, in the Russian Caucasus. In 1903, the old dignity of Catholicos of Sis, in Cilicia, was restored and a new appointment made. There still remains in abeyance the seat of the Catholicos of Akhtamar (Van), an ancient dignity; 4. Armenian Catholics, under a Patriarch at Constantinople; 5. Chaldean Catholics, under a Patriarch at Mosûl; 6. Protestants, consisting of converts chiefly among the Armenians; 7. Syrian Catholics, under a Patriarch at Mardin; 8. Syrian Jacobites, under a Patriarch at Mardin; 9. Melchites, under a Patriarch at Damascus; 10. Jews of two rites, now separately recognised; 11. Bulgarian Catholics; 12. Maronites, chiefly in the Lebanon; and 13. Nestorians, or Assyrian Christians, under the Patriarch Mar Shimun of Kochannes. The last two were, however, only semi-officially recognised as independent communities. These religious denominations were invested with the privilege of possessing their own ecclesiastical rule. The spiritual heads of the recognised communities possessed in varying degrees civil functions, which in some cases, and more especially in that of the Greek Patriarch, were of considerable importance. It is doubtful how far these privileges will be maintained under the new system of Government. A "Turkish Orthodox" Church which does not recognise the Greek Patriarchate of Constantinople has come into existence in Asia Minor under the stress of recent political events.

In Constantinople about half the settled inhabitants are Mussulman, the other half being made up mostly of Orthodox Greeks, Armenians, Roman Catholics, Armenian and other Uniates, and Jews. There is, besides, a very large foreign population of various professions. In the Islands of the Ægean Sea the population is mostly Christian.

A priesthood in the strict sense of the term cannot be said to exist in Mahomedan Turkey. The Ulema, however, or persons connected in one way or another with the official ministrations of Islam, form a separate class. The principal charges in connection with mosques, theological schools, &c., are to a large extent hereditary.

Instruction.

In Turkey, elementary education is nominally obligatory for all children of both sexes. According to the Provisional Law of October 6, 1913, all children from 7 to 16 are to receive primary instruction, which may, however, be given in State schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The State schools are under the direct control of the Ministry of Public Instruction, which also provides for the inspection of schools maintained by the non-Moslem communities, &c. Besides these there survive a large number of Medressés or theological seminaries, connected with religious foundations. There are middle-class schools for boys from 11 to 16 years of age, and according to the Bill introduced in January, 1918, similar institutions for girls (*Unas Sultunijessi*) are to be established. The schools of various descriptions number about 36,230, and contain about 1,331,200 pupils, or one to twenty-four of population. Training schools for teachers also exist, but the general level of efficiency of the State schools is low. There are a large number of foreign schools, mostly conducted by French, English and American missionaries.

The university, which was nominally founded at Constantinople in 1900, was reorganised in 1918.

Justice.

Turkey being essentially a Moslem State the laws of the Empire rest in principle on the basis of all *Sunni* Moslem law, i.e., the Korân, the Hadith or traditions of Muhammad, and the reported sayings and actions of his immediate successors, all of which are considered binding upon the sovereign as upon all Moslems. This religious law, called as a whole the *Sheri* law, has to some extent been codified, as in the *Mejelle* or Civil Code which was drawn up in 1869—1876, and embodies the prescriptions of the religious law in regard to certain specified matters, like sale, &c. The bulk of modern legislation, however, has no such connection with the *Sheri* law, but consists of statutes enacted by successive Sultans in virtue of their absolute authority, measures adopted by Parliament, and 'provisional' laws, made under an Article of the Constitution, which empowers the executive, when Parliament is not sitting, to enact laws of a pressing nature subject to subsequent ratification, and on which the widest possible construction has been put. Much of this statute law, including the great Codes of Criminal and Commercial Law and the Codes of Procedure, dates from the 30 or 40 years following the *Hatt-i-Sherif* of 1839. The Codes just mentioned were based almost entirely on French models, and, though not a little modified by subsequent measures, they still remain in force in all their main lines. The enactment of laws and regulations on European models has continued since the middle of the nineteenth century, and received an enormous impetus with the renewal of the Constitution in 1908, since which date a very great number of new laws and regulations of every kind have been enacted. Corresponding (though only roughly, because the *Mejelle*, for instance, is applied by the lay courts also) to the double variety of law there is a double system of law courts. The lay courts, called in Turkish, *Nizamié*, date like the Codes from the middle period of the nineteenth century and are modelled closely on the French system. Dealing as they do with all criminal, commercial, and ordinary civil business they are now of preponderating importance, but side by side with them there continue to exist the religious or *Sheri* Courts which take cognisance of certain specified matters, notably those relating to the title to certain categories of real property, and all matters relating to the personal status of Moslems.

Since its inception the Grand National Assembly has claimed that laws passed by it are valid for the whole of Turkey. Laws passed at Constantinople since 1920 are not recognised by it, but earlier laws voted in Constantinople are valid except in so far as they have been expressly altered. The judicial system of the Angora Government does not differ essentially from that previously in existence, except for the creation of Extraordinary Tribunals with summary jurisdiction for offences against the Nation, and the setting up of a Court of Cassation at Sivas.

Finance.

The revenue is derived from, tithes, land and property taxes, Customs, sheep and cattle tax, monopolies, and other sources; the largest portions of the expenditure are for military purposes and for debt charges.

No regular Budget existed before the restoration of the Constitution in 1908. Since that year a Budget and a Finance Law have been voted, or enacted by the executive in the absence of Parliament, each year.

The ordinary Estimates for 5 years ending March 31 are shown as follows:—

	1915-16	1916-17	1917-18	1918-19	1921-22
	£T	£T	£T	£T	£T
Revenue . . .	26,836,438	25,612,572	23,584,165	34,015,698	22,889,661
Expenditure . .	35,657,545	39,724,720	53,304,511	51,969,711	21,890,067

The Public Debt Administration functions independently of the Ministry of Finance, though the Turkish Government has made it a practice to include the Debt figures in the State Budget. Since the Armistice the whole financial system of the Central Government has fallen into the utmost disorder, and on October 1, 1920, the Allied Powers entitled to representation on the future Financial Commission instituted a provisional system of control which is exercised by their Delegates on the Public Debt Administration. The budget for 1921 of the *de facto* Government of Angora estimates revenue at £T79,333,440 and expenditure at £T86,519,650.

The Ottoman Government, when unable to meet its liabilities, made an arrangement with its creditors, confirmed by the Iradé of December 8/20, 1881, supplemented and modified by that of September 1, 1903. A Council of Administration at Constantinople was appointed, and to it were handed over for distribution among the bondholders the funds derived from the excise duties, and certain other funds. Of the total foreign debt, 60 per cent. is due to France, 14 per cent. to England and 21 per cent. to Germany.

The external debt of Turkey on August 31, 1921, was placed at £T171,527,034. The effect of the proposals made at Lausanne on January 31 to February 4, 1923, would be to reduce the foreign debt enormously, as a result of the distribution of Turkish indebtedness among the succession states of the old Turkish Empire, and the abandonment by the Allies of numerous claims against Turkey.

Defence.

According to the records of the Ministry of War at Constantinople, the Turkish army in August, 1914, consisted of 39 divisions. Few of these divisions were up to strength, and the total combatant strength of the Turkish army did not exceed 150,000 men. During the war the army was expanded to a maximum strength of 70 divisions, and up to the time of the armistice nearly 2,700,000 men had been recruited for military service. The maximum combatant strength of the army during the war was approximately 650,000, and this figure was reached in the middle of 1916.

After the collapse of the Turkish army in consequence of its defeats in Palestine and Mesopotamia, no systematic reorganisation was attempted until the rise of the National Movement in the interior. At the end of 1921 the position of the armed forces of the Central Government were negligible, but the *de facto* Government at Angora possessed an efficient army, organised in 12 Army Corps. This army completely defeated the Greek forces in August 1922 and drove them out of Asia. The strength of the Kemalist Army was early in 1923 estimated at 190,000 men, of whom 20,000 were in Eastern Thrace. Constantinople is occupied by Allied troops, mainly British and French; the Dardanelles by British troops at Chanak; and French troops at Gallipoli; Syria by French troops; and

Palestine and Mesopotamia by British troops. Considerable progress has been made in the direction of setting up regular civil administrations under French and British auspices in Syria and Palestine. In Mesopotamia the Emir Faisal has been installed as King and an Arab Government formed, with a British High Commissioner to represent the Mandatory Power.

III. NAVY.

By the terms of the Treaty of Sèvres the Ottoman navy was to be abolished, subject to the retention of a few gunboats and torpedo boats for fishery and police duties. These restrictions have been abandoned in the latest Allied proposals for a peace settlement, but the naval forces of the Angora Government at the present time are insignificant.

Production and Industry.

Agriculture.—Agriculture is most primitive. The soil for the most part is very fertile; the principal products are tobacco, cereals of all kinds, cotton, figs, nuts, almonds, grapes, olives, all varieties of fruits. Coffee, madder, opium, gums are largely exported. Wool and mohair are the two principal products of Anatolia. Flour-milling in Smyrna is being improved and extended. Coffee is grown in the Hodeida region; opium is an important crop in Konia. Tobacco is grown both in European and Asiatic Turkey. The principal tobacco districts are Samsun, Bafra and Charchambe. The principal centres for silk production are Brusa and Constantinople. The production of olive oil, mainly confined to the Vilayet of Arden, is very important.

The forest laws of the empire are modelled on those of France, but restrictive regulations are not enforced, and the country is being rapidly deprived of its timber. About 21 million acres are under forest, of which 3½ million acres are in European Turkey.

Mining.—The Turkish provinces, especially those in Asia, are rich in minerals, which are little worked. Chrome ore is worked in Smyrna, Brusa, Adana and Konia. The Government silver mines at Bulgan Maden, Konia, produce annually about 2,600 kilos of silver and 400 tons of silver-lead; zinc is found at Karasu on the Black Sea and in Aidin; manganese ore in Konia and Aidin; antimony ore, 308 tons; copper ore is found in the Armenian Taurus, at Tereboli, near Trebizond, at Arghana Maden, near Diarbekr, said to be one of the largest and most productive mines in the world; borax from 6,000 to 8,000 tons exported annually from the Marmora; meerschaut at Eskishehr; chrome at Mersina; emery at Smyrna, in Aidin, Konia, Adana, and the Archipelago; asphalt in Syria, and on the Euphrates; coal and lignite (400,000 tons annually) at Heraclea on the Black Sea. There are salt works also at Erzeroum, Samos, and other places. Both gold and silver are found at Bulghar Maden (Konia); mercury at Sisma near Konia; kaolin in the island of Rhodes; arsenic in Aidin; iron in Kossaro (not worked), in Adana (output, 40,000 tons a year). There is a good deal of brass-turning and beating of copper into utensils for household purposes.

Fisheries.—The fisheries of Turkey are important; the fisheries of the Bosphorus alone represent a value of upwards of 250,000*l.*, though the fishery methods are antiquated. The coast of the Mediterranean produces excellent sponges, the Red Sea mother-of-pearl, and the Persian Gulf pearls.

Manufactures.—Industries in Turkey are mostly quite primitive. There is a tendency to start factories on a small scale, but the supply of labour seems likely to prove a difficulty. At Panderma there is a woollen yarn spinning mill belonging to the Oriental Carpet Manufacturers' Company, which produces 2,750,000 lbs. annually, and employs 140 hands. Cotton spinning is carried on in the vilayets of Aidin and Adana, and in the capital. There are five main establishments, two in Constantinople, two in Smyrna, and one in Magnesia, and four factories of lesser importance in Adana. The latter have a total of 10,000 spindles, the former 40,800 spindles, making 50,800 spindles for the cotton manufacturing industry of the country.

Commerce.

The total trade of Turkey in various years ending March 13 has been as follows (£T1 of 100 piastres = 18 shillings, or £T10 = 9*l.*, or 10*l.* = £T11):—

Years	Imports	Exports	Years	Imports	Exports
	£T	£T		£T	£T
1912-13	43,551,035	23,921,326	1919	12,762,376	38,427,872
1913-14	40,809,680	21,436,120	1920	169,396,267	47,625,882
1916-17 ¹	22,103,304	34,058,581	1921	121,329,542	30,379,812

¹ September, 1916, to February, 1917.

Turkish trade for 2 years was distributed among the principal countries as follows:—

Country	Imports		Exports	
	1920	1921	1921	
	£T	£T	Kilos	£T
United Kingdom . . .	48,685,406	27,433,418	6,143,222	2,140,612
Egypt	6,608,914	7,177,629	5,285,647	1,428,767
France	20,294,215	11,787,500	1,913,942	2,101,879
Germany	57,795	485,385	663,955	515,577
Russia	5,845,799	1,311,617	1,518,565	973,294
Bulgaria	1,450,307	6,503,275	4,724,478	1,784,815
Rumania	2,504,017	5,990,494	6,697,942	4,459,513
Greece	4,438,273	3,534,157	6,895,173	3,021,591
Italy	25,696,202	13,407,381	7,652,668	1,783,377
Netherlands	5,424,126	7,294,776	2,807,259	2,308,274
United States	25,953,810	19,182,764	1,966,412	1,257,288

During 1921, the chief articles of import were: cotton and cotton goods (£T30,985,267); cereals (173,082,154 kilos, valued at £T19,697,577); wool and woollens (£T10,589,018); oils, etc. (38,751,109 kilos, valued at £T5,731,806); colonial produce (28,549,466 kilos, valued at £T7,358,003) metal (£T5,345,125).

The principal imports from Turkey into the United Kingdom and

exports to Turkey from the United Kingdom (according to Board of Trade Returns) in two years were:—

Imports from Turkey	1920	1921	Exports to Turkey	1920	1921
	£	£		£	£
Opium	332,163	19,870	Coal	277,289	290,377

The value of the commercial intercourse between the whole of the Turkish Empire in Europe and Asia and Great Britain during the last five years, according to the Board of Trade Returns, is shown in the following table:—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports into U. K. from Turkey	694,715	9,284,659	12,237,737	1,063,669	1,730,500
Exports of British produce to Turkey	1,811,784	22,160,146 ¹	31,379,987 ¹	4,710,326	3,696,291

¹ Exported to ports and places in territory formerly Turkish, but now occupied by other Powers.

Shipping and Navigation.

The mercantile navy of the Turkish Empire in 1911 consisted of 120 steamers of 66,878 tons, and 963 sailing vessels of 205,641 tons. In 1921, 3,444 vessels of 2,725,408 tons entered the port of Constantinople.

Internal Communications.

The length of railway line in European and Asiatic Turkey on November 1, 1914, not including the most recently opened sections of the Bagdad Railway, was 2,865 miles.

There are 1,814 Turkish post-offices in the Empire. In the year 1917-18 the inland service transmitted 20,377,837 letters and 4,685,049 post-cards, and 21,997,149 samples and printed papers; the international service transmitted 1,853,961 letters and 767,744 post-cards, and 691,696 samples and printed papers. A parcel-post system has been introduced into Turkey, and works fairly well. Foreign post-offices have ceased to exist since Oct. 1, 1914.

The length of telegraph lines in Turkey is about 28,890 miles, and the length of wire about 49,200 miles; there are 1,017 telegraph offices; messages in the year 1914-15, 5,533,501.

Money, Weights, and Measures of Turkey.

In January, 1917, the Turkish Government issued a Charter for a new National Bank, to be styled the Ottoman National Credit Bank (Osmanlı İtibar milli Bancası). Its capital is 4 million Turkish pounds (3,600,000*l.*). After the expiration of the privileges of the Imperial Ottoman Bank (1925)

the new institute is to become the State Bank with the right to issue bank-notes.

Other important banks are the Imperial Ottoman Bank, National Bank of Turkey, the Arch-Levantine Banking Company, the Crédit Lyonnais, Banco di Roma, and the Bank of Athens.

Up to December 31, 1921, the total amount of currency in circulation was as follows:—treasury bonds, £T5,147,919; notes, £T153,859,936; pre-war metallic money, £T38,000,000; other money, £T20,030,000.

On April 17, 1916, an order was issued reforming the currency. A gold standard, with the piastre as the unit, is henceforth to be general all over Turkey, and the piastre to equal 40 para. The piastres, as well as the half piastre (20 para), quarter piastre (10 para) and eighth piastre (5 para) pieces are to be of nickel. Silver coins are 2, 5, 10, and 20 piastres; and gold coins 25, 50, 100, 250, and 500 piastres. Silver is legal tender up to 300 piastres, and nickel up to 50 piastres.

At present, however (March, 1923), the only money in general circulation, with the exception of 20 para pieces, is paper issued during the war. This forced currency is very depreciated, the Turkish paper lira being worth about one-sixth of the gold coin of the same denomination.

The gold 100-piastre piece (which is equivalent to £T1) weighs 7·216 grammes, '916 fine, and thus contains 6·6147 grammes of fine gold. The silver 20-piastre piece weighs 24·055 grammes, '830 fine, and therefore contains 19·965 grammes of fine silver. £T11 equals £10 approximately (pre-war).

Weights and measures are as follows:—

The <i>Oke</i> , of 400 drams.	= 2·8326 lbs. avoirdupois.
„ <i>Kileh</i>	= 0·9120 imperial bushel.
44 <i>Okes</i> = 1 <i>Cantar</i> or <i>Kintal</i>	= 125 lbs. avoirdupois.
39·44 <i>Okes</i>	= 1 cwt.
180 <i>Okes</i> = 1 <i>Cheke</i>	= 511·380 pounds.
1 <i>Kile</i> = 20 <i>Okes</i>	= 0·36 imperial quarter.
816 <i>Kilehs</i>	= 100 imperial quarters.
The <i>Endaze</i> (cloth measure).	= 27 inches.

For land measurement there is the 'old *dunam*' and the 'new *dunam*.' The first is used extensively for land measurement in the interior of Anatolia, as well as throughout Asia Minor. The second, which is based on the metric system and is employed in all Government departments and townships of any size, is the official Government unit. The old *dunam* is measured roughly by the peasant, who steps off 40 steps, each equal to approximately one *arshin* (about 75 centimetres), and this length squared is reckoned as 1 *dunam*. The *evlek* is equivalent to 400 square *arshin*, or one-fourth of an old *dunam*. In English equivalents, 1 old square *arshin* = 6·1794 square feet; 1,600 square *arshin*, or 1 old *dunam* = 9,887·04 square feet, or 0·22698 acre; 1 new square *arshin* (1 square meter) = 1·74 old square *arshin* = 10·764 square feet; 1 new *dunam* = 2·7216 old *dunam* = 0·61778 acre.

The *kile* is the chief measure for grain, the lower measures being definite weights rather than measures. 100 *kiles* are equal to 12·128 British imperial quarters, or 35·266 hectolitres.

In 1889 the metric system of weights was made obligatory for cereals; metric weights were decreed obligatory in January 1892, but the decree is not yet enforced. In 1915 the metric system was made the official standard of weights and measures.

On March 1, 1917, the Gregorian calendar was introduced into Turkey, to be used side by side with the Hegira calendar.

Diplomatic and Consular Representatives.

1. OF TURKEY IN GREAT BRITAIN.

None.

2. OF GREAT BRITAIN IN TURKEY.

High Commissioner and Ambassador Designate.—The Rt. Hon. Sir H. G. M. Rumbold, Bart., P.C., G.C.M.G., M.V.O.
Acting Counsellor.—N. M. Henderson.
Chief Dragoman.—A. Ryan, C.M.G.
Secretaries.—G. G. Knox, H.F.C., Crookshank, J. D. Greenway and W. H. B. Mack.
Head of Consular Section and Consul-General Designate.—A. T. Waugh, C.M.G.
Military Attaché.—Col. A. W. F. Baird, C.B., C.M.G., D.S.O.
Commercial Secretary.—C. H. Courthope-Munroe.

URUGUAY.

(REPÚBLICA ORIENTAL DEL URUGUAY.)

Constitution and Government.

THE Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Rio de la Plata, and subsequently a province of Brazil, declared its independence August 25, 1825, which was recognised by the Treaty of Montevideo, signed August 27, 1828. The Constitution of the Republic was last amended on January 3, 1918, and came into force on March 1, 1919. The franchise is universal for males over 18 years of age; voting is secret, and the principle of proportional representation operates. The legislative power is vested in a Parliament of two Houses, the Senate and the Chamber of Representatives, which meet in annual session, extending from March 15 to December 15. In the interval of the session, a permanent committee of two senators and five members of the Lower House assumes the control of the executive power. The representatives are chosen for three years, in the proportion of 1 to every 12,000 inhabitants of male adults who can read and write. The senators are chosen by an Electoral College, whose members are directly elected by the people; there is one senator for each department, chosen for six years, one third retiring every two years. There are 90 representatives and 19 senators.

The executive is divided between the President of the Republic and a National Administrative Council. The President is elected for four years by the direct vote of the people, and may be re-elected after an interval of 8 years since his last holding office. The National Administrative Council consists of nine members, six of the majority party, and three of the largest minority; three retiring every two years. The election is by direct popular vote. The President appoints the Ministers of Foreign Affairs, of War and Marine, and of the Interior, and has supreme control of these departments. The other ministers—of Finance, Public Works, Industry and Education—are appointed by the Council, which is the controlling power of these departments. The President receives a salary of 24,000 pesos per annum.

President of the Republic.—José Serrato (March 1, 1923, to February 28, 1927).

President of the Administrative Council.—Julio Maria Sosa.

Area and Population.

The following table shows the area and the estimated population of the 19 departments (capitals in brackets) on December 31, 1920:—

Departments	Area, square miles	Population Dec. 31, 1920	Pop. per square mile
Artigas (Artigas)	4,394	40,065	9.1
Canelones (Canelones)	1,834	122,022	66.5
Cerro-Largo (Melo)	5,763	60,658	10.5
Colonia (Colonia)	2,193	90,206	41.1
Durazno (Durazno)	5,525	58,543	10.5
Flores (Trinidad)	1,744	24,873	14.8
Florida (Florida)	4,673	65,658	14.0
Maldonado (Maldonado)	1,587	43,071	27.1
Minas (Minas)	4,819	71,848	14.9
Montevideo	256	393,167	1,535.8
Paysandú (Paysandú)	5,115	76,018	12.9
Rio Negro (Fray Bentos)	3,269	39,041	11.9
Rivera (Rivera)	3,793	48,310	13.7
Rocha (Rocha)	4,280	50,013	11.6
Salto (Salto)	4,865	80,639	16.7
San José (San José)	2,688	64,173	23.8
Soriano (Mercedes)	3,561	50,245	16.6
Tacuarembó (San Fructuoso)	8,112	63,982	7.8
Treinta y Tres (Treinta y Tres)	3,682	43,389	11.7
Total	72,153	1,494,953	20.7

In 1920 there were 815,945 males and 679,008 females.

The departments enjoy ample autonomy, each having its Local Government Board and Representative Assembly, with extensive control over local expenditure, taxation, and public works.

In 1914 the Uruguayan and Brazilian Boundary Commissions drew up the documents respecting three islands belonging to Uruguay, to be called Socorro, Jacinto, and Denis.

The results of the census of October, 1908, showed a population of 1,042,686 (530,508 males and 512,178 females). Of this total, 181,222 were foreigners, 62,357 being Italian, 54,885 Spanish, 27,789 Brazilian, 18,600 Argentine, 8,341 French, 1,324 British, 1,406 Swiss, 1,112 German, and 5,408 of other nationalities.

The population of Montevideo City on November 30, 1922, was 350,956. Of the other cities, Paysandú had 26,000 inhabitants; Salto, 30,000; Mercedes, 23,000.

Births, deaths, and marriages for three years. The births and deaths are exclusive of still-births.

Years	Living-Births	Still-Births	Marriages	Deaths	Surplus of Births over Deaths
1918	38,914	1,391	6,823	20,009	18,005
1919	39,307	1,291	7,532	18,904	20,403
1920	39,335	1,370	8,355	19,041	20,294

Of the living births in 1920, 11,426 were illegitimate. Divorces: 195 in 1918; 191 in 1919; 250 in 1920.

For five years the arrivals and departures by sea at Montevideo were :—

—	1916	1917	1918	1919	1920
Immigrants . .	220,527	173,441	180,687	158,186	137,639
Emigrants . .	204,525	164,386	177,254	145,287	125,567

Of the immigrants landing in Montevideo in 1920, 9,542 were Spanish ; 4,912 Italian ; 4,493 Brazilian ; 2,173 French ; 2,000 German ; and 2,740 English.

Religion and Instruction.

State and church are separated ; and there is complete religious liberty. The religion professed by the majority of the inhabitants is Roman Catholic. The archbishopric of Montevideo has 2 suffragan bishops in Salto and Melo. The 1908 census showed 430,095 Catholics, 12,232 Protestants, and 45,470 unspecified.

Primary education is obligatory. In 1920 there were 1,005 public schools with 102,889 enrolled pupils. There were also 195 private schools with 21,228 pupils. In 1920 there were 6,060 pupils in attendance at the Secondary Schools. Evening courses for adults were attended (1920) by 5,982 pupils (1,302 illiterates).

There is at Montevideo a university, with 4,165 students and 344 teachers in 1920. There are also a preparatory school and 22 other establishments for secondary and higher education with 4,943 pupils in 1919. There are normal schools for males and for females, and a school of arts and trades supported by the State where 185 pupils receive instruction gratuitously. At the military college, with 8 professors, there are 46 pupils. There are also many religious seminaries throughout the Republic with a considerable number of pupils, a university for women, a school for the blind, and one for the deaf and dumb, and a school of domestic sciences.

For the relief of poverty there are a charity hospital, an hospital for the insane, an isolation hospital, an asylum for beggars, an orphan asylum, and 3 infant schools. The Asistencia Pública is an institution which has general charge of hospitals, asylums, dispensaries, and similar relief works all over the country. For 1919-20 its budget was fixed at 3,711,173 pesos.

Justice.

The judicial power rests with the High Court of Justice, consisting of 5 judges elected by the General Assembly of the Chambers. The President is chosen annually by the members of the Court from amongst themselves. This court has original jurisdiction in constitutional, international, and admiralty cases, and will hear appeals in cases in which the decision has been modified or altered in other appeal courts, of which there are 2 each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 2 for commercial cases, 1 for Government, 2 for criminal cases, 2 correctional courts, and 3 for criminal investigation. Each departmental capital has a departmental court, and each of the 214 judicial sections into which the Republic is divided has a justice of peace court ; further, each section is divided into districts, in which deputy judges (alcaldes) try cases involving small amounts.

In September 1907 the death penalty was abolished, penal servitude for a period of 30 to 40 years being put in its place.

Finance.

The receipts and expenditure for recent years are stated as follows :—

—	Receipts	Expenditure	—	Receipts	Expenditure
	£	£		£	£
1916-17	5,643,401	5,942,489	1920-21	8,137,015	8,746,614
1917-18	6,266,261	6,281,205	1921-22	7,777,338	9,202,871
1918-19	7,474,959	6,281,204	1922-23	7,384,143	8,908,186

The estimates of revenue and expenditure for 1921-22 were (4·7 dollars = £1) :—

Revenue	Dollars	Expenditure	Dollars
Customs	15,500,000	Legislature	991,368
Property tax	4,238,000	Presidency	63,082
Trade licences	1,850,000	National Administrative Council	157,680
Stamped paper and stamps	1,370,000	Ministry Foreign Affairs	886,932
Surtaxes on imports and exports	900,000	„ Interior	4,788,814
Internal revenue taxes	5,000,000	„ Finance	2,796,980
Other receipts	7,695,495	„ Industries	1,416,916
		„ Public Works	1,400,044
		„ War and Marine	7,741,393
		Public instruction	6,040,178
		Justice	565,430
		National obligations	16,401,728
Total	36,553,495	Total	43,253,495

The amount of the public debt of Uruguay on January 1, 1922, is officially given as 178,430,008 pesos.

Defence.

The army of Uruguay consists of a small standing army, and the National Guard. Service in the standing army is voluntary, lasting from 2 to 5 years, with re-engagement up to the age of 44. It consists of 21 line battalions, 4 rifle companies, 10 cavalry regiments, 5 field artillery regiments of 3 batteries each, a fortress artillery company and machine gun company, 1 engineers' battalion, and 1 bearer company with a peace strength of 10,400 officers and men, and a nominal war strength of 50,000.

The National Guard is a militia, service in which is compulsory. It is divided into three classes, or 'bans.' The first 'ban,' or 'mobile' national guard contains all the young men fit for military duty between the ages of 17 and 30, and forms a more or less organised force of 15,000 to 20,000 men. It would take the field with the standing army. The second ban, consisting of men fit for service between 30 and 45, is the 'departmental,' or provincial, national guard. Its units do not move out of their own departments, but the men can be drafted to make good the losses of the mobile units in time of war. The third ban, containing all the men between 19 and 45, is the 'territorial' force, and is only liable to garrison duty in its own districts. The total strength of the National Guard (all three bans) is, nominally, about 100,000 men and 120 guns.

There is also a police force, with an establishment of 5,000.

The infantry of the active army is armed with the Mauser rifle, the

field batteries have either Schneider or Krupp 7.5 cm. guns. The National Guard is mainly armed with the Remington rifle and old de Bange guns.

The fleet consists of the light cruiser *Montevideo*, the yacht *18 de Julio*, the torpedo cruiser *Uruguay*, 1,400 tons, speed 23 knots, launched at Kiel in 1910, and the torpedo boat *Oriental*.

• Production and Industry.

Uruguay is primarily a pastoral country, 60 per cent. (27,573,919 acres) of the total area being devoted to the stock-raising industry, 20 per cent. (10,002,126 acres) to mixed farms and ranches, and only 5 per cent. (2,681,613 acres) to agriculture. The remaining 15 per cent. of the country's area is unproductive. Animals and animal products constitute 95 per cent. of the country's exports.

In 1916 (last official census) there were within the Republic 7,802,442 head of cattle, 567,154 horses, 11,472,852 sheep, 16,663 mules, 12,218 goats, and 303,958 pigs.

Agricultural products are raised chiefly in the Departments of Canelones, Colonia, San José, Minas, and Florida. The average farm is about 250 acres. The principal crops and their yield for two years were as follows:—

	Area		Yield	
	1920-1921	1921-1922	1920-1921	1921-1922
	Acres	Acres	Metric tons	Metric tons
Wheat	698,920	812,094	211,420	270,627
Corn	494,034	516,832	116,842	119,942
Barley	5,181	2,718	1,793	915
Oats	128,378	106,895	36,315	20,038
Linseed	78,867	60,934	4,555	13,180

Wine is produced chiefly in the Departments of Montevideo, Canelones, Salto, Colonia, and Paysandú. In 1920 there were 2,998 properties (2,355 in 1919), of 17,482 acres, producing 56,482,000 kilos. of grapes, and 7,919,000 gallons of wine. Tobacco and olives are also cultivated.

In the northern departments several gold mines are worked, and silver, copper, lead, magnesium, and lignite coal are found. The supply of electricity for light, power, and traction is a State monopoly (Bill passed October 20, 1912).

Commerce.

The foreign trade was as follows (4.7 dollars 1l.):—

	1917	1918	1919	1920	1921	1922
	£	£	£	£	£	Jan.-Nov.
Imports	7,917,495	13,776,941	8,420,798	9,632,982	8,585,241	8,169,645
Exports	21,962,943	23,124,863	27,457,991	16,150,344	14,950,054	14,298,831

In 1920 the customs receipts amounted to 15,779,561 gold pesos.

The principal exports in 1921 were (in gold pesos) as follows:—Agricultural produce, 2,034,991; live animals, 778,373; meat and extracts, 21,119,580; wool, 31,723,538; and hides, 11,367,243. Imports (in gold pesos) consisted of: Foodstuffs, 9,289,478; fuel, 7,111,653; and hardware, 3,427,615.

COMMERCE—SHIPPING AND COMMUNICATIONS . 1399

The imports and exports for 1920 and 1921 were distributed as follows (in gold pesos):—

Countries	Imports from		Exports to	
	1920	1921	1920	1921
	Pesos	Pesos	Pesos	Pesos
Argentina	10,457,821	5,351,208	3,633,217	2,909,010
Brazil	4,529,740	5,394,529	2,487,903	2,078,481
France	2,484,803	1,858,140	12,791,656	6,801,982
Italy	1,139,809	1,517,016	4,257,513	2,305,434
Spain	2,469,145	2,188,878	1,197,973	521,417
United Kingdom	8,299,030	6,963,358	17,794,018	17,102,048
United States	14,702,053	10,373,975	20,209,211	18,662,253
Germany	1,189,577	2,793,079	—	11,420,580

Total trade between Uruguay and the U.K. for 5 years (Board of Trade Returns):—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Uruguay into U.K.	6,541,015	10,514,967	7,053,206	6,205,861	4,747,774
Exports to Uruguay from U.K.	3,150,612	3,228,724	5,916,490	3,062,062	2,545,415

Shipping and Communications.

In 1921 Uruguay had 22 steamers of a total net tonnage of 42,114 tons, and 254 coasting vessels of a total net tonnage of 18,061

The following table shows the vessels entered and cleared at the ports of Uruguay for 3 years:—

Year	Entered				Cleared			
	Steamers		Sailing Vessels		Steamers		Sailing Vessels	
	No.	Tonnage	No.	Tonnage	No.	Tonnage	No.	Tonnage
1918 .	647	8,545,355	3,050	475,988	6332	8,417,097	2,991	469,802
1919 .	5,071	7,708,638	2,401	375,346	5,048	7,694,495	2,356	365,523
1920 .	5,31	8,351,932	3,996	513,956	5,760	8,380,302	3,954	512,563

There were besides, in 1920, 9,727 bargues of 8,869,918 tons that entered and 9,714 vessels of 8,928,820 tons that cleared all the ports. The port of Montevideo is visited by the steamers of 20 different companies, of which 12 are British, 2 German, 3 French, 2 Italian, and 1 Spanish.

The National roads of Uruguay have a total length of 2,240 miles, and there are about 3,100 miles of departmental roads, of which about 800 miles are macadamised. River transport is also very extensive.

The three principal railway systems are the Central (Combined System, 930 miles), the Molland (320 miles), North Western (113 miles), Northern (73 miles), all British owned. The East Coast Railway (78 miles) and 3

minor lines are controlled by the State. During the financial year ended June 30, 1921, the gross receipts of the railways were: Central (Combined System), 1,879,630*l.*; Midland, 205,654*l.*; North-Western, 73,215*l.*; Northern, 23,522*l.* From January 1 to December 31, 1920, the receipts on the State Railways amounted to 496,220 dollars. On June 30, 1921, the railway system of Uruguay open for traffic had a total length of 1,625 miles of standard gauge, of which 1,060 miles are under State guarantee. There are 170 miles of tramway in operation; the tramway lines of two Companies in Montevideo have been electrified, but on another line in the capital, owned by the State, horse traction is still used. In Salto and Paysandu the trams are drawn by horses.

The telegraph lines in operation have a total length of 4,819 miles; in 1919, 258 offices through which 1,505,705 telegrams passed. Two telephone companies of Montevideo have 26,872 miles of wire, and in the Republic, 29 companies have 37,390 miles of wire. Number of subscribers, 18,788. The Government will take over the whole of the postal services as soon as arrangements have been completed.

In 1919 there were 995 post offices. The correspondence movement (internal) comprised 95,404,951 letters, packets, &c., and external, 12,026,807.

Money and Credit.

The Bank of the Republic had a paid-up capital on June 30, 1922, of 21,228,174 dollars. This bank has the exclusive right to issue notes. The president and directors are appointed by the Government. On November 30, 1922, notes to the value of 53,332,090 dollars were in circulation, and its stock of gold amounted to 54,927,604 dollars.

In August, 1921, the gold reserve in the banks of the country amounted to 58,263,383 pesos, distributed as follows: 55,013,943 pesos in the Bank of the Republic, 1,404,010 pesos in other Uruguayan banks, and 1,845,430 pesos in foreign banks.

In 1912 the Government created a National Insurance Bank (Banco de Seguros del Estado) with a monopoly of insurance business of all kinds. No new insurance companies may now be established. The Insurance Bank opened its doors on March 1, 1912. The business of the bank is divided into the following departments: Fire insurance; automobile insurance; workmen's accident insurance; hail insurance; life insurance; animal insurance; marine insurance; and insurance for window panes and mirrors. In 1919 the volume of business transacted by the insurance bank amounted to 120,942,523 pesos, and the profits were 2,212,612 pesos. In 1921 the premiums collected amounted to 3,841,235 dollars, and the claims settled in 1920 totalled 1,075,314 dollars. This bank's reserves on December 31, 1921, amounted to 3,677,068 pesos.

The British Banks operating in Uruguay are: Anglo South American, British Bank of South America, London and River Plate Bank, London and Brazilian, and Royal Bank of Canada.

Money, Weights, and Measures.

There is no Uruguayan gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso oro*, weighing 1.697 grammes, .917 fine. The law of June 23, 1862, authorised the coinage of the *doblon*, or 10-peso gold piece, but, as yet, only foreign gold is in circulation and is legal tender. (4.70 pesos = £1).

The silver *peso* or *dollar*, of 100 centesimos, weighs 25 grammes, .900 fine. Other silver pieces are 50 centesimos and 20 centesimos. Nickel coins are 5, 2, and 1 centesimo pieces.

The metric system of weights and measures was adopted by a law of May 20, 1862, and came into force on January 1, 1867, replacing the old Spanish weights and measures which were current with slight modifications. By a law of October 2, 1894, the metric system was made compulsory in all civil and commercial transactions. The strict requirements concerning weights and measures were reinforced by a decree of February 8, 1918.

Diplomatic and Consular Representatives.

1. OF URUGUAY IN GREAT BRITAIN.

Envoy and Minister.—Senor Federico R. Vidiella (1920).

First Secretary.—Carlos de Santiago.

Consul-General.—Don J. C. Muñoz.

2. OF GREAT BRITAIN IN URUGUAY.

Envoy Extraordinary, Minister Plenipotentiary and Consul General.—Sir Claude Coventry Mallet, C.M.G. Appointed March, 1919.

Naval Attaché.—Capt. F. L. Tottenham, C.B.E., R.N.

Acting Vice-Consul.—E. A. Cleugh.

There are also Vice-Consuls at Fray Bentos, Maldonado, Paysandú, and Salto.

VENEZUELA.

(ESTADOS UNIDOS DE VENEZUELA.)

Constitution and Government.

THE Republic of Venezuela was formed in 1830 by secession from the other members of the Republic of Colombia. The Constitution in force is that of June 19, 1922. Legislative authority is vested in a Congress of 2 chambers, the Senate and the Chamber of Deputies. The former consists of 40 members elected for 3 years, 2 for each State, Venezuelans by birth and over 30 years of age. The latter is constituted as follows: Each State chooses by direct election for 3 years one deputy, a Venezuelan by birth and over 21 years of age, for every 35,000 inhabitants, and one more for an excess of 15,000. A State with fewer than 35,000 of population will have one deputy. The Federal District and the Territories which have, or may reach, the population fixed by law will also elect deputies.

The executive power is exercised by the President of the Republic in conjunction with the Cabinet Ministers through whom he acts. The President is elected by Congress for 7 years, must be a Venezuelan by birth and over 30 years of age; by the new Constitution (1914) there is no restriction as to re-election. Modifications introduced into the Constitution in 1922 provide for the election by Congress of a First and Second Vice-President to replace the President in case of an absolute vacancy.

President of the Republic.—General Juan Vicente Gómez, elected May 3, 1922, for the period 1922-1929. Assumed office on June 24, 1922.

First Vice-President.—General Juan C. Gómez, elected June 24, 1922.

Second Vice-President.—General José Vicente Gómez, elected June 24, 1922.

The seat of the General Powers of the Nation is at the City of Caracas, but, when any unforeseen circumstance requires, the Executive Power may fix its residence at any other point of the Federal District.

The States are autonomous and politically equal. Each has a Legislative Assembly, whose members are chosen in accordance with their respective Constitutions. Each State has a President and a general Secretary. The States are divided into districts and municipalities. Each district has a municipal council, and each municipio a communal junta. The Federal District and the Territories are administered by the President of the Republic through Governors, who in turn appoint secretaries.

Area and Population.

Venezuela has an area of about 398,594 square miles. According to the census of December, 1920, the population was 2,414,952, the density for the entire country being 6 persons to the square mile.

The long-standing boundary dispute with Colombia, which has continued since the separation of the two Republics in 1830, is now approaching settlement, the decision of the President of the Swiss Confederation, to whom it was submitted by a Convention signed at Bogotá in 1916, having been given on March 24, 1922. By it the line fixed by the award of the King of Spain of March 16, 1891, is practically upheld the north-easterly end of the Guayana Peninsula being definitely assigned to Colombia.

AREA AND POPULATION—RELIGION AND INSTRUCTION .1403

The country is now divided into a Federal District, 20 States and 2 Territories, as follows:—

State	Capital	Pop. Dec. 31, 1920	State	Capital	Pop. Dec. 31, 1920
Anzoátegui .	Barcelona	103,573	Portuguesa .	Guayare	52,549
Apure . .	San Fernando		Sucre . .	Cumana	150,211
	de Apure	39,187	Táchira .	San Cristóbal	147,076
Aragua . .	Maracay	95,902	Trujillo .	Trujillo	178,942
Bolívar . .	Ciudad Bolívar	65,852	Yaracuy .	San Felipe	108,022
Carabobo .	Valencia	125,514	Zamora . .	Barinas	55,055
Cócedes . .	San Carlos	81,850	Zulia . .	Maracaibo	119,458
Falcón . .	Coro	128,255	Ter. Amazonas	San Fernando	
Guárico . .	Calabozo	122,190		de Atabapo	48,940
Lara . . .	Barquisimeto	219,816	„ Delta-	Tucupita	13,474
Mérida . .	Mérida	123,232	Amacuro		
Miranda . .	Ocumare	174,266	Federal Dist.	Caracas	140,132
Monagas . .	Maturín	64,421			
Nueva Esparta	La Asunción	56,035		Total .	2,411,952

Some of the more important cities with their population according to the census of 1920, are :

Caracas . .	92,212	Ciudad Bolívar .	19,712	Mérida . . .	14,082
Maracaibo .	46,706	Cumana . . .	16,342	Trujillo . .	12,415
Valencia . .	29,496	Caro	15,533	Barcelona .	10,883
Barquisimeto	23,943	Maturín . . .	15,465	Ocumare . .	10,048
San Cristóbal	21,385	San Felipe . .	15,506	Maiguetia .	8,637

The movement of population, according to official statistics, is shown as follows:—

Year	Marriages	Births	Deaths	Immigrants	Emigrants
1919	17,170	88,055	62,019	12,433	12,879
1920	12,874	74,174	54,715	11,178	11,883
1921	12,936	73,699	61,001	10,086	9,152

Religion and Instruction.

The Roman Catholic is the State religion, but there is toleration of all others. The Archbishop of Caracas has 5 suffragan bishops.

Instruction is given both in public and private schools, and teaching is entirely free. But under a new scheme introduced in 1915, all pupils whether of elementary, professional or high schools, must pass the requisite State examination. The State also prescribes the courses of study for all grades of schools. Great stress is laid on practical instruction, and accordingly in 1915 the Government established practical courses in medicine, and began to build laboratories for all grades of schools. Elementary instruction is free, but backward, and from the age of 7 to the completion of the primary grade, compulsory. At Caracas is the central University (re-opened in July, 1922, after being closed since October, 1912), and in Mérida is the University of Los Andes. Superior instruction is divided into schools, viz. : Philosophy and Letters; Physical, Mathematical, and Natural Sciences; Medical Science; Political Science; and Ecclesiastical Science. These schools can be established separately or can unite to form Universities. There are at present in activity, the University of Los Andes, eight schools of Political Science and of Ecclesiastical Science, and in Caracas Schools of Medical Science and

of Ecclesiastical Science, besides private schools of Political Science. Steps are being taken for the establishment of other schools and institutes for superior instruction. The University Faculties have teaching members (professors), ordinary members (doctors), and honorary members. The Government supports also the following Institutes for special instruction: a School of Plastic Arts, another of Music and Elocution, two of Arts and Trades (one for men and the other for women), and three of Commerce. Total expenditure on education 1921-22, 4,425,587 bolivars (2,493,538 bolivars for elementary education).

Justice.

Judicial authority resides in the 'Federal Court of Cassation,' which is the supreme tribunal of the Federation and States, and in various tribunals and courts established by special laws. Members of the Federal Court of Cassation (seven in number) are elected by Congress for 7 years, one for each of seven groups of States into which the Republic is divided for this purpose. They select their own President, Vice-President, and Chancellor. The Federal Procurator-General is appointed for 3 years.

The States have each a Supreme Court with 3 members called respectively President, Relator, and Chancellor. Each State has also a superior court, courts of first instance, district courts, and municipal courts. The States' judicial officers hold their posts for 3 years. In the Territories there are civil and criminal judges of first instance, and also judges in the municipios.

Finance.

The revenue and expenditure for five years were as follows:—

—	1918-19	1919-20	1920-21	1921-22 ¹	1922-23 ¹
	£	£	£	£	£
Revenue . . .	3,759,700	4,045,377	3,230,127	2,182,929	2,408,192
Expenditure . .	3,085,093	2,722,621	4,065,575	2,504,316	2,443,802

¹ Estimates.

The following table shows (in bolivars) the principal items of the budget for the fiscal year ending June 30, 1923:—

Items	Revenue	Items	Expenditure
	Bolivars		Bolivars
Customs (including stamps)	23,086,000	Department of Interior . .	12,199,035
Tobacco	8,800,000	Department of Foreign Affairs	2,461,023
Liquor	7,500,000	Department of Finance . .	7,375,665
Salt	6,600,000	Public Debt	8,192,498
Stamps	6,680,000	Ministry of War and Marine	12,000,000
Mines	2,300,000	Ministry of Commerce . .	1,744,060
Other revenue	5,930,860	Post Office, Telegraph, and Telephones	4,380,767
Total (ordinary revenue)	60,896,860	Ministry of Public Works .	8,270,820
From Treasury Reserve Funds,	809,140	" " Education	4,465,667
		Budget rectifications . .	610,465
Total	61,706,000	Total	61,706,000

The public debt on Dec. 31, 1921, was 124,790,292 bolivars (4,942,185*l.*). Of the total the internal debt at 3 per cent. amounted to 46,231,003 bolivars. The 3 per cent. Diplomatic debt of 1905 amounted to 69,517,795 bolivars (2,753,180*l.*).

Defence.

In 1920 a law was promulgated according to which all Venezuelans have to serve two years with the active forces of the army, and to remain in the reserve until the age of 45. The active army consists of infantry, 20 battalions, each of 400 men; artillery, 8 batteries, each of 200 men, and 1 naval battalion. The naval force contains one battalion distributed among the vessels of the navy, which consists of 3 gunboats and a training ship acquired in 1912.

Production and Industry.

The surface of Venezuela is naturally divided into 3 distinct zones—the agricultural, the pastoral, and the forest zone. In the first are grown coffee, cocoa, sugar-cane, maize, cotton, beans, &c.; the second affords runs for cattle; and in the third tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, copaiba, vanilla, growing wild, are worked by the inhabitants. The area under coffee is estimated at from 180,000 to 200,000 acres. The coffee plantations number about 32,000, and those of cocoa 5,000. There are about 11,000 sugar plantations. The annual production of sugar may be estimated at 60,000 tons.

One-fifth of the population is engaged in agriculture. The live-stock in Venezuela is estimated as follows:—2,077,684 oxen, 113,439 sheep, 2,154,716 goats, 167,708 horses, 54,565 mules, 200,439 asses, 512,086 pigs. In the agricultural and cattle industries about 60,000 labourers are employed.

Venezuela is rich in metals and other minerals. One of the principal mining industries is the production of gold in the region to the south-east of Ciudad Bolívar. In 1920, 585,977 grammes of gold were produced, apart from about 250,000 grammes of placer gold, and 805,076 grammes exported. Copper ore production was 11,323 tons in 1921. Coal is worked at Coro, in Falcon State, and at Naricual; total production in 1920, 29,708 tons; 1921, 23,619 tons. Salt mines in various States are now worked by the Government. Petroleum is found in many places, the production in 1921 amounted to 218,146 tons, exportation 151,158 tons. Asphalt from Lake Bermudez is exported to the United States; output in 1921, 48,489 tons. Round the island of Margarita and neighbouring islets off the north coast of Venezuela pearl fishing is carried on. Government revenue in 1920 from mining royalties was 1,709,752 bolivars, and from pearl-fishery licences, 433,640 bolivars.

Venezuela has few industries, most manufactured materials required being imported. There are two cotton mills at Valencia, one at Caracas, and one at Cumana, producing textiles which compete with imported Manchester goods in the cheaper qualities. Coarse fibre sacks are manufactured locally. There is also a cement and a glass factory at Caracas. Salt and matches are Government monopolies; the latter is farmed by a British Company.

Commerce.

The value of the imports into and exports from Venezuela in the last 5 years was :—

—	1916-17	1917-18	1918-19	1919-20	1920-21
	£	£	£	£	£
Imports	5,316,722	3,382,759	5,243,147	10,927,762	7,560,680
Exports	4,794,670	3,920,866	9,724,268	8,925,148	4,708,961

Principal domestic exports in 1919-20 and 1920-21 were :—

—	1919-20	1920-21	—	1919-20	1920-21
	Bolivars	Bolivars		Bolivars	Bolivars
Coffee	101,723,718	45,357,206	Hides	23,364,226	5,106,000
Cocoa	46,454,182	17,857,058	Cattle	4,005,520	4,475,000
Balata & rubber	9,673,187	7,320,347	Gold	2,757,135	2,369,000

The distribution of the commerce in 1919-20 and 1920-21 was mainly as follows :—

—	Imports		Exports	
	1919-20	1920-21	1919-20	1920-21
	£	£	£	£
United States	6,502,886	3,577,034	4,432,727	1,967,724
United Kingdom (including Trinidad)	2,335,502	1,470,276	632,561	533,109
Spain	428,127	476,158	774,785	416,673
France (including F.W.I.)	513,310	596,439	1,020,162	352,614
Netherlands (including D.W.I.)	214,082	352,413	411,711	972,312
Italy	212,247	349,487	72,436	12,013

Of the imports in 1920-21, the United States furnished 47·7 per cent. and the United Kingdom 19·5 per cent. ; and of the exports the United States took 42 per cent. and the United Kingdom 10·6 per cent.

Total trade between Venezuela and the United Kingdom (according to the Board of Trade returns) for 5 years :—

	1918	1919	1920	1921	1922
	£	£	£	£	£
Imports from Venezuela to U. Kingdom	423,050	976,008	904,735	316,723	238,855
Exports to Venezuela from U. Kingdom	1,025,139	1,359,987	3,380,500	724,328	950,022

Shipping and Communications.

The number of vessels which entered ports of Venezuela in 1920-21 was 1,088, of an aggregate tonnage of 1,257,445 (British vessels, 75 of 218,459 tons). Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government.

Venezuela had in 1918, 11 steamers of 5,298 tons, and 15 sailing vessels of 2,432 tons.

The roads of the country have recently been much improved. There are now good carriage roads from Caracas to La Guaira and Macuto, from Caracas to Valencia and Puerto Cabello, eventually to be continued to San Cristobal (683 miles), and from Caracas to Guatire, projected as far as Ciudad

Bolívar; from Maracay two new roads have been opened to Ocumare de la Costa, and to Villa de Cura and the Llanos of Apure; in remoter parts, away from the rivers, traffic is carried on by means of pack animals and small mule-carts. A new road has also been constructed in the western part of the country from Uraca, the present terminus of the Tachira Railroad, southward of the mountains of San Cristóbal. Two great new roads are under construction, the Gran Carretera Oriental (626 miles), and the Gran Carretera Occidental (540 miles). Total mileage of roads on December 31, 1919, 1,636.

In Venezuela there are 12 lines of railway (5 national and 7 foreign—the latter including 4 British and 1 German) with a total length of (January 1st, 1921) 644 miles. The Great Railway of Venezuela, 113 miles in extent, is one of the longest lines in the Republic, running between Caracas and Valencia. Other lines are the La Guaira and Caracas line (22 miles), the Venezuela Central Railway (45 miles), the Puerto Cabello and Valencia Railway (34 miles), the Bolívar Railway (143 miles), the oldest line in operation in the country, and which runs from the port of Tucucas to Barquisimeto; Great Tachira Railway (74 miles); Great Railway of La Ceita (52 miles); Carenero Railway (33 miles); Guanta to Barcelona Railway (22 miles); and Santa Barbara to El Vigía Railway (37 miles). In 1921 gross railway receipts amounted to 16,710,309 bolívares, and working expenses to 11,613,470 bolívares. In Caracas electric tramways are worked by a British Company.

There are about 11,160 miles of navigable water in Venezuela. The Compañía Venezolana de Navegación has a virtual monopoly of the navigation of the river and its tributaries and the Lake of Maracaibo.

The telegraph system has (1922) a network of 6,244 miles; 218 telegraph offices; messages 983,883. Receipts amounted to 1,131,754 bolívares (1920–21). A British company supplies telephonic communication in most parts of the settled country in the neighbourhood of Caracas. Length of telephone lines in the Republic (December, 1914) 12,511 miles. There are 359 post-offices. Official returns show that, in all, 10,517,708 letters, 594,222 postcards, 7,580,240 packets containing printed matter, and 131,490 packets of samples were handled in 1921, as well as 243,261 'business' papers and 531,677 official letters (inland postage). Registered letters numbered 105,956 inland and 96,358 foreign during 1921.

There are wireless stations at Caracas, Maracay, Puerto Cabello, Maracaibo, San Cristóbal, Porlamar, La Guaira, and Barquisimeto.

Money, Weights, and Measures.

The Bank of Venezuela (capital 24,000,000 bolívares) had on June 30, 1921, a reserve fund of 4,404,719 bolívares; cash holdings (June 30, 1922) of 50,562,207 bolívares gold and 8,135,861 bolívares silver. The Bank of Caracas has a capital of 6,000,000 bolívares, with reserve amounting (December 31, 1920) to 1,259,835 bolívares. There are also two other banks, the Bank of Maracaibo with a capital of 1,250,000 bolívares, and the Commercial Bank of Maracaibo with a capital of 400,000 bolívares.

The new Venezuelan banking law (1918) authorises the free establishment of banks in Venezuela, which, provided they are incorporated as native companies, shall have power to issue notes to bearer convertible on presentation.

The official monetary unit is the *Bolívar* (equivalent to 2.290323 grammes fine gold), which corresponds to the franc. It is divided into 100 céntimos. The face value of £1 is 25.25 bolívares. The following are the coins in current circulation: Gold, 100 (morococas) and 20 bolívares; silver,

5, 2'50, 2, 1, 0'50 (real) bolivars, and 0'25 (medio) bolivars; nickel, 0'125 (locha), 0'05 (centavo) bolivars.

The bank notes in circulation are as follows (the figures in brackets showing their values at par): 1,000 bolivars (£39 11s. 8d.); 800 bolivars (£31 13s. 4d.); 500 bolivars (£19 15s. 10d.); 400 bolivars (£15 16s. 8d.); 100 bolivars (£3 19s. 2d.); 50 bolivars (£1 19s. 7d.); 20 bolivars (15s. 10d.); and 10 bolivars (7s. 11d.). Note issue on June 30, 1922, amounted to: Bank of Venezuela, 30,440,000 bolivars; Bank of Caracas, 6,770,000 bolivars; and the Bank of Maracaibo, 1,875,000 bolivars.

Gold coins are the old Spanish *onza* (80 bolivars—very rare) and 20 bolivars. Silver coins are 5-bolivar pieces, commonly called *fuerte* (3s. 11½d.); 2½ bolivars (1s. 11½d.); 2 bolivars (1s. 7d.); 1 bolivar (9½d.); ½-bolivar, called a *real* (4½d.); and ¼ bolivar, called a *medio* (2½d.). Nickel coins are 0'125 bolivar, commonly called a *cuartillo* or a *locha* (1½d.), and 0'05 bolivar, called a *centavo* (½d.).

A decree of May 18, 1912, provided that the official system of weights and measures shall be the metric system.

Diplomatic and Consular Representatives.

1. OF VENEZUELA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Diógenes Escalante.

Secretary.—Julio F. Méndez.

Acting Secretary and Commercial Attaché.—Dr. Eduardo Arroyo Lameda.

Honorary Attaché.—Lino Duarte Coll.

Consul in London (Honorary).—Senor Pablo Heyden.

There are Consular representatives at Cardiff, Liverpool, Manchester, Glasgow, Newport, and Southampton.

2. OF GREAT BRITAIN IN VENEZUELA.

Envoy Extraordinary and Minister Plenipotentiary.—H. H. D. Beaumont, appointed May 1, 1916.

Naval Attaché.—Capt. F. L. Tottenham, C.B.E., R.N.

Vice-Consul at Caracas.—E. A. Edmond.

There are a Consul at Bolivar, Vice-Consuls at La Guaira, Maracaibo, Puerto Cabello, and Consular-Agents at San Felix, Barrancas, and Carupano.

Statistical and other Books of Reference concerning Venezuela.
